CYCLOPÆDIA

OF

BIBLICAL LITERATURE.

IBZAN (אִבְצָן, *illustrious*; Sept. Ἀβαισσάν), the tenth 'judge' of Israel.' He was of Bethlehem, probably the Bethlehem of Zebulun and not of Judah. He governed seven years. The prosperity of Ibzan is marked by the great number of his children (thirty sons and thirty daughters), and his wealth by their marriages—for they were all married. Some have held, with little probability, that Ibzan was the same with Boaz; B.C. 1182 (Judg. xii. 8.).

I-CHABOD (אִי כָבוֹד, *where is the glory?* Sept. Ἀχιτώβ), son of Phinehas and grandson of Eli. He is only known from the unhappy circumstances of his birth, which occasioned this name to be given to him. The pains of labour came upon his mother when she heard that the ark of God was taken, that her husband was slain in battle, and that these tidings had proved fatal to his father Eli. They were death-pains to her; and when those around sought to cheer her, saying, 'Fear not, for thou hast borne a son,' she only answered by giving him the name of Ichabod, saying, 'The glory is departed from Israel' (1 Sam. iv. 19-22); B.C. 1141. The name again occurs in 1 Sam. xiv. 3 [ELI].

ICONIUM (Ἰκόνιον), a town, formerly the capital of Lycaonia, as it is now, by the name of Konieh, of Karamania, in Asia Minor. It is situated in N. lat. 37° 51′, E. long. 32° 40′, about one hundred and twenty miles inland from the Mediterranean. It was visited by St. Paul in A.D. 45, when many Gentiles were converted; but some unbelieving Jews excited against him and Barnabas, a persecution, which they escaped with difficulty (Acts xiii. 51; xiv. 1, &c.). He undertook a second journey to Iconium in A.D. 51. The church planted at this place by the apostle continued to flourish, until, by the persecutions of the Saracens, and afterwards of the Seljukians, who made it one of their sultanies, it was nearly extinguished. But some Christians of the Greek and Armenian churches, with a Greek metropolitan bishop, are still found in the suburbs of the city, not being permitted to reside within the walls.

Konieh is situated at the foot of Mount Taurus, upon the border of the lake Trogolis, in a fertile plain, rich in valuable productions, particularly apricots, wine, cotton, flax, and fruits. The circumference of the town is between two and three miles, beyond which are suburbs not much less populous than the town itself. The walls, strong and lofty, and flanked with square towers, which, at the gates, are placed close together [see cut, No. 317], were built by the Seljukian Sultans of Iconium, who seem to have taken considerable pains to exhibit the Greek inscriptions, and the remains of architecture and sculpture, belonging to the ancient Iconium, which they made use of in building the walls. The town, suburbs, and gardens, are plentifully supplied with water from streams which flow from some hills to the westward, and which, in the north-east, join the lake, which varies in size with the season of the year. In the town carpets are manufactured, and blue and yellow leathers are tanned and dried. Cotton, wool, hides, and a few of the other raw productions which enrich the superior industry and skill of the manufacturers of Europe, are sent to Smyrna by caravans.

The most remarkable building in Konieh is the tomb of a priest highly revered throughout Turkey, called Hazreet Mevlana, the founder of the Mevlevi Dervishes. The city, like all those renowned for superior sanctity, abounds with dervishes, who meet the passenger at every turning of the streets, and demand paras with the greatest clamour and insolence. The bazaars and houses have little to recommend them to notice (Kinneir's *Travels in Asia Minor;* Leake's *Geography of Asia Minor;* Arundell's *Tour in Asia Minor*).

1. IDDO (עִדּוֹ, *seasonable;* Sept. Ἀδδώ), a prophet of Judah, who wrote the history of Rehoboam and Abijah; or rather perhaps who, in conjunction with Seraiah, kept the public rolls during their reigns. It seems by 2 Chron. xiii. 22 that he named his book מִדְרָשׁ, *Midrash*, or 'Exposition.' Josephus (*Antiq.* viii. 9. 1) states that this Iddo was the prophet who was sent to Jeroboam at Bethel, and consequently the same who was slain by a lion for disobedience to his instructions (1 Kings xiii.); and many commentators have followed this statement.

2. IDDO, grandfather of the prophet Zechariah (Zech. i. 1; Ezr. v. 1; vi. 14).

3. IDDO (אִדּוֹ), chief of the Jews of the captivity established at Casiphia, a place of which it is difficult to determine the position. It was to

him that Ezra sent a requisition for Levites and Nethinim, none of whom had yet joined his caravan. Thirty-eight Levites and 250 Nethinim responded to his call (Ezra viii. 17-20), B.C. 457. It would seem from this that Iddo was a chief person of the Nethinim, descended from those Gibeonites who were charged with the servile labours of the tabernacle and temple. This is one of several circumstances which indicate that the Jews in their several colonies under the Exile were still ruled by the heads of their nation, and allowed the free exercise of their worship.

4. IDDO (יִדּוֹ, *lovely;* Sept. Ἰαδαΐ), a chief of the half tribe of Manasseh beyond the Jordan (1 Chron. xxvii. 21).

IDLE. The ordinary uses of this word require no illustration. But the very serious passage in Matt. xii. 36 may suitably be noticed in this place. In the Authorized Version it is translated, 'I say unto you, that *every idle word* that men shall speak, they shall give an account thereof in the day of judgment.' The original is, Ὅτι πᾶν ῥῆμα ἀργόν, ὃ ἐὰν λαλήσωσιν οἱ ἄνθρωποι, ἀποδώσουσι περὶ αὐτοῦ λόγον ἐν ἡμέρᾳ κρίσεως. The whole question depends upon the meaning or rather force of the term ῥῆμα ἀργόν, rendered 'idle word,' concerning which there has been no little difference of opinion. Many understand it to mean 'wicked and injurious words,' as if ἀργόν were the same as πονηρόν, which is indeed found as a gloss in Cod. 126. The sense is there taken to be as follows:—'Believe me, that for every wicked and injurious word men shall hereafter render an account.' And our Lord is supposed to have intended in this passage to reprehend the Pharisees, who had spoken impiously against Him, and to threaten them with the severest punishments; inasmuch as every one of their injurious and impious words should one day be judged. This interpretation of the word ἀργόν is, however, reached by a somewhat circuitous process of philological reasoning, which is examined with much nicety by J. A. H. Tittmann, and shown to be untenable. He adds: 'This interpretation, moreover, would not be in accordance with what precedes in verses 33-35, nor with what follows in verse 37. For it is not any *wicked* discourse which is there represented; but the feigned piety of the Pharisees, and their affected zeal for the public welfare. In order to avoid a charge of levity and indifference, they had demanded "a sign," σημεῖον; as if desirous that both they and others might know whether Jesus was truly the Messiah. Against this dissimulation in those who uttered nothing sincerely and from the heart, Jesus had inveighed in severe and appropriate terms in verses 33-35, using the comparison of a tree, which no one judges to be good and useful unless it bears good fruit, and from which, if it be bad, no one expects good fruit. But if now the sense of verse 36 is such as these interpreters would make it, there is added in it a sentiment altogether foreign to what precedes, and ἀργόν becomes not only destitute of effect and force, but involves a sentiment incongruous with that in verse 37. For where our Lord says that hereafter every one shall be judged according to his words, He cannot be understood to mean that every one will be capable of proving his integrity and goodness merely by His words alone—a sentiment surely as far as possible from the intention of our Divine Master. We must, therefore, necessarily understand a certain kind of words or discourse, which, under the appearance of sincerity or candour, is often the worst possible, and καταδικάζει τὸν ἄνθρωπον, "condemns a man," because it is uttered with an evil purpose. If, then, we interpret ἀργόν according to established Greek usage, there arises a natural and very appropriate sense, namely, ἀργόν is the same as ἄεργον, *otiosus, vain, idle;* then, *void of effect, without result, followed by no corresponding event.* Therefore ῥῆμα ἀργόν is *empty or vain words* or *discourse, i. e.* void of truth, and to which the event does not correspond. In short, it is the empty, inconsiderate, insincere language of one who says one thing and means another; and in this sense ἀργός is very frequently employed by the Greeks.' This Tittmann confirms by a number of citations; and then deduces from the whole that the sense of the passage under review is: 'Believe me, he who uses false and insincere language shall suffer grievous punishment: your words, if uttered with sincerity and ingenuousness, shall be approved; but if they are dissembled, although they bear the strongest appearance of sincerity, they shall be condemned' (See Tittmann, *On the Principal Causes of Forced Interpretations of the New Testament,* in *Am. Bib. Repository* for 1831, pp. 481-484).

IDOLATRY. In giving a summary view of the forms of idolatry which are mentioned in the Bible, it is expedient to exclude all notice of those illegal images which were indeed designed to bear some symbolical reference to the worship of the true God, but which partook of the nature of idolatry; such, for example, as the golden calf of Aaron (cf. Neh. ix. 18); those of Jeroboam; the singular ephods of Gideon and Micah (Judg. viii. 27; xvii. 5); and the Teraphim.

Idolatry was the most heinous offence against the Mosaic law, which is most particular in defining the acts which constitute the crime, and severe in apportioning the punishment. Thus, it is forbidden to make any image of a strange God; to prostrate oneself before such an image, or before those natural objects which were also worshipped without images, as the sun and moon (Deut. iv. 19); to suffer the altars, images, or groves of idols to stand (Exod. xxxiv. 13); or to keep the gold and silver of which their images were made, and to suffer it to enter the house (Deut. vii. 25, 26); to sacrifice to idols, most especially to offer human sacrifices; to eat of the victims offered to idols by others; to prophesy in the name of a strange god; and to adopt any of the rites used in idolatrous worship, and to transfer them to the worship of the Lord (Deut. xii. 30, 31). As for punishment, the law orders that if an individual committed idolatry he should be stoned to death (Deut. xvii. 2-5); that if a town was guilty of this sin, its inhabitants and cattle should be slain, and its spoils burnt together with the town itself (Deut. xiii. 12-18). To what degree also the whole spirit of the Old Testament is abhorrent from idolatry, is evident (besides legal prohibitions, prophetic denunciations, and energetic appeals like that in Isa. xliv. 9-20) from the literal sense of the terms which are used as synonymes for idols and

their worship. Thus idols are called הָאֱלִילִים, *the inane* (Lev. xix. 4); הֲבָלִים, *vanities*—the τὰ μάταια of Acts xiv. 15—(Jer. ii. 5); אָוֶן, *nothing* (Isa. lxvi. 3); שִׁקּוּצִים, *abominations* (1 Kings xi. 5); גִּלּוּלִים, *stercora* (Ezek. vi. 4); and their worship is called *whoredom*, which is expressed by the derivatives of זָנָה.

The early existence of idolatry is evinced by Josh. xxiv. 2, where it is stated that Abram and his immediate ancestors dwelling in Mesopotamia 'served other gods.' The terms in Gen. xxxi. 53, and particularly the plural form of the verb, seem to show that some members of Terah's family had each different gods. From Josh. xxiv. 14, and Ezek. xx. 8, we learn that the Israelites, during their sojourn in Egypt, were seduced to worship the idols of that country; although we possess no particular account of their transgression. In Amos v. 25, and Acts vii. 42, it is stated that they committed idolatry in their journey through the wilderness; and in Num. xxv. 1, sq., that they worshipped the Moabite idol Baal-peor at Shittim. After the Israelites had obtained possession of the promised land, we find that they were continually tempted to adopt the idolatries of the Canaanite nations with which they came in contact. The book of Judges enumerates several successive relapses into this sin. The gods which they served during this period were Baal and Ashtoreth, and their modifications; and Syria, Sidon, Moab, Ammon, and Philistia, are named in Judg. x. 6, as the sources from which they derived their idolatries. Then Samuel appears to have exercised a beneficial influence in weaning the people from this folly (1 Sam. vii.); and the worship of the Lord acquired a gradually increasing hold on the nation until the time of Solomon, who was induced in his old age to permit the establishment of idolatry at Jerusalem. On the division of the nation, the kingdom of Israel (besides adhering to the sin of Jeroboam to the last) was specially devoted to the worship of Baal, which Ahab had renewed and carried to an unprecedented height; and although the energetic measures adopted by Jehu, and afterwards by the priest Jehoiada, to suppress this idolatry, may have been the cause why there is no later express mention of Baal, yet it is evident from 2 Kings xiii. 6, and xvii. 10, that the worship of Asherah continued until the deportation of the ten tribes. This event also introduced the peculiar idolatries of the Assyrian colonists into Samaria. In the kingdom of Judah, on the other hand, idolatry continued during the two succeeding reigns; was suppressed for a time by Asa (1 Kings xv. 12); was revived in consequence of Joram marrying into the family of Ahab; was continued by Ahaz; received a check from Hezekiah; broke out again more violently under Manasseh; until Josiah made the most vigorous attempt to suppress it. But even Josiah's efforts to restore the worship of the Lord were ineffectual; for the later prophets, Zephaniah, Jeremiah, and Ezekiel, still continue to utter reproofs against idolatry. Nor did the capture of Jerusalem under Jehoiachim awaken this peculiarly sensual people; for Ezekiel (viii.) shows that those who were left in Jerusalem under the government of Zedekiah had given themselves up to many kinds of idolatry; and Jeremiah (xliv. 8) charges those inhabitants of Judah who had found an asylum in Egypt, with having turned to serve the gods of that country. On the restoration of the Jews after the Babylonian captivity, they appear, for the first time in their history, to have been permanently impressed with a sense of the degree to which their former idolatries had been an insult to God, and a degradation of their own understanding—an advance in the culture of the nation which may in part be ascribed to the influence of the Persian abhorrence of images, as well as to the effects of the exile as a chastisement. In this state they continued until Antiochus Epiphanes made the last and fruitless attempt to establish the Greek idolatry in Palestine (1 Macc. i.).

The particular forms of idolatry into which the Israelites fell are described under the names of the different gods which they worshipped [Ashtoreth, Baal, &c.]: the general features of their idolatry require a brief notice here. According to Movers (*Die Phönizier*, i. 148), the religion of all the idolatrous Syro-Arabian nations was a deification of the powers and laws of nature, an adoration of those objects in which these powers are considered to abide, and by which they act. The deity is thus the invisible power in nature itself, that power which manifests itself as the generator, sustainer, and destroyer of its works. This view admits of two modifications: either the separate powers of nature are regarded as so many different gods, and the objects by which these powers are manifested—as the sun, moon, &c.—are regarded as their images and supporters; or the power of nature is considered to be one and indivisible, and only to differ as to the forms under which it manifests itself. Both views coexist in almost all religions. The most simple and ancient notion, however, is that which conceives the deity to be in human form, as male and female, and which considers the male sex to be the type of its active, generative, and destructive power; while that passive power of nature whose function is to conceive and bring forth, is embodied under the female form. The human form and the diversity of sex lead naturally to the different ages of life—to the old man and the youth, the matron and the virgin—according to the modifications of the conception; and the myths which represent the influences, the changes, the laws, and the relations of these natural powers under the sacred histories of such gods, constitute a harmonious development of such a religious system.

Those who saw the deity manifested by, or conceived him as resident in, any natural objects, could not fail to regard the sun and moon as the potent rulers of day and night, and the sources of those influences on which all animated nature depends. Hence star-worship forms a prominent feature in all the false religions mentioned in the Bible. Of this character chiefly were the Egyptian, the Canaanite, the Chaldæan, and the Persian religions. The Persian form of astrolatry, however, deserves to be distinguished from the others; for it allowed no images nor temples of the god, but worshipped him in his purest symbol, fire. It is understood that this form is alluded to in most of those passages which mention the worship of the sun, moon, and heavenly host, by incense, on heights (2 Kings xxiii. 5, 12; Jer. xix. 13). The other form of astrolatry, in which the idea of the

sun, moon, and planets, is blended with the worship of the god in the form of an idol, and with the addition of a mythology (as may be seen in the relations of Baal and his cognates to the sun), easily degenerates into lasciviousness and cruel rites.

The images of the gods, the standard terms for which are מצבה, עצב, and צלם, were, as to material, of stone, wood, silver, and gold. The first two sorts are called פסל, as being hewn or carved; those of metal had a trunk or stock of wood, and were covered with plates of silver or gold (Jer. x. 4); or were cast (מסכה). The general rites of idolatrous worship consist in burning incense; in offering bloodless sacrifices, as the dough-cakes (כונים) and libations in Jer. vii. 18, and the raisin-cakes (אשישי ענבים) in Hos. iii. 1; in sacrificing victims (1 Kings xviii. 26), and especially in human sacrifices [Moloch]. These offerings were made on high places, hills, and roofs of houses, or in shady groves and valleys. Some forms of idolatrous worship had libidinous orgies [Ashtoreth]. Divinations, oracles (2 Kings i. 2), and rabdomancy (Hos. iv. 12) form a part of many of these false religions. The priesthood was generally a numerous body; and where persons of both sexes were attached to the service of any god (like the קדשים and קדשות of Ashtoreth), that service was infamously immoral. It is remarkable that the Pentateuch makes no mention of any *temple* of idols; afterwards we read often of such.—J. N.

IDUMÆA. Ἰδουμαία is the Greek form of the Hebrew name Edom, or, according to Josephus (*Antiq.* ii. 1. 1), it is only a more agreeable mode of pronouncing what would otherwise be Ἀδῶμα (comp. Jerome on Ezek. xxv. 12). In the Septuagint we sometimes meet with Ἐδώμ, but more generally with Ἰδουμαία (the people being called Ἰδουμαῖοι), which is the uniform orthography in the Apocrypha as well as in Mark iii. 8, the only passage in the New Testament where it occurs. Our Authorized Version has in three or four places substituted for Edom 'Idumea,' which is the name employed by the writers of Greece and Rome, though it is to be noted that they, as well as Josephus, include under that name the south of Palestine, and sometimes Palestine itself, because a large portion of that country came into possession of the Edomites of later times.

The Hebrew אדם Edom, as the name of the people is *masculine* (Num. xx. 22); as the name of the country, *feminine* (Jer. xlix. 17). We often meet with the phrase *Eretz-Edom*, 'the Land of Edom,' and once with the poetic form *Sedeh-Edom*, 'the Field of Edom' (Judg. v. 4). The inhabitants are sometimes styled *Beni-Edom*, 'the Children of Edom,' and poetically *Bath-Edom*, 'the Daughter of Edom' (Lam. iv. 21, 22). A single person was called אדמי *Adomi*, 'an Edomite' (Deut. xxiii. 8), of which the feminine plural אדמית *Adomith* occurs in 1 Kings xi. 1. The name was derived from Isaac's son *Edom*, otherwise called Esau, the elder twin-brother of Jacob [Esau]. It signifies *red*, and seems first to have been suggested by his appearance at his birth, when 'he came out all red' (*i. e.* covered with red hair, Gen. xxv. 25), and was afterwards more formally and permanently imposed on him on account of his unworthy disposal of his birth-right for a mess of red lentiles (Gen. xxv. 30). The region which came to bear his name, is the mountainous tract on the east side of the great valleys El Ghor and El Araba, extending between the Dead Sea and the Elanitic Gulf of the Red Sea. Some have conjectured that the latter sea was called 'Red,' because it washed the shore of 'Edom;' but it never bears in Hebrew the name of *Yam-Edom:* it is uniformly designated *Yam-Suph*, *i. e.* 'the Sea of Madrepores.' Into this district Esau removed during his father's life-time, and his posterity gradually obtained possession of it as the country which God had assigned for their inheritance in the prophetic blessing pronounced by his father Isaac (Gen. xxvii. 39, 40; xxxii. 3; Deut. ii. 5-12, 22). Previously to their occupation of the country, it was called הר שׂעיר, *Mount Seir*, a designation indeed which it never entirely lost. The word *seir* means *hairy* (being thus synonymous with Esau), and, when applied to a country, may signify *rugged*, *mountainous*, and so says Josephus (*Antiq.* i. 20. 3): 'Esau named the country "Roughness" from his own hairy roughness.' But in Gen. xxxvi. 20, we read of an individual of the name of Seir, who had before this inhabited the land, and from whom it may have received its first appellation. Part of the region is still called Esh-*Sherah*, in which some find a trace of *Seir*, but the two words have no etymological relation: the former wants the ע, a letter which is never dropped, and it signifies 'a tract, a possession,' and sometimes 'a mountain.'

The first mention made of Mount Seir in Scripture is in Gen. xiv. 6, where Chedorlaomer and his confederates are said to have smitten 'the Horim in their Mount Seir.' Among the earliest human habitations were caves, either formed by nature or easily excavated, and for the construction of these the mountains of Edom afforded peculiar facilities. Hence the designation given to the Aboriginal inhabitants—*Horim*, *i. e.* cave-dwellers (from חר, a 'cave'), an epithet of similar import with the Greek *Troglodytes*. Even in the days of Jerome 'the whole of the southern part of Idumæa, from Eleutheropolis to Petra and Aila, was full of caverns used as dwellings, on account of the sun's excessive heat' (Jerome *on Obadiah*, ver. 1); and there is reason to believe that the possessors of the country in every age occupied similar habitations, many traces of which are yet seen in and near Petra, the renowned metropolis.

We are informed in Deut. ii. 12, that 'the children of Esau succeeded [*marg.* inherited] the Horim when they had destroyed them from before them, and dwelt in their stead, as Israel did unto the land of his possession, which Jehovah gave unto them.' From this it may be inferred, that the extirpation of the Horim by the Esauites was, like that of the Canaanites by Israel, very gradual and slow. Some think this supposition is confirmed by the genealogical tables preserved in the 36th chapter of Genesis (comp. 1 Chron. 1.), where we have, along with a list of the chiefs of Edom, a similar catalogue of Horite chieftains, who are presumed to have been their contemporaries. But for the *chronology* of these ancient documents we possess no *data* whatsoever, and very precarious, therefore, must be

any deductions that are drawn from them. This much, however, we there learn of the political constitution of the Seirite Aborigines, that, like the Esauites and Israelites, they were divided into tribes, and these tribes were sub-divided into families — the very polity which still obtains among the Arabs by whom Idumæa is now peopled. Each tribe had its own *Alluf*—a term which is unhappily rendered in the English Version by 'Duke'—for though that has, no doubt, the radical meaning of the Latin *dux*, a 'leader,' it now only suggests the idea of a feudal title of nobility. Of these chiefs of the Horites *seven* are enumerated, viz., Lotan, Shobal, Zibeon, Anah, Dishon, Ezer, and Dishan. The only one of these who is spoken of as related to the other is *Anah*, the son of Zibeon. The primitive and pastoral character of the people is incidentally brought out by the circumstance that this Anah, though a chieftain's son, was in the habit of tending his father's asses. It was when thus employed that he found in the wilderness *eth-ha-yemim*, rendered in the English Version by 'the mules,' but meaning more probably 'the hot springs;' and thus interpreted, the passage seems to be an intimation that he was the first to discover the faculty with which asses and other animals are endowed, of snuffing the moisture of the air, and thus sometimes leading to the opportune discovery of hidden waters in the desert. There is in the country to the south-east of the Dead Sea (which formed part of the Seirite possessions), a place, *Kallirhoë*, celebrated among the Greeks and Romans for its warm baths, and which has been visited by modern travellers (Josephus, *De Bell. Jud.* i. 33. 5; Pliny, *Hist. Nat.* v. 5. 17; Legh's *Travels*).

Esau first married into two Canaanitish families of the Hittite and Hivite tribes (Gen. xxvi. 34; xxxvi. 2; in one or other of which places, however, the text seems corrupt); but anxious to propitiate his offended parents, he next formed a matrimonial alliance with one of the race of Abraham, viz., Mahalath, otherwise called Bashemath, daughter of Ishmael, and sister of Nebaioth, whose descendants, the Nabathæans, by a singular coincidence, obtained in after times possession of the land of Edom (Gen. xxviii. 9). Esau's first-born (by Adah or Bashemath, of the daughters of Heth) was Eliphaz, whose son *Teman* gave name to a district of the country (Gen. xxxvi. 11, 34; 1 Chron. i. 45; Ezek. xxv. 13; Obad. verse 9). The Temanites were renowned for their wisdom (Jer. xlix. 7, 20; Baruch iii. 22, 23). The chief speaker in the book of Job is another Eliphaz, a Temanite,—which is one of the circumstances that have led many to place the scene of that story in the land of Edom [Job]. The name of Teman was preserved to the days of Eusebius in that of Thaiman, a small town five Roman miles from Petra. Another son of the first-mentioned Eliphaz was *Amalek*, who is not to be confounded, however, with the father of the Amalekites, one of the doomed nations of Canaan, of whom we hear so early as the age of Abraham (Gen. xiv. 7).

As a modern Arab *sheikh* is often found to exercise influence far beyond the sphere of his hereditary domain, so in the list of the Edomite *emirs* preserved by Moses we have perhaps only the names of the more distinguished individuals who acquired more or less authority over all the tribes. This oligarchy appears gradually to have changed into a monarchy, as happened too among the Israelites; for in addition to the above mentioned lists, both of Horite and Esauite leaders, we have, at Gen. xxxvi. 31, a catalogue of eight kings (Bela, Jobab, Husham, Hadad, Samlah, Saul, Baal-hanan, Hadar or Hadad) who 'reigned in the land of Edom before there reigned any king over the children of Israel.' It is not necessary to suppose that this was said by Moses *prophetically:* it is one of those passages which may have been inserted by Ezra when finally arranging the canon, inasmuch as it occurs also in the first book of Chronicles, of which he is the reputed compiler. The period when this change to regal government took place in Idumæa can only be matter of conjecture. In the Song of Moses (Exod. xv. 15) it is said that at the tidings of Israel's triumphant passage of the Red Sea the rulers or princes (*Alluf*) of Edom trembled with affright, but when, some forty years afterwards, application had to be made by the Israelites for leave to traverse the land of Edom, it was to the king (*Melek*) that the request was addressed (Num. xx. 14). The road by which it was sought to penetrate the country was termed 'the *king's* highway' (ver. 17), supposed by Robinson to be the Wady el-Ghuweir, for it is almost the only valley that affords a direct and easy passage through those mountains. From a comparison of these incidents it may be inferred that the change in the form of government took place during the wanderings of the Israelites in the desert, unless we suppose, with Rosenmüller, that it was only this north-eastern part of Edom which was now subject to a monarch, the rest of the country remaining under the sway of its former chieftains. But whether the regal power at this period embraced the whole territory or not, perhaps it did not supplant the ancient constitution, but was rather grafted on it, like the authority of the Judges in Israel, and of Saul, the first king, which did not materially interfere with the government that previously existed. It further appears, from the list of Idumæan kings, that the monarchy was not hereditary, but elective (for no one is spoken of as the son or relative of his predecessor); or probably that chieftain was acknowledged as sovereign who was best able to vindicate his claim by force of arms. Every successive king appears to have selected his own seat of government: the places mentioned as having enjoyed that distinction are Dinhabah, Avith, Pagu or Pai. Even foreigners were not excluded from the throne, for the successor of Samlah of Masrekah was Saul, or Shaul, 'of Rechoboth, on the river.' The word 'Rechoboth' means, literally, *streets*, and was a not uncommon name given to towns; but the emphatic addition of 'the river,' points evidently to the Euphrates, and between Rakkah and Anah, on that river, there are still the remains of a place called by the Arabs Rachabath-Malik-Ibn Tauk. In the age of Solomon we read of one Hadad, who 'was of the king's seed in Edom' (1 Kings xi. 14); from which some have conjectured that by that period there was a royal dynasty of one particular family; but all that the expression may imply is, that he was a blood-relation of the last king of the country. Hadad was the name of one of the early sove-

reigns 'who smote Midian in the field of Moab' (Gen. xxxvi. 35).

The unbrotherly feud which arose between Esau and Jacob was prolonged for ages between their posterity. The Israelites, indeed, were commanded 'not to abhor an Edomite, for he was their brother' (Deut. xxiii. 7); but a variety of circumstances occurred to provoke and perpetuate the hostility. The first time they were brought into direct collision was when the Edomites, though entreated by their 'brother Israel,' refused the latter a passage through their territories; and they had consequently to make a retrograde and toilsome march to the Gulf of Elath, whence they had to 'compass the land of Edom' by the mountain desert on the east. We do not again hear of the Edomites till the days of Saul, who warred against them with partial success (1 Sam. xiv. 47); but their entire subjugation was reserved for David, who first signally vanquished them in the Valley of Salt (supposed to be in the Ghôr, beside *Usdum*, the Mountain of Salt); and, finally, placed garrisons in all their country (2 Sam. viii. 14; 1 Chron. xviii. 11-13; 1 Kings xi. 15. Comp. the inscription of Ps. lx. and v. 8, 9; cviii. 9, 10, where 'the strong city' may denote Selah or Petra). Then were fulfilled the prophecies in Gen. xxv. 23 and xxvii. 40, that the 'elder should serve the younger;' and also the prediction of Balaam (Num. xxiv. 18), that Edom and Seir should be for possessions to Israel. Solomon created a naval station at Ezion-geber, at the head of the Gulf of Elath, the modern Akaba (1 Kings ix. 26; 2 Chron. viii. 18). Towards the close of his reign an attempt was made to restore the independence of the country by one Hadad, an Idumæan prince, who, when a child, had been carried into Egypt at the time of David's invasion, and had there married the sister of Tahpanhes the queen (1 Kings xi. 14-23) [HADAD]. If Edom then succeeded in shaking off the yoke, it was only for a season, since in the days of Jehoshaphat, the fourth Jewish monarch from Solomon, it is said, 'there was no king in Edom; a deputy was king;' *i. e.* he acted as viceroy for the king of Judah. For that the latter was still master of the country is evident from the fact of his having fitted out, like Solomon, a fleet at Ezion-geber (1 Kings xxii. 47, 48; 2 Chron. xx. 36, 37). It was, no doubt, his deputy (called *king*) who joined the confederates of Judah and Israel in their attack upon Moab (2 Kings iii. 9, 12, 26). Yet there seems to have been a partial revolt of the Edomites, or at least of the mountaineers of Seir, even in the reign of Jehoshaphat (2 Chron. xx. 22); and under his successor, Jehoram, they wholly rebelled, and 'made a king over themselves' (2 Kings viii. 20, 22; 2 Chron. xxi. 8, 10). From its being added that, notwithstanding the temporary suppression of the rebellion, 'Edom revolted from under the hand of Judah unto this day,' it is probable that the Jewish dominion was never completely restored. Amaziah, indeed, invaded the country, and having taken the chief city, Selah or Petra, he, in memorial of the conquest, changed its name to Joktheel (*q. d.* subdued of God); and his successor, Uzziah, retained possession of Elath (2 Kings xiv. 7; 2 Chron. xxv. 11-14; xxvi. 3). But in the reign of Ahaz, hordes of Edomites made incursions into Judah, and carried away captives (2 Chron. xxviii. 17). About the same period Rezin, king of Syria, expelled the Jews from Elath, which (according to the correct reading of 2 Kings xvi. 6) was thenceforth occupied by the Edomites. In our version it is said, 'the *Syrians* dwelt in Elath;' but the *Keri*, or marginal Masoretic reading, instead of ארמים, Aramæans, has אדומים, Edomites, the letter ד being substituted for ר; and this is followed by many MSS., as well as by the Sept. and Vulgate, and best accords with historical fact. But then, to make both clauses of the verse to correspond, we must, with Le Clerc and Houbigant, read the whole thus: 'At that time Rezin, king of Aram, recovered Elath to Edom, and drove the Jews from Elath; and the Edomites came to Elath, and continued there unto this day.' Now was fulfilled the other part of Isaac's prediction, viz. that, in course of time, Esau 'should take his brother's yoke from off his neck' (Gen. xxvii. 40). It appears from various incidental expressions in the later prophets, that the Edomites employed their recovered power in the enlargement of their territory in all directions. They spread as far south as Dedan in Arabia, and northward to Bozrah in the Hhauran; though it is doubtful if the Bozrah of Scripture may not have been a place in Idumæa Proper (Isa. xxxiv. 6; lxiii. 1; Jer. xlix. 7, 8-20; Ezek. xxv. 13; Amos i. 12). When the Chaldæans invaded Judah, under Nebuchadnezzar, the Edomites became their willing auxiliaries, and triumphed with fiendish malignity over the ruin of their kinsmen the Jews, of whose desolated land they hoped to obtain a large portion to themselves (Obad. verses 10-16; Ezek. xxv. 12-14; xxxv. 3-10; xxxvi. 5; Lament. iv. 21). By this circumstance the hereditary hatred of the Jews was rekindled in greater fury than ever, and hence the many dire denunciations of the 'daughter of Edom,' to be met with in the Hebrew prophets (Ps. cxxxvii. 7-9; Obad. *passim;* Jer. xlix. 7; Ezek. xxv. and xxxv.). From the language of Malachi (i. 2, 3), and also from the accounts preserved by Josephus (*Antiq.* x. 9. 7), it would seem that the Edomites did not wholly escape the Chaldæan scourge; but instead of being carried captive, like the Jews, they not only retained possession of their own territory, but became masters of the south of Judah, as far as Hebron (1 Macc. v. 65, comp. with Ezek. xxxv. 10; xxxvi. 5). Here, however, they were, in course of time, successfully attacked by the Maccabees, and about B.C. 125, were finally subdued by John Hyrcanus, who compelled them to submit to circumcision and other Jewish rites, with a view to incorporate them with the nation (1 Macc. v. 3, 65; 2 Macc. x. 16; xii. 32; Joseph. *Antiq.* xiii. 9. 1; 15. 4). The amalgamation, however, of the two races seems never to have been effected, for we afterwards hear of Antipater, an Idumæan by birth, being made by Cæsar procurator of all Judæa; and his son, commonly called Herod the Great, was, at the time of Christ's birth, king of Judæa, including Idumæa; and hence Roman writers often speak of all Palestine under that name (Joseph. *Antiq.* xiv. 1. 3; 8. 5; xv. 7. 9; xvii. 11. 4). Not long before the siege of Jerusalem by Titus, 20,000 Idumæans were called in to the defence of the city by the Zealots; but both parties gave themselves up to rapine and murder (Joseph. *De Bell. Jud.* iv. 4. 5; 6. 1; vii. S. 1).

This is the last mention made of the Edomites in history. The author of a work on Job, once ascribed to Origen, says that their name and language had perished, and that, like the Ammonites and Moabites, they had all become Arabs. In the second century Ptolemy limits the name Idumæa to the country west of the Jordan.

360. [Ravine in Idumæa.]

But while, during the captivity of the Jews in Babylon, the Edomites had thus been extending their territory to the north-west, they were themselves supplanted in the southern part of their native region by the Nabathæans, the descendants of Ishmael's eldest son, and to the article NEBAIOTH, we must refer the reader for the subsequent history of the land of Edom.

From the era of the Crusades down to the present century the land of Esau was, to Europeans, a *terra incognita*. Its situation was laid down on the best maps more than a hundred miles from the true position, and as if lying in a direction where it is now known there is nothing but a vast expanse of desert. Volney had his attention drawn towards it, when at Gaza, by the vague reports of the Arabs, and in 1807 the unfortunate Seetzen penetrated a certain way into the country, and heard of the wonders of the Wady Mûsa; but the first modern traveller who 'passed through the land of Edom' was Burckhardt, in the year 1812. And it has been well remarked by Dr. Robinson (*Amer. Bib. Reposit.* vol. iii. p. 250), that 'had he accomplished nothing but his researches in these regions, his journey would have been worth all the labour and cost expended on it, although his discoveries thus shed their strongest light upon subjects which were not comprehended in the plan or purpose either of himself or his employers.' Burckhardt entered Idumæa from the north, and in the year 1818 he was followed in the same direction by Messrs. Legh, Bankes, Irby and Mangles. In 1828 Laborde and Linant found access from the south; and since then it has been visited and described by so many that the names of its localities have become familiar as household words.

The limit of the wanderings of the Israelites in the desert was the brook Zered, after crossing which they found themselves in the territory of Moab (Deut. ii. 13-18). This brook is supposed to be identical with the *Wady-el-Ahsy*, which, rising near the Castle el-Ahsy, on the route to Mecca of the Syrian caravan upon the high eastern desert, penetrates through the whole chain of mountains to near the south-east corner of the Dead Sea. It was thus the southern border of Moab and the northern of Edom, whence the latter region extended southwards as far as to Elath on the Red Sea. The valley which runs between the two seas consists first of El-Ghor, which is comparatively low, but gradually rises into the more elevated plain of El-Arabah to the south. The country lying *east* of this great valley is the land of Idumæa. It is a mountain tract, consisting at the base of low hills of limestone or argillaceous rock, then lofty mountains of porphyry forming the body of the mountain; above these, sandstone broken up into irregular ridges and grotesque groups of cliffs; and again farther back, and higher than all, long elevated ridges of limestone without precipices. East of all these stretches off indefinitely the high *plateau* of the great eastern desert. Robinson and Smith estimated the height of the porphyry cliffs at about 2000 feet above the Arabah; the elevation of Wady Mûsa above the same is, perhaps, 2000 or 2200 feet, while the limestone ridges further back probably do not fall short of 3000 feet. The whole breadth of the mountainous tract between the Arabah and the eastern desert does not exceed fifteen or twenty geographical miles. Of these mountains the most remarkable is *Mount Hor*, near the Wady Mûsa. [HOR, MOUNT]. While the mountains on the west of the Arabah, though less elevated, are wholly barren, those of Idumæa seem to enjoy a sufficiency of rain, and are covered with tufts of herbs and occasional trees. The wadys, too, are full of trees and shrubs and flowers, while the eastern and higher parts are extensively cultivated, and yield good crops. Hence Robinson thinks its appearance fulfils the promise made to Esau (Gen. xxvii. 39), 'Thy dwelling shall be the fatness of the earth and of the dew of heaven from above.' Yet many critics are of opinion (*e. g.* Vater, De Wette, Geddes, Von Bohlen) that משמני should there be rendered 'from,' *i. e.* 'far away from, or destitute of,' the fatness of the earth, &c.; and it is immediately added, 'for thou shalt live by thy sword;' and it does not appear that Idumæa was ever particularly noted for its fertility. This mountainous region is at present divided into two districts. The northern bears the name of *Jebâl*, *i. e.* 'The Mountain,' the Gebal of the Hebrews (Ps. lxxxiii. 8), and the Gebalene of the Greeks and Romans. Commencing at Wady el-Ahsy, it terminates, according to Burckhardt, at Wady el-Ghuweir, the largest place in it being Tufileh, perhaps the Tophel of Deut. i. 1. The southern district is *esh-Sherah*, extending as far as Akabah, and including Shôbak, Wady Mûsa, Maan, &c. Burckhardt mentions a *third* dis-

trict, *Jebal Hesma;* but Robinson says that though there is a sandy tract, el-Hismah, with mountains around it, on the east of Akabah, it does not constitute a separate division.

The whole of this region is at present occupied by various tribes of Bedouin Arabs. The chief tribe in the *Jebal* is the Hejaya, with a branch of the Kaabineh, while in *esh-Sherah* they are all of the numerous and powerful tribe of the Haweitat, with a few independent allies. The Bedouins in Idumæa have of late years been partially subject to the Pacha of Egypt, paying an annual tribute, which, in the case of the Beni Sukhr, is one camel for two tents. The fellahin, or peasants, are half Bedouin, inhabiting the few villages, but dwelling also in tents; they, too, pay tribute to the Egyptian government, and furnish supplies of grain.

Among the localities connected with Edom which are mentioned in Scripture may be noticed Dinhabah, Bozrah, Theman, Maon (now Maan), Kadesh-barnea (which Robinson identifies with el-Weibeh in the Wady el-Jeib), Zephath (which he supposes to be the pass of Es-Sufah), Elath, and Ezion-geber, &c.; but the most celebrated place in all the region was the chief city, Selah or Petra, for a description of which the reader is referred to the latter head [Petra].

Could the scene of the book of Job be with certainty fixed in Idumæa, we should then possess much curious and valuable information respecting both the country and people soon after it had been colonized by the descendants of Esau (See Mason Good, Wemyss, and others upon Job). But all that we learn directly of the ancient Edomites from the historical books of Scripture represents them as not, indeed, neglecting agriculture or trade (Num. xx. 17), yet, on the whole, a warlike and predatory race, who, according to the prediction of their progenitor Isaac, 'lived by their sword.' The situation of the country afforded peculiar facilities for commerce, which seems to have been prosecuted from a very early period. 'Bordering,' says Volney, 'upon Arabia on the east and south, and Egypt on the south-west, and forming, from north to south, the most commodious channel of communication between Jerusalem and her dependencies on the Red Sea, through the continuous valleys of El-Ghor and El-Araba, Idumæa may be said to have long formed the emporium of the commerce of the East.' The era of its greatest prosperity was after the Nabathæans had become masters of the country and founded the kingdom of Arabia Petræa, of which the renowned metropolis was Petra. The *religion* of the early Edomites was, perhaps, comparatively pure; but in process of time they embraced idolatry: in 2 Chron. xxv. 20, we read of the 'gods of Edom,' one of whom, according to Josephus (*Antiq.* xv. 7. 9), was called *Kotzé*. With respect to the striking fulfilment of the prophetic denunciations upon Edom, we need only refer the reader to the well-known work of Keith, who frequently errs, however, in straining the sense of prophecy beyond its legitimate import, as well as in seeking out too literally minute an accomplishment. On Idumæa generally, see C. B. Michaelis, *Diss. de Antiquiss. Idumæor. Hist.* in Pott and Ruperti's *Sylloge Comment. Theologic.* Part VI. p. 121; J. D. Michaelis, *Comment. de Troglodytis Seiritis*, in the *Syntagma Commentt.*, Part I. p. 194; but especially *Sketches of Idumea and its present Inhabitants*, by Dr. E. Robinson, in the *Amer. Bib. Repository* for April, 1833, p. 247; and the *Bib. Researches* of the same writer, vol. ii. p. 551.—N. M.

ILLYRICUM (Ἰλλυρικόν), a country lying to the north-west of Macedonia, and answering nearly to that which is at present called Dalmatia; by which name indeed the southern part of Illyricum itself was known, and whither St. Paul informs Timothy that Titus had gone (2 Tim. iv. 10). Paul himself preached the Gospel in Illyricum, which was at that time a province of the Roman Empire (Rom. xv. 19).

IMMANUEL (עִמָּנוּאֵל; Sept. Ἐμμανουήλ) or Emmanuel. This word, meaning '*God with us*,' occurs in the celebrated verse of Isaiah (vii. 14), 'Behold, a virgin shall conceive and bear a son, and shall call his name Immanuel.' In forty-three MSS. and thirty-nine printed editions, the word is given in the separate form עמנו אל; but, as Dr. Henderson remarks, 'in the orthography of all compound names, the MSS. and editions widely differ.' In the name itself there is no difficulty; but the verse, as a whole, has been variously interpreted. From the manner in which the word God, and even Jehovah, is used in the composition of Hebrew names, there is no such peculiarity in that of Immanuel as in itself requires us to understand that he who bore it should be in fact God. Indeed, it is used as a proper name among the Jews at this day. This high sense has, however, been assigned to it in consequence of the application of the whole verse by the Evangelist Matthew (i. 23), to our Divine Saviour. Even if this reference did not exist, the history of the Nativity would irresistibly lead us to the conclusion that the verse—whatever may have been its intermediate signification—had an ultimate reference to Christ.

The state of opinion on this point has been thus neatly summed up by Dr. Henderson, in his note on the text:—'This verse has long been a subject of dispute between Jews and professedly Christian writers, and among the latter mutually. While the former reject its application to the Messiah altogether,—the earlier rabbins explaining it of the queen of Ahaz and the birth of his son Hezekiah; and the later, as Kimchi and Abarbanel, of the prophet's own wife,—the great body of Christian interpreters have held it to be directly and exclusively in prophecy of our Saviour, and have considered themselves fully borne out by the inspired testimony of the Evangelist Matthew. Others, however, have departed from this construction of the passage, and have invented or adopted various hypotheses in support of such dissent. Grotius, Faber, Isenbiehl, Hezel, Bolten, Fritsche, Pluschke, Gesenius, and Hitzig, suppose either the then present or a future wife of Isaiah to be the עַלְמָה *almah* [rendered "virgin"], referred to. Eichhorn, Paulus, Hensler, and Ammon, are of opinion that the prophet had nothing more in view than an ideal virgin, and that both she and her son are merely imaginary personages, introduced for the purpose of prophetic illustration. Bauer, Cube, Steudel, and some

others, think that the prophet pointed to a young woman in the presence of the king and his courtiers. A fourth class, among whom are Richard Simon, Lowth, Koppe, Dathe, Williams, Von Meyer, Olshausen, and Dr. J. Pye Smith, admit the hypothesis of a double sense: one in which the words apply primarily to some female living in the time of the prophet, and her giving birth to a son according to the ordinary laws of nature; or, as Dathe holds, to some virgin, who at that time should miraculously conceive; and the other in which they received a secondary and plenary fulfilment in the miraculous conception and birth of Jesus Christ.'

INCENSE, a perfume which gives forth its fragrance by burning, and, in particular, that perfume which was burnt upon the altar of incense [Altar; Censer]. Indeed, the burning of incense seems to have been considered among the Hebrews so much of an act of worship or sacred offering, that we read not of any other use of incense than this among them. Nor among the Egyptians do we discover any trace of burnt perfume but in sacerdotal use; but in the Persian sculptures we see incense burnt before the king. The prohibition of the Hebrews to make any perfume for private use—'to smell to'—like that prepared for the altar, merely implies, we apprehend, that the sacred incense had a peculiarly rich fragrance before being burnt, which was forbidden to be imitated in common perfumes.

The incense is denoted by the words מקטר *miktar* (Exod. xxx. 1); קטר *kitter* (Jer. xliv. 21); and קטרות *kituroth* (Exod. xxx. 1; xxxi. 11; Ezek. xvi. 18); all of which are equally from the root קטר, which, in Pihel, signifies generally *to raise an odour by burning;* and in the verbal form it is applied not only to the offering of incense but also of sacrifices, the smoke or effluvium of which is regarded as an acceptable or sweet odour to God. Indeed, the word which denotes an incense of spices in Exod. xxx. 1 describes an incense of fat in Ps. lxvi. 15.

The ingredients of the sacred incense are enumerated with great precision in Exod. xxx. 34, 35: 'Take unto thee sweet spices, stacte (נטף *netaph*), and onycha (שחלת *shecheleph*), and galbanum (חלבנה *chelbenah*); these sweet spices with pure frankincense (לבנה *lebonah*): of each shall there be a like weight. And thou shalt make of it a perfume, a confection after the art of the apothecary, tempered together, pure and holy.' For an explanation of these various ingredients, we must refer to their several Hebrew names in the present work. The further directions are, that this precious compound should be made or broken up into minute particles, and that it should be deposited, as a very holy thing, in the tabernacle 'before the testimony' (or ark). As the ingredients are so minutely specified, there was nothing to prevent wealthy persons from having a similar perfume for private use: and this, therefore, was forbidden under pain of excommunication: 'Ye shall not make to yourselves according to the composition thereof: it shall be unto thee holy for the Lord. Whosoever shall make like unto that, to smell thereto, shall even be cut off from his people' (ver. 37, 38).

The word which describes the various ingredients as being 'tempered together' literally means 'salted' (ממלח *memullach*). The Chaldee and Greek versions have, however, set the example of rendering it by '*mixed*' or '*tempered*,' as if their idea was that the different ingredients were to be mixed together, just as salt is mixed with any substance over which it is sprinkled. Ainsworth contends for the literal meaning, inasmuch as the law (Lev. ii. 13) expressly says, 'With all thine offerings thou shalt offer salt.' In support of this he cites Maimonides, who affirms that there was not any thing offered on the altar without salt, except the wine of the drink offering, and the blood, and the wood; and of the incense he says, still more expressly, that 'they added to it a cab of salt.' In accordance with this, it is supposed, our Saviour says, 'Every sacrifice shall be salted with salt' (Mark ix. 49). Ainsworth further remarks: 'If our speech is to be always with grace, seasoned with salt, as the apostle teaches (Col. iv. 6), how much more should our incense, our prayers unto God, be therewith seasoned?' It is, however, difficult to see how so anomalous a substance as salt could well be combined in the preparation; and if it was used, as we incline to think that it was, it was probably added in the act of offering.

The above reference to Maimonides reminds us of the reason which he assigns, in the *More Nevochim*, for the use of incense in the Jewish ritual service: 'To prevent the stench which would otherwise have been occasioned by the number of beasts every day slaughtered in the sanctuary, God ordained that incense should be burned in it every morning and evening, and thereby rendered the odour of the sanctuary and of the vestments of those that ministered exceedingly grateful; which has occasioned the saying of our rabbins, That the odour of the incense extended to Jericho. This, therefore, is another of the precepts conducing to the reverence and veneration which ought to be entertained for the sanctuary: for if the perfume thereof had not been pleasant, but the contrary, it would have produced contempt instead of veneration, since a grateful odour pleases and attracts, while an unpleasant one disgusts and repels.'

This is very well; and no doubt the use of incense, which we always find in religions where worship is rendered by sacrifice, had its origin in some such considerations. But we are not to lose sight of the symbolical meaning of this grateful offering. It was a symbol of *prayer*. It was offered at the time when the people were in the posture and act of prayer; and their orisons were supposed to be presented to God by the priest, and to ascend to Him in the smoke and odour of that fragrant offering. This beautiful idea of the incense frequently occurs in Scripture (comp. Ps. cxli. 2; Mal. i. 11; Zech. xiv. 16; Acts x. 4; Rev. v. 8: viii. 4).

INCHANTMENTS. [Witchcraft.]

INDIA (הדו; Sept. Ἰνδική). This name occurs only in Esther i. 1; viii. 9, where the Persian king is described as reigning 'from India unto Ethiopia, over a hundred and seven and twenty provinces.' It is found again, however, in the Apocrypha, where India is mentioned among the countries which the Romans took from Anti-

ochus and gave to Eumenes (1 Macc. viii. 8). It is also with some reason conceived that in Acts ii. 9, we should read Ἰνδίαν, India, and not Ἰουδαίαν, Judæa. If this could be admitted, an interesting subject of inquiry would arise; for these dwellers in India—that is, Jews of India—are described as being present in Jerusalem at the Passover. There is much to say in favour of this reading, but more in favour of Idumæa; for the name of that country, Ἰδουμαίαν, might, much more easily than that of India, Ἰνδίαν, have been accidentally, or rather carelessly, corrupted into Ἰουδαίαν: and, at the same time, the name of Idumæa would come better into the list than that of India, seeing that the enumeration is manifestly taken from east to west; which allows Idumæa with great propriety to follow Mesopotamia, but forbids India to do so. Whichever may be right, Judæa cannot but be wrong; and, indeed, on the face of the list, we cannot but see the superfluousness of the information, that the people of Judæa were present in their own city at the Passover.

It is evident on the face of the above intimations, and indeed from all ancient history, that the country known as India in ancient times extended more to the west, and did not reach so far to the east—that is, was not known so far to the east—as the India of the moderns. When we read of ancient India, we must clearly not understand the whole of Hindostan, but chiefly the northern parts of it, or the countries between the Indus and the Ganges; although it is not necessary to assert that the rest of that peninsula, particularly its western coast, was then altogether unknown. It was from this quarter that the Persians and Greeks (to whom we are indebted for the earliest accounts of India) invaded the country; and this was consequently the region which first became generally known. The countries bordering on the Ganges continued to be involved in obscurity, the great kingdom of the Prasians excepted, which, situated nearly above the modern Bengal, was dimly discernible. The nearer we approach the Indus, the more clear becomes our knowledge of the ancient geography of the country; and it follows that the districts of which at the present day we know the least, were anciently best known. Besides, the western and northern boundaries were not the same as at present. To the west, India was not then bounded by the river Indus, but by a chain of mountains which, under the name of Koh (whence the Grecian appellation of the Indian Caucasus), extended from Bactria to Makran, or Gedrosia, enclosing the kingdoms of Candahar and Cabul, the modern kingdom of Eastern Persia, or Afghanistan. These districts anciently formed part of India, as well as, further to the south, the less perfectly known countries of the Arabi and Haurs (the Arabitæ and Oritæ of Arrian, vi. 21), bordering on Gedrosia. This western boundary continued at all times the same, and was removed to the Indus only in consequence of the victories of Nadir Shah.

Towards the north, ancient India overpassed not less its present limit. It comprehended the whole of the mountainous region above Cashmir, Badakshan, Belur Land, the western boundary mountains of Little Bucharia, or Little Thibet, and even the desert of Cobi, so far as it was known. The discovery of a passage by sea to the coasts of India has contributed to withdraw from these regions the attention of Europeans, and left them in an obscurity which hitherto has been little disturbed, although the current of events seems likely ere long to lead to our better knowledge.

From this it appears that the India of Scripture included no part of the present India, seeing that it was confined to the territories possessed by the Persians and the Syrian Greeks, that never extended beyond the Indus, which, since the time of Nadir Shah, has been regarded as the western boundary of India. Something of India beyond the Indus became known through the conquering march of Alexander, and still more through that of Seleucus Nicator, who penetrated to the banks of the Ganges; but the notions thus obtained are not embraced in the Scriptural notices, which, both in the canonical and the Apocryphal text, are confined to Persian India. (See Heeren's *Historical Researches*, i. c. 1, § 3, on *Persian India;* and Rennel's *Geog. of Herodotus*).

INHERITANCE. The laws and observances which determine the acquisition and regulate the devolution of property, are among the influences which affect the vital interests of states; and it is therefore of high consequence to ascertain the nature and bearing of the laws and observances relating to this subject, which come to us with the sanction of the Bible. We may also premise that, in a condition of society such as that in which we now live, wherein the two diverging tendencies which favour immense accumulations on the one hand, and lead to poverty and pauperism on the other, are daily becoming more and more decided, disturbing, and baneful, there seems to be required on the part of those who take Scripture as their guide, a careful study of the foundations of human society, and of the laws of property, as they are developed in the divine records which contain the revealed will of God.

That will, in truth, as it is the source of all created things, and specially of the earth and its intelligent denizen, man, so is it the original foundation of property, and of the laws by which its inheritance should be regulated. God, as the Creator of the earth, gave it to man to be held, cultivated, and enjoyed (Gen. i. 28, sq.; Ps. cxv. 16; Eccles. v. 9). The primitive records are too brief and fragmentary to supply us with any details respecting the earliest distribution or transmission of landed property; but from the passages to which reference has been made, the important fact appears to be established beyond a question, that the origin of property is to be found, not in the achievements of violence, the success of the sword, or any imaginary implied contract, but in the will and the gift of the common Creator and bountiful Father of the human race. It is equally clear that the gift was made, not to any favoured portion of our race, but to the race itself—to man as represented by our great primogenitor, to whom the use of the divine gift was first graciously vouchsafed. The individual appropriation of portions of the earth, and the transmission of the parts thus appropriated, in other words, the consuetudinary laws of property, would be determined in each instance by the peculiar circumstances in which an individual, a family, or a clan, might find itself placed in relation to the world and its other inhabitants;

nor is it now, in the absence of written evidence, possible to ascertain, and it is useless, if not worse, to attempt to conjecture, what these laws were. This, however, is certain, that if in any case they inflicted injury, if they aided the aggrandisement of the few, and tended to the depression of the many, they thereby became unjust, and not only lost their divine sanction, but, by opposing the very purposes for which the earth was given to man, and operating in contravention of the divine will, they were disowned and condemned of God, the tenure of the property was forfeited, and a recurrence to first principles and a re-distribution became due alike to the original donor, and to those whom He had intended impartially to benefit.

The enforcement of these principles has, in different periods of human history, been made by the seen hand of God, in those terrible providential visitations which upturn the very foundations of society and reconstruct the social frame. The Deluge was a kind of revocation of the divine gift; the Creator took back into his own hands the earth which men had filled with injustice and violence. The trust, however, was, after that terrible punishment, once more committed to man, to be held, not for himself, but for God, and to be so used and improved as to further the divine will by furthering human good. And, whatever conduct may have been pursued, at any period, at variance with the divine purpose, yet it is in trust, not in absolute possession, it is for God's purposes, not our own, that the earth at large, and every portion of the earth, has been and is still held. In truth, man is the tenant, nor the proprietor, of the earth. It is the temporary use, not the permanent possession of it that he enjoys. The lord of ten thousand broad acres, equally with the poor penniless squatter, is a sojourner and pilgrim in the land, as all his fathers were, and is bound, not less than the other, to remember, not only that property has its duties as well as its rights, but also that its best titles are held by a momentary tenure, revocable at the will of an omnipotent power, and subject to unerring scrutiny, in regard both to their origin and their use, in a court where the persons of men are not respected, where justice is laid to the line, and judgment to the plummet (Isa. xviii. 17).

The impression which the original gift of the earth was calculated to make on men, the Great Donor was pleased, in the case of Palestine, to render, for his own wise purposes, more decided and emphatic by an express re-donation to the patriarch Abraham (Gen. xiii. 14, sq.). Many years, however, elapsed before the promise was fulfilled. Meanwhile the notices which we have regarding the state of property in the patriarchal ages, are few and not very definite. The products of the earth, however, were at an early period accumulated and held as property. Violence invaded the possession; opposing violence recovered the goods. War soon sprang out of the passions of the human heart. The necessity of civil government was felt. Consuetudinary laws accordingly developed themselves. The head of the family was supreme. His will was law. The physical superiority which he possessed gave him this dominion. The same influence would secure its transmission in the male rather than the female line. Hence too the rise of the rights of primogeniture. In the early condition of society which is called patriarchal, landed property had its origin, indeed, but could not be held of first importance by those who led a wandering life, shifting continually, as convenience suggested, from one spot to another. Cattle were then the chief property (Gen. xxiv. 35). But land, if held, was held on a freehold tenure; nor could any other tenure have come into existence till more complex and artificial relations arose, resulting, in all probability, from the increase of population and the relative insufficiency of food. When Joseph went down into Egypt, he appears to have found the freehold tenure prevailing, which, however, he converted into a tenancy at will, or, at any rate, into a conditional tenancy. Other intimations are found in Genesis which confirm the general statements which have just been made. Daughters do not appear to have had any inheritance. If there are any exceptions to this rule, they only serve to prove it. Thus Job (the book so called is undoubtedly very old, so that there is no impropriety in citing it in this connection) is recorded (xlii. 15) to have given his daughters an inheritance conjointly with their brothers—a record which of itself proves the singularity of the proceeding, and establishes our position that inheritance generally followed the male line. How highly the privileges conferred by primogeniture were valued, may be learnt from the history of Jacob and Esau. In the patriarchal age doubtless these rights were very great. The eldest son, as being by nature the first fitted for command, assumed influence and control, under his father, over the family and its dependents; and when the father was removed by death, he readily, and as if by an act of Providence, took his father's place. Thus he succeeded to the property in succeeding to the headship of the family, the clan, or the tribe. At first the eldest son most probably took exclusive possession of his father's property and power; and when, subsequently, a division became customary, he would still retain the largest share—a double portion, if not more (Gen. xxvii. 25, 29, 40). That in the days of Abraham other sons partook with the eldest, and that too though they were sons of concubines, is clear from the story of Hagar's expulsion:—'Cast out (said Sarah) this bondwoman and her son; for the son of this bondwoman shall not be heir with my son, even with Isaac' (Gen. xxi. 10). The few notices left us in Genesis of the transfer of property from hand to hand are interesting, and bear a remarkable similarity to what takes place in Eastern countries even at this day (Gen. xxi. 22, sq.; xxiii. 9, sq.). The purchase of the Cave of Machpelah as a family burying-place for Abraham, detailed in the last passage, serves to show the safety of property at that early period, and the facility with which an inheritance was transmitted even to sons' sons (comp. Gen. xlix. 29). That it was customary, during the father's lifetime, to make a disposition of property, is evident from Gen. xxiv. 35, where it is said that Abraham had given all he had to Isaac. This statement is further confirmed by ch. xxv. 5, 6, where it is added that Abraham gave to the sons of his concubines 'gifts, sending them away from Isaac his son, while he yet lived, eastward unto the east country.' Sometimes, however, so far

were the children of unmarried females from being dismissed with a gift, that they shared, with what we should term the legitimate children, in the father's property and rights. Thus Dan and Naphtali were sons of Bilhah, Rachel's maid, whom she gave to her husband, failing to bear children herself. So Gad and Asher were, under similar circumstances, sons of Zilpah, Leah's maid (Gen. xxx. 2-14). In the event of the eldest son's dying in the father's lifetime, the next son took his place; and if the eldest son left a widow, the next son made her his wife (Gen. xxxviii. 7, sq.), the offspring of which union was reckoned to the first-born and deceased son. Should the second likewise die, the third son took his place (Gen. xxxviii. 11). While the rights of the first-born were generally established and recognised, yet were they sometimes set aside in favour of a younger child. The blessing of the father or the grandsire seems to have been an act essential in the devolution of power and property—in its effects not unlike wills and testaments with us; and instances are not wanting in which this (so to term it) testamentary bequest set aside consuetudinary laws, and gave precedence to a younger son (Gen. xlviii. 15, sq.). Special claims on the parental regards were acknowledged and rewarded by special gifts, as in the case of Jacob's donation to Joseph (Gen. xlviii. 22). In a similar manner, bad conduct on the part of the eldest son (as well as of others) subjected him, if not to the loss of his rights of property, yet to the evil influence of his father's dying malediction (Gen. xlix. 3); while the good and favoured, though younger, son was led by the paternal blessing to anticipate, and probably also to reap, the richest inheritance of individual and social happiness (Gen. xlix. 8-22).

The original promise made to Abraham of the land of Palestine was solemnly repeated to Isaac (Gen. xxvi. 3), the reason assigned being, because 'Abraham obeyed my voice and kept my charge, my commandments, my statutes, and my laws;' while it is expressly declared that the earlier inhabitants of the country were dispossessed and destined to extermination for the greatness of their iniquity. The possession of the promised land was embraced by Isaac in his dying benediction to Jacob (Gen. xxviii. 3, 4), to whom God vouchsafed (Gen. xxviii. 15; see also xxxv. 10, 11) to give a renewed assurance of the destined inheritance. That this donation, however, was held to be dependent for the time and manner of its fulfilment on the divine will, appears from Gen. xxxiii. 18, where Jacob, on coming into the land of Canaan, bought for an hundred pieces of money 'a parcel of a field, at the hand of the children of Hamor.' Delayed though the execution of the promise was, confidence never deserted the family of Abraham, so that Joseph, dying in the land of Egypt, assured his brothers that they would be visited of God and placed in possession of Canaan, enjoining on them, in this conviction, that, when conducted to their possession, they should carry his bones with them out of Egypt (Gen. l. 25).

A promise thus given, thus repeated, and thus believed, easily, and indeed unavoidably, became the fundamental principle of that settlement of property which Moses made when at length he had effected the divine will in the redemption of the children of Israel. The observances and practices, too, which we have noticed as prevailing among the patriarchs would, no doubt, have great influence on the laws which the Jewish legislator originated or sanctioned. The land of Canaan was divided among the twelve tribes descended through Isaac and Jacob from Abraham. The division was made by lot for an inheritance among the families of the sons of Israel, according to the tribes, and to the number and size of families in each tribe. The tribe of Levi, however, had no inheritance, but forty-eight cities with their suburbs were assigned to the Levites, each tribe giving according to the number of cities that fell to its share (Num. xxxiii. 50; xxxiv. 1; xxxv. 1). The inheritance thus acquired was never to leave the tribe to which it belonged; every tribe was to keep strictly to its own inheritance. An heiress, in consequence, was not allowed to marry out of her own tribe, lest property should pass by her marriage into another tribe (Num. xxxvi. 6-9). This restriction led to the marriage of heiresses with their near relations: thus the daughters of Zelophehad 'were married unto their father's brother's sons,' 'and their inheritance remained in the tribe of the family of their father' (ver. 11, 12; comp. Joseph. *Antiq.* iv. 7. 5). In general cases the inheritance went to sons, the first-born receiving a double portion, 'for he is the beginning of his father's strength.' If a man had two wives, one beloved, the other hated, and if the first-born were the son of her who was hated, he nevertheless was to enjoy 'the right of the first-born' (Deut. xxi. 15). If a man left no sons, the inheritance passed to his daughters; if there was no daughter, it went to his brothers; in case there were no brothers, it was given to his father's brothers; if his father had no brothers, it came into possession of the nearest kinsman (Num. xxvii. 8). The land was Jehovah's, and could not therefore be permanently alienated. Every fiftieth year, whatever land had been sold returned to its former owner. The value and price of land naturally rose or fell in proportion to the number of years there were to elapse prior to the ensuing fiftieth or jubilee-year. If he who sold the land, or a kinsman, could redeem the land before the year of jubilee, it was to be restored to him on his paying to the purchaser the value of the produce of the years remaining till the jubilee. Houses in villages or unwalled towns might not be sold for ever; they were restored at the jubilee, and might at any time be redeemed. If a man sold a dwelling-house situated in a walled city, he had the option of redeeming it within the space of a full year after it had been sold; but if it remained unredeemed, it belonged to the purchaser, and did not return to him who sold it even at the jubilee (Lev. xxv. 8, 23). The Levites were not allowed to sell the land in the suburbs of their cities, though they might dispose of the cities themselves, which, however, were redeemable at any time, and must return at the jubilee to their original possessors (Lev. xxvii. 16).

The regulations which the laws of Moses established rendered wills, or a testamentary disposition of (at least) landed property, almost, if not quite, unnecessary; we accordingly find no provision for anything of the kind. Some difficulty may have been now and then occasioned, when

near relations failed; but this was met by the traditional law, which furnished minute directions on the point (Misch. *Baba Bathra*, iv. 3, c. 8, 9). Personal property would naturally follow the land, or might be bequeathed by word of mouth. At a later period of the Jewish polity the mention of wills is found, but the idea seems to have been taken from foreign nations. In princely families they appear to have been used, as we learn from Josephus (*Antiq.* xiii. 16. 1; xvii. 3. 2; *De Bell. Jud.* ii. 2. 3); but such a practice can hardly suffice to establish the general use of wills among the people. In the New Testament, however, wills are expressly mentioned (Gal. iii. 15; Heb. ix. 17). Michaelis (*Commentaries*, i. 431) asserts that the phrase (2 Sam. xvii. 23; 2 Kings xx. 1: צוה לביתו) 'set thine house in order' has reference to a will or testament. But his grounds are by no means sufficient; the literal rendering of the words being, 'give commands to thy house.' The utmost which such an expression could inferentially be held to comprise in regard to property, is a dying and final distribution of personal property; and we know that it was not unusual for fathers to make, while yet alive, a division of their goods among their children (Luke xv. 12; Rosenmüll. *Morgenl.* v. 197).—J. R. B.

INK, INKHORN. [Writing.]

INSPIRATION. This word is sometimes used to denote the excitement and action of a fervent imagination in the poet or orator. But even in this case there is generally a reference to some supposed divine influence, to which the excited action is owing. It is once used in Scripture to denote that divine agency by which man is endued with the faculties of an intelligent being, when it is said, 'the inspiration of the Almighty giveth him understanding.' But the inspiration now to be considered is that which belonged to those who wrote the Scriptures, and which is particularly spoken of in 2 Tim. iii. 16, and in 2 Pet. i. 21: 'All Scripture is given by inspiration of God;' 'Holy men of God spake as they were moved by the Holy Ghost.' These passages relate specially to the Old Testament; but there is at least equal reason to predicate divine inspiration of the New Testament.

The definition which Dr. Knapp gives of inspiration is the one we shall adopt. He says, 'It may be best defined, according to the representations of the Scriptures themselves, as *an extraordinary divine agency upon teachers while giving instruction, whether oral or written, by which they were taught what and how they should write or speak.*' Or we may say more briefly, that the sacred penmen were completely under the direction of the Holy Spirit, or that they wrote under a plenary inspiration. Dr. Calamy's definition agrees substantially with that of Dr. Knapp.

To prove that the Scriptures are divinely inspired we might with propriety refer to the excellence of the doctrines, precepts, and promises, and other instructions, which they contain; to the simplicity and majesty of their style; to the agreement of the different parts, and the scope of the whole; especially to the full discovery they make of man's fallen and ruined state, and the way of salvation through a Redeemer; together with their power to enlighten and sanctify the heart, and the accompanying witness of the spirit in believers. These are circumstances of real importance, and the discerning advocates of inspiration have not overlooked them. But the more direct and conclusive evidence that the Scriptures were divinely inspired is found in *the testimony of the writers themselves.* And as the writers did, by working miracles, and in other ways, sufficiently authenticate their divine commission, and establish their authority and infallibility as teachers of divine truth, their testimony, in regard to their own inspiration, is entitled to our full confidence. For who can doubt that they were as competent to judge of, and as much disposed to speak the truth on this subject as on any other? If then we admit their divine commission and authority, why should we not rely upon the plain testimony which they give concerning the divine assistance afforded them in their work? To reject their testimony in this case would be to impeach their veracity, and thus to take away the foundation of the Christian religion. And it is well known that those who deny the justice of the claim which they set up to divine inspiration, do, in fact, give up the infallible truth and authority of the Scriptures, and adopt the principles of deism.

It is, then, of the first importance to inquire what representations are made by the prophets, and by Christ and his apostles, respecting the inspiration, and the consequent authority, of the sacred Scriptures.

The prophets generally professed to speak *the word of God.* What they taught was introduced and confirmed by a 'Thus saith the Lord;' or 'The Lord spake to me, saying.' And, in one way or another, they gave clear proof that they were divinely commissioned, and spoke in the name of God, or as it is expressed in the New Testament, *that God spake by them.*

But the strongest and most satisfactory proof of the inspiration and divine authority of the Old Testament writings, is found in the testimony of Christ and the apostles.

The Lord Jesus Christ possessed the spirit of wisdom without measure, and came to bear witness to the truth. His works proved that he was what he declared himself to be—the Messiah, the great Prophet, the infallible Teacher. The faith which rests on him rests on a rock. As soon then as we learn how *he* regarded the Scriptures, we have reached the end of our inquiries. His word is truth. Now every one who carefully attends to the four Gospels will find, that Christ everywhere spoke of that collection of writings called the Scripture, as the word of God; that he regarded the whole in this light; that he treated the Scripture, and every part of it, as infallibly true, and as clothed with divine authority,—thus distinguishing it from every mere human production. Nothing written by man can be entitled to the respect which Christ showed to the Scriptures. This, to all Christians, is direct and incontrovertible evidence of the divine origin of the Scriptures, and is, by itself, perfectly conclusive.

But there is clear concurrent evidence, and evidence still more specific, in the writings of the Apostles. In two texts in particular, divine inspiration is positively asserted. In the first (2 Tim. iii. 16), Paul lays it down as the charac-

teristic of '*all Scripture*,' that it '*is given by inspiration of God*' (θεόπνευστος, 'divinely inspired'); and from this results its profitableness. Some writers think that the passage should be rendered thus: *All divinely inspired Scripture*, or, *all Scripture, being divinely inspired, is profitable*. According to the common rendering, inspiration is predicated of all Scripture. According to the other, it is presupposed, as the attribute of the subject. But this rendering is liable to insuperable objections. For θεόπνευστος and ὠφέλιμος are connected by the conjunction καί, and must both be predicates, if either of them is; and unless one of them is a predicate there is no complete sentence. Henderson remarks, that the mode of construction referred to ' is at variance with a common rule of Greek syntax, which requires, that when two adjectives are closely joined, as θεόπνευστος and ὠφέλεμος here are, if there be an ellipsis of the substantive verb ἐστι, this verb must be supplied after the former of the two, and regarded as repeated after the latter. Now there exists precisely such an ellipsis in the case before us; and as there is nothing in the context which would lead to any exception to the rule, we are bound to yield to its force.' And he adds, that 'the evidence in favour of the common rendering, derived from the Fathers, and almost all the versions, is most decided.' It cannot for a moment be admitted, that the Apostle meant to signify that divine inspiration belongs to a part of Scripture, but not to the whole; or that he meant, as Semler supposes, to furnish a criterion by which to judge whether any work is inspired or not, namely, its *utility*. 'That author proceeds fearlessly to apply this criterion to the books of the Old Testament, and to lop off eight of them, as not possessing the requisite marks of legitimacy. Most of the German divines adopt Semler's hypothesis.' But it is very manifest that such a sense is not by any means suggested by the passage itself, and that it is utterly precluded by other parts of the New Testament. For neither Christ nor any one of his apostles ever intimates a distinction between some parts of Scripture which are inspired and other parts which are not inspired. The doctrine which is plainly asserted in the text under consideration, and which is fully sustained by the current language of the New Testament, is, that *all the writings denominated the Scriptures are divinely inspired.*

The other text (2 Pet. i. 21) teaches that 'Prophecy came not by the will of man, but holy men of God spake as they were moved by the Holy Ghost.' This passage, which the apostle Peter applied particularly to the subject of which he was speaking, may be considered as explanatory of what is intended by inspiration. For to say that all Scripture is divinely inspired, and that men of God wrote it as they were moved by the Holy Ghost, is one and the same thing.

The various texts in which Christ and the Apostles speak of Scripture as *the word of God*, and as invested with authority to decide all questions of truth and duty, fully correspond with the texts above considered.

From this view of the subject it follows, that the attempt which has been made by a certain class of writers, to account for the production of the whole or any part of the Scriptures by the will or agency, the ingenuity, diligence or fidelity of men, in the use of the means within their reach, without the supernatural influence of the spirit, is utterly at variance with the teachings of Christ and the Apostles as to the origin of the sacred writings.

As the Christian dispensation surpasses the former in all spiritual privileges and gifts, it is reasonable to presume that the New Testament was written under at least an equal degree of divine influence with the Old, and that it comes recommended to us by equal characteristics of infallible truth. But of this there is clear positive evidence from the New Testament itself.

In the first place, *Jesus Christ*, whose works proved him to be the great unerring Teacher, and to be possessed of all power in Heaven and earth, *gave commission to his Apostles to act in his stead, and to carry out the work of instruction which he had begun*, confirming their authority by investing them with power to perform miracles. But how could such a commission have answered the end proposed, had not the Divine Spirit so guided the Apostles as to render them infallible and perfect teachers of divine truth?

But, secondly, in addition to this, *Jesus expressly promised to give them the Holy Spirit, to abide with them continually, and to guide them into all the truth.* He said to them, 'When they shall deliver you up, take no thought how or what ye shall speak; for it shall be given you in the same hour what ye shall speak. For it is not ye that speak, but the Spirit of your Father that speaketh in you.' Storr and Flatt think this is the idea intended: 'The instructions which ye in general give are derived not so much from yourselves as from the Holy Spirit. Hence, when ye are called on to defend your doctrines, ye need feel no anxiety, but may confidently rely on the Holy Spirit to vindicate his own doctrines, by suggesting to you the very words of your defence.' If these promises were not fulfilled, then Jesus was not a true prophet. If they were fulfilled, as they certainly were, then the Apostles had the constant assistance of the Holy Spirit, and, whether engaged in speaking or writing, were under divine guidance, and, of course, were liable to no mistakes either as to the matter or manner of their instructions.

In the third place, *the writers of the New Testament manifestly considered themselves to be under the guidance of the Holy Spirit, and their instructions, whether oral or written, to be clothed with divine authority, as the word of God.*

'We speak,' they say, 'as of God.' Again, 'Which things we speak, not in the words which man's wisdom teacheth, but in words which the Holy Ghost teacheth.' They declared what they taught to be *the word of God*, and the things they wrote to be the *commandments of God.* Now the Apostles, being honest, unassuming, humble men, would never have spoken of themselves and their writings in such a manner, had they not known themselves to be under the unerring guidance of the Holy Spirit, and their instructions perfectly in accordance with the mind of God.

From several passages in Paul's epistles to the Corinthians, it has been supposed that, in the cases referred to, he meant to disclaim inspiration.

But that those passages will bear another construction, and ought to be understood in another manner, has been satisfactorily argued by several writers, particularly by Haldane and Gaussen in their treatises on inspiration, and by Henderson in his lectures. And the writer of this article would take the liberty to refer also to his lectures on the same subject.

It is perfectly consistent with the plenary inspiration here maintained, that God operated on the minds of inspired men in a variety of ways, sometimes by audible words, sometimes by direct inward suggestions, sometimes by outward visible signs, sometimes by the Urim and Thummim, and sometimes by dreams and visions. This variety in the mode of divine influence detracted nothing from its certainty. God made known his will equally in different ways; and, whatever the mode of his operation, he made it manifest to his servants that the things revealed were from him.

But inspiration was concerned not only in making known the will of God to prophets and apostles, but also *in giving them direction in writing the sacred books*. They wrote *as they were moved by the Holy Ghost*. And in this, also, there was a diversity in the mode of divine influence. Sometimes the Spirit of God moved and guided his servants to write things which they could not know by natural means, such as new doctrines or precepts, or predictions of future events. Sometimes he moved and guided them to write the history of events which were wholly or partly known to them by tradition, or by the testimony of their contemporaries, or by their own observation or experience. In all these cases the Divine Spirit effectually preserved them from all error, and influenced them to write just so much and in such a manner as God saw to be best. Sometimes he moved and guided them to write a summary record of larger histories, containing what his infinite wisdom saw to be adapted to the end in view, that is, the benefit of his people in all ages. Sometimes he influenced them to make a record of important maxims in common use, or to write new ones, derived either from their own reason or experience, or from special divine teaching. Sometimes he influenced them to write parables or allegories, particularly suited to make a salutary impression of divine things on the minds of men; and sometimes to record supernatural visions. In these and all other kinds of writing the sacred penmen manifestly needed special divine guidance, as no man could of himself attain to infallibility, and no wisdom, except that of God, was sufficient to determine what things ought to be written for permanent use in the church, and what manner of writing would be best fitted to promote the great ends of revelation.

Some writers speak of different modes and different kinds, and even different degrees of inspiration. And if their meaning is that God influenced the minds of inspired men in different ways; that he adopted a variety of modes in revealing divine things to their minds; that he guided them to give instruction in prose and in poetry, and in all the different forms of composition; that he moved and guided them to write history, prophecy, doctrines, commands, promises, reproofs, and exhortations, and that he adapted his mode of operation to each of these cases—against this no objection can be made. It is a fact, that the Scriptures exhibit specimens of all these different kinds of writing and these different modes of divine instruction. Still each and every part of what was written was divinely inspired, and equally so. It is all the word of God, and clothed with divine authority, as much as if it had all been made known and written in one way.

Dr. Henderson, who labours perhaps with too much zeal against carrying inspiration to extreme lengths, still says that if those who hold to different modifications of inspiration intend that there are different modifications and degrees of *authority* given to Scripture, their opinion must meet with unqualified reprobation from every sincere believer. He insists that a diversity in the modes and degrees of divine operation did exist in the work of inspiration, and that this diversity was the result of infinite wisdom adapting itself to different circumstances. He thinks that, unless we admit such a diversity, we cannot form correct ideas of the subject. But he is confident that the distinction which he endeavours to establish is not in the slightest degree hostile to the divine authority of Scripture. He affirms that *no part of that holy book was written without miraculous influence; that all parts were equally inspired;* that in regard to the whole volume the great end was infallibly attained, namely, the commitment to writing of precisely such matters as God designed for the religious instruction of mankind; that the sacred penmen wrote what had for its object not merely the immediate benefit of individual persons or churches, but what would be useful to Christians in all future times; and that in regard to the most minute and inconsiderable things which the Scripture contains we are compelled to say, *this also cometh from the Lord.*

The controversy among orthodox divines respecting what is called *verbal inspiration*, appears to arise, in a great measure, from the different senses affixed to the phrase. Dr. Henderson, who is among the most candid and able writers opposed to the doctrine of *verbal* inspiration, seems to understand the doctrine as denoting the *immediate communication* to the writers of *every word*, and *syllable*, and *letter* of what they wrote, independently of their intelligent agency and without any regard to their peculiar mental faculties or habits:—while those who most earnestly and successfully contend for the higher views of inspiration, particularly Calamy, Haldane, and Gaussen, consider the doctrine they maintain as entirely consistent with the greatest diversity of mental endowments, culture, and taste in the writers, and with the most perfect exercise of their intelligent agency,—consistent with their using their own memory, their own reason, their own manner of thinking, and their own language,—consistent, too, with their making what they were to write the subject of diligent and laborious study,—*only insisting that it was all under the unerring guidance of the Divine Spirit.*

In a controversy of such a character as this, we may often succeed in removing difficulties, and in presenting the subject in a light which will be satisfactory to all concerned, by laying aside an ambiguous word or phrase, and making use of one which will express the idea intended with

clearness and certainty. The word *verbal*, in its most common senses, is not well suited to the present subject. According to the best philologists its first signification is, 'spoken, expressed to the ear in words, not written.' But no one supposes that when God inspired the sacred writers he generally spoke to them in audible words. It is, indeed, true, that he sometimes uttered articulate words in making known his will, as at Sinai, at the baptism of Christ, and on some other occasions. In such cases he did, properly speaking, make *verbal* communications, or give *verbal* instruction. But we should hardly call this *verbal inspiration*. Who can suppose that this was commonly, if ever, the way, in which God inspired holy men of old while engaged in writing the Scriptures? Who can suppose that he taught them what to write by speaking *words* in their ears, as a man teaches his amanuensis? His influence was doubtless *inward*. He guided them in writing by an operation *in their minds*.

The next meaning of *verbal* is '*oral, uttered by the mouth;*' and this agrees no better with our subject. Other significations of *verbal* are, 'consisting in *mere* words; respecting words *only; literal*,' as in a translation, 'having word answering to word.' Neither of these senses is adapted to the subject. Now it would be nothing strange, if applying this word to inspiration, and thus giving it an unusual sense, should occasion needless perplexity and confusion. For the sake of avoiding this evil, why would it not be expedient to employ such words as will convey the idea intended clearly and definitely; and, if necessary, to incur the inconvenience of using an exact explanation, instead of the word or phrase which causes the difficulty?

The real question, and the whole question at issue, may be stated thus: *did the work of the Divine Spirit in the sacred penmen relate to the language they used, or their manner of expressing their ideas; and if so, how far, and in what way?*

All those with whom we are concerned in the discussion of this question, hold that divine inspiration had some respect to the language employed by the inspired writers, at least in the way of general *supervision*. And Dr. Henderson shows, in various passages of his excellent lectures, that there is no material difference between him and those who profess to maintain higher ground. He allows that, to a certain extent, what is called *verbal inspiration*, or the *inspiration of words*, took place. 'In recording what was immediately spoken with an audible voice by Jehovah, or by an angel interpreter; in giving expression to points of revelation which entirely surpassed the comprehension of the writers; in recording prophecies, the minute bearings of which they did not perceive; in short, in committing to writing any of the dictates of the Spirit, which they could not have otherwise accurately expressed, the writers,' he alleges, 'were supplied with the words as well as the matter.' He says, that even when Biblical writers made use of their own faculties, and wrote each one in his own manner, without having their mental constitution at all disturbed, they were yet 'always secured by celestial influence against the adoption of any forms of speech, or collocation of words, that would have injured the exhibition of divine truth, or that did not adequately give it expression;' that the characteristic differences of style, so apparent among the sacred writers, were employed by the Holy Spirit for the purposes of inspiration, and 'were called forth in a rational way;' that the writers, 'being acted upon by the Divine Spirit, expressed themselves naturally; that while the divine influence adapted itself to whatever was peculiar in the minds of inspired men, it constantly guided them in writing the sacred volume.' He declares his belief that the Scriptures were written not under a partial or imperfect, but under a plenary and infallible, inspiration; that they were entirely the result of divine intervention, and are to be regarded as the oracles of Jehovah. Referring to 2 Tim. iii. 16, he says, 'We are here expressly taught the divine inspiration of the whole of the Old Testament Codex; that the Scriptures are inspired as *written documents;* that they are the result of the special and extraordinary influence of the Spirit, and contain whatever the Spirit caused to be written for our instruction.' Referring to 1 Cor. ii. 13, he says, 'It is past all dispute that the apostle here unequivocally ascribes both the doctrines which he and his fellow-labourers taught, and their *manner of propounding* them, to the influence of the same divine agent;' that the passage conveys the idea 'that *the style*, or *mode of expression* which they used, was such as they were instructed by the Spirit to employ;' that 'in delivering their doctrines they were under the constant guidance of the Great Instructor, and clothed them in that garb which he directed them to use;' that, in the passage alluded to, the apostle refers 'to the *entire character of the style* which the first teachers of Christianity were taught to use in announcing its all important doctrines.' The passage in Matt. x. 9, 10, he says, implies, 'that the subject matter of apology was to be supplied to the apostles; and they might be well assured that if this, which was the most important, was secured by divine instruction, the mere expression would not be wanting.' 'To remove all ground of hesitation from their minds, our Lord says, *it is not ye that speak, but the Spirit of your Father which speaketh in you.* By his teaching and superintending influence, they would always be enabled to express themselves in a manner worthy of the divine cause which they were called to defend—a manner which they could never have attained by the exertion of their unassisted powers; so that, although these powers were not to be superseded, but employed, it was to be as the organs of the divine agency by which they were employed.' And he concedes that, as to all practical purposes, they were favoured with divine influence in *composing their writings*, as well as in their public speaking.

Our author says that on the day of Pentecost, when the apostles were filled with the Holy Ghost, and spake with other tongues, as the Spirit gave them utterance, 'verbal inspiration in the strictest sense of the term took place.' 'The immediate supply of words,' he holds, 'was in this and every similar instance absolutely necessary.' And he thinks that direct verbal inspiration was indispensably requisite in all instances in which prophets and apostles were employed to write what they did not clearly comprehend. The

passages in which such terms as *the word of God*, *the Lord spake*, etc., occur, are, in this view, descriptive of immediate verbal communications. He supposes that, in all such cases, *words* were literally spoken, or audibly pronounced by God himself, or by an angel in his name. In this opinion, however, I think he is mistaken. For unquestionably the word of the Lord often, if not generally, came to the prophets in the way of dreams, or other modes of inward suggestion.

The doctrine of a plenary inspiration of all Scripture in regard to the language employed, as well as the thoughts communicated, ought not to be rejected without valid reasons. The doctrine is so obviously important, and so consonant to the feelings of sincere piety, that those evangelical Christians who are pressed with speculative objections against it, frequently, in the honesty of their hearts, advance opinions which fairly imply it. This is the case, as we have seen, with Dr. Henderson, who says, that the Divine Spirit guided the sacred penmen in *writing* the Scriptures; that their *mode of expression* was such as they were instructed by the Spirit to employ; that Paul ascribes not only the doctrines which the apostles taught, but *the entire character of their style*, to the influence of the Spirit. He indeed says, that this does not always imply the *immediate communication of the words* of Scripture; and he says it with good reason. For *immediate* properly signifies, *acting without a medium*, or *without the intervention of another cause or means, not acting by second causes.* Now those who hold the highest views of inspiration do not suppose that the Divine Spirit, except in a few instances, so influenced the writers of Scripture as to interfere with the use of their rational faculties or their peculiar mental habits and tastes, or in any way to supersede secondary causes as the medium through which his agency produced the desired effect.

In regard to this point, therefore, there appears to be little or no ground for controversy. For, if God so influenced the sacred writers that, either with or without the use of secondary causes, they wrote just *what* he intended, and in the *manner* he intended, the end is secured; and what they wrote is as truly *his word*, as though he had written it with his own hand on tables of stone, without any human instrumentality. The very words of the decalogue were all such as God chose. And they would have been equally so if Moses had been moved by the Divine Spirit to write them with *his* hand. The expression, that God *immediately imparted* or *communicated* to the writers the very words which they wrote, is evidently not well chosen. The exact truth is that *the writers themselves* were the subjects of the divine influence. The Spirit employed them as active instruments, and directed them in writing, both as to matter and manner. They wrote 'as they were moved by the Holy Ghost.' The matter, in many cases, was what they before knew, and the manner was entirely conformed to their habits; it was *their own*. But what was written was none the less inspired on that account. God may have influenced and guided an apostle as infallibly in writing what he had before known, and that guidance may have been as really necessary, as in writing a new revelation. And God may have influenced Paul or John to write a book in *his own peculiar style*, and that influence may have been as real and as necessary as if the style had been what some would call a *divine style*. It *was* a divine style, if the writer used it under divine direction. It was a *divine* style, and it was, at the same time, a *human* style, and the *writer's own* style, all in one. Just as the believer's exercises, faith and love, are his own acts, and at the same time are the effects of divine influence. 'In efficacious grace,' says Edwards, 'we are not merely passive, nor yet does God do some and we do the rest. But God does all, and we do all. God produces all, and we act all. For that is what he produces, namely, our own acts. God is the only proper author and foundation: we only are the proper actors. We are, in different respects, wholly passive and wholly active. In the Scriptures, the same things are represented as from God and from us. God is said to convert men, and men are said to convert and turn. God makes a new heart, and we are commanded to make us a new heart—not merely because we must use the means in order to the effect, but the effect itself is our act and our duty. These things are agreeable to that text, "God worketh in you both to will and to do."' The mental exercises of Paul and of John had their own characteristic peculiarities, as much as their style. God was the author of John's mind and all that was peculiar to his mental faculties and habits, as really as of Paul's mind and what was peculiar to him. And in the work of inspiration he used and directed, for his own purposes, what was peculiar to each. When God inspired different men he did not make their minds and tastes all alike, nor did he make their language alike. Nor had he any occasion for this; for while they had different mental faculties and habits, they were as capable of being infallibly directed by the Divine Spirit, and infallibly speaking and writing divine truth, as though their mental faculties and habits had been all exactly alike. And it is manifest that the Scriptures, written by such a variety of inspired men, and each part agreeably to the peculiar talents and style of the writer, are not only equally from God, but, taken together, are far better adapted to the purposes of general instruction, and all the objects to be accomplished by revelation, than if they had been written by one man, and in one and the same manner.

This view of plenary inspiration is fitted to relieve the difficulties and objections which have arisen in the minds of men from the variety of talent and taste which the writers exhibited, and the variety of style which they used. See, it is said, how each writer expresses himself naturally, in his own way, just as he was accustomed to do when not inspired. And see too, we might say in reply, how each apostle, Peter, Paul, or John, when speaking before rulers, with the promised aid of the Holy Spirit, spoke naturally, *with his own voice*, and in his own way, as he had been accustomed to do on other occasions when not inspired. There is no more objection to plenary inspiration in the one case than in the other. The mental faculties and habits of the apostles, their style, their voice, their mode of speech, all remained as they were. What, then, had the divine Spirit to do? What was the work which appertained to Him? We reply, His work was so to direct the apostles in the use of their own talents

and habits, their style, their voice, and all their peculiar endowments, that they should speak or write, each in his own way, just what God would have them speak or write, for the good of the Church in all ages.

The fact that the individual peculiarities of the sacred penmen are everywhere so plainly impressed on their writings, is often mentioned as an objection to the doctrine, that inspiration extended to their *language* as well as their thoughts. This is, indeed, one of the most common objections, and one which has obtained a very deep lodgment in the minds of some intelligent Christians. It may, therefore, be necessary to take some further pains completely to remove it. And in our additional remarks relative to this and other objections, it will come in our way to show that such a writer as Gaussen, who contends with great earnestness and ability for the highest views of inspiration, does still, on all important points, agree with those who advocate lower views of the subject.

Gaussen says, 'Although the title of each book should not indicate to us that we are passing from one author to another; yet we could quickly discover, by the change of their characters, that a new hand has taken the pen. It is perfectly easy to recognise each one of them, although they speak of the same master, teach the same doctrines, and relate the same incidents.' But how does this prove that Scripture is not, in all respects, inspired? 'So far are we,' says this author, 'from overlooking human individuality everywhere impressed on our sacred books, that, on the contrary, it is with profound gratitude, and with an ever-increasing admiration, that we regard this living, real, human character infused so charmingly into every part of the Word of God. We admit the fact, and we see in it clear proof of the divine wisdom which dictated the Scriptures.'

Those who urge the objection above mentioned are plainly inconsistent with themselves. For while they deny the plenary inspiration of some parts of Scripture, *because they have these marks of individuality*, they acknowledge inspiration in the fullest sense in other parts, particucularly in the prophecies, where this individuality of the writers is equally apparent.

In truth, what can be more consonant with our best views of the wisdom of God, or with the general analogy of his works, than that he should make use of the thoughts, the memories, the peculiar talents, tastes, and feelings of his servants in recording his Word for the instruction of men? Why should he not associate the peculiarities of their personal character with what they write under his personal guidance? But, independently of our reasoning, this matter is decided by the Bible itself. 'All Scripture is divinely inspired,' and it is all the Word of God. And it is none the less the Word of God, and none the less inspired, because it comes to us in the language of Moses, and David, and Paul, and the other sacred writers. 'It is God who speaks to us, but it is also man; it is man, but it is also God.' The Word of God, in order to be intelligible and profitable to us, 'must be uttered by mortal tongues, and be written by mortal hands, and must put on the features of human thoughts. This blending of humanity and divinity in the Scriptures reminds us of the majesty and the condescension of God. Viewed in this light, the Word of God has unequalled beauties, and exerts an unequalled power over our hearts.'

The objection to the plenary inspiration of the Scriptures, from the inaccuracy of the translations and the various readings of the ancient manuscript copies, is totally irrelevant. For what we assert is, the inspiration of the *original* Scriptures, not of the translations or the ancient copies. The fact that the Scriptures were divinely inspired, cannot be expunged or altered by any subsequent event. The very words of the decalogue were written by the finger of God, and none the less so because the manuscripts which transmit it to us contain some variations. The integrity of the copies has nothing to do with the inspiration of the original. It is, however, well known that the variations are hardly worthy to be mentioned.

But if the copies of the Scriptures which we have are not inspired, then how can the inspiration of the original writings avail to our benefit? The answer is, that, according to the best evidence, the original writings have been transmitted to us with remarkable fidelity, and that our present copies, so far as anything of consequence is concerned, agree with the writings as they came from inspired men; so that, through the gracious care of divine providence, the Scriptures now in use are, in all important respects, the Scriptures which were given by inspiration of God, and are stamped with divine authority. In this matter, we stand on the same footing with the apostles. For when they spoke of the Scriptures, they doubtless referred to the copies which had been made and preserved among the Jews, not to the original manuscripts written by Moses and the prophets.

It has been made an objection to the plenary inspiration of the writers of the New Testament, that they generally quote from the Septuagint version, and that their quotations are frequently wanting in exactness. Our reply is, that their quotations are made in the usual manner, according to the dictates of common sense, and always in such a way as to subserve the cause of truth; and therefore, that the objection is without force. And as to the Septuagint version, the apostles never follow it so as to interfere with the authority of the Hebrew Scriptures. Their references to the Old Testament are just such as the case required. There is a noble freedom in their quotations, but that freedom never violates truth or propriety.

If any one, like Priestley and others of the same school, alleges, that there are in the Scriptures errors in reasoning and in matters of fact, he opens the door to the most dangerous consequences. Indeed he takes the ground of infidelity. And if any one holds, that some parts are inspired, while other parts are not inspired, then we ask, who shall make the distinction? And if we begin this work, where will it end? But our present concern is with those who deny that inspiration respected the language of Scripture.

There are some who maintain that all which was necessary to secure the desired results, was an infallible guidance of the *thoughts* of the sacred writers; that with such a guidance they might be safely left to express their thoughts in their own way, without any special influence from above.

Now, if those who take this view of the subject mean that God not only gives the sacred penmen

the very ideas which they are to write, but, in some way, secures an infallible connection between those ideas and a just expression of them in words; then, indeed, we have the desired result—an infallible revelation from God, made in the proper language of the writers. But if any one supposes that there is naturally such an infallible connection between right thoughts and a just expression of them in language, without an effective divine superintendence, he contradicts the lessons of daily experience. But those to whom we refer evidently do not themselves believe in such an infallible connection. For when they assign their reason for denying that inspiration related to the language of the Scriptures, they speak of the different, and, as they regard them, the contradictory statements of facts by different writers—for example, the different accounts of the crucifixion and the resurrection, and the different accounts of the numbers of the slain in Num. xxv. 9 and 1 Cor. x. 8. Who, they say, can believe that the *language* was inspired, when one writer says that 24,000 were slain, and the other 23,000? But it is easy to see that the difficulty presses with all its force upon those who assert the inspiration of the *thoughts*. For surely they will not say that the sacred writers had *true thoughts* in their minds, and yet uttered them in the language of falsehood. This would contradict their own idea of a sure connection between the conceptions of the mind and the utterance of them in suitable words, and would clearly show that they themselves feel it to be necessary that the divine guidance should extend to the *words* of inspired men as well as their thoughts. But if Paul, through inadvertence, committed a real mistake in saying that 23,000 fell in one day, it must have been a mistake in his *thoughts* as well as in his words. For when he said 23,000, had he not the idea of that number in his mind? If, then, there was a mistake, it lay in his *thoughts*. But if there was no mistake in either of the writers, then there is nothing to prove that inspiration did not extend to the language. If, however, there was a real mistake, then the question is not, what becomes of *verbal* inspiration, but what becomes of inspiration *in any sense*.

As to the way of reconciling the two statements above mentioned, but a few words can be offered here. Some writers attempt to remove the difficulty in this manner. The first writer says, 24,000 were slain, meaning to include in that number all who died in consequence of that rebellion. The other writer says, 23,000 fell *in one day*, leaving us to conclude that an addition of 1000 fell the next day. But it may perhaps be more satisfactory to suppose, that neither of the writers intended to state the exact number, this being of no consequence to their objects. The real number might be between 23,000 and 24,000, and it might be sufficient for them to express it in general terms, one of them calling it 24,000, and the other 23,000, that is, *about so many*, either of the numbers being accurate enough to make the impression designed. Suppose that the exact number was 23,579, and that both the writers knew it to be so. It was not at all necessary, in order to maintain their character as men of veracity, that they should, when writing for *such a purpose*, mention the particular number. The particularity and length of the expression would have been inconvenient, and might have made a less desirable impression of the evil of sin and the justice of God, than expressing it more briefly in a round number; as we often say, with a view merely to make a strong impression, that in such a battle 10,000, or 50,000, or 500,000 were slain, no one supposing that we mean to state the number with arithmetical exactness, as our object does not require this. And who can doubt that the Divine Spirit might lead the sacred penmen to make use of this principle of rhetoric, and to speak of those who were slain, according to the common practice in such a case, in round numbers?

It is sometimes said that the sacred writers were of themselves generally competent to express their ideas in *proper language*, and in this respect had *no need* of supernatural assistance. But there is just as much reason for saying that they were of themselves generally competent to form their own *conceptions*, and so had no need of supernatural aid in this respect. It is just as reasonable to say that Moses could recollect what took place at the Red Sea, and that Paul could recollect that he was once a persecutor, and Peter what took place on the mount of transfiguration, without supernatural aid, as to say that they could, without such aid, make a proper record of these recollections. We believe a real and infallible guidance of the Spirit in both respects, because this is taught in the Scriptures. And it is obvious that the Bible could not be what Christ and the apostles considered it to be, unless they were divinely inspired.

The diversity in the narratives of the Evangelists is sometimes urged as an objection against the position we maintain in regard to inspiration, but evidently without reason, and contrary to reason. For what is more reasonable than to expect that a work of divine origin will have marks of consummate wisdom, and will be suited to accomplish the end in view. Now it will not be denied that God determined that there should be four narratives of the life and death of Jesus from four historians. If the narratives were all alike, three of them would be useless. Indeed such a circumstance would create suspicion, and would bring discredit upon the whole concern. The narratives must then be different. And if, besides this useful diversity, it is found that the seeming contradictions can be satisfactorily reconciled, and if each of the narratives is given in the peculiar style and manner of the writers, then all is natural and unexceptionable, and we have the highest evidence of the credibility and truth of the narratives.

We shall advert to one more objection. It is alleged that writers who were constantly under a plenary divine inspiration would not descend to the unimportant details, the trifling incidents, which are found in the Scriptures. To this it may be replied that the details alluded to must be admitted to be according to truth, and that those things which, at first view, seem to be trifles may, when taken in their connections, prove to be of serious moment. And it is moreover manifest that, considering what human beings and human affairs really are, if all those things which are called trifling and unimportant were excluded, the Scriptures would fail of being conformed to fact; they would not be faithful histories of human life: so that the very circumstance which

is demanded as proof of inspiration would become an argument against it. And herein we cannot but admire the perfect wisdom which guided the sacred writers, while we mark the weakness and shallowness of the objections which are urged against their inspiration.

On the whole, after carefully investigating the subject of inspiration, we are conducted to the important conclusion that 'all Scripture is divinely inspired;' that the sacred penmen wrote 'as they were moved by the Holy Ghost;' and that these representations are to be understood as implying that the writers had, in all respects, the effectual guidance of the divine Spirit. And we are still more confirmed in this conclusion because we find that it begets in those who seriously adopt it, an acknowledgment of the divine origin of Scripture, a reverence for its teachings, and a practical regard to its requirements, like what appeared in Christ and his apostles. Being convinced that the Bible has, in all parts and in all respects, the seal of the Almighty, and that it is truly and entirely from God, we are led by reason, conscience, and piety to bow submissively to its high authority, implicitly to believe its doctrines, however incomprehensible, and cordially to obey its precepts, however contrary to our natural inclinations. We come to it from day to day, not as judges, but as learners, never questioning the propriety or utility of any of its contents. This precious Word of God is the perfect standard of our faith, and the rule of our life, our comfort in affliction, and our sure guide to heaven.—L. W.

INTERPRETATION (BIBLICAL), AND HERMENEUTICS. There is a very ancient and wide-spread belief that the knowledge of divine things in general, and of the divine will in particular, is by no means a common property of the whole human race, but only a prerogative of a few specially-gifted and privileged individuals. It has been considered that this higher degree of knowledge has its source in light and instruction proceeding directly from God, and that it can be imparted to others by communicating to them a key to the signs of the divine will. Since, however, persons who in this manner have been indirectly taught, are initiated into divine secrets, and consequently appear as the confidants of deity, they also enjoy, although instructed only through the medium of others, a more intimate communion with God, a more distinct perception of his thoughts, and consequently a mediate consciousness of deity itself. It therefore follows that persons thus either immediately or mediately instructed are supposed to be capable, by means of their divine illumination and their knowledge of the signs of the divine will, to impart to mankind the ardently-desired knowledge of divine things and of the will of deity. They are considered to be interpreters or explainers of the signs of the divine will, and, consequently, to be mediators between God and man. Divine illumination and a communicable knowledge of the signs and expressions of the divine will, are thus supposed to be combined in one and the same person.

This idea is the basis of the Hebrew נָבִיא, *prophet*. The prophet is a divinely-inspired seer, and, as such, he is an interpreter and preacher of the divine will. He may either be directly called by God, or have been prepared for his office in the schools of the prophets (comp. Knobel, *Der Prophetismus der Hebräer vollständig dargestellt*, Breslau, 1837, pt. i. p. 102, sq.; pt. ii. p. 45, sq.).

However, the being filled with the Holy Ghost was the most prominent feature in the Hebrew idea of a prophet. This is even implied in the usual appellation נָבִיא, which means a person in the state of divine inspiration (not a predicter of future events). Prophetism ceased altogether as soon as Jehovah, according to the popular opinion, ceased to communicate his Spirit.

The ancient Greeks and Romans kept the idea of divine inspiration more distinct from the idea of interpretation of the divine will. They, according to a more natural manner of viewing the subject, recognised generally, in the mediator between God and man, more of an experienced and skilful interpreter than of a divinely-inspired seer. They distinguished the interpreter and the seer by different names, of which we will speak hereafter. It was the combination of the power of interpretation with inspiration, which distinguished the Hebrew prophets or seers from those of other ancient nations. The Hebrew notion of a נָבִיא appears, among the Greeks, to have been split into its two constituent parts of *μάντις*, from *μαίνεσθαι*, *to rave* (Platonis *Phædrus*, § 48, ed. Steph. p. 244, a. b.), and of *ἐξηγητής*, from *ἐξηγεῖσθαι*, *to expound*. However, the ideas of *μάντις* and of *ἐξηγητῆς* could be combined in the same person. Comp. Boissonnade, *Anecdota Græca*, i. 96, *Λάμπων οὐξηγητής μάντις γὰρ ἦν καὶ χρησμοὺς ἐξηγεῖτο* (comp. Scholia in Aristophanis *Nubes*, 336), and Arriani *Epictetus*, ii. 7, *τὸν μάντιν τὸν ἐξηγούμενον τὰ σημεῖα*; Plato, *De Legibus*, ix. p. 871, c., *μετ' ἐξηγητῶν καὶ μάντεων*; Euripidis *Phœnissæ*, v. 1018, *ὁ μάντις ἐξηγήσατο*, and *Iphigenia in Aulide*, *l.* 529. Plutarch (*Vita Numæ*, cap. xi.) places *ἐξηγητής* and *προφήτης* together; so also does Dionysius Halicarnassensis, ii. 73. The two first of these examples prove that *ἐξηγηταί* were, according to the Greeks, persons who possessed the gift of discovering the will of the Deity from certain appearances, and of interpreting signs. Jul. Pollux, viii. 124, *ἐξηγηταὶ δὲ ἐκαλοῦντο, οἱ τὰ περὶ τῶν διοσημείων καὶ τὰ τῶν ἄλλων ἱερῶν διδάσκοντες*. Harpocration says, and Suidas repeats after him, *ἐξηγητής ὁ ἐξηγούμενος τὰ ἱερά*. Comp. Bekker, *Anecdota Græca*, i. 185, *ἐξηγοῦνται οἱ ἔμπειροι*. Creuzer defines the *ἐξηγηταί*, in his *Symbolik und Mythologie der Alten Völker*, i. 15, as 'persons whose high vocation it was to bring laymen into harmony with divine things.' These *ἐξηγηταί* moved in a religious sphere (comp. Herod. i. 78, and Xenophontis *Cyropædia*, viii. 3, 11). Even the Delphic Apollo, replying to those who sought his oracles, is called by Plato *ἐξηγητής* (*Polit.* iv. 448, b.). Plutarch mentions, in *Vita Thesei*, c. 25, *ὁσίων καὶ ἱερῶν ἐξηγηταί*; comp. also the above-quoted passage of Dionysius Halicarnassensis, and especially Ruhnken (*ad Timæi Lexicon*, ed. Lugd. Bat. 1789, p. 189, sq.). The Scholiast on Sophocles (*Ajax*, *l.* 320) has *ἐξήγησις ἐπὶ τῶν θείων*, and the Scholiast on Electra, 426, has the definition *ἐξήγησις διασάφησις θείων*. It is in connection with this original signification of the word *ἐξηγητής* that the expounders of the law are styled *ἐξηγηταί*; because the ancient law was derived from the gods, and the law-language had become unintelligible to the multitude. (Comp. Lysias, vi. 10; Diodorus Siculus, xiii. 35; Ruhn-

ken, as quoted above; the annotators on Pollux and Harpocration; and K. Fr. Hermann, *Lehrbuch der Griechischen Staats-alterthumer*, Marburg, 1836, § 104, note 4). In Athenæus and Plutarch there are mentioned books under the title ἐξηγητικά, which contained introductions to the right understanding of sacred signs. (Comp Valesius, *ad Harpocrationis Lexicon*, Lipsiæ, 1824, ii. 162.)

Like the Greeks, the Romans also distinguished between *vates* and *interpres* (Cicero, *Fragm.*; Hortens.):—Sive vates sive in sacris initiisque tradendis divinæ mentis interpretes.' Servius (*ad Virgilii Æn.* iii. 359) quotes a passage from Cicero, thus:—ut ait Cicero, omnis divinandi peritia in duas partes dividitur. Nam aut furor est, ut in vaticinantibus; aut ars, ut in aruspicibus, fulguritis sive fulguratoribus, et augu ribus: that is, 'the science of divination is twofold; it is either a sacred raving, as in prophets, or an art, as in soothsayers, who regard the intestines of sacrifices, or lightnings, or the flight of birds.' The *aruspices*, *fulguriti*, *fulguratores*, and *augures*, belong to the idea of the *interpres deorum*. Comp. Cicero, *Pro domo sua*, c. 41:—Equidem sic accepi, in religionibus suscipiendis caput esse interpretari quæ voluntas deorum immortalium esse videatur:—'I have been taught thus, that in undertaking new religious performances the chief thing seems to be the interpretation of the will of the immortal gods.' Cicero (*De Divinatione*, i. 41) says:—Etruria interpretatur quid quibusque ostendatur monstris atque portentis. 'The Etrusci explain the meaning of all remarkable foreboding signs and portents.' Hence, in Cicero (*De Legibus*, ii. 27), the expression, 'interpretes religionum.'

An example of this distinction, usual among the Greeks, is found in 1 Cor. xii. 4, 30. The Corinthians filled with the Holy Ghost were γλώσσαις λαλοῦντες, *speaking in tongues*, consequently they were in the state of a μάντις; but frequently they did not comprehend the sense of their own inspiration, and did not understand how to interpret it because they had not the ἑρμηνεία γλωσσῶν, *interpretation of tongues*: consequently they were not ἐξηγηταί.

The Romans obtained the *interpretatio* from the Etruscans (Cicero, *De Divinatione*, i. 2, and Ottfried Müller, *Die Etrusker*, ii. 8, sq.); but the above distinction was the cause that the *interpretatio* degenerated into a common art, which was exercised without inspiration, like a contemptible soothsaying, the rules of which were contained in writings. Cicero (*De Divinatione*, i. 2) says:—Furoris divinationem Sibyllinis maxime versibus contineri arbitrati, eorum decem interpretes delectos e civitate esse voluerunt:—'Supposing that divination by raving was especially contained in the Sibylline verses, they appointed ten public interpreters of the same.'

The ideas of *interpres* and of *interpretatio* were not confined among the Romans to sacred subjects; which, as we have seen, was the case among the Greeks with the corresponding Greek terms. The words *interpres* and *interpretatio* were not only, as among the Greeks, applied to the explanation of the laws, but also, in general, to the explanation of whatever was obscure, and even to a mere intervention in the settlement of affairs; for instance, we find in Livy (xxi. 12) *pacis interpres*, denoting Alorcas, by whose instrumentality peace was offered. At an earlier period *interpretes* meant only those persons by means of whom affairs between God and man were settled (comp. Virgilii *Æneis*, x. 175, and Servius on this passage). The words *interpretes* and *conjectores* became convertible terms:—unde etiam somniorum atque omnium interpretes *conjectores* vocantur:—'for which reason the interpreters of dreams and omens are called also *conjecturers*' (Quintil. *Instit.* iii. 6).

From what we have stated it follows that ἐξήγησις and *interpretatio* were originally terms confined to the unfolding of supernatural subjects, although in Latin, at an early period, these terms were also applied to profane matters. The Christians also early felt the want of an interpretation of their sacred writings, which they deemed to be of divine origin; consequently they wanted interpreters and instruction by the aid of which the true sense of the sacred Scriptures might be discovered. The right understanding of the nature and will of God seemed, among the Christians, as well as at an early period among the heathen, to depend upon a right understanding of certain external signs; however, there was a progress from the unintelligible signs of nature to more intelligible written signs, which was certainly an important progress.

The Christians retained about the interpretation of their sacred writings the same expressions which had been current in reference to the interpretation of sacred subjects among the heathen. Hence arose the fact that the Greek Christians employed with predilection the words ἐξήγησις and ἐξηγητής in reference to the interpretation of the Holy Scriptures. But the circumstance that St. Paul employs the term ἑρμηνεία γλωσσῶν for the interpretation of the γλώσσαις λαλεῖν (1 Cor. xii. 10, xiv. 26), greatly contributed that words belonging to the root ἑρμηνεύειν were also made use of. According to Eusebius (*Historia Ecclesiastica*, iii. 9), Papias, bishop of Hierapolis, wrote, as early as about A.D. 100, a work under the title of λογίων κυριακῶν ἐξηγήσις, which means an interpretation of the discourses of Jesus. Papias explained the religious contents of these discourses, which he had collected from oral and written traditions. He distinguished between the meaning of ἐξηγεῖσθαι and ἑρμηνεύειν, as appears from his observation (preserved by Eusebius in the place quoted above), in which he says concerning the λόγια of St. Mathew, written in Hebrew, ἑρμήνευσε δὲ αὐτὰ ὡς ἐδύνατο ἕκαστος, 'but every one interpreted them according to his ability'. In the Greek Church, ὁ ἐξηγητής and ἐξηγηταὶ τοῦ λόγου were the usual terms for teachers of Christianity. (See Eusebii *Historia Ecclesiastica*, vii. 30, and Heinichen on this passage, note 21; Photii *Biblioth. Eod.* 105; Cave, *Hist. Liter.* i. 146). Origen called his commentary on the Holy Scriptures ἐξηγητικά; and Procopius of Gaza wrote a work on several books of the Bible, entitled σχολαὶ ἐξηγητικαί. However, we find the word ἑρμηνεία employed as a synonym of ἐξηγήσις, especially among the inhabitants of Antioch. For instance, Gregorius Nyssenus says, concerning Ephraim Syrus, γραφὴν ὅλην ἀκριβῶς πρὸς λέξιν ἡρμήνευσεν (see Gregorii Nysseni *Vita Ephraimi Syri*; Opera, Paris, ii. p. 1033). Theodorus of Mopsuestia, Theodoret,

and others, wrote commentaries on the sacred Scriptures under the title of ἑρμηνεία (compare A. H. Niemeyer, *de Isidori Pelusiotæ Vita, Scriptis, et Doctrina*, Halae, 1825. p. 207).

Among the Latin Christians the word *interpres* had a wider range than the corresponding Greek term, and the Latins had no precise term for the exposition of the Bible which exactly corresponded with the Greek. The word *interpretatio* was applied only in the sense of OCCUPATION or ACT *of an expositor of the Bible*, but not in the sense of CONTENTS *elicited from biblical passages*. The words *tractare*, *tractator*, and *tractatus* were in preference employed with respect to biblical exposition, and the sense which it elicited. Together with these words there occur *commentarius* and *expositio*. In reference to the exegetical work of St Hilary on St. Matthew, the codices fluctuate between *commentarius* and *tractatus*. St. Augustine's *tractatus* are well known; and this father frequently mentions the *divinarum scripturarum tractatores*. For instance, *Retractationes* l. 23. *divinorum tractatores eloquiorum*. Sulpicius Severus, *Dial.* i. 6. *originis .... qui tractator sacrorum peritissimus habebatur*. Vincentius Lirinensis observes in his *Commonitorium* on 1 Cor. xii. 28:—tertio doctores qui tractatores nunc appellantur; quos hic idem apostolus etiam prophetas interdum nuncupat, eo quod per eos prophetarum mysteria populis aperiantur:—'in the third place teachers who are now called *tractatores;* whom the same apostle sometimes styles prophets, because by them the mysteries of the prophets are opened to the people' (compare Dufresne, *Glossarium mediæ et infimæ Latinitatis*, *sub* TRACTATOR *et* TRACTATUS; and Baluze, *ad Servat. Lupum*, p. 479).

However, the occupation of *interpres*, in the nobler sense of this word, was not unknown to St. Jerome; as may be seen from his *Præfatio in libros Samuelis* (Opera, ed. Vallarsi, ix. p. 459):—Quicquid enim crebrius vertendo et emendando solicitius et didicimus et tenemus, nostrum est. Et quum intellexeris, quod antea nesciebas, vel interpretem me estimato si gratus es, vel παραφραστὴν si ingratus:—'for whatever by frequently translating and carefully correcting we have learned and retain, is our own. And if you have understood what you formerly did not know, consider me to be an expositor if you are grateful, or a paraphrast if you are ungrateful.'

In modern times the word *interpretatio* has again come into repute in the sense of scriptural exposition, for which, indeed, *interpretation* is now the standing technical term.

The German language also distinguishes between the words *auslegen* and *erklären* in such a manner that the former corresponds to ἐξηγεῖσθαι and *interpretari*. The word *auslegen* is always used in the sense of rendering perceptible what is contained under signs and symbols. Compare Dionysii Halicarnassensis *Antiq. Rom.* ii. 73: τοῖς τε ἰδιώταις, ὅποσοι μὴ ἴσασι τοὺς περὶ τὰ θεῖα σεβασμοὺς, ἐξηγηταὶ γίνονται καὶ προφῆται: 'for the ignorant, who do not know what belongs to divine worship, there are expositors and prophets.'

The word *erklären*, on the contrary, means *to clear up by arguments what has been indistinctly understood*, so that what was incomprehensible is comprehended.

The *Erklärer* does not develope what is hidden and concealed, but explains what is unclear and obscure (see Weigand, *Wörterbuch der Deutschen Synonymen*, 1. Mainz, 1840, p. 140 sq.). Hence it follows that the *Ausleger* of the Bible occupies a position different from that of the *Erklärer*, although these terms are frequently employed as if they were synonymous. The *Ausleger*, ἐξηγητής, opens what is concealed under the words of the Bible. He unveils mysteries, while the *Erklärer*, ἑρμηνεύς, sees in the words of the Bible not merely signs for something concealed and hidden, but words the sense of which is to be cleared up whenever it is obscure. The *Erklärer* stands on NATURAL ground, but the *Ausleger* on SUPERNATURAL.

From ancient times the church, or rather ecclesiastical bodies and religious denominations, have taken the supernatural position with reference to the Bible, as, before the Church, the Jews did in respect of the Old Testament. The church and denominations have demanded *Ausleger*, not *Erklärer*. They have supposed that in the authors of Biblical books there did not exist a literary activity of the same kind which induces men to write down what they have thought, but have always required from their followers the belief that the Biblical authors wrote in a state of inspiration, that is to say, under a peculiar and direct influence of the Divine Spirit. Sometimes the Biblical authors were described to be merely external and mechanical instruments of God's revelation. But however wide, or however narrow the boundaries were, within which the operation of God upon the writers was confined by ecclesiastical supposition, the origin of the Biblical books was always supposed to be essentially different from the origin of human compositions; and this difference demanded the application of peculiar rules in order to understand the Bible. There were required peculiar arts and kinds of information in order to discover the sense and contents of books which, on account of their extraordinary origin, were inaccessible by the ordinary way of logical rules, and whose written words were only outward signs, behind which a higher and divine meaning was concealed. Consequently, the church and denominations required *Deuter*, *Ausleger*, ἐξηγηταί, or interpreters, of the signs by means of which God had revealed his will. Thus necessarily arose again in the Christian church the art of opening or interpreting the supernatural; which art had an existence in earlier religions, but with this essential difference, that the signs, by the opening of which supernatural truth was obtained, were now more simple, and of a more intelligible kind, than in earlier religions. They were now written signs, which belonged to the sphere of speech and language, through which alone all modes of thinking obtain clearness, and can be readily communicated to others. But the Holy Scriptures in which divine revelation was preserved, differ, by conveying divine thoughts, from common language and writing, which convey only human thoughts. Hence it followed that its sense was much deeper, and far exceeded the usual sphere of human thoughts, so that the usual requisites for the right understanding of written documents appeared to be insufficient. According to this opinion a LOWER and a HIGHER sense of the Bible were distinguished. The lower sense was that which

could be elicited according to the rules of grammar; the higher sense was considered to consist of deeper thoughts concealed under the grammatical meaning of the words. These deeper thoughts they endeavoured to obtain in various ways, but not by grammatical research.

The Jews, in the days of Jesus, employed for this purpose especially the typico-allegorical interpretation. The Jews of Palestine endeavoured by means of this mode of interpretation especially to elicit the secrets of futurity, which were said to be fully contained in the Old Testament. (See Wahner, *Antiquitates Hebræorum*, vol. i. Gottingæ, 1713, p. 341, sq.; Dopke, *Hermeneutik der neutestamentlichen Schriftsteller*, Leipzig, 1829, p. 88, sq., 164, sq.; Hirschfeld, *der Geist der Talmudischen Auslegung der Bibel*, Berlin, 1840; comp. Juvenal, *Sat.* xiv. 103; Justin Martyr, *Apol.* i. pp. 52, 61; Bretschneider, *Historisch-dogmatische Auslegung des Neuen Testamentes*, Leipzig, 1806, p. 35, sq.)

The Alexandrine Jews, on the contrary, endeavoured to raise themselves from the simple sense of the words, τὸ ψυχικόν, to a higher, more general, and spiritual sense, τὸ πνευματικόν (see Dähne, *Geschichtliche Darstellung der Jüdisch-Alexandrinischen Religions-Philosophie*, Halle, 1834, i. p. 52, sq.; ii. 17. 195, sq., 209, 228, 241). Similar principles were adopted by the authors of the New Testament (see De Wette, *Ueber die Symbolisch-Typische Lehrart in Briefe an die Hebräer*, in *der Theologischen Zeitschrift*, von Schleiermacher und De Wette, part iii.; Tholuck, *Beilage zum Commentar über den Brief an die Hebräer*, 1840).

These two modes of interpretation, the ALLEGORICO-TYPICAL and the ALLEGORICO-MYSTICAL, are found in the Christian writers as early as the first and second centuries; the latter as γνῶσις, the former as a demonstration that all and everything, both what had happened, and what would come to pass, was somehow contained in the sacred Scriptures (see Justin Martyr, as quoted above, and Tertullian, *Adversus Marcionem*, iv. 2, Prædicatio discipulorum suspecta fieri posset si non assistat auctoritas:—'The preaching of the disciples might appear to be questionable, if it was not supported by other authority').

To these allegorical modes of interpretation was added a third mode, which necessarily sprung up after the rise of the Catholico-apostolical church, namely, the DOGMATICAL, or THEOLOGICO-ECCLESIASTICAL. The followers of the Catholico-apostolical church agreed that all apostles and all apostolical writings had an equal authority, because they were all under an equal guidance of the Holy Ghost. Hence it followed that they could not set forth either contradictory or different doctrines. A twofold expedient was adopted in order to effect harmony of interpretation. The one was of the apparent and relative kind, because it referred to subjects which appear incomprehensible only to the confined human understanding, but which are in perfect harmony in the divine thoughts. Justin (*Dialogus cum Tryphone*, c. 65) says:—ἐκ παντός πεπεισμένος ὅτι οὐδεμία γραφὴ τῇ ἑτέρᾳ ἐναντία ἐστίν, αὐτὸς μὴ νοεῖν μᾶλλον ὁμολογήσω τὰ εἰρημένα:—'Being quite certain that no Scripture contradicts the other, I will rather confess that I do not understand what is said therein.' St. Chrysostom restricted this as follows:—πάντα σαφῆ καὶ εὐθέα τὰ παρὰ ταῖς θειαῖς γραφαῖς, πάντα τὰ ἀναγκαῖα δῆλα (*Homil.* iii. c. 4, *in Ep.* 2 *ad Thessalonicenses*):—'In the divine writings everything is intelligible and plain, whatever is necessary is open' (compare *Homil.* iii. *de Lazaro*, and Athanasii *Oratio contra gentes*; Opera i. p. 12).

The SECOND expedient adopted by the church was to consider certain articles of faith to be LEADING DOCTRINES, and to regulate and define accordingly the sense of the Bible wherever it appeared doubtful and uncertain. This led to the THEOLOGICO-ECCLESIASTICAL or DOGMATICAL mode of interpretation, which, when the Christians were divided into several sects, proved to be indispensable to the Church, but which adopted various forms in the various sects by which it was employed. Not only the heretics of ancient times, but also the followers of the Roman Catholic, the Greek Catholic, the Syrian, the Anglican, the Protestant Church, &c., have endeavoured to interpret the Bible in harmony with their dogmas.

The different modes of interpreting the Bible are, according to what we have stated, the following three—the GRAMMATICAL, the ALLEGORICAL, the DOGMATICAL. The grammatical mode of interpretation simply investigates the sense contained in the words of the Bible. The allegorical, according to Quintilian's sentence 'aliud verbis, aliud sensu ostendo,' maintains that the words of the Bible have, besides their simple sense, another which is concealed as behind a picture, and endeavours to find out this supposed figurative sense, which, it is said, was not intended by the authors (see Olshausen, *Ein Wort über tieferen Schriftsinn*, Königsberg, 1824). The dogmatical mode of interpretation endeavours to explain the Bible in harmony with the dogmas of the church, following the principle of *analogia fidei*. Compare *Consilii Tridentini* sess. iv. decret. 2:—Ne quis Sacram Scripturam interpretari audeat contra eum sensum quem tenuit et tenet sancta mater ecclesia, cujus est judicare de vero sensu et interpretatione Scripturarum Sacrarum:—'Let no one venture to interpret the Holy Scriptures in a sense contrary to that which the holy mother church has held, and does hold, and which has the power of deciding what is the true sense and the right interpretation of the Holy Scriptures.'

Rambach, *Institutiones Hermeneuticæ Sacræ*, Jenæ, 1723: Auctoritas, quam hæc analogia fidei in re exegetica habet, in eo consistit, ut sit fundamentum ac principium generale, ad cujus normam omnes Scripturæ expositiones, tamquam ad lapidem Lydium, exigendæ sunt:—'The authority which this analogy of faith exercises upon interpretation consists in this, that it is the foundation and general principle according to the rule of which all Scriptural interpretations are to be tried as by a touchstone.'

Ecclesia Anglicana, art. xx.:—Ecclesiæ non licet quicquam instituere, quod verbo Dei scripto adversetur, nec unum Scripturæ locum sic exponere potest, ut alteri contradicat:—'It is not lawful for the church to ordain anything that is contrary to God's word written, neither may it expound one place of Scripture so as to be repugnant to another.'

Confessio Scotica, 18:—Nullam enim interpretationem admittere audemus, quæ alicui prin-

cipali articulo fidei, aut alicui plano textui Scripturæ, aut caritatis regulæ repugnat, &c.:—'We dare not admit any interpretation which contradicts any leading article of faith, or any plain text of Scripture, or the rule of charity,' &c.

Besides the three modes of interpretation which have been mentioned above, theological writers have spoken of TYPICAL, PROPHETICAL, EMPHATICAL, PHILOSOPHICAL, TRADITIONAL, MORAL, or PRACTICAL interpretation. But all these are only one-sided developments of some single feature contained in the above three, arbitrarily chosen; and, therefore, they cannot be considered to be separate modes, but are only modifications of one or other of those three. The interpretation in which all these modes are brought into harmony, has lately been called the PANHARMONICAL, which word is not very happily chosen (F. H. Germar, *Die Panharmonische Interpretation der Heiligen Schrift*, Leipsic, 1821; and by the same author, *Beitrag zur Allgemeinen Hermeneutik*, Altona, 1828).

The ALLEGORICAL, as well as the DOGMATICAL, mode of interpretation, presupposes the GRAMMATICAL, which, consequently, forms the basis of the other two; so that neither the one nor the other can exist entirely without it. Consequently, the grammatical mode of interpretation must have an historical precedence before the others. But history also proves that the church has constantly endeavoured to curtail the province of grammatical interpretation, to renounce it as much as possible, and to rise above it. If we follow, with the examining eye of an historical inquirer, the course in which these three modes of interpretation, in their mutual dependence upon each other, have generally been applied, it becomes evident that in opposition to the grammatical mode, the allegorical was first set up. Subsequently, the allegorical was almost entirely supplanted by the dogmatical; but it started up with renewed vigour when the dogmatical mode rigorously confined the spiritual movement of the human intellect, as well as all religious sentiment, within the too narrow bounds of dogmatical despotism.

The dogmatical mode of interpretation could only spring up after the church, renouncing the original multiplicity of opinions, had agreed upon certain leading doctrines; after which time, it grew, together with the church, into a mighty tree, towering high above every surrounding object, and casting its shade over every thing. The longing desire for light and warmth, of those who were spell-bound under its shade, induced them to cultivate again the allegorical and the grammatical interpretation; but they were unable to bring the fruits of these modes to full maturity. Every new intellectual revolution, and every spiritual development of nations, gave a new impulse to grammatical interpretation. This impulse lasted until interpretation was again taken captive by the overwhelming ecclesiastical power, whose old formalities had regained strength, or which had been renovated under new forms. Grammatical interpretation, consequently, goes hand in hand with the principle of spiritual progress, and the dogmatical with the conservative principle. Finally, the allegorical interpretation is as an artificial aid subservient to the conservative principle, when, by its vigorous stability, the latter exercises a too unnatural pressure. This is confirmed by the history of all times and countries, so that we may confine ourselves to the following few illustrative observations. The various tendencies of the first Christian period were combined in the second century, so that the principle of one general (Catholic) church was gradually adopted by most parties. But now, it became rather difficult to select, from the variety of doctrines prevalent in various sects, those by the application of which to biblical interpretation, a perfect harmony and systematical unity could be effected. Nevertheless, the wants of science powerfully demanded a systematical arrangement of biblical doctrines, even before a general agreement upon dogmatical principles had been effected. The wants of science were especially felt among the Alexandrine Christians; and in Alexandria, where the allegorical interpretation had from ancient times been practised, it offered the desired expedient which met the exigency of the church. Hence, it may naturally be explained why the Alexandrine theologians of the second and third century, particularly Clemens Alexandrinus and Origen, interpreted allegorically, and why the allegorical interpretation was perfected, and in vogue, even before the dogmatical came into existence. Origen, especially in his fourth book, *De Principiis*, treats on scriptural interpretation, using the following arguments:—The Holy Scriptures, inspired by God, form an harmonious whole, perfect in itself, without any defects and contradictions, and containing nothing that is insignificant and superfluous. The grammatical interpretation leads to obstacles and objections, which, according to the quality just stated of the Holy Scriptures, are inadmissible and impossible. Now, since the merely grammatical interpretation can neither remove nor overcome these objections, we must seek for an expedient beyond the boundaries of grammatical interpretation. The allegorical interpretation offers this expedient, and consequently is above the grammatical. Origen observes that man consists of body, soul, and spirit; and he distinguishes a triple sense of the Holy Scriptures analogous to this division: — *οὐκοῦν τρισσῶς ἀπογράφεσθαι δεῖ εἰς τὴν ἑαυτοῦ ψυχὴν τὰ τῶν ἁγίων γραμμάτων νοήματα· ἵνα ὁ μὲν ἁπλούστερος οἰκοδομῆται, ἀπὸ τῆς οἱονεὶ σαρκὸς τῆς γραφῆς, οὕτως ὀνομαζόντων ἡμῶν τὴν πρόχειρον ἐκδοχήν· ὁ δὲ ἐπὶ ποσὸν ἀναβεβηκὼς ἀπὸ τῆς ὡσπερεὶ ψυχῆς αὐτῆς· ὁ δὲ τέλειος καὶ ὅμοιος τοῖς παρὰ τῷ ἀποστόλῳ* (1 Cor. ii. 6, 7) *λεγομένοις· σοφίαν δὲ λαλοῦμεν ..... ἀπὸ τοῦ πνευματικοῦ νόμου σκιὰν ἔχοντος τῶν μελλόντων ἀγαθῶν· ὥσπερ γὰρ ὁ ἄνθρωπος συνέστηκεν ἐκ σώματος καὶ ψυχῆς καὶ πνεύματος, τὸν αὐτὸν πρόπον καὶ ἡ οἰκονομηθεῖσα ὑπὸ τοῦ θεοῦ εἰς ἀνθρώπων σωτηρίαν δοθῆναι γραφήν*:—'The sentiments, therefore, of the Holy Scriptures are to be impressed upon our minds in a three-fold manner, in order that whosoever belongs to the simpler sort of persons, may receive edification from the flesh of the Scripture (thus we call their obvious meaning), but he who is somewhat more advanced from its soul; but whosoever is perfect, and similar to those to whom the apostle alludes, where he says, "we speak wisdom"... from the spiritual law which contains a shadow of good things to come; for as man consists of spirit, body, and soul, so also the Holy Writ, which God has planned to be granted for the

salvation of mankind' (*De Princip.*, iv. 168; compare Klausen, *Hermeneutik des Neuen Testaments*, Leipzig, 1841, p. 104, sq.).

Since, however, allegorical interpretation cannot be reduced to settled rules, but always depends upon the greater or less influence of imagination; and since the system of Christian doctrines, which the Alexandrine theologians produced by means of allegorical interpretation, was in many respects objected to; and since, in opposition to these Alexandrine theologians, there was gradually established, and more and more firmly defined, a system of Christian doctrines which formed a firm basis for uniformity of interpretation, in accordance with the mind of the majority, there gradually sprung up a dogmatical mode of interpretation founded upon the interpretation of ecclesiastical teachers, which had been recognised as orthodox in the Catholic church. This dogmatical interpretation has been in perfect existence since the beginning of the fourth century, and then more and more supplanted the allegorical, which henceforward was left to the wit and ingenuity of a few individuals. Thus St. Jerome, about A.D. 400, could say:—Regula scripturarum est: ubi manifestissima prophetia de futuris textitur per INCERTA ALLEGORIÆ non extenuare quæ scripta sunt (*Comment. in Malachiam*, i. 16).—'The rule of scriptures is, that where there is a manifest prediction of future events, not to enfeeble that which is written by the uncertainty of allegory.' During the whole of the fourth century, the ecclesiastico-dogmatical mode of interpretation was developed with constant reference to the grammatical. Even Hilary, in his book *De Trinitate*, i. properly asserts:—Optimus lector est, qui dictorum intelligentiam expectet ex dictis potius quam imponat, et retulerit magis quam attulerit; neque cogat id videri dictis contineri, quod ante lectionem præsumpserit intelligendum. 'He is the best reader who rather expects to obtain sense from the words, than imposes it upon them, and who carries more away than he has brought, nor forces that upon the words which he had resolved to understand before he began to read.'

After the commencement of the fifth century, grammatical interpretation fell entirely into decay; which ruin was effected partly by the full development of the ecclesiastical system of doctrines defined in all their parts, and by a fear of deviating from this system, partly also by the continually increasing ignorance of the languages in which the Bible was written. The primary condition of ecclesiastical or dogmatical interpretation was then most clearly expressed by Vincentius Lirinensis (*Commonit.* i.):—Quia videlicet scripturam sacram pro ipsa sua altitudine non uno eodemque sensu universi accipiunt, sed ejusdem eloquia aliter atque aliter alius atque alius interpretatur, ut pene quot homines sunt, tot illinc sententiæ erui posse videantur..... in ipsa catholica ecclesia magnopere curandum est, ut id teneamus, quod ubique, quod semper, quod ab omnibus creditum est:—'Since the Holy Scriptures, on account of their depth, are not understood by all in the same manner, but its sentences are understood differently by different persons, so that they might seem to admit as many meanings as there are men, we must well take care that within the pale of the Catholic church we hold fast what has been believed everywhere, always, and by all' (Compare *Commonit.* ii. ed. Brenemus, 1688, p. 321, sq.). Henceforward, interpretation was confined to the mere collection of explanations, which had first been given by men whose ecclesiastical orthodoxy was unquestionable. Praetantius præsumpta novitate non inhiet, sed priscorum fonte satiari:—'It is better not to be inhaled with the pretended novelty, but to be filled from the fountain of the ancients' (Cassiodori *Institutiones Divinæ, Præf.* Compare Alcuini *Epistola ad Gislam*, Opera, ed. Frobenius, i. p. 464. *Comment. in Joh. Præf.*, ib. p. 460. Claudius Turon, *Prolegomena in Comment. in libros Regum.* Haymo, *Historia Ecclesiastica*, ix. 3, &c.). Doubtful cases were decided according to the precedents of ecclesiastical definitions. In his quæ vel dubia vel obscura fuerint id noverimus sequendum quod nec præceptis evangelicis contrarium, nec decretis sanctorum inventur adversum:—'In passages which may be either doubtful or obscure, we might know that we should follow that which is found to be neither contrary to evangelical precepts, nor opposed to the decrees of holy men' (Benedicti *Capitularia*, iii. 58, in Pertz, *Monumenta Veteris Germaniæ Histor.* iv. 2, p. 107). But men like Bishop Agobardus (A.D. 840, in Galandii *Bibl.*, xiii. p. 416), Johannes Scotus, Erigena, Druthmar, Nicolaus Lyranus, Roger Bacon, and others, acknowledged the necessity of grammatical interpretation, and were only wanting in the requisite means, and in knowledge, for putting it successfully into practice.

During the whole period of the middle ages the allegorical interpretation again prevailed. The middle ages were more distinguished by sentiment than by clearness, and the allegorical interpretation gave satisfaction to sentiment and occupation to free mental speculation.

When, in the fifteenth century, classical studies had revived, they exercised also a favourable influence upon Biblical interpretation, and restored grammatical interpretation to honour. It was especially by grammatical interpretation that the domineering Catholic church was combated at the period of the Reformation; but as soon as the newly sprung-up Protestant church had been dogmatically established, it began to consider grammatical interpretation a dangerous adversary of its own dogmas, and opposed it as much as did the Roman Catholics themselves. From the middle of the sixteenth to the middle of the eighteenth century this important ally of Protestantism was subjected to the artificial law of a new dogmatical interpretation; while the Roman Catholic church changed the principle of interpretation formerly advanced by Vincentius, into an ecclesiastical dogma. In consequence of this new oppression the religious sentiment, which had frequently been wounded both among Roman Catholics and Protestants, took refuge in allegorical interpretation, which then re-appeared under the forms of typical and mystical theology.

After the beginning of the eighteenth century grammatical interpretation recovered its authority. It was then first re-introduced by the Arminians, and, in spite of constant attacks, towards the conclusion of that century, it decidedly prevailed among the German Protestants. It exercised a very beneficial influence, although it

cannot be denied that manifold errors occurred in its application. During the last thirty years both Protestants and Roman Catholics have again curtailed the rights and invaded the province of grammatical interpretation, by promoting (according to the general reaction of our times) the opposing claims of dogmatical and mystical interpretation (comp. J. Rosenmüller, *Historia Interpretationis Librorum sacrorum in Ecclesia Christiana*, Lipsiæ, 1795-1814, 5 vols.; W. Van Mildert, *An Inquiry into the General Principles of Scripture Interpretation, in Eight Sermons*, &c., Oxford, 1815; G. W. Meyer, *Geschichte der Schrifterklärung seit der Wiederherstellung der Wissenschaften*, Göttingen, 1802-9, 5 vols.; Richard Simon, *Histoire Critique des principaux Commentateurs du Nouv. Test.*, Rotterdam, 1693; H. N. Klausen, *Hermeneutik des Neuen Testamentes*, Aus dem Dänischen, Leipzig, 1841, p. 77, sq.; E. F. K. Rosenmüller, *Handbuch für die Literatur der Biblischen Kritik und Exegese*, Göttingen, 1797-1800, 4 vols.).

The aim of human speech in general may be described as the desire to render one's own thoughts intelligible to others by means of words in their capacity of signs of thoughts. These words may be written, or merely spoken. In order to understand the speech of another, several arts and branches of knowledge are requisite. The art of understanding the language of another is called Hermeneutics, ἑρμηνευτικὴ τέχνη, or ἐπιστήμη. Every art may be reduced to the skilful application of certain principles, which, if they proceed from one highest principle, may be said to be based on science.

Here we have to consider not the spoken, but the written language only. The rules to be observed by the interpreter, and the gifts which qualify him for the right understanding of written language, are applicable either to all written language in general, or only to the right understanding of particular documents; they are, therefore, to be divided into *general* and *particular*, or *especial* rules and gifts. In Biblical interpretation arises the question, whether the general hermeneutical rules are applicable to the Bible and sufficient for rightly understanding it, or whether they are insufficient, and have to undergo some modification.

Most Biblical interpreters, as we might infer from the principle of dogmatical and allegorical interpretation, have declared the general hermeneutical principles to be insufficient for explaining the Bible, and required for this purpose especial hermeneutical rules, because the Bible, they said, which had been written under the direct guidance of the Holy Ghost, could not be measured by the common rules which are applicable only to the lower sphere of merely human thoughts and compositions. Therefore, from the most ancient times, peculiar hermeneutical rules, meeting the exigency of biblical interpretation, have been set forth, which deviated from the rules of general hermeneutics. Thus Biblical Hermeneutics were changed into an art of understanding the Bible according to a certain ecclesiastical system in vogue at a certain period.

The advocates of grammatical interpretation have opposed these Biblical hermeneutics, as proceeding upon merely arbitrary suppositions. Sometimes they merely limited its assertions, and sometimes they rejected it altogether. In the latter case they said that the principles of general hermeneutics ought to be applicable to the Holy Scriptures also. Against the above-mentioned train of argument cited from Origen, on which the demand of particular Biblical hermeneutics essentially rests, the following argument might, with greater justice, be opposed: if God deemed it requisite to reveal his will to mankind by means of intelligible books, he must, in choosing this medium, have intended that the contents of these books should be discovered according to those general laws which are conducive to the right understanding of documents in general. If this were not the case God would have chosen insufficient and even contradictory means inadequate to the purpose he had in view.

The interpretation, which, in spite of all ecclesiastical opposition, ought to be adopted as being the only true one, strictly adheres to the demands of general hermeneutics, to which it adds those particular hermeneutical rules which meet the requisites of particular cases. This has, in modern times, been styled the HISTORICO-GRAMMATICAL mode of interpretation. This appellation has been chosen because the epithet grammatical seems to be too narrow and too much restricted to the mere verbal sense. It might be more correct to style it simply the HISTORICAL interpretation, since the word HISTORICAL comprehends everything that is requisite to be known about the language, the turn of mind, the individuality, &c. of an author in order rightly to understand his book.

In accordance with the various notions concerning Biblical interpretation which we have stated, there have been produced Biblical hermeneutics of very different kinds; for instance, in the earlier period we might mention that of the Donatist Ticonius, who wrote about the fourth century his *Regulæ ad investigandam et inveniendam Intelligentiam Scripturarum Septem*; Augustinus, *De Doctrina Christiana*, lib. i. 3; Isidorus Hispalensis, *Sentent.* 419, sq.; Santis Pagnini (who died in 1541) *Isagoga ad Mysticos Sacræ Scripturæ Sensus, libri octodecim*, Colon. 1540; Sixti Senensis (who died 1599) *Bibliotheca Sancta*, Venetiis, 1566. Of this work, which has been frequently reprinted, there belongs to our present subject only *Liber tertius Artem exponendi Sancta Scripta Catholicis Expositoribus aptissimis Regulis et Exemplis ostendens.* At a later period the Roman Catholics added to these the works of Bellarmine, Martianay, Calmet, Jahn, and Arigler.

On the part of the Lutherans were added by Matt. Flacius, *Clavis Scripturæ Sacræ*, Basileæ, 1537, and often reprinted in two volumes; by Johann Gerhard, *Tractatus de Legitima Scripturæ Sacræ Interpretatione*, Jenæ, 1610; by Solomon Glassius, *Philologiæ Sacræ*, libri quinque, Jenæ, 1623, and often reprinted; by Jacob Rambach, *Institutiones Hermeneuticæ Sacræ*, Jenæ, 1723.

On the part of the Calvinists there were furnished by J. Alph. Turretinus, *De Scripturæ Sacræ Interpretatione Tractatus Bipartitus*, Dortrecht, 1723, and often reprinted. In the English Church were produced by Herbert Marsh *Lectures on the Criticism and Interpretation of the Bible*, Cambridge, 1828.

Since the middle of the last century it has been usual to treat on the Old Testament hermeneutics

and on those of the New Testament in separate works. For instance, G. W. Meyer, *Versuch einer Hermeneutik des Alten Testamentes*, Lubeck, 1799; J. H. Pareau, *Institutio Interpretis Veteris Testamenti*, Trajecti, 1822; J. A. Ernesti, *Institutio Interpretis Novi Testamenti*, Lipsiæ, 1761, ed. 5ta., curante Ammon, 1809. Translated into English by Terrot, Edinburgh, 1833; Morus, *Super Hermeneutica Novi Testamenti scriptura tradenda*, ed. Eichstaedt, Lipsiæ, 1797-1802, in two volumes, but not completed; K. A. G. Keil, *Lehrbuch der Hermeneutik des Neuen Testamentes, mit Grundsätzen der grammatisch-historischen Interpretation*, Leipzig, 1810; the same work in Latin, Lipsiæ, 1811; T. T. Conybeare, *The Bampton Lectures for the year* 1824, *being an attempt to trace the History and to ascertain the limits of the secondary and spiritual Interpretation of Scripture*, Oxford, 1824; Schleiermacher, *Hermeneutik und Kritik mit besonderer Beziehung auf das Neue Testament*, herausgegeben von Lücke, Berlin, 1838; H. Nik. Klaiber, *Hermeneutik des Neuen Testamentes*, aus dem Dänischen, Leipzig, 1841; Chr. Gottlieb Wilke, *Die Hermeneutik des Neuen Testamentes systematisch dargestellt*, Leipzig, 1843.*—K. A. C.

INTRODUCTION, BIBLICAL. The Greek word εἰσαγωγή, in the sense of an introduction to a science, occurs only in later Greek, and was first used to denote an introduction to the right understanding of the Bible, by a Greek called Adrian, who lived in the fifth century after Christ. Ἀδριάνου εἰσαγωγὴ τῆς γραφῆς is a small book, the object of which is to assist readers who are unacquainted with biblical phraseology in rightly understanding peculiar words and expressions. It was first edited by David Hoschel, under the title of Adriani *Isagoge in Sacram Scripturam Græce cum Scholiis*, Augustæ Vindelorum, 1602, 4to. This work is reprinted in the London edition of the *Critici Sacri*, tom. viii.; and in the Frankfort edition, tom. vi. Before Adrian, the want of similar works had already been felt, and books of a corresponding tendency were in circulation, but they did not bear the title of εἰσαγωγή. Melito of Sardis, who lived in the latter half of the second century, wrote a book under the title ἡ κλείς, being a key both to the Old and to the New Testament. The so-called Λέξεις, which were written at a later period, are books of a similar description. Some of these Λέξεις have been printed in Matthæi's *Novum Testamentum Græce*, and in Boissonade's *Anecdota Græca*, tom. iii. Parisiis, 1831. These are merely linguistic introductions; but there was soon felt the want of works which might solve other questions; such as, for instance, what are the principles which should guide us in biblical interpretation. The Donatist Ticonius wrote, about the year 380, *Regulæ ad investigandam et inveniendam Intelligentiam Scripturarum Septem*. St. Augustine, in his work *De Doctrinâ Christianâ*, (iii. 302), says concerning these seven rules, that the author's intention was by means of them to open the secret sense of Holy Writ, 'quasi clavibus,' as *if it were by keys*.

There arose also a question concerning the extent of Holy Writ—that is to say, what belonged, and what did not belong, to Holy Writ; and also respecting the contents of the separate biblical books, and the order in which they should follow each other, &c.

About A.D. 550, Cassiodorus wrote his *Institutiones Divinæ*. He mentions in this work, under the name of *Introductores Divinæ Scripturæ*, five authors who had been engaged in biblical investigations, and in his tenth chapter speaks of them thus:—Ad introductores scripturæ divinæ . . . . . sollicita mente redeamus, id est Ticonium Donatistam, Sanctum Augustinum de doctrina Christiana, Adrianum, Eucherium, et Junilium, quos nobis curiositate collegi, ut, quidquid erat similis intentionis, in uno corpore adunati celeres clauderetur:—'Let us eagerly return to the guides to Holy Writ; that is to say, to the Donatist Ticonius, to St. Augustine on Christian doctrine, to Adrian, Eucherius, and Junillus, whom I have sedulously collected, in order that works of a similar purport might be combined in one volume.'

Henceforward the title, *Introductio in Scripturam Sacram*, was established, and remained current for all works in which were solved questions introductory to the study of the Bible. In the Western, or Latin church, during a thousand years, scarcely any addition was made to the collection of Cassiodorus; while in the Eastern, or Greek church, only two works written during this long period deserve to be mentioned, both bearing the title, Σύνοψις τῆς θείας γραφῆς. One of these works was falsely ascribed to Athanasius, and the other as falsely to Chrysostom.

At the commencement of the sixteenth century the Dominican friar, Santes Pagninus, who died in 1541, published his *Isagoge*, by means of which he intended to revive the biblical knowledge of Jerome and St. Augustine. This work, considering the time of its appearance, was a great step in advance. Its title is, *Santis Pagnini Lucensis Isagoge ad Sacras Literas, liber unicus*, Coloniæ, 1540, fol.

The work of the Dominican friar, Sixtus of Sienna, who died in 1599, is of greater importance, although it is manifestly written under the influence of the Inquisition, which had just been restored, and is perceptibly shackled by the decrees of the Council of Trent. Sixtus had the intention, worthy of an inquisitor, to expurgate from Christian literature every heretical element. The *Index Librorum Prohibitorum*, which was then first published, had the same object; but Sixtus furnished also a list of books to be used by a true Catholic Christian for the right understanding of Holy Writ, as well as the principles which should guide a Roman Catholic in criticism and interpretation. The title of his work is, *Bibliotheca Sancta ab A. F. Sixto, Senensi, ordinis prædicatorum, ex præcipuis Catholicæ Ecclesiæ auctoribus collecta, et in octo libros digesta*, Venetiis, 1566. This book is dedicated to the Cardinal Ghisleri, who ascended the papal throne in 1566, under the name of Pius V.: it has frequently been reprinted.

* The writer of this article does not seem to have become acquainted with a very valuable work on the general subject, recently published in this country, under the title of *Sacred Hermeneutics developed and applied; including a History of Biblical Interpretation from the earliest of the Fathers to the Reformation*, by the Rev. S. Davidson, LL.D., Edinburgh, 1843.

The decrees of the Council of Trent prevented the Roman Catholics from moving freely in the field of biblical investigation, while the Protestants zealously carried out their researches in various directions. The Illyrian, Matthias Flacius, in his *Clavis Scripturæ Sacræ, seu de Sermone Sacrarum Literarum*, which was first printed at Basle, 1567, in folio, furnished an excellent work on biblical Hermeneutics; but it was surpassed by the Prolegomena of Brian Walton, which belong to his celebrated *Biblia Sacra Polyglotta*, London, 1657, six volumes fol. These Prolegomena contain much that will always be accounted valuable and necessary for the true criticism of the sacred text. They have been published separately, with notes, by Archdeacon Wrangham, in 2 vols. 8vo. Thus we have seen that excellent works were produced on isolated portions of biblical introduction, but they were not equalled in merit by the works in which it was attempted to furnish a whole system of biblical introduction.

The following biblical introductions are among the best of those which were published about that period: Michaelis Waltheri *Officina Biblica noviter adaperta, &c.*, Lipsiæ, first published in 1636; Abrahami Calovii *Criticus Sacer Biblicus, &c.*, Vitembergæ, 1643; J. H. Hottinger, *Thesaurus Philologicus, seu Clavis Scripturæ Sacræ*, Tiguri, 1649; Johannis Henrici Heidegger *Enchiridion Biblicum ἑρομνημονικόν*, Tiguri, 1681; Leusden, a Dutchman, published a work entitled *Philologus Hebræus, &c.*, Utrecht, 1656, and *Philologus Hebræo-Græcus Generalis*, Utrecht, 1670. All these works have been frequently reprinted.

The dogmatical zeal of the Protestants was greatly excited by the work of Louis Capelle, a reformed divine and learned professor at Saumur, which appeared under the title of Ludovici Cappelli *Critica Sacra; sive de variis quæ in veteris Testamenti libris occurrunt lectionibus libri sex. Edita opere ac studio Joannis Cappelli, auctoris filii*, Parisiis, 1650. A learned Roman Catholic and priest of the Oratory, Richard Simon, who was born in 1658, and died in 1712, rightly perceived, from the dogmatical bile stirred up by Capelle, that biblical criticism was the most effective weapon to be employed against the Protestantism which had grown cold and stiff in dogmatics. He therefore devoted his critical knowledge of the Bible to the service of the Roman Catholic church, and endeavoured to inflict a death-blow upon Protestantism. The result, however, was the production of Simon's excellent work on biblical criticism, which became the basis on which the science of biblical introduction was raised. Simon was the first who correctly separated the criticism of the Old Testament from that of the New. His works on biblical introduction appeared under the following titles: *Histoire Critique du Vieux Testament*, Paris, 1678. This work was inaccurately reprinted at Amsterdam by Elzevir in 1679, and subsequently in many other bad piratical editions. Among these the most complete was that printed, together with several polemical treatises occasioned by this work, at Rotterdam, in 1685, 4to.;—*Histoire Critique du Texte du Nouveau Testament*, Rotterdam, 1689; *Histoire Critique des Versions du Nouveau Testament*, Rotterdam, 1690; *Histoire Critique des principaux Commentateurs du Nouveau Testament*, Rotterdam, 1693. By these excellent critical works Simon established a claim upon the gratitude of all real friends of truth; but he was thanked by none of the prevailing parties in the Christian church. The Protestants saw in Simon only an enemy of their church, not the thorough investigator and friend of truth. To the Roman Catholics, on the other hand, Simon's works appeared to be destructive, because they demonstrated their ecclesiastical decrees to be arbitrary and unhistorical. The *Histoire Critique du Vieux Testament* was suppressed by the Roman Catholics in Paris immediately after its publication, and in Protestant countries also it was forbidden to reprint it. The Roman Catholic bishop, Bossuet, lamented that Simon had undermined the dogma of tradition, and had changed the holy fathers into Protestants. Simon, as an honest investigator and friend of truth, remained undisturbed; but kept aloof from both Roman Catholics and Protestants, by both of which parties he was persecuted, and died in 1712, in a merely external connection with the Romish church.

The churches endeavoured, with apparent success, to destroy Simon and his writings, in a host of inimical and condemnatory publications, by which the knowledge of truth was not in the least promoted. However, the linguistic and truly scientific researches of Pocock; the Oriental school in the Netherlands; the unsurpassed work of Humphry Hody, *De Bibliorum Textibus Originalibus Versionibus, &c.*, Oxoniæ, 1705, folio; the excellent criticism of Mill, in his *Novum Testamentum Græcum cum Lectionibus Variantibus*, Oxoniæ, 1707, folio; which was soon followed by Wetstein's *Novum Testamentum Græcum editionis receptæ, cum Lectionibus Variantibus*, Amstelodami, 1751-2, folio, and by which even Johann Albert Bengel, who died in 1752, was convinced, in spite of his ecclesiastical orthodoxy (comp. Bengelii *Apparatus Criticus Novi Testamenti*, p. 634, sq.); the biblical works by Johann Heinrich Michaelis, especially his *Biblia Hebraica ex Manuscriptis et impressis Codicibus*, Halæ, 1720; and Benjamin Kennicott's *Vetus Testamentum Hebraicum cum variis Lectionibus*, Oxoniæ, 1776, and the revival of classical philology;—all this gradually led to results which coincided with Simon's criticism, and showed the enormous difference between historical truth and the arbitrary ecclesiastical opinions which were still prevalent in the works on biblical introduction by Pritius, Blackwall, Carpzov, Van Til, Moldenhauer, and others. Johann David Michaelis, who died in 1791, mildly endeavoured to reconcile the church with historical truth, but has been rewarded by the anathemas of the ecclesiastical party, who have pronounced him a heretic. By their ecclesiastical persecutors, Richard Simon was falsely described to be a disciple of the atheistical Spinoza, and Michaelis as a follower of both Simon and Spinoza. However, the mediating endeavours of Michaelis gradually prevailed. His Introduction to the New Testament appeared first as a work of moderate size, under the title of Johann David Michaelis *Einleitung in die Göttlichen Schriften des Neuen Bundes*, Göttingen, 1750, 8vo. It was soon translated into English. In the years 1765-6 Michaelis published a second and augmented edition of the German original, in two volumes. The fourth edition, which received great additions, and in which many alter-

ations were made, appeared in 1788, in two vols. 4to. This edition was translated and essentially augmented by Herbert Marsh, afterwards Bishop of Peterborough, and appeared under the title, *Introduction to the New Testament*, by John David Michaelis, translated from the fourth edition of the German, and considerably augmented, Cambridge, 1791-1801, 4 vols. 8vo. Michaelis commenced also an introduction to the Old Testament, but did not complete it. A portion of it was printed under the title, *Einleitung in die Göttlichen Schriften des Alten Bundes*, Theil i. Abschnitt 1, Hamburg, 1787.

A work by Ed. Harwood, entitled *A New Introduction to the Study and Knowledge of the New Testament*, London, 1767-71, was translated into German by Schulz, Halle, 1770-73, in three volumes. In this book there are so many heterogeneous materials, that it scarcely belongs to the science of introduction.

The study of New Testament introduction was in Germany especially promoted also by Johann Solomon Semler, who died at Halle in 1791. It was by Semler's influence that the critical works of Richard Simon were translated into German, and the works of Wetstein re-edited and circulated. The original works of Semler on biblical introduction are his *Apparatus ad liberalem Novi Testamenti Interpretationem*, Halæ, 1767, and his *Abhandlung von freier Untersuchung des Canons*. 4 vols., Halle, 1771-5.

Semler's school produced Johann Jacob Griesbach, who died at Jena in the year 1812. Griesbach's labours in correcting the text of the New Testament are of great value. K. A. Haenlein published a work called *Handbuch der Einleitung in die Schriften des Neuen Testamentes*, Erlangen, 1794-1802, in two volumes, in which he followed up the lectures of Griesbach. A second edition of this work appeared in the years 1801-9. This introduction contains excellent materials, but is wanting in decisive historical criticism.

Johann Gottfried Eichhorn, who died at Göttingen in 1827, was formed in the school of Michaelis at Göttingen, and was inspired by Herder's poetical views of the East in general, and of the literature of the ancient Hebrews in particular. Eichhorn commenced his Introduction when the times were inclined to give up the Bible altogether, as a production of priestcraft inapplicable to the present period. He endeavoured to bring the contents of the Bible into harmony with modern modes of thinking, to explain, and to recommend them. He endeavoured by means of hypotheses to furnish a clue to their origin, without sufficiently regarding strict historical criticism. Eichhorn's *Einleitung in das Alte Testament* was first published at Leipsic in 1780-83, in three volumes. The fifth edition was published at Göttingen, 1820-24, in five volumes. His *Einleitung in das Neue Testament* was published at Göttingen in 1804-27, in five volumes. The earlier volumes have been republished. The external treatment of the materials, the style, aim, and many separate portions of both works, are masterly and excellent; but with regard to linguistic and historical research, they are feeble and overwhelmed with hypotheses.

Leonhardt Bertholdt was a very diligent but uncritical compiler. He made a considerable step backward in the science of introduction, not only by remitting the Old and New Testament into one whole, but by even intermixing the separate writings with each other, in his work entitled *Historisch-kritische Einleitung in sämmtliche kanonische und Apocryphische Schriften des Alten und Neuen Testamentes*, Erlangen, 1812-19, in six volumes.

The *Isagoge Historico-critica in Libros Novi Fœderis Sacros*, Jenæ, 1830, of H. A. Schott, is more distinguished by diligence than by penetration. The *Lehrbuch der Historisch-kritischen Einleitung in die Bibel A. und N. T.* Berlin; *Theil* 1, *Die Allgemeine Einleitung und das Alte Testament enthaltend*, 1817 (fifth edition, 1840); *Theil* 2, *Das Neue Testament enthaltend*, 1826 (fourth edition, 1842), by W. M. Lebrecht de Wette, is distinguished by brevity, precision, critical penetration, and in some parts by completeness. This book contains an excellent survey of the various opinions prevalent in the sphere of biblical introduction, interspersed with original discussions. Almost every author on biblical criticism will find that De Wette has made use of his labours; but in the purely historical portions the book is feeble, and indicates that the author did not go to the first sources, but adopted the opinions of others; consequently the work has no internal harmony. An English translation of this work, with additions by the translator, Theodore Parker, has lately appeared in America, under the title of *A Critical and Historical Introduction to the Canonical Scriptures of the Old Testament*.

The word 'introduction' being of rather vague signification, there was also formerly no definite idea attached to the expression Biblical Introduction. In works on this subject (as in Horne's *Introduction*) might be found contents belonging to geography, antiquities, interpretation, natural history, and other branches of knowledge. Even the usual contents of biblical introductions were so unconnected, that Schleiermacher, in his *Kurze Darstellung des Theologischen Studiums*, justly called it *ein Mancherlei*; that is, a farrago or omnium-gatherum. Biblical introduction was usually described as consisting of the various branches of preparatory knowledge requisite for viewing and treating the Bible correctly. It was distinguished from biblical history and archæology by being less intimately connected with what is usually called history. It comprised treatises on the origin of the Bible, on the original languages, on the translations, and on the history of the sacred text; and was divided into general and special introduction.

The author of this article endeavoured to remove this vagueness by furnishing a firm definition of biblical introduction. In his work, *Einleitung in das Neue Testament*, von Dr. K. A. Credner, th. i. Halle, 1836, he defined biblical introduction to be the history of the Bible, and divided it into the following parts:

1. The history of the separate biblical books.
2. The history of the collection of these books, or of the canon.
3. The history of the spread of these books, or of the translations of it.
4. The history of the preservation of the text.
5. The history of the interpretation of it.

This view of the science of introduction has

received much approbation, and is the basis of Reus's *Geschichte der Heiligen Schriften des Neuen Testamentes*, Halle, 1842. The results of the critical examination of the books of the New Testament are comprehended in the following work, *Das Neue Testament nach seinem Zweck, Ursprunge und Inhalt*, von A. R. Credner, Giessen, 1841-3, in two volumes.

The critical investigation which prevailed in Germany after the days of Michaelis, has of late been opposed by a mode of treating biblical introduction, not so much in the spirit of a free search after truth as in an apologetical and polemical style. This course, however, has not enriched biblical science. To this class of books belong a number of monographs, or treatises on separate subjects; also the *Handbuch der Historisch-kritischen Einleitung in das Alte Testament*, Erlangen, 1836, by H. A. C. Hävernick, of which there have been published two parts, in three volumes, and of which an English translation is in preparation; and also H. E. Ferd. Guericke's *Einleitung in das Neue Testament*, Halle, 1843, in which too frequently an anathema against heretics serves as a substitute for demonstration. The apologetical tendency prevails in the work of G. Hamilton, entitled *A General Introduction to the Study of the Hebrew Scriptures, &c.*, Dublin, 1814; in Thomas Hartwell Horne's *Introduction to the Critical Study and Knowledge of the Holy Scriptures, &c.*, London, 1818, four volumes (the eighth edition, 1839, five volumes); and in J. Cook's *Inquiry into the Books of the New Testament*, Edinburgh, 1824.

The Roman Catholics also have, in modern times, written on biblical introduction, although the unchangeable decrees of the Council of Trent hinder all free, critical, and scientific treatment of the subject. The Roman Catholics can treat biblical introduction only in a polemical and apologetical manner, and are obliged to keep up the attention of their readers by introducing learned archæological researches, which conceal the want of free movement. This latter mode was adopted by J. Jahn (who died at Vienna in 1816) in his *Einleitung in die Göttlichen Bücher des alten Bundes*, Vienna, 1793, two volumes, and 1802, three volumes; and in his *Introductio in Libros Sacros Veteris Testamenti in epitomen redacta*, Viennæ, 1805. This work has been republished by F. Ackermann, in what are asserted to be the third and fourth editions, under the title of *Introductio in Libros Sacros Veteris Testamenti, usibus academicis accommodata*, Viennæ, 1825, and 1839. But these so-called new editions are full of alterations and mutilations, which remove every free expression of Jahn, who belonged to the liberal period of the Emperor Joseph.

Johann Leonhard Hug's *Einleitung in das Neue Testament*, Stuttgart and Tübingen, 1808, two volumes, third edition, 1826, surpasses Jahn's work in ability, and has obtained much credit among Protestants by its learned explanations, although these frequently swerve from the point in question. Hug's work has been translated into English by the Rev. D. G. Wait, LL.D.; but this translation is much surpassed by that of Fosdick, published in the United States, and enriched by the addenda of Moses Stuart. The polemical and apologetical style prevails in the work of J. G. Herbst, *Historisch-kritische Einleitung in die Schriften des Alten Testamentes*, completed and edited after the death of the author, by Welte, Carlsruhe, 1840; and in *L'Introduction Historique et Critique aux Livres de l'Ancien et du Nouveau Testament*, par J. B. Glaire, Paris, 1839, four volumes. The work of the excellent Feilmoser, who died in 1831, *Einleitung in die Bücher des Neuen Bundes*, in the second edition, Tübingen, 1830, forsakes the position of a true Roman Catholic, inasmuch as it is distinguished by a noble ingenuousness and candour. All these last-mentioned works prove that the science of introduction cannot prosper in ecclesiastical fetters.—K. A. C.

[It seems desirable to add to this article a short view of the works on Biblical Introduction which have appeared in England. These are mostly of small importance in comparison with the great works on the subject which have been produced on the Continent; and hence few of them have engaged the notice of the Contributor to whom we are indebted for the preceding article.

Collier's *Sacred Interpreter*, 2 vols. 8vo. 1746, was one of our earliest publications of this kind. It went through several editions, and was translated into German in 1750. It relates both to the Old and New Testament, and is described by Bishop Marsh as 'a good popular preparation for the study of the Holy Scriptures.'

Lardner's *History of the Apostles and Evangelists*, 3 vols. 8vo. 1756-7, is described by the same critic as an admirable introduction to the New Testament. 'It is a storehouse of literary information, collected with equal industry and fidelity.' From this work, from the English translation of Michaelis's *Introduction*, 1761, and from Dr. Owen's *Observations on the Gospels*, 1764, Dr. Percy, Bishop of Dromore, compiled a useful manual, called *A Key to the New Testament*, which has gone through many editions, and is much in request among the candidates for ordination in the Established Church.

The *Key to the Old Testament*, 1790, by Dr. Gray, afterwards Bishop of Bristol, was written in imitation of Percy's compilation; but it is a much more elaborate performance than the *Key to the New Testament*. It is a compilation from a great variety of works, references to which are given at the foot of each page. Bishop Marsh speaks of it as 'a very useful publication for students of divinity, who will find at one view what must otherwise be collected from many writers.' It is still popular, the *tenth* edition having been published in 1841. But a professed compilation, which contains in its latest edition no reference to any work published for above half a century past, must necessarily be far behind the present state of our information on the subjects of which it treats.

Dr. Harwood's *Introduction to the Study and Knowledge of the New Testament*, 2 vols. 8vo. 1767, 1771, although noticed by our contributor, is not properly an introduction to the New Testament, in the usual and proper sense of the term. It does not describe the books of the New Testament, but is a collection of dissertations relative partly to the character of the sacred writers, Jewish history and customs, and to such parts of heathen antiquities as have reference to the New Testament.

The first volume of Bishop Tomline's *Elements*

of Christian Theology contains an introduction both to the Old and to the New Testament, and has been published in a separate form. It is suited to its purpose as a manual for students in divinity; but the standard of present attainment cannot be very high if, as Marsh states, 'it may be read with advantage by the most experienced divine.'

The works of Dr. Cook, the Rev. G. Hamilton, and the Rev. T. H. Horne, are mentioned in the above article; but the slight notice of Horne's *Introduction* which it contains will scarcely satisfy those who are aware that it is the largest and most important work of the kind which we possess. We cheerfully subscribe to the opinion of Bishop Marsh, that it is 'upon the whole a very useful publication, and does great credit to the industry and researches of the indefatigable author.' We may add, that it has worthily occupied for above a quarter of a century a high and influential place in our theological literature; during which it has satisfied the current demand for the kind of information which it offers, and has done much to form a class of students who now take their stand upon it, and look with desire to the fields beyond, where lie the vast treasures in every department of biblical literature which the wonderful activity of continental research has of late years accumulated. Had the able and pious author more largely availed himself of these important sources of information, the value of his work to a large and rapidly-increasing class of students would have been very much enhanced. A very useful abridgment of this *Introduction*, in 1 vol. 12mo., appeared in 1829 under the title of *A Compendious Introduction to the Study of the Bible*. Another manual, under the title of *A Scripture Help*, 1806, by the Rev. E. Bickersteth, has been received with eminent favour; and we have seen the first volume of an admirable work for junior students published in the United States in 1835 under the title of *Introduction to the Criticism and Interpretation of the Bible*, by C. E. Stowe. We know not whether the second volume has yet appeared].

IOTA (Auth. Vers. '*Jot*'), the smallest letter of the Greek alphabet (ι); derived from the Hebrew *jod* (י) and the Syriac *judh* (ܝ), and employed metaphorically to express the minutest trifle. It is, in fact, one of several metaphors derived from the alphabet—as when *alpha*, the first letter, and *omega*, the last, are employed to express the beginning and the end. We are not to suppose, however, that this proverb was exclusively apposite in the Greek language. The same practical allusion equally existed in Hebrew, some curious examples of which may be seen in Wetstein and Lightfoot. One of these may here suffice:—In the Talmud (*Sanhed.* xx. 2) it is fabled that the book of Deuteronomy came and prostrated itself before God, and said, 'O Lord of the universe, thou hast written in me thy law, but now a testament defective in some parts is defective in all. Behold, Solomon endeavours to root the letter jod out of me' (*i. e.* in the text, לֹא יִרְבֶּה נָשִׁים, 'he shall not multiply wives' (Deut. xvi. 17). 'The holy, blessed God answered—Solomon, and a thousand such as he, shall perish, but the least word shall not perish out of thee.' This is, in fact, a parallel not only to the usage but the sentiment, as conveyed in Matt. v. 18, 'One jot, or one tittle, shall in no wise pass from the law.'

IRON. This word, wherever it occurs in the English Version, answers to בַּרְזֶל, or to its Chaldaic; to σίδηρος in the Sept.; and to *ferrum* in the Vulg., except where it gives an explanatory translation, as 'falcatos currus' (Judg. iv. 3), though it sometimes gives the literal translation of the same term, as 'ferreos currus' (Josh. xvii. 18). The use of the Greek and Latin words, in classical authors of every age, fixes their meaning. That σίδηρος means iron, in Homer, is plain from his simile derived from the quenching of iron in water, which he applies to the hissing noise produced in piercing the eye of Polyphemus with the pointed stake (*Odys.* ix. 391). Much stress has been laid upon the absence of iron among the most ancient remains of Egypt; but the speedy decomposition of this metal, especially when buried in the nitrous soil of Egypt, may account for the absence of it among the remains of the early monarchs of a Pharaonic age (Wilkinson's *Ancient Egypt.*, iii. 246). Tubal-Cain is the *first-mentioned* smith, 'a forger of every instrument of iron' (Gen. iv. 22). From that time we meet with manufactures in iron of the utmost variety (*some* articles of which seem to be anticipations of what are commonly supposed to be modern inventions); as iron weapons or instruments (Num. xxxv. 7; Job xx. 24); barbed irons, used in hunting (Job xli. 7); *an iron bedstead* (Deut. iii. 11); chariots of iron (Josh. xvii. 16, and elsewhere); iron weights (shekels) (1 Sam. xvii. 7); harrows of iron (2 Sam. xii. 31); iron armour (2 Sam. xxiii. 7); tools (1 Kings vi. 7; 2 Kings vi. 5); horns (1 Kings xxii. 11); nails, hinges (1 Chron. xxii. 3); fetters (Ps. cv. 18); bars (Ps. cvii. 16); iron bars used in fortifying the gates of towns (Ps. cvii. 16; Isa. xlv. 2); a *pen of iron* (Job xix. 24; Isa. xvii. 1); a pillar (Jer. i. 18); yokes (Jer. xxviii. 13); pan (Ezek. iv. 3); trees bound with iron (Dan. iv. 15); gods of iron (Dan. v. 4); threshing-instruments (Amos i. 3); and in later times, an iron gate (Acts xii. 10); the actual cautery (1 Tim. iv. 2); breastplates (Rev. ix. 9).

The mineral origin of iron seems clearly alluded to in Job xxviii. 2. It would seem that in ancient times it was a plentiful production of Palestine (Deut. viii. 9). There appear to have been furnaces for smelting at an early period in Egypt (Deut. iv. 20). The requirement that the altar should be made of 'whole stones over which no man had lift up any iron,' recorded in Josh. viii. 31, does not imply any objection to iron as such, but seems to be merely a mode of directing that, in order to prevent idolatry, the stones must not undergo any preparation by art. Iron was prepared in abundance by David for the building of the temple (1 Chron. xxii. 3), to the amount of one hundred thousand talents (1 Chron. xxix. 7), or rather 'without weight' (1 Chron. xxii. 14). Working in iron was considered a calling (2 Chron. ii. 7) [Smith]. Iron seems to have been better from some countries, or to have undergone some hardening preparation by the inhabitants of them, such as were the people called

Chalybes, living near the Euxine Sea (Jer. xv. 12); to have been imported from Tarshish to Tyre (Ezek. xxvii. 12), and 'bright iron' from Dan and Javan (ver. 19). The superior hardness of iron above all other substances is alluded to in Dan. ii. 40. It was found among the Midianites (Num. xxxi. 22), and was part of the wealth distributed among the tribes at their location in the land (Josh. xxii. 8).

Iron is *metaphorically* alluded to in the following instances:—affliction is signified by the furnace for smelting it (Deut. iv. 20); under the same figure, chastisement (Ezek. xxii. 18, 20, 22); reducing the earth to total barrenness by turning it into iron (Deut. xxviii. 23); slavery, by a yoke of iron (Deut. xxviii. 48); strength, by a bar of it (Job xl. 18); the extreme of hardness (Job xli. 27); severity of government, by a rod of iron (Ps. ii. 9); affliction, by iron fetters (Ps. cvii. 10); prosperity, by giving silver for iron (Isa. lx. 17); political strength (Dan. ii. 33); obstinacy, by an iron sinew in the neck (Isa. xlviii. 4); giving supernatural fortitude to a prophet, making him an iron pillar (Jer. i. 18); destructive power of empires, by iron teeth (Dan. vii. 7); deterioration of character, by becoming iron (Jer. vi. 28; Ezek. xxii. 18), which resembles the idea of the iron age; a tiresome burden, by a mass of iron (Ecclus. xxii. 15); the greatest obstacles, by walls of iron (2 Macc. xi. 9); the certainty with which a real enemy will ever show his hatred, by the rust returning upon iron (Ecclus. xii. 10). Iron seems used, as by the Greek poets, metonymically for the sword (Isa. x. 34), and so the Sept. understands it, *μάχαιρα*. The following is selected as a *beautiful comparison* made to iron (Prov. xxvii. 17), 'Iron (literally) uniteth iron; so a man uniteth the countenance of his friend,' gives stability to his appearance by his presence. A most graphic *description of a smith at work* is found in Ecclus. xxxviii. 28.—J. F. D.

ISAAC (יִצְחָק; Sept. Ισαάκ), son of Abraham and Sarah, born in his parents' old age. The promise of a son had been made to them when Abraham was visited by the Lord in the plains of Mamre, and appeared so unlikely to be fulfilled, seeing that both Abraham and Sarah were 'well-stricken in years,' that its utterance caused the latter to laugh incredulously. Being reproved for her unbelief, she denied that she had laughed. The reason assigned for the special visitation thus promised was, in effect, that Abraham was pious, and would train his offspring in piety, so that he would become the founder of a great nation, and all the nations of the earth should be blessed in him.

In due time Sarah gave birth to a son, who received the name of Isaac. The reason assigned in Gen. xxi. 6 for the adoption of this name, has reference to the laughter occasioned by the announcement of the divine intention—'and Sarah said, God hath made me to laugh, all that hear will laugh with me'—the laugh of incredulity being changed into the laugh of joy (comp. Gen. xxi. 6; xviii. 12; xvii. 17). In the last passage Abraham is said to have laughed also when informed of God himself that he and Sarah should have a son, though he was a hundred and his wife ninety years old.

Some writers have seen a discrepancy in the passages before referred to, and have hence conjectured that we have here to do, not with history, but historical legends (Winer, *Handwörterb.*). We are unable to find anything of a nature to excite suspicion or abate confidence, there being scarcely any variations, and certainly none but such as might easily arise on a purely historical ground.

The first fact that we read of in the history of Isaac, is the command given to his father to offer the youth—'thy son, thine only son Isaac, whom thou lovest'—for a burnt-offering on a mountain in the land of Moriah. Abraham proceeded to obey the divine direction, and was on the point of slaying Isaac, when his hand was withheld by the interposition of God, a ram for sacrifice being provided instead.

This event has found no few detractors. Eichhorn (*Bibl. f. Bibl. Lit.* i. 45, sq.) regarded the whole as a vision; Otmar (Henkes's *Mag.* ii. 517), as the explanation of an hieroglyph; Bruns (*Paulus Memorab.* vi. 1, sq.) finds the source of it in the Phœnician custom of sacrificing children. Some compare (Rosenmüller, *Morgenl.* i. 95) with this narrative the Grecian story of Iphigenia, and other fables of a similar kind. The general aim of certain writers has been, as they consider it, to relieve the Bible from the odium which the narrated circumstances are in their opinion fitted to occasion. That the passage is free from every possible objection, it may be too much to assert: it is, however, equally clear that many of the objections taken to it arise from viewing the facts from a wrong position, or under the discolouring medium of a foregone and adverse conclusion. The only proper way is to consider it as it is represented in the sacred page. The command, then, was expressly designed to try Abraham's faith. Destined as the patriarch was to be the father of the faithful, was he worthy of his high and dignified position? If his own obedience was weak, he could not train others in faith, trust, and love: hence a trial was necessary. That he was not without holy dispositions was already known, and indeed recognised in the divine favours of which he had been the object; but was he prepared to do and to suffer all God's will? Religious perfection and his position alike demanded a perfect heart: hence the kind of trial. If he were willing to surrender even his only child, and act himself both as offerer and priest in the sacrifice of the required victim, if he could so far conquer his natural affections, so subdue the father in his heart, then there could be no doubt that his will was wholly reconciled to God's, and that he was worthy of every trust, confidence, and honour. The trial was made, the fact was ascertained, the victim was not slain. What is there in this to which either religion or morality can take exception? This view is both confirmed and justified by the words of God (Gen. xxii. 16, sq.), '*because* thou hast not withheld thy only son, in blessing I will bless thee, and in multiplying I will multiply thy seed as the stars of the heaven, and in thy seed shall all the nations of the earth be blessed.'

We remark also that, not a part, but the entire, of the transaction must be taken under consideration, and especially the final result. If we dwell exclusively on the commencement of it, there appears to be some sanction given to human sacrifices; but the end, and the concluding and

ever-enduring fact, has the directly opposite bearing. Viewed as a whole, the transaction is in truth an express prohibition of human sacrifices.

Isaac passed his youthful days under the eye of his father, engaged in the care of flocks and herds up and down the plains of Canaan. At length his father wished to see him married. Abraham therefore gave a commission to his oldest and most trustworthy servant to the effect that, in order to prevent Isaac from taking a wife from among the daughters of the Canaanites, he should proceed into Mesopotamia, and, under the divine direction, choose a partner among his own relatives for his beloved son. Rebekah, in consequence, becomes Isaac's wife, when he was now forty years of age.

In connection with this marriage an event is recorded which displays the peculiar character of Isaac, while it is in keeping with the general tenor of the sacred record regarding him. Probably in expectation of the early return of his father's messenger, and somewhat solicitous as to the result of the embassy, he went out to meditate in the field at the eventide. While there engaged in tranquil thought, he chanced to raise his eyes, when lo! he beheld the retinue near at hand, and soon conducted his bride into his mother's tent. In unison with all this is the simple declaration of the history, that Isaac 'loved her.' Isaac was evidently a man of kind and gentle dispositions, of a calm and reflective turn of mind, simple in his habits, having few wants, good rather than great, fitted to receive impressions and follow a guide, not to originate important influences, or perform deeds of renown. If his character did not take a bent from the events connected with his father's readiness to offer him on Mount Moriah, certainly its passiveness is in entire agreement with the whole tenor of his conduct, as set forth in that narrative.

Isaac having, in conjunction with his half-brother Ishmael, buried Abraham his father, 'in a good old age, in the cave of Machpelah,' took up a somewhat permanent residence 'by the well Lahai-roi,' where, being blessed of God, he lived in prosperity and at ease. One source of regret, however, he deeply felt. Rebekah was barren. In time, two sons, Jacob and Esau, are granted to his prayers. As the boys grew, Isaac gave a preference to Esau, who seems to have possessed those robuster qualities of character in which his father was defective, and therefore gratified him by such dainties as the pursuits of the chace enabled the youth to offer; while Jacob, 'a plain man dwelling in tents,' was an object of special regard to Rebekah—a division of feeling and a kind of partiality which became the source of much domestic unhappiness, as well as of jealousy and hatred between the two sons.

A famine compels Isaac to seek food in some foreign land. Divinely warned not to go down to Egypt, the patriarch applies to a petty prince of Philistia, by name Abimelech, who permits him to dwell at Gerar. Here an event took place which has a parallel in the life of his father Abraham. Rebekah was his consin: afraid lest she should be violently taken from him, and his own life sacrificed to the lust of Abimelech, he represented her as his sister, employing a latitude of meaning which the word 'sister' admits in Oriental usage. The subterfuge was discovered, and is justified by Isaac on the grounds which prompted him to resort to it.

Another parallel event in the lives of Abraham and Isaac may be found by comparing together Gen. xxvi. 26, sq., and xxi. 22, sq. If these parallels should excite a doubt in the mind of any one as to the credibility of the narratives, let him carefully peruse them, and we think that the simplicity and naturalness which pervade and characterize them will effectually substantiate the reality of the recorded events, and explode the notion that fiction has had anything to do in bringing the narrative into its present shape.

Isaac, in his old age, was, by the practices of Rebekah and the art of Jacob, so imposed upon as to give his blessing to the younger son Jacob, instead of to the first-born Esau, and with that blessing to convey, as was usual, the right of headship in the family, together with his chief possessions. In the blessing which the aged patriarch pronounced on Jacob it deserves notice how entirely the wished-for good is of an earthly and temporal nature, while the imagery which is employed serves to show the extent to which the poetical element prevailed as a constituent part of the Hebrew character (Gen. xxvii. 27, sq.). Most natural, too, is the extreme agitation of the poor blind old man, on discovering the cheat which had been put upon him:—'And Isaac trembled very exceedingly, and said (to Esau), Who? where is he that hath taken venison and brought it me, and I have eaten, and have blessed him? Yea, and he shall be blessed.' Equally natural is the reply of Esau. The entire passage is of itself enough to vindicate the historical character and entire credibility of those sketches of the lives of the patriarchs which Genesis presents.

The stealing, on the part of Jacob, of his father's blessing having angered Esau, who seems to have looked forward to Isaac's death as affording an opportunity for taking vengeance on his unjust brother, the aged patriarch is induced, at his wife's entreaty, to send Jacob into Mesopotamia, that, after his own example, his son might take a wife from amongst his kindred and people, 'of the daughters of Laban, thy mother's brother.'

This is the last important act recorded of Isaac. Jacob having, agreeably to his father's command, married into Laban's family, returned, after some time, and found the old man at Mamre, in the city of Arbah, which is Hebron, where Abraham and Isaac sojourned. Here, 'being old and full of days' (180), Isaac 'gave up the ghost, and died, and was gathered unto his people, and his sons Esau and Jacob buried him' (Gen. xxxv. 27, sq.). On the subjects treated of in this article the following works may be consulted:—H. A. Zeibich, *Isaaci ortus in fab. Orionis Vestigia;* De Wette, *Krit. d. Is. Gesch.* p. 133, sq.; Niemeyer, *Charakteristik der Bibel*, 2nd part; Ewald's *Israeliten*, p. 338, sq.—J. R. B.

ISAIAH (יְשַׁעְיָה; Sept. Ἡσαΐας). I. *Times and circumstances of the Prophet Isaiah.*—The heading of this book places the prophet under the reigns of Uzziah, Jotham, Ahaz, and Hezekiah, kings of Judah; and an examination of the prophecies themselves, independently of the heading, leads us to the same chronological results. Chapter vi., in which is related the call of Isaiah, not to his prophetic office, but to a higher

degree of it, is thus headed : 'In the year in which king Uzziah died I saw the Lord,' &c. The collection of prophecies is chronologically arranged, and the utterances in the preceding chapters (i. to vi.) belong, for chronological and other reasons, to an earlier period, preceding the last year of the reign of Uzziah, although the utterances in chapters ii. iii. iv. and v. have been erroneously assigned to the reign of Jotham. We have no document which can, with any degree of certainty, or even of probability, be assigned to that reign. We by no means assert that the prophetic ministry of Isaiah was suspended during the reign of Jotham, but merely that then apparently the circumstances of the times did not require Isaiah to utter predictions of importance for all ages of the church. We certainly learn from the examples of Nathan, Elijah, and Elisha, that a powerful prophetic ministration may be in operation, although the predictions uttered, finding their accomplishment within the times of the prophet, do not point to subsequent ages. As, however, the position of affairs was not materially changed under the reign of Jotham, we may say that the first two utterances have a bearing upon that reign also. These two prophecies contain the sum and substance of what Isaiah taught during twenty years of his life. If these prophetic utterances belonging to the reign of Uzziah had not been extant, there would, doubtless, have been written down and preserved similar discourses uttered under the reign of Jotham. As, however, the former utterances were applicable to that reign also, it was unnecessary to preserve such as were of similar import.

The continuation of prophetic authorship, or the writing down of uttered prophecies, depended upon the commencement of new historical developments, such as took place under the reigns of Ahaz and Hezekiah. Several prophecies in the seventh and following chapters belong to the reign of Ahaz; and most of the subsequent prophecies to the reign of Hezekiah. The prophetic ministry of Isaiah under Hezekiah is also described in an historical section contained in chapters xxxvi.-xxxix. The data which are contained in this section come down to the fifteenth year of the reign of Hezekiah; consequently we are in the possession of historical documents proving that the prophetic ministry of Isaiah was in operation during about forty-seven or fifty years, commencing in the year B.C. 763 or 759, and extending to the year B.C. 713. Of this period, from one to four years belong to the reign of Uzziah, sixteen to the reign of Jotham, sixteen to the reign of Ahaz, and fourteen to the reign of Hezekiah.

Stäudlein, Jahn, Bertholdt, and Gesenius, have, in modern times, advanced the opinion that Isaiah lived to a much later period, and that his life extended to the reign of Manasseh, the successor of Hezekiah. For this opinion, the following reasons are adduced :—

1. According to 2 Chron. xxxii. 32, Isaiah wrote the life of King Hezekiah. It would hence appear that he survived that king.

2. We find a tradition current in the Talmud, in the Fathers, and in Oriental literature, that Isaiah suffered martyrdom in the reign of Manasseh, by being sawn asunder. It is thought that an allusion to this tradition is found in the Epistle to the Hebrews (xi. 37), in the expression *they were sawn asunder* (ἐπρίσθησαν), which seems to harmonize with 2 Kings xxi. 16, 'moreover Manasseh shed innocent blood very much.'

3. The authenticity of the second portion of the prophecies of Isaiah being admitted, the nature of this portion would seem to confirm the idea that its author had lived under Manasseh. The style of the second portion, it is asserted, is so different from that of the first, that both could not well have been composed by the same author, except under the supposition that a considerable time intervened between the composition of the first and second portion. The contents of the latter—such as the complaints respecting gross idolatry, the sacrifice of children to idols, the wickedness of rulers, &c.—seem to be applicable neither to the times of the exile, into which the prophet might have transported himself in the spirit, nor to the period of the pious Hezekiah, but are quite applicable to the reign of Manasseh.

These arguments, however, do not stand a strict scrutiny. The first can only prove that Isaiah survived Hezekiah; but even this does not follow with certainty, because in 2 Chron. xxxii. 32, where Isaiah's biography of Hezekiah is mentioned, the important words 'first and last' are omitted; while in chap. xxvi. 22, we read, 'Now the rest of the acts of Uzziah, FIRST AND LAST, did Isaiah, the son of Amoz, write.' If we take into consideration this important omission, we can easily believe that Isaiah died before Hezekiah, although he wrote his biography up to a certain point; more especially if we bear in mind that, according to the books of Kings and Chronicles, the latter years of the reign of Hezekiah were devoid of important events. We certainly find, in all ages of literature, biographies of persons written during their life-time.

We may well suppose that the history of Hezekiah terminated with the glorious aid granted to him in his war with the Assyrians, and with the events immediately consequent upon that war.

In reply to the second argument, we observe, that it is not certain that the word ἐπρίσθησαν, *they were sawn asunder*, is used in Hebrews with reference to Isaiah. The statement in the Fathers, and in Oriental writers, is entirely deduced from the Jewish tradition, which is throughout of so doubtful a character that no conclusive argument can be based upon it.

With regard to the third argument, we remark, that the difference discernible, if we compare the latter with the former portions of Isaiah, can, and ought to be, differently accounted for. Such merely external attempts at explanation, when applied to Holy Writ, always appear unsatisfactory if closely examined. We invariably find that the real cause of the external appearance lies deeper, and in the nature of the subject itself. For instance, the peculiarity of Deuteronomy arises from the special bearing of that book upon the other books of the Pentateuch, and the peculiar style of the Apocalypse arises from its relation to the gospel of St. John. The appeal to such merely external arguments always proceeds from an inability to understand the essence of the matter. In reference to the censures occurring in the later portion of Isaiah, we observe, that they might also have a bearing upon the corruptions prevalent in former reigns, and that they were

not necessarily confined to manifestations of wickedness occurring at the time when they were written down. These censures might also refer to the gross perversions under Ahaz; and it is also unlikely that the personal piety of Hezekiah entirely extinguished all abuses among his people. We certainly do not find that the personal piety of King Josiah had that effect upon all his subjects.

Several other arguments adduced against the opinion that Isaiah died during the reign of Manasseh, are certainly of little weight. For instance, the *argumentum e silentio*, or the proof derived from the silence of the historical books respecting Isaiah during the reign of Manasseh. This argument is of no importance at all, since, at any rate, the death of Isaiah is nowhere mentioned in the Bible; from which circumstance we infer, that, on account of his advanced age, he had retired from active life.

Of somewhat more weight is the objection that, according to the supposition that Isaiah died under Manasseh, too great an age would be ascribed to the prophet. Although we were to suppose that Isaiah, as well as Jeremiah, was called to the prophetic office at an early age—perhaps in his twentieth year—he, nevertheless, in the fifteenth year of Hezekiah, up to which date we can prove his ministrations by existing documents, would have reached quite or nearly to his seventieth year, which is the usual duration of human life; consequently, at the time of the accession of Manasseh he would have been about eighty-four years old; and if, with the defenders of the tradition, we allow that he exercised the prophetic functions for about seven or eight years during the reign of Manasseh, he must at the period of his martyrdom have attained to the age of ninety-two. This, indeed, is quite possible. The example of the prophet Hosea, who exercised his prophetic calling during sixty years, and that of the priest Jehoiada, who, according to 2 Chron. xxiv. 15, was a hundred and thirty years old when he died, prove the possibility of the age ascribed to Isaiah.

The chief argument against the tradition, however, is contained in the inscription of the book itself. According to this inscription all the prophecies of Isaiah in our collection are included within the period from Uzziah to Hezekiah. Not one of the prophecies which are headed by an inscription of their own is placed after the fifteenth year of Hezekiah; and the internal evidence leads us in none beyond this period. Hence we infer that the prophetic ministry of Isaiah terminated soon after its fullest development, to which it attained during the period of the Assyrian invasion, in the reign of Hezekiah.

According to these statements Isaiah belongs to the cycle of the most ancient prophets whose predictions have been preserved in writing. He was a contemporary of Hosea, Amos, and Jonah, although younger than those prophets, who belonged to the kingdom of Israel. He was likewise a contemporary and co-worker of the prophet Micah in the kingdom of Judah. We infer also from the circumstance that the prophecies of Joel are inserted among the books of the minor prophets before those of Micah, that Isaiah must have been a contemporary of Joel, since the minor prophets are chronologically arranged.

Micah entered upon his prophetic office under the reign of Jotham, consequently somewhat later than Isaiah commenced his prophetic career. Obadiah, who is placed among the minor prophets, between Joel and Micah, was likewise a contemporary of Isaiah. It is not accidental that Isaiah and all these prophets commence the series of those whose prophetic utterances were written down and preserved. Nor is there any reason to assert that the preceding age was neglectful of the preservation of prophetic literature, although even Ewald, in his *Propheten* (i. p. 54, Stuttgard, 1840), asserts that beyond the prophetic literature which we possess there lay an earlier, which was more comprehensive. There is, however, no one genuine proof sufficient to evince that there were written prophecies before Isaiah and his contemporaries. Hosea refers (viii. 12), not to earlier prophetic writings, but to the books of Moses. This has been proved by Hengstensberg (*Beiträge*, part ii. p. 604, sq.). Isaiah ii. and Micah iv. do not rest upon an earlier prophetic production which was lost; but Isaiah rests upon Micah as Jeremiah does upon Obadiah; and it is not the case that both prophets rest upon a third unknown prophet. At the period when these prophets commenced their career, prophetism itself had attained a new epoch, at which a great number of important prophets were ranged beside each other. The affairs of the Israelites became at this period more interwoven with those of the great Asiatic empires, which then began to bring about the threatened judgments of the Lord upon his people. Henceforward, also, the prophetic office was to be conducted on a grander scale. To the prophets it was now assigned to declare and to interpret the judgments of the Lord, in order to render the people conscious as well of his chastising justice as of his preserving mercy. A larger field was now opened to the strictly prophetic office, which consisted in uttering predictions of the future. The admonitions to repentance were now also supported by more powerful motives. The hopes of a coming Messiah were revived. To the worldly power, which threatens destruction to the external theocracy, is henceforth opposed the kingdom of God, destined to conquer and to govern the world through the Messiah. This consolation was offered to those who would otherwise have been driven to despair. Now only was prophetism able to develop its full power and become important for all subsequent ages. This persuasion induced the prophets to write their prophecies, and it caused these documents also to be carefully preserved. The reason why the earlier prophets did not commit their utterances to writing is the same that, with two exceptions, led Isaiah not to write under Uzziah, and to omit writing his utterances under Jotham altogether.

Little is known respecting the circumstances of Isaiah's life. His father's name was Amoz. The fathers of the church confound him with the prophet Amos, because they were unacquainted with Hebrew, and in Greek the two names are spelled alike. The opinion of the Rabbins, that Isaiah was a brother of King Amaziah, rests also on a mere etymological combination. Isaiah resided at Jerusalem, not far from the temple. We learn from chapters vii. and viii. that he was married. Two of his sons are mentioned,

Shear-jashub and Maher-shalal-hash-baz. These significant names, which he gave to his sons, prove how much Isaiah lived in his vocation. He did not consider his children to belong merely to himself, but rendered them living admonitions to the people. In their names were contained the two chief points of his prophetic utterances: one recalled to mind the severe and inevitable judgment wherewith the Lord was about to visit the world, and especially his people; the other, which signifies 'The remnant shall return,' pointed out the mercy with which the Lord would receive the elect, and with which, in the midst of apparent destruction, he would take care to preserve his people and his kingdom. Isaiah calls his wife נביאה, *prophetess*. This indicates that his marriage-life was not in opposition to his vocation, and also that it not only went along with his vocation, but that it was intimately interwoven with it. This name cannot mean the wife of a prophet, but indicates that the prophetess of Isaiah had a prophetic gift, like Miriam, Deborah, and Huldah. The appellation here given denotes the genuineness of their conjugal relation.

Even the dress of the prophet was subservient to his vocation. According to chap. xx. 2, he wore a garment of hair-cloth or sackcloth. This seems also to have been the costume of Elijah, according to 2 Kings i. 8; and it was the dress of John the Baptist. Hairy sackcloth is in the Bible the symbol of repentance (compare Isa. xx. 11, 12, and 1 Kings xxi. 27). This costume of the prophets was a *sermo propheticus realis*, a prophetic preaching by fact. The prophetic preacher comes forward in the form of personified repentance. What he does exhibits to the people what they should do. Before he has opened his lips his external appearance proclaims μετανοεῖτε, *repent*.

II. *On the Historical works of Isaiah.*—Besides the collection of prophecies which has been preserved to us, Isaiah also wrote two historical works. It was part of the vocation of the prophets to write the history of the kingdom of God, to exhibit in this history the workings of the law of retribution, and to exhort to the true worship of the Lord. History, as written by the prophets, is itself retroverted prophecy, and, as such, offers rich materials for prophecy strictly so-called. Since all the acts of God proceed from his essence, a complete understanding of the past implies also the future; and, *vice versâ*, a complete understanding of the future implies a knowledge of the past. Most of the historical books in the Old Testament have been written by prophets. The collectors of the Canon placed most of these books under the head נביאים, *prophets*; hence, it appears that, even when these historical works were re-modelled by later editors, these editors were themselves prophets. The Chronicles are not placed among the נביאים: we may, therefore, conclude that they were not written by a prophet. But their author constantly indicates that he composed his work from abstracts taken verbatim from historical monographies written by the prophets; consequently the books of Ruth, Ezra, Nehemiah, and Esther, are the only historical books of the Old Testament which did not originate from prophets.

The first historical work of Isaiah was a biography of King Uzziah (comp. 2 Chron. xxvi. 22), 'Now the rest of the acts of Uzziah, first and last, did Isaiah the prophet, the son of Amoz, write.' The second historical work of Isaiah was a biography of King Hezekiah, which was subsequently inserted in the annals of Judah and Israel. These annals consisted of a series of prophetic monographies, which were received partly entire, partly in abstracts, and are the chief source from which the information contained in the Chronicles is derived. In this work of Isaiah, although its contents were chiefly historical, numerous prophecies were inserted. Hence it is called in 2 Chron. xxxii. 32, חזון ישעיהו, *The Vision of Isaiah*. In a similar manner the biography of Solomon by Ahijah, is called in 2 Chron. ix. 29, 'the prophecy of Ahijah.' The two historical works of Isaiah were lost, together with the annals of Judah and Israel, into which they were embodied. Whatever these annals contained that was of importance for all ages, has been preserved to us by being received into the historical books of the Old Testament, and the predictions of the most distinguished prophets have been formed into separate collections. After this was effected, less care was taken to preserve the more diffuse annals, which also comprehended many statements, of value only for particular times and places.

III. *The integral authenticity of the prophecies of Isaiah.*—The Jewish synagogue, and the Christian church during all ages, have considered it as an undoubted fact that the prophecies which bear the name of Isaiah really originated from that prophet. Even Spinoza did not expressly assert in his *Tractatus Theologico-Politicus* (viii. 8), that the book of Isaiah consisted of a collection originating from a variety of authors, although it is usually considered that he maintained this opinion. But in the last quarter of the eighteenth century this prevailing conviction appeared to some divines to be inconvenient. In the theology of the natural man it passed as certain, that nature was complete in itself, and that prophecies, as well as miracles, never had occurred, and were even impossible. Whoever is spell-bound within the limits of nature, and has never felt the influence of a supernatural principle upon his own heart, is incapable of understanding the supernatural in history, and feels a lively interest in setting it aside, not only on account of its appearing to him to be strange and awful, but also because supernatural events are facts of accusation against the merely natural man. The assumption of the impossibility of miracles necessarily demanded that the genuineness of the Pentateuch should be rejected; and, in a similar manner, the assumption of the impossibility of prophecy demanded that a great portion of the prophecies of Isaiah should be rejected likewise. Here also the wish was father to the thought, and interest led to the decision of critical questions, the arguments for which were subsequently discovered. All those who attack the integral authenticity of Isaiah agree in considering the book to be an anthology, or gleanings of prophecies, collected after the Babylonian exile, although they differ in their opinions respecting the origin of this collection. Koppe gave gentle hints of this view, which was first explicitly supported by Eichhorn in his *Introduction*. Eichhorn advances the hypothesis that a collection of Isaian prophecies (which might have been augmented, even before the Babylonian exile, by several not genuine additions) formed the basis of

the present anthology, and that the collectors, after the Babylonian exile, considering that the scroll on which they were written did not form a volume proportionate to the size of the three other prophetic scrolls, containing Ezekiel, Jeremiah, and the minor prophets, annexed to the Isaian collection all other oracles at hand whose authors were not known to the editors. In this supposition of the non-identity of date and authorship, most learned men, and lately also Hitzig and Ewald, followed Eichhorn. Gesenius, on the contrary, maintained, in his introduction to Isaiah, that all the non-Isaian prophecies extant in that book originated from one author and were of the same date. Umbreit and Köster on the main point follow Gesenius, considering chapters xl. to lxvi. to be a continuous whole, written by a pseudo-Isaiah who lived about the termination of the Babylonian exile. In reference to other portions of the book of Isaiah the authenticity of which has been questioned, Umbreit expresses himself doubtingly, and Köster assigns them to Isaiah. Gesenius declines to answer the question, how it happened that these portions were ascribed to Isaiah, but Hitzig felt that an answer to it might be expected. He accordingly attempts to explain why such additions were made to Isaiah and not to any of the other prophetical books, by the extraordinary veneration in which Isaiah was held. He says that the great authority of Isaiah occasioned important and distinguished prophecies to be placed in connection with his name. But he himself soon after destroys the force of this assertion by observing, that the great authority of Isaiah was especially owing to those prophecies which were falsely ascribed to him. A considerable degree of suspicion must, however, attach to the boasted certainty of such critical investigations, if we notice how widely these learned men differ in defining what is of Isaian origin and what is not, although they are all linked together by the same fundamental tendency and interest. There are very few portions in the whole collection whose authenticity has not been called in question by some one or other of the various impugners. Almost every part has been attacked either by Dœderlein, or by Eichhorn (who, especially in a later work entitled *Die Hebräischen Propheten*, Göttingen, 1816 to 1819, goes farther than all the others), or by Justi (who, among the earlier adversaries of the integral authenticity of Isaiah, uses, in his *Vermischte Schriften* (vols. i. and ii.), the most comprehensive and, apparently, the best grounded arguments), or by Paulus, Rosenmüller, Bauer, Bertholdt, De Wette, Gesenius, Hitzig, Ewald, Umbreit, or others. The only portions left to Isaiah are chaps. i. 3-9, xvii., xx., xxviii., xxxi., and xxxiii. All the other chapters are defended by some and rejected by others; they are also referred to widely different dates. In the most modern criticism, however, we observe an inclination again to extend the sphere of Isaian authenticity as much as the dogmatic principle and system of the critics will allow. Modern criticism is inclined to admit the genuineness of chaps. i. to xxiii., with the only exception of the two prophecies against Babylon in chaps. xiii. and xiv., and in chap. xxi. 1-10. Chaps. xxviii.-xxxiii. are allowed to be Isaian by Ewald, Umbreit, and others.

Divines, who were not linked to these critics by the same dogmatical interest, undertook to defend the integrity of Isaiah, as Hensler, *Jesaias neu übersetzt*, 1788; Piper, *Integritas Jesaiæ*, 1793; Beckhaus, *Ueber die Integrität der Prophetischen Schriften*, 1796; Jahn, in his *Enleitung*, who was the most able among the earlier advocates; Dereser, in his *Bearbeitung des Jesaias* iv. 1; Greve, *Vaticinia Jesaiæ*, Amsterdam, 1810. All these works have at present only an historical value, because they have been surpassed by two recent monographies. The first is by Jo. Ulr. Mœller, *De Authentia Oraculorum Jesaiæ*, ch. xl.-lxvi., Copenhagen, 1825. Although this work professedly defends only the latter portion of the book of Isaiah, there occur in it many arguments applicable also to the first portion. The standard work on this subject is that of Kleinert, *De Aechtheit des Jesaias*, vol. i., Berlin, 1829. It is, however, very diffuse, and contains too many hypotheses. The comprehensive work of Schleier, *Würdigung der Einwürfe gegen die Altestamentlichen Weissagungen im Jesaias*, chap. xiii. and xiv., of course refers more especially to these chapters, but indirectly refers also to all the other portions whose authenticity has been attacked. Since the objections against the various parts of Isaiah are all of the same character, it is very inconsistent in Köster, in his work *Die Propheten des alten Testamentes*, to defend, in page 102, the genuineness of chaps. xiii., xiv., and xxi.; but, nevertheless, in pages 117 and 297, to ascribe chaps. xl.-lxvi. to a pseudo-Isaiah.

After this survey of the present state of the inquiry, we proceed to furnish, first, the external arguments for the integral authenticity of Isaiah.

1. The most ancient testimony in favour of Isaiah's being the author of all the portions of the collection which bears his name, is contained in the heading of the whole (i. 1), 'The vision of Isaiah the son of Amoz, which he saw concerning Judah and Jerusalem, in the days of Uzziah, Jotham, Ahaz, Hezekiah, kings of Judah.' It is here clearly stated that Isaiah was the author of the following prophecies, uttered during the reign of four successive kings. This inscription is of great importance, even if it originated not from Isaiah, but from a later compiler. If we adopt the latest date at which this compilation could have been made, we must fix it at the time of its reception into the canon in the days of Ezra and Nehemiah. Consequently the compiler could not be separated by many years from the pseudo-Isaiah who is said to have prophesied just before Babylon was conquered, or who, according to most critics, wrote even after the fall of Babylon. It is not credible that a compiler living so near the times of the author, should have erroneously ascribed these prophecies to Isaiah, who lived so much earlier, especially if we bear in mind that this so-called pseudo-Isaiah must have been a very remarkable person in an age so devoid of the prophetic spirit as that in which he is said to have lived.

It is still less credible that a pseudo-Isaiah should himself have fraudulently ascribed his prophecies to Isaiah. None of the adversaries of the authenticity of the book make such an assertion.

If the compiler lived before the exile, the inscription appears to be of still greater importance. That the collection was made so early is very

likely, from the circumstance that Jeremiah and other prophets apparently made use of the prophecies of Isaiah. This fact indicates that the prophecies of Isaiah early excited a lively interest, and that the compiler must have lived at a period earlier than that which is ascribed to the pseudo-Isaiah himself. From all this we infer that the compiler lived before the exile. The adversaries themselves felt the weight of this argument. They, therefore, attempted to remove it by various hypotheses, which received a semblance of probability from the circumstance that even the considerate Vitringa had called in question the authenticity of the heading. Vitringa conjectured that this heading belonged originally to the first chapter alone. He further conjectured that it originally contained only the words, *prophecy of Isaiah, the son of Amoz, which he saw concerning Judah and Jerusalem.* The following words, he says, were added by the compiler, who enlarged the particular inscription of the first chapter to a general one of the whole collection. According to Vitringa the inscription does not suit the whole book, the contents of which are not confined to Judah and Jerusalem alone. This had been felt even by Kimchi, who, anticipating the objection, observes, *quæcunque contra gentes profert, ea omnia propter Judam dicit.* Whatsoever Isaiah utters against the nations, he says on account of Judah. Judah and Jerusalem are the chief subject, and, in a certain sense, the only subject of prophecy. There is no prophecy concerning other nations without a bearing upon the covenant-people. If this bearing should be wanting in any portion of prophecy, that portion would be a piece of divination and soothsaying. No prophet against foreign nations prophesied concerning them with the view to spread his predictions among them, because the mission of all prophets is to Israel. The predictions against foreign nations are intended to preserve the covenant-people from despair, and to strengthen their faith in the omnipotence and justice of their God. These predictions are intended to annihilate the reliance upon political combinations and human confederacies. They are intended to lead Israel to the question, 'If they do these things in the green tree, what shall be done in the dry?' If this is the punishment of those who are less intimately allied with God, what shall then become of us to whom He has more clearly revealed Himself? But they are also intended to indicate the future conversion of the heathen, and to open to the view of the faithful the future glory of the kingdom of God, and its final victory over the kingdoms of this world; and thus to extirpate all narrow-minded nationality. God shall be revealed not only as Jehovah but also as Elohim. His relation to Israel is misunderstood, if that relation is exclusively kept in view without any regard to the universe. Therefore the whole collection is justly entitled Prophecies concerning Judah and Jerusalem. No matter whether this inscription originated from Isaiah himself or from an ancient compiler. That the word חזון means not merely a vision, but also a collection of visions and prophecies, may be learned from 2 Chron. xxxii. 32, and Nah. i. 1. It means a collection of prophecies and visions united like a picture in an historical frame (comp. Jer. xiv. 14), although it may also denote one separate prophecy, as in Obadiah, verse 1. חזון has no plural (comp. Hitzig's *Commentary* on ch. i. 1; Ewald, *Propheten*, i. p. 59).

The inscription in ch. i. 1 has a general bearing upon the whole collection. Then follows the first portion, which contains, as it were, the general prophetic programme. Thereupon follows a series of prophecies directly bearing upon Judah and Jerusalem, commencing again with a particular heading (ii. 1). To this succeeds a series of prophecies indirectly bearing upon Judah and Jerusalem, but directly upon foreign nations. The first of this series has again its own heading (xiii. 1).

Gesenius, advancing in the direction to which Vitringa had pointed, although he grants the integral authenticity of ch. i. 1, nevertheless maintains that this heading belonged originally only to chs. i.-xii., in which were contained genuine prophecies of Isaiah. To this collection, he asserts, were afterwards subjoined the anthologies contained in the following chapters, and the heading was then misunderstood as applying to the whole volume. This opinion is more inconsistent than that of Vitringa, since there occur in the first twelve chapters two prophecies against foreign nations; one against the Assyrians, in ch. x. and another against Ephraim, in ch. ix.

Vitringa, Gesenius, and their followers, are also refuted by the parallel passage in the heading of Amos, 'The words of Amos, which he saw concerning Israel.' The prophecies of Amos in general are here said to be concerning Israel, although there are, as in Isaiah, several against foreign nations, a series of which stands even at the commencement of the book. To this we may add the similarity of the headings of other prophetical books. For instance, the commencement of Jeremiah, Hosea, Micah, and Zephaniah.

Ewald spoils the argument of Vitringa still more than Gesenius, by extending the original collection to ch. xxiii., and thus introducing within the cycle headed by the inscription, whose genuineness he grants, most of the predictions against foreign nations. Whoever subjoined the subsequent portions to the so-called original collection, did it only because he perceived that these portions could be brought under the general heading. He could only have been induced to make the so-called additions, because he perceived that the heading applied to the whole: consequently neither Gesenius nor Ewald rid themselves of the troublesome authority of ch. i. 1; the words of which have the more weight, since all critics ascribe to the headings of the prophetical books a far greater authority than to the headings of the Psalms, and agree in saying that nothing but the most stringent arguments should induce us to reject the statements contained in these prophetical headings.

2. It cannot be proved that there ever existed any so-called prophetic anthology as has been supposed to exist in the book of Isaiah. We find nothing analogous in the whole range of prophetic literature. It is generally granted that the collections bearing the names of Jeremiah and Ezekiel contain only productions of those authors whose name they bear. In the book of the minor prophets, the property of each is strictly distinguished from the rest by headings. The authenticity of only the second portion of Zechariah has been attacked; and this with very feeble argu-

ments, which have been refuted. De Wette himself has, in the latest editions of his *Introduction*, confessed that on this point he is vanquished.

But even if it could be proved that the prophecies of Zechariah belonged to two different authors, namely, as Bertholdt and Gesenius suppose, to the two Zechariahs, each of whom happened to be the son of a Berechiah, this identity of names might be considered an inducement for uniting the productions of the two authors in one collection: still this case would not be analogous to what is asserted to be the fact in Isaiah. In Isaiah, it is alleged not only that a series of chapters belonging to a different author were subjoined, commencing about chap. xxxiv., but it is affirmed that, even in the first thirty-three chapters, the genuine and spurious portions are intermixed. Before we admit that the compilers proceeded here in a manner so unreasonable, and so contrary to their usual custom, we must expect some cogent proof to be adduced. Gesenius declares that he would not attempt to touch this problem. This is as much as to admit the validity of our objection. Eichhorn supposes that the spurious additions were made because the scroll otherwise would not have been filled up. But this *fuga vacui*, this abhorrence of a vacuum, does not explain the intermixture of the spurious with the genuine. It does not explain why the additions were not all subjoined at the end of the genuine portions. Dœderlein creates for himself a second Isaiah, son of Amoz, living at the conclusion of the exile. But even this fiction does not explain why the property of these two prophets was intermixed in spite of their being separated from each other by two centuries, and so intermixed that it is now difficult to say which belongs to which. Augusti supposes that the spurious pieces were added to the genuine on account of their being written entirely in the spirit and style of Isaiah. But in this he seems to contradict himself, since he bases his attack against their authenticity upon the assertion that they differed from Isaiah in spirit and manner. The style of Isaiah was certainly not the style of the age in which the pseudo-Isaiah is said to have lived. Justi supposes that the prediction concerning the Babylonian exile, in chap. xxxix., led to the addition of the whole of the second portion. But this hypothesis is improbable and without analogy, and it does not explain the intermixture of the genuine with the spurious in the first portion.

How untenable all these hypotheses are may be readily perceived from the fact that each of them remained the almost exclusive property of its author, and that each following *savant* felt himself prompted to discover a new hypothesis, until Gesenius endeavoured to stop them by cutting the Gordian knot. Hitzig, however, again attempted to unloose it, but, as we have already seen, unsuccessfully. Ewald maintains that the compiler never intended that chaps. xl.-lxvi. should belong to Isaiah, and that the last twenty-six chapters had been subjoined merely in order to preserve them the better. But it is untrue that the first portion is unconnected with these chapters. The first portion terminates with the prediction of the Babylonian exile, and the second commences with the announciation of a future redemption from this captivity. Chaps. xl.-lxvi. have no heading of their own; which proves that the compiler annexed them as Isaian, and intended them to be read as such. The so-called spurious portions in the first part of Isaiah were, according to the opinion of Ewald (p. 62), intermixed with the genuine, because the compiler really supposed them to belong to Isaiah. Thus Ewald admits that the intermixed pieces have the testimony of the compiler in favour of their authenticity. To deny that this testimony extends also to the second part, is an arbitrary assumption. Now, if this testimony is granted, we are content. With it we gain this much, that the attacked portions have the presumption of genuineness in their favour, and that, therefore, very substantial reasons are required for denying their Isaian origin. This is all that we want.

3. According to the opinion of several critics, all the spurious portions of Isaiah belong to one and the same author. But it so happens that the portion which is most emphatically declared to be spurious, namely, chaps. xiii. and xiv., bear an inscription which expressly ascribes them to Isaiah. Now, as the internal arguments against the authenticity of all the portions which are said to be spurious, are nearly identical, if the opposition to chaps. xiii. and xiv. is given up, it cannot with consistency be maintained against the other portions. This argument serves also as an answer to those who ascribe the portions which they consider spurious to several authors. The contents of these portions are similar. They contain predictions of the fall of Babylon, and of the redemption of Israel from captivity. Whatever proves the genuineness of one of these portions, indirectly proves the others also to be genuine.

4. According to Josephus (*Antiq.* xi. c. 1, § 1, 2) Cyrus was induced by the prophecies of Isaiah respecting him to allow the return of the Jews, and to aid them in rebuilding the temple. The credibility of Josephus, who in regard to facts of ancient history is not always to be relied upon, is here supported by two circumstances. First, the favour shown by Cyrus to the Jews, which remains inexplicable except by the fact mentioned, in combination with the influence of Daniel. In modern times, the favour of Cyrus to the Jews has been called a prudential measure; but it does not appear what he could either hope or fear from a people so enfeebled as the Jews were at that period. It has been added that Cyrus was favourable to the Jews on account of the similarity between the Persian and the Jewish religion; but there is no historical proof that the Persians, on any other occasion, favoured the Jews on account of their religion. The favours shown to Nehemiah on behalf of Israel were only personal favours, owing to his position at the Persian court. We allow that all this would be insufficient to prove the correctness of the above statement in Josephus, but it must render us inclined to admit its truth.

The second argument is much stronger: it is, that the statement of Josephus is supported by the edict of Cyrus (Ezra i.). This edict pre-supposes the fact related by Josephus, so that Jahn calls the passage in Josephus a commentary on the first chapter of Ezra, in which we read that Cyrus announces in his edict, that he was commanded by Jehovah to build him a temple in Jerusalem,

and that he received all the conquered kingdoms of the earth as a gift from Jehovah. This cannot refer to any other predictions of the prophet, but only to what are called the spurious portions of Isaiah, in which the Lord grants to Cyrus all his future conquests, and appoints him to be the restorer of his temple (comp. xli. 2-4; xliv. 24-28; xlv. 1-13; xlvi. 11; xlviii. 13-15). The edict adopts almost the words of these passages (comp. the synopsis in the above-mentioned work of Kleinert, p. 142). In reply to this, our adversaries assert that Cyrus was deceived by pseudo-prophecies forged in the name of Isaiah; but if Cyrus could be deceived in so clumsy a manner, he was not the man that history represents him; and to have committed forgery is so contrary to what was to be expected from the author of chaps. xl.-lxvi., that even the feelings of our opponents revolt at the supposition that the pseudo-Isaiah should have forged *vaticinia post eventum* in the name of the prophets. Had these prophecies been written, as it is alleged, only in sight of the conquest of Babylon, Cyrus would have been deceived before the eyes of the author, and this could not have been effected without collusion on the part of the author. This collusion would be undeniable, since the author again and again repeats that he was proclaiming unheard-of facts, which were beyond all human calculation.

5. In the books of the prophets who lived after Isaiah, and before the period of the so-called pseudo-Isaiah, we find imitations of those prophecies which have been ascribed to the latter. Since Gesenius has demonstrated that all the portions which have been considered spurious are to be ascribed to only one author, it can be shown that they were all in existence before the time assigned to the pseudo-Isaiah, although we can produce the imitations of only some of these portions. But even those opponents who ascribe these portions to different authors must grant that their objections are invalidated, if it can be shown that later prophets have referred to these portions, because the arguments employed against them closely resemble each other: consequently these prophecies stand and fall together. The verbal coincidence between Jeremiah and the so-called pseudo-Isaiah is in this respect most important. Jeremiah frequently makes use of the earlier prophets, and he refers equally, and in the same manner, to the portions of Isaiah whose genuineness has been questioned, as to those which are deemed authentic (comp. Küper, *Jeremias librorum sacrorum interpres atque vindex*, pp. 132-155). The most striking is the coincidence of Jeremiah l. 51, with the predictions against Babylon in Isaiah. Jeremiah here gives to God the appellation קדוש ישראל, *the Holy One of Israel*, which frequently occurs in Isaiah, especially in the portions whose authenticity is questioned, but is found only three times in the other books of the Old Testament. Isaiah uses the appellation ישראל קדוש with peculiar predilection, because it points out the omnipotent covenant-fidelity of the Lord; which was to be considered, especially as it guarantees the truth of the contents of those prophecies which are attacked by our opponents. This circumstance is so striking that Von Coelln and De Wette, on this account, and in contradiction to every argument, declare even the corresponding chapter of Jeremiah to be spurious. This is certainly a desperate stroke, because the chapter is otherwise written in the very characteristic style of that prophet. This desperation, however, gives us the advantage afforded by an involuntary testimony in favour of those portions of Isaiah which have been attacked. The words of Isaiah, in ch. li. 15, 'I am the Lord thy God who moves the sea that its waves roar,' are repeated in Jer. xxxi. 35. The image of the cup of fury in Isa. li. 17, is in Jer. xxv. 15-29, transformed into a symbolic act, according to his custom of embodying the imagery of earlier prophets, and especially that of Isaiah. In order to prove that other prophets also made a similar use of Isaiah, we refer to Zephaniah ii. 15, where we find Isaiah's address to Babylon applied to Nineveh, 'Therefore hear now this, thou that art given to pleasures, that dwellest carelessly, that sayest in thine heart I am, and none else beside me,' &c. Zephaniah, living towards the termination of prophetism, has, like Jeremiah, a dependent character, and has here even repeated the characteristic and difficult word אפסי. Küper (p. 138) has clearly demonstrated that the passage cannot be original in Zephaniah. The words of Isaiah (lii. 7), 'How beautiful upon the mountains are the feet of him that bringeth good tidings, that publisheth peace,' are repeated by Nahum in ch. i. 15 (ii. 1); and what he adds, 'the wicked shall no more pass through thee,' agrees remarkably with Isa. lii. 1, 'for henceforth shall no more come into thee the uncircumcised and the unclean.' Nahum iii. 7 contains an allusion to Isa. li. 19. Beside these references to the portions of Isaiah which are said to be spurious, we find others to the portions which are deemed genuine (compare, for instance, Nahum i. 13, with Isa. x. 27).

6. Again, the most ancient production of Jewish literature after the completion of the canon, furnishes proof of the integral authenticity of Isaiah. The book of Jesus Sirach, commonly called Ecclesiasticus, was written as early as the third century before Christ, as Hug has clearly demonstrated, in opposition to those who place it in the second century before Christ. In Ecclesiasticus xlviii. 22-25, Isaiah is thus praised: 'For Hezekiah had done the thing that pleased the Lord, and was strong in the ways of David his father, as Isaiah the prophet, who was great and faithful in his vision, had commanded him. In his time the sun went backward, and he lengthened the king's life. He saw by an excellent spirit what should come to pass at the last, and he comforted them that mourned in Sion. He showed what should come to pass for ever, and secret things or ever they came.'

This commendation especially refers, as even Gesenius grants, to the disputed portions of the prophet, in which we find predictions of the most distant futurity. The comfort for Zion is found more particularly in the second part of Isaiah, which begins with the words 'Comfort ye, comfort ye, my people.' The author of this second part himself says (xlviii. 3), 'I have declared the former things from the beginning; and they went forth out of my mouth, and I showed them.' Thus we perceive that Jesus Sirach, the learned scribe, confidently attributes the debated passages to Isaiah, in such a manner as plainly indicates that there

was no doubt in his days respecting the integral authenticity of that book, which has the testimony of historical tradition in its favour. Jesus Sirach declares his intention (Ecclus. xliv.-l.) to praise the most celebrated men of his nation. The whole tenor of these chapters shows that he does not confine himself to celebrated authors. We therefore say that the praise which he bestows upon Isaiah is not intended for the book personified, but for the person of the prophet. If Jesus Sirach had entertained doubts respecting the genuineness of those prophecies on which, in particular, he bases his praise, he could not have so lauded the prophet.

In the Jewish synagogue the integral authenticity of Isaiah has always been recognised. This general recognition cannot be accounted for except by the power of tradition based upon truth; and it is supported as well by the New Testament, in which Isaiah is quoted as the author of the whole collection which bears his name, as also by the express testimony of Josephus, especially in his *Antiquities* (x. 2. 2, and xi. 1. 1). After such confirmation it would be superfluous to mention the Talmudists.

7. According to the hypothesis of our opponents, the author or authors of the spurious portions wrote at the end of the Babylonian exile. They confess that these portions belong to the finest productions of prophetism. Now it is very remarkable that in the far from scanty historical accounts of this period, considering all circumstances, no mention is made of any prophet to whom we could well ascribe these prophecies. This is the more remarkable, because at that period prophetism was on the wane, and the few prophets who still existed excited on that account the greater attention. What Ewald (p. 57) writes concerning the time about the conclusion of the Babylonian exile, is quite unhistorical. He says, 'In this highly excited period of liberty regained, and of a national church re-established, there were rapidly produced a great number of prophecies, circulated in a thousand pamphlets, many of which were of great poetical beauty.' What Ewald states about a new flood of prophetic writings which then poured forth, is likewise unhistorical. History shows that during the exile prophetism was on the wane. What we read in the books of Jeremiah and Ezekiel proves that these prophets were isolated; and from the book of Ezra we learn what was the spiritual condition of the new colony. If we compare with their predecessors the prophets who then prophesied, Haggai, Zechariah, and Malachi, we cannot say much about a revival of the prophetic spirit towards the conclusion of the exile. Everything concurs to show that the efficiency of prophetism was drawing towards its end. The later the prophets are, the more do they lean upon the earlier prophets; so that we are enabled to trace the gradual transition of prophetism into the learning of scribes. Prophetism dug, as it were, its own grave. The authority which it demands for its earlier productions necessarily caused that the later were dependent upon the earlier; and the more this became the case during the progress of time, the more limited became the field for new productions. It is not only unhistorical, but, according to the condition of the later productions of prophecy, quite impossible, that about the conclusion of the exile there should have sprung up a fresh prophetic literature of great extent. In this period we hear only the echo of prophecy. That one of the later prophets of whom we possess most, namely Zechariah, leans entirely upon Jeremiah and Ezekiel, as upon his latest predecessors. There is not a vestige of an intervening prophetic literature. The feebleness of our opponents is manifested by their being obliged to have recourse to such unhistorical fictions in order to defend their opinions.

Thus we have seen that we possess a series of external arguments in favour of the integral authenticity of Isaiah. Each of these arguments is of importance, and, in their combination, they have a weight which could only be counterbalanced by insurmountable difficulties in the contents of these prophecies. We now proceed to show that there are no such difficulties, and that the internal arguments unite with the external in demonstrating the authenticity of Isaiah as a whole.

1. The portions of Isaiah which have been declared by our opponents to be spurious are, as we have already said, almost entirely such as contain prophecies of an especially definite character. It is this very definiteness which is brought forward as the chief argument against their genuineness. Those of our adversaries who go farthest assert in downright terms that predictions in the stricter sense, such, namely, as are more than a vague foreboding, are impossible. The more considerate of our opponents express this argument in milder terms, saying, that it was against the usage of the Hebrew prophets to prophesy with so much individuality, or to give to their prophecies so individual a bearing. They say that these prophecies were never anything more than general prophetic descriptions, and that, consequently, where we find a definite reference to historical facts quite beyond the horizon of a human being like Isaiah, we are enabled by analogy to declare those portions of the work in which they occur to be spurious.

Although this assertion is pronounced with great assurance, it is sufficiently refuted by an impartial examination of the prophetic writings. Our opponents have attempted to prove the spuriousness of whatever is in contradiction with this assertion, as, for instance, the book of Daniel; but there still remain a number of prophecies announcing future events with great definiteness. Micah, for example (iv. 8-10), announces the Babylonian exile, and the deliverance from that exile, one hundred and fifty years before its accomplishment, and before the commencement of any hostilities between Babylon and Judah, and even before Babylon was an independent state. All the prophets, commencing with the earliest, predict the coming destruction of their city and temple, and the exile of the people. All the prophets whose predictions refer to the Assyrian invasion, coincide in asserting that the Assyrians would NOT be instrumental in realising these predictions; that Judah should be delivered from those enemies, from whom to be delivered seemed impossible; and this not by Egyptian aid, which seemed to be the least unlikely, but by an immediate intervention of the Lord; and, on the contrary, all the prophets whose predictions refer to the successors of the Assyrians, the Chaldees, unanimously announce that these were to fulfil the

ancient prediction, and exhort to resignation to this inevitable fate. These are facts quite beyond human calculation. At the period when the Chaldæan empire had reached the summit of its power, Jeremiah not only predicts in general terms its fall, and the destruction of its chief city, but also details particular circumstances connected therewith; for instance, the conquest of the town by the Medes and their allies; the entrance which the enemy effected through the dry bed of the Euphrates, during a night of general revelry and intoxication; the return of the Israelites after the reduction of the town; the utter destruction and desolation of this city, which took place, although not at once, yet certainly in consequence of the first conquest, so that its site can scarcely be shown with certainty. In general, all those proud ornaments of the ancient world, whose destruction the prophets predicted—Nineveh, Babylon, Tyre, Memphis, the chief cities of the Moabites and Ammonites, and many others—have perished, and the nations to whom the prophets threatened annihilation—the Ammonites, Moabites, Philistines, and Idumæans—have entirely disappeared from the stage of history. There is not a single city nor a single people, the fate of which has been at variance with prophecy. All this is not a casual coincidence. The ruins of all these cities, every vestige of the former existence of those once flourishing nations, are loud-speaking witnesses, testifying to the futility of the opinion which raises into a fact the subjective wish that prophecy might not exist. Zechariah clearly describes the conquests of Alexander (ix. 8). He foretells that the Persian empire, which he specifies by the symbolic name Hadrach, shall be ruined; that Damascus and Hamath shall be conquered; that the bulwarks of the mighty Tyre shall be smitten in the sea, and that the city shall be burned; that Gaza shall lose its king, and that Ashdod shall be peopled with the lowest rabble; and that Jerusalem shall be spared during all these troubles. These prophecies were fulfilled during the expedition of Alexander (comp. Jahn's *Einleitung*, vol. i. p. 84, sq.; vol. ii. p. 349, sq.). Eichhorn despaired of being able to explain the exact correspondence of the fulfilment with the predictions; he, therefore, in his work, *Die Hebräischen Propheten*, endeavours to prove that these prophecies were veiled historical descriptions. He has recourse to the most violent operations in order to support this hypothesis; which proves how fully he recognised the agreement of the prophecies with their fulfilment, and that the prophecies are more than general poetical descriptions. The Messianic predictions prove that the prophecies were more than veiled historical descriptions. There is scarcely any fact in Gospel history, from the birth of our Saviour at Bethlehem down to his death, which is unpredicted by a prophetical passage.

Eichhorn's hypothesis is also amply refuted by the unquestioned portion of Isaiah. How can it be explained that Isaiah confidently predicts the destruction of the empire of Israel by the Assyrians, and the preservation of the empire of Judah from these enemies, and that he with certainty knew beforehand that no help would be afforded to Judah from Egypt, that the Assyrians would advance to the gates of Jerusalem, and there be destroyed only by the judgment of the Lord? No human combinations can lead to such results. Savonarola, for instance, was a pious man, and an acute observer; but when he fancied himself to be a prophet, and ventured to predict events which should come to pass, he was immediately refuted by facts (comp. *Biographie Savonarola's*, von Rudelbach).

If we had nothing of prophetic literature, beside the portions of Isaiah which have been attacked, they alone would afford an ample refutation of our opponents, because they contain, in chapter liii., the most remarkable of Old Testament prophecies, predicting the passion, death, and glory of our Saviour. If it can be proved that this one prophecy necessarily refers to Christ, we can no longer feel tempted to reject other prophecies of Isaiah, on account of their referring too explicitly to some event, like that of the Babylonian exile. As soon as only one genuine prophecy has been proved, the whole argument of our opponents falls to the ground. This argument is also opposed by the authority of Christ and his apostles; and whoever will consistently maintain this opinion must reject the authority of Christ. The prophets are described in the New Testament not as acute politicians, or as poets full of a foreboding genius, but as messengers of God raised by His Spirit above the intellectual sphere of mere man. Christ repeatedly mentions that the events of his own life were also destined to realise the fulfilment of prophecy, saying, 'this must come to pass in order that the Scripture may be fulfilled.' And after his resurrection, he interprets to his disciples the prophecies concerning himself. Peter, speaking of the prophets, says, in his First Epistle (i. 11), 'Searching what, or what manner of time the Spirit of Christ, which was in them, did signify, when it testified beforehand the sufferings of Christ, and the glory that should follow;' and, in his Second Epistle (i. 21), 'For the prophecy came not in old time by the will of man; but holy men of God spake as they were moved by the Holy Ghost'—*ὑπὸ πνεύματος ἁγίου φερόμενοι*.

Since we have shown that there are in the Holy Scriptures definite prophecies, the *à priori* argument of our opponents, who pretend that prophecy is useless, loses its significance. Even if we could not understand the purpose of prophecy, the inquiry respecting its reality should nevertheless be independent of such *à priori* reasoning, since the cause of our NOT understanding it might be in ourselves. We frequently find, after we have been raised to a higher position, the causes of facts which at an earlier period we could not comprehend. A later age frequently understands what was hidden to the preceding. However, the purpose of definite predictions is not hidden to those who recognise the reality of the divine scheme for human salvation.

There is one truth in the opinion of our opponents. The predictions of the future by the prophets are always on a general basis, by which they are characteristically distinguished from soothsaying. Real prophecy is based upon the idea of God. The acts of God are based upon his essence, and have therefore the character of necessity. The most elevated prerogative of the prophets is that they have possessed themselves of his idea, that they have penetrated into his essence, that they have become conscious of the

eternal laws by which the world is governed. For instance, if they demonstrate that sin is the perdition of man, that where the carcase is, the eagles will be assembled, the most important point in this prediction is not the HOW but the WHAT which first by them was clearly communicated to the people of God, and of which the lively remembrance is by them kept up. But if the prophets had merely kept to the THAT, and had never spoken about the HOW, or if, like Savonarola, they had erroneously described this HOW, they would be unfit effectually to teach the THAT to those people who have not yet acquired an independent idea of God. According to human weakness, the knowledge of the FORM is requisite in order to fertilize the knowledge of the ESSENCE, especially in a mission to a people among whom formality so much predominated as among the people of the Old Covenant. The position of the prophets depends upon these circumstances. They had not, like the priests, an external warrant. Therefore Moses (Deut. xviii.) directed them to produce true prophecies as their warrant. According to verse 22, the true and the false prophet are distinguished by the fulfilment or non-fulfilment of prophecy. This criterion is destroyed by the modern opinion respecting prophetism. Without this warrant, the principal point of prophetical preaching, the doctrine of the Messiah, could not be brought to the knowledge of the people, as being of primary importance. Without this fulfilment the prophets had no answer to those who declared that the hopes raised by them were fantastic and fanatical.

It is true that, according to what we have stated, the necessity of prophecy arises only from the weakness of man. Miracles also are necessary only on account of this weakness. Prophecy is necessary only under certain conditions; but these conditions were fully extant during the period of the ancient Covenant. During the New Covenant human weakness is supported by other and more powerful means, which were wanting during the time of the Old Covenant; especially by the operation of the Spirit of Christ upon the hearts of the faithful; which operation is by far more powerful than that of the Spirit of God during the Old Covenant; consequently, definite predictions can be dispensed with, especially since the faithful of the New Testament derive benefit also from the prophecies granted to the people of the Old Testament.

The predictions of futurity in the Old Testament have also a considerable bearing upon the contemporaries of the prophet. Consequently, they stand not so isolated and unconnected as our opponents assert. The Chaldæans, for instance, who are said to threaten destruction to Israel, were, in the days of Isaiah, already on the stage of history; and their juvenile power, if compared with the decline of the Assyrians, might lead to the conjecture that they would some time or other supplant the Assyrians in dominion over Asia. Babylon, certainly, was as yet under Assyrian government; but it was still during the lifetime of the prophet that this city tried to shake off their yoke. This attempt was unsuccessful, but the conditions under which it might succeed at a future period were already in existence. The future exaltation of this city might be foreseen from history, and its future fall from theology. In a pagan nation success is always the forerunner of pride, and all its consequences. And, according to the eternal laws by which God governs the world, an overbearing spirit is the certain forerunner of destruction. The future liberation of Israel might also be theologically foreseen; and we cannot look upon this prediction as so abrupt as a prediction of the deliverance of other nations would have been, and as, for instance, a false prediction of the deliverance of Moab would have appeared. Even the Pentateuch emphatically informs us that the covenant-people cannot be given up to final perdition, and that mercy is always concealed behind the judgments which befall them.

2. Attempts have been made to demonstrate the spuriousness of several portions from the circumstance that the author takes his position not in the period of Isaiah, but in much later times, namely, those of the exile. It has been said, 'Let it be granted that the prophet had a knowledge of futurity: in that case we cannot suppose that he would predict it otherwise than as future, and he cannot proclaim it as present.' The prophets, however, did not prophesy in a state of calculating reflection, but ὑπὸ πνεύματος ἁγίου φερομένοι, 'borne along by the Holy Ghost.' The objects offered themselves to their spiritual vision. On that account they are frequently called *seers*, to whom futurity appears as present. Even Hebrew grammar has long ago recognised this fact in the terms *præterita prophetica*. These prophetical præter tenses indicate a time ideally past, in contra-distinction to the time which is really past. Every chapter of Isaiah furnishes examples of this grammatical fact. Even in the first there is contained a remarkable instance of it. Interpreters frequently went astray, because they misunderstood the nature of prophecy, and took the *præterita prophetica* as real præterites; consequently, they could only by some inconsistency escape from Eichhorn's opinion, that the prophecies were veiled historical descriptions. The prophets have futurity always before their eyes. Prophetism, therefore, is subject to the laws of poetry more than to those of history (compare the ingenious remarks on the connection of poetry and prophetism in the work of Steinbeck, *Der Dichter ein Seher*, Leipzig, 1836). Prophetism places us *in medias res*, or rather the prophet is placed *in medias res*. The Spirit of God elevates him above the *terra firma* of common reality, and of common perception. The prophet beholds as connected, things externally separated, if they are linked together by their internal character. The prophet beholds what is distant as near, if its hidden basis, although concealed to the eyes of flesh, already exists. This was, for instance, the case with Israel's captivity and deliverance. Neither happened by chance. Both events proceeded from the justice and mercy of God, a living knowledge of which necessarily produced the beholding knowledge of the same. The prophet views things in the light of that God who calls the things that are not as though they were, and to whom the future is present.

3. What the prophet says about what is present to him (namely, about that which appears to him in the form of the present time), is correctly and minutely detailed; and what he describes as future, are ideal and animated hopes which far exceed terrene reality. Hence our opponents

attempt to prove that the present time in those portions which they reject, is not ideal but real; and that the author was actually an eye-witness of the exile, because, they say, if the prophet merely placed himself in the period of the exile, then this present time would be ideal, and in that case there could be no difference between this ideally present time and the more distant future. But we question this fact most decidedly. The descriptions of the person of Messiah in the second part of Isaiah are far more circumstantial than the descriptions of the person of Cyrus. Of Cyrus these prophecies furnish a very incomplete description. Whoever does not fill up from history what is wanting, obtains a very imperfect idea of Cyrus. But there is sufficient information to show the relation between history and prophecy; and nothing more was required than that the essence of prophecy should be clear. The form might remain obscure until it was cleared up by its historical fulfilment. The Messiah, on the contrary, is accurately depicted, especially in ch. liii., so that there is scarcely wanting any essential trait. It is quite natural that there should be greater clearness and definiteness here, because the anti-type of redemption stands in a far nearer relation to the ideal than is the case with Cyrus, so that form and essence less diverge.

The assertion that the animated hopes, expressed in the second part of Isaiah, had been very imperfectly fulfilled, proceeds from the erroneous supposition that these hopes were to be entirely fulfilled in the times immediately following the exile. But if we must grant that these prophecies refer both to the deliverance from captivity, and to the time of the Messiah in its whole extent, from the lowliness of Christ to the glorious completion of his kingdom, then the fulfilment is clearly placed before our eyes; and we may expect that whatever is yet unfulfilled, will, in due time, find its accomplishment. In this hope we are supported by the New Testament, and still more by the nature of the matter in question. If the prophecies of Isaiah were nothing but arbitrary predictions on his own external authority, without any internal warrant, one might speak here of an evasion of the difficulty; but as the matter stands, this objection proves only that those who make it are incapable of comprehending the idea which pervades the whole representation. The entire salvation which the Lord has destined to his people has been placed before the spiritual eye of the prophet. His prediction is not entirely fulfilled in history, so that we could say we have now done with it, but every isolated fulfilment is again a prediction *de facto*, supporting our hope of the final accomplishment of the whole word of prophecy.

4. Our opponents think that they have proved that a portion of Isaiah is not genuine, if they can show that there occur a few Aramaic words and forms of speech, which they endeavour to explain from the style prevalent in a period later than Isaiah.

That this argument is very feeble even our opponents have granted in instances where it can be adduced with by far greater stringency than in the questioned portions of Isaiah. This appears especially from the example of the Song of Solomon, in which there occur a considerable number of Aramaic words and expressions, said to belong to the later Hebrew style. Bertholdt, Umbreit, and others, base upon this their argument, that the Song of Solomon was written after the Babylonian exile. They even maintain that it could not have been written before that period. On the contrary, the two most recent commentators, Ewald and Doepke, say most decidedly that the Song of Solomon, in spite of its Aramaisms, was written in the days of Solomon.

Hirzel, in his work *De Chaldaismi Biblici origine*, Leipsic, 1830, has contributed considerably to the formation of a correct estimate of this argument. He has proved that in all the books of the Old Testament, even in the most ancient, there occur a few Chaldaisms. This may be explained by the fact that the patriarchs were surrounded by a population whose language was Chaldee. Such Chaldaisms are especially found in poetical language in which unusual expressions are preferred. Consequently, not a few isolated Chaldaisms, but only their decided prevalence, or a Chaldee tincture of the whole style, can prove that a book has been written after the exile. Nobody can assert that this is the case in those portions of Isaiah whose authenticity has been questioned. Even our opponents grant that the Chaldaisms in this portion are not numerous. After what have erroneously been called Chaldaisms are subtracted, we are led to a striking result, namely, that the unquestionable Chaldaisms are more numerous in the portions of Isaiah of which the genuineness is granted, than in the portions which have been called spurious. Hirzel, an entirely unsuspected witness, mentions in his work *De Chaldaismo*, p. 9, that there are found only four real Chaldaisms in the whole of Isaiah; and that these all occur in the portions which are declared genuine; namely, in vii. 14 (where, however, if the grammatical form is rightly understood, we need not admit a Chaldaism); xxix. 1; xviii. 7; xxi. 12.

5. The circumstance that the diction in the attacked portions of Isaiah belongs to the first, and not to the second period of the Hebrew language, must render us strongly inclined to admit their authenticity. It has been said that these portions were written during, and even after, the Babylonian exile, when the ancient Hebrew language fell into disuse, and the vanquished people began to adopt the language of their conquerors, and that thus many Chaldaisms penetrated into the works of authors who wrote in ancient Hebrew. Since this is not the case in the attacked portions of Isaiah, granting the assertions of our opponents to be correct, we should be compelled to suppose that their author or authors had intentionally abstained from the language of their times, and purposely imitated the purer diction of former ages. That this is not quite impossible we learn from the prophecies of Haggai, Malachi, and especially from those of Zechariah, which are nearly as free from Chaldaisms as the writings before the exile. But it is improbable, in this case, because the pseudo-Isaiah is stated to have been in a position very different from that of the prophets just mentioned, who belonged to the newly returned colony. The pseudo-Isaiah has been placed in a position similar to that of the strongly Chaldaizing Ezekiel and Daniel; and even more unfavourably for the attainment of purity of diction, because he had not, like these

prophets, spent his youth in Palestine, but is said to have grown up in a country in which the Aramæan language was spoken; consequently, it would have been more difficult for him to write pure Hebrew than for Ezekiel and Daniel. In addition to this it ought to be mentioned that an artificial abstinence from the language of their times occurs only in those prophets who entirely lean upon an earlier prophetic literature; but that union of purity in diction with independence, which is manifest in the attacked portions of Isaiah, is nowhere else to be found.

The force of this argument is still more increased when we observe that the pretended pseudo-Isaiah has, in other respects, the characteristics of the authors before the exile; namely, their clearness of perception, and their freshness and beauty of description. This belongs to him, even according to the opinion of all opponents. These excellences are not quite without example among the writers after the exile, but they occur in none of them in the same degree; not even in Zechariah, who, besides, ought not to be compared with the pseudo-Isaiah, because he does not manifest the same independence, but leans entirely upon the earlier prophets. To these characteristics of the writers before the exile belongs also the scarcity of visions and symbolic actions, and what is connected therewith (because it proceeds likewise from the government of the imagination), the naturalness and correctness of poetical images. What Umbreit says concerning the undisputedly genuine portions of Isaiah fully applies also to the disputed portions: 'Our prophet is more an orator than a symbolic seer. He has subjected the external imagery to the internal government of the word. The few symbols which he exhibits are simple and easy to be understood. In the prophets during and after the exile visions and symbolic actions prevail, and their images frequently bear a grotesque Babylonian impress. Only those authors, after the exile, have not this character, whose style, like that of Haggai and Malachi, does not rise much above prose. A combination of vivacity, originality, and vigour, with naturalness, simplicity, and correctness, is not found in any prophet during and after the exile.' Nothing but very strong arguments could induce us to ascribe to a later period prophecies which rank in language and style with the literary monuments of the earlier period. In all the attacked portions of Isaiah independence and originality are manifest in such a degree, as to make them harmonize not only with the prophets before the exile in general, but especially with the earliest cycle of these prophets. If these portions were spurious, they would form a perfectly isolated exception, which we cannot admit, since, as we have before shown, the leaning of the later prophets upon the earlier rests upon a deep-seated cause arising from the very nature of prophetism. A prophet forming such an exception would stand, as it were, without the cycle of the prophets. We cannot imagine such an exception.

6. A certain difference of style between the portions called genuine and those called spurious does not prove what our opponents assert. Such a difference may arise from various causes in the productions of one and the same author. It is frequently occasioned by a difference of the subject-matter, and by a difference of mood arising therefrom; for instance, in the prophecies of Jeremiah against foreign nations, the style is more elevated and elastic than in the home-prophecies. How little this difference of style can prove, we may learn by comparing with each other the prophecies which our opponents call genuine; for instance, ch. ix. 7-x. 4. The authenticity of this prophecy is not subject to any doubt, although it has not that swing which we find in many prophecies of the first part. The language has as much ease as that in the second part, with which this piece has several repetitions in common. The difference of style in the prophecies against foreign nations (which predictions are particularly distinguished by sublimity), from that in chapters i.-xii., which are now generally ascribed to Isaiah, appeared to Bertholdt a sufficient ground for assigning the former to another author. But in spite of this difference of style it is, at present, again generally admitted that they belong to one and the same author. It consequently appears that our opponents deem the difference of style alone not a sufficient argument for proving a difference of authorship; but only such a difference as does not arise from a difference of subjects and of moods, especially if this difference occurs in an author whose mind is so richly endowed as that of Isaiah, in whose works the form of the style is produced directly by the subject. Ewald correctly observes (p. 173), 'We cannot state that Isaiah had a peculiar colouring of style. He is neither the especially lyrical, nor the especially elegiacal, nor the especially oratorical, nor the especially admonitory prophet, as, perhaps, Joel, Hosea, or Micah, in whom a particular colouring more predominates. Isaiah is capable of adapting his style to the most different subject, and in this consists his greatness and his most distinguished excellence.'

The chief fault of our opponents is, that they judge without distinction of persons; and here distinction of persons would be proper. They measure the productions of Isaiah with the same measure that is adapted to the productions of less-gifted prophets. Jeremiah, for example, does not change his tone according to the difference of subject so much that it could be mistaken by an experienced Hebraist. Of Isaiah, above all, we might say what Fichte wrote in a letter to a friend in Königsberg: 'Strictly speaking, I have no style, because I have all styles' (Fichtes' *Leben von seinem Sohne*, th. i. p. 196). If we ask how the difference of style depends upon the difference of subject, the answer must be very favourable to Isaiah, in whose book the style does not so much differ according to the so-called genuineness or spuriousness, as rather according to the subjects of the first and second parts. The peculiarities of the second part arise from the subjects treated therein; and from the feelings to which these subjects give rise. Here the prophet addresses not so much the multitude who live around him, as the future people of the Lord, purified by his judgments, who are about to spring from the ἐκλογή, that is, the small number of the elect who were contemporaries of Isaiah. Here he does not speak to a mixed congregation, but to a congregation of brethren whom he comforts. The commencement, 'Comfort ye, comfort ye, my people,' is the theme of the whole. Hence arise the gentleness and tenderness of style, and

the frequent repetitions. Comforting love has many words. Hence the addition of many epithets to the name of God, which are so many shields by which the strokes of despair are warded off, and so many bulwarks against the attacks of the visible world which was driving to despair. The sublimity, abruptness, and thunders of the first part find no place here, where the object of Isaiah is not to terrify and to shake stout-hearted sinners, but rather to bring glad tidings to the meek; not to quench the smoking flax, nor to break the bruised reed. But wherever there is a similarity of hearers and of subject, there we meet also a remarkable similarity of style, in both the first and second part; as, for example, in the description of the times of Messiah, and of the punishments, in which (lvi.-lix.) the prophet has the whole nation before his eyes, and in which he addresses the careless sinners by whom he is surrounded.

We attach no importance to the collections of isolated words and expressions which some critics have gleaned from the disputed parts of Isaiah, and which are not found in other portions that are deemed genuine. We might here well apply what Krüger wrote on a similar question in profane history (*De authentia et integritate Anab. Xenophontis*, Halle, 1824, p. 27): *Hoc argumentandi genus perquam lubricum est. Si quid numerus valeret, urgeri posset, quod in his libris amplius quadraginta vocabula leguntur, quæ in reliquis Xenophontis operibus frustra quærantur. Si quis propter vocabula alibi ab hoc scriptore vel alia potestate, vel prorsus non usurpata, Anabasin ab eo profectam neget, hac ratione admissa quodvis aliud ejus opus injuria ei tribui, ostendi potest;* that is, 'This is a very slippery mode of reasoning. If number were of importance, it might be urged that in these books occur more than forty words for which one searches in vain in the other works of Xenophon. But if it should be denied on account of those words which this author has either employed in a different sense, or has not made use of at all, that the Anabasis was written by him, it could, by the same reasoning, be shown that every other work was falsely attributed to him.'

7. We find a number of characteristic peculiarities of style which occur both in what is accounted genuine and what is styled spurious in Isaiah, and which indicate the identity of the author. Certain very peculiar idioms occur again and again in all parts of the book. Two of them are particularly striking. The appellation of God, 'the Holy One of Israel,' occurs with equal frequency in what has been ascribed to Isaiah and in what has been attributed to a pseudo-Isaiah; it is found besides in two passages in which Isaiah imitates Jeremiah, and only three times in the whole of the remainder of the Old Testament. Another peculiar idiom is that 'to be called' stands constantly for 'to be.' These are phenomena of language which even our opponents do not consider casual; but they say that the later poet imitated Isaiah, or that they originated from the hand of a uniformising editor, who took an active part in modelling the whole. But there cannot be shown any motive for such interference; and we find nothing analogous to it in the whole of the Old Testament. Such a supposition cuts away the linguistic ground from under the feet of higher criticism, and deprives it of all power of demonstration. In this manner every linguistic phenomenon may easily be removed, when it is contrary to preconceived opinions. But everything in Isaiah appears so natural, bears so much the impress of originality, is so free from every vestige of patch-work, that no one can conscientiously maintain this hypothesis.

We have still to consider the other conjecture of our opponents. If we had before us a prophet strongly leaning, like Jeremiah and Zechariah, upon preceding prophets, that conjecture might be deemed admissible, in case there were other arguments affording a probability for denying that Isaiah was the author of these portions—a supposition which can here have no place. But here we have a prophet whose independence and originality are acknowledged even by our opponents. In him we cannot think of imitation, especially if we consider his peculiarities in connection with the other peculiar characteristics of Isaiah, and of what has been said to belong to a pseudo-Isaiah; we refer here to the above-mentioned works of Mœlle and of Kleinert (p. 231, sq.). In both portions of Isaiah there occur a number of words which are scarcely to be found in other places; also a frequent repetition of the same word in the parallel members of a verse. This repetition very seldom occurs in other writers (compare the examples collected by Kleinert, p. 239). Other writers usually employ synonymes in the parallel members of verses. It further belongs to the characteristics of Isaiah to employ words in extraordinary acceptations; for instance, זרע is used contemptuously for *brood;* אדם, for *rabble;* שרש, for *a shoot.* Isaiah also employs extraordinary constructions, and has the peculiar custom of explaining his figurative expressions by directly subjoining the prosaical equivalent. This custom has induced many interpreters to suppose that explanatory glosses have been inserted in Isaiah. Another peculiarity of Isaiah is that he intersperses his prophetic orations with hymns; that he seldom relates visions, strictly so-called, and seldom performs symbolic actions; and that he employs figurative expressions quite peculiar to himself, as, for example, *pasted-up eyes*, for spiritual darkness; *morning-red*, for approaching happiness; *the remnant of olive-trees, vineyards, and orchards*, for the remnant of the people which have been spared during the judgments of God; *rejected tendrils* or *branches*, for enemies which have been slain.

In addition to this we find an almost verbal harmony between entire passages; for instance, the Messianic description commencing xi. 6, compared with lxv. 25.

IV. *The origin of the present Collection, and its arrangement.*—No definite account respecting the method pursued in collecting into books the utterances of the Prophets has been handed down to us. Concerning Isaiah, as well as the rest, these accounts are wanting. We do not even know whether he collected his prophecies himself. But we have no decisive argument against this opinion. The argument of Kleinert, in his above-mentioned work (p. 112), is of slight importance. He says, If Isaiah himself had collected his prophecies, there would not be wanting some which are not to be found in the existing book. To this we

reply, that it can by no means be proved with any degree of probability that a single prophecy of Isaiah has been lost, the preservation of which would have been of importance to posterity, and which Isaiah himself would have deemed it necessary to preserve. Kleinert appeals to the fact, that there is no prophecy in our collection which can with certainty be ascribed to the days of Jotham; and he thinks it incredible that the prophet, soon after having been consecrated to his office, should have passed full sixteen years without any revelation from God. This, certainly, is unlikely; but it is by no means unlikely that during this time he uttered no prophecy which he thought proper to preserve. Nay, it appears very probable, if we compare the rather general character of chapters i.-v., the contents of which would apply to the days of Jotham also, since during his reign no considerable changes took place; consequently the prophetic utterances moved in the same sphere with those preserved to us from the reign of Uzziah. Hence it was natural that Isaiah should confine himself to the communication of some important prophetic addresses, which might as well represent the days of Jotham as those of the preceding reign. We must not too closely identify the utterances of the prophets with their writings. Many prophets have spoken much and written nothing. The minor prophets were generally content to write down the quintessence alone of their numerous utterances. Jeremiah likewise, of his numerous addresses under Josiah, gives us only what was most essential.

The critics who suppose that the present book of Isaiah was collected a considerable time after the death of the prophet, and perhaps after the exile, lay especial stress upon the assertion that the historical section in the 26th and following chapters was transcribed from 2 Kings xviii.-xx. This supposition, however, is perfectly unfounded.

According to Ewald (p. 39), the hand of a later compiler betrays itself in the headings. Ewald has not, however, adduced any argument sufficient to prove that Isaiah was not the author of these headings, the enigmatic character of which seems more to befit the author himself than a compiler. The only semblance of an argument is that the heading 'Oracle (better translated *burden*) concerning Damascus' (xvii. 1), does not agree with the prophecy that follows, which refers rather to Samaria. But we should consider that the headings of prophecies against foreign nations are always expressed as concisely as possible, and that it was incompatible with the usual brevity more fully to describe the subject of this prophecy. We should further consider that this prophecy refers to the connection of Damascus with Samaria, in which alliance Damascus was, according to chap. vii., the prevailing power, with which Ephraim stood and fell. If all this is taken into account, the above heading will be found to agree with the prophecy. According to the Talmudists, the book of Isaiah was collected by the men of Hezekiah. But this assertion rests merely upon Prov. xxv. 1, where the men of Hezekiah are said to have compiled the Proverbs. The Talmudists do not sufficiently distinguish between what might be and what is. They habitually state bare possibilities as historical facts.

To us it seems impossible that Isaiah left it to others to collect his prophecies into a volume, because we know that he was the author of historical works; and it is not likely that a man accustomed to literary occupation would have left to others to do what he could do much better himself.

Hitzig has of late recognised Isaiah as the collector and arranger of his own prophecies. But he supposes that a number of pieces were inserted at a later period. The chronological arrangement of these prophecies is a strong argument in favour of the opinion that Isaiah himself formed them into a volume. There is no deviation from this arrangement, except in a few instances where prophecies of similar contents are placed together; but there is no interruption which might appear attributable to either accident or ignorance. There is not a single piece in this collection which can satisfactorily be shown to belong to another place. All the portions, the date of which can be ascertained either by external or internal reasons, stand in the right place. This is generally granted with respect to the first twelve chapters, although many persons erroneously maintain that ch. vi. should stand at the beginning.

Chaps. i.-v. belong to the later years of Uzziah; chap. vi. to the year of his death. What follows next, up to chap. x. 4, belongs to the reign of Ahaz. Chaps. x.-xii. is the first portion appertaining to the reign of Hezekiah. Then follows a series of prophecies against foreign nations, in which, according to the opinions of many, the chronological arrangement has been departed from, and, instead of it, an arrangement according to contents has been adopted. But this is not the case. The predictions against foreign nations are also in their right chronological place. They all belong to the reign of Hezekiah, and are placed together because, according to their dates, they belong to the same period. In the days of Hezekiah the nations of Western Asia, dwelling on the banks of the Euphrates and Tigris, more and more resembled a threatening tempest. That the prophecies against foreign nations belong to this period is indicated by the home-prophecy in ch. xxii., which stands among the foreign prophecies. The assertion that the first twelve chapters are a collection of home-prophecies is likewise refuted by the fact that there occur in these chapters two foreign prophecies. The prophetic gift of Isaiah was more fully unfolded in sight of the Assyrian invasion under the reign of Hezekiah. Isaiah, in a series of visions, describes what Assyria would do, as a chastising rod in the hand of the Lord, and what the successors of the Assyrians, the Chaldees, would perform, according to the decree of God, in order to realise divine justice on earth, as well among Israel as among the heathen. The prophet shows that mercy is hidden behind the clouds of wrath. There is no argument to prove that the great prophetic picture in chaps. xxiv.-xxvii. was not depicted under Hezekiah. Chaps. xxviii.-xxxiii. manifestly belong to the same reign, but somewhat later than the time in which chaps. x., xi., and xii. were written. They were composed about the time when the result of the war against the Assyrians was decided. With the termination of this war terminated also the public life of Isaiah, who added an historical section in chaps. xxxvi.-xxxix., in order to facilitate the right understanding of the prophecies uttered by him during the most fertile period of his prophetic ministry. Then follows the conclusion

of his work on earth. The second part, which contains his prophetic legacy, is addressed to the small congregation of the faithful strictly so called. This part is analogous to the last speeches of Moses in the fields of Moab, and to the last speeches of Christ in the circle of his disciples, related by John. Thus we have everywhere order, and such an order as could scarcely have proceeded from any one but the author.

V. *Contents, Character, and Authority of the Book of Isaiah.*—It was not the vocation of the prophets to change anything in the religious constitution of Moses, which had been introduced by divine authority; and they were not called upon to substitute anything new in its place. They had only to point out the new covenant to be introduced by the Redeemer, and to prepare the minds of men for the reception of it. They themselves in all their doings were subject to the law of Moses. They were destined to be extraordinary ambassadors of God, whose reign in Israel was not a mere name, not a mere shadow of earthly royalty, but rather its substance and essence. They were to maintain the government of God, by punishing all, both high and low, who manifested contempt of the Lawgiver by offending against his laws. It was especially their vocation to counteract the very ancient delusion, according to which an external observance of rites was deemed sufficient to satisfy God. This opinion is contrary to many passages of the law itself, which admonish men to circumcise the heart, and describe the sum of the entire law to consist in loving God with the whole heart; which make salvation to depend upon being internally turned towards God, and which condemn not only the evil deed, but also the wicked desire. The law had, however, at the first assumed a form corresponding to the wants of the Israelites, and in accordance with the symbolical spirit of antiquity. But when this form, which was destined to be the living organ of the Spirit, was changed into a corpse by those who were themselves spiritually dead, it offered a point of coalescence for the error of those who contented themselves with external observances.

The prophets had also to oppose the delusion of those who looked upon the election of the people of God as a preservative against the divine judgments; who supposed that their descent from the patriarchs, with whom God had made a covenant, was an equivalent for the sanctification which they wanted. Even Moses had strongly opposed this delusion; for instance, in Lev. xxvi. and Deut. xxxii. David also, in the Psalms, as in xv. and xxiv., endeavours to counteract this error, which again and again sprang up. It was the vocation of the prophets to insist upon genuine piety, and to show that a true attachment to the Lord necessarily manifests itself by obedience to his precepts; that this obedience would lead to happiness, and disobedience to misfortune and distress. The prophets were appointed to comfort the faint-hearted, by announcing to them the succour of God, and to bring glad tidings to the faithful, in order to strengthen their fidelity. They were commissioned to invite the rebellious to return, by pointing out to them future salvation, and by teaching them that without conversion they could not be partakers of salvation; and in order that their admonitions and rebukes, their consolations and awakenings, might gain more attention, it was granted to them to behold futurity, and to foresee the blessings and judgments which would ultimately find their full accomplishment in the days of Messiah. The Hebrew appellation *nebiim* is by far more expressive than the Greek προφήτης, which denotes only a part of their office, and which has given rise to many misunderstandings. The word נביא (from the root נבא, which occurs in Arabic in the signification of *to inform, to explain, to speak*) means, according to the usual signification of the form קטיל, a person into whom God has spoken; that is, a person who communicates to the people what God has given to him. The Hebrew word indicates divine inspiration. What is most essential in the prophets is their speaking ἐν πνεύματι; consequently they were as much in their vocation when they rebuked and admonished as when they predicted future events. The correctness of our explanation may be seen in the definition contained in Deut. xviii. 18, where the Lord says, 'I will raise them up a prophet from among their brethren like unto thee, and will put my words in his mouth; and he shall speak unto them all that I shall command him.'

The prophet here mentioned is an ideal person. It is prophetism itself personified. It is a characteristic mark that God gives his word into the mouth of the prophet, by means of which he is placed on an equality with the priest, who is likewise a bearer of the word of God. The prophet is at the same time distinguished from the priest, who receives the word of God from the Scriptures, while the prophet receives it without an intervening medium. The internal communications of God to the prophets are given to them only as being messengers to his people. By this circumstance the prophets are distinguished from mystics and theosophers, who lay claim to divine communications especially for themselves. Prophetism has an entirely practical and truly ecclesiastical character, remote from all idle contemplativeness, all fantastic trances, and all anchoretism.

In this description of the prophetical calling there is also contained a statement of the contents of the prophecies of Isaiah. He refers expressly in many places to the basis of the ancient covenant, that is, to the law of Moses; for instance, in viii. 16, 20, and xxx. 9, 10. In many other passages his utterance rests on the same basis, although he does not expressly state it. All his utterances are interwoven with references to the law. It is of importance to examine at least one chapter closely, in order to understand how prophecies are related to the law. Let us take as an example the first. The beginning 'Hear, O heavens, and give ear O earth,' is taken from Deut. xxxii. Thus the prophet points out that his prophecies are a commentary upon the Magna Charta of prophetism contained in the books of Moses. During the prosperous condition of the state under Uzziah and Jotham, luxury and immorality had sprung up. The impiety of Ahaz had exercised the worst influence upon the whole people. Great part of the nation had forsaken the religion of their fathers and embraced gross idolatry; and a great number of those who worshipped God externally had forsaken Him in their hearts. The divine judgments were approaching. The rising power of Assyria was appointed to be the instrument of divine justice.

Among the people of God internal demoralisation was always the forerunner of outward calamity. This position of affairs demanded an energetic intervention of prophetism. Without prophetism the ἐκλογή, the number of the elect, would have been constantly decreasing, and even the judgments of the Lord, if prophetism had not furnished their interpretation, would have been mere facts, which would have missed their aim, and, in many instances, might have had an effect opposite to that which was intended, because punishment which is not recognised to be punishment, necessarily leads away from God. The prophet attacks the distress of his nation, not at the surface, but at the root, by rebuking the prevailing corruption. Pride and arrogance appear to him to be the chief roots of all sins.

He inculcates again and again not to rely upon the creature, but upon the Creator, from whom all temporal and spiritual help proceeds; that in order to attain salvation, we should despair of our own and all human power, and rely upon God. He opposes those who expected help through foreign alliances with powerful neighbouring nations against foreign enemies of the state.

The people of God have only one enemy, and one ally, that is, God. It is foolish to seek for aid on earth against the power of heaven, and to fear man if God is our friend. The panacea against all distress and danger is true conversion. The politics of the prophets consist only in pointing out this remedy. The prophet connects with his rebuke and with his admonition, his threatenings of divine judgment upon the stiff-necked. These judgments are to be executed by the invasion of the Syrians, the oppression of the Assyrians, the Babylonian exile, and by the great final separation in the times of the Messiah. The idea which is the basis of all these threatenings, is pronounced even in the Pentateuch (Lev. x. 3), 'I will be sanctified in them that come nigh me, and before all the people I will be glorified;' and also in the words of Amos (iii. 2), 'You only have I known of all the families of the earth; therefore I will punish you for all your iniquities.' That is, if the people do not voluntarily glorify God, He glorifies Himself against them. Partly in order to recal the rebellions to obedience, partly to comfort the faithful, the prophet opens a prospect of those blessings which the faithful portion of the covenant-people shall inherit. In almost all prophetic utterances, we find in regular succession three elements—rebuke, threatening, and promise. The prophecies concerning the destruction of powerful neighbouring states, partly belong, as we have shown, to the promises, because they are intended to prevent despair, which, as well as false security, is a most dangerous hindrance to conversion.

In the direct promises of deliverance the purpose to comfort is still more evident. This deliverance refers either to burdens which pressed upon the people in the days of the prophet, or to burdens to come, which were already announced by the prophet; such, for instance, were the oppressions of the Syrians, the Assyrians, and finally, of the Chaldæans.

The proclamation of the Messiah is the inexhaustible source of consolation among the prophets. In Isaiah this consolation is so clear that some fathers of the church were inclined to style him rather *evangelist* than *prophet*. Ewald pointedly describes (p. 169) the human basis of Messianic expectations in general, and of those of Isaiah in particular:—'He who experienced in his own royal soul what infinite power could be granted to an individual spirit in order to influence and animate many, he who daily observed in Jerusalem the external vestiges of a spirit like that of David, could not imagine that the future new congregation of the Lord should originate from a mind belonging to another race than that of David, and that it should be maintained and supported by any other ruler than a divine ruler. Indeed every spiritual revival must proceed from the clearness and firmness of an elevated mind; and this especially applies to that most sublime revival for which ancient Israel longed and strove. This longing attained to clearness, and was preserved from losing itself in indefiniteness, by the certainty that such an elevated mind was to be expected.'

Isaiah, however, was not the first who attained to a knowledge of the personality of Messiah. Isaiah's vocation was to render the knowledge of this personality clearer and more definite, and to render it more efficacious upon the souls of the elect by giving it a greater individuality. The person of the Redeemer is mentioned even in Gen. xlix. 10, 'The sceptre shall not depart from Judah, nor a lawgiver from between his feet, until Shiloh (*the tranquilliser*) come; and unto Him shall the gathering of the people be' (i. e. *Him shall the nations obey*). The personality of Messiah occurs also in several psalms which were written before the times of Isaiah; for instance, in the 2nd and 110th, by David; in the 45th, by the sons of Korah; in the 72nd, by Solomon. Isaiah has especially developed the perception of the prophetic and the priestly office of the Redeemer, while in the earlier announciations of the Messiah the royal office is more prominent; although in Psalm cx. the priestly office also is pointed out. Of the two states of Christ, Isaiah has expressly described that of the exinanition of the suffering Christ, while, before him, his state of glory was made more prominent. In the Psalms the inseparable connection between justice and suffering, from which the doctrine of a suffering Messiah necessarily results, is not expressly applied to the Messiah. We must not say that Isaiah first perceived that the Messiah was to suffer, but we must grant that this knowledge was in him more vivid than in any earlier writer; and that this knowledge was first shown by Isaiah to be an integral portion of Old Testament doctrine.

The following are the outlines of Messianic prophecies in the book of Isaiah:—A scion of David, springing from his family, after it has fallen into a very low estate, but being also of divine nature, shall, at first in lowliness, but as a prophet filled with the spirit of God, proclaim the divine doctrine, develope the law in truth, and render it the animating principle of national life; he shall, as high priest, by his vicarious suffering and his death, remove the guilt of his nation, and that of other nations, and finally rule as a mighty king, not only over the covenant people, but over all nations of the earth who will subject themselves to his peaceful

sceptre, not by violent compulsion, but induced by love and gratitude. He will make both the moral and the physical consequences of sin to cease; the whole earth shall be filled with the knowledge of the Lord, and all enmity, hatred, and destruction shall be removed even from the brute creation. This is the survey of the Messianic preaching by Isaiah, of which he constantly renders prominent those portions which were most calculated to impress the people under the then existing circumstances. The first part of Isaiah is directed to the whole people, consequently the glory of the Messiah is here dwelt upon. The fear lest the kingdom of God should be overwhelmed by the power of heathen nations, is removed by pointing out the glorious king to come, who would elevate the now despised and apparently mean kingdom of God above all the kingdoms of this world. In the second part, which is more particularly addressed to the ἐκλογή, *the elect*, than to the whole nation, the prophet exhibits the Messiah more as a divine teacher and high-priest. The prophet here preaches righteousness through the blood of the servant of God, who will support the weakness of sinners and take upon Himself their sorrows.

We may show, by an example in chap. xix. 18-25, that the views of futurity which were granted to Isaiah were great and comprehensive, and that the Spirit of God raised him above all narrow-minded nationality. It is there stated that a time should come when all the heathen, subdued by the judgments of the Lord, should be converted to him, and being placed on an equality with Israel, with equal laws, would equally partake of the kingdom of God, and form a brotherly alliance for his worship. Not the whole mass of Israel is destined, according to Isaiah, to future salvation, but only the small number of the converted. This truth he enounces most definitely in the sketch of his prophecies contained in chapter vi.

Isaiah describes with equal vivacity the divine justice which punishes the sins of the nation with inexorable severity. Holy, holy, holy, is the Lord of Sabaoth, is the key-note of his prophecies. He describes also the divine mercy and covenant-fidelity, by which there is always preserved a remnant among the people: to them punishment itself is a means of salvation, so that life everywhere proceeds from death, and the congregation itself is led to full victory and glory.

Isaiah saw the moral and religious degradation of his people, and also its external distress, both then present and to come (chap. vi.). But this did not break his courage; he confidently expected a better futurity, and raised himself in God above all that is visible. Isaiah is not afraid when the whole nation and its king tremble. Of this we see a remarkable instance in chapter vii., and another in the time of the Assyrian invasion under Hezekiah, during which the courage of his faith rendered him the saviour of the commonwealth, and the originator of that great religious revival which followed the preservation of the state. The faith of the king and of the people was roused by that of Isaiah.

Isaiah stands pre-eminent above all other prophets, as well in the contents and spirit of his predictions, as also in their form and style. Simplicity, clearness, sublimity, and freshness, are the never-failing characters of his prophecies. Even Eichhorn mentions, among the first merits of Isaiah, the concinnity of his expressions, the beautiful outline of his images, and the fine execution of his speeches. In reference to richness of imagery he stands between Jeremiah and Ezekiel. Symbolic actions, which frequently occur in Jeremiah and Ezekiel, seldom occur in Isaiah. The same is the case with visions, strictly so called, of which there is only one, namely, that in chapter vi.; and even it is distinguished by its simplicity and clearness above that of the later prophets. But one characteristic of Isaiah is, that he likes to give signs—that is, a fact then present, or near at hand—as a pledge for the more distant futurity; and that he thus supports the feebleness of man (comp. vii. 20; xxxvii. 30; xxxviii. 7, sqq.). The instances in chapters vii. and xxxviii. show how much he was convinced of his vocation, and in what intimacy he lived with the Lord, by whose assistance alone he could effect what he offers to do in the one passage, and what he grants in the other. The spiritual riches of the prophet are seen in the variety of his style, which always befits the subject. When he rebukes and threatens, it is like a storm, and, when he comforts, his language is as tender and mild as (to use his own words) that of a mother comforting her son. With regard to style, Isaiah is comprehensive, and the other prophets divide his riches.

Isaiah enjoyed an authority proportionate to his gifts. We learn from history how great this authority was during his life, especially under the reign of Hezekiah. Several of his most definite prophecies were fulfilled while he was yet alive; for instance, the overthrow of the kingdoms of Syria and Israel; the invasion of the Assyrians, and the divine deliverance from it; the prolongation of life granted to Hezekiah; and several predictions against foreign nations. Isaiah is honourably mentioned in the historical books. The later prophets, especially Nahum, Habakkuk, Zephaniah, Jeremiah, Haggai, Zechariah, and Malachi, clearly prove that his book was diligently read, and that his prophecies were attentively studied.

The authority of the prophet greatly increased after the fulfilment of his prophecies by the Babylonian exile, the victories of Cyrus, and the deliverance of the covenant-people. Even Cyrus (according to the above-mentioned account in Josephus, *Antiq.* xi. 1. § 1, 2) was induced to set the Jews at liberty by the prophecies of Isaiah concerning himself. This prediction of Isaiah made so deep an impression upon him that he probably took from it the name by which he is generally known in history. Jesus Sirach (xlviii. 22-25) bestows splendid praise upon Isaiah, and both Philo and Josephus speak of him with great veneration. He attained the highest degree of authority after the times of the New Testament had proved the most important part of his prophecies, namely, the Messianic, to be divine. Christ and the apostles quote no prophecies so frequently as those of Isaiah, in order to prove that He who had appeared was one and the same with Him who had been promised. The fathers of the church abound in praises of Isaiah.—E. W. H.

ISHBI, or ISHBI-BENOB. [GIANTS.]

ISH-BOSHETH (אִישׁ בֹּשֶׁת, *man of shame*; Sept. Ἰεβοσθέ), a son of king Saul, and the only one who survived him. In 1 Chron. viii. 33, and ix. 39, this name is given as אִישְׁבַעַל *Eshbaal*. Baal was the name of an idol, accounted abominable by the Hebrews, and which scrupulous persons avoided pronouncing, using the word *bosheth*, 'shame' or 'vanity,' instead. This explains why the name Eshbaal is substituted for Ish-bosheth, Jerubbaal for Jerubbesheth (comp. Judg. viii. 35 with 2 Sam. xi. 21), and Merib-baal for Mephibosheth (comp. 2 Sam. iv. 4 with 1 Chron. viii. 34 and ix. 40). Ish-bosheth was not present in the disastrous battle at Gilboa, in which his father and brothers perished; and, too feeble of himself to seize the sceptre which had fallen from the hands of Saul, he owed the crown entirely to his uncle Abner, who conducted him to Mahanaim, beyond the Jordan, where he was recognised as king by ten of the twelve tribes. He reigned seven, or, as some will have it, two years—if a power so uncertain as his can be called a reign. Even the semblance of authority which he possessed he owed to the will and influence of Abner, who himself kept the real substance in his own hands. A sharp quarrel between them led at last to the ruin of Ish-bosheth. Although accustomed to tremble before Abner, even his meek temper was roused to resentment by the discovery that Abner had invaded the haram of his late father Saul, which was in a peculiar manner sacred under his care as a son and a king. By this act Abner exposed the king to public contempt; if it did not indeed leave himself open to the suspicion of intending to advance a claim to the crown on his own behalf. Abner highly resented the rebuke of Ish-bosheth, and from that time contemplated uniting all the tribes under the sceptre of David. Ish-bosheth, however, reverted to his ordinary timidity of character. At the first demand of David, he restored to him his sister Michal, who had been given in marriage to the son of Jesse by Saul, and had afterwards been taken from him and bestowed upon another. It is, perhaps, right to attribute this act to his weakness; although, as David allows that he was a righteous man, it may have been owing to his sense of justice. On the death of Abner Ish-bosheth lost all heart and hope, and perished miserably, being murdered in his own palace, while he took his mid-day sleep, by two of his officers, Baanah and Rechab. They sped with his head to David, expecting a great reward for their deed; but the monarch—as both right feeling and good policy required—testified the utmost horror and concern. He slew the murderers, and placed the head of Ish-bosheth with due respect in the sepulchre of Abner: B.C. 1048 (2 Sam. ii. 8-11; iii. 6-39; iv.). There is a serious difficulty in the chronology of this reign. In 2 Sam. ii. 10 Ish-bosheth is said to have reigned two years; which some understand as the whole amount of his reign. And as David reigned seven and a half years over Judah before he became king of all Israel upon the death of Ish-bosheth, it is conceived by the Jewish chronologer (*Seder Olam Rabba*, p. 37), as well as by Kimchi and others, that there was a vacancy of five years in the throne of Israel. It is not, however, agreed by those who entertain this opinion, whether this vacancy took place before or after the reign of Ish-bosheth. Some think it was before, it being then a matter of dispute whether he or Mephibosheth, the son of Jonathan, should be made king; but others hold that after his death five years elapsed before David was generally recognised as king of all Israel. If the reign of Ish-bosheth be limited to two years, the latter is doubtless the best way of accounting for the other five, since no ground of delay in the accession of Ish-bosheth is suggested in Scripture itself; for the claim of Mephibosheth, the son of Jonathan, which some have produced, being that of a lame boy five years old, whose father never reigned, against a king's son forty years of age, would have been deemed of little weight in Israel. Besides, our notions of Abner do not allow us to suppose that under him the question of the succession could have remained five years in abeyance. But it is the more usual, and perhaps the better course, to settle this question by supposing that the reigns of David over Judah, and of Ish-bosheth over Israel, were nearly contemporaneous, and that the two years are mentioned as those from which to date the commencement of the ensuing events—namely, the wars between the house of Saul and that of David.

1. ISHMAEL (יִשְׁמָעֵאל, *God hears*, Sept.; Ἰσμαήλ), Abraham's eldest son, born to him by Hagar; the circumstances of whose birth, early history, and final expulsion from his father's tents, are related in the articles Abraham, Hagar [See also Isaac, Inheritance]. He afterwards made the desert into which he had been cast his abode, and by attaching himself to, and acquiring influence over, the native tribes, rose to great authority and influence. It would seem to have been the original intention of his mother to have returned to Egypt, to which country she belonged; but this being prevented, she was content to obtain for her son wives from thence. Although their lots were cast apart, it does not appear that any serious alienation existed between Ishmael and Isaac; for we read that they both joined in the sepulchral rites of their father Abraham (Gen. xxv. 9). This fact has not been noticed as it deserves. It is full of suggestive matter. As funerals in the East take place almost immediately after death, it is evident that Ishmael must have been called from the desert to the death-bed of his father; which implies that relations of kindness and respect had been kept up, although the brevity of the sacred narrative prevents any special notice of this circumstance. Ishmael had, probably, long before received an endowment from his father's property, similar to that which had been bestowed upon the sons of Keturah (Gen. xxv. 6). Nothing more is recorded of him than that he died at the age of 137 years, and was the father of twelve sons, who gave their names to as many tribes (Gen. xvii. 20; xxvii. 9). He had also two daughters, one of whom became the wife of Esau.

It has been shown, in the article Arabia, that Ishmael has no claim to the honour, which is usually assigned to him, of being the founder of the Arabian nation. That nation existed before he was born. He merely joined it, and adopted its habits of life and character; and the tribes

which sprung from him formed eventually an important section of the tribes of which it was composed. The celebrated prophecy which describes the habits of life which he, and in him his descendants, would follow, is, therefore, to be regarded not as describing habits which he would first establish, but such as he would adopt. The description is contained in the address of the angel to Hagar, when, before the birth of Ishmael, she fled from the tents of Abraham:—'Behold, thou art with child, and shalt bear a son, and shalt call his name Ishmael *(God hears)*, because the Lord hath heard thine affliction. And he shall be a wild man: his hand shall be against every man, and every man's hand against him, and he shall dwell in the presence of all his brethren' (Gen. xvi. 11, 12). This means, in short, that he and his descendants should lead the life of the Bedouins of the Arabian deserts; and how graphically this description portrays their habits, may be seen in the article ARABIA, in the notes on these verses in the 'Pictorial Bible,' and in the works of Niebuhr, Burckhardt, Lane, &c.; and, more particularly, in the Arabian romance of Antar, which presents the most perfect picture of real Bedouin manners now in existence. The last clause, 'He shall dwell in the presence of all his brethren,' is pointedly alluded to in the brief notice of his death, which states that 'he died in the presence of all his brethren' (Gen. xxv. 18). Of this expression various explanations have been given, but the plainest is the most probable: which is, that Ishmael and the tribes springing from him should always be located near the kindred tribes descended from Abraham. And this was a promise of benefit in that age of migration, when Abraham himself had come from beyond the Euphrates, and was a stranger and sojourner in the land of Canaan. There was thus, in fact, a relation of some importance between this promise and the promise of the heritage of Canaan to another branch of Abraham's offspring. It had seemingly some such force as this—The heritage of Canaan is, indeed, destined for another son of Abraham; but still the lot of Ishmael, and of those that spring from him, shall never be cast far apart from that of his brethren. This view is confirmed by the circumstance, that the Israelites did, in fact, occupy the country bordering on that in which the various tribes descended from Abraham or Terah had settled—the Israelites, Edomites, Midianites, Moabites, Ammonites, &c. Most interpreters find in this passage, a promise that the descendants of Ishmael should never be subdued. But we are unable to discover this in the text; and, moreover, such has not been the fact, whether we regard the Ishmaelites apart from the other Arabians, or consider the promise made to Ishmael as applicable to the whole Arabian family. The Arabian tribes are in a state of subjection at this moment; and the great Wahabee confederacy among them, which not many years ago filled Western Asia with alarm, is now no longer heard of.

2. ISHMAEL, a prince of the royal line of Judah, who found refuge among the Ammonites from the ruin which involved his family and nation. After the Chaldæans had departed he returned, and treacherously slew the too-confiding Gedaliah, who had been made governor of the miserable remnant left in the land [GEDALIAH]. Much more slaughter followed this, and Ishmael, with many people of consideration as captives, hastened to return to the Ammonites. But he was overtaken near the pool of Gibeon by Johanan, a friend of Gedaliah, and was compelled to abandon his prey and escape for his life, with only eight attendants, to Baalis, king of the Ammonites, with whom he appears to have had a secret understanding in these transactions: B.C. 588 (Jer. xli.).

ISLE, ISLAND (אִי; Sept. *νῆσος*, Vulg. *insula*). The Hebrew word is invariably translated, either by the former or by the latter of these English words, which, having the same meaning, will be considered as one. It occurs in the three following senses. First, that of dry land in opposition to water; as 'I will make the rivers islands' (Isa. xlii. 15). In Isa. xx. 6, the Isle of Ashdod means the country, and is so rendered in the margin. In Isa. xxiii. 2, 6, 'the isle' means the country of Tyre, and in Ezek. xxvii. 6, 7, that of Chittim and Elisha. (See also Job xxii. 30). Secondly; it is used both in Hebrew and English, according to its geographical meaning, for a country surrounded by water, as in Jer. xlvii. 4, 'the isle (margin) of Caphtor,' which is probably that of Cyprus. 'The isles of the sea' (Esth. x. 1) are evidently put in opposition to 'the land,' or continent. In Ps. xcvii. 1, 'the multitude of the isles' seem distinguished from the earth or continents, and are evidently added to complete the description of the whole world. Thirdly; the word is used by the Hebrews to designate all those countries divided from them by the sea. In Isa. xi. 11, after an enumeration of countries lying on their own continent, the words, 'and the islands of the sea,' are added in order to comprehend those situate beyond the ocean. The following are additional instances of this usage of the word, which is of very frequent occurrence (Isa. xlii. 10; lix. 18; lxvi. 19; Jer. xxv. 22; Ezek. xxvii. 3, 15; Zeph. ii. 11). It is observed by Sir I. Newton (*on Daniel*, p. 276), 'By the earth the Jews understood the great continent of all Asia and Africa, to which they had access by land; and by the isles of the sea they understood the places to which they sailed by sea, particularly all Europe.'—J. F. D.

ISRAEL (יִשְׂרָאֵל; Sept. Ἰσραήλ) is the sacred and divinely bestowed name of the patriarch Jacob, and is explained to mean, 'A prince with God,' from שָׂרָה, *principatum tenuit*. Winer (*Heb. Lexicon*) interprets it *pugnator Dei*, from another meaning of the same root. Although, as applied to Jacob personally, it is an honourable or poetical appellation, it is the common prose name of his descendants; while, on the contrary, the title Jacob is given to them only in poetry. In the latter division of Isaiah (after the 39th chapter), many instances occur of the two names used side by side, to subserve the parallelism of Hebrew poetry, as in ch. xl. 27; xli. 8, 14, 20, 21; xlii. 24; xliii. 1, 22, 28, &c.; so, indeed, in xiv. 1. The modern Jews, at least in the East, are fond of being named *Israĕli* in preference to *Yahûdi*, as more honourable.

The separation of the Hebrew nation into two parts, of which one was to embrace ten of the tribes, and be distinctively named Israel, had its origin in the early power and ambition of the tribe of Ephraim. The rivalry of Ephraim and Judah began almost from the first conquest of the land; nor is it unsignificant, that as Caleb belonged to the tribe of Judah, so did Joshua to that of Ephraim. From the very beginning Judah learned to act by itself; but the central position of Ephraim, with its fruitful and ample soil, and the long-continued authority of Joshua, must have taught most of the tribes west of the Jordan to look up to Ephraim as their head; and a still more important superiority was conferred on the same tribe by the fixed dwelling of the ark at Shiloh for so many generations (Josh. xviii. &c.). Judah could boast of Hebron, Macpelah, Bethlehem, names of traditional sanctity; yet so could Ephraim point to Shechem, the ancient abode of Jacob; and while Judah, being on the frontier, was more exposed to the attack of the powerful Philistines, Ephraim had to fear only those Canaanites from within who were not subdued or conciliated. The haughty behaviour of the Ephraimites towards Gideon, a man of Manasseh (Judg. viii. 1), sufficiently indicates the pretensions they made. Still fiercer language towards Jephthah the Gileadite (Jud. xii. 1) was retorted by less gentleness than Gideon had shown; and a bloody civil war was the result, in which their pride met with a severe punishment. This may in part explain their quiet submission, not only to the priestly rule of Eli and his sons, who had their centre of authority at Shiloh, but to Samuel, whose administration issued from three towns of Benjamin. Of course his prophetical character and personal excellence eminently contributed to this result; and it may seem that Ephraim, as well as all Israel besides, became habituated to the predominance of Benjamin, so that no serious resistance was made to the supremacy of Saul. At his death a new schism took place through their jealousy of Judah; yet, in a few years' time, by the splendour of David's victories, and afterwards by Solomon's peaceful power, a permanent national union might seem to have been effected. But the laws of inheritance in Israel, excellent as they were for preventing permanent alienation of landed property, and the degradation of the Hebrew poor into prædial slaves, necessarily impeded the perfect fusion of the tribes, by discouraging intermarriage, and hindering the union of distant estates in the same hands. Hence, when the sway of Solomon began to be felt as a tyranny, the old jealousies of the tribes revived, and Jeroboam, an Ephraimite (1 Kings xi. 26), being suspected of treason, fled to Shishak, king of Egypt. The death of Solomon was followed by a defection of ten of the tribes, which established the separation of *Israel* from *Judah* (B.C. 975).

This was the most important event which had befallen the Hebrew nation since their conquest of Canaan. The chief territory and population were now with Jeroboam, but the religious sanction, the legitimate descent, lay with the rival monarch. From the political danger of allowing the ten tribes to go up to the sanctuary of Jerusalem, the princes of *Israel*, as it were in self-defence, set up a sanctuary of their own; and the intimacy of Jeroboam with the king of Egypt may have determined his preference for the form of idolatry (the calves) which he established at Dan and Bethel. In whatever else his successors differed, they one and all agreed in upholding this worship, which, once established, appeared essential to their national unity. Nevertheless it is generally understood to have been a worship of Jehovah, though under unlawful and degrading forms. Worse by far was the worship of Baal, which came in under one monarch only, Ahab, and was destroyed after his son was slain, by Jehu. A secondary result of the revolution was the ejection of the tribe of Levi from their lands and cities in Israel; at least, such as remained were spiritually degraded by the compliances required, and could no longer offer any resistance to the kingly power by aid of their sacred character. When the priestly tribe had thus lost independence, it lost also the power to assist the crown. The succession of Jeroboam's family was hallowed by no religious blessing; and when his son was murdered, no Jehoiada was found to rally his supporters and ultimately avenge his cause. The example of successful usurpation was so often followed by the captains of the armies, that the kings in Israel present to us an irregular series of dynasties, with several short and tumultuous reigns. This was one cause of disorder and weakness to Israel, and hindered it from swallowing up Judah: another was found in the relations of Israel towards foreign powers, which will presently be dwelt upon.

We must first attend to the chronology; in discussing which Israel and Judah must be taken together. It lies on the face of the narrative that the years of reign assigned are generally only broken years: thus Nadab is said to have come to the throne in the second and to have been slain in the third year of Asa, and yet to have reigned *two* years (1 Kings xv. 25, 28); consequently every reign is liable to a deduction not exceeding eleven months. Instances will also appear in which reigns are *under*rated by a fraction of a year: it is doubtful whether this is another sort of phraseology, or is an error properly so called. Some have further maintained (as Mr. Greswell) that the reigns of kings were counted, at least occasionally, from the beginning of the Jewish year. To illustrate the effect of this: suppose a king of England to come to the throne in September, an event which happened in the following March might be assigned to the *second* year of his reign, though he would not have completed even a single year. The great objections to applying this principle are, 1. that we have no proof that it was actually used; 2. that it introduces great vagueness, since we do not once know at what *season* of the year any king began his reign; 3. that it solves none of the greater difficulties encountered, and that it is not worth while appealing to it for the smaller ones. Even if applied, the total effect of it on the chronology is almost inappreciable, for the limits of possible error remain perhaps exactly as without it. The once favourite system, of imagining a king to rule conjointly with his father, when it is not intimated in the Scripture, is now deservedly exploded by all the ablest chronologers.

The following table contains the materials for chronology furnished in the Scriptures:—

Accession of a king of Judah.	Years of Reign.	Year of preceding king of Israel.
Rehoboam	*17	—
Abijah	3	18th
Asa	41	20th
Jehoshaphat	*25	4th
Jehoram	8	5th
Ahaziah	1	12th
[Queen Athaliah]	7	—
Jehoash	40	7th
Amaziah	29	2nd
Uzziah	*52	†27th
Jotham	16	2nd
Ahaz	16	17th
Hezekiah	29	*3rd

Accession of a king of Israel.	Years of Reign.	Year of preceding king of Judah.
Jeroboam	22	—
Nadab	2	2nd
Baasha	24	3rd
Elah	2	26th
Zimri	7 days	27th
Omri	12	*(31st)
Ahab	*22	38th
Ahaziah	2	17th
Jehoram	12	18th
Jehu	*28	—
Jehoahaz	17	23rd
Jehoash	16	*37th
Jeroboam II.	†41	15th
Zachariah	½	38th
Shallum	1/12	39th
Menahem	*10	39th
Pekahiah	2	50th
Pekah	†20	52nd
Hoshea	9	12th
Samaria taken	—	6th

Some of these data are inconsistent with others, and it is important to decide *which* of them need correction. Of course (other things being equal), those changes are to be preferred which least disturb the system as a whole. But it is well to distinguish between the numbers marked with an *asterisk* (*) and those to which an *obelus* (†) is added. The former are wrong only by a unit or two, and therefore perhaps can be resolved by interpretation: the latter are quite untenable. These must be separately remarked upon.

I.—1. Rehoboam is said to have reigned 17 years; yet Abijah succeeded him in the 18th year of Jeroboam. We must then explain 17 to mean 17 and a fraction, which is contrary to the usual Hebrew method. 2. Ahab seems to have reigned less than 21 years, since Jehoshaphat succeeded in his 4th year, and Ahaziah followed in Jehoshaphat's 17th year. It is better to alter 22 to 21 than 4th to 5th, or 17th to 18th; for if 4th were changed to 5th, Asa's reign would become (more than) 42, not 41 years: if 17th were made 18th, the accession of Jehoram in the 18th year must be further disturbed. 3. The length of Jehoshaphat's reign involves a difficulty at first sight: since Jehoram of Israel came to the throne in his 18th year, and in Jehoram's 5th the other Jehoram followed, Jehoshaphat appears to have reigned *less* than 18 + 5 years. It is true that his son was installed in power during his life (2 Kings xviii. 16); but in the opinion of Mr. Clinton and others the son's reign could not be reckoned from that event, but from the father's death. If this be true, 25 must be altered to 23 or 22, as by far the simplest remedy. Nevertheless Mr. Clinton's opinion is here by no means self-evident. If Jehoram received not merely actual power, as Jotham did, who was regent for his father (2 Kings xv. 5), but a ceremonial installation, it is credible that his reign should have been dated from this event, although Jehoshaphat's reign would still be estimated from its commencement to his death. We may then neglect the 25 as insignificant to the chronology, regarding Jehoram in any case to have commenced his reign in the 22nd or 23rd of his father. [After these remarks a very simple process determines that from Jeroboam to Jehu includes *more* than 88 and less than 92 years. Thus—

	Years.	Mnths.		Years.	Mnths.
Jeroboam	0	0		0	0
Abijah	18	1	or	18	0
Asa	20	2	„	20	11
Jehoshaphat	60	3	„	61	10
Jehoram of Israel	77	4	„	79	9
Jehu	88	5	„	91	8

Hence no decisive result is attainable from the data.]

But further: 4. Jehu's reign exceeded 28 years, since Jehoash succeeded in his 7th year, and Jehoahaz in Jehoash's 23rd. We must interpret 28 to mean 28 and a fraction, as in Rehoboam's case. 5. Jehoash of Judah reigned *less* than 39 full years if his namesake of Israel began to reign in his 37th year, and in the 2nd year of

the latter Amaziah succeeded. The Sept. has 39 instead of 37 'in some copies,' says Mr. Clinton (the Vatican Sept. agrees with the received text, and so does Josephus); and though this is probably a mere correction, it seems to be right, since it is requisite to make good the 17 years of reign for Jehoahaz. 6. Uzziah reigned *more than* 52 full years, since Pekah came to the throne in his 52nd and Jotham in Pekah's 2nd year. Once more, then, 52 means 52 and a fraction. 7. Menahem, for a like reason, reigned not 10 years current, but 10 years and some months, since he succeeded in Uzziah's 39th, and Pekahiah followed in Uzziah's 50th. In all the cases where a whole number is thus used with the omission of a fraction, a cautious chronologer ought perhaps to add days less than a month, if that is enough to satisfy the other conditions. 8. Ahaz reigned not 16 years current, but less than 15 full years, if Hoshea succeeded in his 12th and Hezekiah in Hoshea's 3rd year; but which of the three numbers concerned is to be regarded as faulty is extremely doubtful. Winer and Clinton both make Hezekiah ascend the throne in the *fourth* year of Hoshea; but it would serve equally well to alter '12th of Ahaz' into 13th or 14th.

II.—Some greater deviations must now be noticed. 1. The accession of Omri is placed in the 31st year of Asa; but this must clearly be reckoned from his residence *in Samaria* (1 Kings xvi. 23). Even this is inconsistent with the statement that he reigned '*six* years in Tirzah;' for in the 31st of Asa *five* full years were not completed. 2. A great error, and not a mere numerical one, is found in 2 Kings i. 17, which makes Jehoram king of Israel come to the throne in the second year of his namesake of Judah, whom he really preceded by four full years (viii. 16). 3. Uzziah cannot have succeeded in the 27th year of Jeroboam II., otherwise his father's reign would be more than $14 + 26$ years. The number 27 is variously corrected to 14, 16, and 17. 4. The 41 years' reign of Jeroboam II. cannot be correct. Interpreters in general choose to imagine an interregnum of 11 years between Jeroboam and his son, which is contrary to the plain meaning of the text, and intrinsically improbable after an eminently prosperous reign. A well-known and able writer even dilates on the '11 years of anarchy and civil strife' as a proved fact of great moment in the history! But to invent facts of this sort in deference to a mere number, where so many numbers are not trustworthy, and with violence to the narrative, is highly objectionable. 5. Similar remarks apply to the interregnum invented after the death of Pekah. Of his murderer it is written (2 Kings xv. 30), 'he slew him and reigned in his stead;' which certainly does not hint at an anarchy of nine years between. If Hoshea could not immediately force himself into the vacant throne, he was not likely to survive his daring deed for so many years, and then effect his purpose. The *date*, however, in that verse is quite untenable. It places the murder in the 20th year of Jotham; but Jotham reigned only 16 years, and Pekah survived him (xvi. 5). The date in another text (xv. 27), which assigns to Pekah 20 years of reign, must also be rejected, in preference to tampering with the historical facts.

Counting downwards from Jehoash of Israel, and representing fractional parts of years by Greek letters:—

Jehoash of Israel	0
Amaziah	$1 + \alpha$
Jeroboam	$15 + \alpha + \beta$
Uzziah	$29 + \alpha + \gamma$
Zachariah	$66 + \alpha + \gamma + \delta$

It is hence easy to see that Jeroboam reigned more than 50 full years, and certainly less than 52: it is probable then that the 41 years assigned to him ought to be 51. Assuming this, it will follow that Uzziah followed Jeroboam by less than 14 full years; so that 'the 27th,' in 2 Kings xv. 1, will need to be corrected 'the 14th.' It cannot be made greater than 15th, consistently with the other date, even if Jeroboam's reign be prolonged into a 52nd or 53rd year, by throwing it as early as possible, and that of Zachariah as late as possible.

Pekah will have reigned more than 27 and less than 29 full years, if we correct the date of Hezekiah's accession, with Winer and Clinton, as above noticed. If, on the contrary, we alter the accession of Hoshea to the 13th or 14th year of Ahaz, Pekah's reign exceeds 28, but is less than 31 years. If we suppose 30 more likely to have been corrupted into 20, than 28 or 29, we may choose this alternative.

So much being premised, it readily appears that from Jehu to Uzziah is more than 73 years, and less than 76; thus:—

	Years.	Mnths.		Years.	Mnths.
Jehu	0	0		0	0
Jehoash	6	1	or	6	11
Amaziah	45	2	„	46	10
Uzziah	73	3	„	75	9

and that from Uzziah to the capture of Samaria is more than 88, and less than 91 years:—

	Years.	Mnths.		Years.	Mnths.
Uzziah	0	0		0	0
Jotham	52	2	or	52	11
Ahaz	67	3	„	68	10
Hezekiah	82	4	„	83	9
Samaria taken	88	5	„	90	8

From Jehu to the capture of Samaria then is more than 161 years, and less than 167: finally, the whole period of the Israelitish monarchy lies between the limits of 249 and 259 years. Since positive truth is here unattainable, it does not appear worth while to disturb (as a whole) any received chronological system: it is enough to mark (when possible) the limits of error. The date of the capture of Samaria now most received is B.C. 721; yet this is arrived at through the reigns of the early Persian kings, and without any very satisfactory check upon error.

The following scheme of chronology agrees with Winer in its total range, but has minor changes by a single unit in some of the kings:—

	B.C.	
Rehoboam	975	Jeroboam.
Abijah	957	
Asa	955	
	954	Nadab.
	952	Baasha.
	929	Elah.
	928	Zimri, Omri.

	B.C.	
	917	Ahab.
Jehoshaphat . .	914	
	897	Ahaziah.
	896	Jehoram.
Jehoram . . .	889	
Ahaziah . . .	885	
Queen Athaliah .	884	Jehu.
Jehoash . . .	878	
	855	Jehoahaz.
	840	Jehoash.
Amaziah . . .	838	
	824	Jeroboam II.
Uzziah	809	
	772	Zachariah.
	771	Shallum, Menahem.
	760	Pekahiah.
	758	Pekah.
Jotham . . .	757	
Ahaz	741	
	729	Hoshea.
Hezekiah . . .	726	
	721	Samaria captured.

The dynasties in Israel are denoted by brackets.

Leaving the subject of chronology, we pass to the substance of the history.

Jeroboam originally fixed on *Shechem* as the centre of his monarchy, and fortified it; moved perhaps not only by its natural suitability, but by the remembrances of Jacob which clove to it, and by the auspicious fact that here first Israel had decided for him against Rehoboam. But the natural delightfulness of *Tirzah* (Cant. vi. 4) led him, perhaps late in his reign, to erect a palace there (1 Kings xiv. 17). After the murder of Jeroboam's son, Baasha seems to have intended to fix his capital at *Ramah*, as a convenient place for annoying the king of Judah, whom he looked on as his only dangerous enemy; but when forced to renounce this plan (xv. 17, 21), he acquiesced in Tirzah, which continued to be the chief city of Israel, until Omri, who, since the palace at Tirzah had been burned during the civil war (1 Kings xvi. 18), built Samaria, with the ambition not uncommon in the founder of a new dynasty (xvi. 24). Samaria continued to the end of the monarchy to be the centre of administration; and its strength appears to have justified Omri's choice. For details, see SAMARIA; also TIRZAH and SHECHEM.

There is reason to believe that Jeroboam carried back with him into Israel the good will, if not the substantial assistance, of Shishak; and this will account for his escaping the storm from Egypt which swept over Rehoboam in his fifth year. During that first period Israel was far from quiet within. Although the ten tribes collectively had decided in favour of Jeroboam, great numbers of individuals remained attached to the family of David and to the worship at Jerusalem, and in the three first years of Rehoboam migrated into Judah (2 Chron. xi. 16, 17). Perhaps it was not until this process commenced, that Jeroboam was worked up to the desperate measure of erecting rival sanctuaries with visible idols (1 Kings xii. 27): a measure which met the usual ill-success of profane state-craft, and aggravated the evil which he feared. It set him at war with the whole order of priests and Levites, whose expulsion or subjugation, we may be certain, was not effected without convulsing his whole kingdom, and so occupying him as to free Rehoboam from any real danger, although no peace was made. The king of Judah improved the time by immense efforts in fortifying his territory (2 Chron. xi. 5-11); and, although Shishak soon after carried off the most valuable spoil, no great or definite impression could be made by Jeroboam. Israel having so far taken the place of heathen nations, and being already perhaps even in alliance with Egypt, at an early period—we know not how soon—sought and obtained the friendship of the kings of Damascus. A sense of the great advantage derivable from such a union seems to have led Ahab afterwards to behave with mildness and conciliation towards Benhadad, at a time when it could have been least expected (1 Kings xx. 31-34). From that transaction we learn that Benhadad I. had made in Damascus 'streets for Omri,' and Omri for Benhadad in Samaria. This, no doubt, implied that 'a quarter' was assigned for Syrian merchants in Samaria, which was probably fortified like the 'camp of the Tyrians' in Memphis, or the English factory at Calcutta; and in it, of course, Syrian worship would be tolerated. Against such intercourse the prophets, as might be expected, entered their protest (ver. 35-43); but it was in many ways too profitable to be renounced. In the reign of Baasha, Asa king of Judah, sensible of the dangerous advantage gained by his rival through the friendship of the Syrians, determined to buy them off at any price [see also under JUDAH]; and by sacrificing 'the treasures of the house of the Lord and the treasures of the king's house' (xv. 18), induced Benhadad I. to break his league with Baasha and to ravage all the northern district of Israel. This drew off the Israelitish monarch, and enabled Asa to destroy the fortifications of Ramah, which would have stopped the course of his trade (xv. 17), perhaps that with the sea-coast and with Tyre. Such was the beginning of the war *between Israel and Syria*, on which the safety of Judah at that time depended. Cordial union was not again restored between the two northern states until the days of Rezin king of Syria, and Pekah the son of Remaliah, when Damascus must have already felt the rising power of Nineveh. The renewed alliance instantly proved so disastrous to Judah, which was reduced to extremest straits (Isa. vii. 2; 2 Kings xv. 37; 2 Chron. xxviii. 5, 6), as may seem to justify at least the *policy* of Asa's proceeding. Although it was impossible for a prophet to approve of it (2 Chron. xvi. 7), we may only so much the more infer that Judah was already brought into most pressing difficulties, and that the general course of the war, in spite of occasional reverses, was decidedly and increasingly favourable to Israel.

The wars of Syria and Israel were carried on chiefly under three reigns, those of Benhadad II., Hazael, and Benhadad III., the two first monarchs being generally prosperous, especially Hazael, the last being as decidedly unsuccessful. Although these results may have depended in part on personal qualities, there is high probability that the feebleness displayed by the Syrians against Jehoash and his son Jeroboam was occasioned by the pressure of the advancing empire of Nineveh. To make this clear, a small table of synchronisms

B.C.	Syria.	B.C.	Assyria.
1000?	Rezon.	1050	Nineveh unable to resist the king of Zobah, and quite unheard of in Palestine.
980?	Hizion.		
960?	Tabrimon.		
940	Benhadad I.	940	Nineveh still unable to interfere with the Syrians, but *perhaps* beginning to rise into empire by the conquest of Media and Babylon.
910?	Benhadad II.		
885	Hazael.		
845	Benhadad III.	850	Assyria undoubtedly coming forward into great power.
800?	[Damascus taken by Jeroboam II.]	800	Assyria probably in possession of Northern Syria.
758	Rezin.	765?	The king of Assyria marches for the first time into Israel.

representing the two heathen powers may be serviceable. The dates are only approximate.

Asa adhered, through the whole of his long reign, to the policy of encouraging hostility between the two northern kingdoms; and the first Benhadad had such a career of success that his son found himself in a condition to hope for an entire conquest of Israel. His formidable invasions wrought an entire change in the mind of Jehoshaphat (1 Kings xxii. 44), who saw that if Israel was swallowed up by Syria there would be no safety for Judah. We may conjecture that this consideration determined him to unite the two royal families; for no common cause would have induced so religious a king to select for his son's wife Athaliah the daughter of Jezebel. The age of Ahaziah, who was sprung from this marriage, forces us to place it as early as B.C. 912, which is the third year of Jehoshaphat and sixth of Ahab. Late in his reign Jehoshaphat threw himself most cordially (1 Kings xxii. 4) into the defence of Ahab, and by so doing probably saved Israel from a foreign yoke. Another mark of the low state into which both kingdoms were falling, is, that after Ahab's death the Moabites refused their usual tribute to Israel, and (as far as can be made out from the ambiguous words of 2 Kings iii. 27) the united force of the two kingdoms failed of doing more than irritate them. Soon after, in the reign of Jehoram son of Jehoshaphat, the Edomites followed the example, and established their independence. This event possibly engaged the whole force of Judah, and hindered it from succouring Samaria during the cruel siege which it sustained from Benhadad II., in the reign of Jehoram son of Ahab. The declining years and health of the king of Syria gave a short respite to Israel; but, in B.C. 885, Hazael, by defeating the united Hebrew armies, commenced the career of conquest and harassing invasion by which he 'made Israel like the dust by threshing.' Even under Jehu he subdued the trans-Jordanic tribes (2 Kings x. 32). Afterwards, since he took the town of Gath (2 Kings xii. 17) and prepared to attack Jerusalem — an attack which Jehoash king of Judah averted only by strictly following Asa's precedent—it is manifest that all the passes and chief forts of the country west of the Jordan must have been in his hand. Indeed, as he is said 'to have left to Jehoahaz only fifty horsemen, ten chariots, and ten thousand footmen,' it would seem that Israel was strictly a conquered province, in which Hazael dictated (as the English to the native rajahs of India) what military force should be kept up. From this thraldom Israel was delivered by some unexplained agency. We are told merely that 'Jehovah gave to Israel *a saviour*, so that they went out from under the hand of the Syrians; and the children of Israel dwelt in their tents as beforetime,' 2 Kings xiii. 5. It is allowable to conjecture that the (apparently unknown) deliverer was the Assyrian monarchy, which, assaulting Hazael towards the end of the reign of Jehoahaz, entirely drew away the Syrian armies. That it was some urgent, powerful, and continued pressure, considering the great strength which the empire of Damascus had attained, seems clear from the sudden weakness of Syria through the reigns of Jehoash and Jeroboam II., the former of whom thrice defeated Benhadad III. and 'recovered the cities of Israel;' the latter not only regained the full territory of the ten tribes, but made himself master (for a time at least) of Damascus and Hamath. How entirely the friendship of Israel and Judah had been caused and cemented by their common fear of Syria, is proved by the fact that no sooner is the power of Damascus broken than new war breaks out between the two kingdoms, which ended in the plunder of Jerusalem by Jehoash, who also broke down its walls and carried off hostages; after which there is no more alliance between Judah and Israel. The *empire* of Damascus seems to have been entirely dissolved under the son of Hazael, and no mention is made of its kings for eighty years or more. When Pekah, son of Remaliah, reigned in Samaria, Rezin, as king of Damascus, made a last but ineffectual effort for its independence.

The same Assyrian power which had doubtless so seriously shaken, and perhaps temporarily overturned, the kingdom of Damascus, was soon to be felt by Israel. Menahem was invaded by Pul (the first sovereign of Nineveh whose name we know), and was made tributary. His successor, Tiglath-pileser, in the reign of Pekah, son of

Remaliah, carried captive the eastern and northern tribes of Israel (*i. e.* perhaps all their chief men as hostages ?), and soon after slew Rezin, the ally of Pekah, and subdued Damascus. The following emperor, Shalmanezer, besieged and captured Samaria, and terminated the kingdom of Israel, B.C. 721.

This branch of the Hebrew monarchy suffered far greater and more rapid reverses than the other. From the accession of Jeroboam to the middle of Baasha's reign it probably increased in power; it then waned with the growth of the Damascene empire; it struggled hard against it under Ahab and Jehoram, but sank lower and lower; it was dismembered under Jehu, and made subject under Jehoahaz. From B.C. 940 to B.C. 850 is, as nearly as can be ascertained, the period of depression; and from B.C. 914 to B.C. 830 that of friendship or alliance with Judah. But after (about) B.C. 850 Syria began to decline, and Israel soon shot out rapidly; so that Joash and his son Jeroboam appear, of all Hebrew monarchs, to come next to David and Solomon. How long this burst of prosperity lasted does not distinctly appear; but it would seem that entire dominion over the ten tribes was held until Pekah received the first blow from the Assyrian conqueror.

Besides that which was a source of weakness to Israel from the beginning, viz. the schism of the crown with the whole ecclesiastical body, other causes may be discerned which made the ten tribes less powerful, in comparison with the two, than might have been expected. The marriage of Ahab to Jezebel brought with it no political advantages at all commensurate with the direct moral mischief, to say nothing of the spiritual evil; and the reaction against the worship of Baal was a most ruinous atonement for the sin. To suppress the monstrous iniquity, the prophets let loose the remorseless Jehu, who, not satisfied with the blood of Ahab's wife, grandson, and seventy sons, murdered first the king of Judah himself, and next forty-two youthful and innocent princes of his house; while, strange to tell, the daughter of Jezebel gained by his deed the throne of Judah, and perpetrated a new massacre. The horror of such crimes must have fallen heavily on Jehu, and have caused a wide-spread disaffection among his own subjects. Add to this, that the Phœnicians must have deeply resented his proceedings; so that we get a very sufficient clue to the prostration of Israel under the foot of Hazael during the reign of Jehu and his son.

Another and more abiding cause of political debility in the ten tribes was found in the imperfect consolidation of the inhabitants into a single nation. Since those who lived east of the Jordan retained, to a great extent at least, their pastoral habits, their union with the rest could never have been very firm; and when a king was neither strong independently of them, nor had good hereditary pretensions, they were not likely to contribute much to his power. After their conquest of the Hagarenes and the depression of the Moabites and Ammonites by David, they had free room to spread eastward; and many of their chief men may have become wealthy in flocks and herds (like Machir the son of Ammiel, of Lodebar, and Barzillai the Gileadite, 2 Sam. xvii. 27), over whom the authority of the Israelitish crown would naturally be precarious; while west of the Jordan the agrarian law of Moses made it difficult or impossible for a landed nobility to form itself, which could be formidable to the royal authority. That the Arab spirit of freedom was rooted in the eastern tribes, may perhaps be inferred from the case of the Rechabites, who would neither live in houses nor plant vines; undoubtedly, like some of the Nabathæans, lest by becoming settled and agricultural they should be enslaved. Yet the need of imposing this law on his descendants would not have been felt by Jonadab, had not an opposite tendency been rising,—that of agricultural settlement.

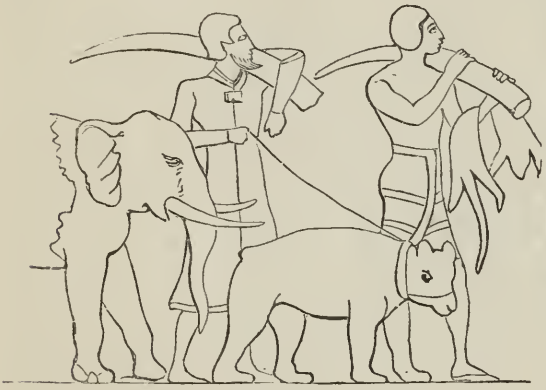
On another point our information is defective, viz. what proportion of the inhabitants of the land consisted of foreign slaves, or subject and degraded castes [SOLOMON]. Such as belonged to tribes who practised circumcision [CIRCUMCISION] would with less difficulty become incorporated with the Israelites; but the Philistines who were intermixed with Israel, by resisting this ordinance, must have continued heterogeneous. In 1 Kings xv. 27; xvi. 15, we find the town of Gibbethon in the hand of the Philistines during the reigns of Nadab, Baasha, and Zimri: nor is it stated that they were finally expelled. Gibbethon being a Levitical town, it might be conjectured that it had been occupied by the Philistines when the Levites emigrated into Judah; but the possibilities here are many.

Although the priests and Levites nearly disappeared out of Israel, prophets were perhaps even more numerous and active there than in Judah; and Abijah, whose prediction first endangered Jeroboam (1 Kings xi. 29-40), lived in honour at Shiloh to his dying day (xiv. 2). Obadiah alone saved one hundred prophets of Jehovah from the rage of Jezebel (xviii. 13). Possibly their extra-social character freed them from the restraint imposed on priests and Levites; and while they felt less bound to the formal rites of the Law, the kings of Israel were also less jealous of them. In fact, just as a great cathedral in Christendom tends to elevate the priestly above the prophetical functions, so, it is possible, did the proximity of Jerusalem; and the prophet may have moved most freely where he came least into contact with the priest. That most inauspicious event—the rupture of Israel with Judah—may thus have been overruled for the highest blessing of the world, by a fuller development of the prophetical spirit.

F. W. N.

1. ISSACHAR (יִשָּׂשכָר, Sept. Ἰσσάχαρ), a son of Jacob and Leah, born B.C. 1749, who gave name to one of the tribes of Israel (Gen. xxx. 18; Num. xxvi. 25).

2. The tribe called after Issachar. Jacob, on his death-bed, speaking metaphorically of the character and destinies of his sons, or rather of the tribes which should spring from them, said, 'Issachar is a strong ass couching down between two burdens' (Gen. xlix. 14, 15). Remembering the character of the ass in eastern countries, we may be sure that this comparison was not intended in disparagement. The ass is anything but stupid; and the proverbial obstinacy which it sometimes exhibits in our own country, is rather the result of ill-treatment than a natural characteristic of the animal. Its true attributes are



patience, gentleness, great capability of endurance, laborious exertion, and a meek submission to authority. Issachar, therefore, the progenitor of a race singularly docile, and distinguished for their patient industry, is exhibited under the similitude of the meekest and most laborious of quadrupeds. The descriptive character goes on: —'And he saw that rest was good, and the land that it was pleasant, and he bowed his shoulder to bear, and became a servant unto tribute;' which probably does not imply that reproach upon Issachar, as addicted to ignominious ease, which some commentators find in it. It seems simply to mean that finding itself in possession of a most fertile portion of Palestine, the tribe devoted itself to the labours of agriculture, taking little interest in the public affairs of the nation. Accordingly Josephus says that the heritage of the tribe 'was fruitful to admiration, abounding in pastures and nurseries of all kinds, so that it would make any man in love with husbandry' (*Antiq.* v. 1. 22). But although a decided preference of agricultural over commercial or military pursuits is here indicated, there seems no reason to conclude, as some gather from the last clause, that the tribe would be willing to purchase exemption from war by the payment of a heavy tribute. The words do not necessarily imply this; and there is no evidence that the tribe ever declined any military service to which it was called. On the contrary, it is specially commended by Deborah for the promptitude with which it presented itself in the war with Jabin (Judg. v. 15); and in the days of David honourable testimony is borne to its character (1 Chron. xii. 32). In this passage the 'children of Issachar' are described as 'men that had understanding of the times, to know what Israel ought to do:' which, compared with Esther i. 13, has been supposed to mean that they were skilled in the various practical applications of astronomy. But what need there was of astronomy on the occasion of calling David to the throne of Israel after the death of Abner and Ishbosheth, is not very easy to discover. It more probably means that they were men held in esteem for their prudence and wisdom, and who knew that the time was come when it was no longer safe to delay calling David to the throne of all Israel. On quitting Egypt the tribe of Issachar numbered 54,000 adult males, which gave it the fifth numerical rank among the twelve tribes, Judah, Simeon, Zebulun, and Dan being alone above it. In the wilderness it increased nearly 10,000, and then ranked as the third of the tribes, Judah and Dan only being more numerous (Num. i. xxvi.). The territory of the tribe comprehended the whole of the plain of Esdraelon and the neighbouring districts —the granary of Palestine. It was bounded on the east by the Jordan, on the west and south by Manasseh, and on the north by Asher and Zebulun. It contained the towns of Megiddo, Taanach, Shunem, Jezreel, and Bethshan, with the villages of Endor, Aphek, and Ibleam, all historical names: the mountains of Tabor and Gilboa, and the valley of Jezreel, were in the territory of this tribe, and the course of the river Kishon lay through it.

ITHAMAR (אִיתָמָר, *palm-island;* Sept. Ἰθάμαρ), fourth son of Aaron. He was consecrated to the priesthood along with his brothers (Exod. vi. 23; Num. iii. 2, 3). Nothing is individually recorded of him, except that the property of the tabernacle was placed under his charge (Exod. xxxviii. 21), and that he superintended all matters connected with its removal by the Levitical sections of Gershon and Merari (Num. iv. 28). The sacred utensils and their removal were entrusted to his elder brother Eleazar. Ithamar, with his descendants, occupied the position of common priests till the high-priesthood passed into his family in the person of Eli, under circumstances of which we are ignorant. Abiathar, whom Solomon deposed, was the last high-priest of that line; and the pontificate then reverted to the elder line of Eleazar in the person of Zadok (1 Kings ii. 27).

ITURÆA (Ἰτουραία), a district in the north-east of Palestine, forming the tetrarchy of Philip. The name is supposed to have originated with יְטוּר *Itur*, or *Jetur*, one of Ishmael's sons (1 Chron. i. 31). In 1 Chron. v. 19 this name is given as that of a tribe or nation with which Reuben (beyond the Jordan) warred; and from its being joined with the names of other of Ishmael's sons it is evident that a tribe descended from his son Jetur is intimated. In the latter text the Sept. takes this view, and for 'with the Hagarites, with Jetur, and Nephish, and Nodab,' reads, 'with the Hagarites, and Ituræans, and Nephisæans and Nadabæans'—μετὰ τῶν Ἀγαρηνῶν, καὶ Ἰτουραίων, καὶ Ναφισαίων, καὶ Ναδαβαίων. The old name seems to be still preserved in that of Jedur, which the same region, or a part of it, now bears. We may thus take the district to have been occupied by Ishmael's son, whose descendants were dispossessed or subdued by the Amorites, under whom it is supposed to have formed part of the kingdom of Bashan, and subsequently to have belonged to that half tribe of Manasseh which had its possessions east of the Jordan. From 1 Chron. v. 19, it appears that the sons of Jetur, whether under tribute to the Amorites, as some suppose, and forming part of the kingdom of Bashan, or not, were in actual occupation of the country, and were dispossessed by the tribes beyond the Jordan; which is a sufficient answer to those who allege that Ituræa lay too far to the north-east to have belonged to Manasseh. During the Exile this and other border countries were taken possession of by various tribes, whom, although they are called after the original names, as occupants of the countries which had received those names, we are not bound to regard as descendants of the original possessors. These new Ituræans were eventually subdued by King Aristobulus (B.C. 100); by whom they were constrained to embrace the Jewish religion, and were at the same time incorporated with the state (Joseph. *Antiq.* xiii. 11. 3). Nevertheless the Ituræans were still recognizable as a distinct people in the time of Pliny (*Hist. Nat.* v. 23). As already intimated, Herod the Great, in dividing his dominions among his sons, bequeathed Ituræa to Philip, as part of a tetrarchy composed, according to Luke, of Trachonitis and Ituræa; and as Josephus (*Antiq.* xvii. 8. 8) mentions his territory as composed of Auranitis, Trachonitis, and Batanæa, it would appear as if the Evangelist regarded Auranitis and Paneas as comprehended under Ituræa. The name is indeed so loosely applied

by ancient writers that it is difficult to fix its boundaries with precision. Perhaps it may suffice for general purposes to describe it as a district of indeterminate extent, traversed by a line drawn from the Lake of Tiberias to Damascus; and by different writers, and under different circumstances, mentioned with extensions in various directions, beyond the proper limits of the name. The present Jedur probably comprehends the whole or greater part of the proper Ituræa. This is described by Burckhardt (*Syria*, p. 286) as 'lying south of Jebelkessoue, east of Jebel es-Sheik (Mount Hermon), and west of the Hadj road.' He adds, that it now contains only twenty inhabited villages. By the help of these lights we may discover that Ituræa was a plain country, about thirty miles long from north to south, and twenty-four from east to west, having on the north Abilene and the Damascene district; on the south Auranitis and part of Bashan; on the east the stony region of Trachonitis; and on the west the hill country of Bashan.

IVORY (שֵׁנְהַבִּים *shenhabbim;* Chald. שֵׁן דְּפִיל *shin diphel;* Syr. *gremphila;* Sept. ὀδόντες ἐλεφάντινοι. New Test. ἐλεφάντινος; 1 Kings x. 22; 2 Chron. ix. 21; Rev. xviii. 12). 'Elephant's tooth,' or simply 'elephant,' is a common name for ivory, not only in the Oriental languages and in Greek, but also in the Western tongues; although in all of them teeth of other species may be included. There can be no doubt, for example, that the harder and more accessible ivory obtained from the hippopotamus, was known in Egypt, at least as early as that obtained from the

361.

elephant. We have seen what appeared to be an ivory sword-handle of Egyptian workmanship, which was declared by dentists to be derived from the river-horse, and of the same texture as that which they now manufacture into false teeth to supply decayed teeth in the human mouth. This kind of ivory does not split, and therefore was anciently most useful for military instruments. Elephants' teeth were largely imported as merchandise, and also brought as tribute into Egypt. The processions of human figures bearing presents, &c., still extant on the walls of palaces and tombs, attest by the black crisp-haired bearers of huge teeth, that some of these came from Ethiopia or Central Africa; and by white men similarly laden, who also bring an Asiatic elephant and a white bear, that others came from the East. Phœnician traders had ivory in such abundance that the chief seats of their galleys were inlaid with it. In the Scriptures, according to the Chaldee Paraphrase, Jacob's bed was made of this substance (Gen. xlix. 33); we find king Solomon importing it from Tarshish (1 Kings x. 22); and if Psalm xlv. 8 was written before his reign, ivory was extensively used in the furniture of royal residences at a still earlier period. The same fact is corroborated by Homer, who notices this article of luxury in the splendid palace of Menelaus, when Greece had not yet formed that connection with Egypt and the East which the Hebrew people, from their geographical position, naturally cultivated. As an instance of the superabundant possession and barbarian use of elephants' teeth, may be mentioned the octagonal *ivory hunting-tower* built by Akbar, about twenty-four miles west of Agra: it is still standing, and bristles with 128 enormous tusks disposed in ascending lines, sixteen on each face. Mr. Roberts, remarking on the words of Amos (vi. 4), they 'that lie upon beds of ivory, and stretch themselves upon their couches,' refers the last word, in conformity with the Tamul version, to swinging cots, often mentioned in the early tales of India, and still plentifully used by the wealthy. But it does not appear that they were known in Western Asia, or that figures of them occur on Egyptian bas-reliefs. It is more likely that 'palkies' (those luxurious travelling litters) are meant, which were borne on men's shoulders, whilst the person within was stretched at ease. They were in common use even among the Romans; for Cicero fell into his assassins' hands while he was attempting to escape in one of them towards Naples. The tusks of African elephants are generally much longer than those of the Asiatic; and it may be observed in this place, that the ancients, as well as the moderns, are mistaken when they assert elephants' tusks to be a kind of horns. They are genuine teeth, combining in themselves, and occupying, in the upper jaw, the whole mass of secretions which in other animals form the upper incisor and laniary teeth. They are useful for defence and offence, and for holding down green branches, or rooting up water-plants; but still they are not absolutely necessary, since there is a variety of elephant in the Indian forests entirely destitute of tusks, and the females in most of the races are either without them, or have them very small; not turned downwards, as Bochart states, but rather straight, as correctly described by Pliny [ELEPHANT].—C. H. S.

IYAR (אִיָּר; Ἰάρ, Josephus, *Antiq.* viii. 3. 1; the Macedonian Ἀρτεμίσιος) is the late name of that month which was the second of the sacred, and the seventh of the civil year of the Jews, and which began with the new moon of May. The few memorable days in it are the 10th, as a fast for the death of Eli; the 14th, as the second or lesser Passover, for those whom uncleanness or absence prevented from celebrating the feast in Nisan (Num. ix. 11); the 23rd, as a feast instituted by Simon the Maccabee in memory of his taking the citadel Acra in Jerusalem (1 Macc. xiii. 51, 52); the 28th, as a fast for the death of Samuel.

Gesenius derives Iyar from the Hebrew root אוֹר, *to shine;* but Benfey and Stern, following out their theory of the source from which the Jews obtained such names, deduce it from the assumed Zend representative of the Persian *bahar*,

'spring' (*Monatsnamen*, p. 131). The name Iyar does not occur in the Old Testament, this month being always described as the second month, except in four places in which it is called Ziv (1 Kings v. 1, 37; Dan. ii. 31; iv. 33). Ziv, which is written זִו and זִיו, is not considered to be a proper name, but an appellative. It is derived from זָהַו, and is a curtailed form for זָהִיו, 'zehív,' *bright*, an appropriate epithet of the month of flowers.—J. N.

J.

JABAL (יָבָל, *a stream;* Sept. Ἰωβήλ), a descendant of Cain, son of Lamech and Adah, who is described in Gen. iv. 20, as 'the father of such as dwell in tents, and have cattle.' This obviously means that Jabal was the first who adopted that nomade life which is still followed by numerous Arabian and Tartar tribes in Asia. Abel had long before been a keeper of sheep; but Jabal invented such portable habitations (formed, doubtless, of skins) as enabled a pastoral people to remove their dwellings with them from one place to another, when they led their flocks to new pastures.

JABBOK (יַבֹּק; Sept. Ἰαβώκ), one of the streams which traverse the country east of the Jordan, and which, after a course nearly from east to west, falls into that river about thirty miles below the lake of Tiberias. It seems to rise in the Hauran mountains, and its whole course may be computed at sixty-five miles. It is mentioned in Scripture as the boundary which separated the kingdom of Sihon, king of the Amorites, from that of Og, king of Bashan (Josh. xii. 1-6); and it appears afterwards to have been the boundary between the tribe of Reuben and the half-tribe of Manasseh. The earliest notice of it occurs in Gen. xxxii. 22.

The Jabbok now bears the name of Zerka. In its passage westward across the plains, it more than once passes under ground; and in summer the upper portion of its channel becomes dry. But on entering the more hilly country immediately east of the Jordan, it receives tribute from several springs, which maintain it as a perennial stream, although very low in summer. From this it appears that not only its volume, but the length of its course, is much smaller in summer than in winter. On approaching the Jordan it flows through a deep ravine, the steep banks being overgrown with the *solanum furiosum*, which attains a considerable size. But the ravine is not so well wooded as the immediate neighbourhood. The water is pleasant, and the bed being rocky the stream runs clear (Burckhardt's *Syria*, p. 347; Irby and Mangles, *Travels*, p. 319; Buckingham, *Palestine*, ii. 109; Lindsay, ii. 123).

JABESH (יָבֵשׁ and יָבִישׁ; Sept. Ἰαβεῖς and Ἰαβίς), or Jabesh-Gilead, a town beyond the Jordan, in the land of Gilead.

Jabesh belonged to the half-tribe of Manasseh, and was sacked by the Israelites for refusing to join in the war against Benjamin (Judg. xxi. 8). It is chiefly memorable for the siege it sustained from Nahash, king of the Ammonites, the raising of which formed the first exploit of the newly-elected king, Saul, and procured his confirmation in the sovereignty. The inhabitants had agreed to surrender, and to have their right eyes put out (to incapacitate them from military service), but were allowed seven days to ratify the treaty. In the meantime Saul collected a large army, and came to their relief (1 Sam. xi.). This service was gratefully remembered by the Jabeshites; and, about forty years after, when the dead bodies of Saul and his sons were gibbeted on the walls of Bethshan, on the other side of the river, they made a forced march by night, took away the bodies, and gave them honourable burial (1 Sam. xxxi.).

Jabesh still existed as a town in the time of Eusebius, who places it six miles from Pella towards Gerasa; but the knowledge of the site is now lost, unless we accept the conclusion of Mr. Buckingham, who thinks it may be found in a place called Jehaz or Jejaz, marked by ruins upon a hill, in a spot not far from which, according to the above indications, Jabesh must have been situated (*Travels*, ii. 130-134).

1. JABIN (יָבִין, *discerner;* Sept. Ἰαβίν), king of Hazor, and one of the most powerful of all the princes who reigned in Canaan when it was invaded by the Israelites. His dominion seems to have extended over all the north part of the country; and after the ruin of the league formed against the Hebrews in the south by Adonizedek, king of Jerusalem, he assembled his tributaries near the waters of Merom (the lake Huleh), and called all the people to arms. This coalition was destroyed, as the one in the south had been, and Jabin himself perished in the sack of Hazor, his capital, B.C. 1450. This prince was the last powerful enemy with whom Joshua combated, and his overthrow seems to have been regarded as the crowning act in the conquest of the Promised Land (Josh. xi. 1—14).

2. JABIN, king of Hazor, and probably descended from the preceding. It appears that during one of the servitudes of the Israelites, probably when they lay under the yoke of Cushan or Eglon, the kingdom of Hazor was reconstructed. The narrative gives to this second Jabin even the title of 'king of Canaan;' and this, with the possession of 900 iron-armed war-chariots, implies unusual power and extent of dominion. The iniquities of the Israelites having lost them the Divine protection, Jabin gained the mastery over them; and, stimulated by the remembrance of ancient wrongs, oppressed them heavily for twenty years. From this thraldom they were relieved by the great victory won by Barak in the plain of Esdraelon, over the hosts of Jabin, commanded by Sisera, one of the most renowned generals of those times, B.C. 1285. The well-compacted power of the king of Hazor was not yet, however, entirely broken. The war was still prolonged for a time, but ended in the entire ruin of Jabin, and the subjugation of his territories by the Israelites (Judg. iv.).

This is the Jabin whose name occurs in Ps. lxxxiii. 10.

JACHIN AND BOAZ, the names of two brazen pillars in the porch of Solomon's temple [Temple].

JACINTH. [Leshem.]

JACOB (יַעֲקֹב; Sept. Ἰακώβ) was the second son of Isaac by his wife Rebekah. Her con-

ceiving is stated to have been supernatural. Led by peculiar feelings she went to inquire of the Lord, and was informed that she was indeed with child, that her offspring should be the founders of two nations, and that the elder should serve the younger: circumstances which ought to be borne in mind when a judgment is pronounced on her conduct in aiding Jacob to secure the privileges of birth to the exclusion of his elder brother Esau—conduct which these facts, connected with the birth of the boys, may well have influenced. Some have indeed denied the facts, and taken from them the colouring they bear in the Bible; and such persons may easily be led on to pronounce a severe and indiscriminate sentence of condemnation on Rebekah; but those who profess to receive and to respect the Biblical records are unjustifiable, if they view any part of them, or any event which they record, in any other light than that which the Bible supplies, in any other position than that which the Bible presents. It is as a whole that each separate character should be contemplated — under the entire assemblage of those circumstances which the Bible narrates. If we first maim an historical person we may very readily misrepresent him.

As the boys grew, Jacob appeared to partake of the gentle, quiet, and retiring character of his father, and was accordingly led to prefer the tranquil safety and pleasing occupations of a shepherd's life to the bold and daring enterprises of the hunter, for which Esau had an irresistible predilection. Jacob, therefore, passed his days in or near the paternal tent, simple and unpretending in his manner of life, and finding in the flocks and herds which he kept, images and emotions which both filled and satisfied his heart. His domestic habits and affections seem to have co-operated with the remarkable events that attended his birth, in winning for him the peculiar regard and undisguised preference of his mother, who probably in this merely yielded to impressions which she could scarcely account for, much less define, and who had not even a faint conception of the magnitude of influence to which her predilection was likely to rise, and the sad consequences to which it could hardly fail to lead.

That selfishness and a prudence which approached to cunning had a seat in the heart of the youth Jacob, appears but too plain in his dealing with Esau, when he exacted from a famishing brother so large a price for a mess of pottage, as the surrender of his birthright. Nor does the simple narrative of the Bible afford grounds by which this act can be well extenuated. Esau asks for food, alleging as his reason, 'for I am faint.' Jacob, unlike both a youth and a brother, answers, 'Sell me this day thy birthright.' What could Esau do? 'Behold,' he replies, 'I am at the point to die, and what profit (if by retaining my birthright I lose my life) shall this birthright do me?' Determined to have a safe bargain, the prudent Jacob, before he gave the needed refreshment, adds, 'Swear to me this day.' The oath was given, the food eaten, and Esau '*went his way*,' leaving a home where he had received so sorry a welcome.

The leaning which his mother had in favour of Jacob would naturally be augmented by the conduct of Esau in marrying, doubtless contrary to his parents' wishes, two Hittite women, who are recorded to have been a grief of mind unto Isaac and to Rebekah.

Circumstances thus prepared the way for procuring the transfer of the birthright, when Isaac being now old, proceeded to take steps to pronounce the irrevocable blessing which acted with all the force of a modern testamentary bequest. This blessing, then, it was essential that Jacob should receive in preference to Esau. Here Rebekah appears the chief agent; Jacob is a mere instrument in her hands. Isaac directs Esau to procure him some venison. This Rebekah hears, and urges her reluctant favourite to personate his elder brother. Jacob suggests difficulties: they are met by Rebekah, who is ready to incur any personal danger so that her object be gained. 'My father, peradventure, will feel me, and I shall seem to him as a deceiver, and I shall bring a curse upon me and not a blessing. His mother said unto him, Upon me be thy curse, my son, only obey my voice.' Her voice is obeyed, the venison is brought, Jacob is equipped for the deceit; he helps out his fraud by direct falsehood, and the old man, whose senses are now failing, is at last with difficulty deceived. It cannot be denied that this is a most reprehensible transaction, and presents a truly painful picture; in which a mother conspires with one son in order to cheat her aged husband, with a view to deprive another son of his rightful inheritance. Justification is here impossible; but it should not be forgotten in the estimate we form that there was a promise in favour of Jacob, that Jacob's qualities had endeared him to his mother, and that the prospect to her was dark and threatening which arose when she saw the neglected Esau at the head of the house, and his hateful wives assuming command over herself.

Punishment in this world always follows close upon the heels of transgression. Fear seized the guilty Jacob, who is sent by his father, at the suggestion of Rebekah, to the original seat of the family, in order that he might find a wife among his cousins, the daughters of his mother's brother, Laban the Syrian. Before he is dismissed Jacob again receives his father's blessing, the object obviously being to keep alive in the young man's mind the great promise given to Abraham, and thus to transmit that influence which, under the aid of divine providence, was to end in placing the family in possession of the land of Palestine, and in so doing to make it 'a multitude of people.' The language, however, employed by the aged father suggests the idea, that the religious light which had been kindled in the mind of Abraham had lost somewhat of its fulness, if not of its clearness also; since 'the blessing of Abraham,' which had originally embraced all nations, is now restricted to the descendants of this one patriarchal family. And so it appears, from the language which Jacob employs (Gen. xxviii. 16) in relation to the dream that he had when he tarried all night upon a certain plain on his journey eastward, that his idea of the Deity was little more than that of a local god—'Surely the Lord is in *this* place, and *I knew it not*.' Nor does the language which he immediately after employs show that his ideas of the relations between God and man were of an exalted and refined nature:—'If God will be with me, and will keep me in the way that I go, and will give me bread to eat and raiment to put on,

so that I come again to my father's house in peace, then shall the Lord be my God.' The vision therefore with which Jacob was favoured was not without occasion, nor could the terms in which he was addressed by the Lord, fail to enlarge and correct his conceptions, and make his religion at once more comprehensive and more influential.

Jacob, on coming into the land of the people of the East, accidentally met with Rachel, Laban's daughter, to whom, with true eastern simplicity and politeness, he showed such courtesy as the duties of pastoral life suggest and admit. And here his gentle and affectionate nature displays itself under the influence of the bonds of kindred and the fair form of youth:—'Jacob kissed Rachel, and lifted up his voice and wept.'

After he had been with his uncle the space of a month, Laban inquires of him what reward he expects for his services. He asks for the 'beautiful and well-favoured Rachel.' His request is granted on condition of a seven years' service—a long period truly, but to Jacob 'they seemed but a few days for the love he had to her.' When the time was expired, the crafty Laban availed himself of the customs of the country, in order to substitute his elder and 'tender-eyed' daughter Leah. In the morning Jacob found how he had been beguiled; but Laban excused himself, saying, 'It must not be done in our country, to give the younger before the first-born.' Another seven years' service gains for Jacob the beloved Rachel. Leah, however, has the compensatory privilege of being the mother of the first-born—Reuben; three other sons successively follow, namely, Simeon, Levi, and Judah, sons of Leah. This fruitfulness was a painful subject of reflection to the barren Rachel, who employed language on this occasion that called forth a reply from her husband which shows that, mild as was the character of Jacob, it was by no means wanting in force and energy (Gen. xxx. 2). An arrangement, however, took place, by which Rachel had children by means of her maid, Bilhah, of whom Dan and Naphtali were born. Two other sons—Gad and Asher—were born to Jacob of Leah's maid, Zilpah. Leah herself bare two more sons, namely, Issachar and Zebulun; she also bare a daughter, Dinah. At length Rachel herself bare a son, and she called his name Joseph.

Most faithfully, and with great success, had Jacob served his uncle for fourteen years, when he became desirous of returning to his parents. At the urgent request of Laban, however, he is induced to remain. The language employed upon this occasion (Gen. xxx. 25, sq.) shows that Jacob's character had gained considerably during his service both in strength and comprehensiveness; but the means which he employed in order to make his bargain with his uncle work so as to enrich himself, prove too clearly that his moral feelings had not undergone an equal improvement, and that the original taint of prudence, and the sad lessons of his mother in deceit, had produced some of their natural fruit in his bosom. Those who may wish to inquire into the nature and efficacy of the means which Jacob employed, may, in addition to the original narrative, consult Michaelis and Rosenmüller on the subject, as well as the following:—Hieron. *Quæst. in Gen.*; Plin. *Hist. Nat.* vii. 10; Oppian, *Cyneg.* i. 330, sq.; Hastfeer, *über Schafzucht*; Bochart, *Hieroz.* i. 619. Winer, *Handwört.*, gives a parallel passage from Ælian (*Hist. Anim.* viii. 21).

The prosperity of Jacob displeased and grieved Laban, so that a separation seemed desirable. His wives are ready to accompany him. Accordingly he set out, with his family and his property, 'to go to Isaac his father in the land of Canaan.' It was not till the third day that Laban learned that Jacob had fled, when he immediately set out in pursuit of his nephew, and after seven days' journey overtook him in Mount Gilead. Laban, however, is divinely warned not to hinder Jacob's return. Reproach and recrimination ensued. Even a charge of theft is put forward by Laban —'Wherefore hast thou stolen my gods?' In truth, Rachel had carried off certain images which were the objects of worship. Ignorant of this misdeed, Jacob boldly called for a search, adding, 'With whomsoever thou findest thy gods let him not live.' A crafty woman's cleverness eluded the keen eye of Laban. Rachel, by an appeal which one of her sex alone could make, deceived her father. Thus one sin begets another; superstition prompts to theft, and theft necessitates deceit.

Whatever opinion may be formed of the teraphim which Rachel stole, and which Laban was so anxious to discover, and whatever kind or degree of worship may in reality have been paid to them, their existence in the family suffices of itself to show how imperfectly instructed regarding the Creator were at this time those who were among the least ignorant on divine things.

Laban's conduct on this occasion called forth a reply from Jacob, from which it appears that his service had been most severe, and which also proves that however this severe service might have encouraged a certain servility, it had not prevented the development in Jacob's soul of a high and energetic spirit, which when roused could assert its rights and give utterance to sentiments both just, striking, and forcible, and in the most poetical phraseology.

Peace, however, being restored, Laban, on the ensuing morning, took a friendly, if not an affectionate farewell of his daughters and their sons, and returned home. Meanwhile Jacob, going on his way, had to pass near the land of Seir, in which Esau dwelt. Remembering his own conduct and his brother's threat, he was seized with fear, and sent messengers before in order to propitiate Esau, who, however, had no evil design against him; but, when he 'saw Jacob, ran to meet him and embraced him, and fell on his neck and kissed him, and they wept'—the one tears of joyful recognition, the other of gladness at unexpected escape.

The passage in which this meeting is recorded is very striking and picturesque. In moral qualities it exhibits Jacob the inferior of his generous, high-minded, and forgiving brother; for Jacob's bearing, whatever deduction may be made for Oriental politeness, is crouching and servile. Independently of the compellation, 'my lord,' which he repeatedly uses in addressing Esau, what can be said of the following terms:—'I have seen thy face as though I had seen the face of God, and thou wast pleased with me' (Gen. xxxiii. 10).

It was immediately preceding this interview that Jacob passed the night in wrestling with 'a

man,' who is afterwards recognised as God, and who at length overcame Jacob by touching the hollow of his thigh. His name also was on this event changed by the mysterious antagonist into Israel, 'for as a prince hast thou power with God and with men, and hast prevailed' (Gen. xxxii. 28). It is added that on this account his descendants abstained from eating the thigh of slaughtered animals.

This passage is one which we are not sure that we understand. The narrator did not, we think, intend it for the account of a dream. A literal interpretation would seem difficult, for this would make the Omnipotent vanquish one of his own creatures, not without a long struggle, and at last only by a sort of art or stratagem. At the same time it must be said that the only way to expound the narrative is to divest ourselves of our own modern associations, and endeavour to contemplate it from the position in which its author stood. Still the question recurs—what was the fact which he has set forth in these terms? (see De Wette, *Krit. d. Is. Gesch.* p. 132; Ewald's *Israeliten*, i. 405; Rosenmüller's *Scholia*, in loc.) The design (says Wellbeloved, in loc.) 'was to encourage Jacob, returning to his native land, and fearful of his brother's resentment, and to confirm his faith in the existence and providence of God. And who will venture to say that in that early period any other equally efficacious means could have been employed?' Compare the language already quoted (ver. 28). A very obvious end pursued throughout the history of Jacob, was the development of his religious convictions, and the event in question, no less than the altars he erected and the dreams he had, may have materially conduced to so important a result.

Having, by the misconduct of Hamor the Hivite and the hardy valour of his sons, been involved in danger from the natives of Shechem in Canaan, Jacob is divinely directed, and under the divine protection proceeds to Bethel, where he is to 'make an altar unto God that appeared unto thee when thou fleddest from the face of Esau thy brother.' Obedient to the divine command, he first purifies his family from 'strange gods,' which he hid under 'the oak which is by Shechem;' after which God appeared to him again with the important declaration, 'I am God Almighty,' and renewed the Abrahamic covenant. While journeying from Beth-el to Ephrath, his beloved Rachel lost her life in giving birth to her second son, Benjamin. At length Jacob came to his father Isaac at Mamre, the family residence, in time to pay the last attentions to the aged patriarch. Not long after this bereavement Jacob was robbed of his beloved son Joseph through the jealousy and bad faith of his brothers. This loss is the occasion of showing us how strong were Jacob's paternal feelings; for on seeing what appeared to be proofs that 'some evil beast had devoured Joseph,' the old man 'rent his clothes, and put sackcloth upon his loins, and mourned for his son many days, and refused to be comforted.'—'I will go down into the grave unto my son mourning' (Gen. xxxvii. 33).

A widely extended famine induced Jacob to send his sons down into Egypt, where he had heard there was corn, without knowing by whose instrumentality. The patriarch, however, retained his youngest son Benjamin, 'lest mischief should befall him,' as it had befallen Joseph. The young men returned with the needed supplies of corn. They related, however, that they had been taken for spies, and that there was but one way in which they could disprove the charge, namely, by carrying down Benjamin to 'the lord of the land.' This Jacob vehemently refused:—'Me have ye bereaved; Joseph is not, and Simeon is not, and ye will take Benjamin; my son shall not go down with you; if mischief befall him, then shall ye bring down my grey hairs with sorrow to the grave' (Gen. xlii. 36). The pressure of the famine, however, at length forced Jacob to allow Benjamin to accompany his brothers on a second visit to Egypt; whence in due time they brought back to their father the pleasing intelligence, 'Joseph is yet alive, and he is governor over all the land of Egypt.' How naturally is the effect of this on Jacob told—'and Jacob's heart fainted, for he believed them not.' When, however, they had gone into particulars, he added, 'Enough, Joseph my son is yet alive; I will go and see him before I die.' Touches of nature like this suffice to show the reality of the history before us, and since they are not unfrequent in the book of Genesis, they will of themselves avail to sustain its credibility against all that the enemy can do. Each competent and unprejudiced judge, on reading these gems of truth, may well exclaim, 'This is history, not mythology; reality, not fiction.' The passage, too, with others recently cited, strongly proves how much the character of the patriarch had improved. In the entire of the latter part of Jacob's life, he seems to have gradually parted with many less desirable qualities, and to have become at once more truthful, more energetic, more earnest, affectionate, and, in the largest sense of the word, religious.

Encouraged 'in the visions of the night,' Jacob goes down to Egypt. 'And Joseph made ready his chariot, and went up to meet Israel his father, to Goshen, and presented himself unto him; and he fell on his neck, and wept on his neck a good while. And Israel said unto Joseph, Now let me die, since I have seen thy face, because thou art yet alive' (Gen. xlvi. 29). Joseph proceeded to conduct his father into the presence of the Egyptian monarch, when the man of God, with that self-consciousness and dignity which religion gives, instead of offering slavish adulation, 'blessed Pharaoh.' Struck with the patriarch's venerable air, the king asked, 'How old art thou?' What composure and elevation is there in the reply, 'The days of the years of my pilgrimage are an hundred and thirty years; few and evil have the days of the years of my life been, and have not attained unto the days of the years of the life of my fathers in the days of their pilgrimage: and Jacob blessed Pharaoh, and went out from before Pharaoh' (Gen. xlvii. 8-10). This fine passage has been travestied after his own manner by Voltaire (*Diction. Philosoph.*): 'That which the good man Jacob replied to Joseph must forcibly strike those *who can read.* How old are you? said the king. I am a hundred and thirty years of age, answered the old man, and *I have not yet had one happy day in this short pilgrimage:*'—'A proof this,' says Niemeyer (*Charak. der Bibel*, ii. 196), 'how faithfully Voltaire, who is always complaining of the quotations of others, cites the Bible; so that

one may almost conclude that he himself must not be ranked among those *who can read.*'

Jacob, with his sons, now entered into possession of some of the best land of Egypt, where they carried on their pastoral occupations, and enjoyed a very large share of earthly prosperity. The aged patriarch, after being strangely tossed about on a very rough ocean, found at last a tranquil harbour, where all the best affections of his nature were gently exercised and largely unfolded. After a lapse of time Joseph, being informed that his father was sick, went to him, when 'Israel strengthened himself, and sat up in his bed.' He acquainted Joseph with the divine promise of the land of Canaan which yet remained to be fulfilled, and took Joseph's sons, Ephraim and Manasseh, in place of Reuben and Simeon, whom he had lost. How impressive is his benediction in Joseph's family! 'And Israel said unto Joseph, I had not thought to see thy face: and, lo, God hath showed me also thy seed' (Gen. xlviii. 11). 'God, before whom my fathers Abraham and Isaac did walk, the God which fed me all my life long unto this day, the angel which redeemed me from all evil, bless the lads; and let my name be named on them, and the name of my fathers; and let them grow into a multitude in the midst of the earth' (ver. 15, 16). 'And Israel said unto Joseph, Behold I die; but God will be with you and bring you again unto the land of your fathers' (ver. 21). Then having convened his sons, the venerable patriarch pronounced on them also a blessing, which is full of the loftiest thought, expressed in the most poetical diction, and adorned by the most vividly descriptive and engaging imagery, showing how deeply religious his character had become, how freshly it retained its fervour to the last, and how greatly it had increased in strength, elevation, and dignity:—'And when Jacob had made an end of commanding his sons, he gathered up his feet into the bed and yielded up the ghost, and was gathered unto his people' (Gen. xlix. 33).—J. R. B.

JAEL (יָעֵל *wild goat;* Sept. Ἰαήλ), wife of Heber, the Kenite. When Sisera, the general of Jabin, had been defeated, he alighted from his chariot, hoping to escape best on foot from the hot pursuit of the victorious Israelites. On reaching the tents of the nomade chief, he remembered that there was peace between his sovereign and the house of Heber; and, therefore, applied for the hospitality and protection to which he was thus entitled. This request was very cordially granted by the wife of the absent chief, who received the vanquished warrior into the inner part of the tent, where he could not be discovered by strangers without such an intrusion as eastern customs would not warrant. She also brought him milk to drink, when he asked only water; and then covered him from view, that he might enjoy repose the more securely. As he slept, a horrid thought occurred to Jael, which she hastened too promptly to execute. She took one of the tent nails, and with a mallet, at one fell blow, drove it through the temples of the sleeping Sisera. Soon after, Barak and his people arrived in pursuit, and were shown the lifeless body of the man they sought. This deed drew much attention to Jael, and preserved the camp from molestation by the victors; and there is no disputing that her act is mentioned with great praise in the triumphal song wherein Deborah and Barak celebrated the deliverance of Israel (Judg. v. 24).

It does not seem difficult to understand the object of Jael in this painful transaction. Her motives seem to have been entirely prudential, and, on prudential grounds, the very circumstance which renders her act the more odious—the peace subsisting between the nomade chief and the king of Hazor—must, to her, have seemed to make it the more expedient. She saw that the Israelites had now the upper hand, and was aware that, as being in alliance with the oppressors of Israel, the camp might expect very rough treatment from the pursuing force; which would be greatly aggravated if Sisera were found sheltered within it. This calamity she sought to avert, and to place the house of Heber in a favourable position with the victorious party. She probably justified the act to herself, by the consideration that as Sisera would certainly be taken and slain, she might as well make a benefit out of his inevitable doom, as incur utter ruin in the attempt to protect him. We have been grieved to see the act vindicated as authorized by the usages of ancient warfare, of rude times, and of ferocious manners. There was not warfare, but peace between the house of Heber and the prince of Hazor; and, for the rest, we will venture to affirm that there does not now, and never did exist, in any country, a set of usages under which the act of Jael would be deemed right.

It is much easier to explain the conduct of Jael than to account for the praise which it receives in the triumphal ode of Deborah and Barak. But the following remarks will go far to remove the difficulty:—There is no doubt that Sisera would have been put to death, if he had been taken alive by the Israelites. The war usages of the time warranted such treatment, and there are numerous examples of it. They had, therefore, no regard to her private motives, or to the particular relations between Heber and Jabin, but beheld her only as the instrument of accomplishing what was usually regarded as the final and crowning act of a great victory. And the unusual circumstance that this act was performed by a woman's hand, was, according to the notions of the time, so great a humiliation, that it could hardly fail to be dwelt upon, in contrasting the result with the proud confidence of victory which had at the outset been entertained (Josh. iv. 5).

1. JAIR (יָאִיר, *enlightener;* Sept. Ἰαΐρ), son of Segub, of the tribe of Manasseh by his mother, and of Judah by his father. He appears to have distinguished himself in an expedition against the kingdom of Bashan, the time of which is disputed, but may probably be referred to the last year of the life of Moses, B.C. 1451. It seems to have formed part of the operations connected with the conquest of the country east of the Jordan. He settled in the part of Argob bordering on Gilead, where we find twenty-three villages named collectively Havoth-jair, or 'Jair's villages' (Num. xxxii. 41; Deut. iii. 14; Josh. xiii. 30; 1 Chron. ii. 22).

2. JAIR, eighth judge of Israel, of Gilead, in in Manasseh, beyond the Jordan; and therefore, probably descended from the preceding, with whom, indeed, he is sometimes confounded. He ruled

twenty-two years, and his opulence is indicated in a manner characteristic of the age in which he lived. 'He had thirty sons, that rode on thirty ass-colts, and they had thirty cities, which are called Havoth-jair, in the land of Gilead.' A young ass was the most valuable beast for riding then known to the Hebrews; and that Jair had so many of them, and was able to assign a village to every one of his thirty sons, is very striking evidence of his wealth. The twenty-three villages of the more ancient Jair were probably among the thirty which this Jair possessed (Judg. x. 3). B.C. 1210.

JAIRUS (Ἰάειρος), a ruler of the synagogue at Capernaum, whose daughter Jesus restored to life (Mark v. 22; Luke viii. 41).

JAMBRES AND JANNES (Ἰαμβρῆς καὶ Ἰαννῆς), two of the Egyptian magicians who attempted by their enchantments (לטים, *occultæ artes*, Gesenius) to counteract the influence on Pharaoh's mind of the miracles wrought by Moses. Their names occur nowhere in the Hebrew Scriptures, and only once in the New Testament (2 Tim. iii. 8). The Apostle Paul became acquainted with them, most probably, from an ancient Jewish tradition, or, as Theodoret expresses it, 'from the unwritten teaching of the Jews' (τῆς ἀγράφου τῶν Ἰουδαίων διδασκαλίας). They are found frequently in the Talmudical and Rabbinical writings, but with some variations. Thus, for Jannes we meet with יונום, יניס, יואני, יוחני, יוחנא. Of these, the three last are forms of the Hebrew יוחנן, which has led to the supposition that Ἰαννῆς is a contracted form of the Greek Ἰωάννης. Some critics consider that these names were of Egyptian origin, and, in that case, the Jewish writers must have been misled by a similarity of sound to adopt the forms abovementioned. For Jambres we find ממרא, ממרי, יומברום, יומברים, and in the Shalsheleth Hakkabala the two names are given יואני ואמברוסיאו, *i. e.* Johannes and Ambrosius! The Targum of Jonathan inserts them in Exod. vii. 11. The same writer also gives as a reason for Pharaoh's edict for the destruction of the Israelitish male children, that 'this monarch had a dream in which the land of Egypt appeared in one scale and a lamb in another; that on awakening he sought for its interpretation from his wise men; whereupon Jannes and Jambres (יניס ויומברים) said—'A son is to be born in the congregation of Israel who will desolate the whole land of Egypt.' Several of the Jewish writers speak of Jannes and Jambres as the two sons of Balaam, and assert that they were the youths (נערי, *servants*, Auth. Vers.) who went with him to the king of Moab (Num. xxii. 22). The Pythagorean philosopher Numenius mentions these persons in a passage preserved by Eusebius (*Præp. Evang.* ix. 8), and by Origen (*c. Cels.* iv. p. 198, ed. Spencer); also Pliny (*Hist. Nat.* xxx. 1). There was an ancient apocryphal writing entitled *Jannes and Mambres*, which is referred to by Origen (*in Matt. Comment.* § 117; *Opera*, v. 29), and by Ambrosiaster, or Hilary the Deacon: it was condemned by Pope Gelasius (Wetstenii *Nov. Test. Græc.* ii. 362; Buxtorf, *Lex. Talm. Rabb.* col. 945; Lightfoot's *Sermon on Jannes and Jambres; Works*, vii. 89; *Erubhin, or Miscellanies*, ch. xxiv.; *Works*, iv. 33; Lardner's *Credibility*, pt. ii. ch. 35; *Works*, vii. 381.)—J. E. R.

JAMES, Ἰάκωβος. Two, if not three persons of this name are mentioned in the New Testament.

1. James, *the son of Zebedee* (Ἰάκωβος ὁ τοῦ Ζεβεδαίου), and brother of the evangelist John. Their occupation was that of fishermen, probably at Bethsaida, in partnership with Simon Peter (Luke v. 10). On comparing the account given in Matt. iv. 21, Mark i. 19, with that in John i., it would appear that James and John had been acquainted with our Lord, and had received him as the Messiah, some time before he called them to attend upon him statedly—a call with which they immediately complied. Their mother's name was Salome. We find James, John, and Peter associated on several interesting occasions in the Saviour's life. They alone were present at the Transfiguration (Matt. xvii. 1; Mark ix. 2; Luke ix. 28); at the restoration to life of Jairus's daughter (Mark v. 42; Luke viii. 51); and in the garden of Gethsemane during the agony (Mark xiv. 33; Matt. xxvi. 37; Luke xxi. 37). With Andrew they listened in private to our Lord's discourse on the fall of Jerusalem (Mark xiii. 3). James and his brother appear to have indulged in false notions of the kingdom of the Messiah, and were led by ambitious views to join in the request made to Jesus by their mother (Matt. xx. 20-23; Mark x. 35). From Luke ix. 52, we may infer that their temperament was warm and impetuous. On account, probably, of their boldness and energy in discharging their Apostleship, they received from their Lord the appellation of Boanerges, or *Sons of Thunder* (For the various explanations of this title given by the fathers see Suiceri *Thes. Eccles.* s. v. Βροντή, and Lücke's *Commentar*, Bonn, 1840; *Einleitung*, c. i. § 2, p. 17). James was the first martyr among the Apostles. Clement of Alexandria, in a fragment preserved by Eusebius (*Hist. Eccles.* i. 9), reports that the officer who conducted James to the tribunal was so influenced by the bold declaration of his faith as to embrace the Gospel and avow himself also a Christian; in consequence of which he was beheaded at the same time.

2. James, *the son of Alphæus* (Ἰάκωβος ὁ τοῦ Ἀλφαίου), one of the twelve Apostles (Mark iii. 18; Matt. x. 3; Luke vi. 15; Acts i. 13). His mother's name was Mary (Matt. xxvii. 56; Mark xv. 40); in the latter passage he is called James *the Less* (ὁ μικρός, the Little), either as being younger than James the son of Alphæus, or on account of his low stature (Mark xvi. 1; Luke xxiv. 10).

3. James, *the brother of the Lord* (ὁ ἀδελφὸς τοῦ Κυρίου; Gal. i. 19). Whether this James is identical with the son of Alphæus, is a question which Dr. Neander pronounces to be the most difficult in the Apostolic history, and which cannot yet be considered as decided. We read in Matt. xiii. 55, 'Is not his mother called Mary, and his brethren James, and Joses, and Simon, and Judas?' and in Mark vi. 3, 'Is not this the carpenter, the son of Mary, and brother of James and Joses, and of Juda and Simon? and are not his sisters here with us?' Those critics who suppose the terms of affinity in these and parallel passages to be used in the laxer sense of near relations, have remarked that in Mark xv. 40, mention

is made of 'Mary, the mother of James the less and of Joses;' and that in John xix. 25, it is said, 'there stood by the cross of Jesus, his mother and his mother's sister, Mary, the wife of Cleophas, and Mary Magdalene:' they therefore infer that the wife of Cleophas is the same as the sister of the mother of Jesus, and, consequently, that James (supposing Cleophas and Alphæus to be the same name, the former according to the Hebrew, the latter according to the Greek orthography) was a *first cousin* of our Lord, and, on that account, termed his *brother*, and that the other individuals called the brethren of Jesus stood in the same relation. It is also urged that in the Acts, after the death of James the son of Zebedee, we read only of one James; and, moreover, that it is improbable that our Lord would have committed his mother to the care of the beloved disciple, had there been sons of Joseph living, whether the offspring of Mary or of a former marriage. Against this view it has been alleged that in several early Christian writers James, the brother of the Lord, is distinguished from the son of Alphæus; that the identity of the names Alphæus and Cleophas is somewhat uncertain; and that it is doubtful whether the words 'his mother's sister,' in John xix. 21, are to be considered in apposition with those immediately following—'Mary, the wife of Cleophas,' or intended to designate a different individual; since it is highly improbable that two sisters should have had the same name. Wieseler (*Studien und Kritiken*, 1840, iii. 618) maintains that not three, but four persons are mentioned in this passage, and that since in Matt. xxvii. 56, Mark xv. 40, besides Mary of Magdala, and Mary, the mother of James and Joses, Salome also (or the mother of the sons of Zebedee) is named as present at the Crucifixion, it follows that she must have been the sister of our Lord's mother. This would obviate the difficulty arising from the sameness of the names of the two sisters, and would set aside the proof that James, the Lord's brother, was the son of Alphæus. But even allowing that the sons of Alphæus were related to our Lord, the narrative in the Evangelists and the Acts presents some reasons for suspecting that they were not the persons described as 'the brethren of Jesus.' 1. The brethren of Jesus are associated with his mother in a manner that strongly indicates their standing in the filial relation to her (Matt. xii. 46; Mark iii. 31; Luke viii. 19; Matt. xiii. 56, where 'sisters' are also mentioned; they appear constantly together as forming one family, John ii. 12). 'After this he went down to Capernaum, he, and his mother, and his brethren, and his disciples' (Kuinoel, *Comment. in Matt.* xii. 46). 2. It is explicitly stated, that at a period posterior to the appointment of the twelve Apostles, among whom we find 'the son of Alphæus,' 'neither did his brethren believe on him' (John vii. 5; Lücke's *Commentar*). Attempts, indeed, have been made by Grotius and Lardner to dilute the force of this language, as if it meant merely that their faith was imperfect or wavering—'that they did not believe as they should;' but the language of Jesus is decisive:—'My time is not yet come, but your time is always ready; the world cannot hate you, but me it hateth' (compare this with John xv. 18, 19: 'If the world hate you,' &c.). This appears to overthrow the argument for the identity of the brethren of Jesus with the sons of Alphæus, drawn from the sameness of the names; for as to the supposition that what is affirmed in John's Gospel might apply to only some of his brethren, it is evident that, admitting the identity, only *one* brother of Jesus would be left out of the 'company of the Apostles.' 3. Luke's language in Acts i. 13, 14, is opposed to the identity in question; for, after enumerating the Apostles, among whom, as usual, is 'James, the son of Alphæus,' he adds, 'they all continued with one accord in prayer and supplication with the women, and Mary, the mother of Jesus, and *with his brethren*.' From this passage, however, we learn that, by this time, his brethren had received him as the Messiah. That after the death of the son of Zebedee we find only one James mentioned, may easily be accounted for on the ground that probably only one, 'the brother of the Lord,' remained at Jerusalem; and, under such circumstances, the silence of the historian respecting the son of Alphæus is not more strange than respecting several of the other Apostles, whose names never occur after the catalogue in ch. i. 13. Paul's language in Gal. i. 19, has been adduced to prove the identity of the Lord's brother with the son of Alphæus, by its ranking him among the Apostles, but Neander and Winer have shown that it is by no means decisive. (Winer's *Grammatik*, 4th ed. p. 517; Neander's *History of the Planting*, &c. vol. ii. p. 5, Eng. transl.). If we examine the early Christian writers, we shall meet with a variety of opinions on this subject. Eusebius (*Hist. Eccles.* ii. 1) says that James, the first bishop of Jerusalem, brother of the Lord, son of Joseph, the husband of Mary, was surnamed the Just by the ancients, on account of his eminent virtue. He uses similar language in his *Evangelical Demonstration* (iii. 5). In his commentary on Isaiah he reckons fourteen Apostles; namely, the twelve, Paul, and James, the brother of our Lord. A similar enumeration is made in the 'Apostolic Constitutions' (vi. 14). Epiphanius, Chrysostom, and Theophylact speak of James, the Lord's brother, as being the same as the son of Cleopas. They suppose that Joseph and Cleopas were brothers, and that the latter dying without issue, Joseph married his widow for his first wife, according to the Jewish custom, and that James and his brethren were the offspring of this marriage (Lardner's *Credibility*, pt. ii. ch. 118, *Works*, iv. 548; ch. i. 163, *Works*, v. 160; *History of Heresies*, c. xi. § 11, *Works*, viii. 527; *Supplement to the Credibility*, ch. 17, *Works*, vi. 188). A passage from Josephus is quoted by Eusebius (*Hist. Eccles.* ii. 23), in which James, the brother of 'him who is called Christ,' is mentioned; but in the opinion of Dr. Lardner and other eminent critics this clause is an interpolation (Lardner's *Jewish Testimonies*, ch. iv.; *Works*, vi. 496). According to Hegesippus (a converted Jew of the second century), James, the brother of the Lord, undertook the government of the church along with the Apostles (*μετὰ τῶν ἀποστόλων*). He describes him as leading a life of ascetic strictness, and as held in the highest veneration by the Jews. But in the account he gives of his martyrdom some circumstances are highly improbable. In the Apocryphal Gospel according to the Hebrews, he is said to have been precipitated from a pinnacle of the temple, and then assaulted with stones;

and at last dispatched by a blow on the head with a fuller's pole (Lardner's *Supplement*, ch. xvi., *Works*, vi. p. 174; Neander, *History of the Planting*, &c. vol. ii. pp. 9, 22, Eng. transl.). Dr. Niemeyer enumerates not less than five persons of this name, by distinguishing the son of Alphæus from James the less, and assuming that the James last mentioned in Acts i. 13 was not the brother, but the father of Judas (*Charakteristik der Bibel*. Halle, 1830, i. 399).—J. E. R.

JAMES, EPISTLE OF [ANTILEGOMENA]. This is called by Eusebius (*Hist. Eccles.* ii. 23) the first of the Catholic Epistles. As the writer simply styles himself *James, a servant of God and of the Lord Jesus Christ*, doubts have existed, both in ancient and modern times, respecting the true

Author of this Epistle.—It has been ascribed to no less than four different persons, viz. James, the son of Zebedee; James, the son of Alphæus (who were both of the number of the twelve apostles); James, our Lord's brother (Gal. i. 19); and to an anonymous author who assumed the name of James in order to procure authority to a supposititious writing.

The chief authority for ascribing this epistle to James the son of Zebedee, is the inscription to the Syriac manuscript, published by Widmandstadt, wherein it is termed 'the earliest writing in the New Testament,' and to an Arabic MS. cited by Cornelius a Lapide. Isidore of Seville, and other Spanish writers interested in maintaining that James travelled into Spain (Calmet's *Commentary*), assert that James the son of Zebedee visited in person the 'twelve tribes scattered' through that as well as other countries, and afterwards addressed to them this epistle. The Mozarabic liturgy also supports the same view, and the old Italic, published by Martianay, contains the inscription *Explicit Epistola Jacobi fil. Zebedæi.* But this opinion has obtained very few suffrages; for, as Calmet has observed (*Pref. to his Commentary*), it is not credible that so great progress had been made among the dispersed Jews before the martyrdom of James, which took place at Jerusalem about A.D. 42; and if the author, as has been commonly supposed, alludes to St. Paul's Epistles to the Romans (A.D. 58) and Galatians (A.D. 55), it would be a manifest anachronism to ascribe this epistle to the son of Zebedee.

The claim to the authorship of the epistle, therefore, rests between James 'the Lord's brother,' and James the son of Alphæus. In the preceding article the difficult question, whether these names do not, in fact, refer to the same person, has been examined: it suffices, in this place, to state that no writer who regards James 'the Lord's brother' as distinct from James the son of Alphæus, has held the latter to be the author of the epistle: and therefore, if no claim be advanced for the son of Zebedee, James 'the brother of the Lord' remains the only person whom the name at the head of this epistle could be intended to designate.

Hegesippus, cited by Eusebius (*Hist. Eccles.* ii. 23), acquaints us that James, the brother of Jesus, who obtained the surname of the Just, governed the church of Jerusalem along with, or after the apostles (μετὰ τῶν ἀποστόλων). Eusebius (*l. c.*) relates that he was the first who held the episcopate of Jerusalem (Jerome says for thirty years); and both he and Josephus (*Antiq.* xx. 9. 1) give an account of his martyrdom. To him, therefore, is the authorship of an epistle addressed to the Jewish Christians with good reason ascribed.

The other opinion, which considers the epistle as pseudepigraphal, we shall consider in treating of its

Authenticity and Canonical Authority.—Eusebius (*ut supra*) observes that 'James, the brother of Jesus, who is called Christ, is said to have written the first of the Catholic epistles; but it is to be observed, that it is considered spurious (νοθεύεται). Not many of the ancients have mentioned it, nor that called the Epistle of Jude. . . . Nevertheless, we know that these, with the rest, are publicly read in most of the churches.' To the same effect St. Jérome:—'St. James, surnamed the Just, who is called the Lord's brother, is the author of only one epistle, one of the seven called Catholic, which, however, is said to have been published by some other who assumed his name, although in the progress of time it gradually acquired authority.' Dr. Lardner is of opinion that this statement of St. Jerome is a mere repetition of that of Eusebius. It was also rejected in the fourth century by Theodore of Mopsuestia, and in the sixth by Cosmas Indicopleustes [ANTILEGOMENA]. It is, however, cited by Clemens Romanus in his first or genuine *Epistle to the Corinthians* (ch. x., comp. with James ii. 21, 23; and ch. xi., comp. with James ii. 25, and Heb. xi. 31). It seems to be alluded to in the Shepherd of Hermas, 'Resist the devil, and he will be confounded and flee from you.' It is also generally believed to be referred to by Irenæus (*Hær.* iv. 16, 2), 'Abraham believed God, and it was,' &c. Origen cites it in his *Comment. on John* i. xix. iv. 306, calling it, however, the *reputed* epistle of James [ANTILEGOMENA]. We have the authority of Cassiodorus for the fact that Clemens Alexandrinus commented on this epistle; and it is not only expressly cited by Ephrem Syrus (*Opp. Græc.* iii. 51, 'James the brother of our Lord says "weep and howl,"' together with other references), but it forms part of the ancient Syriac version, a work of the second century, and which contains no other of the *Antilegomena*, except the Epistle to the Hebrews. But though 'not quoted expressly by any of the Latin fathers before the fourth century' (Hug's *Introduction*), it was, soon after the time of the Council of Nice, received both in the eastern and western churches without any marks of doubt, and was admitted into the canon along with the other Scriptures by the Councils of Hippo and Carthage. Nor (with the above exceptions) does there appear to have been a voice raised against it since that period until the era of the Reformation, when the ancient doubts were revived by Erasmus (who maintains that the author was not an apostle, *Annot. in N. T.*), Cardinal Cajetan (*Comment. in 7 Canonic. Epist.*, 1532), and Luther. Cajetan observes that 'the salutation is unlike that of any other of the apostolical salutations, containing nothing of God, of grace, or peace, but sending greetings after the profane manner, from which, and his not naming himself an apostle, the author is rendered uncertain.' We have already referred to Luther's opinion [ANTILEGOMENA], who is generally accused of calling this an *epistle of straw.* The following are his words:—'This epistle, in comparison with the writings of John,

Paul, and Peter, is a right strawy epistle (eine rechte stroherne epistel), being destitute of an evangelic character' (*Præf. to N. T.*). And again (*Præf. to James and John*),—'This epistle, although rejected by the ancients, I notwithstanding praise and esteem, as it teaches no doctrines of men, and strenuously urges the law of God. But, to give my opinion frankly, though without prejudice to any other person, I do not hold it to be the writing of an apostle—and these are my reasons; first, it directly opposes St. Paul and other Scriptures in ascribing justification to works, saying that Abraham was justified by works, whereas St. Paul teaches that Abraham was justified by faith without works; .... but this James does nothing but urge on to the law and its works, and writes so confusedly and unconnectedly that it appears to me like as if some good pious man got hold of a number of sayings from the apostles' followers, and thus flung them on paper; or it is probably written by some one after the apostle's preaching.' The centuriators of Magdeburg follow the same train of thought. 'In addition to the argument derived from the testimony of antiquity, there are other and by no means obscure indications from which it may be collected that the authors of these epistles (James and Jude) were not apostles. The Epistle of James differs not slightly from the analogy of doctrine, in ascribing justification not to faith alone, but to works, and calls the law "a law of liberty," whereas the law "generates to bondage." .... Nor is it unlikely that it was written by some disciple of the apostles at the close of this (the first) century, or even later' (*Cent.* i. l. 2. c. 4 col. 54). The same sentiments are followed by Cheunits, Brentius, and others among the Lutherans, and among the Greeks by Cyril Lucaris, patriarch of Constantinople in the seventeenth century (*Lettres Anecdotes de Cyrille Lucar*, Amst. 1718, Letter vii. p. 85).

As Luther was the first who separated the canonical from the deutero-canonical or apocryphal books in the Old Testament [DEUTERO-CANONICAL], he also desired to make a similar distinction in the New [ANTILEGOMENA; HAGIOGRAPHA]; but the only variation which he actually adopted consisted in his placing the Epistle to the Hebrews between the Epistles of John and James [JUDE].

The Calvinists, who never questioned the authority of this epistle, followed the arrangement of the Council of Laodicea, in which the Epistle of James ranks as the first of the Catholic epistles; while the Council of Trent followed the order of the Council of Carthage and of the apostolical canons, viz., four Gospels, Acts, fourteen epistles of Paul (viz., Romans, 1 and 2 Corinthians, Galatians, Ephesians, Philippians, Colossians, 1 and 2 Thessalonians, 1 and 2 Timothy, Titus, Philemon, Hebrews), 1 and 2 Peter, 1, 2, and 3 John, James, Jude, Apocalypse. The Lutherans themselves soon acquiesced in the decisions of the universal church in regard to the canon of the New Testament, until the controversy, which had long slept, was again revived in Germany in modern times (De Wette, *Einleitung*). De Wette maintains that although this epistle was anterior to the Clementine, it could not have been written so early as the time of James, principally because the degree of tranquillity and comfort which appears to have been enjoyed by those to whom the epistle was addressed, seems to him to be inconsistent with the state of persecution which the Christians were subject to during the lifetime of St. James. He conceives it to have been written by some one who assumed the name of James in order to give authority to his arguments against Paul's doctrine of justification. Dr. Kern also, in his *Essay on the Origin of the Epistle of St. James* (in the Tubingen *Zeitschrift für Theologie*, 1835), took the same view, which, however, he has lately abandoned in his *Commentary*. But no one in modern times has combated this opinion with greater success than Neander (*History of the First Planting of the Christian Church*, vol. ii.). Neander (whose reasonings will not admit of abridgment) maintains that there is no discrepancy whatever between St. Paul and St. James; that it was not even the design of the latter to oppose any misapprehension respecting St. Paul's doctrine, but that they each addressed different classes of people from different standing points, using the same familiar examples. 'Paul,' he says, 'was obliged to point out to those who placed their dependence on the justifying power of the works of the law, the futility of such works in reference to justification, and to demonstrate that justification and sanctification could proceed only from the faith of the gospel: James, on the other hand, found it necessary to declare to those who imagined that they could be justified in God's sight by faith in the Jewish sense .... that this was completely valueless if their course of life were not conformed to it.' And in another place he observes that James 'received the new spirit under the old forms, similarly to many Catholics who have attained to free evangelical convictions, and yet have not been able to disengage themselves from the old ecclesiastical forms; or, like Luther, when he had already attained a knowledge of justification by faith, but before he was aware of the consequences flowing from it as opposed to the prevalent doctrines of the church.'

Age of the Epistle.—By those who consider James the Just, bishop of Jerusalem, to have been the author of this epistle, it is generally believed to have been written shortly before his martyrdom, which took place A.D. 62, six years before the destruction of Jerusalem, whose impending fate is alluded to in chap. v. Neander fixes its date at a time preceding the separate formation of Gentile Christian churches, before the relation of Gentiles and Jews to one another in the Christian Church had been brought under discussion, in the period of the first spread of Christianity in Syria, Cilicia, and the adjacent regions. It is addressed to Jewish Christians, the descendants of the twelve tribes; but the fact of its being written in Greek exhibits the author's desire to make it generally available to Christians.

Contents and Character of the Epistle.—This epistle commences with consolations addressed to the faithful converts, with exhortations to patience, humility, and practical piety (ch. i. 1-27). Undue respect to persons is then condemned, and love enjoined (ch. ii.). Erroneous ideas on justification are corrected (ii. 13-26), the temerity of new teachers is repressed (iii. 12); an unbridled tongue is inveighed against, and

heavenly wisdom contrasted with a spirit of covetousness (13-18). Swearing is prohibited (v. 12). The efficacy of prayer is proved by examples, and the unction of the sick by the Presbyters, together with prayer and mutual confession, are enjoined as instruments of recovery and of forgiveness of sins (v. 14-18). The approaching advent of the Lord is foretold (v. 7).

The style of this epistle is close and sententious, and is characterized by Calmet as consisting of 'expressions thrown together without connection, and adorned by poetical similitudes.' It has, however, been illustrated by no one with greater felicity than by the late learned and pious Bishop of Limerick, who has adduced many examples from James of poetical parallelism—which was the principal characteristic of Hebrew poetry. In reference to one of these passages (iii. 1-12) the bishop observes that 'its topics are so various, and, at first sight, so unconnected, not to say incongruous, that it may be thought a rash undertaking to explore the writer's train of thought, and to investigate the probable source and the orderly progress of his ideas—an evidence at once most brilliant and satisfactory that the easy flow of a great mind, when concentrated on a great object, will be found at least as logically just as it may be poetically beautiful.' 'His general manner,' he observes, 'combines the plainest and most practical good sense with the most vivid and poetical conception; the imagery various and luxuriant; the sentiments chastened and sober; his images, in truth, are so many analogical arguments, and if, at the first view, we are disposed to recreate ourselves with the poet, we soon feel that we must exert our hardier powers to keep pace with the logician' (Jebb's *Sacred Literature*). Seiler designates the style of this epistle as 'sometimes sublime and prophetical, nervous, and full of imagery' (*Biblical Hermeneutics*, § 315; Wright's translation, p. 548). Wetstein (note to ch. iv. 5) conceives the author to have been familiar with the book of Wisdom. In ch. i. 17 and iv. 4 the following perfect hexameters have been noticed—

Πᾶσα δόσις ἀγαθὴ καὶ πᾶν δώρημα τέλειον

and

Μοιχοὶ καὶ μοιχαλίδες οὐκ οἴδατε ὅτι φιλία.

The eloquence and persuasiveness of St. James's Epistle, as an ethical composition, are such as must command universal admiration.—W. W.

JAPHETH (יֶפֶת; Sept. Ἰάφεθ), a son of Noah. In Gen. v. 32 he is mentioned third in order; but some think, from Gen. x. 21 (comp. ix. 24), that he was the eldest of Noah's sons, begotten one hundred years before the flood (Michael. *Spicil.* ii. 66). In Gen. x. 2, sq. he is called the progenitor of the extensive tribes in the west (of Europe) and north (of Asia), of the Armenians, Medes, Greeks, Thracians, &c. De Wette (*Kritik*, p. 72) justly repudiates the opinion of the *Targumim*, both Jonath. and Hieros., who make Japheth the progenitor of the African tribes also. The Arabian traditions (D'Herbelot, *Bibl. Orient.*) rank Japheth among the prophets, and enumerate eleven of his sons, the progenitors of as many Asiatic nations, viz. Gin or Dshin (Chinese), Seklab (Slavonians), Manshuge, Gomari, Turk (Turks), Khalage, Khozar, Ros (Russians), Sussan, Gaz, and Torage. In these traditions he is therefore simply called progenitor of the Turks and Barbarians (ابو الترك والاعجم). To the seven sons of Japheth, mentioned in Gen. x. 2 and 1 Chron. i. 5, the Sept. and Eusebius add an eighth, *Elisha*, though not found in the text. Some (Battmann, Bochart, and Hasse) identify Japheth with the Ἰάπετος of Greek fable, the depository of many ethnographical traditions; while others, again, connect him with Hereus, mentioned in the ancient historian Sanchoniathon.—E. M.

JARHA (יַרְחָע; Sept. Ἰωχήλ), the Egyptian slave of a Hebrew named Sheshan, who married the daughter of his master, and was, of course, made free. As Sheshan had no sons, his posterity is traced through this connection (1 Chron. ii. 34-41), which is the only one of the kind mentioned in Scripture. Jarha was doubtless a proselyte, and the anecdote seems to belong to the period of the sojourn in Egypt, although it is not easy to see how an Egyptian could there be slave to an Israelite.

JASHER, BOOK OF (סֵפֶר הַיָּשָׁר), a work no longer extant, but cited in Josh. x. 13, and 2 Sam. i. 18. In the former it is thus introduced: 'And the sun stood still, and the moon stayed, until the people had avenged themselves upon their enemies. Is not this written in the book of Jasher? So the sun stood still in the midst of heaven, and hasted not to go down about a whole day,' &c. And in the passage referred to in 2 Sam. i. it stands thus: ver. 17. 'And David lamented with this lamentation over Saul and over Jonathan his son:' ver. 18. '(Also he bade them teach the children of Judah [the use of] the bow: behold it is written in the book of Jasher).' After which follows the lamentation of David. As the word Jasher signifies *just* or *upright*, by which word it is rendered in the margin of our Bibles, this book has been generally considered to have been so entitled as containing a history of *just men*. Bishop Lowth, however (*Prælect.* pp. 306, 307), conceives, from the poetical character of the two passages cited from it, that it was most probably a collection of national songs written at various times, and that it derived its name from *jashar*, 'he sang,' as Exod. xv. 1, *az Jashir Mosheh*, 'then sang Moses,' &c.; or from the circumstance of its having commenced with the word *Az Jashar*, as the different books of the Bible derived the names which they bore among the Jews from the initial word. It is, at the same time, by no means an improbable conjecture, that the book was so called from the name of its author. Josephus (*Antiq.* v. 1. 17) speaks of the book of Jasher as one of the 'books laid up in the temple.'

De Wette (*Einleitung*, § 169) endeavours to deduce an argument in favour of the late composition of the book of Joshua from the circumstances of its citing a work (viz. the book of Jasher) which 'points to the time of David, inasmuch as his lamentation over Saul and Jonathan is contained in it.' But it has been supposed by others (although the American translator of De Wette's *Introduction* looks upon this as quite improbable) that the book may, as a collection of poems, have received accessions at various periods,

and, nevertheless, been still quoted by its original name. Dr. Palfrey, who adopts this view of the book of Jasher in his *Lectures*, still refers the composition of Joshua to the time of Saul. Among the fathers, Theodoret (see Carpzov's *Introd.* p. 150) thinks the whole book of Joshua to be an extract from the book of Jasher, and that the author, 'fearing that his assertion of the standing still of the sun would not be credited,' therefore referred to the book itself as his authority for the account of the miracle (*Quæst.* xiv. *in Josh.*, t. i. part i. p. 202); whence, he adds, it is plain that some other person of a later date wrote this, taking the occasion from another book. Jerome is of opinion (*in Ezek.* xviii. p. 819) that the book of Jasher is no other than the book of Genesis, which is also the opinion of some Jewish authors. Others suppose it to include the Pentateuch (see Calmet's *Comment.* in loc.). Mr. Horne (*Introd.* vol. i.) asserts that 'some understand by the book of Jasher the book of Judges, as mention is therein made of the standing still of the sun.' [?] From the passage above referred to, 2 Sam. i. 18—'Also he bade them teach the children of Israel [the use of] the bow'—it has been supposed by some (see Dr. Adam Clarke's *Comment.* in loc., and Horne's *Introd.* vol. i.) that the book of Jasher contained a treatise on archery; but it has been observed (see Parker's translation of De Wette's *Introd.* vol. i. p. 301) that, according to the ancient mode of citation, which consisted in referring to some particular word in the document, 'the bow,' which the children of Israel were to be taught, indicated the poetical passage from the book of Jasher in which the 'bow of Jonathan' is mentioned (2 Sam. i. 22). De Wette's translator supposes that our English translators of the Bible were, perhaps, ignorant of this manner of reference, and he instances this as a 'ludicrous instance.'

The Book of Jasher is also the title of two Rabbinical works, one of which was written by Rabbi Tham in the thirteenth century, and printed at Cracow in 1617. It is a treatise on Jewish laws. The other was printed in 1625, and contains (see Batolocci's *Bibliotheca Rabbinica*, and Horne's *Introd.* vol. ii., *Bibliogr. App.*) some curious but many fabulous narrations; among other things, that it was discovered at the destruction of the temple in possession of an old man, who was found shut up in some place of concealment, and who had a great number of Hebrew books. It was brought to Spain, preserved at Seville, and published at Naples.

In the year 1751 there was published in London, by a type-founder of Bristol named Jacob Ilive, a book entitled '*The Book of Jasher, with Testimonies and Notes explanatory of the Text: to which is prefixed Various Readings:* translated into English from the Hebrew by Alcuin of Britain, who went a pilgrimage into the Holy Land.' This book was noticed in the *Monthly Review* for December 1751, which describes it as 'a palpable piece of contrivance, intended to impose upon the credulous and ignorant, to sap the credit of the books of Moses, and to blacken the character of Moses himself.' The reviewer adds that 'the *Book of Jasher* appears to have been constructed in part from the apocryphal writings of the Rabbins; in part from a cento of various scraps stolen from the Pentateuch; and in the remainder from the crazy imaginings of the author' (Ilive). Prefixed to this work is a narrative professing to be from the pen of Alcuin himself, giving a detailed account of his discovery of the Hebrew book of Jasher, in the city of Gazna in Persia, during a pilgrimage which he made from Bristol to the Holy Land, and of his translation of the same into English. This clumsy forgery in modern English, which appeared with the chapters of the thirteenth century, and the numerical versicular divisions of the sixteenth, having been exposed at the time of its appearance, and sunk into well-merited oblivion, was again revived in 1827, when it was reprinted at Bristol, and published in London as a new discovery of the *Book of Jasher*. A prospectus of a second edition of this reprint was issued in 1833 by the editor, who herein styles himself the *Rev.* C. R. Bond. Both Ilive's and Bond's edition contain the following pretended testimony to the value of the work from the celebrated Wickliffe:—'I have read the book of Jasher twice over, and I much approve of it, as a piece of great antiquity and curiosity, but I cannot assent that it should be made a part of the canon of Scripture.' They also contain a statement, from the pen of Alcuin, to the effect that he (Alcuin, not Jasher, as Mr. Horne supposes) gave the book before his death to a clergyman in Yorkshire (see Horne's *Introd.* vol. ii., *Bibliogr. App.*). It is further asserted by the new editor that the book was discovered in 1721, in the north of England; and that again, after the year 1750, it passed through various hands, until, in 1829, the *manuscript* came into his possession. The fraud was now again exposed in the Dublin *Christian Examiner* for 1831, wherein, among other curious letters relating to the pretended *Book of Jasher*, is a communication from the 'vicar of Donagh' in Ireland, who states that he had been himself favoured, in 1806, with the sight of a copy of this 'curious piece of antiquity,' which was in the possession of the Rev. R. Alexander, D.D., who then resided at New Ross in Ireland. Dr. Alexander, it appears, had made his transcript from 'a rare copy,' which he supposed to have been unique, then in possession of a Welsh clergyman, but refused the same favour to the 'vicar of Donagh.' The original work was published at 2*s.*, and the unacknowledged reprint was sold by the editor for £1. per copy. From a review of this work, inserted in the *British Critic* for January, 1834, it appears that several copies of this impudent and stupid fabrication were purchased by the 'simple, the charitable, the good-natured, or the careless.' This fraudulent literary hoax has obtained a notoriety far beyond its merits in consequence of the able critiques to which it gave rise, and of an elaborate refutation from the pen of Mr. Horne (*Introd.* vol. ii. *ut supra*). It seems to have been republished in New York in 1840.

The chief interest connected with the Scriptural book of Jasher arises from the circumstance that it is referred to as the authority for the standing still of the sun and moon. There are few passages in Biblical literature the explanation of which has more exercised the skill of commentators than this celebrated one. We shall here give a brief account of the most generally received interpretations.

The first is that which maintains that the account of the miracle is to be *literally* understood. According to this interpretation, which is the most ancient, the sun itself, which was then believed to have revolved round the earth, stayed his course for a day. Those who take this view argue that the theory of the *diurnal motion of the earth*, which has been the generally received one since the time of Galileo and Copernicus, is inconsistent with the Scripture narrative. Notwithstanding the general reception of the Copernican system of the universe, this view continued to be held by many divines, Protestant as well as Roman Catholic, and was strenuously maintained by Buddeus (*Hist. Eccles. V. T.* Halle, 1715, 1744, p. 828, sq.) and others in the last century.

But in more recent times the miracle has been explained so as to make it accord with the now received opinion respecting the earth's motion, and the Scripture narrative supposed to contain rather an optical and popular, than a literal account of what took place on this occasion. So that it was in reality the earth, and not the sun, which stood still at the command of Joshua.

Another opinion is that first suggested by Spinoza (*Tract. Theolog.-Politic.* c. ii. p. 22, and c. vi.), and afterwards maintained by Le Clerc (*Comment.* in loc.), that the miracle was produced by refraction only, causing the sun to appear above the horizon after its setting, or by some other atmospherical phenomena, which produced sufficient light to enable Joshua to pursue and discomfit his enemies.

The last opinion we shall mention is that of the learned Jew Maimonides (*More Nevo.* ii. c. 53), viz. that Joshua only asked of the Almighty to grant that he might defeat his enemies before the going down of the sun, and that God heard his prayer, inasmuch as before the close of day the five kings with their armies were cut in pieces. This opinion is favoured by Vatablus, in the marginal note to this passage (see Robert Stephens' edition of the Bible, fol. 1557), 'Lord, permit that the light of the sun and moon fail us not before our enemies are defeated.' Grotius, while he admitted that there was no difficulty in the Almighty's arresting the course of the sun, or making it reappear by refraction, approved of the explanation of Maimonides, which has been since that period adopted by many divines, including Jahn, among the Roman Catholics (who explains the whole as a sublime poetical trope, *Introd.* p. ii. § 30), and among orthodox Protestants, by a writer in the Berlin *Evangelische Kirchenzeitung*, Nov. 1832, supposed to be the editor, Professor Hengstenberg. Robinson's *Biblical Repository*, 1833, vol. iii. p. 791, sqq.) See Seiler's *Biblical Hermeneutics*, English Translator's note, pp. 175, 176.—W. W.

JASHOBEAM (יָשָׁבְעָם; Sept. Ἰεσεβαδά), son of Hachmoni, one of David's worthies, and the first named in the two lists which are given of them (2 Sam. xxiii 8; 1 Chron. xi. 11). One of these texts is held to have suffered through the negligence of copyists, and as Jashobeam is not historically known, commentators have been much embarrassed in comparing them. The former attributes to him the defeat of 800, the latter of 300 Philistines; and the question has been whether there is a mistake of figures in one of these accounts, or whether two different exploits are recorded. Further difficulties will appear in comparing the two texts. We have assumed Jashobeam to be intended in both; but this is open to question. In Chronicles we read, 'Jashobeam, the Hachmonite, chief of the captains: he lifted up his spear against 300 men, slain by him at one time;' but in Samuel [margin], 'Joseb-basebeth the Tachmonite, chief among the three, Adino, of Ezni, who lifted up his spear against 800 men whom he slew.' That Jashobeam the Hachmonite, and Joseb-besheth the Tachmonite, are the same person is clear; but may not Adino of Ezni, whose name forms the immediate antecedent of the exploit, which, as related here, constitutes the sole discrepancy between the two texts, be another person? Many so explain it, and thus obtain a solution of the difficulty. But a further comparison of the two verses will again suggest that the whole of the last cited must belong to Jashobeam; for not only is the parallel incomplete, if we take the last clause from him and assign it to another, but in doing this we leave the 'chief among the captains' without an exploit, in a list which records some feat of every hero. We incline, therefore, to the opinion of those who suppose that Jashobeam, or Joseb-besebeth, was the title as chief, Adino the proper name, and Hachmonite the patronymic of the same person; and the discrepancy which thus remains, we account for, not on the supposition of different exploits, but of one of those corruptions of numbers of which several will be found in comparing the books of Chronicles with those of Samuel and Kings.

The exploit of breaking through the host of the Philistines to procure David a draught of water from the well of Bethlehem, is ascribed to the three chief heroes, and therefore to Jashobeam, who was the first of the three (2 Sam. xxiii. 13-17; 1 Chron. xi. 15-19).

A Jashobeam is named among the Korhites who came to David at Ziklag (1 Chron. xii. 6); but this could scarcely have been the same with the preceding.

We also find a Jashobeam who commanded 24,000, and did duty in David's court in the month Nisan (1 Chron. xxvii. 2). He was the son of Zabdiel; if, therefore, he was the same as the first Jashobeam, his patronymic of 'the Hachmonite' must be referred to his race rather than to his immediate father. This seems likely.

JASON (Ἰάσων), a kinsman of St. Paul, and his host at Thessalonica, where the Jews forced his house in order to seize the Apostle. Not finding the apostle, they dragged Jason himself and some other converts before the magistrates, who released them with an admonition (A.D. 53). Jason appears to have accompanied the Apostle to Corinth (Acts xvii. 5-9; Rom. xvi. 21).

JASPER. [YASHPEH.]

JAVAN, the fourth son of Japhet. The interest connected with his name arises from his being the supposed progenitor of the original settlers in Greece and its isles [NATIONS, DISPERSION OF].

JAVELIN. [ARMS.]

JEBUSITES (יְבוּסִי; Sept. Ἰεβουσαῖοι), one of the most powerful of the nations of Canaan, who settled about Mount Moriah, where they built Jerusalem, and called it Jebus, after the name of their founder (1 Chron. xi. 4). Although

they were defeated with much slaughter, and Adonizedek, their king, slain by Joshua (Josh. x.), they were not wholly subdued, but were able to retain their city till after his death (Judg. i. 8), and were not entirely dispossessed of it till the time of David (2 Sam. v.). By that time the inveteracy of the enmity between the Hebrews and such of the original inhabitants as remained in the land had much abated, and the rights of private property were respected by the conquerors. This we discover from the fact that the site on which the Temple afterwards stood belonged to a Jebusite, named Araunah, from whom it was purchased by king David, who declined to accept it as a free gift from the owner (2 Sam. xxiv.). This is the last we hear of the Jebusites.

JEDUTHUN (יְדוּתוּן, *praise-giver;* Sept. Ἰδιθούν), a Levite of Merari's family, and one of the four great masters of the temple music (1 Chron. xvi. 41, 42). This name is also put for his descendants, who occur later as singers and players on instruments (2 Chron. xxxv. 15; Neh. xi. 17). In the latter signification it occurs in the superscriptions to Ps. xxxix., lxii., lxxvii.; but Aben Ezra supposes it to denote here—the requiring of a song, and Jarchi, of a musical instrument.

1. JEHOAHAZ (יְהוֹאָחָז, *God-sustained;* Sept. Ἰωάχαζ), son of Jehu, king of Israel, who succeeded his father in B.C. 856, and reigned seventeen years. As he followed the evil courses of the house of Jeroboam, the Syrians under Hazael and Benhadad were suffered to prevail over him; so that, at length, he had only left of all his forces fifty horsemen, ten chariots, and 10,000 foot. Overwhelmed by his calamities, Jehoahaz at length acknowledged the authority of Jehovah over Israel, and humbled himself before him; in consideration of which a deliverer was raised up for Israel in the person of Joash, this king's son, who was enabled to expel the Syrians and re-establish the affairs of the kingdom (2 Kings xiii. 1-9, 25).

2. JEHOAHAZ, otherwise called SHALLUM, seventeenth king of Judah, son of Josiah, whose reign began and ended in the year B.C. 608. After his father had been slain in resisting the progress of Pharaoh Necho, Jehoahaz, who was then twenty-three years of age, was raised to the throne by the people, and received at Jerusalem the regal anointing, which seems to have been usually omitted in times of order and of regular succession. He found the land full of trouble, but free from idolatry. Instead, however, of following the excellent example of his father, Jehoahaz fell into the accustomed crimes of his predecessors; and under the encouragements which his example or indifference offered, the idols soon re-appeared. It seems strange that in a time so short, and which must have been much occupied in arranging plans for resisting or pacifying the Egyptian king, he should have been able to deserve the stigma which the sacred record has left upon his name. But there is no limit except in the greatness of the divine power to the activity of evil dispositions. The sway of Jehoahaz was terminated in three months, when Pharaoh Necho, on his victorious return from the Euphrates, thinking it politic to reject a king not nominated by himself, removed him from the throne, and set thereon his brother Jehoiakim. This reign was the shortest in the kingdom of Judah, although in that of Israel there were several shorter. The deposed king was at first taken as a prisoner to Riblah in Syria; but was eventually carried to Egypt, where he died (2 Kings xxiii. 30-35; 2 Chron. xxxvi. 1-4; 1 Chron. iii. 15; Jer. xxii. 10-12).

The anointing of this king has drawn attention to the defect of his title as the reason for the addition of that solemn ceremony. It appears from 1 Chron. iii. 15 that Josiah had four sons, of whom Johanan is expressly said to have been 'the first-born.' But he seems to have died before his father, as we nowhere find his name historically mentioned, while those of the other brothers are familiar to us. If, therefore, he died childless, and Jehoahaz were the next son, his claim would have been good. But he was not the next son. His name, as Shallum, occurs last of the four in 1 Chron. iii. 15; and from the historical notices in 2 Kings xxiii. and 1 Chron. xxxvi. we ascertain that when Josiah died the ages of the three surviving sons were, Eliakim (Jehoiakim) twenty-five years, Jehoahaz (Shallum) twenty-three years, Mattaniah (Zedekiah) ten years; consequently Jehoahaz was preferred by the popular favour above his elder brother Jehoiakim, and the anointing, therefore, was doubtless intended to give to his imperfect claim the weight of that solemn ceremony. It was also probably suspected that, as actually took place, the Egyptian king would seek to annul a popular election unsanctioned by himself; but as the Egyptians anointed their own kings, and attached much importance to the ceremony, the possibility that he would hesitate more to remove an anointed than an unanointed king might afford a further reason for the anointing of Jehoahaz [ANOINTING].

Jehoahaz is supposed to be the person who is designated under the emblem of a young lion carried in chains to Egypt (Ezek. xix. 3, 4).

JEHOASH. [JOASH.]

JEHOIACHIN (יְהוֹיָכִין, *God-appointed;* Sept. Ἰωαχίμ), by contraction JECONIAH and CONIAH, nineteenth king of Judah, and son of Jehoiakim. When his father was slain, B.C. 599, the King of Babylon allowed him, as the rightful heir, to succeed. He was then eighteen years of age according to 2 Kings xxiv. 8; but only eight according to 2 Chron. xxxvi. 9. Many attempts have been made to reconcile these dates, the most usual solution being that he had reigned ten years in conjunction with his father, so that he was eight when he began his joint reign, but eighteen when he began to reign alone. There are, however, difficulties in this view, which, perhaps, leave it the safest course to conclude that 'eight' in 2 Chron. xxxvi. 9, is a corruption of the text, such as might easily occur from the relation of the numbers eight and eighteen.

Jehoiachin followed the evil courses which had already brought so much disaster upon the royal house of David, and upon the people under its sway. He seems to have very speedily indicated a political bias adverse to the interests of the Chaldæan empire; for in three months after his accession we find the generals of Nebuchadnezzar again laying siege to Jerusalem, according to the predictions of Jeremiah (xxii. 18—xxiv. 30). Convinced of the futility of resistance, Jehoiachin

went out and surrendered as soon as Nebuchadnezzar arrived in person before the city. He was sent away as a captive to Babylon, with his mother, his generals, and his troops, together with the artificers and other inhabitants of Jerusalem, to the number of ten thousand. Few were left but the poorer sort of people and the unskilled labourers, few, indeed, whose presence could be useful in Babylon or dangerous in Palestine. Neither did the Babylonian king neglect to remove the treasures which could yet be gleaned from the palace or the temple; and he now made spoil of those sacred vessels of gold which had been spared on former occasions. These were cut up for present use of the metal or for more convenient transport; whereas those formerly taken had been sent to Babylon entire, and there laid up as trophies of victory. Thus ended an unhappy reign of three months and ten days. If the Chaldæan king had then put an end to the show of a monarchy and annexed the country to his own dominions, the event would probably have been less unhappy for the nation. But still adhering to his former policy, he placed on the throne Mattaniah, the only surviving son of Josiah, whose named he changed to Zedekiah (2 Kings xxiv. 1-16; 2 Chron. xxxvi. 9, 10; Jer. xxix. 2; xxxvii. 1).

Jehoiachin remained in prison at Babylon during the lifetime of Nebuchadnezzar; but when that prince died, his son, Evil-merodach, not only released him, but gave him an honourable seat at his own table, with precedence over all the other dethroned kings who were kept at Babylon, and an allowance for the support of his rank (2 Kings xxv. 27-30; Jer. lii. 31-34). To what he owed this favour we are not told; but the Jewish commentators allege that Evil-merodach had himself been put into prison by his father during the last year of his reign, and had there contracted an intimate friendship with the deposed king of Judah.

The name of Jechoniah re-appears to fix the epoch of several of the prophecies of Ezekiel (Ezek. i. 2), and of the deportation which terminated his reign (Esth. ii. vi). In the genealogy of Christ (Matt. i. 11) he is named as the 'son of Josias' his uncle.

JEHOIADA (יְהוֹיָדָע, *God-known;* Sept. Ἰωδαέ), high-priest in the times of Ahaziah and Athaliah. He is only known from the part which he took in recovering the throne of Judah for the young Joash, who had been saved by his wife Jehoshehah from the massacre by which Athaliah sought to exterminate the royal line of David. The particulars of this transaction are related under other heads [ATHALIAH; JOASH]. Jehoiada manifested much decision and forecast on this occasion; and he used for good the great power which devolved upon him during the minority of the young king, and the influence which he continued to enjoy as long as he lived. The value of this influence is shown by the misconduct and the disorders of the kingdom after his death. He died in B.C. 834, at the age of 130, and his remains were honoured with a place in the sepulchre of the kings at Jerusalem (2 Kings xi. 12; 2 Chron. xxiii. xxiv.).

JEHOIAKIM (יְהוֹיָקִים, *God-established;* Sept. Ἰωακίμ), originally ELIAKIM, second son of Josiah, and eighteenth king of Judah. On the death of his father the people raised to the throne his younger brother Jehoahaz; but three months after, when the Egyptian king returned from the Euphrates, he removed Jehoahaz, and gave the crown to the rightful heir, Eliakim, whose name he changed to Jehoiakim. This change of name often took place in similar circumstances; and the altered name was in fact the badge of a tributary prince. Jehoiakim began to reign in B.C. 608, and reigned eleven years. He of course occupied the position of a vassal of the Egyptian empire, and in that capacity had to lay upon the people heavy imposts to pay the appointed tribute, in addition to the ordinary expenses of government. But, as if this were not enough, it would seem from various passages in Jeremiah (Jer. xxii. 13, &c.) that Jehoiakim aggravated the public charges, and consequently the public calamities, by a degree of luxury and magnificence in his establishments and structures very ill-suited to the condition of his kingdom and the position which he occupied. Hence much extortion and wrongdoing, much privation and deceit; and when we add to this a general forgetfulness of God and proneness to idolatry, we have the outlines of that picture which the prophet Jeremiah has drawn in the most sombre hues.

However heavy may have been the Egyptian yoke, Jehoiakim was destined to pass under one heavier still. In his time the empire of Western Asia was disputed between the kings of Egypt and Babylon; and the kingdom of Judah, pressed between these mighty rivals, and necessarily either the tributary or very feeble enemy of the one or the other, could not but suffer nearly equally, whichever proved the conqueror. The kings of Judah were therefore placed in a position of peculiar difficulty, out of which they could only escape with safety by the exercise of great discretion, and through the special mercies of the God of Israel, who had by his high covenant engaged to protect them so long as they walked uprightly. This they did not, and were in consequence abandoned to their doom.

In the third year of his reign Jehoiakim, being besieged in Jerusalem, was forced to submit to Nebuchadnezzar, and was by his order laden with chains, with the intention of sending him captive to Babylon (1 Chron. xxxvi. 6); but eventually the conqueror changed his mind and restored the crown to him. Many persons, however, of high family, and some even of the royal blood, were sent away to Babylon. Among these was Daniel, then a mere youth. A large proportion of the treasures and sacred vessels of the temple were also taken away and deposited in the idol-temple at Babylon (Dan. i. 1, 2). The year following the Egyptians were defeated upon the Euphrates (Jer. xlvi. 2), and Jehoiakim, when he saw the remains of the defeated army pass by his territory, could not but perceive how vain had been that reliance upon Egypt against which he had been constantly cautioned by Jeremiah (Jer. xxxi. 1; xlv. 1). In the same year the prophet caused a collection of his prophecies to be written out by his faithful Baruch, and to be read publicly by him in the court of the temple. This coming to the knowledge of the king, he sent for it and had it read before him. But he heard not much of the bitter denunciations

with which it was charged, before he took the roll from the reader, and after cutting it in pieces threw it into the brasier which, it being winter, was burning before him in the hall. The counsel of God against him, however, stood sure; a fresh roll was written, with the addition of a further and most awful denunciation against the king, occasioned by this foolish and sacrilegious act. 'He shall have none to sit upon the throne of David: and his dead body shall be cast out in the day to the heat and in the night to the frost' (Jer. xxxvi.). All this, however, appears to have made little impression upon Jehoiakim, who still walked in his old paths.

The condition of the kingdom as tributary to the Chaldæans probably differed little from that in which it stood as tributary to the Egyptians, except that its resources were more exhausted by the course of time, and that its gold went to the east instead of the south. But at length, after three years of subjection, Jehoiakim, finding the king of Babylon fully engaged elsewhere, and deluded by the Egyptian party in his court, ventured to withhold his tribute, and thereby to throw off the Chaldæan yoke. This step, taken contrary to the earnest remonstrances of Jeremiah, was the ruin of Jehoiakim. It might seem successful for a little, from the Chaldæans not then having leisure to attend to the affairs of this quarter. In due time, however, the land was invaded by their armies, accompanied by a vast number of auxiliaries from the neighbouring countries, the Edomites, Moabites, and others, who were for the most part actuated by a fierce hatred against the Jewish name and nation. The events of the war are not related. Jerusalem was taken, or rather surrendered on terms, which Josephus alleges were little heeded by Nebuchadnezzar. It is certain that Jehoiakim was slain, but whether in one of the actions, or, as Josephus says, after the surrender, we cannot determine. His body remained exposed and unlamented without the city, under the circumstances foretold by the prophet—'They shall not lament for him, saying, Ah, my brother! or, Ah, sister! They shall not lament for him, saying, Ah, lord! or, Ah, his glory! He shall be buried with the burial of an ass, drawn and cast forth beyond the gates of Jerusalem' (Jer. xxii. 18, 19; 1 Chron. iii. 15; 2 Kings xxiii. 34-37; xxiv. 1-7; 2 Chron. xxxvi. 4-8).

It was not the object of Nebuchadnezzar to destroy altogether a power which, as tributary to him, formed a serviceable outpost towards Egypt, which seems to have been the great final object of all his designs in this quarter. He therefore still maintained the throne of Judah, and placed on it Jehoiachin, the son of the late king. He, however, sent away another body, a second corps of the nobles and chief persons of the nation, three thousand in number, among whom was Ezekiel, afterwards called to prophesy in the land of his exile.

JEHONADAB. [Jonadab.]

JEHORAM (יְהוֹרָם, *God-exalted*; Sept. Ἰωράμ), eldest son and successor of Jehoshaphat, and fifth king of Judah, who began to reign (separately) in B.C. 889, at the age of thirty-five years, and reigned five years. It is indeed said in the general account that he began to reign at the age of thirty-two, and that he reigned eight years; but the conclusions deducible from the fact that his reign began in the seventh year of Joram, king of Israel, show that the reign thus stated dates back three years into the reign of his father, who from this is seen to have associated his eldest son with him in the later years of his reign.

Jehoram profited little by this association. He had unhappily been married to Athaliah, the daughter of Ahab and Jezebel; and her influence seems to have neutralized all the good he might have derived from the example of his father. One of the first acts of his reign was to put his brothers to death and seize the valuable appanages which their father had in his lifetime bestowed upon them. After this we are not surprised to find him giving way to the gross idolatries of that new and strange kind—the Phœnician—which had been brought into Israel by Jezebel, and into Judah by her daughter Athaliah. For these atrocities the Lord let forth his anger against Jehoram and his kingdom. The Edomites revolted, and, according to old prophecies (Gen. xxvii. 40), shook off the yoke of Judah. The Philistines on one side, and the Arabians and Cushites on the other, also grew bold against a king forsaken of God, and in repeated invasions spoiled the land of all its substance; they even ravaged the royal palaces, and took away the wives and children of the king, leaving him only one son, Ahaziah. Nor was this all; Jehoram was in his last days afflicted with a frightful disease in his bowels, which, from the terms employed in describing it, appears to have been malignant dysentery in its most shocking and tormenting form. After a disgraceful reign, and a most painful death, public opinion inflicted the posthumous dishonour of refusing him a place in the sepulchre of the kings. Jehoram was by far the most impious and cruel tyrant that had as yet occupied the throne of Judah, though he was rivalled or surpassed by some of his successors (2 Kings viii. 16-24; 2 Chron. xxi.).

2. JEHORAM, King of Israel [Joram].

JEHOSHAPHAT (יְהוֹשָׁפָט, *God-judged*; Sept. Ἰωσαφάτ), fourteenth king of Judah, and son of Asa, whom he succeeded in B.C. 914, at the age of thirty-five, and reigned twenty-five years. He commenced his reign by fortifying his kingdom against Israel; and having thus secured himself against surprise from the quarter which gave most disturbance to him, he proceeded to purge the land from the idolatries and idolatrous monuments by which it was still tainted. Even the high places and groves, which former well-disposed kings had suffered to remain, were by the zeal of Jehoshaphat in a great measure destroyed. The chiefs, with priests and Levites, proceeded from town to town, with the book of the law in their hands, instructing the people, and calling back their wandering affections to the religion of their fathers. This was a beautiful and interesting circumstance in the operations of the young king. Other good princes had been content to smite down the outward show of idolatry by force of hand; but Jehoshaphat saw that this was not of itself sufficient, and that the basis of a solid reformation must be laid by providing for the better instruction of the people in their religious duties and privileges.

Jehoshaphat was too well instructed in the great principles of the theocracy not to know that his faithful conduct had entitled him to expect the divine protection. Of that protection he soon had manifest proofs. At home he enjoyed peace and abundance, and abroad security and honour. His treasuries were filled with the 'presents' which the blessing of God upon the people, 'in their basket and their store,' enabled them to bring. His renown extended into the neighbouring nations, and the Philistines, as well as the adjoining Arabian tribes, paid him rich tributes in silver and in cattle. He was thus enabled to put all his towns in good condition, to erect fortresses, to organize a powerful army, and to raise his kingdom to a degree of importance and splendour which it had not enjoyed since the revolt of the ten tribes.

The weak and impious Ahab at that time occupied the throne of Israel; and Jehoshaphat, having nothing to fear from his power, sought, or at least did not repel, an alliance with him. This is alleged to have been the grand mistake of his reign; and that it was such is proved by the consequences. Ahab might be benefited by the connection, but under no circumstance could it be of service to Jehoshaphat or his kingdom, and it might, as it actually did, involve him in much disgrace and disaster, and bring bloodshed and trouble into his house. His fault seems to have been the result of that easiness of temper and overflowing amiability of disposition, which the careful student may trace in his character; and which, although very engaging attributes in private life, are not always among the safest or most valuable qualities which a king in his public capacity might possess.

After a few years we find Jehoshaphat on a visit to Ahab, in Samaria, being the first time any of the kings of Israel and Judah had met in peace. He here experienced a reception worthy of his greatness; but Ahab failed not to take advantage of the occasion, and so worked upon the weak points of his character as to prevail upon him to take arms with him against the Syrians, with whom, hitherto, the kingdom of Judah never had had any war or occasion of quarrel. However, Jehoshaphat was not so far infatuated as to proceed to the war without consulting God, who, according to the principles of the theocratic government, was the final arbiter of war and peace. The false prophets of Ahab poured forth ample promises of success, and one of them, named Zedekiah, resorting to material symbols, made him horns of iron, saying, 'Thus saith the Lord, with these shalt thou smite the Syrians till they be consumed.' Still Jehoshaphat was not satisfied; and the answer to his further inquiries extorted from him a rebuke of the reluctance which Ahab manifested to call Micah, 'the prophet of the Lord.' The fearless words of this prophet did not make the impression upon the king of Judah which might have been expected; or, probably, he then felt himself too deeply bound in honour to recede. He went to the fatal battle of Ramoth-Gilead, and there nearly became the victim of a plan which Ahab had laid for his own safety at the expense of his too-confiding ally. He persuaded Jehoshaphat to appear as king, while he himself went disguised to the battle. This brought the heat of the contest around him, as the Syrians took him for Ahab; and if they had not in time discovered their mistake, he would certainly have been slain. Ahab was killed, and the battle lost [Ahab]; but Jehoshaphat escaped, and returned to Jerusalem.

On his return from this imprudent expedition he was met by the just reproaches of the prophet Jehu. The best atonement he could make for this error was by the course he actually took. He resumed his labours in the further extirpation of idolatry, in the instruction of the people, and the improvement of his realm. He now made a tour of his kingdom in person, that he might see the ordinances of God duly established, and witness the due execution of his intentions respecting the instruction of the people in the divine law. This tour enabled him to discern many defects in the local administration of justice, which he then applied himself to remedy. He appointed magistrates in every city, for the determination of causes civil and ecclesiastical; and the nature of the abuses to which the administration of justice was in those days exposed, may be gathered from his excellent charge to them:— 'Take heed what ye do, for ye judge not for man, but for the Lord, who is with you in the judgment. Wherefore now let the fear of the Lord be upon you; take heed and do it: for there is no iniquity with the Lord our God, nor respect of persons, nor taking of gifts.' Then he established a supreme council of justice at Jerusalem, composed of priests, Levites, and 'the chiefs of the fathers;' to which difficult cases were referred, and appeals brought from the provincial tribunals. This tribunal also was inducted by a weighty but short charge from the king, whose conduct in this and other matters places him at the very head of the monarchs who reigned over Judah as a separate kingdom.

The activity of Jehoshaphat's mind was then turned towards the revival of that maritime commerce which had been established by Solomon. The land of Edom and the ports of the Elanitic Gulf were still under the power of Judah; and in them the king prepared a fleet for the voyage to Ophir. Unhappily, however, he yielded to the wish of the king of Israel, and allowed him to take part in the enterprise. For this the expedition was doomed of God, and the vessels were wrecked almost as soon as they quitted port. Instructed by Eliezer, the prophet, as to the cause of this disaster, Jehoshaphat equipped a new fleet, and having this time declined the co-operation of the king of Israel, the voyage prospered. The trade was not, however, prosecuted with any zeal, and was soon abandoned [Commerce].

In accounting for the disposition of Jehoshaphat to contract alliances with the king of Israel, we are to remember that there existed a powerful tie between the two courts in the marriage of Jehoshaphat's eldest son with Athaliah, the daughter of Ahab; and, when we advert to the part in public affairs which that princess afterwards took, it may well be conceived that even thus early she possessed an influence for evil in the court of Judah.

After the death of Ahaziah, king of Israel, Joram, his successor, persuaded Jehoshaphat to join him in an expedition against Moab. This alliance was, however, on political grounds, more excusable than the two former, as the Moabites, who were under tribute to Israel, might draw into

their cause the Edomites, who were tributary to Judah. Besides, Moab could be invaded with most advantage from the south, round by the end of the Dead Sea; and the king of Israel could not gain access to them in that quarter but by marching through the territories of Jehoshaphat. The latter not only joined Joram with his own army, but required his tributary, the king of Edom, to bring his forces into the field. During seven days' march through the wilderness of Edom, the army suffered much from want of water; and by the time the allies came in sight of the army of Moab, they were ready to perish from thirst. In this emergency the pious Jehoshaphat thought, as usual, of consulting the Lord; and hearing that the prophet Elisha was in the camp, the three kings proceeded to his tent. For the sake of Jehoshaphat, and for his sake only, deliverance was promised; and it came during the ensuing night, in the shape of an abundant supply of water, which rolled down the exhausted wadys, and filled the pools and hollow grounds. Afterwards Jehoshaphat took his full part in the operations of the campaign, till the armies were induced to withdraw in horror, by witnessing the dreadful act of Mesha, king of Moab, in offering up his eldest son in sacrifice upon the wall of the town in which he was shut up.

This war kindled another much more dangerous to Jehoshaphat. The Moabites, being highly exasperated at the part he had taken against them, turned all their wrath upon him. They induced their kindred, the Ammonites, to join them, obtained auxiliaries from the Syrians, and even drew over the Edomites; so that the strength of all the neighbouring nations may be said to have been united for this great enterprise. The allied forces entered the land of Judah and encamped at Engedi, near the western border of the Dead Sea. In this extremity Jehoshaphat felt that all his defence lay with God. A solemn fast was held, and the people repaired from the towns to Jerusalem to seek help of the Lord. In the presence of the assembled multitude the king, in the court of the temple, offered up a fervent prayer to God, concluding with—'O our God, wilt *thou* not judge them, for *we* have no might against this great company that cometh against us, neither know we what to do; but our eyes are upon thee.' He ceased; and in the midst of the silence which ensued, a voice was raised pronouncing deliverance in the name of the Lord, and telling them to go out on the morrow to the cliffs overlooking the camp of the enemy, and see them all overthrown without a blow from them. The voice was that of Jahaziel, one of the Levites. His words came to pass. The allies quarrelled among themselves and destroyed each other; so that when the Judahites came the next day they found their dreaded enemies all dead, and nothing was left for them but to take the rich spoils of the slain. This done, they returned with triumphal songs to Jerusalem. This great event was recognised even by the neighbouring nations as the act of God; and so strong was the impression which it made upon them, that the remainder of the good king's reign was altogether undisturbed. His death, however, took place not very long after this, at the age of sixty, after having reigned twenty-five years, B.C. 896. He left the kingdom in a prosperous condition to his eldest son Jehoram, whom he had in the last years of his life associated with him in the government.

'Jehoshaphat, who sought the Lord with all his heart,' was the character given to this king by Jehu, when, on that account, he gave to his grandsire an honourable grave (2 Chron. xxii. 9). And this, in fact, was the sum and substance of his character. The Hebrew annals offer the example of no king who more carefully squared all his conduct by the principles of the theocracy. He kept the Lord always before his eyes, and was in all things obedient to his will when made known to him by the prophets. Few of the kings of Judah manifested so much zeal for the real welfare of his people, or took measures so judicious to promote it. His good talents, the benevolence of his disposition, and his generally sound judgment are shown not only in the great measures of domestic policy which distinguished his reign, but by the manner in which they were executed. No trace can be found in him of that pride which dishonoured some and ruined others of the kings who preceded and followed him. Most of his errors arose from that dangerous facility of temper which sometimes led him to act against the dictates of his naturally sound judgment, or prevented that judgment from being fairly exercised. The kingdom of Judah was never happier or more prosperous than under his reign; and this, perhaps, is the highest praise that can be given to any king.

JEHOSHAPHAT, VALLEY OF, the name now given to the valley which bounds Jerusalem on the east, and separates it from the Mount of Olives [JERUSALEM].

In Joel iii. 2, 12, we read, 'the Lord will gather all nations in the valley of Jehoshaphat, and plead with them there.' Many interpreters, Jewish and Christian, conclude from this that the last judgment is to take place in the above-mentioned valley. But there is no reason to suppose that the valley then bore any such name; and more discreet interpreters understand the text to denote a valley in which some great victory was to be won, most probably by Nebuchadnezzar, which should utterly discomfit the ancient enemies of Israel, and resemble the victory which Jehoshaphat obtained over the Ammonites, Moabites, and Edomites (2 Chron. xx. 22-26). Others *translate* the name Jehoshaphat into *God's judgment*, and thus read, 'the valley of God's judgment,' which is doubtless symbolical, like 'the valley of decision,' *i. e.* of punishment, in the same chapter.

JEHOSHEBA, daughter of Jehoram, sister of Ahaziah, and aunt of Joash, kings of Judah. The last of these owed his life to her, and his crown to her husband, the high-priest Jehoiada [JEHOIADA].

JEHOVAH (יְהוָה), or rather perhaps JAHVEH (יַהְוֶה), according to the reading suggested by Ewald, Havernick, and others—the name by which God was pleased to make himself known, under the covenant, to the ancient Hebrews (Exod. vi. 2, 3). The import of this name has been considered under the head GOD.

JEHU (יֵהוּא, *God is;* Sept. Ἰηοῦ; Cod. Alex. Ἐηοῦ), tenth king of Israel, and founder of its

fourth dynasty, who began to reign in B.C. 884, and reigned twenty-eight years.

Jehu held a command in the Israelite army posted at Ramoth Gilead to hold in check the Syrians, who of late years had made strenuous efforts to extend their frontier to the Jordan, and had possessed themselves of much of the territory of the Israelites east of that river. The contest was in fact still carried on which had begun many years before in the reign of Ahab, the present king's father, who had lost his life in battle before this very Ramoth Gilead. Ahaziah, king of Judah, had taken part with Joram, king of Israel, in this war; and as the latter had been severely wounded in a recent action, and had gone to Jezreel to be healed of his wounds, Ahaziah had also gone thither on a visit of sympathy to him.

In this state of affairs a council of war was held among the military commanders in camp, when very unexpectedly one of the disciples of the prophets, known for such by his garb, appeared at the door of the tent, and called forth Jehu, declaring that he had a message to deliver to him. He had been sent by Elisha the prophet, in discharge of a duty which long before had been confided by the Lord to Elijah (1 Kings xix. 16), and from him had devolved on his successor. When they were alone the young man drew forth a horn of oil and poured it upon Jehu's head, with the words, 'Thus saith the Lord God of Israel, I have anointed thee king over the people of the Lord, even over Israel. And thou shalt smite the house of Ahab thy master, that I may avenge the blood of my servants the prophets, and the blood of all the servants of the Lord, at the hand of Jezebel' (2 Kings ix. 7, 8). Surprising as this message must have been, and awful the duty which it imposed, Jehu was fully equal to the task and the occasion. He returned to the council, probably with an altered air, for he was asked what had been the communication of the young prophet to him. He told them plainly; and they were obviously ripe for defection from the house of Ahab, for they were all delighted at the news, and taking him in triumph to 'the top of the stairs,' they spread their mantles beneath his feet, and proclaimed him king by sound of trumpet in the presence of all the troops.

Jehu was not a man to lose any advantage through remissness. He immediately entered his chariot, in order that his presence at Jezreel should be the first announcement which Joram could receive of this revolution.

As soon as the advance of Jehu and his party was seen in the distance by the watchmen upon the palace-tower in Jezreel, two messengers were successively sent forth to meet him, and were commanded by Jehu to follow in his rear. But when the watchman reported that he could now recognise the furious driving of Jehu, Joram went forth himself to meet him, and was accompanied by the king of Judah. They met in the field of Naboth, so fatal to the house of Ahab. The king saluted him with 'Is it peace, Jehu?' and received the answer, 'What peace, so long as the whoredoms (idolatries) of thy mother Jezebel and her witchcrafts are so many?' This completely opened the eyes of Joram, who exclaimed to the king of Judah, 'There is treachery, O Ahaziah!' and turned to flee. But Jehu felt no infirmity of purpose, and knew that the slightest wavering might be fatal to him. He therefore drew a bow with his full strength and sent forth an arrow which passed through the king's heart. Jehu caused the body to be thrown back into the field of Naboth, out of which he had passed in his attempt at flight, and grimly remarked to Bidkar his captain, 'Remember how that, when I and thou rode together after Ahab his father, the Lord laid *this* burden upon him.' The king of Judah contrived to escape, but not without a wound, of which he afterwards died at Megiddo [AHAZIAH]. Jehu then entered the city, whither the news of this transaction had already preceded him. As he passed under the walls of the palace Jezebel herself, studiously arrayed for effect, appeared at one of the windows, and saluted him with a question such as might have shaken a man of weaker nerves, 'Had Zimri peace, who slew his master?' But Jehu was unmoved, and instead of answering her, called out, 'Who is on my side, who?' when several eunuchs made their appearance at the window, to whom he cried, 'Throw her down!' and immediately this proud and guilty woman lay a blood-stained corpse in the road, and was trodden under foot by the horses [JEZEBEL]. Jehu then went in and took possession of the palace.

He was now master of Jezreel, which was, next to Samaria, the chief town of the kingdom; but he could not feel secure while the capital itself was in the hands of the royal family, and of those who might be supposed to feel strong attachment to the house of Ahab. The force of the blow which he had struck was, however, felt even in Samaria. When therefore he wrote to the persons in authority there the somewhat ironical but designedly intimidating counsel, to set up one of the young princes in Samaria as king and fight out the matter which lay between them, they sent a very submissive answer, giving in their adhesion, and professing their readiness to obey in all things his commands. A second letter from Jehu tested this profession in a truly horrid and exceedingly Oriental manner, requiring them to appear before him on the morrow, bringing with them the heads of all the royal princes in Samaria. A fallen house meets with little pity in the East; and when the new king left his palace the next morning, he found seventy human heads piled up in two heaps at his gate. There, in the sight of these heaps, Jehu took occasion to explain his conduct, declaring that he must be regarded as the appointed minister of the divine decrees, pronounced long since against the house of Ahab by the prophets, not one of whose words should fall to the ground. He then continued his proscriptions by exterminating in Jezreel not only all in whose veins the blood of the condemned race flowed, but also—by a considerable stretch of his commission—those officers, ministers, and creatures of the late government, who, if suffered to live, would most likely be disturbers of his own reign. He then proceeded to Samaria. So rapid had been these proceedings that he met some of the nephews of the king of Judah, who were going to join their uncle at Jezreel, and had as yet heard nothing of the revolution which had taken place. These also perished under Jehu's now fully-awakened thirst for blood, to the number of forty-two persons.

On the way he took up into his chariot the pious Jehonadab the Rechabite, whose austere virtue and respected character would, as he felt, go far to hallow his proceedings in the eyes of the multitude. At Samaria he continued the extirpation of the persons more intimately connected with the late government. This, far from being in any way singular, is a common circumstance in eastern revolutions. But the great object of Jehu was to exterminate the ministers and more devoted adherents of Baal, who had been much encouraged by Jezebel. There was even a temple to this idol in Samaria; and Jehu, never scrupulous about the means of reaching objects which he believed to be good, laid a snare by which he hoped to cut off the main body of Baal's ministers at one blow. He professed to be a more zealous servant of Baal than Ahab had been, and proclaimed a great festival in his honour, at which none but his true servants were to be present. The prophets, priests, and officers of Baal assembled from all parts for this great sacrifice, and sacerdotal vestments were given to them, that none of Jehovah's worshippers might be taken for them. When the temple was full, soldiers were posted so that none might escape; and so soon as the sacrifice had been offered, the word was given by the king, the soldiers entered the temple, and put all the worshippers to the sword. The temple itself was then demolished, the images overthrown, and the site turned into a common jakes.

Notwithstanding this zeal of Jehu in exterminating the grosser idolatries which had grown up under his immediate predecessors, he was not prepared to subvert the policy which had led Jeroboam and his successors to maintain the schismatic establishment of the golden calves in Dan and Beth-el. The grounds of this policy are explained in the article JEROBOAM, a reference to which will show the grounds of Jehu's hesitation in this matter. This was, however, a crime in him—the worship rendered to the golden calves being plainly contrary to the law; and he should have felt that He who had appointed him to the throne would have maintained him in it, notwithstanding the apparent dangers which might seem likely to ensue from permitting his subjects to repair at the great festivals to the metropolis of the rival kingdom, which was the centre of the theocratical worship and of sacerdotal service. Here Jehu fell short: and this very policy, apparently so prudent and far-sighted, by which he hoped to secure the stability and independence of his kingdom, was that on account of which the term of rule granted to his dynasty was shortened. For this, it was foretold that his dynasty should extend only to four generations; and for this, the divine aid was withheld from him in his wars with the Syrians under Hazael on the eastern frontier. Hence the war was disastrous to him, and the Syrians were able to maintain themselves in the possession of a great part of his territories beyond the Jordan. He died in B.C. 856, and was buried in Samaria, leaving the throne to his son Jehoahaz.

There is nothing difficult to understand in the character of Jehu. He was one of those decisive, terrible, and ambitious, yet prudent, calculating, and passionless men, whom God from time to time raises up to change the fate of empires and execute his judgments on the earth. He boasted of his zeal —'come and see my zeal for the Lord'—but at the bottom it was zeal for Jehu. His zeal was great so long as it led to acts which squared with his own interests, but it cooled marvellously when required to take a direction in his judgment less favourable to them. Even his zeal in extirpating the idolatry of Baal is not free from suspicion. The altar of Baal was that which Ahab had associated with his throne, and in overturning the latter he could not prudently let the former stand, surrounded as it was by attached adherents of the house which he had extirpated (2 Kings ix.-x.).

2. JEHU, son of Hanani, a prophet, who was sent to pronounce upon Baasha, king of Israel, and his house, the same awful doom which had been already executed upon the house of Jeroboam (1 Kings xvi. 1-7). The same prophet was, many years after, commissioned to reprove Jehoshaphat for his dangerous connection with the house of Ahab (2 Chron. xix. 2).

JEPHTHAH (יִפְתָּח, *opener*; Sept. Ἰεφθάε), ninth judge of Israel, of the tribe of Manasseh. He was the son of a person named Gilead by a concubine. After the death of his father he was expelled from his home by the envy of his brothers, who refused him any share of the heritage, and he withdrew to the land of Tob, beyond the frontier of the Hebrew territories. It is clear that he had before this distinguished himself by his daring character and skill in arms; for no sooner was his withdrawment known than a great number of men of desperate fortunes repaired to him, and he became their chief. His position was now very similar to that of David when he withdrew from the court of Saul. To maintain the people who had thus linked their fortunes with his, there was no other resource than that sort of brigandage which is accounted honourable in the East, so long as it is exercised against public or private enemies, and is not marked by needless cruelty or outrage. Even our different climate and manners afford some parallel in the Robin Hoods of former days; in the border forays, when England and Scotland were ostensibly at peace; and—in principle, however great the formal difference—in the authorized and popular piracies of Drake, Raleigh, and the other naval heroes of the Elizabethan era. So Jephthah confined his aggressions to the borders of the small neighbouring nations, who were in some sort regarded as the natural enemies of Israel, even when there was no actual war between them.

Jephthah led this kind of life for some years, during which his dashing exploits and successful enterprises procured him a higher military reputation than any other man of his time enjoyed. The qualities required to ensure success in such operations were little different from those required in actual warfare, as warfare was conducted in the East before fire-arms came into general use; and hence the reputation which might be thus acquired was more truly military than is easily conceivable by modern and occidental readers.

After the death of Jair the Israelites gradually fell into their favourite idolatries, and were punished by subjection to the Philistines on the west of the Jordan, and to the Ammonites on the east of that river. The oppression which they

sustained for eighteen years became at length so heavy that they recovered their senses and returned to the God of their fathers with humiliation and tears; and he was appeased, and promised them deliverance from their affliction (B.C. 1143).

The tribes beyond the Jordan having resolved to oppose the Ammonites, Jephthah seems to occur to every one as the most fitting leader. A deputation was accordingly sent to invite him to take the command. After some demur, on account of the treatment he had formerly received, he consented. The rude hero commenced his operations with a degree of diplomatic consideration and dignity for which we are not prepared. The Ammonites being assembled in force for one of those ravaging incursions by which they had repeatedly desolated the land, he sent to their camp a formal complaint of the invasion, and a demand of the ground of their proceeding. This is highly interesting, because it shows that even in that age a cause for war was judged necessary—no one being supposed to war without provocation; and in this case Jephthah demanded what cause the Ammonites alleged to justify their aggressive operations. Their answer was, that the land of the Israelites beyond the Jordan was theirs. It had originally belonged to them, from whom it had been taken by the Amorites, who had been dispossessed by the Israelites: and on this ground they claimed the restitution of these lands. Jephthah's reply laid down the just principle which has been followed out in the practice of civilized nations, and is maintained by all the great writers on the law of nations. The land belonged to the Israelites by right of conquest from the *actual* possessors; and they could not be expected to recognise any antecedent claim of former possessors, for whom they had not acted, who had rendered them no assistance, and who had themselves displayed hostility against the Israelites. It was not to be expected that they would conquer the country from the powerful kings who had it in possession, for the mere purpose of restoring it to the ancient occupants, of whom they had no favourable knowledge, and of whose previous claims they were scarcely cognizant. But the Ammonites re-asserted their former views, and on this issue they took the field.

When Jephthah set forth against the Ammonites he solemnly vowed to the Lord, 'If thou shalt without fail deliver the children of Ammon into my hands, then it shall be, that whatsoever cometh forth of the doors of my house to meet me, when I return in peace from the children of Ammon, shall surely be the Lord's, and I will offer it up for a burnt offering.' He *was* victorious. The Ammonites sustained a terrible overthrow. He *did* return in peace to his house in Mizpeh. As he drew nigh his house, the one that came forth to meet him was his own daughter, his only child, in whom his heart was bound up. She, with her fair companions, came to greet the triumphant hero 'with timbrels and with dances.' But he no sooner saw her than he rent his robes, and cried, 'Alas, my daughter! thou hast brought me very low; . . . for I have opened my mouth unto the Lord, and cannot go back.' Nor did she ask it. She replied, 'My father, if thou hast opened thy mouth unto the Lord, do to me according to that which has proceeded out of thy mouth; forasmuch as the Lord hath taken vengeance for thee of thine enemies, the children of Ammon.' But after a pause she added, 'Let this thing be done for me: let me alone two months, that I may go up and down upon the mountains, and bewail my virginity, I and my fellows.' Her father of course assented; and when the time expired she returned, and, we are told, 'he did with her according to his vow.' It is then added that it became 'a custom in Israel, that the daughters of Israel went yearly to lament the daughter of Jephthah the Gileadite three days in the year.'

The victory over the Ammonites was followed by a quarrel with the proud and powerful Ephraimites on the west of the Jordan. This tribe was displeased at having had no share in the glory of the recent victory, and a large body of men belonging to it, who had crossed the river to share in the action, used very high and threatening language when they found their services were not required. Jephthah, finding his remonstrances had no effect, re-assembled some of his disbanded troops and gave the Ephraimites battle, when they were defeated with much loss. The victors seized the fords of the Jordan, and when any one came to pass over, they made him pronounce the word *Shibboleth* [an ear of corn], but if he could not give the aspiration, and pronounced the word as *Sibboleth*, they knew him for an Ephraimite, and slew him on the spot. This is a remarkable instance of the dialectical differences, answering to the varieties in our provincialisms, which had already sprung up among the tribes, and of which other instances occur in Scripture.

Jephthah judged Israel six years, during which we have reason to conclude that the exercise of his authority was almost if not altogether confined to the country east of the Jordan.

Volumes have been written on the subject of 'Jephthah's rash vow;' the question being whether, in doing to his daughter 'according to his vow,' he really did offer her in sacrifice or not. The negative has been stoutly maintained by many able pens, from a natural anxiety to clear the character of one of the heroes in Israel from so dark a stain. But the more the plain rules of common sense have been exercised in our view of biblical transactions; and the better we have succeeded in realizing a distinct idea of the times in which Jephthah lived and of the position which he occupied, the less reluctance there has been to admit the interpretation which the first view of the passage suggests to every reader, which is, that he really did offer her in sacrifice. The explanation which denies this maintains that she was rather doomed to perpetual celibacy; and this, as it appears to us, on the strength of phrases which, to one who really understands the character of the Hebrew people and their language, suggest nothing more than that it was considered a lamentable thing for any daughter of Israel to die childless. To *live* unmarried was required by no law, custom, or devotement among the Jews: no one had a right to impose so odious a condition on another, nor is any such condition implied or expressed in the vow which Jephthah uttered. To get rid of a difficulty which has no place in the text, but arises from our reluctance to receive that text in its obvious meaning—we invent a new thing in Israel, a thing never heard of among the Hebrews in ancient or modern times, and more entirely

opposed to their peculiar notions than any thing which the wit of man ever devised—such as that a damsel should be consecrated to perpetual virginity in consequence of a vow of her father, which vow itself says nothing of the kind. If people allow themselves to be influenced in their interpretations of Scripture by dislike to take the words in their obvious meaning, we might at least expect that the explanations they would have us receive should be in accordance with the notions of the Hebrew people, instead of being entirely and obviously opposed to them. The Jewish commentators themselves generally admit that Jephthah really sacrificed his daughter; and even go so far as to allege that the change in the pontifical dynasty from the house of Eleazar to that of Ithamar was caused by the high-priest of the time having suffered this transaction to take place.

It is very true that human sacrifices were forbidden by the law. But in the rude and unsettled age in which the judges lived, when the Israelites had adopted a vast number of erroneous notions and practices from their heathen neighbours, many things were done, even by good men, which the law forbade quite as positively as human sacrifice. Such, for instance, was the setting up of the altar by Gideon at his native Ophrah, in direct but undesigned opposition to one of the most stringent enactments of the Mosaical code.

It is certain that human sacrifice was deemed meritorious and propitiatory by the neighbouring nations [Sacrifice]; and, considering the manner of life the hero had led, the recent idolatries in which the people had been plunged, and the peculiarly vague notions of the tribes beyond the Jordan, it is highly probable that he contemplated from the first a human sacrifice, as the most costly offering to God known to him. It is difficult to conceive that he could expect any other creature than a human being to come forth *out of the door of his house* to meet him on his return. His house was surely not a place for flocks and herds, nor could any animal be expected to come forth 'to meet him,' *i. e.* with the purpose of meeting him, on his return. We think it likely that he even contemplated the possibility that his daughter might be the person to come forth, and that he took merit to himself for not expressly withholding even his only child from the operation of a vow which he deemed likely to promote the success of his arms. His affliction when his daughter actually came forth is quite compatible with this notion; and the depth of that affliction is scarcely reconcilable with any other alternative than the actual sacrifice.

If we again look at the text, Jephthah vows that whatsoever came forth from the door of his house to meet him 'shall surely be the Lord's, and I will offer it up for a burnt-offering,' which, in fact, was the regular way of making a thing wholly the Lord's. Afterwards we are told that 'he did with her according to his vow,' that is, according to the plain meaning of plain words, offered her for a burnt-offering. Then follows the intimation that the daughters of Israel lamented her four days every year. People lament the dead, not the living. The whole story is consistent and intelligible, while the sacrifice is understood to have actually taken place; but becomes perplexed and difficult as soon as we begin to turn aside from this obvious meaning in search of recondite explanations.

The circumstances of this immolation we can never know. It probably took place at some one of the altars beyond the Jordan. That it took place at the altar of the tabernacle, and that the high-priest was the sacrificer, as painters usually represent the scene, and even as some Jewish writers believe, is outrageously contrary to all the probabilities of the case.

Professor Bush, in his elaborate note on the text, maintains with us that a human sacrifice was all along contemplated. But he suggests that during the two months, Jephthah might have obtained better information respecting the nature of vows, by which he would have learned that his daughter could not be legally offered, but might be redeemed at a valuation (Lev. xxvii. 2-12). This is possible, and is much more likely than the popular alternative of perpetual celibacy; but we have serious doubts whether even this meets the conclusion that 'he did with her according to his vow.' Besides, in this case, where was the ground for the annual 'lamentations' of the daughters of Israel, or even for the 'celebrations' which some understand the word to mean? See the Notes of the *Pictorial Bible* and Bush's *Notes on Judges;* comp. Calmet's *Dissertation sur le Vœu de Jephte*, in *Comment. Littéral*, tom. ii.; Dresde, *Votum Jephthæ ex Antiq. Judaica illustr.* 1778; Randolf, *Erklär. d. Gelubdes Jephtha*, in Eichhorn's *Repertorium*, viii. 13; Lightfoot's *Harmony*, under Judges xi., *Erubhin*, cap. xvi., *Sermon* on Judges xi. 39; Bp. Russell's *Connection of Sacred and Profane History*, i. 479-492.

JEREMIAH (יִרְמְיָהוּ and יִרְמְיָה, *raised up* or *appointed by God;* Sept. Ἱερεμίας) was the son of Hilkiah, a priest of Anathoth, in the land of Benjamin [Anathoth]. Many have supposed that his father was the high-priest of the same name (2 Kings xxii. 8), who found the book of the law in the eighteenth year of Josiah (Umbreit, *Praktischer Commentar über den Jeremia*, p. x.; see Carpzov, *Introd.* part iii. p. 130). This, however, seems improbable on several grounds:—first, there is nothing in the writings of Jeremiah to lead us to think that his father was more than an ordinary priest ('Hilkiah [one] of the priests,' Jer. i. 1);—again, the name Hilkiah was common amongst the Jews (see 2 Kings xviii. 13; 1 Chron. vi. 45, xxvi. 11; Neh. viii. 4; Jer. xxix. 3);—and lastly, his residence at Anathoth is evidence that he belonged to the line of Abiathar (1 Kings ii. 26-35), who was deposed from the high-priest's office by Solomon: after which time the office appears to have remained in the line of Zadok. Jeremiah was very young when the word of the Lord first came to him (ch. i. 6). This event took place in the thirteenth year of Josiah (B.C. 629), whilst the youthful prophet still lived at Anathoth. It would seem that he remained in his native city several years, but at length, in order to escape the persecution of his fellow townsmen (ch. xi. 21), and even of his own family (ch. xii. 6), as well as to have a wider field for his exertions, he left Anathoth and took up his residence at Jerusalem. The finding of the book of the law, five years after the commencement of his predictions, must have produced a powerful influence on the mind

of Jeremiah, and king Josiah no doubt found him a powerful ally in carrying into effect the reformation of religious worship (2 Kings xxiii. 1-25). During the reign of this monarch, we may readily believe that Jeremiah would be in no way molested in his work; and that from the time of his quitting Anathoth to the eighteenth year of his ministry, he probably uttered his warnings without interruption, though with little success (see ch. xi.). Indeed, the reformation itself was nothing more than the forcible repression of idolatrous and heathen rites, and the re-establishment of the external service of God, by the command of the king. No sooner, therefore, was the influence of the court on behalf of the true religion withdrawn, than it was evident that no real improvement had taken place in the minds of the people. Jeremiah, who hitherto was at least protected by the influence of the pious king Josiah, soon became the object of attack, as he must doubtless have long been the object of dislike, to those whose interests were identified with the corruptions of religion. We hear nothing of the prophet during the three months which constituted the short reign of Jehoahaz; but 'in the beginning of the reign of Jehoiakim' the prophet was interrupted in his ministry by 'the priests and the prophets,' who with the populace brought him before the civil authorities, urging that capital punishment should be inflicted on him for his threatenings of evil on the city unless the people amended their ways (ch. xxvi). The princes seem to have been in some degree aware of the results which the general corruption was bringing on the state, and if they did not themselves yield to the exhortations of the prophet, they acknowledged that he spoke in the name of the Lord, and were quite averse from so openly renouncing His authority as to put His messenger to death. It appears, however, that it was rather owing to the personal influence of one or two, especially Ahikam, than to any general feeling favourable to Jeremiah, that his life was preserved; and it would seem that he was then either placed under restraint, or else was in so much danger from the animosity of his adversaries as to make it prudent for him not to appear in public. In the fourth year of Jehoiakim (B.C. 606) he was commanded to write the predictions which had been given through him, and to read them to the people. From the cause, probably, which we have intimated above, he was, as he says, 'shut up,' and could not himself go into the house of the Lord (ch. xxxvi. 5). He therefore deputed Baruch to write the predictions after him, and to read them publicly on the fast-day. These threatenings being thus anew made public, Baruch was summoned before the princes to give an account of the manner in which the roll containing them had come into his possession. The princes, who, without strength of principle to oppose the wickedness of the king, had sufficient respect for religion, as well as sagacity enough to discern the importance of listening to the voice of God's prophet, advised both Baruch and Jeremiah to conceal themselves, whilst they endeavoured to influence the mind of the king by reading the roll to him. The result showed that their precautions were not needless. The bold self-will and reckless daring of the monarch refused to listen to any advice, even though coming with the professed sanction of the Most High. Having read three or four leaves 'he cut the roll with the penknife and cast it into the fire that was on the hearth, until all the roll was consumed,' and gave immediate orders for the apprehension of Jeremiah and Baruch, who, however, were both preserved from the vindictive monarch. Of the history of Jeremiah during the eight or nine remaining years of the reign of Jehoiakim we have no certain account. At the command of God he procured another roll, in which he wrote all that was in the roll destroyed by the king, 'and added besides unto them many like words' (ch. xxxvi. 32). In the short reign of his successor Jehoiachin or Jeconiah, we find him still uttering his voice of warning (see ch. xiii. 18; comp. 2 Kings xxiv. 12, and ch. xxii. 24-30), though without effect. It was probably either during this reign, or at the commencement of the reign of Zedekiah, that he was put in confinement by Pashur, the 'chief governor of the house of the Lord.' He seems, however, soon to have been liberated, as we find that 'they had not put him into prison' when the army of Nebuchadnezzar commenced the siege of Jerusalem. The Chaldæans drew off their army for a time, on the report of help coming from Egypt to the besieged city; and now feeling the danger to be imminent, and yet a ray of hope brightening their prospects, the king entreated Jeremiah to pray to the Lord for them. The hopes of the king were not responded to in the message which Jeremiah received from God. He was assured that the Egyptian army should return to their own land, that the Chaldæans should come again, and that they should take the city and burn it with fire (ch. xxxvii. 7, 8). The princes, apparently irritated by a message so contrary to their wishes, made the departure of Jeremiah from the city, during the short respite, the pretext for accusing him of deserting to the Chaldæans, and he was forthwith cast into prison. The king seems to have been throughout inclined to favour the prophet, and sought to know from him the word of the Lord; but he was wholly under the influence of the princes, and dared not communicate with him except in secret (ch. xxxviii. 14, 28); much less could he follow advice so obnoxious to their views as that which the prophet gave. Jeremiah, therefore, more from the hostility of the princes than the inclination of the king, was still in confinement when the city was taken. Nebuchadnezzar formed a more just estimate of his character and of the value of his counsels, and gave a special charge to his captain Nebuzar-adan, not only to provide for him but to follow his advice (ch. xxxix. 12). He was accordingly taken from the prison and allowed free choice either to go to Babylon, where doubtless he would have been held in honour in the royal court, or to remain with his own people. We need scarcely be told that he who had devoted more than forty years of unrequited service to the welfare of his falling country, should choose to remain with the remnant of his people rather than seek the precarious fame which might await him at the court of the King of Babylon. Accordingly he went to Mizpah with Gedaliah, whom the Babylonian monarch had appointed governor of Judæa; and after his murder, sought to persuade Johanan, who was then the recognised leader of the people, to remain in the land, assur-

ing him and the people, by a message from God in answer to their inquiries, that if they did so the Lord would build them up, but if they went to Egypt the evils which they sought to escape should come upon them there (ch. xlii.). The people refused to attend to the divine message, and under the command of Johanan went into Egypt, taking Jeremiah and Baruch along with them (ch. xliii. 6). In Egypt the prophet still sought to turn the people to the Lord, from whom they had so long and so deeply revolted (ch. xliv.); but his writings give us no subsequent information respecting his personal history. Ancient traditions assert that he spent the remainder of his life in Egypt. According to the pseudo-Epiphanius he was stoned by the people at Taphnæ (ἐν Τάφναις), the same as Tahpanhes, where the Jews were settled (*De Vitis Prophet.* t. ii. p. 239, quoted by Fabricius, *Codex Pseudepigraphus V. T.* t. i. p. 1110). It is said that his bones were removed by Alexander the Great to Alexandria (Carpzov, *Introd.* part iii. p. 138, where other traditions respecting him will be found).

Jeremiah was contemporary with Zephaniah, Habakkuk, Ezekiel, and Daniel. None of these, however, are in any remarkable way connected with him, except Ezekiel. The writings and character of these two eminent prophets furnish many very interesting points both of comparison and contrast. Both, during a long series of years, were labouring at the same time and for the same object. The representations of both, far separated as they were from each other, are in substance singularly accordant; yet there is at the same time a marked difference in their modes of statement, and a still more striking diversity in the character and natural disposition of the two. No one who compares them can fail to perceive that the mind of Jeremiah was of a softer and more delicate texture than that of his illustrious contemporary. His whole history convinces us that he was by nature mild and retiring (Ewald, *Propheten des Alt. Bund.* p. 2), highly susceptible and sensitive, especially to sorrowful emotions, and rather inclined, as we should imagine, to shrink from danger than to brave it. Yet, with this acute perception of injury, and natural repugnance from being 'a man of strife,' he never in the least degree shrinks from publicity; nor is he at all intimidated by reproach or insult, or even by actual punishment and threatened death, when he has the message of God to deliver. Kings and priests, princes and people are opposed with the most resolute determination, and threatened, if they disobey, in the most emphatic terms. When he is alone, we hear him lamenting the hard lot which compelled him to sustain a character so alien to his natural temper; but no sooner does the divine call summon him to bear testimony for God and against the evils which surrounded him, than he forgets his fears and complaints, and stands forth in the might of the Lord. He is, in truth, as remarkable an instance, though in a different way, of the overpowering influence of the divine energy, as Ezekiel. The one presents the spectacle of the power of divine inspiration acting on a mind naturally of the firmest texture, and at once subduing to itself every element of the soul; whilst the other furnishes an example, not less memorable, of moral courage sustained by the same divine inspiration against the constantly opposing influence of a love of retirement and strong susceptibility to impressions of outward evil. Ezekiel views the conduct of his countrymen as opposed to righteousness and truth, Jeremiah thinks of it rather as productive of evil and misery to themselves—Ezekiel's indignation is roused at the sins of his people, Jeremiah's pity is excited by the consequences of their sins—the former takes an objective, the latter a subjective view of the evils by which both were surrounded.

The style of Jeremiah corresponds with this view of the character of his mind; though not deficient in power, it is peculiarly marked by pathos. He delights in the expression of the tender emotions, and employs all the resources of his imagination to excite corresponding feelings in his readers. He has an irresistible sympathy with the miserable, which finds utterance in the most touching descriptions of their condition. He seizes with wonderful tact those circumstances which point out the objects of his pity as the objects of sympathy, and founds his expostulations on the miseries which are thus exhibited. His book of Lamentations is an astonishing exhibition of his power to accumulate images of sorrow. The whole series of elegies has but one object—the expression of sorrow for the forlorn condition of his country; and yet he presents this to us in so many lights, alludes to it by so many figures, that not only are his mournful strains not felt to be tedious reiterations, but the reader is captivated by the plaintive melancholy which pervades the whole. 'Nullum, opinor,' says Lowth (*De Sacra Poesi Heb.*, ed. Michaelis, p. 458) 'aliud extat poema ubi intra tam breve spatium tanta, tam felix, tam lecta, tam illustris adjunctorum atque imaginum varietas eluceat. Quid tam elegans et poëticum, ac urbs illa florentissima pridem et inter gentes princeps, nunc sola sedens, afflicta, vidua; deserta ab amicis, prodita a necessariis; frustra tendens manus, nec inveniens qui eam consoletur. . . . . Verum omnes locos elegantes proferre, id sane esset totum poema exscribere.' The style of Jeremiah is marked by the peculiarities which belong to the later Hebrew, and by the introduction of Aramaic forms (Eichhorn, *Einleitung*, vol. iii. p. 122; Gesenius, *Geschichte der Heb. Sprache*, p. 35). It was, we imagine, on this account that Jerome complained of a certain rusticity in Jeremiah's style. Lowth, however, says he can discover no traces of it, and regards Jeremiah as nearly equal in sublimity in many parts to Isaiah (*De Sacra Poesi Heb.*, p. 426).

The genuineness and canonicity of the writings of Jeremiah in general are established both by the testimony of ancient writers, and by quotations and references which occur in the New Testament. Thus the son of Sirach refers to him as a prophet consecrated from the womb, and quotes from Jer. i. 10, the commission with which he was intrusted ('αὐτὸς ἐν μήτρᾳ ἡγιάσθη προφήτης ἐκριζοῦν καὶ κακοῦν καὶ ἀπολλύειν, ἀσαίτως οἰκοδομεῖν καὶ καταφυτεύειν,' Ecclus. xlix. 7). In 2 Macc. ii. 1-8, there is a tradition respecting his hiding the tabernacle and the ark in a rock, in which he is called Ἱερεμίας ὁ προφήτης. Philo speaks of him as προφήτης, μύστης, ἱεροφάντης, and calls a passage which he quotes from Jer.

iii. 4, an oracle, χρησμόν (Eichhorn, *Einleitung*, vol. i. p. 95). Josephus refers to him by name as the prophet who predicted the evils which were coming on the city, and speaks of him as the author of Lamentations (μέλος θρηνητικόν) which are still existing (*Antiq.*, lib. x. 5. 1). His writings are included in the list of canonical books given by Melito, Origen (whose words are remarkable, Ἱερεμίας σὺν θρήνοις καὶ τῇ ἐπιστολῇ ἐν ἑνί), Jerome, and the Talmud (Eichhorn, *Einleitung*, vol. iii. p. 184). In the New Testament Jeremiah is referred to by name in Matt ii. 17, where a passage is quoted from Jer. xxxi. 15, and in Matt. xvi. 14; in Heb. viii. 8-12, a passage is quoted from Jer. xxxi. 31-34. There is one other place in which the name of Jeremiah occurs, Matt. xxvii. 9, which has occasioned considerable difficulty, because the passage there quoted is not found in the extant writings of the prophet. Jerome affirms that he found the exact passage in a Hebrew apocryphal book (Fabricius, *Cod. Pseudep.* i. 1103); but there is no proof that that book was in existence before the time of Christ. It is probable that the passage intended by Matthew is Zech. xi. 12, 13, which in part corresponds with the quotation he gives, and that the name is a gloss which has found its way into the text (see Olshausen, *Commentar über N. T.*, vol. ii. p. 493).

Much difficulty has arisen in reference to the writings of Jeremiah from the apparent disorder in which they stand in our present copies, and from the many disagreements between the Hebrew text and that found in the Septuagint version; and many conjectures have been hazarded respecting the occasion of this disorder. The following are the principal diversities between the two texts :— 1. The prophecies against foreign nations, which in the Hebrew occupy chs. xlvi.-li. at the close of the book, are in the Greek placed after ch. xxv. 14, forming chs. xxvi.-xxxi.; the remainder of ch. xxv. of the Heb. is ch. xxxii. of the Sept. The following chapters proceed in the same order in both chs. xliv. and xlv. of the Heb. forming ch. li. of the Sept.; and the historical appendix, ch. lii. is placed at the close in both. 2. The prophecies against the heathen nations stand in a different order in the two editions, as is shown in the following table :—

Hebrew.	Sept.
Egypt.	Elam.
Philistines.	Egypt.
Moab.	Babylon.
Ammon.	Philistines.
Edom.	Edom.
Damascus.	Ammon.
Kedar.	Kedar.
Elam.	Damascus.
Babylon.	Moab.

3. Various passages which exist in the Hebrew are not found in the Greek copies (*e. g.* ch. xxvii. 19-22; xxxiii. 14-26; xxxix. 4-14; xlviii. 45-47). Besides these discrepancies, there are numerous omissions and frequent variations of single words and phrases (Movers, *De utriusque Vaticiniorum Jeremiæ recensionis indole et origine*, pp. 8-32). To explain these diversities recourse has been had to the hypothesis of a double recension, an hypothesis which, with various modifications, is held by most modern critics (Movers, *ut supra;* De Wette, *Lehrbuch der Hist.-Crit. Einleitung in A.T.*, p. 303; Ewald, *Propheten des Alt. Bund.* vol. ii. p. 23).

The genuineness of some portions of the book has been of late disputed by German critics. Movers, whose views have been adopted by De Wette and Hitzig, attributes ch. x. 1-16, and chs. xxx., xxxi., and xxxiii. to the author of the concluding portion of the book of Isaiah. His fundamental argument against the last-named portion is, that the prophet Zechariah (ch. viii. 7, 8) quotes from Jer. xxxi. 7, 8, 33, and in ver. 9 speaks of the author as one who lived 'in the day that the foundation of the house of the Lord of hosts was laid.' He must, therefore, have been contemporary with Zechariah himself. This view obliges him, of course, to consider ch. xxx. 1, with which he joins the three following verses, as a later addition. By an elaborate comparison of the peculiarities of style he endeavours to show that the author of these chapters was the so-called pseudo-Isaiah. He acknowledges, however, that there are many expressions peculiar to Jeremiah, and supposes that it was in consequence of these that the prediction was placed among his writings. These similarities he accounts for by assuming that the later unknown prophet accommodated the writings of the earlier to his own use. Every one will see how slight is the external ground on which Movers' argument rests; for there is nothing in ver. 7, 8, of Zechariah to prove that it is intended to be a quotation from any written prophecy, much less from this portion of Jeremiah. The quotation, if it be such, is made up by joining together phrases of frequent recurrence in the prophets picked out from amongst many others. Then, again, the mention of *prophets* is evidence that Zechariah was not referring to the writings of one individual; and, lastly, the necessity of rejecting the exordium, without any positive ground for suspecting its integrity, is a strong argument against the position of Movers. Hitzig (*Jeremia*, p. 230) is induced, by the force of these considerations, to give up the external evidence on which Movers had relied. The internal evidence arising from the examination of particular words and phrases—a species of proof which, when standing alone, is always to be received with great caution —is rendered of still less weight by the evidence of an opposite kind, the existence of which Movers himself acknowledges, 'quumque indicia usus loquendi tantummodo Jeremiæ peculiaris haud raro inveniantur' (p. 42). And this evidence becomes absolutely nothing, if the authenticity of the latter portion of Isaiah is maintained;* for it is quite likely that prophecies of Jeremiah would, when relating to the same subjects, bear marks of similarity to those of his illustrious predecessor. We may mention also that Ewald, who is by no means accustomed to acquiesce in received opinions as such, agrees that the chapters in question, as well as the other passage mentioned ch. x. 1-16, are the work of Jeremiah. The authenticity of this latter portion is denied solely on internal grounds, and the remarks we have already made will, in substance, apply also to these verses. It

* For a proof of its authenticity, see Hengstenberg's *Christologie*, vol. i. c. 2, pp. 168-206, translated in the *Am. Biblical Repository*, vol. i. pp. 700-733; see also the article Isaiah.

seems, however, not improbable that the Chaldee of ver. 11 is a gloss which has crept into the text—both because it is (apparently without reason) in another language, and because it seems to interrupt the progress of thought. The predictions against Babylon in chs. l. and li. are objected to by Movers, De Wette, and others, on the ground that they contain many interpolations. Ewald attributes them to some unknown prophet who imitated the style of Jeremiah. Their authenticity is maintained by Hitzig (p. 391), and by Umbreit (pp. 290-293), to whom we must refer for an answer to the objections made against them. The last chapter is generally regarded as an appendix added by some later author. It is almost verbally the same as the account in 2 Kings xxiv. 18; xxv. 30, and it carries the history down to a later period probably than that of the death of Jeremiah: that it is not his work seems to be indicated in the last verse of ch. li.

It is impossible, within the limits assigned to this article, even to notice all the attempts which have been made to account for the apparent disorder of Jeremiah's prophecies. Blayney speaks of their present disposition as a 'preposterous jumbling together of the prophecies of the reigns of Jehoiakim and Zedekiah,' and concludes that 'the original order has, most probably, by some accident or other been disturbed' (Notes, p. 3). Eichhorn says that no other explanation can be given than that the prophet wrote his oracles on single rolls, larger or smaller as they came to his hand, and that, as he was desirous to give his countrymen a copy of them when they went into captivity, he dictated them to an amanuensis from the separate rolls without attending to the order of time, and then preserved the rolls in the same order (*Einl.* iii. 134). Later critics have attempted in different ways to trace some plan in the present arrangement. Thus Movers supposes the whole collection to have consisted of six books—the longest being that written by Baruch (Jer. xxxvi. 2, 32), which was taken by the collector as his foundation, into which he inserted the other books in such places as seemed, on a very slight glance at their contents, to be suitable. All such theories, however, proceed on the presumption that the present arrangement is the work of a compiler, which, therefore, we are at liberty to alter at pleasure; and though they offer boundless scope for ingenuity in suggesting a better arrangement, they serve us very little in respect to the explanation of the book itself. Ewald adopts another principle, which, if it be found valid, cannot fail to throw much light on the connection and meaning of the predictions. He maintains that the book, in its present form, is, from ch. i. to ch. xlix., substantially the same as it came from the hand of the prophet, or his amanuensis, and seeks to discover in the present arrangement some plan according to which it is disposed. He finds that various portions are prefaced by the same formula, 'The word which came to Jeremiah from the Lord' (vii. 1; xi. 1; xviii. 1; xxi. 1; xxv. 1; xxx. 1; xxxii. 1; xxxiv. 1, 8; xxxv. 1; xl. 1; xliv. 1), or by the very similar expression, 'The word of the Lord which came to Jeremiah' (xiv. 1; xlvi. 1; xlvii. 1; xlix. 34). The notices of time distinctly mark some other divisions which are more or less historical (xxvi. 1; xxvii. 1; xxxvi. 1; xxxvii. 1). Two other portions are in themselves sufficiently distinct without such indication (xxix. 1; xlv. 1), whilst the general introduction to the book serves for the section contained in ch. i. There are left two sections (ch. ii., iii.), the former of which has only the shorter introduction, which generally designates the commencement of a strophe; while the latter, as it now stands, seems to be imperfect, having as an introduction merely the word 'saying.' Thus the book is divided into twenty-three separate and independent sections, which, in the poetical parts, are again divided into strophes of from seven to nine verses, frequently distinguished by such a phrase as 'The Lord said also unto me.' These separate sections are arranged by Ewald so as to form five distinct books:—I. The introduction, ch. i.;—II. Reproofs of the sins of the Jews, ch. ii.-xxiv., consisting of seven sections, viz. 1. ch. ii., 2. ch. iii.-vi., 3. vii.-x, 4. ch. xi.-xiii., 5. ch. xiv.-xvii. 18, 6. ch. xvii. 19*-xx., 7. ch. xxi.-xxiv.;—III. A general review of all nations, the heathen as well as the people of Israel, consisting of two sections, 1. ch. xlvi.-xlix. (which he thinks have been transposed), 2. ch. xxv., and an historical appendix of three sections, 1. ch. xxvi., 2. ch. xxvii., and 3. ch. xxviii. xxix.;—IV. Two sections picturing the hopes of brighter times, 1. ch. xxx. xxxi., and 2. ch. xxxii. xxxiii., to which, as in the last book, is added an historical appendix in three sections, 1. ch. xxxiv. 1-7, 2. ch. xxxiv. 8-22, 3. ch. xxxv.;—V. The conclusion, in two sections, 1. ch. xxxvi., 2. ch. xlv. All this, he supposes, was arranged in Palestine, during the short interval of rest between the taking of the city and the departure of Jeremiah with the remnant of the Jews, to Egypt. In Egypt, after some interval, Jeremiah added three sections, viz. ch. xxxvii.-xxxix., xl.-xliii. and xliv. At the same time, probably, he added ch. xlvi. 13-26 to the previous prophecy respecting Egypt, and, perhaps, made some additions to other parts previously written. We do not profess to agree with Ewald in all the details of this arrangement, but we certainly prefer the principle he adopts to that of any former critic. We may add that Umbreit (*Praktischer Comm. üb. d. Jeremia*, p. xxvii.) states, that he has found himself more nearly in agreement with Ewald, as to arrangement, than with any one else.

The principal predictions relating to the Messiah are found in ch. xxiii. 1-8; xxx. 31-40; xxxiii. 14-26 (Hengstenberg's *Christologie*, vol. iii. pp. 495-619).

JERICHO (יְרִיחוֹ and יְרֵחוֹ; Sept. Ἱεριχώ; Josephus, Ἱεριχοῦς), a town in the plain of the same name, not far from the river Jordan, at the point where it enters the Dead Sea. It lay before the Israelites when they crossed the river, on first entering the Promised Land; and the

* Ewald supposes that the proper place of the introductory formula to ch. xviii. 1, is ch. xvii. 19.

account which the spies who were sent by them into the city received from their hostess Rahab, tended much to encourage their subsequent operations, as it showed that the inhabitants of the country were greatly alarmed at their advance, and the signal miracles which had marked their course from the Nile to the Jordan. The strange manner in which Jericho itself was taken must have strengthened this impression in the country, and appears, indeed, to have been designed for that effect. The town was utterly destroyed by the Israelites, who pronounced an awful curse upon whoever should rebuild it; and all the inhabitants were put to the sword, except Rahab and her family (Josh. ii. vi.). In these accounts Jericho is repeatedly called 'the city of palm-trees;' which shows that the hot and dry plain, so similar to the land of Egypt, was noted beyond other parts of Palestine for the tree which abounds in that *country*, but which was and is less common in the land of Canaan than general readers and painters suppose. It has now almost disappeared even from the plain of Jericho, although specimens remain in the plain of the Mediterranean coast.

Notwithstanding the curse, Jericho was soon rebuilt [Hiel], and became a school of the prophets (Judg. iii. 13; 1 Kings xvi. 34; 2 Kings ii. 4, 5). Its inhabitants returned after the exile, and it was eventually fortified by the Syrian general Bacchides (Ezra ii. 34; Neh. iii. 2; 1 Macc. ix. 50). Pompey marched from Scythopolis, along the valley of the Jordan, to Jericho, and thence to Jerusalem; and Strabo speaks of the castles Thrax and Taurus, in or near Jericho, as having been destroyed by him (Joseph. *Antiq.*

362. [Jericho.]

xiv. 4. 1; Strabo, xvi. 2. 40). Herod the Great, in the beginning of his career, captured and sacked Jericho, but afterwards strengthened and adorned it, when he had redeemed its revenues from Cleopatra, on whom the plain had been bestowed by Antony (Joseph. *Antiq.* xv. 4. 1, 2). He appears to have often resided here, probably in winter: he built over the city a fortress called Cypros, between which and the former palace he erected other palaces, and called them by the names of his friends (Joseph. *Antiq.* xvi. 5. 2; *De Bell. Jud.* i. 21. 4, 9). Here also was a hippodrome or circus, in which the same tyrant, when lying at Jericho on his death-bed, caused the nobles of the land to be shut up, for massacre after his death. He died here; but his bloody intention was not executed (Joseph. *Antiq.* xvii. 6. 5; *De Bell. Jud.* i. 33. 6-8). The palace at this place was afterwards rebuilt more magnificently by Archelaus (*Antiq.* xvii. 31). By this it will be seen that the Jericho which existed in the time of our Saviour was a great and important city—probably more so than it had ever been since its foundation. It was once visited by him, when he lodged with Zaccheus, and healed the blind man (Luke xviii. 35-43; xix. 1-7; Matt. xx. 29-34; Mark x. 46-52). Jericho was afterwards made the head of one of the toparchies, and was visited by Vespasian before he left the country, who stationed there the tenth legion in garrison (Joseph. *De Bell. Jud.* iii. 3. 5; iv. 8. 1; v. 2. 3). Eusebius and Jerome describe Jericho as having been destroyed during the siege of Jerusalem, on account of the perfidy of the inhabitants, but add that it was afterwards rebuilt; but, as Josephus is silent respecting this event, Dr. Robinson regards it as doubtful. That the town continued to exist as a place of importance, appears from the names of five bishops of Jericho which have been collected (*Oriens Christ.*

iii. 654). The emperor Justinian built here a Xenodochium, apparently for pilgrims, and also a church, dedicated to the Virgin; and the monastery of St. John, near the Jordan, was already in existence (Procop. *De Ædific. Justiniani*, v. 9). The town, however, appears to have been overthrown during the Mohammedan conquest; for Adamnanus, at the close of the seventh century, describes the site as without human habitations, and covered with corn and vines. The celebrated palm-groves still existed. In the next century a church is mentioned; and in the ninth century several monasteries appear. About the same time the plain of Jericho is again noticed for its fertility and peculiar products; and it appears to have been brought under cultivation by the Saracens, for the sake of the sugar and other products for which the soil and climate were more suitable than any other in Palestine. Ruins of extensive aqueducts, with pointed Saracenic arches, remain in evidence of the elaborate irrigation and culture of this fine plain—which is nothing without water, and everything with it—at a period long subsequent to the occupation of the country by the Jews. It is to this age that we may probably refer the origin of the castle and village, which have since been regarded as representing Jericho. The place has been mentioned by travellers and pilgrims down to the present time as a poor hamlet consisting of a few houses. In the fifteenth century the square castle or tower began to pass among pilgrims as the house of Zaccheus, a title which it bears to the present day.

The village thus identified with Jericho now bears the name of Rihah, and is situated about the middle of the plain, six miles west from the Jordan, in N. lat. 31° 57′, and E. long. 35° 33′. Dr. Olin describes the present village as 'the meanest and foulest of Palestine.' It may perhaps contain forty dwellings, formed of small loose stones. The walls, which threaten to tumble down at a touch, are covered with flat roofs, composed of reed or straw plastered over with mud. Around most of these dwellings a little yard is inclosed with dry thorn-bushes. The village has a similar bulwark, which, insufficient as it appears to offer resistance to an invader, is quite effectual against the maranding Bedonins, with their bare feet and legs, or any other enemy in too great haste to burn it. The most important object is the castle or tower already mentioned, which Dr. Robinson supposes to have been constructed to protect the cultivation of the plain under the Saracens. It is thirty or forty feet square, and about the same height, and is now in a dilapidated condition. The pilgrims, as we have seen, regard it as the house of Zaccheus; and they also point to a solitary *palm-tree*, the only survivor of the groves which once gave the town one of its distinguishing names, as the identical *sycamore* which was climbed by the same personage to view the Saviour as he passed.

Rihah may contain about two hundred inhabitants, who have a sickly aspect, and are reckoned vicious and indolent. They keep a few cattle and sheep, and till a little land for grain as well as for gardens. A small degree of industry and skill bestowed on this prolific soil, favoured as it is with abundant water for irrigation, would amply reward the labour. But this is wanting; and everything bears the mark of abject, and, which is unusual in the East, of squalid poverty. There are some fine fig-trees near the village, and some vines in the gardens. But the most distinguishing feature of the whole plain is a noble grove of trees which borders the village on the west, and stretches away northward to the distance of two miles or more.

This grove owes its existence to the waters of one of the fountains, the careful distribution of which over the plain by canals and aqueducts did once, and might still, cover it with abundance. One of these fountains is called by the natives Ain es-Sultan, but by pilgrims the Fountain of Elias, being supposed to be the same whose bitter waters were cured by that prophet. Dr. Robinson thinks there is reason for this conclusion. It lies almost two miles N.W. from the village. It bursts forth at the foot of a high double mound, situated a mile or more in front of the mountain Quarantana. It is a large and beautiful fountain of sweet and pleasant water. The principal stream runs towards the village, and the rest of the water finds its way at random in various streams down the plain. Beyond the fountain rises up the bold perpendicular face of the mountain Quarantana (Kuruntul), from the foot of which a line of low hills runs out N.N.E. in front of the mountains, and forms the ascent to a narrow tract of tableland along their base. On this tract, at the foot of the mountains, about two and a half miles N.N.W. from the Ain es-Sultan, is the still larger fountain of Duk, the waters of which are brought along the base of Quarantana in a canal to the top of the declivity at the back of Ain es-Sultan, whence they were formerly distributed to several mills, and scattered over the upper part of the plain (Robinson's *Bib. Researches*, ii. 284, 285).

Under the mountains on the western confine of the plain, about two miles west of Rihah, and just where the road from Jerusalem comes down into the plain, are considerable ruins, extending both on the north and south side of the road. There is nothing massive or imposing in these remains, although they doubtless mark the site of an important ancient town. The stones are small and unwrought, and have the appearance of being merely the refuse, which was left as worthless by those who bore away the more valuable materials to be employed in the erection of new buildings. Mr. Buckingham was the first to suspect that these were the ruins of the ancient Jericho. He shows that the situation agrees better with the ancient intimations than does that of the modern village, near which no trace of ancient ruins can be found (*Travels in Palestine*, p. 293). Since this idea was started the matter has been examined by other travellers; and the conclusion seems to be that Rihah is certainly not the ancient Jericho, and that there is no site of ancient ruins on the plain which so well answers to the intimations as that now described; although even here some drawback to a satisfactory conclusion is felt, in the absence of any traces of those great buildings which belonged to the Jericho of king Herod. We should like to examine this matter more in detail than would be satisfactory to any but an antiquarian reader; but shall be content to introduce the concise and clear view of the question which has

been given by Dr. Olin in his very useful *Travels in the East.* 'Travellers concur in calling this wretched place (Rihah) Jericho, though I am not aware that any reason exists for believing that it occupies the site of the ancient city of that name. Here are no ruins to indicate the former presence of a considerable town; nothing but the tower to induce a suspicion that anything much better than the present filthy village ever existed upon the spot. The situation does not agree with that of the ancient city, which, according to Josephus, was close to the mountain, and nearer, by several miles, to Jerusalem. The ruins already described, at the foot of the mountain, where the Jerusalem road enters the plain, not improbably mark the site of ancient Jericho. Their distance from the Jordan and from Jerusalem agrees well with that of the Jericho of the age of Josephus, which he states to have been sixty furlongs from the river, and one hundred and fifty from the capital. This site also satisfies his description in being situated "in the plain, while a naked and barren mountain hangs over it." The exact position of the ancient city is not definitely stated in the Bible, though it is always spoken of as at a considerable distance from the Jordan. The position at the foot of the mountain was in accordance with the customs of that early age, and of Palestine especially, where nearly all the cities of which mention is made in its early history occupied strong positions, either embracing or adjacent to a mountain elevation, on which a citadel was erected for defence. The language of Josephus seems, indeed, to imply that Jericho, in his day, did not occupy the same ground as the city destroyed by Joshua, and that the description quoted above refers to the later city. He says, in describing the fountain healed by Elisha, that it "arises near the old city, which Joshua, the son of Nun, took;" language which must, perhaps, be understood to imply that the later town occupied a different site. It was highly probable, after the terrible malediction pronounced against those who should rebuild the accursed place, that some change should be made in the location, though not so great as to lose the peculiar advantages of the ancient site. Hiel, the Bethelite, as we know, braved the prophetic curse, and rebuilt the city upon its old foundations; but the same cause might still operate, and with additional effect, after his punishment, to induce more pious or scrupulous men to prefer a place less obnoxious to the divine displeasure. Both sites, that near the fountain and the one upon the Jerusalem road, give evidence of having been anciently covered with buildings. They were probably occupied successively, or both may have been embraced at once within the compass of a large city and its suburbs. In order to render the several notices of Jericho contained in the Bible consistent with each other, and with the description in Josephus, it seems necessary to suppose more than one change of situation. Joshua "burned the city with fire, and all that was therein," and said, "Cursed be the man before the Lord that riseth up and buildeth this city Jericho: he shall lay the foundation thereof in his first-born, and in his youngest son shall he set up the gates thereof." It was about 520 years after this, in the impious reign of Ahab, that Hiel rebuilt the city, and suffered the fearful penalty that had been denounced against such an act of daring impiety. "He laid the foundation thereof in Abiram his first-born, and set up the gates thereof in his youngest son Segub, according to the word of the Lord which he spake by Joshua, the son of Nun" (1 Kings xvi. 34). Previous to this, however, and almost immediately after the death of Joshua, reference is made to the city of palm-trees, which was captured by Eglon, king of Moab (Judg. iii. 13), and it was nearly 100 years before the rebuilding by Hiel that David's ambassadors, who had been so grievously insulted by the king of Ammon, were directed "to tarry at Jericho until their beards were grown" (2 Sam. x. 5). We are to infer, from these several statements, that Jericho was rebuilt soon after its destruction by Joshua, but not upon its ancient foundations—a change by which the penalty was avoided. The malediction had probably fallen into oblivion, or, if remembered, was likely to be treated with contempt in the infidel and idolatrous age when Hiel restored the original city. It was, according to the common chronology, about thirty years subsequent to this restoration that Elisha healed the fountain from which the city derived its supply of water. It is probable that the accursed site had been again abandoned, upon the catastrophe that followed the impious attempt of Hiel, for the existing city seems to have been at some distance from "the spring of the waters," which produced sterility and disease (2 Kings ii. 21). It may have occupied, at the era of Elisha's miracle, the same site as it did when visited by our Saviour, and described by Josephus.'

JEROBOAM (יָרָבְעָם; Sept. Ἱεροβοάμ), son of Nebat, and first king of Israel, who became king B.C. 975, and reigned 22 years.

He was of the tribe of Ephraim, the son of a widow named Zeruiah, when he was noticed by Solomon as a clever and active young man, and was appointed one of the superintendents of the works which that magnificent king was carrying on at Jerusalem. This appointment, the reward of his merits, might have satisfied his ambition had not the declaration of the prophet Ahijah given him higher hopes. When informed that, by the divine appointment, he was to become king over the ten tribes about to be rent from the house of David, he was not content to wait patiently for the death of Solomon, but began to form plots and conspiracies, the discovery of which constrained him to flee to Egypt to escape condign punishment. The king of that country was but too ready to encourage one whose success must necessarily weaken the kingdom which had become great and formidable under David and Solomon, and which had already pushed its frontier to the Red Sea (1 Kings xi. 20-40).

When Solomon died, the ten tribes sent to call Jeroboam from Egypt; and he appears to have headed the deputation which came before the son of Solomon with a demand of new securities for the rights which the measures of the late king had compromised. It may somewhat excuse the harsh answer of Rehoboam, that the demand was urged by a body of men headed by one whose pretensions were so well known and so odious to the house of David. It cannot be denied, that in making their applications thus offensively, they struck the first

blow; although it is possible that they, in the first instance, intended to use the presence of Jeroboam for no other purpose than to frighten the king into compliance. The imprudent answer of Rehoboam rendered a revolution inevitable, and Jeroboam was then called to reign over the ten tribes, by the style of 'King of Israel' (1 Kings xii. 1-20).

The general course of his conduct on the throne has already been indicated in the article ISRAEL, and need not be repeated in this place. The leading object of his policy was to widen the breach between the two kingdoms, and to rend asunder those common interests among all the descendants of Jacob, which it was one great object of the law to combine and interlace. To this end he scrupled not to sacrifice the most sacred and inviolable interests and obligations of the covenant people, by forbidding his subjects to resort to the one temple and altar of Jehovah at Jerusalem, and by establishing shrines at Dan and Beth-el—the extremities of his kingdom—where 'golden calves' were set up as the symbols of Jehovah, to which the people were enjoined to resort and bring their offerings. The pontificate of the new establishment he united to his crown, in imitation of the Egyptian kings. He was officiating in that capacity at Beth-el, offering incense, when a prophet appeared, and in the name of the Lord announced a coming time, as yet far off, in which a king of the house of David, Josiah by name, should burn upon that unholy altar the bones of its ministers. He was then preparing to verify, by a commissioned prodigy, the truth of the oracle he had delivered, when the king attempted to arrest him, but was smitten with palsy in the arm he stretched forth. At the same moment the threatened prodigy took place, the altar was rent asunder, and the ashes strewed far around. This measure had, however, no abiding effect. The policy on which he acted lay too deep in what he deemed the vital interests of his separate kingdom, to be even thus abandoned: and the force of the considerations which determined his conduct may in part be appreciated from the fact that no subsequent king of Israel, however well disposed in other respects, ever ventured to lay a finger on this schismatical establishment. Hence 'the sin of Jeroboam the son of Nebat, wherewith he sinned and made Israel to sin,' became a standing phrase in describing that iniquity from which no king of Israel departed (1 Kings xii. 25-33; xiii.).

The contumacy of Jeroboam eventually brought upon him the doom which he probably dreaded beyond all others—the speedy extinction of the dynasty which he had taken so much pains and incurred so much guilt to establish on firm foundations. His son Abijah being sick, he sent his wife disguised to consult the prophet Ahijah, who had predicted that he should be king of Israel. The prophet, although he had become blind with age, knew the queen, and saluted her with—'Come in, thou wife of Jeroboam, for I am sent to thee with heavy tidings.' These were not merely that the son should die—for that was intended in mercy to one who alone, of all the house of Jeroboam, had remained faithful to his God, and was the only one who should obtain an honoured grave—but that his race should be violently and utterly extinguished: 'I will take away the remnant of the house of Jeroboam as a man taketh away dung, till it be all gone' (1 Kings xiv. 1-18).

The son died so soon as the mother crossed the threshold on her return; and as the death of Jeroboam himself is the next event recorded, it would seem that he did not long survive his son. He died in B.C. 954 (1 Kings xiv. 20).

Jeroboam was perhaps a less remarkable man than the circumstance of his being the founder of a new kingdom might lead us to expect. The tribes would have revolted without him; and he was chosen king merely because he had been pointed out by previous circumstances. His government exhibits but one idea—that of raising a barrier against the re-union of the tribes. Of this idea he was the slave and victim; and although the barrier which he raised was effectual for its purpose, it only served to show the weakness of the man who could deem needful the protection for his separate interests which such a barrier offered.

2. JEROBOAM, thirteenth king of Israel, son of Joash, whom, in B.C. 824, he succeeded on the throne, and reigned forty-one years. He followed the example of the first Jeroboam in keeping up the idolatry of the golden calves. Nevertheless the Lord had pity upon Israel, the time of its ruin was not yet come, and this reign was long and flourishing. Jeroboam brought to a successful result the wars which his father had undertaken, and was always victorious over the Syrians. He even took their chief cities of Damascus and Hamath, which had formerly been subject to the sceptre of David, and restored to the realm of Israel the ancient eastern limits from Lebanon to the Dead Sea. He died in B.C. 783 (2 Kings xiii. 15; xiv. 16, 23-29).

The Scriptural account of this reign is too short to enable us to judge of the character of a prince under whom the kingdom of Israel seems to have reached a degree of prosperity which it had never before enjoyed, and was not able long to preserve.

JERUB-BAAL. [GIDEON.]

JERUSALEM (יְרוּשָׁלַיִם, *habitation of peace*; Sept. Ἱερουσαλήμ; Vulg. *Hierosolyma*; Arab. *El Kuds*), the Jewish capital of Palestine. It is mentioned very early in Scripture, being usually supposed to be the Salem of which Melchizedek was king. Such was the opinion of the Jews themselves; for Josephus, who calls Melchizedek king of Solyma, observes that this name was afterwards changed into Hierosolyma. All the fathers of the church, Jerome excepted, agree with Josephus, and understand Jerusalem and Salem to indicate the same place. The Psalmist also says (lxxvi. 2): 'In Salem is his tabernacle, and his dwelling-place in Sion.'

The mountain of the land of Moriah, which Abraham (Gen. xxii. 2) reached on the third day from Beersheba, there to offer Isaac, is, according to Josephus (*Antiq.* i. 13. 2), the mountain on which Solomon afterwards built the temple (2 Chron. iii. 1).

The name Jerusalem first occurs in Josh. x. 1, where Adoni-zedek, king of Jerusalem, is mentioned as having entered into an alliance with other kings against Joshua, by whom they were all overcome (comp. Josh. xii. 10).

In drawing the northern border of Judah, we find

Jerusalem again mentioned (Josh. xv. 8; comp. Josh. xviii. 16). This border ran through the valley of Ben Hinnom; the country on the south of it, as Bethlehem, belonged to Judah; but the mountain of Zion, forming the northern wall of the valley, and occupied by the Jebusites, appertained to Benjamin. Among the cities of Benjamin, therefore, is also mentioned (Josh. xviii. 28) 'Jebus, which is Jerusalem' (comp. Judg. xix. 10; 1 Chron. xi. 4).

After the death of Joshua, when there remained for the children of Israel much to conquer in Canaan, the Lord directed Judah to fight against the Canaanites; and they took Jerusalem, smote it with the edge of the sword, and set it on fire (Judg. i. 1-8). After that, the Judahites and the Benjamites dwelt with the Jebusites at Jerusalem; for it is recorded (Josh. xv. 63) that the children of Judah could not drive out the Jebusites inhabiting Jerusalem; and we are farther informed (Judg. i. 21) that the children of Benjamin did not expel them from Jerusalem. Probably the Jebusites were removed by Judah only from the lower city, but kept possession of the mountain of Zion, which David conquered at a later period. Jerusalem is not again mentioned till the time of Saul, when it is stated (1 Sam. xvii. 54) that David took the head of Goliath and brought it to Jerusalem. After David, who had previously reigned over Judah alone in Hebron, was called to rule over all Israel, he led his forces against the Jebusites, and conquered the castle of Zion, which Joab first scaled (1 Sam. v. 5-9; 1 Chron. xii. 4-8). He then fixed his abode on this mountain, and called it 'the city of David.' Thither he carried the ark of the cove-

363. [Jerusalem.]

nant; and there he built unto the Lord an altar in the threshing-floor of Araunah the Jebusite, on the place where the angel stood who threatened Jerusalem with pestilence (2 Sam. xxiv. 15-25). But David could not build a house unto the name of the Lord his God for the wars which were about him on every side (2 Sam. vii. 13; 1 Kings v. 3-5). Still the Lord announced to him, through the prophet Nathan (2 Sam. vii. 10), 'I will appoint a place for my people Israel, and will plant them, that they may dwell in a place of their own and move no more.' From this it would seem that even David had, then at least, no assurance that Jerusalem in particular was to be the place which had so often been spoken of as that which God would choose for the central seat of the theocratical monarchy, and which it became after Solomon's temple had been built.

The reasons which led David to fix upon Jerusalem as the metropolis of his kingdom have been alluded to elsewhere [Israel; Judah]; being, chiefly, that it was in his own tribe of Judah, in which his influence was the strongest, while it was the nearest to the other tribes of any site he could have chosen in Judah. The peculiar strength also of the situation, enclosed on three sides by a natural trench of valleys, could not be without weight. Its great strength, according to the military notions of that age, is shown by the length of time the Jebusites were able to keep possession of it against the force of all Israel. David was doubtless the best judge of his own interests in this matter; but if those interests had not come into play, and if he had only considered the best situation for a metropolis of the whole kingdom, it is doubtful whether a more centrical situation with respect to *all* the tribes would not have been far preferable, especially as the law required all the adult males of Israel to repair three times in the year to the place of the Divine presence. Indeed, the burdensome character of this obligation to the more distant tribes, seems to have

been one of the excuses for the revolt of the ten tribes; as it certainly was for the establishment of schismatic altars in Dan and Beth-el (1 Kings xii. 28). Many travellers have suggested that Samaria, which afterwards became the metropolis of the separated kingdom, was far preferable to Jerusalem for the site of a capital city: and its centrical situation would also have been in its favour as a metropolis for all the tribes. But as the choice of David was subsequently confirmed by the Divine appointment, which made Mount Moriah the site of the temple, we are bound to consider the choice as having been providentially ordered with reference to the contingencies that afterwards arose, by which Jerusalem was made the capital of the separate kingdom of Judah, for which it was well adapted.

The promise made to David received its accomplishment when Solomon built his temple upon Mount Moriah. By him and his father Jerusalem had been made the imperial residence of the king of all Israel: and the temple, often called 'the house of Jehovah,' constituted it at the same time the residence of the King of kings, the supreme head of the theocratical state, whose vicegerents the human kings were taught to regard themselves. It now belonged, even less than a town of the Levites, to a particular tribe: it was the centre of all civil and religious affairs, the very place of which Moses spoke, Deut. xii. 5: 'The place which the Lord your God shall choose out of all your tribes to put his name there, even unto his habitation shall ye seek, and thither thou shalt come' (comp. ix. 6; xiii. 14; xiv. 23; xvi. 11-16; Ps. cxxii.).

Jerusalem was not, indeed, politically important: it was not the capital of a powerful empire directing the affairs of other states, but it stood high in the bright prospects foretold by David when declaring his faith in the coming of a Messiah (Ps. ii. 6; l. 2; lxxxvii.; cii. 16-22; cx. 2). In all these passages the name Zion is used, which, although properly applied to the southernmost part of the site of Jerusalem, is often in Scripture put poetically for Jerusalem generally, and sometimes for Mount Moriah and its temple.

The importance and splendour of Jerusalem were considerably lessened after the death of Solomon; under whose son, Rehoboam, ten of the tribes rebelled, Judah and Benjamin only remaining in their allegiance. Jerusalem was then only the capital of the very small state of Judah. And when Jeroboam instituted the worship of golden calves in Beth-el and Dan, the ten tribes went no longer up to Jerusalem to worship and sacrifice in the house of the Lord (1 Kings xii. 26-30).

After this time the history of Jerusalem is continued in the history of Judah, for which the second book of the Kings and of the Chronicles are the principal sources of information.

After the time of Solomon, the kingdom of Judah was almost alternately ruled by good kings, 'who did that which was right in the sight of the Lord,' and by such as were idolatrous and evil disposed; and the reign of the same king often varied, and was by turns good or evil. The condition of the kingdom, and of Jerusalem in particular as its metropolis, was very much affected by these mutations. Under good kings the city flourished, and under bad kings it suffered greatly. Under Rehoboam (B.C. 973) it was conquered by Shishak, king of Egypt, who pillaged the treasures of the temple (2 Chron. xii. 9). Under Amaziah it was taken by Jehoash, king of Israel, who broke down 400 cubits of the wall of the city, and took all the gold and silver, and all the vessels that were found in the temple (2 Kings xiv. 13, 14). Uzziah, son of Amaziah, who at first reigned well, built towers in Jerusalem at the corner-gate, at the valley-gate, and at the turning of the wall, and fortified them (2 Chron. xvi. 9). His son, Jotham, built the high gate of the temple, and reared up many other structures (2 Chron. xvii. 3, 4). Hezekiah (B.C. 728) added to the other honours of his reign that of an improver of Jerusalem. His most eminent work in that character was the stopping of the upper course of Gihon, and bringing its waters by a subterraneous aqueduct to the west side of the city (2 Chron. xxxii. 30). This work is inferred, from 2 Kings xx., to have been of great importance to Jerusalem, as it cut off a supply of water from any besieging enemy, and bestowed it upon the inhabitants of the city. Hezekiah's son, Manasseh, in his later and best years, built a strong and very high wall on the west-side of Jerusalem (2 Chron. xxxiii. 14). The works in the city connected with the names of the succeeding kings of Judah were, so far as recorded, confined to the defilement of the house of the Lord by bad kings, and its purgation by good kings, till about 100 years after Manasseh, when, for the abounding iniquities of the nation, the city and temple were abandoned to destruction. After a siege of three years, Jerusalem was taken by Nebuchadnezzar, who razed its walls, and destroyed its temple and palaces with fire (2 Kings xxv.; 2 Chron. xxxvi.; Jer. xxxix.). Thus was Jerusalem smitten with the calamity which Moses had prophesied would befal it, if the people would not keep the commandments of the Lord, but broke his covenant (Lev. xxvi. 14; Deut. xxviii.).

The ten tribes forming the kingdom of Israel had been already upwards of 130 years transported to Assyria, when Judah also was exiled to Babylon. The castle of David, the temple of Solomon, and the entire city, lay in ruins, and to all appearance there was an end of the people as well as of the holy city, which the Lord had chosen to himself. But God, before whom a thousand years are as one day, gave to the afflicted people a glimpse beyond the present calamity and retributive judgment, into a distant futurity. The same prophets who foretold the destruction of Jerusalem, also announced the consolations of a coming time.

Moses had long before predicted that if in the land of their captivity they repented of their evil, they should be brought back again to the land out of which they had been cast (Deut. xxx. 1-5; comp. 1 Kings viii. 46-53; Neh. i. 8, 9). The Lord also, through Isaiah, condescended to point out the agency through which the restoration of the holy city was to be accomplished, and even named long before his birth the very person, Cyrus, under whose orders this was to be effected. 'Thus saith the Lord of Cyrus: He is my shepherd and shall perform all my pleasure, even saying to Jerusalem, Thou

shalt be built; and to the temple, Thy foundation shall be laid' (Isa. xliv. 28; comp. Jer. iii. 2, 7, 8; xxiii. 3; xxxi. 10; xxxii. 36, 37).

Among the remarkably precise indications should be mentioned that in which Jeremiah (xxv. 9-12) limits the duration of Judah's captivity to 70 years.

These encouragements were continued through the prophets, who themselves shared the captivity. Of this number was Daniel, who thus prayed: 'O Lord, let thine anger be turned away from thy city Jerusalem, thy holy mountain: because for our sins, and for the iniquities of our fathers, Jerusalem and thy people are become a reproach to all that are about us. O Lord, hear, forgive; defer not, for thine own sake, for thy city and thy people are called by thy name' (Dan. ix. 16. 19). While the prophet was yet speaking it was revealed to him, that the streets and the walls of Jerusalem should be built again, even in troublous times (ver. 25).

Daniel lived to see the reign of Cyrus, king of Persia (Dan. x. i.), and the fulfilment of his prayer. It was in the year B.C. 536, 'in the first year of Cyrus,' that in accomplishment of the prophecy of Jeremiah, the Lord stirred up the spirit of this prince, who made a proclamation throughout all his kingdom, expressed in these remarkable words: 'The Lord God of heaven hath given me all the kingdoms of the earth, and *he has charged me to build him a house at Jerusalem, which is in Judah.* Who is there among you of all his people? his God be with him, and let him go up to Jerusalem, and build the house of the Lord God of Israel' (Ezra i. 2, 3). This important call was answered by a considerable number of persons, particularly priests and Levites; and the many who declined to quit their houses and possessions in Babylonia, committed valuable gifts to the hands of their more zealous brethren. Cyrus also caused the sacred vessels of gold and silver which Nebuchadnezzar had taken from the temple to be restored to Sheshbazzar, the prince of Judah, who took them to Jerusalem, followed by 42,360 people, beside their servants, of whom there were 7337' (Ezra i. 5-11).

On their arrival at Jerusalem they contributed according to their ability to rebuild the temple; Jeshua, the priest, and Zerubbabel, reared up an altar to offer burnt-offerings thereon; and when in the following year the foundation was laid of the new house of God, 'the people shouted for joy, but many of the Levites who had seen the first temple, wept with a loud voice' (Ezra iii. 2, 12). When the Samaritans expressed a wish to share in the pious labour, Zerubbabel declined the offer; and in revenge the Samaritans sent a deputation to king Artaxerxes of Persia, carrying a presentment in which Jerusalem was described as a rebellious city of old time, which, if rebuilt, and its walls set up again, would not pay toll, tribute, and custom, and would thus endamage the public revenue. The deputation succeeded, and Artaxerxes ordered that the building of the temple should cease. The interruption thus caused lasted to the second year of the reign of Darius (Ezra iv. 24), when Zerubbabel and Jeshua, supported by the prophets Haggai and Zechariah, again resumed the work, and would not cease though cautioned by the Persian governor of Judæa. On the matter coming before Darius Hystaspis, and the Jews reminding him of the permission given by Cyrus, he decided in their favour, and also ordered that the expenses of the work should be defrayed out of the public revenue (Ezra vi. 8). In the sixth year of the reign of Darius the temple was finished, when they kept the Feast of Dedication with great joy, and next celebrated the Passover (Ezra vi. 15, 16, 19). Afterwards, in the seventh year of the second Artaxerxes, Ezra, a descendant of Aaron, came up to Jerusalem, accompanied by a large number of Jews who had remained in Babylon. He was highly patronised by the king, who not only made him a large present in gold and silver, but published a decree enjoining all treasurers of Judæa speedily to do whatever Ezra should require of them; allowing him to collect money throughout the whole province of Babylon for the wants of the temple at Jerusalem; and also giving him full power to appoint magistrates in his country to judge the people (Ezra vii. viii.) At a later period, in the twentieth year of king Artaxerxes, Nehemiah, who was his cupbearer, obtained permission to proceed to Jerusalem, and to complete the rebuilding of the city and its wall, which he happily accomplished, despite of all the opposition which he received from the enemies of Israel (Neh. i. ii. iv. vi.). The city was then capacious and large, but the people in it were few, and many houses lay still in ruins (Neh. vii. 4). At Jerusalem dwelt the rulers of the people and 'certain of the children of Judah and of the children of Benjamin;' but it was now determined that the rest of the people should cast lots to bring one of ten to the capital (Neh. xi. 1-4). All strangers, Samaritans, Ammonites, Moabites, &c., were removed, to keep the chosen people from pollution; ministers were appointed to the temple, and the service was performed according to the law of Moses (Ezra x.; Neh. viii., x., xii., xiii.). Of the Jerusalem thus by such great and long-continued exertions restored, very splendid prophecies were uttered by those prophets who flourished after the exile: the general purport of which was to describe the temple and city as destined to be glorified far beyond the former, by the advent of the long and eagerly expected Messiah, 'the desire of all nations' (Zech. ix. 9; xii. 10; xiii. 3; Hagg. ii. 6, 7; Mal. iii. 11).

Thus far the Old Testament has been our guide in the notices of Jerusalem. For what follows, down to its destruction by the Romans, we must draw chiefly upon Josephus, and the books of the Maccabees. The difficulty here, as before, is to separate what properly belongs to Jerusalem from that which belongs to the country at large. For as Jerusalem was invariably affected by whatever movement took place in the country of which it was the capital, its history might be made, and often has been made, the history of Palestine.

It is said by Josephus (*Antiq.* xi. 8), that when the dominion of this part of the world passed from the Persians to the Greeks, Alexander the Great advanced against Jerusalem to punish it for the fidelity to the Persians which it had manifested while he was engaged in the siege of Tyre. His hostile purposes, however, were averted by the appearance of the high-priest Jaddua at the head of a train of priests in their sacred vestments. Alexander recognised in him the figure which in

a dream had encouraged him to undertake the conquest of Asia. He therefore treated him with respect and reverence, spared the city against which his wrath had been kindled, and granted to the Jews high and important privileges. The historian adds that the high-priest failed not to apprise the conqueror of those prophecies in Daniel by which his successes had been predicted. The whole of this story is, however, liable to suspicion, from the absence of any notice of the circumstance in the histories of this campaign which we possess.

After the death of Alexander at Babylon (B.C. 324), Ptolemy surprised Jerusalem on the Sabbath day, when the Jews would not fight, plundered the city, and carried away a great number of the inhabitants to Egypt, where, however, from the estimation in which the Jews of this period were held as citizens, important privileges were bestowed upon them (Joseph. *Antiq.* xii. 1). In the contests which afterwards followed for the possession of Syria (including Palestine), Jerusalem does not appear to have been directly injured, and was even spared when Ptolemy gave up Samaria, Acco, Joppa, and Gaza to pillage. The contest was ended by the treaty in B.C. 302, which annexed the whole of Palestine, together with Arabia Petræa and Cœle-Syria, to Egypt. Under easy subjection to the Ptolemies the Jews remained in much tranquillity for more than a hundred years, in which the principal incident, as regards Jerusalem itself, was the visit which was paid to it, in B.C. 245, by Ptolemy Euergetes, on his return from his victories in the East. He offered many sacrifices, and made magnificent presents to the temple. In the wars between Antiochus the Great and the kings of Egypt, from B.C. 221 to 197, Judæa could not fail to suffer severely; but we are not acquainted with any incident in which Jerusalem was principally concerned, till the alleged visit of Ptolemy Philopator in B.C. 211. He offered sacrifices, and gave rich gifts to the temple, but venturing to enter the sanctuary, in spite of the remonstrances of the high-priest, he was seized with a supernatural dread, and fled in terror from the place. It is said that on his return to Egypt he vented his rage on the Jews of Alexandria in a very barbarous manner [ALEXANDRIA]. But the whole story of his visit and its results rests upon the sole authority of the third book of Maccabees (chaps. i. and ii.), and is therefore not entitled to implicit credit. Towards the end of this war the Jews seemed to favour the cause of Antiochus; and after he had subdued the neighbouring country, they voluntarily tendered their submission, and rendered their assistance in expelling the Egyptian garrison from Mount Zion. For this conduct they were rewarded by many important privileges by Antiochus. He issued decrees directing, among other things, that the outworks of the temple should be completed, and that all the materials for needful repairs should be exempted from taxes. The peculiar sanctity of the temple was also to be respected. No foreigner was to pass the sacred walls; and the city itself was to be protected from pollution: it being strictly forbidden that the flesh or skins of any beasts which the Jews accounted unclean should be brought into it (Joseph. *Antiq.* xii. 3. 3). These were very liberal concessions to what the king himself must have regarded as the prejudices of the Jewish people.

Under their new masters the Jews enjoyed for a time nearly as much tranquillity as under the generally benign and liberal government of the Ptolemies. But in B.C. 176, Seleucus Philopator, hearing that great treasures were hoarded up in the temple, and being distressed for money to carry on his wars, sent his treasurer, Heliodorus, to bring away these treasures. But this personage is reported to have been so frightened and stricken by an apparition that he relinquished the attempt; and Seleucus left the Jews in the undisturbed enjoyment of their rights (2 Macc. iii. 4-40; Joseph. *Antiq.* xii. 3. 3). His brother and successor, Antiochus Epiphanes, however, was of another mind. He took up the design of reducing them to a conformity of manners and religion with other nations; or, in other words, of abolishing those distinctive features which made the Jews a peculiar people, socially separated from all others. This design was odious to the great body of the people, although there were many among the higher classes who regarded it with favour. Of this way of thinking was Menelaus, whom Antiochus had made high-priest, and who was expelled by the orthodox Jews with ignominy, in B.C. 169, when they heard the joyful news that Antiochus had been slain in Egypt. The rumour proved untrue, and Antiochus on his return punished them by plundering and profaning the temple. Worse evils befel them two years after: for Antiochus, out of humour at being compelled by the Romans to abandon his designs upon Egypt, sent his chief collector of tribute, Apollonius, with a detachment of 22,000 men, to vent his rage on Jerusalem. This person plundered the city, and razed its walls, with the stones of which he built a citadel that commanded the temple mount. A statue of Jupiter was set up in the temple; the peculiar observances of the Jewish law were abolished; and a persecution was commenced against all who adhered to these observances, and refused to sacrifice to idols. Jerusalem was deserted by priests and people, and the daily sacrifice at the altar was entirely discontinued (1 Macc. i. 29-40; 2 Macc. v. 24-26; Joseph. *Antiq.* xii. 5. 4).

This led to the celebrated revolt of the Maccabees, who, after an arduous and sanguinary struggle, obtained possession of Jerusalem (B.C. 163), and repaired and purified the temple, which was then dilapidated and deserted. New utensils were provided for the sacred services: the old altar, which had been polluted by heathen abominations, was taken away, and a new one erected. The sacrifices were then recommenced, exactly three years after the temple had been dedicated to Jupiter Olympius. The castle, however, remained in the hands of the Syrians, and long proved a sore annoyance to the Jews, although Judas Maccabæus surrounded the temple with a high and strong wall, furnished with towers, in which soldiers were stationed to protect the worshippers from the Syrian garrison (1 Macc. i. 36, 37; Joseph. *Antiq.* vii. 7). Eventually the annoyance grew so intolerable that Judas laid siege to the castle. This attempt brought a powerful army into the country under the command of the regent Lysias, who, however, being constrained to turn his arms elsewhere, made peace with the Jews; but when he was ad-

mitted into the city, and observed the strength of the place, he threw down the walls, in violation of the treaty (1 Macc. vi. 48-65). In the ensuing war with Bacchides, the general of Demetrius Soter, in which Judas was slain, the Syrians strengthened their citadel, and placed in it the sons of the principal Jewish families as hostages (1 Macc. ix. 52, 53; Joseph. *Antiq.* xiii. 1. 3). The year after (B.C. 159) the temporising high-priest Alcimus directed the wall which separated the court of Israel from that of the Gentiles to be cast down, to afford the latter free access to the temple: but he was seized with palsy as soon as the work commenced, and died in great agony (1 Macc. ix. 51-57). When, a few years after, Demetrius and Alexander Balas sought to outbid each other for the support of Jonathan, the hostages in the castle were released; and subsequently all the Syrian garrisons in Judæa were evacuated, excepting those of Jerusalem and Bethzur, which were chiefly occupied by apostate Jews, who were afraid to leave their places of refuge. Jonathan then rebuilt the walls of Jerusalem, and repaired the buildings of the city, besides erecting a palace for his own residence (1 Macc. x. 2-4; Joseph. *Antiq.* xiii. 2. 1). The particular history of Jerusalem for several years following is little more than an account of the efforts of the Maccabæan princes to obtain possession of the castle, and of the Syrian kings to retain it in their hands. At length, in B.C. 142, the garrison was forced to surrender by Simon, who demolished it altogether, that it might not again be used against the Jews by their enemies. Simon then strengthened the fortifications of the mountain on which the temple stood, and built there a palace for himself (1 Macc. xiii. 43-52; Joseph. *Antiq.* xiii. 6. 6). This building was afterwards turned into a regular fortress by John Hyrcanus, and was ever after the residence of the Maccabæan princes (Joseph. *Antiq.* xv. 11. 4). It is called by Josephus 'the castle of Baris,' in his history of the Jews; till it was strengthened and enlarged by Herod the Great, who called it the castle of Antonia, under which name it makes a conspicuous figure in the Jewish wars with the Romans.

Of Jerusalem itself we find nothing of consequence, till it was taken by Pompey in the summer of B.C. 63, and on the very day observed by the Jews as one of lamentation and fasting, in commemoration of the conquest of Jerusalem by Nebuchadnezzar. Twelve thousand Jews were massacred in the temple courts, including many priests, who died at the very altar rather than suspend the sacred rites (Joseph. *Antiq.* xiv. 1-4). On this occasion Pompey, attended by his generals, went into the temple and viewed the sanctuary; but he left untouched all its treasures and sacred things, while the walls of the city itself were demolished. From this time the Jews are to be considered as under the dominion of the Romans (Joseph. *Antiq.* xiv. 4. 5). The treasures which Pompey had spared were seized a few years after (B.C. 51) by Crassus. In the year B.C. 43, the walls of the city, which Pompey had demolished, were rebuilt by Antipater, the father of that Herod the Great under whom Jerusalem was destined to assume the new and more magnificent aspect which it bore in the time of Christ, and which constituted the Jerusalem which Josephus describes. This Jerusalem—the Jerusalem as improved by the magnificent tastes and profuse expenditure of Herod—was probably as different from the Jerusalem before his time as the London of 1844 is from the London of 1800. And perhaps the difference was even greater, for our great fanes still exist; whereas the temple, which always formed the great architectural glory of Jerusalem, was taken down and rebuilt by Herod the Great, with a magnificence exceeding that of Solomon's (Mark xiii. 1; John ii. 20; see TEMPLE). It was in the courts of the temple as thus rebuilt, and in the streets of the city as thus improved, that the Saviour of men walked up and down. Here he taught, here he wrought miracles, here he suffered; and this was the temple whose 'goodly stones' the apostle admired (Mark xiii. 1), and of which he foretold that ere the existing generation had passed away not one stone should be left upon another. Nor was the city in this state admired by Jews only. Pliny calls it 'longe clarissimam urbium orientis, non Judææ modo' (*Hist. Nat.* v. 16).

Jerusalem seems to have been raised to this greatness, as if to enhance the misery of its overthrow. So soon as the Jews had set the seal to their formal rejection of Christ, by putting him to death, and invoking the responsibility of his blood upon the heads of themselves and of their children (Matt. xxvii. 25), its doom went forth. After having been the scene of horrors without example, it was, in A.D. 70, abandoned to the Romans, who razed the city and temple to the ground, leaving only three of the towers and a part of the western wall to show how strong a place the Roman arms had overthrown. Since then the holy city has lain at the mercy of the Gentiles, and will so remain 'until the times of the Gentiles are fulfilled.'

MODERN HISTORY.—The destruction of Jerusalem by the Romans did not cause the site to be utterly forsaken. Titus left there in garrison the whole of the tenth legion, besides several squadrons of cavalry and cohorts of foot. For these troops, and for those who ministered to their wants, there must have been dwellings; and there is no reason to suppose that such Jews or Christians as appeared to have taken no part in the war were forbidden to make their abode among the ruins, and building them up so far as their necessities might require. But nothing like a restoration of the city could have arisen from this, as it was not likely that any but poor people, who found an interest in supplying the wants of the garrison, were likely to resort to the ruins under such circumstances. However, we learn from Jerome that for fifty years after its destruction, until the time of Adrian, there still existed remnants of the city. But during all this period there is no mention of it in history.

Up to A.D. 131 the Jews remained tolerably quiet, although apparently waiting any favourable opportunity of shaking off the Roman yoke. The then emperor, Adrian, seems to have been aware of this state of feeling, and, among other measures of precaution, ordered Jerusalem to be rebuilt as a fortified place wherewith to keep in check the whole Jewish population. The works had made some progress, when the Jews, unable to endure the idea that their holy city should be occupied by foreigners, and that strange gods

should be set up within it, broke out into open rebellion under the notorious Barchochebas, who claimed to be the Messiah. His success was at first very great; but he was crushed before the tremendous power of the Romans, so soon as it could be brought to bear upon him; and a war scarcely inferior in horror to that under Vespasian and Titus was, like it, brought to a close by the capture of Jerusalem, of which the Jews had obtained possession. This was in A.D. 135, from which period the final dispersion of the Jews has been often dated. The Romans then finished the city according to their first intention. It was made a Roman colony, inhabited wholly by foreigners, the Jews being forbidden to approach it on pain of death: a temple to Jupiter Capitolinus was erected on Mount Moriah, and the old name of Jerusalem was sought to be supplanted by that of Ælia Capitolina, conferred upon it in honour of the emperor, Ælius Adrianus, and Jupiter Capitolinus. By this name was the city known till the time of Constantine, when that of Jerusalem again became current, although Ælia was still its public designation, and remained such so late as A.D. 536, when it appears in the acts of a synod held there. This name even passed to the Mohammedans, by whom it was long retained; and it was not till after they recovered the city from the Crusaders that it became generally known among them by the name of El-Khuds—the holy—which it still bears.

From the rebuilding by Adrian the history of Jerusalem is almost a blank till the time of Constantine, when its history, as a place of extreme solicitude and interest to the Christian church, properly begins. Pilgrimages to the Holy City now became common and popular. Such a pilgrimage was undertaken in A.D. 326 by the emperor's mother Helena, then in the 80th year of her age, who built churches on the alleged site of the nativity at Bethlehem, and of the resurrection on the Mount of Olives. This example may probably have excited her son to the discovery of the site of the holy sepulchre, and to the erection of a church thereon. He removed the temple of Venus, with which, in studied insult, the site had been encumbered. The holy sepulchre was then purified, and a magnificent church was, by his order, built over and around the sacred spot. This temple was completed and dedicated with great solemnity in A.D. 335. There is no doubt that the spot thus singled out is the same which has ever since been regarded as the place in which Christ was entombed; but the correctness of the identification then made has been of late years much disputed, on grounds which have been examined in the article GOLGOTHA. The very cross on which our Lord suffered was also, in the course of these explorations, believed to have been discovered, under the circumstances which have already been described [CROSS].

By Constantine the edict, excluding the Jews from the city of their fathers' sepulchres, was so far repealed that they were allowed to enter it once a-year to wail over the desolation of 'the holy and beautiful house,' in which their fathers worshipped God. When the nephew of Constantine, the Emperor Julian, abandoned Christianity for the old Paganism, he endeavoured, as a matter of policy, to conciliate the Jews. He allowed them free access to the city, and permitted them to rebuild their temple. They accordingly began to lay the foundations in A.D. 362; but the speedy death of the emperor probably occasioned that abandonment of the attempt, which contemporary writers ascribe to supernatural hindrances. The edicts seem then to have been renewed which excluded the Jews from the city, except on the day of annual wailing.

In the following centuries the roads to Zion were thronged with pilgrims from all parts of Christendom, and the land abounded in monasteries, occupied by persons who wished to lead a religious life amid the scenes which had been sanctified by the Saviour's presence. After much struggle of conflicting dignities Jerusalem was, in A.D. 451, declared a patriarchate by the council of Chalcedon. In the next century it found a second Constantine in Justinian, who ascended the throne A.D. 527. He repaired and enriched the former structures, and built upon Mount Moriah a magnificent church to the Virgin, as a memorial of the persecution of Jesus in the temple. He also founded ten or eleven convents in and about Jerusalem and Jericho, and established an hospital for pilgrims in each of those cities.

But these prosperous days were soon to end. The Persians, who had long harassed the empire of the East, penetrated into Syria in A.D. 614, and after defeating the forces of the Emperor Heraclius, took Jerusalem by storm. Many thousands of the inhabitants were slain, and much of the city, including the finest churches—that of the holy sepulchre among them—was destroyed. When the conquerors withdrew they took away the principal inhabitants, the patriarch, and the true cross; but when, the year after, peace was concluded, these were restored, and the Emperor Heraclius entered Jerusalem in solemn state, bearing the cross upon his shoulders.

The damage occasioned by the Persians was speedily repaired. But Arabia soon furnished a more formidable enemy in the Khalif Omar, whose troops appeared before the city in A.D. 636, Arabia, Syria, and Egypt having already been brought under the Moslem yoke. After a long siege the austere khalif himself came to the camp, and the city was at length surrendered to him in A.D. 637. The conqueror of mighty kings entered the holy city in his garment of camel's hair, and conducted himself with much discretion and generous forbearance. By his orders the magnificent mosque which still bears his name was built upon Mount Moriah, upon the site of the Jewish temple.

Jerusalem remained in possession of the Arabians, and was occasionally visited by Christian pilgrims from Europe till towards the year 1000, when a general belief that the second coming of the Saviour was near at hand, drew pilgrims in unwonted crowds to the Holy Land, and created an impulse for pilgrimages thither, which ceased not to act after the first exciting cause had been forgotten. The Moslem government, in order to derive some profit from this enthusiasm, imposed the tribute of a piece of gold as the price of entrance into the holy city. The sight, by such large numbers, of the holy place in the hands of infidels, the exaction of tribute, and the insults to which the pilgrims, often of the highest rank, were exposed from the Moslem rabble, excited an extraordinary ferment in Europe, and led

to those remarkable expeditions for recovering the Holy Sepulchre from the Mohammedans, which, under the name of the Crusades, will always fill a most important and curious chapter in the history of the world.

The dominion over Palestine had passed in A.D. 960 from the khalifs of Bagdad to the Fatemite khalifs of Egypt, who, in their turn, were dispossessed in A.D. 1073 by the Turkmans, who had usurped the powers of the eastern khalifat. The severities exercised by these more fierce and uncivilized Moslems upon both the native Christians and the European pilgrims supplied the immediate impulse to the first eastern expedition. But by the time the crusaders, under Godfrey of Bouillon, appeared before Jerusalem, on the 17th of June, 1099, the Egyptian khalifs had recovered possession of Palestine and driven the Turkmans beyond the Euphrates.

After a siege of forty days, the holy city was taken by storm on the 15th day of July; and a dreadful massacre of the Moslem inhabitants followed, without distinction of age or sex. As soon as order was restored, and the city cleared of the dead, a regular government was established by the election of Godfrey as king of Jerusalem. One of the first cares of the new monarch was to dedicate anew to the Lord the place where His Presence had once abode; and the mosque of Omar became a Christian cathedral, which the historians of the time distinguish as 'the temple of the Lord' (*Templum Domini*). The Christians kept possession of Jerusalem eighty-eight years. During this long period they appear to have erected several churches and many convents. Of the latter few, if any, traces remain; and of the former, save one or two ruins, the church of the holy sepulchre, which they rebuilt, is the only memorial which attests the existence of the Christian kingdom of Jerusalem. In A.D. 1187 the holy city was wrested from the hands of the Christians by the Sultan Saladin, and the order of things was then reversed. The cross was removed with ignominy from the sacred dome, the holy places were purified from Christian stain with rose-water brought from Damascus, and the call to prayer by the muezzin once more sounded over the city. From that time to the present day the holy city has remained, with slight interruption, in the hands of the Moslems. On the threatened siege by Richard of England in 1192, Saladin took great pains in strengthening its defences. New walls and bulwarks were erected, and deep trenches cut, and in six months the town was stronger than it ever had been, and the works had the firmness and solidity of a rock. But in A.D. 1219, the Sultan Melek el Moaddin of Damascus, who then had possession of Jerusalem, ordered all the walls and towers to be demolished, except the citadel and the enclosure of the mosque, lest the Franks should again become masters of the city and find it a place of strength. In this defenceless state Jerusalem continued till it was delivered over to the Christians in consequence of a treaty with the emperor Frederick II., in A.D. 1229, with the understanding that the walls should not be rebuilt. Yet ten years later (A.D. 1239) the barons and knights of Jerusalem began to build the walls anew, and to erect a strong fortress on the west of the city. But the works were interrupted by the emir David of Kerek, who seized the city, strangled the Christian inhabitants, and cast down the newly erected walls and fortress. Four years after, however (A.D. 1243), Jerusalem was again made over to the Christians without any restriction, and the works appear to have been restored and completed; for they are mentioned as existing when the city was stormed by the wild Kharismian hordes in the following year; shortly after which the city reverted for the last time into the hands of its Mohammedan masters, who have kept it to the present day.

From this time Jerusalem appears to have sunk very much in political and military importance; and it is scarcely named in the history of the Memluk sultans who reigned over Egypt and the greater part of Syria in the fourteenth and fifteenth centuries. At length, with the rest of Syria and Egypt, it passed under the sway of the Turkish sultan Selim I., who paid a hasty visit to the holy city from Damascus after his return from Egypt. From that time Jerusalem has formed a part of the Ottoman empire, and during this period has been subject to few vicissitudes: its history is accordingly barren of incident. The present walls of the city were erected by Suleiman the Magnificent, the successor of Selim, in A.D. 1542, as is attested by an inscription over the Jaffa gate. So lately as A.D. 1808, the church of the holy sepulchre was partially consumed by fire; but the damage was repaired with great labour and expense by September, 1810, and the traveller now finds in this imposing fabric no traces of the recent calamity.

In A.D. 1832, Jerusalem became subject to Mohammed Ali, the pasha of Egypt, the holy city opening its gates to him without a siege. During the great insurrection in the districts of Jerusalem and Nabulus, in 1834, the insurgents seized upon Jerusalem, and held possession of it for a time; but by the vigorous operations of the government order was soon restored, and the city reverted quietly to its allegiance on the approach of Ibrahim Pasha with his troops. In 1841 Mohammed Ali was deprived of all his Syrian possessions by European interference, and Jerusalem was again subjected to the Turkish government, under which it now remains. It is not, perhaps, the happier for the change. The only subsequent event of interest has been the establishment of a Protestant bishopric at Jerusalem by the English and Prussian governments, and the erection upon Mount Zion of a church, calculated to hold 500 persons, for the celebration of divine worship according to the ritual of the English church. For the history of Jerusalem see *History von Jerusalem*, Strasbourg, 1518; Spalding, *Gesch. d. Christl. Königsreichs Jerusalem*, Berlin, 1803; Deyling, *Æliæ Capitolinæ Origg. et Historia*, Lips. 1743; Poujoulat, *Histoire de Jérusalem*, Brux. 1842; Raumer's *Palästina;* Robinson's *Bib. Researches in Palestine*.

Before proceeding to inquire into the ancient state of the city, and to describe its present condition, it will be well to furnish the reader with a general description of the site, that he may be enabled to follow the details with the more precision. For this purpose we shall avail ourselves of the able sketch given by Professor Robinson in his *Researches* (i. 380-384).

GENERAL TOPOGRAPHY.—'Jerusalem lies near

the summit of a broad mountain-ridge. This ridge, or mountainous tract, extends, without interruption, from the plain of Esdraelon to a line drawn between the south end of the Dead Sea and the south-east corner of the Mediterranean; or, more properly, perhaps, it may be regarded as extending as far south as to Jebel Arâif in the Desert, where it sinks down at once to the level of the great western plateau. This tract, which is everywhere not less than from 20 to 25 geographical miles in breadth, is, in fact, high uneven tableland. It everywhere forms the precipitous western wall of the great valley of the Jordan and the Dead Sea; while towards the west it sinks down by an off-set, into a range of lower hills, which lie between it and the great plain along the coast of the Mediterranean. The surface of this upper region is everywhere rocky, uneven, and mountainous; and is, moreover, cut up by deep valleys which run east or west on either side towards the Jordan or the Mediterranean. The line of division, or water-shed, between the waters of these valleys —a term which here applies almost exclusively to the waters of the rainy season—follows for the most part the height of land along the ridge; yet not so but that the heads of the valleys, which run off in different directions, often interlap for a considerable distance. Thus, for example, a valley which descends to the Jordan, often has its head a mile or two westward of the commencement of other valleys which run to the western sea.

From the great plain of Esdraelon onwards towards the south, the mountainous country rises gradually, forming the tract anciently known as the mountains of Ephraim and Judah; until, in the vicinity of Hebron, it attains an elevation of nearly 3000 Paris feet above the level of the Mediterranean Sea. Further north, on a line drawn from the north end of the Dead Sea towards the true west, the ridge has an elevation of only about 2500 Paris feet; and here, close upon the water-shed, lies the city of Jerusalem. Its mean geographical position is in lat. 31° 46′ 43″ N., and long. 35° 13′ E. from Greenwich.

Six or seven miles N. and N.W. of the city is spread out the open plain or basin round about el-Jib (Gibeon), extending also towards el-Bîreh (Beeroth); the waters of which flow off at its S.E. part through the deep valley here called by the Arabs Wady Beit Hanîna; but to which the monks and travellers have usually given the name of the 'Valley of Turpentine,' or of the Terebinth, on the mistaken supposition that it is the ancient Valley of Elah. This great valley passes along in a S.W. direction, an hour or more west of Jerusalem; and finally opens out from the mountains into the western plain, at the distance of six or eight hours S.W. from the city, under the name of Wady es Sŭrâr. The traveller, on his way from Ramleh to Jerusalem, descends into and crosses this deep valley at the village of Kulônieh on its western side, an hour and a half from the latter city. On again reaching the high ground on its eastern side, he enters upon an open tract sloping gradually downwards towards the east; and sees before him, at the distance of about two miles, the walls and domes of the holy city, and beyond them the higher ridge or summit of the Mount of Olives. The traveller now descends gradually towards the city along a broad swell of ground, having at some distance on his left the shallow northern part of the valley of Jehoshaphat; close at hand on his right the basin which forms the beginning of the Valley of Hinnom. Further down both these valleys become deep, narrow, and precipitous; that of Hinnom bends south and again east nearly at right angles, and unites with the other, which then continues its course to the Dead Sea. Upon the broad and elevated promontory within the fork of these two valleys lies the holy city. All around are higher hills; on the east the Mount of Olives; on the south the Hill of Evil Counsel, so called, rising directly from the Vale of Hinnom; on the west the ground rises gently, as above described, to the borders of the great Wady; while on the north, a bend of the ridge, connected with the Mount of Olives, bounds the prospect at the distance of more than a mile. Towards the S.W. the view is somewhat more open; for here lies the plain of Rephaim, commencing just at the southern brink of the valley of Hinnom, and stretching off S.W., where it runs to the western sea. In the N.W. too, the eye reaches up along the upper part of the valley of Jehoshaphat; and from many points can discern the mosque of Neby Samwîl, situated on a lofty ridge beyond the great Wady, at the distance of two hours.

The surface of the elevated promontory itself, on which the city stands, slopes somewhat steeply towards the east, terminating on the brink of the valley of Jehoshaphat. From the northern part, near the present Damascus gate, a depression or shallow wady runs in a southern direction, having on the west the ancient hills of Akra and Zion, and on the east the lower ones of Bezetha and Moriah. Between the hills of Akra and Zion another depression or shallow wady (still easy to be traced) comes down from near the Jaffa gate, and joins the former. It then continues obliquely down the slope, but with a deeper bed, in a southern direction, quite to the pool of Siloam and the valley of Jehoshaphat. This is the ancient Tyropœon. West of its lower part Zion rises loftily, lying mostly without the modern city; while on the east of the Tyropœon and the valley first mentioned, lie Bezetha, Moriah, and Ophel, the last a long and comparatively narrow ridge, also outside of the modern city, and terminating in a rocky point over the pool of Siloam. These three last hills may strictly be taken as only parts of one and the same ridge. The breadth of the whole site of Jerusalem, from the brow of the valley of Hinnom, near the Jaffa gate, to the brink of the valley of Jehoshaphat, is about 1020 yards, or nearly half a geographical mile; of which distance 318 yards are occupied by the area of the great mosque el-Haram esh-Sherîf. North of the Jaffa gate the city wall sweeps round more to the west, and increases the breadth of the city in that part.

The country around Jerusalem is all of limestone formation, and not particularly fertile. The rocks everywhere come out above the surface, which in many parts is also thickly strewed with loose stones; and the aspect of the whole region is barren and dreary; yet the olive thrives here abundantly, and fields of grain are seen in the valleys and level places, but they are less productive than in the region of Hebron and Nablus. Neither vineyards nor fig-trees flourish on

the high ground around the city, though the latter are found in the gardens below Siloam, and very frequently in the vicinity of Bethlehem.'

Ancient Jerusalem.—Every reader of Scripture feels a natural anxiety to form some notion of the appearance and condition of Jerusalem, as it existed in the time of Jesus, or rather as it stood before its destruction by the Romans. There are unusual difficulties in the way of satisfying this desire, although it need not be left altogether ungratified. The principal sources of these difficulties have been indicated by different travellers, and by none more forcibly than by Richardson (*Travels*, ii. 251). 'It is a tantalizing circumstance, however, for the traveller who wishes to recognise in his walks the site of particular buildings, or the scenes of memorable events, that the greater part of the objects mentioned in the description, both of the inspired and of the Jewish historian, are entirely razed from their foundation, without leaving a single trace or name behind to point out where they stood. Not an ancient tower, or gate, or wall, or hardly even a stone remains. The foundations are not only broken up, but every fragment of which they were composed is swept away, and the spectator looks upon the bare rock with hardly a sprinkling of earth to point out her gardens of pleasure, or groves of idolatrous devotion. A few gardens still remain on the sloping base of Mount Zion, watered from the pool of Siloam: the gardens of Gethsemane are still in a sort of ruined cultivation; the fences are broken down and the olive-trees decaying, as if the hand which dressed and fed them were withdrawn: the Mount of Olives still retains a languishing verdure, and nourishes a few of those trees from which it derives its name; but all round about Jerusalem the general aspect is blighted and barren: the grass is withered: the bare rock looks through the scanty sward, and the grain itself, like the starving progeny of famine, seems in doubt whether to come to maturity or die in the ear. Jerusalem has heard the voice of David and Solomon, of prophets and apostles; and He who spake as man never spake has taught in her synagogues and in her streets. Before her legislators, her poets, and her apostles, those of all other countries became dumb, and cast down their crowns, as unworthy to stand in their presence. Once she was very rich in every blessing, victorious over all her enemies, and resting in peace, with every man sitting under his own vine, and under his own fig-tree, with none to disturb or to make him afraid. Jerusalem was the brightest of all the cities of the east, and fortified above all other towns; so strong that the Roman conqueror thereof, and the master of the whole world besides, exclaimed, on entering the city of David, and looking up at the towers which the Jews had abandoned, "Surely, we have had God for our assistance in the war: for what could human hands or human machines do against these towers? It is no other than God who has expelled the Jews from their fortifications." It is impossible for the Christian traveller to look upon Jerusalem with the same feelings with which he would set himself to contemplate the ruins of Thebes, of Athens, or of Rome, or of any other city which the world ever saw. There is in all the doings of the Jews, their virtues and their vices, their wisdom and their folly, a height and a depth, a breadth and a length that angels cannot fathom; their whole history is a history of miracles; the precepts of their sacred book are the most profound, and the best adapted to every station in which man can be placed: they moderate him in prosperity, sustain him in adversity, guide him in health, console him in sickness, support him at the close of life, travel on with him through death, live with him throughout endless ages of eternity, and Jerusalem lends its name to the eternal mansions of the blessed in heaven which man is admitted to enjoy through the atonement of Christ Jesus, who was born of a descendant of Judah.'

If writers who have actually visited Jerusalem have encountered such difficulties, to those who never saw the place it must be still more difficult, if not impossible, to arrive at definite conclusions respecting the ancient city. It is certain that our knowledge of its ancient state must proceed upon an accurate knowledge of its present condition. But if we compare the accounts of different travellers, and the plans which many of them have laid down, the irreconcilable differences between them produce a discouraging conviction of the insufficiency of the basis thus offered for the foundation of any fixed conclusions. And even if there were agreement in the accounts of the superficies, something more than this would be required—something more than ever perhaps will be realized while the site continues to be trodden under foot by the Gentiles. Much was done by Dr. Robinson and others during the period of the rule of the Pasha of Egypt, in which greater facilities were offered for exploration than are likely to be soon again obtained. But a far more minute and searching examination of the site than was even then realized is necessary for the purposes of antiquarian comparison. For instance, the surface is in many parts covered to a vast depth, and the character and properties of particular spots are necessarily much altered, by the accumulated rubbish of ages. Some notion of this may be formed from the fact that in seeking a foundation for the Protestant church on Mount Zion, superincumbent rubbish to the depth of fifty feet was dug through before reaching the solid rock (Olin, ii. 254). It would therefore appear that not only a very minute survey, but numerous excavations, would be necessary to the ends of a really satisfactory investigation.

To the obscurity originating in these causes may be added that which arises from the many ambiguities in the description left by Josephus, the only one which we possess, and which must form the ground-work of most of our notices respecting the ancient city. There are indeed some manifest errors in his account, which the critical reader is able to detect without having the means to rectify.

In describing Jerusalem as it stood just before its destruction by the Romans, Josephus states that the city was built upon two hills, between which lay the valley Tyropœon (Cheesemonger's Valley), to which the buildings on both hills came down. This valley extended to the fountain of Siloam. The hill on which the upper town stood was much higher than the other, and straighter in its extent. On account of its fortifications, David called it the Fortress or Castle; but in the time of Josephus it was known by the name of the Upper Market. The other hill, on which was situated the lower

town, was called Akra. It was in the form of a horseshoe or crescent. Opposite to Akra was a third, and naturally lower hill (Moriah), on which the temple was built; and between this and Akra was originally a broad valley, which the inhabitants of Jerusalem filled up in the time of Simon Maccabæus for the purpose of connecting the town with the temple. At the same time they lowered the hill Akra, so as to make the temple rise above it. Both the hills on which the upper and lower towns stood were externally surrounded by deep valleys, and here there was no approach because of the precipices on every side.

The single wall which enclosed that part of the city skirted by precipitous valleys, began at the tower of Hippicus. On the west it extended (southward) to a place called Bethso, and the gate of the Essenes; thence it kept along on the south to a point over against Siloam; and thence on the east was carried along by Solomon's Pool and Ophla (Ophel), till it terminated at the eastern portico of the temple. Of the triple walls, we are told that the first and oldest of these began at the tower of Hippicus, on the northern part, and extending (along the northern brow of Zion) to the Xystus, afterwards terminated at the western portico of the temple. The second wall began at the gate of Gennath (apparently near Hippicus), and encircling only the northern part of the city, extended to the castle of Antonia at the north-west corner of the area of the temple. The third wall was built by Agrippa at a later period: it also had its beginning at the tower of Hippicus, ran northward as far as the tower Psephinos; and thence sweeping round towards the north-east by east, it turned afterwards towards the south, and was joined to the ancient wall at or in the valley of the Kidron. This wall enclosed the hill Bezetha.

From other passages we learn that the Xystus, named in the above descriptions, was an open place in the extreme part of the upper city, where the people sometimes assembled, and that a bridge connected it with the temple (*De Bell. Jud.* ii. 16. 3; vi. 6. 2; vi. 8. 1; comp. *Antiq.* xiv. 4. 2). Further, we are informed that on the western side of the temple area were four gates; one leading over the valley to the royal palace (on Zion) adjacent to the Xystus, probably by the bridge just mentioned; two conducting to the suburb (or new city) on the north; and the remaining one leading to 'the other city,' first by steps down into the intervening valley, and then by an ascent (Joseph. *Antiq.* xv. 11. 5; xx. 8. 11). By this 'other city' can be meant only the lower city or Akra. The hill Bezetha, which was last enclosed, lay quite near on the north of the temple (Joseph. *De Bell. Jud.* v. 5. 8). From the account of the operations of the Romans under Titus, it may also be collected that the interior and most ancient of the three walls on the north lay between Akra and the upper city, forming the defence of the latter in this part. It was, doubtless, the same wall which ran along the northern brow of Zion.

It would be only going over this statement in other words to explain the results which it offers; and there is the less need of doing so, as they only serve to support the conclusions which have long been regarded as established. Dr. Robinson, in comparing the information derived from Josephus with his own more detailed account, declares that the main features depicted by the Jewish historian may still be recognised. 'True,' he says, 'the valley of the Tyropœon, and that between Akra and Moriah, have been greatly filled up with the rubbish accumulated from the repeated desolations of nearly eighteen centuries. Yet they are still distinctly to be traced: the hills of Zion, Akra, Moriah, and Bezetha, are not to be mistaken; while the deep valleys of the Kidron, and of Hinnom, and the Mount of Olives, are permanent natural features, too prominent and gigantic indeed to be forgotten, or to undergo any perceptible change' (*Bibl. Researches*, i. 414).

The details embraced in this general notice must be more particularly examined in connection with modern observations; for it is to be remembered that the chief or only value of these observations consists in the light which they throw on the ancient condition and history of the site.

The Walls.—Some questions of much interest are connected with the attempt to determine the course and extent of the ancient walls of Jerusalem. These questions chiefly relate to the site of the crucifixion of our Lord, and of the sepulchre in which he was laid. If the site at present indicated be the right one, then certainly there has been much alteration; for it is considerably within the modern walls, although we know that our Lord suffered and was entombed without the gate. This part of the subject has, however, been examined in the article Golgotha; and the conclusion there maintained on the point of chief interest connected with the walls, limits the inquiry to which the present notice must be directed.

The first, or most ancient wall, appears to have enclosed the whole of Mount Zion. The greater part of it, therefore, must have formed the exterior and sole wall on the south, overlooking the deep valleys below Mount Zion; and the northern part evidently passed from the tower of Hippicus on the west side, along the northern brow of Zion, and across the valley, to the western side of the temple area. It probably nearly coincided with the ancient wall which existed before the time of David, and which enabled the Jebusites to maintain themselves in possession of the upper city, long after the lower city had been in the hands of the Israelites. Mount Zion is now unwalled, and is excluded from the modern city. Some traces of this wall were visible in the time of Benjamin of Tudela, who says that the stones of the foundation were then taken away for building (*Itiner.* ed. Asher. i. 73). No trace of it can now be perceived, but by digging through the rubbish, the foundations might perhaps be discovered.

The account given by Josephus, of the second wall, is very short and unsatisfactory. This is the more to be regretted, as on the course taken by the eastern part of that wall rests the question, whether that which is now shown as the site of Calvary and the Holy Sepulchre was anciently beyond the wall or not. The difficulties of this question are very great, the historical evidence being just as strongly in favour of the present site as the topographical evidence is against it. It cannot be denied that the breadth of the city, in a site limited by nature, and where, therefore, every foot of ground was precious, would be greatly and

inconveniently narrowed by drawing the line so as to place the present holy sepulchre beyond the walls. But on the other hand it must be admitted that the phrase 'beyond the walls' is often interpreted with a larger meaning than necessary. When applied to executions, gibbetings, or any purpose not allowable within the walls, we have always understood, from the analogous usages in all walled towns, that it denotes the slope or any other practicable space *immediately under* the wall, and so near to it that a slight advance of the wall would include the site. The fastening of the bodies of Saul and his sons *to* the wall of Beth-shan may illustrate this view of the case, which tends in some degree to lessen the difficulty of the question. For our present purpose it is sufficient to indicate the evident fact that this second wall enclosed the whole of the lower city, or Akra, excepting that part of the eastern side of it which fronted the Temple area on Mount Moriah, and the southern side, towards the valley which separated the lower from the upper city. In short, it was a continuation of the external wall, so far as necessary, on the west and north, and on so much of the east as was not already protected by the strong wall of the Temple area. The precise course of this wall might perhaps be determined by excavations. It is indeed our strong conviction that one good excavation along one of the two streets which intersect the Via Dolorosa would go far to settle for ever the only question of real interest connected with the subject. It is likely that the foundations of the old wall still exist; and if it lay at any point *within* the present wall, those foundations must pass under this street, and an excavation of not greater extent than those which are made every day in London for sewerage, would bring them to light, and show whether the alleged site of Calvary lay within or without the wall.

Although these were the only walls that existed in the time of our Saviour, we are not to infer that the habitable city was confined within their limits. On the contrary, it was because the city had extended northward far beyond the second wall that a third was built to cover the defenceless suburb: and there is no reason to doubt that this unprotected suburb, called Bezetha, existed in the time of Christ. This wall is described as having also begun at the tower of Hippicus: it ran northward as far as to the tower Psephinos, then passed down opposite the sepulchre of Helena (queen of Adiabene), and being carried along through the royal sepulchres, turned at the corner tower by the Fullers' monument, and ended by making a junction with the ancient wall at the valley of the Kidron. It was begun ten or twelve years after our Lord's crucifixion by the elder Herod Agrippa, who desisted from completing it for fear of offending the Emperor Claudius. But the design was afterwards taken up and completed by the Jews themselves, although on a scale of less strength and magnificence. Dr. Robinson thinks that he discovered some traces of this wall, which are described in his great work (*Bibl. Researches*, i. 466), and are indicated in our plan of Jerusalem.

The same writer thinks that the wall of the new city, the Ælia of Adrian, nearly coincided with that of the present Jerusalem: and the portion of Mount Zion which now lies outside, would seem then also to have been excluded; for Eusebius and Cyrill, in the fourth century, speak of the denunciation of the prophet being fulfilled, and describes Zion as 'a ploughed field' (Mich. iii. 2).

We know from Josephus that the circumference of the ancient city was 33 stadia, equivalent to nearly three and a half geographical miles. The circumference of the present walls does not exceed two and a half geographical miles; but the extent of Mount Zion, now without the walls, and the tract on the north formerly enclosed, or partly so, by the third wall, sufficiently account for the difference.

The history of the modern walls has already been given in the sketch of the modern history of the city. The present walls have a solid and formidable appearance, especially when cursorily observed from without; and they are strengthened, or rather ornamented, with towers and battlements after the Saracenic style. They are built of limestone, the stones being not commonly more than a foot or fifteen inches square. The height varies with the various elevations of the ground. The lower parts are probably about twenty-five feet high, while in more exposed localities, where the ravines contribute less to the security of the city, they have an elevation of sixty or seventy feet.

Gates. Much uncertainty exists respecting the ancient gates of Jerusalem. Many gates are named in Scripture; and it has been objected that they are more in number than a town of the size of Jerusalem could require—especially as they all occur within the extent embraced by the first and second walls, the third not then existing. It has, therefore, been suggested as more than probable that some of these gates were within the city, in the walls which separated the town from the temple, and the upper town from the lower, in which gates certainly existed. On the other hand, considering the circumstances under which the wall was rebuilt in the time of Nehemiah, it is difficult to suppose that more than the outer wall was then constructed, and certainly it was in the wall then built that the ten or twelve gates mentioned by Nehemiah occur. But these may be considerably reduced by supposing that two or more of the names mentioned were applied to the same gate. If this view of the matter be taken, no better distribution of these gates can be given than that suggested by Raumer.

A. On the north side.

1. The *Old Gate*, probably at the north-east corner (Neh. iii. 6; xii. 39).

2. The *Gate of Ephraim* or *Benjamin* (Jer. xxxviii. 7; xxxvii. 13; Neh. xii. 9; 2 Chron. xxv. 23). This gate doubtless derived its names from its leading to the territory of Ephraim and Benjamin; and Dr. Robinson supposes it may possibly be represented by some traces of ruins which he found on the site of the present gate of Damascus.

3. The *Corner-gate*, 300 cubits from the former, and apparently at the north-west corner (2 Chron. xxv. 9; 2 Kings xiv. 13; Zech. xiv. 10). Probably the *Gate of the Furnaces* is the same (Neh. iii. 2; xii. 38).

B. On the west side.

4. The *Valley-gate*, over against the Dragon-fountain of Gihon (Neh. ii. 13; iii. 13; 2 Chron. xxxvi. 9). It was probably about the north-west

corner of Zion, where there appears to have been always a gate, and Dr. Robinson supposes it to be the same with the Gennath of Josephus.

c. On the south side.

5. The *Dung-gate*, perhaps the same as Josephus's Gate of the Essenes (Neh. ii. 13; xii. 31). It was 1000 cubits from the valley-gate (Neh. iii. 14), and the dragon-well was between them (Neh. ii. 13). This gate is probably also identical with 'the gate between two walls' (2 Kings xxv. 4; Jer. xxxix. 4; Lam. ii. 7).

6. The *Gate of the Fountain*, to the south-east (Neh. ii. 14; iii. 15); the gate of the fountain near the king's pool (Neh. ii. 14); the gate of the fountain near 'the pool of Siloah by the king's garden' (Neh. iii. 15). The same gate is probably denoted in all these instances, and the pools seem to have been also the same. It is also possible that this fountain-gate was the same otherwise distinguished as the brick-gate (or potter's gate), leading to the valley of Hinnom (Jer. xix. 2, where the Auth. Ver. has 'east-gate').

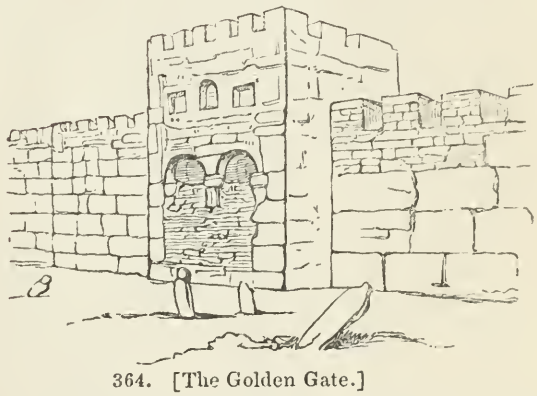
d. On the east side.

7. The *Water-gate* (Neh. iii. 26).

8. The *Prison-gate*, otherwise the *Horse-gate*, near the temple (Neh. iii. 28; xii. 39, 40).

9. The *Sheep-gate*, probably near the sheep-pool (Neh. iii. 1-32; xii. 29).

10. The *Fish-gate* was quite at the north-east (Neh. iii. 3; xii. 39; Zeph. i. 10; 2 Chron. xxxiii. 14).



It will be observed that in two of the cases the distances of the gates from each other are mentioned. Thus the corner-gate (3) was only 300 cubits from the gate of Ephraim (2), and the dung-gate (5) was 1000 cubits from the valley-gate (4). This suggests that the gates were really nearer to each other than the objections already stated would assume, and the 'hundred-gated Thebes' may be recollected as warranting a doubt whether the ancient Orientals had the same objection to gates which are now entertained. At all events, if the circumference of the wall of Jerusalem, before the third wall was added, be assumed to have been two miles and a half, or equal to the present wall, then this extent would have allowed ten gates at the *highest* named distance of 1000 cubits apart, and more than thrice that number at the lowest named distance of 300 cubits.

In the middle ages there appear to have been two gates on each side of the city, making eight in all; and this number, being only two short of those assigned in the above estimate to the ancient Jerusalem, seems to vindicate that estimate from the objections which have been urged against it.

On the west side were two gates, of which the principal was the *Porta David*, Gate of David, often mentioned by the writers on the Crusades. It was called by the Arabs *Bab el-Mihrab*, and corresponds to the present Jaffa gate, or *Bab el-Khulil*. The other was the gate of the Fuller's Field (*Porta Villæ Fullonis*), so called from Isa. vii. 3. This seems to be the same which others call *Porta Judiciaria*, and which is described as being in the wall over against the church of the holy sepulchre, leading to Silo (Neby Samwîl) and Gibeon. This seems to be that which the Arabian writers call *Serb*. There is no trace of it in the present wall.

On the north there were also two gates; and all the middle-age writers speak of the principal of them as the gate of St. Stephen, from the notion that the death of the protomartyr took place near it. This was also called the gate of Ephraim, in reference to its probable ancient name. Arabic writers called it *Bab 'Amud el-Ghurab*, of which the present name, *Bab el-'Amud*, is only a contraction. The present gate of St. Stephen is on the *east* of the city, and the scene of the martyrdom is now placed near it; but there is no account of the change. Further east was the gate of Benjamin (*Porta Benjaminis*), corresponding apparently to what is now called the gate of Herod.

On the east there seem to have been at least two gates. The northernmost is described by Adamnanus as a small portal leading down to the valley of Jehoshaphat. It was called the gate of Jehoshaphat, from the valley to which it led. It seems to be represented by the present gate of St. Stephen. The Arabian writers call it *Bab el-Usbat*, Gate of the tribes, being another form of the modern Arabic name *Bab es-Subat*. The present gate of St. Stephen has four lions sculptured over it on the outside, which, as well as the architecture, show that it existed before the present walls. Dr. Robinson suggests that the original 'small portal' was rebuilt on a larger scale by the Franks, when they built up the walls of the city, either in A.D. 1178 or 1239. The other gate is the famous Golden Gate (*Porta*

364. [The Golden Gate.]

aurea) in the eastern wall of the temple area. It is now called by the Arabs *Bab ed-Dahariyeh*, but formerly *Bab er-Rahmeh*, 'Gate of Mercy.' The name Golden Gate appears to have come from a supposed connection with one of the ancient gates of the temple, which are said to have been covered with gold; but this name cannot be traced back beyond the historians of the Crusades. This gate is, from its architecture, obviously of Roman origin, and is conjectured to have belonged to the enclosure of the temple of Jupiter which was built by Adrian upon Mount Moriah. The exterior is now walled up; but being double, the interior forms within the area a recess, which is used for prayer by the Moslem worshipper. Different reasons are given for the closing of this gate. It was probably because it was found inconvenient that a gate to the mosque should be open in the exterior wall. Although not walled up, it was kept closed even when the Crusaders were in possession of the city, and only opened once a year on Palm Sunday, in celebration of our Lord's supposed triumphal entry through it to the temple.

On the south side were also two gates. The easternmost is now called by the Franks the Dung-gate, and by the natives *Bab el-Mugharibeh*. The earliest mention of this gate is by Brocard, about A.D. 1283, who regards it as the ancient Water-gate. Further west, between the eastern brow of Zion and the gate of David, the Crusaders found a gate which they call the Gate of Zion, corresponding to one which now bears the same name.

It thus appears that before the rebuilding of the walls of Jerusalem by the Turks in the sixteenth century, the principal gates of the city were much the same as at the present day. But of the seven gates mentioned as still existing, three, the Dung Gate, the Golden Gate, and Herod's Gate, are closed. Thus there are only four gates now in use, one on each side of the town, all of which have been enumerated. St. Stephen's, on the east, leads to the Mount of Olives, Bethany, and Jericho. From the nature of the ground, taken in connection with the situation of the temple, a little south, there must always have been a great thoroughfare here. Zion Gate, on the south side of the city, connects the populous quarter around the Armenian convent with that part of Mount Zion which is outside the walls, and which is much resorted to as being the great field of Christian burial, as well as for its traditionary sanctity as the site of David's tomb, the house of Caiaphas, house of Mary, &c. The Jaffa Gate, on the west, is the termination of the important routes from Jaffa, Bethlehem, and Hebron. The formation of the ground suggests this as one of the great thoroughfares of the ancient city, which could here be approached from the quarters just indicated much more conveniently than at any other point. The Damascus Gate, on the north, is also planted in a vale, which in every age of Jerusalem must have been a great public way, and the easiest approach from Samaria and Galilee.

Towers.—The towers of Jerusalem are often mentioned in Scripture and in Josephus. There is, indeed, no general account of them ; but some of the principal are described, and we may reasonably infer that the others resembled them, more or less, in form and arrangement. Most of the towers mentioned by Josephus were erected by Herod the Great, and were, consequently, standing in the time of Christ. It was on these, therefore, that his eyes often rested when he approached Jerusalem, or viewed its walls and towers from the Mount of Olives. Of all these towers, the most important is that of Hippicus, which Josephus, as we have already seen, assumed as the starting-point in his description of all the walls of the city. Herod gave to it the name of a friend who was slain in battle. It was a quadrangular structure, twenty-five cubits on each side, and built up entirely solid to the height of thirty cubits. Above this solid part was a cistern twenty cubits; and then, for twenty-five cubits more, were chambers of various kinds, with a breastwork of two cubits, and battlements of three cubits upon the top. The altitude of the whole tower was consequently eighty cubits. The stones of which it was built were very large, twenty cubits long by ten broad and five high, and (probably in the upper part) were of white marble. Dr. Robinson has shown that this tower should be sought at the north-west corner of the upper city, or Mount Zion. This part, a little to the south of the Jaffa Gate, is now occupied by the citadel. It is an irregular assemblage of square towers, surrounded on the inner side towards the city by a low wall, and having on the outer or west side a deep fosse. The towers which rise from the brink of the fosse are protected on that side by a low sloping bulwark or buttress, which rises from the bottom of the trench at an angle of forty-five degrees. This part bears evident marks of antiquity, and Dr. Robinson is inclined to ascribe these massive outworks to the time of the rebuilding and fortifying of the city by Adrian. This fortress is described by the middle age historians as the tower or citadel of David. Within it, as the traveller enters the city by the Jaffa Gate, the north-eastern tower attracts his notice as bearing evident marks of higher antiquity than any of the others. The upper part is, indeed, modern, but the lower part is built of larger stones, bevelled at the edges, and apparently still occupying their original places. This tower has been singled out by the Franks, and bears among them the name of the Tower of David, while they sometimes give to the whole fortress the name of the Castle of David. Taking all the circumstances into account, Dr. Robinson thinks that the antique lower portion of this tower is in all probability a remnant of the tower of Hippicus, which, as Josephus states, was left standing by Titus when he destroyed the city. This discovery, however, is not new: the identity having been advocated by Raumer and others before Dr. Robinson travelled.

Josephus describes two other towers—those of Phasaëlus and Mariamne, both built by Herod, one of them being named after a friend, and the other after his favourite wife. They stood not far from Hippicus, upon the first or most ancient wall, which ran from the latter tower eastward, along the northern brow of Zion. Connected with these towers and Hippicus was the royal castle or palace of the first Herod, which was enclosed by this wall on the north, and on the other sides by a wall thirty cubits high. The whole was furnished with great strength and regal splendour, and furnished with halls, and galleries, and cisterns, and apartments without number (Joseph. *De Bell. Jud.* v. 4. 3, 4; v. 4. 4). These were the three mighty towers which Titus left standing as monuments of the strength of the place which had yielded to his arms. But nothing now remains save the above-mentioned supposed remnant of the tower of Hippicus.

A fourth tower, called Psephinos, is mentioned by Josephus (*De Bell. Jud.* v. 4. 2, 3). It stood at the north-west corner of the third or exterior wall of the city. It did not, consequently, exist in the time of Christ, seeing that the wall itself was built by Herod Agrippa, to whom also the tower may be ascribed. It was of an octagonal form, seventy cubits high, and from it could be seen Arabia towards the rising sun, and the inheritance of the Hebrews quite to the sea. This shows that it must have stood upon the high swell of ground which extends up north-north-west from the north-west corner of the present city. In this quarter there are ancient substructions, apparently of towers and other fortifications, and although none of them may be actually those of Psephinos, Dr. Robinson conceives that the tower stood somewhere in this vicinity.

The above are the only towers which the historian particularly mentions. But in describing the outer or third wall of Agrippa, he states that it had battlements of two cubits, and turrets of three cubits more: and as the wall was twenty cubits high, this would make the turrets of the height of twenty-five cubits or nearly thirty-eight feet. Many loftier and more substantial towers than these were erected on each of the walls at regulated distances, and furnished with every requisite for convenience or defence. Of those on the third or outer wall are enumerated ninety; on the middle or second wall, forty; and on the inner or ancient wall, sixty.

Public Buildings.—The temple was in all ages the great glory and principal public building of Jerusalem, as the heathen temple, church, or mosque, successively occupying the same site, has been ever since the Jewish temple was destroyed. That temple is reserved for a separate article [Temple], and there are few other public edifices which require a particular description. Those most connected with Scripture history are the palace of Herod and the tower of Antonia. The former has already been noticed. In the time of Christ it was the residence of the Roman procurators while in Jerusalem; and as such provincial residences were called by the Romans *Prætoria*, this was the prætorium or judgment-hall of Pilate (Matt. xxvii. 27; Mark xv. 16; John xviii. 28). In front of the palace was the tribunal or 'judgment-seat,' where the procurator sat to hear and determine the causes; and where Pilate was seated when our Lord was brought before him. It was a raised pavement of mosaic work (λιθόστρωτον), called in the Hebrew *Gabbatha*, or 'an elevated place' [Judgment-Hall].

The tower or castle of Antonia stood on a steep rock adjoining the north-west corner of the temple. It has already been mentioned (p. 94) that it originated under the Maccabees, who resided in it. The name of *Baris* (בִּירָא, Βαρύς or Βαρεῖς), which it obtained, was originally the Persian name of a royal palace; but which, according to Jerome (*Epist. ad Princip.* ii. 639), was afterwards adopted in Palestine, and applied to all the large quadrangular dwellings built with turrets and walls. As improved by Herod, who gave it the name of Antonia, after his patron Mark Antony, this fortress had all the extent and appearance of a palace, being divided into apartments of every kind, with galleries and baths, and also broad halls or barracks for soldiers; so that, as having every thing necessary within itself, it seemed a city, while in its magnificence it was a palace. At each of the four corners was a tower, one of which was seventy cubits high, and overlooked the whole temple with its courts. The fortress communicated with the cloisters of the temple by secret passages, through which the soldiers could enter and quell any tumults, which were always apprehended at the time of the great festivals. It was to a guard of these soldiers that Pilate referred the Jews as a 'watch' for the sepulchre of Christ. This tower was also 'the castle' into which St. Paul was carried when the Jews rose against him in the temple, and were about to kill him; and where he gave his able and manly account of his conversion and conduct (Acts xxi. 27-40; xxii.). This tower was, in fact, the citadel of Jerusalem.

Waters of Jerusalem.—In his account of the siege of Jerusalem by Pompey, Strabo says that the town was well provided with water within the walls, but that there was none in the environs (*Geog.* xvi. 2, 10). Probably the Roman troops then suffered from want of water, as did other armies which laid siege to Jerusalem. In the narratives of all such sieges we never read of the besieged suffering from thirst, although driven to the most dreadful extremities and resources by hunger, while the besiegers are frequently described as suffering greatly from want of water, and as being obliged to fetch it from a great distance. The agonies of thirst sustained by the first crusaders in their siege of Jerusalem will be remembered by most readers from the vivid picture drawn by Tasso, if not from the account furnished by William of Tyre. Yet when the town was taken plenty of water was found within it. This is a very singular circumstance, and is perhaps only in part explained by reference to the system of preserving water in cisterns, as at this day, in Jerusalem.

Solomon's aqueduct near Bethlehem to Jerusalem could have been no dependence, as its waters might easily have been cut off by the besiegers. All the wells also are now outside the town; and no interior fountain is mentioned save that of Hezekiah, which is scarcely fit for drinking. At the siege by Titus the well of Siloam may have been in possession of the Jews, *i. e.* within the walls; but at the siege by the Crusaders it was certainly held by the besieging Franks; and yet the latter perished from thirst, while the besieged had 'ingentes copias aquæ.' We cannot here go through the evidence which by combination and comparison might throw some light on this remarkable question. There is, however, good ground to conclude that from very ancient times there has been under the temple an unfailing source of water, derived by secret and subterraneous channels from springs to the west of the town, and communicating by other subterraneous passages with the pool of Siloam and the fountain of the Virgin in the east of the town, whether they were within or without the walls of the town.

The existence of a perennial source of water below the temple has always been admitted. Tacitus knew of it (*Hist.* v. 12); and Aristeas, in describing the ancient temple, informs us that 'the supply of water was unfailing, inasmuch as there was an abundant natural fountain flowing in the interior, and reservoirs of admirable construction under ground, extending five stadia round the temple, with pipes and conduits unknown to all except those to whom the service was entrusted, by which the water was brought to various parts of the temple and again conducted off.' The Moslems also have constantly affirmed the existence of this fountain or cistern. But a reserve has always been kept up as to the means by which it is supplied. This reserve seems to have been maintained by the successive occupants of Jerusalem as a point of civic honour; and this fact alone intimates that there was danger to the town in its becoming known, and points to the fact that the supply came from without the city by secret channels, which it was of importance not to disclose. Yet we are plainly told in the Bible that Hezekiah 'stopped the upper water-course of Gihon,

and brought it down to the west side of the city of David' (1 Kings i. 33, 38): from 2 Chron. xxxii. 30, it seems that all the neighbouring fountains were thus 'stopped' or covered, and the brook which they had formed diverted by subterraneous channels into the town, for the express purpose of preventing besiegers from finding the 'much water' which previously existed outside the walls (comp. also Ecclus. xlviii. 17). Perhaps, likewise, the prophet Ezekiel (xlvii. 1-12) alludes to this secret fountain under the temple when he speaks of waters issuing from the threshold of the temple towards the east, and flowing down towards the desert as an abundant and beautiful stream. This figure may be drawn from the waters of the inner source under the temple, being at the time of overflow discharged by the outlets at Siloam, into the Kidron, which takes the eastward course thus described.

There are certainly wells, or rather shafts, in and near the temple area, which are alleged to derive their waters through a passage of masonry four or five feet high, from a chamber or reservoir cut in the solid rock under the grand mosque, in which the water is said to rise from the rock into a basin at the bottom. The existence of this reservoir and source of water is affirmed by all Moslems, and coincides with the preceding intimations, but it must be left for future explorers to clear up all the obscurities in which the matter is involved.

The ordinary means taken by the inhabitants to secure a supply of water have been described under the article Cistern; and the reader may be referred for interesting details to Raumer's *Palästina*, pp. 329-333; Robinson's *Researches*, i. 479-516; and Olin's *Travels*, ii. 168-181.

Modern Jerusalem.—In proceeding to furnish a description of the present Jerusalem, we shall, for the most part, place ourselves under the guidance of Dr. Olin, whose account is not only the most recent, but is by far the most complete and satisfactory which has of late years been produced.

The general view of the city from the Mount of Olives is mentioned more or less by all travellers as that from which they derive their most distinct and abiding impression of Jerusalem.

The summit of the Mount of Olives is about half a mile east from the city, which it completely overlooks, every considerable edifice and almost every house being visible. The city seen from this point appears to be a regular inclined plain, sloping gently and uniformly from west to east, or towards the observer, and indented by a slight depression or shallow vale, running nearly through the centre, in the same direction. The south-east corner of the quadrangle—for that may be assumed as the figure formed by the rocks—that which is nearest to the observer, is occupied by the mosque of Omar and its extensive and beautiful grounds. This is Mount Moriah, the site of Solomon's temple, and the ground embraced in the sacred enclosure, which conforms to that of the ancient temple, occupies about an eighth of the whole modern city. It is covered with green sward and planted sparingly with olive, cypress, and other trees, and it is certainly the most lovely feature of the town, whether we have reference to the splendid structures or the beautiful lawn spread out around them.

The south-west quarter, embracing that part of Mount Zion which is within the modern town, is to a great extent occupied by the Armenian convent, an enormous edifice, which is the only conspicuous object in this neighbourhood. The north-west is largely occupied by the Latin convent, another very extensive establishment. About midway between these two convents is the castle or citadel, close to the Bethlehem gate, already mentioned. The north-east quarter of Jerusalem is but partially built up, and it has more the aspect of a rambling agricultural village than that of a crowded city. The vacant spots here are green with gardens and olive-trees. There is another large vacant tract along the southern wall, and west of the Haram, also covered with verdure. Near the centre of the city also appear two or three green spots, which are small gardens. The church of the Holy Sepulchre is the only conspicuous edifice in this vicinity, and its domes are striking objects. There are no buildings which, either from their size or beauty, are likely to engage the attention. Eight or ten minarets mark the position of so many mosques in different parts of the town, but they are only noticed because of their elevation above the surrounding edifices. Upon the same principle the eye rests for a moment upon a great number of low domes, which form the roofs of the principal dwellings, and relieve the heavy uniformity of the flat plastered roofs which cover the greater mass of more humble habitations. Many ruinous piles and a thousand disgusting objects are concealed or disguised by the distance. Many inequalities of surface, which exist to so great an extent that there is not a level street of any length in Jerusalem, are also unperceived.

From the same commanding point of view a few olive and fig-trees are seen in the lower part of the valley of Jehoshaphat, and scattered over the side of Olivet from its base to the summit. They are sprinkled yet more sparingly on the southern side of the city on Mounts Zion and Ophel. North of Jerusalem the olive plantations appear more numerous as well as thriving, and thus offer a grateful contrast to the sun-burnt fields and bare rocks which predominate in this landscape. The region west of the city appears to be destitute of trees. Fields of stunted wheat, yellow with the drought rather than white for the harvest, are seen on all sides of the town.

Jerusalem, as seen from Mount Olivet, is a plain inclining gently and equably to the East. Once enter its gates, however, and it is found to be full of inequalities. The passenger is always ascending or descending. There are no level streets, and little skill or labour has been employed to remove or diminish the inequalities which nature or time has produced. Houses are built upon mountains of rubbish, which are probably twenty, thirty, or fifty feet above the natural level, and the streets are constructed with the same disregard to convenience, with this difference, that some slight attention is paid to the possibility of carrying off surplus water. The latter are, without exception, narrow, seldom exceeding eight or ten feet in breadth. The houses often meet, and in some instances a building occupies both sides of the street, which runs under a succession of arches barely high

enough to permit an equestrian to pass under them. A canopy of old mats or of plank is suspended over the principal streets when not arched. This custom had its origin, no doubt, in the heat of the climate, which is very intense in summer, and it gives a gloomy aspect to all the most thronged and lively parts of the city. These covered ways are often pervaded by currents of air when a perfect calm prevails in other places. The principal streets of Jerusalem run nearly at right angles to each other. Very few if any of them bear names among the native population. They are badly paved, being merely laid irregularly with raised stones, with a deep square channel, for beasts of burden, in the middle; but the steepness of the ground contributes to keep them cleaner than in most Oriental cities.

The houses of Jerusalem are substantially built of the limestone of which the whole of this part of Palestine is composed: not usually hewn, but broken into regular forms, and making a solid wall of very respectable appearance. For the most part there are no windows next to the street, and the few which exist for the purposes of light or ventilation are completely masked by casements and lattice-work. The apartments receive their light from the open courts within. The ground plot is usually surrounded by a high enclosure, commonly forming the walls of the house only, but sometimes embracing a small garden and some vacant ground. The rain-water which falls upon the pavement is carefully conducted, by means of gutters, into cisterns, where it is preserved for domestic uses. The people of Jerusalem rely chiefly upon these reservoirs for their supply of this indispensable article. Every house has its cistern, and the larger habitations are provided with a considerable number of them, which occupy the ground-story or cells formed for the purpose below it. Stone is employed in building for all the purposes to which it can possibly be applied, and Jerusalem is hardly more exposed to accidents by fire than a quarry or subterranean cavern. The floors, stairs, &c. are of stone, and the ceiling is usually formed by a coat of plaster laid upon the stones, which at the same time form the roof and the vaulted top of the room. Doors, sashes, and a few other appurtenances, are all that can usually be afforded of a material so expensive as wood. The little timber which is used is mostly brought from Mount Lebanon, as in the time of Solomon. A rough, crooked stick of the fig-tree, or some gnarled, twisted planks made of the olive—the growth of Palestine—are occasionally seen. In other respects the description in the article HOUSE will afford a sufficient notion of those in Jerusalem. A large number of houses in Jerusalem are in a dilapidated and ruinous state. Nobody seems to make repairs so long as his dwelling does not absolutely refuse him shelter and safety. If one room tumbles about his ears he removes into another, and permits rubbish and vermin to accumulate as they will in the deserted halls. Tottering staircases are propped to prevent their fall; and when the edifice becomes untenable, the occupant seeks another a little less ruinous, leaving the wreck to a smaller or more wretched family, or, more probably, to a goatherd and his flock. Habitations which have a very respectable appearance as seen from the street, are often found, upon entering them, to be little better than heaps of ruins.

Nothing of this would be suspected from the general appearance of the city as seen from the various commanding points without the walls, nor from anything that meets the eye in the streets. Few towns in the East offer a more imposing spectacle to the view of the approaching stranger. He is struck with the height and massiveness of the walls, which are kept in perfect repair, and naturally produce a favourable opinion of the wealth and comfort which they are designed to protect. Upon entering the gates, he is apt, after all that has been published about the solitude that reigns in the streets, to be surprised at meeting large numbers of people in the chief thoroughfares, almost without exception decently clad. A longer and more intimate acquaintance with Jerusalem, however, does not fail to correct this too favourable impression, and demonstrate the existence and general prevalence of the poverty and even wretchedness which must result in every country from oppression, from the absence of trade, and the utter stagnation of all branches of industry. Considerable activity is displayed in the bazaars, which are supplied scantily, like those of other Eastern towns, with provisions, tobacco, coarse cottons, and other articles of prime necessity. A considerable business is still done in beads, crosses, and other sacred trinkets, which are purchased to a vast amount by the pilgrims who annually throng the holy city. The support and even the existence of the considerable population of Jerusalem depend upon this transient patronage—a circumstance to which a great part of the prevailing poverty and degradation is justly ascribed. The worthless articles employed in this pitiful trade are, almost without exception, brought from other places, especially Hebron and Bethlehem—the former celebrated for its baubles of glass, the latter chiefly for rosaries, crucifixes, and other toys made of mother-of-pearl, olive-wood, black stones from the Dead Sea, &c. These are eagerly bought up by the ignorant pilgrims, sprinkled with holy water by the priests, or consecrated by some other religious mummery, and carried off in triumph and worn as ornaments to charm away disease and misfortune, and probably to be buried with the deluded enthusiast in his coffin, as a sure passport to eternal blessedness. With the departure of the swarms of pilgrims, however, even this poor semblance of active industry and prosperity deserts the city. With the exception of some establishments for soap making, a tannery, and a very few weavers of coarse cottons, there do not appear to be any manufactures properly belonging to the place. Agriculture is almost equally wretched, and can only give employment to a few hundred people. The masses really seem to be without any regular employment. A considerable number, especially of the Jews, profoundly live on charity. Many Christian pilgrims annually find their way hither on similar resources, and the approaches to the holy places are thronged with beggars, who in piteous tones demand alms in the name of Christ and the Blessed Virgin. The general condition of the population is that of abject poverty. A few Turkish officials, ecclesiastical, civil, and military; some remains of the old Mohammedan aristocracy—once powerful and rich, but now much impoverished and nearly extinct; to-

gether with a few tradesmen in easy circumstances, form almost the only exceptions to the prevailing indigence. There is not a single broker among the whole population, and not the smallest sum can be obtained on the best bills of exchange short of Jaffa or Beirout.

Inhabitants.—The number of the inhabitants of Jerusalem has been variously estimated by different travellers, some making it as high as 30,000, others as low as 12,000. An average of these estimates would make it somewhere between 12,000 and 15,000; but the Egyptian system of taxation and of military conscription in Syria has lately furnished more accurate data than had previously been obtainable, and on these Dr. Robinson estimates the population at not more than 11,500, distributed thus—

Mohammedans . . .	4,500
Jews	3,000
Christians . . .	3,500
	11,000

If to this be added something for possible omissions, and the inmates of the convents, the standing population, exclusive of the garrison, cannot well exceed 11,500. The Moslems, it will be seen, exceed in number the Jews or Christians respectively, but are much fewer than these two bodies united. To all these classes Jerusalem is holy; and is the only city in the world which peoples of such different origin, races, language, and religions agree to regard with nearly equal veneration.

The language most generally spoken among them is the Arabic. Schools are rare, and consequently facility in reading is not often met with. The general condition of the inhabitants has already been indicated.

The Turkish governor of the town holds the rank of Pasha, but is responsible to the Pasha of Beirout. The government is somewhat milder than before the period of the Egyptian dominion; but it is said that the Jewish and Christian inhabitants at least have ample cause to regret the change of masters, and the American missionaries lament that change without reserve (*Am. Bib. Repos.* for 1843). Yet the Moslems reverence the same spots which the Jews and Christians account holy, the holy sepulchre only excepted; and this exception arises from their disbelief that Christ was crucified, or buried, or rose again. Formerly there were in Palestine monks of the Benedictine and Augustine orders, and of those of St. Basil and St. Anthony; but since 1304 there have been none but Franciscans, who have charge of the Latin convent and the holy places. They resided on Mount Zion till A.D. 1561, when the Turks allowed them the monastery of St. Salvador, which they now occupy. They had formerly a handsome revenue out of all Roman Catholic countries, but these sources have fallen off since the French revolution, and the establishment is said to be poor and deeply in debt. The expenses arise from the duty imposed upon the convent of entertaining pilgrims; and the cost of maintaining the twenty convents belonging to the establishment of the Terra Santa is estimated at 40,000 Spanish dollars a year. Formerly it was much higher, in consequence of the heavy exactions of the Turkish government. Burckhardt says that the brotherhood paid annually 12,000*l.* to the Pasha of Damascus. But the Egyptian government relieved them from these heavy charges, and imposed instead a regular tax on the property possessed. For the buildings and lands in and around Jerusalem the annual tax was fixed at 7000 piastres, or 350 Spanish dollars. It is probable that the restored Turkish government has not yet, in this respect, recurred to its old oppressions. The convent contains fifty monks, half Italians and half Spaniards. In it resides the Intendant or the Principal of all the convents, with the rank of abbot, and the title of Guardian of Mount Zion and Custos of the Holy Land. He is always an Italian, and has charge of all the spiritual affairs of the Roman Catholics in the Holy Land. There is also a president or vicar, who takes the place of the guardian in case of absence or death: he was formerly a Frenchman, but is now either an Italian or Spaniard. The procurator, who manages their temporal affairs, is always a Spaniard. A council, called Discretorium, composed of these officials and three other monks, has the general management of both spiritual and temporal matters. Much of the attention of the order is occupied, and much of its expense incurred, in entertaining pilgrims and in the distribution of alms. The native Roman Catholics live around the convent, on which they are wholly dependant. They are native Arabs, and are said to be descended from converts in the times of the Crusades.

There is a Greek patriarch of Jerusalem, but he usually resides at Constantinople, and is represented in the holy city by one or more vicars, who are bishops residing in the great convent near the Church of the Holy Sepulchre. At present the vicars are the bishops of Lydda, Nazareth, and Kerek (Petra), assisted by the other bishops resident in the convent. In addition to thirteen monasteries in Jerusalem, they possess the convent of the Holy Cross near Jerusalem, that of St. Helena between Jerusalem and Bethlehem, and that of St. John, between Jerusalem and the Dead Sea. All the monks of the convents are foreigners. The Christians of the Greek rite who are not monks are all native Arabs, with their native priests, who are allowed to perform the church services in their mother tongue—the Arabic.

The Armenians in Jerusalem have a patriarch, with three convents and 100 monks. They have also convents at Bethlehem, Ramleh, and Jaffa. Few of the Armenians are natives: they are mostly merchants, and among the wealthiest inhabitants of the place; and their convent in Jerusalem is deemed the richest in the Levant. Their church of St. James upon Mount Zion is very showy in its decorations, but void of taste. The Coptic Christians at Jerusalem are only some monks residing in the convent of Es-Sultan, on the north side of the pool of Hezekiah. There is also a convent of the Abyssinians, and one belonging to the Jacobite Syrians.

The estimate of the number of the Jews in Jerusalem at 3000 is given by Dr. Robinson on the authority of Mr. Nicolayson, the resident missionary to the Jews; yet in the following year (1839) the Scottish deputation set them down at six or seven thousand on the same authority. On referring this difficulty to the Rev. R. S. Herschell (lately returned from Jerusalem), he con-

firms the lower estimate of the number of Jews, but is inclined to reckon the entire population at 15,000. They inhabit a distinct quarter of the town between Mount Zion and Mount Moriah. This is the worst and dirtiest part of the holy city, and that in which the plague never fails to make its first appearance. Few of the Jerusalem Jews are natives; and most of them come from foreign parts to die in the city of their fathers' sepulchres. The greater proportion of them are from different parts of the Levant, and appear to be mostly of Spanish and Polish origin. Few are from Germany, or understand the German language. They are for the most part wretchedly poor, and depend in a great degree for their subsistence upon the contributions of their brethren in different countries. These contributions have of late years been smaller than usual; and when they arrive are the occasion of much heartburning and strife. The Scottish Deputation (*Narrative*, p. 148) say, 'They are always quarrelling, and frequently apply to the consul to settle their disputes. The expectation of support from the annual European contributions leads many of them to live in idleness. Hence there are in Jerusalem 500 acknowledged paupers, and 500 more who receive charity in a quiet way. Many are so poor that, if not relieved, they would not stand out the winter season. A few are shopkeepers, and a few more hawkers, and a very few are operatives. None of them are agriculturists—not a single Jew cultivates the soil of his fathers.' Reisner, *Icrusalem Vetustissima Descripta*, Francof. 1563; Olshausen, *Zur Topographie d. alten Jerusalem*, Kiel, 1833; Adrichomius, *Jerusalem sicut Christi tempore floruit*, Colon. 1593; Chrysanthi (Beat. Patr. Hierosolymorum) *Historia et Descriptio Terræ Sanctæ, Urbisque Sanctæ Hierusalem*, Venet. 1728 (this work is in Greek); D'Anville, *Dissert. sur l'Etendue de l'Ancienne Jerusalem*, Paris, 1747: the articles on Jerusalem in Ersch and Grüber's *Encyclopädie;* in Raumer's *Palästina;* in Winer's *Realwörterbuch;* in Eugene Roger's *La Terre Saincte, ou Descript. Topographique très-particulière des Sainctes Lieux, et de la Terre de Promission*, Paris, 1646; and in Dr. Robinson's *Bibl. Researches in Palestine;* with the additions since published in the *Biblical Repository* and *Bibliotheca Sacra:* also, the notices of Jerusalem in various books of travels, particularly those of Cotovicus, Zuallart, Radzivil, Morison, Nau, Sandys, Doubdan, D'Arvieux, Maundrell, Pococke, Niebuhr, Clarke, Turner, Buckingham, Richardson, Richter, Jolliffe, Jowett, Prokesch, Scholz, Monro, Hardy, Stephens, Paxton, Schubert, Olin, Stent, Formby, and the Scottish Deputation. Less important notices may be found in other books of travels; and the Journals of Missionaries, printed in the *Missionary Register*, *American Missionary Herald*, and *Jewish Expositor*, have occasionally contained interesting notices of the Holy City.

JESHUA, or Joshua, son of Jozedech, and high-priest of the Jews when they returned, under Zerubbabel, from the Babylonian exile (B.C. 536). He was, doubtless, born during the exile. His presence and exhortations greatly promoted the rebuilding of the city and temple. The altar of the latter being first erected, enabled him to sanctify their labour by the religious ceremonies and offerings which the law required. Jeshua joined with Zerubbabel in opposing the machinations of the Samaritans (Ezra iv. 3); and he was not found wanting in zeal when the works, after having been interrupted, were resumed in the second year of Darius Hystaspis (Ezra v. 2; Hagg. i. 12). Several of the prophet Haggai's utterances are addressed to Jeshua (Hagg. i. 1; ii. 2), and his name occurs in two of the symbolical prophecies of Zechariah (iii. 1-10; vi. 11-15). In the first of these passages Jeshua, as pontiff, represents the Jewish people covered at first with the garb of slaves, and afterwards with the new and glorious vestures of deliverance. In the second he wears for a moment crowns of silver and gold, as symbols of the sacerdotal and regal crowns of Israel, which were to be united on the head of the Messiah.

JESHURUN (יְשֻׁרוּן; Sept. *ἠγαπημένος*; Vulg. *dilectus* in Deut., *rectissimus* in Isaiah), a name poetically applied to Israel in Deut. xxxii. 15; xxxiii. 5, 26; Isa. xliv. 2. It has been very variously understood, but it is generally agreed to be a poetical diminutive expressive of affection. The root is ישר = אשר, *to be straight, right, upright, righteous.* In this character, as entirely upright (for the termination is intensitive), Jehovah recognises his people in consideration of their covenant relation to him, whereby, while they observed the terms of that covenant, they stood legally righteous before him and clean in his sight. It is in this sense that the ancient kings are said to have done הַיָּשָׁר, 'that which was right' in the eyes of Jehovah.

JESSE (יִשַׁי, *firm;* Sept. Ἰεσσαί), a descendant of Obed, the son of Boaz and Ruth. He was the father of eight sons: from the youngest of whom, David, is reflected all the distinction which belongs to the name. He seems to have been a person of some note and substance at Bethlehem, his property being chiefly in sheep. It would seem from 1 Sam. xvi. 10, that he must have been aware of the high destinies which awaited his son; but it is doubtful if he ever lived to see them realized. The last historical mention of Jesse is in relation to the asylum which David procured for him with the king of Moab (1 Sam. xxii. 3).

JESUS CHRIST (Ἰησοῦς Χριστός, Ἰησοῦς ὁ Χριστός), the ordinary designation of the incarnate Son of God, and Saviour of mankind. This double designation is not, like Simon Peter, John Mark, Joses Barnabas, composed of a name and a surname, but, like John the Baptist, Simon Magus, Bar-Jesus Elymas, of a proper name, and an official title. Jesus was our Lord's proper name, just as Peter, James, and John were the proper names of three of his disciples. The name seems not to have been an uncommon one among the Jews. The apocryphal book Ecclesiasticus is attributed to Jesus the son of Sirach; and, in the New Testament, we read of Jesus, the father of Elymas the sorcerer (Acts xiii. 6), and of 'Jesus, which is called Justus of the circumcision' (Col. iv. 11), one of Paul's 'fellow-workers unto the kingdom of God which had been a comfort to him.' To distinguish our Lord from others bearing the name, he was termed Jesus of Nazareth (John xviii. 7, &c.), Ἰησοῦς ὁ Ναζωραῖος, and Jesus the son of Joseph (John vi. 12, &c.).

Some of the fathers, from their ignorance of the Hebrew language, have given a Greek etymology to the name. They derive it from the noun ἴασις, healing. Thus Eusebius, 'Ιησοῦς ὠνομάζετο παρ' ὅσον τῆς τῶν ἀνθρωπίνων ψυχῶν ἰάσεώς τε καὶ θεραπείας χαρίν τὴν πάροδον εἰς ἡμᾶς ἐποιεῖτο (*Demonst. Evang.* lib. iv.); and Cyril of Jerusalem, 'Ιησοῦς καλεῖται φερωνύμως, ἐκ τῆς σωτηριώδεος ἰάσεως ἔχων τὴν προσηγορίαν (*Catech. Illum.* x.).*

There can be no doubt that Jesus is the Greek form of a Hebrew name, which had been borne by two illustrious individuals in former periods of the Jewish history,—the successor of Moses and introducer of Israel into the promised land (Exod. xxiv. 13), and the high-priest who, along with Zerubbabel (Zech. iii. 1), took so active a part in the re-establishment of the civil and religious polity of the Jews on their return from the Babylonish captivity. Its original and full form is Jehoshua (Num. xiii. 16). By contraction it became Joshua, or Jeshua; and when transferred into Greek, by taking the termination characteristic of that language, it assumed the form Jesus. It is thus the names of the illustrious individuals referred to are uniformly written in the Sept.; and the first of them is twice mentioned in the New Testament by this name (Acts vii. 45; Heb. iv. 8).

The conferring of this name on our Lord was not the result of accident, or of the ordinary course of things, there being 'none of his kindred,' so far as we can trace from the two genealogies, 'called by that name' (Luke i. 61). It was the consequence of a twofold miraculous interposition. The angel who announced to his virgin mother that she was to be 'the most honoured of women,' in giving birth to the Son of God and the Saviour of men, intimated also to her the name by which the holy child was to be called: 'Thou shalt call his name Jesus' (Luke i. 31). And it was probably the same heavenly messenger who appeared to Joseph, and, to remove his suspicions and quiet his fears, said to him, 'That which is conceived in thy wife Mary is of the Holy Ghost, and she shall bring forth a son, and thou shalt call his name Jesus' (Matt. i. 20, 21). The pious pair were 'not disobedient to the heavenly vision.' 'When eight days were accomplished for the circumcising of the child, his name was called Jesus, which was so named of the angel before he was conceived in the womb' (Luke ii. 21).

The name Jesus, like most of Jewish proper names, was significant; and, as might well be expected, when we consider who imposed it, its meaning is at once important and appropriate. The *precise* import of the word has been a subject of doubt and debate among interpreters. As to its *general* meaning there is all but an unanimous concurrence. It was intended to denote that he who bore it was to be a Deliverer or Saviour. This, whatever more, is indicated in the original word; and the reason given by the angel for the imposition of this name on the Virgin's son was 'because he shall save his people from their sins' (Matt. i. 21). But while some interpreters hold that it is just a part of the verb signifying to save, in the form Hiphil, slightly modified, and that it signifies 'he shall save,' others hold that it is a compound word formed by the addition of two letters of the incommunicable name of the divinity, יהוה, to that verb, and that it is equivalent to 'The Salvation of the Lord,' or 'The Lord the Saviour.' It is not a matter of vital importance. The following circumstances seem to give probability to the latter opinion It does not appear likely that Moses would have changed the name of his destined successor from Oshea, which signifies 'saviour,' into Jehoshua (Num. xiii. 16), if the latter signified merely he shall save; whereas, if the word be a compound term, embodying in it the name Jehovah, we see an adequate reason for the change. In the first chapter of the Gospel by Matthew (Matt. i. 22, 23), the most natural interpretation of the words (though they admit of another exegesis) seems to imply that the prediction of Isaiah, that the Virgin's son should be called Immanuel, was fulfilled in the imposition of the name Jesus on the Son of Mary. This would be the case only on the supposition that Immanuel and Jesus are equivalent terms, a supposition which cannot be sustained unless *Jesus* can be fairly rendered 'Jehovah will save,' or 'Jehovah the Saviour.' In that case, Jesus and Immanuel—God *with* us, *i.e.* on our side—express the same ideas.

It is right, however, to remark, that the merely bearing such a name as either Immanuel or Jesus, even by divine appointment, is not *of itself* evidence of the divinity of him who bears it. The Hebrews were in the habit of giving names, both to persons and places, which were intended not to describe their distinctive properties, but to express some important general truth. Jacob called an altar built by him El-Elohe-Israel (Gen. xxxiii. 20), 'God the God of Israel,' *i. e.* God is the God of Israel. Moses called an altar he built Jehovah Nissi (Exod. xvii. 15), 'Jehovah my banner,' *i. e.* Jehovah is my banner. The name Jehoshua, as borne by him who brought the people of the Lord into the heritage of the Gentiles, means no more than that by him Jehovah would deliver his people. In many of the proper names in the Old Testament, the name El, or Jehovah, forms a part. Yet when, as in the case before us, he who bears such a name, by express divine appointment, is shown 'by many infallible proofs' to be indeed an incarnation of divinity, we cannot but perceive a peculiar propriety in this divine appointment, and find in it, if not a new argument, a corroboration of the host of arguments which lead us to the conclusion that He who 'according to the flesh' was the Son of David, 'according to the Spirit of Holiness' was 'the Son of God,' 'God over all, blessed for ever' (Rom. i. 3, 4; ix. 5).

The above are the only *probable* etymologies of the word. Others, however, have been suggested, and supported with considerable learning and ingenuity. The Valentinians, according to Irenæus (lib. ii. c. 41), were in the habit of writing the name ישו, and explained it as meaning 'Him who possesses heaven and earth,' making each letter, according to the cabbalistic art called notarikon, expressive of a word or clause; thus, י for יהוה,

* Some of the Patristic etymologies are really very odd. Πάσχα is traced to πάσχω; Λευΐτης is derived from the Latin *levis;* and Διάβολος from δύο and βῶλος, because he who bears that name swallows man at two bites, first the soul, and then the body.

שׁ for שמים, and ו for וארץ, 'Jehovah of heaven and earth.'

The learned but fanciful Osiander insists that Jesus is not the Greek form of Joshua, but the ineffable name, the Shem-hamphorash, rendered utterable by the insertion of the letter שׁ. The reader who wishes to see the arguments by which he supports this wild hypothesis may consult his *Harmonia Evangelica*, lib. i. c. 6, Basil, 1561. And a satisfactory reply may be found in Chemnitius' dissertation, *De nomine Jesu*, in *Thes. Theol. Philol.* tom. ii. p. 62, Amst. 1702; and in Caninii *Disquis. in loc. aliq. N. T.* c. i.; apud *Crit. Sac.* tom. ix.

Castalio maintains an equally whimsical notion as to the etymology of the word, deriving it from יהוה and איש, as if it were equivalent to Jehova-homo, God-man.

The 'name of Jesus' (Phil. ii. 10) is not the name Jesus, but 'the name above every name,' ὄνομα τὸ ὑπὲρ πᾶν ὄνομα, ver. 9.; *i. e.* the supreme dignity and authority with which the Father has invested Jesus Christ, as the reward of his disinterested exertions in the cause of the divine glory and human happiness; and the bowing ἐν τῷ ὀνόματι Ἰησοῦ is obviously not an external mark of homage when the name Jesus is pronounced, but the inward sense of awe and submission to him who is raised to a station so exalted.

CHRIST; Gr. Χριστός; Heb. משיח. This is not, strictly speaking, a proper name, but an official title. Jesus Christ, or rather, as it generally ought to be rendered, Jesus *the* Christ, is a mode of expression of the same kind as John the Baptist, or Baptiser. In consequence of not adverting to this, the force and even the meaning of many passages of Scripture are misapprehended. When it is stated that Paul asserted, 'This Jesus whom I preach unto you is Christ' (Acts xvii. 3), ὅτι οὗτός ἐστιν ὁ Χριστὸς Ἰησοῦς, &c., that he 'testified to the Jews that Jesus was Christ' (Acts xviii. 5), the meaning is, that he proclaimed and proved that Jesus was the Christ, τὸν Χριστὸν Ἰησοῦν, or Messiah—the rightful owner of a title descriptive of a high official station which had been the subject of ancient prediction. When Jesus himself says that 'it is life eternal to know the only true God, and Jesus Christ whom he has sent' (John xvii. 3), he represents the knowledge of himself as the Christ, the Messiah, as at once necessary and sufficient to make men truly and permanently happy. When he says, 'What think ye of Christ?' περὶ τοῦ Χριστοῦ: 'whose son is he?' (Matt. xxii. 42), he does not mean, What think ye of ME, or of my descent? but, What think ye of the Christ—the Messiah—and especially of his paternity. There can be no doubt that the word, though originally an appellative, and intended to bring before the mind a particular official character possessed by him to whom it is applied, came at last, like many other terms of the same kind, to be often used very much as a proper name, to distinguish our Lord from other persons bearing the name Jesus. This is a sense, however, of comparatively rare occurrence in the New Testament.

Proceeding, then, on the principle that Christ is an appellative, let us inquire into its origin and signification as applied to our Lord. CHRIST is the English form of a Greek word, Χριστός, corresponding in meaning to the Hebrew word Messiah, and the English word Anointed. The Christ is just equivalent to the Anointed One. The important question, however, remains behind, What is meant when the Saviour is represented as the Anointed One? To reply to this question satisfactorily, it will be necessary to go somewhat into detail.

Unction, from a very early age, seems to have been the emblem of consecration, or setting apart to a particular, and especially to a religious, purpose. Thus Jacob is said to have *anointed* the pillar of stone, which he erected and set apart as a monument of his supernatural dream at Beth-el (Gen. xxviii. 18; xxxi. 13; xxxv. 14). Under the Old Testament economy high-priests and kings were regularly set apart to their offices, both of which were, strictly speaking, sacred ones, by the ceremony of anointing, and the prophets were occasionally designated by the same rite. This rite seems to have been intended as a public intimation of a divine appointment to office. Thus Saul is termed 'the Lord's anointed' (1 Sam. xxiv. 6); David, 'the anointed of the God of Israel' (2 Sam. xxiii. 1); and Zedekiah, 'the anointed of the Lord' (Lam. iv. 20). The high-priest is called 'the anointed priest' (Lev. iv. 3).

From the origin and design of the rite, it is not wonderful that the term should have, in a secondary and analogical sense, been applied to persons set apart by God for important purposes, though not actually anointed. Thus Cyrus, the King of Persia, is termed 'the Lord's anointed' (Isa. xlv. 1); the Hebrew patriarchs, when sojourning in Canaan, are termed 'God's anointed ones' (Ps. cv. 15); and the Israelitish people receive the same appellation from the prophet Habakkuk (Hab. iii. 13). It is probably with reference to this use of the expression that Moses is said by the writer of the Epistle to the Hebrews, to have 'counted the reproach of Christ' (Heb. xi. 26), τοῦ Χριστοῦ (λαοῦ), the same class who in the parallel clause are termed the 'people of God,' 'greater riches than the treasures of Egypt.'

In the prophetic Scriptures we find this appellation given to an illustrious personage, who, under various designations, is so often spoken of as destined to appear in a distant age as a great deliverer. The royal prophet David seems to have been the first who spoke of the great deliverer under this appellation. He represents the heathen (the Gentile nations) raging, and the people (the Jewish people) imagining a vain thing, 'against Jehovah, and against his *anointed*' (Ps. ii. 2). He says, 'Now know I that the Lord saveth his *anointed*' (Ps. xx. 6). 'Thou hast loved righteousness and hated iniquity' says he, addressing himself to 'Him who was to come,' 'therefore God, even thy God, hath *anointed* thee with the oil of gladness above thy fellows' (Ps. xlv. 7). In all the passages in which the great deliverer is spoken of as 'the anointed one,' by David, he is plainly viewed as sustaining the character of a king.

The prophet Isaiah also uses the appellation, 'the anointed one,' with reference to the promised deliverer, but, when he does so, he speaks of him as a prophet or great teacher. He introduces him as saying, 'The Spirit of the Lord God is upon me, because the Lord God hath *anointed* me to preach good tidings unto the meek; he hath sent me to bind up the broken-hearted, to proclaim liberty to

the captives, and the opening of the prison to them who are bound, to proclaim the acceptable year of the Lord, and the day of vengeance of our God, to comfort all that mourn,' &c. (Isa. lxi. 1, &c.).

Daniel is the only other of the prophets who uses the appellation 'the anointed one' in reference to the great deliverer, and he plainly represents him as not only a prince, but also a high-priest, an expiator of guilt. 'Seventy weeks are determined upon thy people and upon thy holy city, to punish the transgression, and to make an end of sins, and to make reconciliation for iniquity, and to bring in everlasting righteousness, and to seal up the vision and the prophecy, and to *anoint* the most holy. Know therefore and understand that from the going forth of the commandment to restore Jerusalem unto *Messiah* the Prince shall be seven weeks and threescore and two weeks; the city shall be built again, and the wall, even in troublous times; and after threescore and two weeks shall Messiah be cut off, but not for himself' (Dan. ix. 24-26).

During the period which elapsed from the close of the prophetic canon till the birth of Jesus, no appellation of the expected deliverer seems to have been so common as the Messiah or Anointed One, and this is still the name which the unbelieving Jews ordinarily employ when speaking of him whom they still look for to avenge their wrongs and restore them to more than their former honours.

Messiah, Christ, Anointed, is, then, a term equivalent to consecrated, sacred, set apart; and as the record of divine revelation is called, by way of eminence, *The* Bible, or book, so is the Great Deliverer called *The* Messiah, or Anointed One, much in the same way as he is termed *The* Man, *The* Son of Man.

The import of this designation as given to Jesus of Nazareth may now readily be apprehended.—(1.) When he is termed the Christ it is plainly indicated that He is the great deliverer promised under that appellation, and many others in the Old Testament Scriptures, and that all that is said of this deliverer under this or any other appellation is true of Him. No attentive reader of the Old Testament can help noticing that in every part of the prophecies there is ever and anon presented to our view an illustrious personage destined to appear at some future distant period, and, however varied may be the figurative representations given of him, no reasonable doubt can be entertained as to the identity of the individual. It is quite obvious that the Messiah is the same person as 'the seed of the woman' who was to 'bruise the head of the serpent' (Gen. iii. 15); 'the seed of Abraham, in whom all the nations of the earth were to be blessed' (Gen. xxii. 18); the great 'prophet to be raised up like unto Moses,' whom all were to be required to hear and obey (Deut. xviii. 15); the 'priest after the order of Melchizedek;' 'the rod out of the stem of Jesse, which should stand for an ensign of the people to which the Gentiles should seek' (Isa. xi. 1, 10); the virgin's son whose name was to be Immanuel (Isa. vii. 14); 'the branch of Jehovah' (Isa. iv. 2); 'the Angel of the Covenant' (Mal. iii. 1); 'the Lord of the Temple,' &c. &c. (ib.). When we say, then, that Jesus is the Christ, we in effect say, 'This is He of whom Moses, in the law, and the prophets did write' (John i. 45); and all that they say of Him is true of Jesus.

Now what is the sum of the prophetic testimony respecting him? It is this—that he should belong to the very highest order of being, the incommunicable name Jehovah being represented as rightfully belonging to him; that 'his goings forth have been from old, from everlasting' (Mic. v. 2); that his appropriate appellations should be 'Wonderful, Counsellor, the Mighty God' (Isa. ix. 6); that he should assume human nature, and become 'a child born' of the Israelitish nation of the tribe of Judah (Gen. xlix. 10), of the family of David (Isa. xi. 1); that the object of his appearance should be the salvation of mankind, both Jews and Gentiles (Isa. xlix. 6); that he should be 'despised and rejected' of his countrymen; that he should be 'cut off, but not for himself;' that he should be 'wounded for men's transgressions, bruised for their iniquities, and undergo the chastisement of their peace;' that 'by his stripes men should be healed;' that 'the Lord should lay on him the iniquity' of men; that 'exaction should be made and he should answer it;' that he should 'make his soul an offering for sin;' that after these sufferings he should be 'exalted and extolled and made very high;' that he should 'see of the travail of his soul and be satisfied, and by his knowledge justify many' (Isa. liii. *passim*); that Jehovah should say to him, 'Sit at my right hand until I make thine enemies thy footstool' (Ps. cx. 1); that he should be brought near to the Ancient of Days, and that to him should be given 'dominion, and glory, and a kingdom, that all people, and nations, and languages should serve him—an everlasting dominion which shall not pass away, —a kingdom that shall not be destroyed' (Dan. vii. 13, 14). All this is implied in saying Jesus is the Christ. In the plainer language of the New Testament 'Jesus is the Christ' is equivalent to Jesus is 'God manifest in flesh' (1 Tim. iii. 16), —the Son of God, who, in human nature, by his obedience, and sufferings, and death in the room of the guilty, has obtained salvation for them, and all power in heaven and earth for himself, that he may give eternal life to all coming to the Father through him.

(2.) While the statement 'Jesus is the Christ' is thus materially equivalent to the statement 'all that is said of the Great Deliverer in the Old Testament Scriptures is true of Him,' it brings more directly before our mind those truths respecting him which the appellation 'the Anointed One' naturally suggests. He is a prophet, a priest, and a king. He is the great revealer of divine truth; the only expiator of human guilt, and reconciler of man to God; the supreme and sole legitimate ruler over the understandings, consciences, and affections of men. In his person, and work, and word, by his spirit and providence, he unfolds the truth with respect to the divine character and will, and so conveys it into the mind as to make it the effectual means of conforming man's will to God's will, man's character to God's character. He has by his spotless, all-perfect obedience, amid the severest sufferings, 'obedience unto death even the death of the cross,' so illustrated the excellence of the divine law and the wickedness and danger of violating it, as to make it a righteous thing in 'the just God' to 'justify the ungodly,' thus propitiating the offended majesty of heaven; while the manifestation of the divine love in appointing and accepting

this atonement, when apprehended by the mind under the influence of the Holy Spirit, becomes the effectual means of reconciling man to God and to his law, 'transforming him by the renewing of his mind.' And now, possessed of 'all power in heaven and earth,' 'all power over all flesh,' 'He is Lord of All.' All external events and all spiritual influences are equally under his control, and as a king he exerts his authority in carrying into full effect the great purposes which his revelations as a prophet, and his great atoning sacrifice as a high-priest, were intended to accomplish.

(3.) But the full import of the appellation the Christ is not yet brought out. It indicates that He to whom it belongs is the *anointed* prophet, priest, and king—not that he was anointed by material oil, but that he was divinely *appointed*, *qualified*, *commissioned*, and *accredited* to be the Saviour of men. These are the ideas which the term *anointed* seems specially intended to convey. Jesus was divinely *appointed* to the offices he filled. He did not ultroneously assume them, 'he was called of God as was Aaron' (Heb. v. 4), 'Behold mine Elect, in whom my soul delighteth.' He was divinely *qualified:* 'God gave to him the Spirit not by measure.' 'The Spirit of the Lord was upon him, the spirit of wisdom and understanding, the spirit of counsel and might, the spirit of knowledge and of the fear of the Lord, and they made him of quick understanding in the fear of the Lord, so that he does not judge after the sight of his eyes, nor reprove after the hearing of his ears, but he smites the earth with the rod of his mouth, and with the breath of his lips he slays the wicked; and righteousness is the girdle of his loins, and faithfulness the girdle of his reins' (Isa. xi. 2-4). He was divinely *commissioned:* 'The Father sent him.' Jehovah said to him, 'Thou art my servant, in thee will I be glorified. It is a light thing that thou shouldst be my servant, to raise up the tribes of Jacob and to restore the preserved of Israel; I will also give thee for a light to the Gentiles, that thou mayst be my salvation to the ends of the earth' (Isa. xlix. 6). 'Behold,' says Jehovah, 'I have given Him for a witness to the people—a leader and commander to the people.' He is divinely *accredited:* 'Jesus of Nazareth,' says the Apostle Peter, was 'a man approved of God among you by miracles, and wonders, and signs which God did by him in the midst of you' (Acts ii. 22). 'The Father who hath sent me,' says Jesus himself, 'hath borne witness of me' (John v. 37). This he did again and again by a voice from heaven, as well as by the miracles which he performed by that divine power which was equally his and his Father's. Such is the import of the appellation *Christ.*

If these observations are clearly apprehended there will be little difficulty in giving a satisfactory answer to the question which has sometimes been proposed—when did Jesus become Christ? when was he *anointed* of God? We have seen that the expression is a figurative or analogical one, and therefore we need not wonder that its references are various. The *appointment* of the Saviour, like all the other divine purposes, was, of course, from eternity. 'He was set up from everlasting' (Prov. viii. 23); he 'was fore-ordained before the foundation of the world.' (1 Pet. i. 20). His qualifications, such of them as were conferred, were bestowed in, or during his incarnation, when 'God anointed him with the Holy Ghost and with power' (Acts x. 38). His commission may be considered as given him when called to enter on the functions of his office. He himself, after quoting, in the synagogue of Nazareth, in the commencement of his ministry, the passage from the prophecies of Isaiah in which his unction to the prophetical office is predicted, declared '*This day* is this Scripture fulfilled in your ears.' And in his resurrection and ascension, God, as the reward of his loving righteousness and hating iniquity, 'anointed him with the oil of gladness above his fellows' (Ps. xlv. 7), *i. e.* conferred on him a regal power, fruitful in blessings to himself and others, far superior to that which any king had ever possessed, making him, as the Apostle Peter expresses it, 'both Lord and Christ' (Acts ii. 36). As to his being *accredited*, every miraculous event performed in reference to him or by him may be viewed as included in this species of anointing—especially the visible descent of the Spirit on him in his baptism.

These statements, with regard to the import of the appellation 'the Christ,' show us how we are to understand the statement of the Apostle John, 'Whosoever believeth that Jesus is the Christ is born of God' (1 John v. 1), *i. e.* is 'a child of God,' 'born again,' 'a new creature;' and the similar declaration of the Apostle Paul, 'No man can say that Jesus is the Lord,' *i. e.* the Christ, the Messiah, 'but by the Holy Ghost' (1 Cor. xii. 3). It is plain that the proposition, 'Jesus is the Christ,' when understood in the latitude of meaning which we have shown belongs to it, contains a complete summary of the truth respecting the divine method of salvation. To believe that principle rightly understood is to believe the Gospel—the saving truth, by the faith of which a man is, and by the faith of which only a man can be, brought into the relation or formed to the character of a child of God; and though a man may, without divine influence, be brought to acknowledge that 'Jesus is the Lord,' 'Messiah the Prince,' and even firmly to believe that these words embody a truth, yet no man can be brought really to believe and cordially to acknowledge the truth contained in these words, as we have attempted to unfold it, without a peculiar divine influence. That Jesus is ὁ ἐλθών, ὁ Χριστός, is the testimony of God, the faith of which constitutes a Christian, τὸ ἕν, the one thing to which the Spirit, the water and the blood, unite in bearing witness (1 John v. 6, 8, 9).—J. B.

JESUS, surnamed Justus. [Justus.]

JETHRO. [Hobab.]

JEW (יְהוּדִי *Jehudi;* Sept. Ἰουδαῖος), a name formed from that of the patriarch Judah, and applied in its first use to one belonging to the tribe or country of Judah, or rather perhaps to a subject of the separate kingdom of Judah (2 Kings xvi. 6; xxv. 5). During the Captivity the term seems to have been extended to all the people of the Hebrew language and country, without distinction (Esth. iii. 6, 9; Dan. iii. 8, 12); and this loose application of the name was preserved after the restoration to Palestine, when it came to denote not only every descendant of Abraham in the largest possible sense, but even proselytes who

had no blood-relation to the Hebrews (Acts ii. 5; comp. 10). See the articles HEBREW LANGUAGE; ISRAEL; JUDAH.

JEZEBEL (אִיזֶבֶל, *not-inhabited*, comp. *Isabella;* Sept. Ἰεζάβελ), daughter of Ethbaal, king of Tyre and Sidon, and consort of Ahab, king of Israel (B.C. 918). This unsuitable alliance proved most disastrous to the kingdom of Israel; for Jezebel induced her weak husband not only to connive at her introducing the worship of her native idols, but eventually to become himself a worshipper of them, and to use all the means in his power to establish them in the room of the God of Israel. This was a great enormity. The worship of the golden calves which previously existed was, however mistakenly, intended in honour of Jehovah; but this was an open alienation from him, and a turning aside to foreign and strange gods, which, indeed, were no gods. Most of the particulars of this bad but apparently highly-gifted woman's conduct have been related in the notices of AHAB and ELIJAH. From the course of her proceedings it would appear that she grew to hate the Jewish system of law and religion, on account of what must have seemed to her its intolerance and its anti-social tendencies. She hence sought to put it down by all the means she could command; and the imbecility of her husband seems to have made all the powers of the state subservient to her designs. The manner in which she acquired and used her power over Ahab is strikingly shown in the matter of Naboth, which, perhaps, more than all the other affairs in which she was engaged, brings out her true character, and displays the nature of her influence. When she found him puling, like a spoiled child, on account of the refusal of Naboth to gratify him by selling him his patrimonial vineyard for a 'garden of herbs,' she teaches him to look to her, to rely upon her for the accomplishment of his wishes; and for the sake of this impression, more perhaps than from savageness of temper, she scrupled not at murder under the abused forms of law and religion. She had the reward of her unscrupulous decisiveness of character in the triumph of her policy in Israel, where, at last, there were but 7000 people who had not bowed the knee to Baal, nor kissed their hand to his image. Nor was her success confined to Israel, for through Athaliah—a daughter after her own heart—who was married to the son and successor of Jehoshaphat, the same policy prevailed for a time in Judah, after Jezebel herself had perished and the house of Ahab had met its doom. It seems that after the death of her husband, Jezebel maintained considerable ascendancy over her son Joram; and her measures and misconduct formed the principal charge which Jehu cast in the teeth of that unhappy monarch, before he sent forth the arrow which slew him. The last effort of Jezebel was to intimidate Jehu as he passed the palace, by warning him of the eventual rewards of even successful treason. It is eminently characteristic of the woman, that even in this terrible moment, when she knew that her son was slain, and must have felt that her power had departed, she displayed herself not with rent veil and dishevelled hair, 'but tired her head and painted her eyes' before she looked out at the window. The eunuchs, at a word from Jehu, having cast her down, she met her death beneath the wall [JEHU]; and when afterwards the new monarch bethought him that, as 'a king's daughter,' her corpse should not be treated with disrespect, nothing was found of her but the palms of her hands and the soles of her feet. The dogs had eaten all the rest. B.C. 884 (1 Kings xvi. 31; xviii. 4, 13, 19; xxi. 5-25; 2 Kings ix. 7, 22, 30-37).

JEZREEL (יִזְרְעֶאל; Sept. Ἰεζράελ), a town in the tribe of Issachar (Josh. xix. 18), where the kings of Israel had a palace, and where the court often resided, although Samaria was the metropolis of the kingdom. It is most frequently mentioned in the history of the house of Ahab. Here was the vineyard of Naboth, which Ahab coveted to enlarge the palace-grounds (1 Kings xviii. 45, 46; xxi.), and here Jehu executed his dreadful commission against the house of Ahab, when Jezebel, Joram, and all who were connected with that wretched dynasty perished (2 Kings ix. 14-37; x. 1-11). These horrid scenes appear to have given the kings of Israel a distaste to this residence, as it is not again mentioned in their history. It is, however, named by Hosea (i. 4; comp. i. 11; ii. 22); and in Judith (i. 8; iv. 3; vii. 3) it occurs under the name of Esdraelon. In the days of Eusebius and Jerome it was still a large village, called Esdraela (*Onomast.* s. v. 'Jezrael'); and in the same age it again occurs as Stradela (*Itin. Hieros.* p. 586). Nothing more is heard of it till the time of the crusades, when it was called by the Franks Parvum Gerinum, and by the Arabs Zerin; and it is described as commanding a wide prospect—on the east to the mountains of Gilead, and on the west to Mount Carmel (Will. Tyr. xxii. 26). But this line of identification seems to have been afterwards lost sight of, and Jezreel came to be identified with Jenin. Indeed, the village of Zerin ceased to be mentioned by travellers till Turner, Buckingham, and others after them again brought it into notice; and it is still more lately that the identification of Zerin and Jezreel has been restored (Raumer, *Palüst.* p. 155; Schubert, iii. 164; Elliot, ii. 379; Robinson, iii. 164).

If any further proof of the fact were necessary, the identity of the names Jezreel and Zerin, or Jerin, might be adduced. This does not at first sight appear; but the first feeble letter of the Hebrew being dropped, and the last syllable *el* becoming *in*, as is not unusual in Arabic (as Beit*in* for Beth*el*), the two words are seen to have been originally the same.

Zerin is seated on the brow of a rocky and very steep descent into the great and fertile valley of Jezreel, which runs down between the mountains of Gilboa and Hermon. Lying comparatively high, it commands a wide and noble view, extending down the broad valley on the east to Beisan (Bethshean), and on the west quite across the great plain to the mountains of Carmel. It is described by Dr. Robinson (*Researches*, iii. 163) as a most magnificent site for a city, which, being itself a conspicuous object in every part, would naturally give its name to the whole region. In the valley directly under Zerin, is a considerable fountain, and another still larger somewhat further to the east, under the northern side of Gilboa, called Ain Jalud. There can, therefore, be little question that as in Zerin we have Jezreel,

so in the valley and the fountain we have the 'valley of Jezreel,' and the fountain of Jezreel, of Scripture.

Zerin has at present little more than twenty humble dwellings, mostly in ruins, and with few inhabitants.

JOAB (יוֹאָב, *God-fathered;* Sept. Ἰωάβ), one of the three sons of Zeruiah, the sister of David, and 'captain of the host' (generalissimo) of the army during nearly the whole of David's reign.

He first appears associated with his two brothers, Abishai and Asahel, in the command of David's troops against Abner, who had set up the claims of a son of Saul in opposition to those of David, who then reigned in Hebron. The armies having met at the pool of Gibeon, a general action was brought on, in which Abner was worsted. In his flight he had the misfortune to kill Joab's brother, the swift-footed Asahel, by whom he was pursued (2 Sam. ii. 13-32). The consequences of this deed have been explained elsewhere [Abner; Asahel]. Joab smothered for a time his resentment against the shedder of his brother's blood; but being whetted by the natural rivalry of position between him and Abner, he afterwards made it the instrument of his policy by treacherously, in the act of friendly communication, slaying Abner, at the very time when the services of the latter to David, to whom he had then turned, had rendered him a most dangerous rival to him in power and influence (2 Sam. iii. 22-27). That Abner had at first suspected that Joab would take the position of blood-avenger [Blood-Revenge] is clear, from the apprehension which he expressed (2 Sam. ii. 22); but that he thought that Joab had, under all the circumstances, abandoned this position, is shown by the unsuspecting readiness with which he went aside with him (2 Sam. iii. 26, 27); and that Joab placed his murderous act on the footing of vengeance for his brother's blood, is plainly stated in 2 Sam. iii. 30; by which it also appears that the other brother, Abishai, shared in some way in the deed and its responsibilities. At the same time, as Abner was perfectly justified in slaying Asahel to save his own life, it is very doubtful if Joab would ever have asserted his right of blood-revenge, if Abner had not appeared likely to endanger his influence with David. The king, much as he reprobated the act, knew that it had a sort of excuse in the old customs of blood-revenge, and he stood habitually too much in awe of his impetuous and able nephew to bring him to punishment, or even to displace him from his command. 'I am this day weak,' he said, 'though anointed king, and these men, the sons of Zeruiah, be too hard for me' (2 Sam iii. 39).

Desirous probably of making some atonement before David and the public for this atrocity, in a way which at the same time was most likely to prove effectual—namely, by some daring exploit, he was the first to mount to the assault at the storming of the fortress on Mount Zion, which had remained so long in the hands of the Jebusites. By this service he acquired the chief command of the army of all Israel, of which David was by this time king (2 Sam. v. 6-10).

It is not necessary to trace the subsequent acts of Joab, seeing that they are in fact the public acts of the king he served. And he served him faithfully; for although he knew his power over David, and often treated him with little ceremony, there can be no doubt that he was most truly devoted to his interests, and sometimes rendered him good service even against his own will, as in the affair at Mahanaim (2 Sam. xix. 5-8). But Joab had no principles apart from what he deemed his duty to the king and the people, and was quite as ready to serve his master's vices as his virtues, so long as they did not interfere with his own interests, or tended to promote them by enabling him to make himself useful to the king. His ready apprehension of the king's meaning in the matter of Uriah, and the facility with which he made himself the instrument of the murder, and of the hypocrisy by which it was covered, are proofs of this, and form as deep a stain upon his character as his own murders (2 Sam. xi. 14-25). As Joab was on good terms with Absalom, and had taken pains to bring about a reconciliation between him and his father, we may set the higher value upon his firm adhesion to David when Absalom revolted, and upon his stern sense of duty to the king—from whom he expected no thanks,—displayed in putting an end to the war by the slaughter of his favourite son, when all others shrunk from the responsibility of doing the king a service against his own will (2 Sam. xviii. 1-14). In like manner, when David unhappily resolved to number the people, Joab discerned the evil and remonstrated against it; and although he did not venture to disobey, he performed the duty tardily and reluctantly, to afford the king an opportunity of reconsidering the matter, and took no pains to conceal how odious the measure was to him (2 Sam. xxiv. 1-4). David was certainly ungrateful for the services of Joab, when, in order to conciliate the powerful party which had supported Absalom, he offered the command of the host to Amasa, who had commanded the army of Absalom (2 Sam. xix. 13). But the inefficiency of the new commander, in the emergency which the revolt of Bichri's son produced, arising perhaps from the reluctance of the troops to follow their new leader, gave Joab an opportunity of displaying his superior resources; and also of removing his rival by a murder very similar to, and in some respects less excusable and more foul than that of Abner [Amasa]. Besides, Amasa was his own cousin, being the son of his mother's sister (2 Sam. xx. 1-13).

When David lay on his death-bed, and a demonstration was made in favour of the succession of the eldest surviving son, Adonijah, whose interests had been compromised by the preference of the young Solomon, Joab joined the party of the natural heir. It would be unjust to regard this as a defection from David. It was nothing more or less than a demonstration in favour of the natural heir, which, if not then made, could not be made at all. But an act which would have been justifiable, had the preference of Solomon been a mere caprice of the old king, became criminal as an act of contumacy to the Divine king, the real head of the government, who had called the house of David to the throne, and had the sole right of determining which of its members should reign. When the prompt measures taken under the direction of the king rendered this demonstration abortive (1 Kings i. 7), Joab withdrew into private life till some time after the death of David, when

the fate of Adonijah, and of Abiathar—whose life was only spared in consequence of his sacerdotal character—warned Joab that he had little mercy to expect from the new king. He fled for refuge to the altar; but when Solomon heard this, he sent Benaiah to put him to death; and, as he refused to come forth, gave orders that he should be slain even at the altar. Thus died one of the most accomplished warriors and unscrupulous men that Israel ever produced. His corpse was removed to his domain in the wilderness of Judah, and buried there, B.C. 1015 (1 Kings ii. 5, 28-34).

JOANNA (Ἰωάννα), wife of Chuza, the steward of Herod Antipas, the tetrarch of Galilee. She was one of those women who followed Christ, and ministered to the wants of him and his disciples out of their abundance. They had all been cured of grievous diseases by the Saviour, or had received material benefits from him; and the customs of the country allowed them to testify in this way their gratitude and devotedness without reproach. It is usually supposed that Joanna was at this time a widow (Luke viii. 3; xxiv. 10).

1. JOASH (יוֹאָשׁ, *God-given;* Sept. Ἰωάς), a contraction of JEHOASH (יְהוֹאָשׁ), son of Ahaziah and eighth king of Judah, who began to reign in B.C. 878, at the age of seven, and reigned forty-one years.

Joash, when an infant, was secretly saved by his aunt Jehoshebah, who was married to the high-priest Jehoiada, from the general massacre of the family by Athaliah, who had usurped the throne [ATHALIAH; JEHOIADA]. By the high-priest and his wife the child was privily brought up in the chambers connected with the temple till he had attained his eighth year, when Jehoiada deemed that the state of affairs required him to produce the youthful heir of the throne to the people, and claim for him the crown which his grandmother had so unrighteously usurped. Finding the influential persons whom he consulted favourable to the design, everything was secretly, but admirably, arranged for producing Joash, and investing him with the regalia, in such a manner that Athaliah could have no suspicion of the event till it actually occurred. On the day appointed, the sole surviving scion of David's illustrious house appeared in the place of the kings, by a particular pillar in the temple-court, and was crowned and anointed with the usual ceremonies. The high-wrought enthusiasm of the spectators then found vent in clapping of hands and exulting shouts of 'Long live the king!' The joyful uproar was heard even in the palace, and brought Athaliah to the temple, from which, at a word from Jehoiada, she was led to her death.

Joash behaved well during his non-age, and so long after as he remained under the influence of the high-priest. But when he died the king seems to have felt himself relieved from a yoke; and to manifest his freedom, began to take the contrary course to that which he had followed while under pupilage. Gradually the persons who had possessed influence formerly, when the house of David was contaminated by its alliance with the house of Ahab, insinuated themselves into his councils, and ere long the worship of Jehovah and the observances of the law were neglected, and the land was defiled with idolatries and idolatrous usages. The prophets then uttered their warnings, but were not heard; and the infatuated king had the atrocious ingratitude to put to death Zechariah, the son and successor of his benefactor Jehoiada. For these deeds Joash was made an example of the divine judgments. He saw his realm devastated by the Syrians under Hazael; his armies were cut in pieces by an enemy of inferior numbers; and he was even besieged in Jerusalem, and only preserved his capital and his crown by giving up the treasures of the temple. Besides this, a painful malady embittered all his latter days, and at length he became so odious that his own servants conspired against him, and slew him on his bed. They are said to have done this to avenge the blood of Zechariah, who at his death had cried, 'The Lord look upon it and require it;' and it is hence probable that public opinion ascribed all the calamities of his life and reign to that infamous deed. Joash was buried in the city of David; but a place in the sepulchre of the kings was denied to his remains (2 Kings xi.; xii.; 2 Chron. xxiv.).

2. JOASH, son and successor of Jehoahaz on the throne of Israel, of which he was the twelfth king. He began to reign in B.C 840, and reigned sixteen incomplete years. He followed the example of his predecessors in the policy of keeping up the worship of the golden calves; but, apart from this, he bears a fair character, and had intervals, at least, of sincere piety and true devotion to the God of his fathers. Indeed, custom and long habit had so established the views of political expediency on which the schismatical establishments at Dan and Bethel were founded, that at length the reprehension which regularly recurs in the record of each king's reign, seems rather to apply to it as a mark of the continuance of a public crime, than as indicative of the character or disposition of the reigning prince, which is to be sought in the more detailed accounts of his own conduct. These accounts are favourable with respect to Joash. He held the prophet Elisha in high honour, looking up to him as a father. When he heard of his last illness he repaired to the bed-side of the dying prophet, and was favoured with promises of victories over the Syrians, by whom his dominions were then harassed. These promises were accomplished after the prophet's death. In three signal and successive victories Joash overcame the Syrians, and retook from them the towns which Hazael had rent from Israel.

These advantages rendered the kingdom of Israel more potent than that of Judah. He, however, sought no quarrel with that kingdom; but when he received a defiance from Amaziah, king of Judah, he answered with becoming spirit in a parable, which by its images calls to mind that of Jotham [PARABLES]: the cool disdain of the answer must have been, and in fact was, exceedingly galling to Amaziah. 'The thistle that was in Lebanon sent to the cedar that was in Lebanon, saying, Give thy daughter to my son to wife; and there came by a wild beast that was in Lebanon and trod down the thistle.' This was admirable; nor was the application less so: 'Thou hast, indeed, smitten Edom, and thine heart hath lifted thee up: glory of this, and tarry at home; for why shouldest thou meddle to thy

hurt, that thou shouldest fall, even thou and Judah with thee.' In the war, or rather action, which followed, Joash was victorious. Having defeated Amaziah at Beth-shemesh, in Judah, he advanced to Jerusalem, broke down the wall to the extent of 400 cubits, and carried away the treasures both of the temple and the palace, together with hostages for the future good behaviour of the crest-fallen Amaziah. Joash himself did not long survive this victory; he died in peace, and was buried in Samaria (2 Kings xiii. 9-25; xiv. 1-17).

JOB, THE BOOK OF. We shall consider, first, the contents of this book; secondly, its object; thirdly, its composition; and, lastly, the country, descent, and age of its author.

I. Contents. In the land of Uz, belonging to the northern part of Arabia Deserta, lived an honest, pious man, called Job. For his sincere and perfect devotedness, God had amply blessed him with worldly property and children; but on Satan obtaining leave *to tempt him*, he suddenly lost the fortune of his life. Ultimately he is smitten with a severe and painful disease; but though his wife *moves* him to forsake God, he still continues true and stanch to the Lord. Three friends, Eliphaz, Bildad, and Zophar, hear of his calamities, and come to console him. His distressed state excites their heartfelt compassion; but the view which they take of its origin prevents them from at once assisting him, and they remain silent, though they are sensible that by so doing they further wound his feelings. Seven days thus pass, until Job, suspecting the cause of their conduct, becomes discomposed and breaks silence. His first observations are based on the assertion—not, indeed, broadly expressed—that God acts harshly and arbitrarily in inflicting calamity on men. This causes a discussion between him and his friends, which is divided into three main parts, each with subdivisions, and embraces the speeches of the three friends of Job, and his answers: the last part, however, consists of only two subdivisions, the third friend, Zophar, having nothing to rejoin. By this silence the author of the book generally designates the defeat of Job's friends, who are defending a common cause. Taking a general view of the argument which they urge against him, they may be considered as asserting the following positions:—

1. No man being free from sin, we need not wonder that we are liable to calamities, for which we must account by a reference, not to God, but to ourselves. From the misery of the distressed, others are enabled to infer their guilt; and they must take this view in order to vindicate divine justice.

2. The distress of a man proves not only *that he has sinned*, but shows also the degree and measure of his sin; and thus, from the extent of calamity sustained, may be inferred the extent of sins committed; and from this the measure of impending misfortune.

3. A distressed man may recover his former happiness, and even attain to greater fortune than he ever enjoyed before, if he takes a warning from his afflictions, repents of his sins, reforms his life, and raises himself to a higher degree of moral rectitude. Impatience and irreverent expostulation with God serve but to prolong and increase punishment; for, by accusing God of injustice, a fresh sin is added to former transgressions.

4. Though the wicked man is capable of prosperity, still it is never lasting. The most awful retribution soon overtakes him; and his transient felicity must itself be considered as punishment, since it renders him heedless, and makes him feel misfortune more keenly.

In opposition to them, Job maintains:—

1. The most upright man may be highly unfortunate—more so than the inevitable faults and shortcomings of human nature would seem to imply. There is a savage cruelty, deserving the severities of the divine resentment, in inferring the guilt of a man from his distresses. In distributing good and evil, God regards neither merit nor guilt, but acts according to His sovereign pleasure. His omnipotence is apparent in every part of the creation; but His justice cannot be seen in the government of the world; the afflictions of the righteous, as well as the prosperity of the wicked, are evidence against it. There are innumerable cases, and Job considers his own to be one of them, in which a sufferer has a right to justify himself before God, and to repine at His decrees. Of this supposed right Job freely avails himself, and maintains it against his friends.

2. In a state of composure and calmer reflection, Job retracts, chiefly in his concluding speech, all his former rather extravagant assertions, and says that, although God generally afflicts the wicked and blesses the righteous, still there are exceptions to this rule, single cases in which the pious undergo severe trials; the inference, therefore, of a man's guilt from his misfortunes is by no means warranted. For the exceptions established by experience prove that God does not always distribute prosperity and adversity after this rule; but that he sometimes acts on a different principle, or as an absolute lord, according to his mere will and pleasure.

3. Humbly to adore God is our duty, even when we are subject to calamities not at all deserved; but we should abstain from harshly judging of those who, when distressed, send forth complaints against God.

Both parties not only explain their principles generally, but apply them to the case which had caused the discussion. At first the friends of Job only hint, but in the course of the discussion, they broadly assert, that his very great afflictions must have been caused by equally great sins; and they tax him with crimes of which they suspect him to have been guilty. They also admonish him to confess and repent of the guilt of which, by the divine punishments inflicted on him, he stood already convicted. If he should follow this counsel, they promise him a return of prosperity; but if he proved refractory, they threaten him with divine punishments even more severe. Job, on the contrary, represents himself, venial frailties excepted, as altogether upright and innocent, thinks himself unjustly dealt with by God, and reproaches his friends with heaping on him unfounded criminations, with a view of ingratiating themselves with the Almighty, who, however, would visit with condign punishment such busy, meddling, officious vindicators of the divine government.

The interest of the narrative is kept up with considerable skill, by progressively rising and highly passionate language. At first, Job's friends charge him, and he defends himself, in mild

terms; but gradually they are all betrayed into warmth of temper, which goes on increasing until the friends have nothing more to object, and Job remains in possession of the field. The discussion then seems to be at an end, when a fresh disputant, Elihu, appears. Trusting in his just cause, Job had proudly opposed God, with whom he expostulated, and whom he charged with injustice, when the sense of his calamities should have led him to acknowledge the sinfulness of human nature, and humbly to submit to the divine dispensations. Making every allowance for his painful situation, and putting the mildest construction on his expressions, he is still substantially wrong, and could not therefore be suffered to remain the vanquisher in this high argument. He had silenced his friends, but the general issue remained to be settled. Elihu had waited till Job and his friends had spoken, because they were older than he; but when he saw that the three visitors ceased to answer, he offers himself to reason with Job, and shows that God is just in his ways. He does this,

1. *From the nature of inflictions.*—He begins by urging that Job was very wrong in boasting of his integrity, and making it appear that rewards were due to him from God. How righteous soever he was, he still had no claim to reward; on the contrary, all men are sinners in God's eyes; and nobody can complain that he suffers unjustly, for the very greatest sufferings equal not his immense guilt. Then Elihu explains a leading point on which he differs from the friends of Job: he asserts that from greater sufferings inflicted on a person it was not to be inferred that he had sinned more than others afflicted with a less amount of calamity. Calamities were, indeed, under all circumstances, punishments for sins committed, but at the same time they were correctives also; and therefore they might be inflicted on the comparatively most righteous in preference to others. For he who was most loved by God, was also most in danger of forgetting the sinfulness inherent in all men, and, consequently, also in himself: the rather because sin would in him less strongly manifest itself. If the object of afflictions was attained, and the distressed acknowledged his sinfulness, he would humble himself before God, who would bless him with greater happiness than he ever before enjoyed. But he who took not this view, and did not amend his ways, would be ruined, and the blame would rest wholly with himself. Consequently, if Job made the best of his misfortune, God would render him most happy; but if he continued refractory, punishment would follow his offences. According to this view, the truly righteous cannot be always miserable; and their calamities, which God not only from His justice, as the friends of Job stated, but also from His *love*, inflicts *temporarily* on them, are only the means employed to raise them to higher moral rectitude and worldly happiness. The *end* shows the distinction between the perverse sinner, and the righteous man subject to sinfulness.

2. *From a clear conception of the nature of God.*—'How darest thou,' says Elihu, 'instead of humbling thyself before God, defy Him, and offer to reason with Him? The whole creation shows forth His majesty, and evinces His justice. For a man to stand up against Him and to assert that he suffers innocently, is the greatest anthropomorphism, because it *goes* to deny the Divine majesty, evident in all the facts of the created world, and including God's justice. His nature being one and indivisible, it cannot on one side exhibit infinite perfection, and on the other imperfection: each example, then, of God's grandeur in the creation of the world is evidence against the rash accusers of God's justice. Thus it appears that, from the outset, there must have been a mistake in thy calculation, and thou must the rather acknowledge the correctness of my solution of the question. God *must be* just—this is certain from the outset; and *how* His justice is not impaired by calamities inflicted on the righteous and on thyself, I have already explained.'

Job had, in a stirring manner, several times, challenged God to decide the contest. Elihu suspects the approach of the Lord, when, towards the end of his speech, a violent thunder-storm arises, and God answers Job out of the whirlwind, showing how foolishly the latter had acted in offering to reason with Him, when His works proved his infinite Majesty, and, consequently, His absolute justice. Job now submits to God, and humbly repents of his offence. Hereupon God addresses Eliphaz, Bildad, and Zophar, declaring unto them His displeasure at their unmerciful dealing with their friend, the consequences of which could only be avoided by Job offering a propitiatory sacrifice. This is done, and the Lord grants unto Job ample compensation for his sufferings.

II. Design of the book. We here assume the integrity of the book of Job, or that it has been preserved in its genuine, unadulterated state; and we may do so the rather, because those who would eliminate single portions, must still allow the difficulty of showing in the remainder a fixed plan and leading idea, which again argues against them. Moreover, by determining the design of the book the best foundation is laid for proving its integrity. All agree that the object of the book is the solution of the question, how the afflictions of the righteous and the prosperity of the wicked can be consistent with God's justice. But it should be observed that the direct problem exclusively refers to the first point, the second being only incidentally discussed on occasion of the leading theme. If this is overlooked, the author would appear to have solved only one half of his problem: the case from which the whole discussion proceeds, has reference merely to the leading problem. There is another fundamental error which has led nearly all modern interpreters to a mistaken idea of the design of this book. Pareau (*De Immortalitatis not. in libro Jobi*, Deventer, 1807, p. 207) is the only one who saw the error adverted to, and partially combated it with success. They assume that the problem could be satisfactorily solved only when the doctrines of immortality and retribution had been first established, which had not been done by the author of the book of Job: a perfect solution of the question was therefore not to be expected from him. Some assert that his solution is erroneous, since retribution, to be expected in a future world, is transferred by him to this life; others say that he cut the knot which he could not unloose, and has been satisfied to ask for implicit submission and devotedness, showing at the same time that every attempt at a solution must lead to dangerous positions: blind resignation, therefore, was the short meaning of the lengthened discussion.

On nearer examination, however, it appears that

the doctrine of retribution after death is not of itself alone calculated to lead to a solution of the problem. In contemplating the lives of the righteous, who were perfectly embued with this doctrine, it will appear that they also struggled with doubts; that a satisfactory solution of the question is to be derived only from the fundamental doctrine on which the faith in retribution rests; and that this faith is shaken where it has not the necessary basis. The belief in a final judgment is firm and rational only when it rests on the belief in God's continued providential government of the world, and in his acting as sovereign Lord in all the events of human life. If God is holy and just, He must also have the will to manifest these qualities in our present life by His bearing towards those who represent His image on earth, as well as towards those who renounce it. If He is omnipotent, nothing can in this life prevent Him from exhibiting His justice; but if this is not manifested, and if no reason can be given for which He at times defers His judgments, the belief in retribution after death would be flimsy and shallow. Woe to him who expects in a future world to be supplied with everything he missed here, and with redress for all injuries sustained! He deceives himself. His God was, during his life on earth, inactive, shutting Himself up in heaven: is he sure that his God will hereafter be better disposed or more able to protect him? As His essence remains the same, and the nature of sin and virtue is unchanged, how should He then in a future life punish the former and reward the latter, if He does not do so in this life! Temporary injustice is still injustice, and destroys the idea of a holy and just God. A God who has something to redress is no God at all. Lucian, the satirist, composed a dialogue entitled Ζεὺς Ἐλεγχόμενος, with the view of subverting the belief in Divine Providence; in which he justly finds fault with that God, who allows the wicked to lead a happy and pleasant life in order that, at a distant time, they may be tortured according to their deserts, and who, on the contrary, exposes the righteous to infinite misery, that in remote futurity they may receive the reward of their virtue. Some men of sense among the heathens displayed deep penetration on this subject. Claudian, in the commencement of his poem against the wicked Rufinus, hints that doubts had been often entertained of Divine Providence, but that they had been now removed by the downfall of Rufinus:—

'Abstulit hunc tandem Rufini pœna tumultum
Absolvitque deos. Jam non ad culmina rerum
Injustos crevisse queror. Tolluntur in altum
Ut lapsu graviore ruant.'

This worldly retribution leads him to a firm belief in that after death. He represents Rufinus descended to the nether world, doing penance and enduring the keenest pains. See the rich collection by Barth (in his *Notes to Claudian*, 1078, s.s.) of those passages in the works of heathen writers in which doubts of future retribution are raised on the ground of disbelief in present requitals. Scripture knows nothing of a God whose power admits of increase, or who is active only in the life to come: its God is always full of strength and vigour, constantly engaged in action. God's just retribution in this world is extolled throughout the Old Testament. The notion of return accommodated to actions, is its substance and centre. It is particularly urged in the Pentateuch, and it is only when it had been deeply rooted in the public mind, and the belief in future requital had acquired a firm and solid basis, that the latter doctrine, which in the books of Moses is but dimly hinted at, is clearly and explicitly promulgated. The New Testament holds out to the righteous promises of a future life, as well as of the present; and our Saviour himself, in setting forth the rewards of those who, for His sake, forsook everything, begins with this life (Matt. xix. 29). A nearer examination of the benedictions contained in the Sermon on the Mount (Matt. v.), shows that none of them exclusively refer to future blessings; the judgment of the wicked is in His view proceeding without interruption, and therefore His examples of the distribution of Divine justice in this world, are mingled with those of requital in a future order of things. The Galileans, whose blood Pilate had mingled with their own sacrifices (Luke xiii. 1), were in Christ's opinion not accidentally killed; and he threatens those who would not repent, that they should in like manner perish. That sickness is to be considered as a punishment for sin, we are clearly taught (John v. 14; Luke v. 20, 24): in the former passage it is threatened as punishment for sins committed; in the latter it is healed in consequence of punishment remitted. Nay, every patient restored by Christ, who acted not as a superior kind of Hippocrates, but as the Saviour of men, is by that very act declared to be a sinner. The passage in John ix. 2, 3, which is often appealed to, in proof that our Lord did not consider sickness as a punishment for sin, does not prove this, but only opposes the Jewish position—founded on the mistaken doctrine of retribution—that all severe sicknesses and infirmities were consequences of crimes. But what is, from this point of view, the solution of the problem regarding the sufferings of the righteous? It rests on two positions.

1. Calamity is the only way that leads to the kingdom of God. Even the comparatively righteous are not without sin, which can be eradicated only by afflictions. *Via crucis est via salutis.* He who repents will attain to a clearer insight into the otherwise obscure ways of God. The afflictions of the pious issue at once from God's justice and love. To him who entertains a proper sense of the sinfulness of man, no calamity appears so great as not to be deserved as a punishment, or useful as a corrective.

2. Calamity, as the veiled grace of God, is with the pious never alone, but manifest proofs of Divine favour accompany or follow it. Though sunk in misery, they still are happier than the wicked, and when it has attained its object, it is terminated by the Lord. The nature of acts of grace differs according to the quality of those on whom they are conferred. The consolations offered in the Old Testament are, agreeably to the weaker judgment of its professors, derived chiefly from external circumstances; while in the New Testament they are mainly spiritual, without, however, excluding the healing external helps. This difference is not essential, nor is any other, the *restitutio in integrum* being in the Old Testament principally confined to this life, while in the New Testament the eye is directed beyond the limits of this world.

It is this exclusively correct solution of the

problem which occurs in the book of Job. All interpreters allow that it is set forth in Elihu's speeches, and, from the following observations, it will appear that they contain the opinion of the author:—1. The solution cannot be looked for in Job's speeches; for God proves himself gracious towards him only after he has repented and humbled himself. The author of the book says (i. 22; ii. 10; comp. iii. 1) that Job had charged God foolishly, and sinned with his lips; and the πρῶτον ψεῦδος, the *materia peccans*, in his speeches, is clearly pointed out to be, that 'he was righteous in his own eyes, and justified himself rather than God' (xxxii. 1, 2). To gather from Job's speeches a consistent view of the subject, and a satisfactory solution of the question mooted, is impossible also on account of the many contradictions in them; as, for instance, when he says at one time, that God's justice *never* appears in the government of the world, and at another, that it generally does appear, but that there are evident exceptions to the general rule, not liable to objections. Sound principles are mixed up by him with wrong ones; his views want sifting, and the correct ideas must be completed, which, even in his concluding address, is not done by himself, nor is it performed by his three friends. Job continues to be embarrassed for the solution, and he is only certain of this, that the solution of his friends cannot be satisfactory. Job erred chiefly in not acknowledging the sin inherent in him; notwithstanding his integrity and sincere piety, which prevented him from apprehending the object of the calamity inflicted on him, led him to consider God's punishments as arbitrary, and made him despair of the return of better days. The greatness of his sufferings was in some measure the cause of his misconception, by exciting his feelings, and preventing him from calmly considering his case. He was in the state of a man tempted, and deserving God's indulgence. He had received considerable provocation from his friends, and often endeavoured to soften his harsh assertions; which, particularly in ch. xxvii., leads him into such contradictions, as must have occurred in the life of the tempted; he is loud in acknowledging the wisdom of God (ch. xxviii.), and raises himself at times to cheering hopes (comp. ch. xix.). But this can only excuse, not justify him, and therefore it is in the highest degree honourable to him, that he remains silent, when in Elihu's speeches the correct solution of the question is given, and that he ultimately acknowledges his fundamental error of doing justice to himself only.

2. The solution of the question mooted cannot be contained in *the speeches of Job's friends*. Their demeanour is reproved by God, and represented as a great sin, so much so, indeed, that to obtain pardon for them Job was directed to offer a propitiatory sacrifice. Their error proceeded from a crude notion of sin in its external appearance; and, inferring its existence from calamity, they were thus led to condemn the afflicted Job as guilty of heinous crimes (ch. xxxii.). The moral use of sufferings was unknown to them; which evidently proved that they themselves were not yet purged and cleared from guilt. If they had been sensible of the nature of man, if they had understood *themselves*, they would, on seeing the misery of Job, have exclaimed, 'God be merciful to us sinners!' There is, indeed, an important correct principle in their speeches, whose centre it forms, so much so, that they mostly err only in the application of the general truth. It consists in the perception of the invariable connection between sin and misery, which is indelibly engrafted on the heart of man, and to which many ancient authors allude. The saying, *male parta male dilabuntur*, is to be found in every language. The problem of the book is then solved by properly uniting the correct positions of the speeches both of Job and his friends, by maintaining his *comparative* innocence, and by tracing the errors of both parties to a common source, the want of a sound insight into the nature of sin. Job considers himself righteous, and not deserving of such inflictions, because he had not committed any heinous *crime;* and his friends fancy they must assume that he was highly criminal, in order to justify his misery.

3. The solution of the question at issue is not exclusively given in *the addresses of God*, which contain only the basis of the solution, not the solution itself. In setting forth his majesty, and in showing that imputing to him injustice is repugnant to a correct conception of his nature, these addresses establish that there must be a solution which does not impair divine justice. This is not, indeed, the solution itself, but everything is thus prepared for the solution. We apprehend that God *must* be just, but it remains further to be shown *how* he can be just, and still the righteous be miserable.

Unless, then, we are disposed to question the general result, we are, by the arrangements of the book, led to the speeches of Elihu as containing the solution of the problem, which the author, moreover, has indicated with sufficient clearness by making the commencement and end of the narrative agree perfectly with those speeches. The leading principle in Elihu's statement is, that calamity in the shape of trial was inflicted even on the comparatively best men, but that God allowed a favourable turn to take place as soon as it had attained its object. Now this is the key to the events of Job's life. Though a pious and righteous man, he is tried by severe afflictions. He knows not for what purpose he is smitten, and his calamity continues; but when he learns it from the addresses of Elihu and God, and humbles himself, he is relieved from the burden which oppresses him, and ample prosperity atones for the afflictions he has sustained. Add to this, that the remaining portion of Elihu's speeches, in which he points to God's infinite majesty as including his justice, is continued in the addresses of God; that Elihu foretells God's appearance; that he is not punished by God as are the friends of Job; in fine, that Job by his very silence acknowledges the problem to have been solved by Elihu; and his silence is the more significant because Elihu had urged him to defend himself (xxxiii. 32), and because Job had repeatedly declared he would 'hold his peace,' if it was shown to him wherein he had erred (vi. 24, 25; xix. 4). This view of the book of Job has among modern authors been supported chiefly by Stäudlin (*Beiträge zur Religions und Sittenlehre*, vol. ii. p. 133) and Stickel (*Das Buch Hiob*, Leipzig, 1842), though in both it is mixed up with much erroneous matter; and it is further confirmed by the whole Old Testament giving

the same answer to the question mooted which the speeches of Elihu offer: in its concentrated form it is presented in Ps. xxxvii. xlix. lxxiii.

From these considerations it appears, that those interpreters who, with Bernstein, De Wette, and Umbreit, assume that the book of Job was of a sceptical nature, and intended to dispute the doctrine of retribution as laid down in the other books of the Old Testament, have entirely misunderstood it. The doctrine of divine retribution is here not disputed, but strengthened, as the case under consideration required that it should be. The object of the book would also be too much narrowed, if it was restricted to proving that the doctrine of retribution, as expounded by the friends of Elihu, was erroneous. The speeches of Elihu evidently oppose the discourses of Job in stronger terms than those of his friends. The object of the book is rather to explain generally the nature and tendency of afflictions, and thereby to contribute towards the attainment of their design, to console the mind, and to cheer the drooping spirits. It is difficult for men to understand that their sufferings, however great, are still under that degree which they deserve. To consider afflictions as proofs of divine favour, we must first learn to bring them into unison with divine justice. Upon the doctrine of retribution after death our author does not enter; but that he knew it, may be inferred from several passages with great probability; as, for instance, ch. xiv. 14, 'if a man die shall he live again? All the days of my appointed time will I wait, till my change come.' The *if* here shows that the writer had been before engaged in considering the subject of life after death; and when such is the case, a pious mind will necessarily indulge the hope, or will, at least, have an obscure presentiment of immortality. The truth, also, of God's unbounded grace, on which the doctrine of immortality is based, will be found clearly laid down in ch. xix.. Still the author does not recur to this hope for the purpose of solving his problem; he would not ground it on something in itself wanting support and a foundation, namely, that which is presented in this book. The doctrine of future retribution, if not sustained by the belief in retribution during this life, is truly a castle in the air. The author did not intend in his discussion to exceed the limits of what God had *clearly revealed*, and this was in his time confined to the vague notion of life continued after death, but not connected with rewards and punishments. Explicitly expressed, then, we have here only the doctrine of a Sheol (see the collection of passages, p. 123 sqq. of Pareau's work above quoted), which, indeed, is not erroneous in itself, but which still keeps the background veiled.

Having thus established the design of the book of Job, it remains to consider the view taken by Ewald. He justly rejects the common, superficial view of its design, which has recently been revived and defended by Hirzel (see his *Commentar*, Leipzig, 1839), and which represents the author as intending to show that man cannot apprehend the plans of God, and does best to submit in ignorance without repining at afflictions. The author would thus be rendered liable to the charge of having cut the knot which he could not loose. When this view was first set up, the solution of one of the most important religious problems was very unsettled, and the public mind generally remained in suspense; in accordance with which state of feeling this opinion is framed relating to the design of the book of Job. The alleged theme occurs in no passage, not even incidentally. The writers in question chiefly base it on the discourses of God; and so, latterly, does Stickel, who, although acknowledging that the solution of the problem was afforded by Elihu, still thinks that in the sentiments uttered by God the sufferer was ultimately referred to human short-sightedness and directed to be silent, the author of the book distrusting the correctness of his solution, and intending at all events to vindicate God's justice. Thus they entirely misunderstand the main point in the discourses of God, which set forth his infinite majesty with a view, not of censuring Job's inquisitiveness and of taxing him with indiscretion, but of showing that it was foolish to divest God of justice, which is inseparable from his essence. His searching is not itself blamed, but only the manner of it. Nowhere in the whole book is simple resignation crudely enjoined, and nowhere does Job say that he submits to such an injunction. The prologue represents his sufferings as trials, and the epilogue declares that the end had proved this; consequently the author was competent to give a theodicee with reference to the calamity of Job, and if such is the case he cannot have intended simply to recommend resignation. The biblical writers, when engaged on this problem, know how to justify God with reference to the afflictions of the righteous, and have no intention of evading the difficulty when they recommend resignation (see the Psalms quoted above, and, in the New Testament, the Epistle to the Hebrews, ch. xii.). The view of the book of Job alluded to would isolate it, and take it out of its natural connection. Thus far, then, we agree with Ewald, but we cannot approve of his own view of the design of the book of Job. According to his system, 'calamity is never a punishment for sins committed, but always a mere phantom, an imaginary show, above which we must raise ourselves by the consciousness of the eternal nature of the human mind, to which, by external prosperity, nothing can be added, and from which, by external misfortune, nothing can be taken away. It was (says Ewald) the merit of the book of Job to have prepared these sounder views of worldly evil and of the immortality of mind, transmitting them as fruitful buds to posterity.' Now from the outset we may be sure that this view is not to be found in our book. Credit has always been given to Scripture for knowing how to console the distressed—which Ewald's system must fail to do. Let it be offered to those who are afflicted with severe and painful illness, and it will prove abortive. Fictitious sufferings may be soothed in this manner, real pains certainly not. Consciousness of the eternal nature of our mind is wanted to do all, but how is it possible when the mind itself is depressed? Turn to the Psalms: do we find in them shadowed out this cold consolation—the doctrine of the Stoics, which has been always considered to be opposed to that of Scripture? Read especially Psalms xxxvii., xli., and lxxiii., which profess to treat our problem: take, in the New Testament, the passage in Heb. xii. 6, and you will find afflictions considered at once as punishments inflicted by divine justice, and as means which God's love employs to lead us to

higher happiness. 'Whom the Lord loveth he chasteneth, and scourgeth every one whom he receiveth.' If suffering and happiness are as nothing, and have no reality, why promises our Saviour rewards to his followers, and why threatens he the wicked with punishment (Matt. xix. 16-30)? Why blesses he the meek, 'for they shall inherit the earth' (Matt. v. 5)? Why says he, 'seek ye first the kingdom of God and his righteousness, and all these things shall be added unto you' (Matt. vi. 33)? If righteousness already possesses everything and lacks nothing, why says St. Paul, to righteousness are held out the promise both of this life and of the life to come? Being thus impressed against Ewald's view, from the Scriptures themselves, we also find, on closer inspection, that it does not apply to the book of Job. To make it appear that it does, he excludes the speeches of Elihu—which seems rather suspicious; but what he objects against them is of little importance, and has been proved by Stickel to be erroneous. Taking, however, what remains of the book, it is evident that the epilogue is decidedly contrary to Ewald's view. Why is it that Job receives the double of all that he had lost, when, judged by Ewald's principles, he had lost nothing? If in any place, it is in the epilogue that the leading idea of the author must appear; and here we have not speeches, whose drift might admit of doubt, but acts, divine acts, the solution of the question by facts. Equally irreconcilable is Ewald's view with the prologue. The opening scene is in heaven; Satan appears before God, and obtains leave to tempt Job. This enables the reader from the outset to see clearer into the case under consideration than did Job and his friends, who judged only according to what passed on earth. He suspects from the outset what will be the end of the narrative. If it is by way of temptation only that Job is subjected to misery, this cannot be lasting; but if it cannot and must not be lasting, it must be also more than an imaginary phantom—it must be reality. We might easily show further that the view referred to is also incompatible with the speeches of Job, who never renounces happiness; he is always either disconsolate and complains, or expresses cheering hopes of a return of better days; he either despairs of God's justice, or expects him to prove it at least partially by his rehabilitation. We might likewise, with little trouble, prove that the view of Ewald is not in accordance with the speeches of God, who does not address Job in exhortations to the effect, 'Be insensible of thy calamity;' but, 'Humble thyself before me; acknowledge in thy severe sufferings my justice and my love, and thy own sinfulness, and procure release by repentance.' But what we have stated on this head may be deemed sufficient.

III. Character of the composition of the Book.—On this subject there are three different opinions:—1. Some contend that the book contains an entirely true history. 2. Others assert that it is founded on a true history, which has been recast, modified, and enlarged by the author. 3. The third opinion is, that the book contains a narrative entirely imaginary, and constructed by the author to teach a great moral truth.

The first view, taken by numerous ancient interpreters, is now abandoned by nearly all interpreters. It seems, however, to have been adopted by Josephus, for he places Job in the list of the historical books; and it was prevalent with all the fathers of the church. In its support four reasons are adduced, of which the third and fourth are quite untenable; the first and second are outweighed by other considerations, which render it impossible to consider the book of Job as an entirely true history, but which may be used in defence of the second view alluded to. It is said, 1. That Job is (Ezek. xiv. 14-20) mentioned as a public character, together with Noah and Daniel, and represented as an example of piety. 2. In the Epistle of James (v. 11), patience in sufferings is recommended by a reference to Job. 3. In the Greek translation of the Septuagint a notice is appended to Gen. xxxvi. 33, which states that Job was the King Jobab of Edom. This statement is too late to be relied on, and originates in an etymological combination; and that it must be erroneous is to a certain extent evident from the contents of the book, in which Job is not represented as a king. 4. Job's tomb continues to be shown to Oriental tourists. Now the fact of a Job having lived somewhere would not of itself prove that the hero of our narrative was that person, and that this book contained a purely historical account. Moreover, his tomb is shown not in one place, but in six, and, along with it, the dunghill on which Job is reported to have sat!

Against this view it must be remarked generally, that the whole work is arranged on a well-considered plan, proving the author's power of independent invention; that the speeches are, in their general structure and in their details, so elaborate, that they could not have been brought out in the ordinary course of a conversation or disputation; that it would be unnatural to suppose Job in his distressed state to have delivered such speeches, finished with the utmost care; and that they exhibit uniformity in their design, fulness, propriety, and colouring, though the author, with considerable skill, represents each speaker whom he introduces arguing according to his character. Moreover, in the prologue and epilogue, as well as in the arrangement of the speeches, the figures 3 and 7 constantly occur, with the decimal number formed by their addition. The transactions between God and Satan in the prologue absolutely require that we should distinguish between the subject matter forming the foundation of the work, and its enlargement; which can be only done when a poetical principle is acknowledged in its composition. God's speaking out of the clouds would be a miracle, without an object corresponding to its magnitude, and having a merely personal reference, while all the other miracles of the Old Testament are in connection with the theocratical government, and occur in the midst and for the benefit of the people of God. This argument, which might be further extended without much difficulty, proves the first view above stated of the book of Job to be erroneous, and is meant to support the second; but it does not bear on the third, which contends that the narrative is an entire fiction, without any admixture of real facts. The latter opinion is, indeed, already stated in the Talmud, which says that Job never existed; and in modern times it has been defended chiefly by Bernstein; but is contrary to the practice which anciently prevailed, when writers rarely invented the subject of a narrative, and rather took the materials furnished by

tradition, digesting, enlarging, and modifying them, so as to make them harmonize with the leading theme. Taking the second view, we must still abstain from undertaking to determine what the poet derived from tradition and what he added himself, since we know not how far tradition had already embellished the original fact. The separation of the historical groundwork from the poetical embellishments could only succeed, if the same history had been, although in a poetical dress, transmitted to us by several narrators. Would any person, if he was not assisted by other authorities, undertake to determine what is history, and what is fiction, in an historical romance of Walter Scott, or in an historical drama of Shakspeare or Schiller? Ewald, indeed, had the courage to undertake vindicating for history certain parts of our narrative, but his efforts were abortive, as we shall presently show. It will appear, indeed, that exactly those particulars which Ewald considers historical may possibly have been invented, though we do not contend that they really were so, which would be equally presumptuous. He asserts, 1. That 'the name Job is not invented by the author of our book.' This would have some semblance of truth, if the name had no meaning connecting it with the contents of the narrative. But Job means in Hebrew 'the assailed,' and may be traced in the form of ילוד, *born*, or שכור, *intoxicated*, from איב, *to attack;* whence also אויב, *the enemy*, and איבה, *enmity*, are derived. Ewald observes, indeed, that the import of the word is not very apparent, and is not easily discoverable; but when it strikes us at once, must it not have much more readily occurred to Hebrew readers? The sense in which the hero of the book is called 'the assailed,' appears at once in the prologue, where Satan obtains leave to tempt him. 2. 'The names of the friends of Job are historical.' As to the name Eliphaz, it occurs in Gen. xxxvi. 4, 10, 12, and seems to be taken from thence. Adopting names in this manner amounts to inventing them. 3. 'It is a fact that Job lived in the land of Uz, which, in Hebrew history, is distinguished, neither in itself nor its inhabitants, and it is difficult to understand why the author selected this country, if he was not led to it by history.' We shall see below that the plan of the author required him to lay the scene without Palestine, but still in its immediate neighbourhood; which led him to Uz, a country already mentioned in Genesis. This observation applies also to the place of abode of Job's friends, which could not be Canaan, but must be in its vicinity; wherefore the country named in the book is assigned to them. 4. 'The sickness of Job is an historical fact; he was afflicted with elephantiasis, and it is inconceivable why the author chose this disease, which is of rare occurrence, if he had not drawn this particular fact from real history.' Now the reason of this selection was, that elephantiasis is a most awful disease, and that the author probably knew none more so; and persons labouring under elephantiasis were generally considered as smitten by God (Deut. xxiv. 8, 9) [Job's Disease].

These are all the particulars which Ewald points out as historical, and from our examination of them it will be clear, that we must confine ourselves to contending for an historical foundation of the book, but must not undertake to determine the exact nature of the groundwork: we infer the character of the composition from analogy, but cannot prove it from the book itself. That its historical framework was poetically enlarged by the author, has been already observed by Luther (see his *Tischreden*, or *Table Talk*, p. 318). As for the rest, the subtility displayed in explaining opposite views, the carefully drawn characters of the persons introduced, and their animated discourses, lead us to suppose that the question at issue had *previously* been the subject of various discussions in presence of the author, who, perhaps, took part in them. Thus there would be an historical foundation, not only for the facts related in the book, but to a certain extent also for the speeches.

IV. Descent, country, and age of the author.—Opinions differed in ancient times as to *the nation* to which the author belonged; some considering him to have been an Arab, others an Israelite; but the latter supposition is undoubtedly preferable. For, 1st, we find in our book many ideas of genuine Israelite growth: the creation of the world is described, in accordance with the prevailing notions of the Israelites, as the immediate effect of divine omnipotence; man is formed of clay; the spirit of man is God's breath; God employs the angels for the performance of his orders; Satan, the enemy of the chosen children of God, is his instrument for tempting them; men are weak and sinful; nobody is pure in the sight of God; moral corruption is propagated. There is promulgated to men the law of God, which they must not infringe, and the transgressions of which are visited on offenders with punishments. Moreover, the nether world, or Sheol, is depicted in hues entirely Hebrew. To these particulars might, without much trouble, be added many more; but the deep-searching inquirer will particularly weigh, 2ndly, the fact, that the book displays a strength and fervour of religious faith, such as could only be expected within the domain of revelation. Monotheism, if the assertions of ancient Arabian authors may be trusted, prevailed, indeed, for a long period among the Arabs; and it held its ground at least among a portion of the nation till the age of Mohammed, who obtained for it a complete triumph over polytheism, which was spreading from Syria. Still the god of the Arabs was, as those of the heathens generally were, a retired god, dwelling far apart, while the people of the Old Covenant enjoyed the privilege of a vital communion with God; and the warmth with which our author enters into this view, incontrovertibly proves that he was an Israelite. 3dly. As regards the language of our book, several ancient writers asserted that it was originally written in the Aramæan or Arabic tongue, and afterwards translated into Hebrew by Moses, David, Solomon, or some unknown writer. Of this opinion was the author of the Appendix in the Septuagint, and the compiler of the tract on Job added to the works of Origen and Jerome: in modern times it has been chiefly defended by Spanheim, in his *Historia Jobi*. But for a translation there is too much propriety and precision in the use of words and phrases; the sentences are too compact, and free from redundant expressions and members; and too much care is bestowed on their harmony and easy flow. The parallelism also is too accurate and perfect for a translation,

and the whole breathes a freshness that could be expected from an original work only.

Sensible of the weight of this argument, others, as Eichhorn, took a medium course, and assumed that the author was a Hebrew, though he did not live among his countrymen, but in Arabia. 'The earlier Hebrew history,' they say, 'is unknown to the author, who is ignorant of Abraham, Isaac, and Jacob. In portraying nature, also, he proves himself always familiar with Arabia, while he is silent respecting the characteristics of Palestine. With Egypt he must have been well acquainted; which can be accounted for better by supposing him to have lived in Arabia than in Palestine.' These reasons are, however, not cogent. The cause why the author did not enter into the history of the Hebrews, and the nature of Palestine, appears from his design. In deciding the question at issue he waves the instruction given by divine revelation, and undertakes to perform the task by appealing only to religious consciousness and experience. On the plan of the author of Ecclesiastes, he treats the question as one of natural theology, in order that the human mind might arrive at its solution spontaneously, and be more deeply impressed. He would not, by referring to a few passages of Scripture, overturn errors which might afterwards spring up again; but they should be exposed and demolished separately, and the truth then be found by uniting the correct ingredients of opposite views. In following this plan the author intended to support Scripture: in a similar manner Pascal, in his *Pensées*, explains the nature ot man first from experience only, and next from Scripture. This plan is indicated by the scene being laid not in Palestine, but among a people quite unconnected with its inhabitants; at the same time he will not go farther than his object required, and he therefore chooses *the immediate* neighbourhood of Palestine. Thus the placing of the scene in a foreign country is not historical, but proceeds from the free choice of the author. The scene being laid in a foreign country, the portraying of life and nature must of course agree with that country, and not with Palestine (see ch. xl. 23). It may no doubt be said, that the remarkable vigour and sprightliness of the author's descriptions of the scenery and people, justify us in assuming that he was actually acquainted with them; but this cannot be asserted as quite certain, since it would impair the high idea entertained of the powers of poetry. The correctness of this view is eminently strengthened by the manner in which the author designedly uses the names of God. The Old Testament distinguishes between Elohim, the abstract God, the Deity, on the one hand, and Jehovah, the concrete God, with whom the Israelites had made a covenant, on the other (Gen. vi. 3, 4). Now the latter name occurs in Job generally, where the author himself appears, not only in the prologue and epilogue, but in the short sentences introducing the speakers, as in xxxviii. 1; xl. 1, 3, 6. In the body of the work, however, we have only the names Elohim, Eloah, and similar terms, with the exception of xii. 9, where Jehovah occurs. This very passage argues against those who, from the distinct names of God, would infer that the prologue and epilogue are not genuine. Eichhorn (see *Einleitung*, § 644, a.) assumes that the author had, by his particular use of the names of God, intended to represent himself as younger than the other interlocutors; but the notion of the name Jehovah having come later into general use, is contrary to history, and we must then arrive at this result, that the author by his selection of the names of God, which he lends to the interlocutors, intended to express his design of waving all theocratic principles. The few passages in which he seems to abandon this design, namely, in addition to that quoted, ch. i. 21, where Job, in speaking of God, uses the name Jehovah, make it appear even clearer. By thus forgetting himself, he betrays the fact that his general use of the names of God proceeds from designedly forsaking the usage of the language. The context, moreover, of the two passages in which he *seems* to forget himself and uses the name Jehovah, proves that this change is judiciously made, the deep and awful sense of his subject prompting him to an elevated, solemn style, to which the name Eloah was not suitable. And if there is design in the selection of the names of God, why not also in the selection of the country in which the scene is laid? This may be assumed the rather, because history says nothing of Israelites having permanently taken up their residence in the land of Uz, and because other circumstances already detailed oblige us to admit that the author was not only an Israelite by descent, but lived also in the midst of his people, and enjoyed the advantage of a religious communion with them. It should also be remembered, that the author, without directly mentioning the Pentateuch, frequently alludes to portions of it, as in ch. iii. 4, to Gen. i. 3; in ch. iv. 19, and xxxiii. 6, to Moses' account of the creation of man; in ch. v. 14, to Deut. xxxii. 32; in ch. xxiv. 11, to Deut. xxv. 4. That the name of Eliphaz the Temanite, one of the three friends of Job, seems also to have been taken from the Pentateuch, was mentioned above. In addition to these allusions there are several more to other books of the Old Testament, as the Psalms and Proverbs—which proves that the author must not be severed from the Israelite communion. From what we have stated against the hypothesis that our book was composed in Arabia, a judgment may be formed of the opinion of Hitzig and Hirzel, who assume that it was written in Egypt; the sole foundation for which is, that the author shows himself perfectly acquainted with that country, which proves him to have been a long observer of it. Most particulars adduced in support of this view cannot stand a close examination. Thus it is a mistake to suppose that the description of the working of mines in ch. xxviii. must necessarily have reference to Egypt: Phœnicia, Arabia, and Edom afforded much better materials. That the author must have known the Egyptian mausolea rests on an erroneous interpretation of ch. iii. 14, which may also be said of the assertion that ch. xxix. 18 refers to the Egyptian mythus of the Phœnix. Casting aside these arbitrarily assumed Egyptian references, we have only the following:—Our author knows the Egyptian vessels of bulrushes, ix. 26; the Nile-grass, viii. 12; the Nile-horse (Behemoth), and the crocodile (Leviathan), xi. 15, xli. 1. Now, as these things belong to the more prominent peculiarities of a neighbouring country, they must have been known to every educated Israelite: the vessels of bulrushes are mentioned also in Isa. xviii. 2. Neither are

we disposed to adopt the compromising view of Stickel, who assumes that the author wrote his book in the Israelite territory, indeed, but close to the frontier, in the far south-east of Palestine. That the author had there the materials for his descriptions, comparisons, and imagery, set better before his eyes, than anywhere else, is true; for there he had an opportunity of observing mines, caravans, drying up of brooks, &c. But this is not sufficient proof of the author having lived permanently in that remote part of Palestine, and of having there written his book: he was not a mere copyist of nature, but a poet of considerable eminence, endowed with the power of vividly representing things absent from him. That he lived and wrote in the midst of his nation, is proved by all analogy and by the general character of the book. It looks not like a writing composed in some remote corner of the world, where the question at issue could not have been so fully discussed, nor have created such a deep interest. Jerusalem was the metropolis of the Jews in a sense quite different from that which belongs to any other capital: it was, by order of God, the religious centre of the nation, where all general and leading measures of the nation originated, and to which all pretending to distinction and superiority resorted.

Proceeding to the inquiry as to *the age* of the author of this book, we meet with three opinions:—1. That he lived before Moses, or was, at least, his contemporary. 2. That he lived in the time of Solomon, or in the centuries next following. 3. That he lived shortly before, or during, or even after the Babylonian exile. The view of those who assert the book to have been written long after the Babylonian exile, can be supported, as Hirzel justly observes, neither by the nature of its language nor by reasons derived from its historical groundwork, and is therefore now generally rejected; but, apart from this opinion, there is, in those remaining, a difference as to the date of no less than 1000 years.

We must, first, declare ourselves decidedly against the view of those who—as Le Clerc among earlier interpreters; and among recent expositors, Bernstein, Gesenius, Umbreit, and De Wette—place our book in the time of the Chaldæan exile. They were led to this conclusion by their preconceived opinion that the doctrine of Satan, who is introduced in the prologue, was of Chaldæan origin; which has also induced others, while contending for a higher antiquity of the book, to pronounce the prologue, at least the scene in ch. i. 6-12, to be spurious; or losing sight of the poetical character of the prologue as well as of the speeches, to assert that the Satan of this book was different from the Satan of later times; or finally, to assume with Stickel, that the author had lived in a place where he could be impressed with Babylonian opinions before they had spread among the great body of his nation. But the assertion, that the doctrine of Satan originated among the Jews during the Babylonian exile, and was derived generally from Babylonian suggestions, has been shown by several interpreters to be erroneous, and very recently, by Hengstenberg (*Ægypten und die Bücher Mosis*, p. 164, sq.). This opinion was, however, suited to and supported by those who, headed by Bernstein, asserted that Job was a symbolic personage—a personification of the Jews suffering in the Exile—and who thus gave to our book a national reference and meaning; in like manner as some had before introduced a preposterous system of interpreting psalms containing personal lamentations, by converting them into national lamentations, and applying to them the principle of symbolization. Now, in the book of Job there is certainly no trace of national reference; and it would be absurd to assume an allegory running through an entire work, and still nowhere manifesting its presence. It is said by other interpreters, that, in the times of trouble, during the Babylonian exile, first originated the disheartening view of human life, and that then the problem of our book first engrossed the public mind; by which observation they, by way of compromise, refer its composition to that period, without contending for a symbolic exposition. But the sense of misery and of the nothingness of human life, is found among all nations, ancient and modern, cultivated and uncultivated: Noah, Jacob, Moses, complain, and as old as suffering must be the question of the seeming disparity in the distribution of good and evil, and how this disparity can be reconciled with God's justice. It is frequently under consideration in the Psalms.

Against those who refer the composition of Job to the time of the Babylonian exile, militate, first, the references to it in the Old Testament, which prove that it was before this period a generally known writing. Thus, in Ezek. xiv. 14-20, are mentioned 'three men, Noah, Daniel, and Job,' as examples of righteousness. Mr. Bernstein, indeed, in defending his hypothesis, rejects this passage as spurious, but it bears every mark of genuineness. Further, in Jeremiah xx. 14, we find evidently imitated Job's cursing of the day of his birth (ch. iii.). Not only the sentiments but the words are often the same; and that this coincidence is not accidental, or that the author did not imitate Jeremiah, appears from the literary character of each. Jeremiah shows himself throughout dependent on ancient writings, whereas our author is quite original and independent, as proved by Küper (see *Jeremias librorum sacrorum interpres atque vindex*, p. 164, sq.). There are also in the *Lamentations* of Jeremiah, many passages clearly alluding to our book, which must have eminently suited his taste and interested him (comp. xvi. 13 with Lam. ii. 16; and xix. 8, with Lam. iii. 7, 9). In *Isaiah* the peculiar use of נִבְאָ (xl. 2) refers us to Job i. (comp. x. 17; xiv. 14); and *the double* received from God's hand alludes to the end of the history of Job, who is there considered as typifying the future fate of the church. Isaiah lxi. 7. 'In their land they shall have the double,' alludes to the same point; ch. li. 9 depends on Job xxvi. 13; and ch. xix. 5, almost literally agrees with Job xiv. 11 (see Küper, p. 166). Another example of words borrowed from Job occurs in Psalm cvii. 42, where the second part of the verse agrees literally with Job v. 16. 2. A most decisive reason against assigning the composition of Job to the period of the Exile is derived from the language, since it is free from *those* Chaldaisms which occur in the books written about that time. Eichhorn justly observes, 'Let him who is fit for such researches, only read, first, a writing, tainted with Aramæisms, and next the book of Job: they will be found diverging as east and west.' There is no example of an independent, original work,

composed in pure language, after the Exile. Zechariah indeed, though writing after the Exile, has few Chaldaisms; but a closer inspection shows that this case is not analogous to that of our book. The comparative purity of Zechariah's language can be accounted for by his constant occupation with the sacred writings of the period before the Exile, on which he proves himself entirely dependent. 3. Equally conclusive is the poetical character of the book. The Exile might produce a soft, moving poem, but could not give birth to such a rich, compact, animated, and warm composition as ours, breathing youthful freshness throughout. Ewald, in acknowledging this, says justly, 'The high skill displayed in this book cannot be well expected from later centuries, when poetry had by degrees generally declined, and particularly in the higher art required by large compositions; and language so concise and expressive as that of our author, is not found in writings of later times.'

To the view which places the age of the book of Job in the time of the Babylonian exile, is most opposed that which assigns the composition of it to a period prior to Moses. In support of this latter view, only two arguments having a semblance of force can be adduced, and they will not bear the test of strict inquiry. It is said, 1. 'There is in the book of Job no direct reference to the Mosaic legislation; and its descriptions and other statements are suited to the period of the patriarchs; as, for instance, the great authority held by old men, the high age of Job, and fathers offering sacrifices for their families—which leads to the supposition that when our book was written no sacerdotal order yet existed.' These points, however, are quite intelligible, if the design of the book, as stated above, is kept in view. The author intended not to rest the decision of the question at issue on particular passages of Scripture, but on religious consciousness and experience. This at once explains why he places the scene without Palestine, why he places it in the patriarchal age, and why he avoids the use of the name Jehovah; of these three items *the first* sufficiently accounts for no reference being made to the Mosaic legislation. It is indeed said, that for an author of a later period, who undertook to portray earlier times, it would hardly have been possible to perform his task, without occasionally forgetting his roll. But it is not easy to determine what, in such a case, is possible. What might be expected from our author in this respect may be inferred from his skill in the intentional use of the names of God —from the steadiness with which, among foreign scenery, he proceeds to develop his subject—from the able disposition of the speeches, and the nicely drawing of the characters of the interlocutors, who are always represented speaking and acting in conformity with the part assigned to them. In the proper execution of his work he may have been assisted by witnessing abroad the patriarchal life of nomades, which, in its essential features, is always the same. This supposition is rendered in some degree probable, from the descriptions of Arabia being exactly agreeable to its natural condition, and being even more specific than those of Egypt, though Hirzel is pleased to select the latter country, in determining where the author of our book lived and composed it. 2. 'The language of the book of Job seems strongly to support the opinion of its having been written before Moses.' It has been often said, that no writing of the Old Testament may be more frequently illustrated from the Arabic than this book. Jerome observes (*Præfat. in Dan.*), 'Jobum cum Arabica lingua plurimam habere societatem;' and Schultens proved this so incontrovertibly that Gesenius was rather too late in denying the fact (see his *Geschichte der Hebräischen Sprache*, p. 33). Now, from this character of its language we might be induced to infer, that the work was written in the remotest times, when the separation of the dialects had only begun, but had not yet been completed. This inference would, however, be safe only if the book were written in prose. It is solely from works of this class, that the general usage of the language prevailing at the time of the author can be seen. On the contrary, the selection of obsolete and rare words and forms, with the Hebrews, was a peculiar feature of the poetical style, and served to distinguish it from the usual, habitual way of writing. This peculiarity belongs to our book more than to any other; which may be explained from its elevated character and general plan; it rises above commonplace ideas more than any other Hebrew writing, and the plan of the author made it incumbent on him to impress on the language, as much as possible, an antique and foreign character.

The most complete statement of the reasons in support of the opinion that the book of Job was written after the age of Moses, may be found in Richter's essay, *De Ætate Jobi definienda*, reprinted in Rosenmüller's edition of Lowth's *Prælectiones De Poesi Sacra Hebræorum:* in which he maintains that it was written in the age of Solomon. Most of these reasons, indeed, are either not conclusive at all, or not quite cogent. Thus it is an arbitrary assumption, proved by modern researches to be erroneous, that the art of writing was unknown previous to the age of Moses. The assertion too, that the marks of cultivation and refinement observable in our book belonged to a later age, rests on no historical ground. Further, it cannot be said, that for such an early time the language is too smooth and neat, since in no Semitic dialect is it possible to trace a progressive improvement. The evident correspondence also between our book and the Proverbs and Psalms is not a point proving with resistless force that they were all written at the same time. It is, indeed, sometimes of such a kind, that the authors of the Proverbs and Psalms cannot be exactly said to have copied our book; but it may be accounted for by their all belonging to the same class of writings, by the very great uniformity and accordance of religious conceptions and sentiments expressed in the Old Testament, and by the stability of its religious character.

Still the argument derived from the correspondence between our book and the Psalms is not devoid of force; for the accordance of ideas, sentiments, and colouring in them is such that the circumstances referred to cannot be considered as completely accounting for it. There are passages in which the author of our book clearly alludes to the Psalms and Proverbs. A striking example of this kind occurs in Ps. xxxix. 13. All the words of this verse, which, as they conclude the psalm, may have been deeply impressed on the

public mind, are again found in various passages of the book of Job, whose author must have been acquainted with that psalm (comp. ch. vii. 19; xiv. 6; x. 20, 21; vii. 8, 21, in the Hebrew Bible). The whole psalm is a text-book for the speeches of Job. The argument, also, derived from the skilful plan of our book and its able exposition, must be allowed its weight in deciding that its composition is not to be assigned to an age prior to Moses; though we must not forget that what to us appears to be art, because it is done according to established rules, may also be the product of a creative genius. But a conclusive argument against assigning so early a date to the composition of our book is its reflecting and inquiring character. A didactic poem could never have been written in the time of the patriarchs; but our book presents a strong contrast to those immature conceptions and those statements which strike the senses but do not appeal to reason, which are of so frequent occurrence in Genesis. The notion which our author entertains of God, of his omnipotence and omnipresence, is undoubtedly more refined than that presented in the books of Moses. In addition to this it should be observed, that from many indications the problem treated in our book was at the time of its composition frequently discussed and variously solved. We have observed, indeed, above, that it is as old as the cause which originated it; but it must be allowed that the Mosaic revelation, with its leading doctrine concerning retribution, was calculated to direct the attention more forcibly towards it than had been previously the case, and thus to induce God, through an instrument appointed by him, to promulgate the true solution. There are, moreover, indirect allusions to the Pentateuch, as stated above.

Summing up the whole of our investigations, we take it to be a settled point that the book of Job does not belong to the time of the Babylonian exile; and it is nearly equally certain that it was not composed prior to the time of Moses. Could it then have been written in some age preceding Samuel and David? It is only with them that a new period of sacred literature began; and our book is related to products of that period, or enlarges on them. But it cannot have been composed later than Isaiah, who alludes to it. Thus we come to this general determination of the age of our book, that it was written, *not before* Samuel and David, but *not later* than the era of Isaiah. With this result we must rest satisfied, unless we would go beyond the indications presented. The intermediate period offers no ground on which we can safely fix the composition of the book of Job. There remains then uncertainty, but it does not concern an important point of religion. The significancy of our book for the church rests on the evidence of our Lord and his apostles in support of the inspiration of the whole collection of the Old Testament, and on the confirmation which this external evidence has at all times received, and continues to receive, from the internal testimony, among the true believers of all ages.—E. W. H.

[There is perhaps no single book of Scripture of which so many versions and commentaries have been published as on that of Job, or respecting which a greater number of treatises and dissertations have been written. The following are only the principal examples:—Mercer, *Comment. in Jobum*, 1573; Drusius, *Nova Versio et Scholia in Jobum*, 1636; Abbott's *Paraphrase of the Book of Job*, 1640; Spanheim, *Historia Jobi*, 1672; Schmid, *Comment. in Librum Jobi*, 1670; Caryl's *Exposition of the Book of Job*, 1669; Leigh's *Annotations on Job*, 1656; Wesley, *Dissertatt. in Jobum*, 1736; Costard, *Observations on the Book of Job*, 1742; Schultens, *Liber Jobi*, 1737; Chappelow's *Commentary on Job*, 1752; Heath's *Essay on the Book of Job*, 1756; Scott's *Book of Job in English Verse*, 1773; Reiske, *Conjecturæ in Jobum*, 1779; Dathe *in Jobum*, 1789; Garden's *Improved Version of the Book of Job*, 1796; Eichhorn, *Das Buch Hiob*, 1800; Gaab, *Das Buch Hiob*, 1809; Eliza Smith's *Book of Job*, 1810; Good's *Book of Job*, 1812; Bridel, *Le Livre de Job*, 1818; Umbreit, *Das Buch Hiob*, 1824 (translated in the *Bibl. Cabinet*, vols. xvi., xix.); Fry's *New Translation and Exposition*, 1827; Lange, *Das Buch Hiob*, 1831; Knobel, *De Carminis Jobi*, 1835; Ewald, *Das Buch Hiob erklärt*, 1836; Fackens, *Comment. de Jobeide*, 1836; Lee's *Book of Job*, 1837; Wemyss, *Job and his Times*, 1839.]

JOB'S DISEASE. The opinion that the malady under which Job suffered was elephantiasis, or black leprosy, is so ancient, that it is found, according to Origen's *Hexapla*, in the rendering which one of the Greek versions has made of ch. ii. 7. It was also entertained by Abulfeda (*Hist. Anteisl.* p. 26); and, in modern times, by the best scholars generally. The passages which are considered to indicate this disease are found in the description of his skin burning from head to foot, so that he took a potsherd to scrape himself (ii. 7, 8); in its being covered with putrefaction and crusts of earth, and being at one time stiff and hard, while at another it cracked and discharged fluid (vii. 5); in the offensive breath which drove away the kindness of attendants (xix. 17); in the restless nights, which were either sleepless or scared with frightful dreams (vii. 13, 14; xxx. 17); in general emaciation (xvi. 8); and in so intense a loathing of the burden of life, that strangling and death were preferable to it (vii. 15).

In this picture of Job's sufferings, the state of the skin is not so distinctly described as to enable us to identify the disease with elephantiasis in a rigorous sense. The difficulty is also increased by the fact that שְׁחִין *shechin* is generally rendered 'boils.' But that word, according to its radical sense, only means *burning, inflammation*—a hot sense of pain, which, although it attends boils and abscesses, is common to other cutaneous irritations. Moreover, the fact that Job scraped himself with a potsherd is irreconcilable with the notion that his body was covered with boils or open sores, but agrees very well with the thickened state of the skin which characterizes this disease.

In this, as in most other Biblical diseases, there is too little distinct description of symptoms to enable us to determine the precise malady intended. But the general character of the complaint under which Job suffered, bears a greater resemblance to elephantiasis than to any other disease [Leprosy].—W. A. N.

JOCHEBED (יוֹכֶבֶד, *God-glorified;* Sept. Ἰωχαβέδ), wife of Amram and mother of Miriam,

Moses and Aaron. In Exod. vi. 20, Jochebed is expressly declared to have been the sister of Amram's father, and consequently the aunt of her husband. As marriage between persons thus related was afterwards forbidden by the law (Lev. xviii. 12), various attempts have been made to show that the relationship was more distant than the text in its literal meaning indicates. We see no necessity for this. The mere mention of the relationship implies that there was something remarkable in the case; but if we show that nothing is remarkable, we do away the occasion for the relationship being at all noticed. The fact seems to be, that where this marriage was contracted, there was no law forbidding such alliances, but they must in any case have been unusual, although not forbidden; and this, with the writer's knowledge that they were subsequently interdicted, sufficiently accounts for this one being so pointedly mentioned. The candour of the historian in declaring himself to be sprung from a marriage, afterwards forbidden by the law, delivered through himself, deserves especial notice.

JOEL (יוֹאֵל; Sept. Ἰωήλ; Gesenius, *Cui Jehova est Deus*, i. e. *cultor Jehovæ*), one of the twelve minor prophets, the son of Pethuel. Of his birth-place nothing is known with certainty; the pseudo-Epiphanius affirms that he was a native of Betha, in the tribe of Reuben (*De Vit. Proph.* c. 14). From the local allusions in his prophecy, we may infer that he discharged his office in the kingdom of Judah. But the references to the temple, its priests and sacrifices, are rather slender grounds for conjecturing that he belonged to the sacerdotal order. Various opinions have been held respecting the period in which he lived. It appears most probable that he was contemporary with Amos and Isaiah, and delivered his predictions in the reign of Uzziah, between 800 and 780 B.C. This is the opinion maintained by Abarbanel, Vitringa, Rosenmüller, De Wette, Holzhausen, and others. Credner and Winer place him in the time of Joash; Bertholdt, in that of Hezekiah; Cramer and Eckevniaun, in Josiah's reign; Jahn in Manasseh's; and Schröder still later.

This prophet opens his commission by announcing an extraordinary plague of locusts, accompanied with extreme drought, which he depicts in a strain of animated and sublime poetry under the image of an invading army. The fidelity of his highly-wrought description is corroborated and illustrated by the testimonies of Shaw, Volney, Forbes, and other eminent travellers, who have been eye-witnesses of the ravages committed by this most terrible of the insect tribe. Their accounts tend strongly, we think, to free the literal interpretation from the charge of being 'the greatest exaggeration.' It is also to be observed that locusts are named by Moses as instruments of the divine justice (Deut. xxviii. 38, 39), and by Solomon in his prayer at the dedication of the temple (1 Kings viii. 37). In the second chapter, the formidable aspect of the locusts—their rapid progress—their sweeping devastation—the awful murmur of their countless throngs—their instinctive marshalling—the irresistible perseverance with which they make their way over every obstacle and through every aperture—are delineated with the utmost graphic force. Dr. Hengstenberg calls in question the mention of their flight, but, as it appears to us, without adequate reason. He considers the expression 'before them,' in ch. ii., as equivalent to 'before they rise:' but in the third verse the same word (לפניו) occurs twice, evidently in the sense of 'in the presence of,' 'in their front.' The eminent critic just named lays great stress on the alleged omission of this particular, which he considers inexplicable, unless on the supposition that the reality presented nothing corresponding to it. But whether this characteristic be alluded to or not, the argument for or against the literal interpretation will not be materially affected. Other particulars are mentioned which literally can apply only to locusts, and which, on the supposition that the language is allegorical, are explicable only as being accessory traits for filling up the picture (Davison's *Sacred Hermeneutics*, p. 310). The figurative interpretation has, it must be allowed, the support of antiquity. It was adopted by the Chaldee paraphrast, Ephrem the Syrian (A.D. 350), and the Jews in the time of Jerome (A.D. 400). Ephrem supposes that by the four different denominations of the locusts were intended Tiglath-pileser, Shalmanaser, Sennacherib, and Nebuchadnezzar. The Jews, in the time of Jerome, understood by the first term the Assyrians and Chaldeans; by the second, the Medes and Persians; by the third, Alexander the Great and his successors; and by the fourth, the Romans. By others, however, the prophecy was interpreted literally; and Jerome himself appears to have fluctuated between the two opinions, though more inclined to the allegorical view. Grotius applies the description to the invasions by Pul and Shalmaneser. Holzhausen attempts to unite both modes of interpretation, and applies the language literally to the locusts, and metaphorically to the Assyrians. It is singular, however, that, if a hostile invasion be intended, not the least hint is given of personal injury sustained by the inhabitants; the immediate effects are confined entirely to the vegetable productions and the cattle. Dr. Hengstenberg, while strongly averse from the literal sense, is not disposed to limit the metaphorical meaning to any one event or class of invaders. 'The enemy,' he remarks, 'are designated only as *north countries*. From the north, however, from Syria, all the principal invasions of Palestine proceeded. We have therefore no reason to think exclusively of any one of them. Nor ought we to limit the prophecy to the people of the old covenant. Throughout all centuries there is but one church of God existing in unbroken connection. That this church, during the first period of its existence, was concentrated in a land into which hostile irruptions were made from the north was purely accidental. To make this circumstance the boundary-stone of the fulfilment of prophecy were just as absurd as if one were to assert that the threatening of Amos, "by the sword shall all sinners of my people die," has not been fulfilled in those who perished after another manner' (*Christology*, Keith's transl. iii. 104).

The prophet, after describing the approaching judgments, calls on his countrymen to repent, assuring them of the divine placability and readiness to forgive (ii. 12-17). He foretels the restoration of the land to its former fertility, and declares that Jehovah would still be their God

(ii. 18-26). He then announces the spiritual blessings which would be poured forth in the Messianic age (iii. 1-5, Heb. text; ii. 28-32, Auth. Vers.). This remarkable prediction is applied by the Apostle Peter to the events that transpired on the day of Pentecost (Acts ii. 16-21). In the last chapter (iv. Heb. text; iii. Auth. Vers.), the divine vengeance is denounced against the enemies and oppressors of the chosen people, of whom the Phœnicians, Egyptians, and Edomites are especially named. A minute examination of these predictions would exceed our limits; we must refer the reader for further information to the works named at the close of this article.

The style of Joel, it has been remarked, unites the strength of Micah with the tenderness of Jeremiah. In vividness of description he rivals Nahum, and in sublimity and majesty is scarcely inferior to Isaiah and Habakkuk. 'Imprimis est elegans, clarus, fusus, fluensque; valde etiam sublimis acer, fervidus' (Lowth, *De Sacra Poesi Hebr.* Præl. xxi.).

The canonicity of this book has never been called in question.

JOHANAN (יוֹחָנָן, *God-bestowed;* Sept. Ἰωνάν), one of the officers who came and recognised Gedaliah as governor of Judæa after the destruction of Jerusalem, and who appears to have been the chief in authority and influence among them. He penetrated the designs of Ishmael against the governor, whom he endeavoured, without success, to put upon his guard. When Ishmael had accomplished his design by the murder of Gedaliah, and was carrying away the principal persons at the seat of government as captives to the Ammonites, Johanan pursued him, and released them. Being fearful, however, that the Chaldæans might misunderstand the affair, and make him and those who were with him responsible for it, he resolved to withdraw for safety into Egypt, with the principal persons of the remnant left in the land. Jeremiah remonstrated against this decision; but Johanan would not be moved, and even constrained the prophet himself to go with them. They proceeded to Taphanes, but nothing further is recorded of Johanan. B.C. 588 (2 Kings xxv. 23; Jer. xl. 8-16; xli.; xlii.; xliii.).

JOHN THE BAPTIST (Gr. Ἰωάννης ὁ βαπτιστής, or simply Ἰωάννης, when the reference is clear, as in Matt. iii. 4; iv. 12; Lat. Joannes, Tacit. *Hist.* v. 12; Hebrew יוֹחָנָן, denoting 'grace' or 'favour'). In the church John commonly bears the honourable title of 'forerunner of the Lord'—antecursor et præparator viarum Domini (Tertull. *adv. Marc.* iv. 33); in Greek, πρόδρομος, προάγγελος Κυρίου. The accounts of him which the gospels present are fragmentary and imperfect: they involve, too, some difficulties which the learned have found it hard to remove; yet enough is given to show that he was a man of a lofty character, and that the relation in which he stood to Christianity was one of great importance.

His parents were Zacharias and Elisabeth, the latter 'a cousin of Mary,' the mother of Jesus, whose senior John was by a period of six months (Luke i.). The exact spot where John was born is not determined. The rabbins fix on Hebron, in the hill-country of Judæa; Paulus, Kuinoel, and Meyer, after Reland, are in favour of Jutta, 'a city of Judah.' According to the account contained in the first chapter of Luke, his father, while engaged in burning incense, was visited by the angel Gabriel, who informed him that in compliance with his prayers his wife should bear a son, whose name he should call John—in allusion to the grace thus accorded. A description of the manner of his son's life is given, which in effect states that he was to be a Nazarite, abstaining from bodily indulgences, was to receive special favour and aid of God, was to prove a great religious and social reformer, and so prepare the way for the long-expected Messiah. Zacharias is slow to believe these tidings and seeks some token in evidence of their truth. Accordingly a sign is given which acts also as a punishment of his want of faith—his tongue is sealed till the prediction is fulfilled by the event. Six months after Elisabeth had conceived she received a visit from Mary, the future mother of Jesus. On being saluted by her relation, Elisabeth felt her babe leap in her womb, and, being filled with the holy spirit, she broke forth into a poetic congratulation to Mary, as the destined mother of her Lord. At length Elisabeth brought forth a son, whom the relatives were disposed to name Zacharias, after his father—but Elisabeth was in some way led to wish that he should be called John. The matter was referred to the father, who signified in writing that his name was to be John. This agreement with Elisabeth caused all to marvel. Zacharias now had his tongue loosed, and he first employed his restored power in praising God. These singular events caused universal surprise, and led people to expect that the child would prove a distinguished man.

The parents of John were not only of a priestly order, but righteous and devout. Their influence, in consequence, in the training of their son, would be not only benign but suitable to the holy office which he was designed to fill. More than this—the special aids of God's Spirit were with him (Luke i. 66). How thoroughly Zacharias was penetrated with his parental responsibility and the

future dignity of his son, appears from the 'divine song' to which he gives utterance; the following words deserve notice—'And thou, child, shalt be called the prophet of the Highest; for thou shalt go before the face of the Lord to prepare his ways; to give knowledge of salvation unto his people by the remission of their sins, through the tender mercy of our God, whereby the day-spring from on high hath visited us, to give light to them that sit in darkness and the shadow of death, to guide our feet in the way of peace.' As a consequence of the lofty influences under which he was nurtured, the child waxed strong in spirit. The sacred writer adds that 'he was in the deserts till the day of his showing unto Israel' (Luke i. 80). The apocryphal *Protev. Jac.* ch. xxii. states that his mother, in order to rescue her son from the murder of the children at Bethlehem, which Herod commanded, fled with him into the desert. She found no place of refuge; the mountain opened at her request, and gave the needed shelter in its bosom. Zacharias, being questioned by Herod as to where his son was to be found, and refusing to answer, was slain by the tyrant. At a later period Elisabeth died, when angels took the youth under their care (Fabricius, *Cod. Apocryph.* p. 117, sq.; comp. Kuhn, *Leben Jesu*, i. 163, remark 4).

In the fifteenth year of the Emperor Tiberius, John made his public appearance, exhibiting the austerity, the costume, and the manner of life of the ancient Jewish prophets (Luke iii.; Matt. iv.). His raiment was camel's hair; he wore a plain leathern girdle about his loins; his food was what the desert spontaneously offered—locusts and wild honey from the rock. Desert though the place is designated, the country where he began his mission—the wild mountainous tract of Juda—lying between Jerusalem and the Dead Sea, along which it stretches, was not entirely destitute of means for supporting human existence (Matt. iii. 1-12; Mark i. 1-8; Luke iii. 1-20; John x. 28; Justin Martyr, *Dial. cum Tryph.* c. 88). Josephus, in his *Life* (ii. 2), gives an account of one of his instructors, Banus, which throws light on John's condition in the desert:—'he lived in the desert, and had no other food than what grew of its own accord, and bathed himself in cold water frequently, both by night and by day. I imitated him in these things, and continued with him three years.'

The burden of John's preaching bore no slight resemblance to the old prophetic exhortations, whose last echo had now died away for centuries. He called upon the Jewish people to repent (μετανοεῖτε), to change their minds, their dispositions and affections, and thus prepared the way for the great doctrine promulgated by his Lord, of the necessity of a spiritual regeneration. That the change which John had in view was by no means of so great or so elevated a kind as that which Jesus required, is very probable; but the particulars into which he enters when he proceeds to address classes or individuals (Matt. iii. 7, sq.; Luke iii. 7, sq.), serve fully to show that the renovation at which he aimed was not merely of a material or organic, but chiefly of a moral nature. In a very emphatic manner did he warn the ecclesiastical and philosophical authorities of the land of the necessity under which they lay of an entire change of view, of aim, and of desire; declaring in explicit and awful terms that their pride of nationality would avail them nothing against the coming wrathful visitation, and that they were utterly mistaken in the notion that Divine Providence had any need of them for completing its own wise purposes (Luke iii. 8, 9). The first reason assigned by John for entering on his most weighty and perilous office was announced in these words—'the kingdom of heaven is at hand.' It was his great work to prepare the mind of the nation, so that when Jesus himself came they might be a people made ready for the Lord. What was the exact idea which John intended to convey by the term 'kingdom of heaven' it is not easy, at least in the space before us, to determine with satisfaction. We feel ourselves, however, justified in protesting against the practice of those who take the vulgar Jewish notion, and ascribe it to John, while some go so far as to deny that our Lord himself, at the first, possessed any other. The reference which we have made to John's addreses to his auditors suffices to show that there was an ample and predominant moral element in his conception of this kingdom; while, if he entertained the vulgar notion of the Messiah, why his urgency in behalf of μετάνοια—an entire, internal change? Besides, does the fact need enforcement, that all superior minds—especially those that are enlightened by the Divine Spirit—have both correcter and nobler views than the bulk of their contemporaries, and that it is the power which, under God's aid, these views give them, that sustains them in their duty and makes their efforts successful? If John really came in the spirit and power of Elias—if he reproduced the old ardour and quickening foresight of the prophets, he must have gone far beyond the vulgar conception of the kingdom of God. And indeed the whole tenor of his teaching seems to our mind intended and fitted to refine, exalt, and expand the ordinary Jewish mind and so to prepare the way for the perfect day of Christ.

Had we space to develope the moral character of John, we could show that this fine, stern, high-minded teacher possessed many eminent qualities; but his personal and official modesty in keeping, in all circumstances, in the lower rank assigned him by God, must not pass without special mention. The doctrine and manner of life of John appear to have roused the entire of the south of Palestine, and people flocked from all parts to the spot where, on the banks of the Jordan, he baptized thousands unto repentance. Such, indeed, was the fame which he had gained, that 'people were in expectation, and all men mused in their hearts of John, whether he were the Christ or not' (Luke iii. 15). Had he chosen, John might without doubt have assumed to himself the higher office, and risen to great worldly power. But he was faithful to his trust, and never failed to declare in the fullest and clearest manner, that he was not the Christ but merely his harbinger, and that the sole work he had to do was to usher in the day-spring from on high.

The more than prophetic fame of the Baptist reached the ears of Jesus in his Nazarene dwelling, far distant from the locality of John (Matt. ii. 9, 11). The nature of the report—namely, that his divinely-predicted forerunner had appeared in Judæa—showed our Lord that the time was now come for his being made manifest to Israel. Ac-

cordingly he comes to the place where John is to be baptized of him, in order that thus he might fulfil all that was required under the dispensation which was about to disappear (Matt. iii. 14). John's sense of inferiority inclines him to ask rather than to give baptism in the case of Jesus, who, however, wills to have it so, and is accordingly baptized of John. Immediately on the termination of this symbolical act, a divine attestation is given from the opened vault of heaven, declaring Jesus to be in truth the long looked-for Messiah—'This is my beloved Son, in whom I am well pleased' (Matt. iii. 17). The events which are found recorded in John i. 19, sq. seem to have happened after the baptism of Jesus by John. This appears to us to be implied in the *past* character of the narrative. John is obviously speaking of something over and gone: for instance, 'This is he of whom I *said*' (not I *say*), 'after me cometh a man,' &c.; John's testimony had already been borne when he gave his reply to the Sanhedrim. It was therefore prior to his baptism that John 'knew him not'—knew not *his person*, though, of course, he knew that the Messiah was on the point of coming; and though John and Jesus were relatives, yet, considering the distance at which they dwelt from each other, and the habits of retirement and solitude in which both indulged, there is no difficulty whatever in the statement. But it may be asked, if John was ignorant of the person of Jesus, how he could acknowledge his superiority, as he does when he intimates that it was more meet he should receive than give baptism. This difficulty has excited much attention. The reader may with advantage consult the very learned and, for the most part, impartial commentary of Lücke, on the passage. Our view is this: the relation in which John and Jesus stood to each other must have been well known to both. When, therefore, Jesus came to John, he would naturally declare himself to be the intended Messiah. Such a declaration—thus pointing out the person—would, of course, conciliate belief in John's mind, and might naturally prompt the self-abasing language which he employs when requested by Jesus to give him baptism. No other fact than such an assertion would communicate to John's mind could justify the language which the Baptist uses, since, as the forerunner of the Messiah, he was second to him only. Still the divinely-promised evidence remained to be given—'upon whom thou shalt see the Spirit descending, and remaining on him, the same is he which baptizeth with the Holy Ghost' (John i. 33). That evidence was at length vouchsafed after the baptism, and then the divine and human testimony concurred in giving such satisfaction to John's mind as he had been led of God to expect, and which the important interests at stake seemed to demand.

In the testimony which John bears to Jesus, as recorded by the Evangelist John, Winer, in his *Realwörterbuch*, finds some difficulty, and thinks that there is a variation, in fact a contrariety, between the view which John presents of the person and work of our Lord and that which the other evangelists afford—a view, indeed, of which the Baptist could have known nothing, but which came from the Gnosticizing colours of John's mind. We again refer the reader to Lücke's valuable work. But what has already been remarked will have shown that Winer and others are in error in the supposition which lies at the bottom of these alleged difficulties and variations—namely, that John the Baptist had no idea of the kingdom of God, higher or more far-reaching than that which was prevalent in the common mind of Judæa. It is in the words 'Behold the Lamb of God, which taketh away the sin of the world' (John i. 29, 36), that the difficulty is thought to be found. What, it is asked, could John the Baptist have known of this assumed function—the remission of sins? Lücke has, we think, satisfactorily shown that such a function did enter into the prophetic idea of the Messiah (Isa. liii.), or at least into that conception of him which the authoritative expounders of religious truth had drawn from the peculiar language of prophecy. And this is unquestionably certain, that 'the remission of our sins, through the tender mercy of our God' (Luke i. 77), did form a part of the conception of the coming Messiah which Zacharias, John's father, entertained and expressed immediately on the birth of his son; while in the account given by the synoptical evangelists (Matthew, Mark, Luke), to the effect that John preached 'the baptism of repentance, for the *remission* of sins' (Luke iii. 3), adding that the Christ would 'baptize *with the Holy Ghost, and with fire*' (Luke iii. 16), may surely be found the essence of the idea conveyed by the words 'Behold the Lamb of God,' &c.

The relation which subsisted between John and Jesus, after the emphatic testimony above recorded had been borne, we have not the materials to describe with full certainty.

It seems but natural to think, when their hitherto relative position is taken into account, that John would forthwith lay down his office of harbinger, which, now that the Sun of Righteousness himself had appeared, was entirely fulfilled and terminated. Such a step he does not appear to have taken. On the contrary, the language of Scripture seems to imply that the Baptist church continued side by side with the Messianic (Matt. xi. 3; Luke vii. 19; Matt. ix. 14; Luke xi. 1; John xiv. 25), and remained long after John's execution (Acts xix. 3). Indeed, a sect which bears the name of 'John's disciples,' exists to the present day in the East, whose sacred books are said to be pervaded by a Gnostic leaven. They are hostile alike to Judaism and Christianity, and their John and Jesus are altogether different from the characters bearing these names in our evangelists. Still, though it has been generally assumed that John did not lay down his office, we are not satisfied that the New Testament establishes this alleged fact. John may have ceased to execute his own peculiar work, as the forerunner, but may justifiably have continued to bear his most important testimony to the Messiahship of Christ; or he may even have altogether given up the duties of active life some time, at least, before his death; and yet his disciples, both before and after that event, may have maintained their individuality as a religious communion. Nor will the student of the New Testament and of ecclesiastical history, who knows how grossly a teacher far greater than John, was both during his life and after his crucifixion, misunderstood and misrepresented, think it impossible that some misconception or some sinister motive may have had weight in preventing the Baptist

church from dissolving and passing into that of Christ.

It was, not improbably, with a view to remove some error of this kind that John sent the embassy of his disciples to Jesus which is recorded in Matt. xi. 3; Luke vii. 19. The spiritual course which the teachings of Jesus were more and more taking, and the apparent failure, or at least uneasy postponement of the promised kingdom in the popular sense, especially the fact that their esteemed master lay in prison, and was in imminent danger of losing his life, may well have led John's disciples to doubt if Jesus were in truth the expected Messiah. Appearances, to them, were purely adverse. What step so fit on the part of their master, as that he should send them to Jesus himself? No intimation is found in the record that *John* required evidence to give him satisfaction; and all the language that is used is proper and pertinent if we suppose that the doubt lay only in the minds of his disciples. That the terms employed *admit* the interpretation that John was not without some misgivings (Luke vii. 23; Matt. xi. 6), we are free to allow. And if any doubt had grown up in the Baptist's mind it was most probably owing to the defective spirituality of his views; for even of him Jesus has declared, 'he that is least in the kingdom of heaven is greater than he' (Matt. xi. 11). Were this the case it would of itself account not only for the embassy sent by John to Jesus, but also for the continuance and perpetuation of John's separate influence as the founder of a sect.

The manner of John's death is too well known to require to be detailed here (Matt. iv. 12; xiv. 3; Luke iii. 19; Mark vi. 17; Joseph. *Antiq.* xviii. 5. 2). He reproved a tyrant for a heinous crime, and received his reward in decapitation. Josephus, however, assigns a somewhat different cause for this execution from that given in the gospels. The passage bears forcible evidence to the general truth of the evangelical narrative respecting John, and therefore we transcribe it:—'Now some of the Jews thought that the destruction of Herod's army came from God, and that very justly, as a punishment of what he did against John that was called the Baptist; for Herod slew him, although he was a good man, and commanded the Jews to exercise virtue, both as to righteousness one towards another and piety towards God, and so to come to baptism. Now when others came in crowds about him—for they were greatly moved by hearing his words—Herod, who feared lest the great influence John had over the people might put it into his power and inclination to raise a rebellion (for they seemed ready to do any thing he should advise), thought it best, by putting him to death, to prevent any mischief he might cause, and not bring himself into difficulties by sparing a man who might make him repent of it when it should be too late. Accordingly he was sent a prisoner, out of Herod's suspicious temper, to Machærus, the castle I before mentioned, and was there put to death.'

There is no contrariety between this account and that which is given in the New Testament. Both may be true: John was condemned in the mind of Herod on political grounds, as endangering his position, and executed on private and ostensible grounds, in order to gratify a malicious but powerful woman. The Scriptural reason was but the pretext for carrying into effect the determinations of Herod's cabinet. That the fear of Herod was not without some ground may be seen in the popularity which John had gained (Mark xi. 32; Lardner, *Works*, vi. 483).

The castle of Machærus, where John was imprisoned and beheaded, was a fortress lying on the southern extremity of Peræa, at the top of the lake Asphaltites, between the dominions of Herod and Aretas, king of Arabia Petræa, and at the time of our history appears to have belonged to the former (Lardner, vi. 483). According to the Scripture account, the daughter of Herodias obtained the Baptist's head at an entertainment, without delay. How could this be, when Machærus lay at a distance from Jerusalem? The feast seems to have been made at Machærus, which, besides being a stronghold, was also a palace, built by Herod the Great, and Herod himself was now on his route towards the territories of Aretas, with whom he was at war. Bishop Marsh (*Lecture* xxvi.) remarks, that the soldiers who, in Luke iii. 14, are said to have come to John while baptizing in the Jordan, are designated by a term (στρατευόμενοι, not στρατιῶται) which denotes persons actually engaged in war, not merely soldiers. In the same way, in Mark vi. 27, the officer sent to bring John's head bears a military title—σπεκουλάτωρ. These minute indications are quite accordant with the fact that Herod was then making war on Aretas, as appears from Josephus (*Antiq.* xviii. 5. 1), and afford a very strong evidence of the credibility of the sacred narratives, by showing that the authors described what was actually proceeding before their own eyes. We also see a reason why Herodias was present on this occasion, since she was Herod's paramour, and had, 'like another Helen,' led to the war.

John the Baptist is mentioned in the Koran, with much honour, under the name of Jahja (see Hottinger, *Historia Orientalis*, pp. 144-149, Tiguri, 1660).

The literature connected with the subject of this article, to be found in foreign writers, is very rich. Besides the works already named, the following may be consulted: Hase (*Leben Jesu*, 3 Aufl. Leipzig, 1840, p. 80), who, together with Walch (*Bibliotheca Theologica*, iii. 402), gives the chief authorities; Witsii *Exerc. de Joanne Bapt.* in his *Miscell. Sacra*, ii. 367; J. G. E. Leopold, *Johannes der Täufer*, Hannov. 1825; Usteri, *Nachrichten von Johannes dem Täufer* in the *Studien und Kritiken*, 1829, part iii. p. 439; L. von Rohden, *Johannes der Täufer*, Lübeck, 1838; Neander, *Das Leben Jesu*, Hamb. 1837, p. 49. The ecclesiastical traditions touching John may be found in the *Acta Sanctorum*, iv. 687-846; and, in a compendious form, in Tillemont, *Mémoires*, i. 82-108, 482-505.—J. R. B.

JOHN THE APOSTLE. I. *The circumstances of his life, and his character.*—He was the son of Zebedee, a fisherman, and of Salome. It is probable that he was born at Bethsaida, on the lake of Galilee. His parents appear to have been in easy circumstances; at least, we find that Zebedee employed hired servants (Mark i. 20), and that Salome was among the number of those women who contributed to the maintenance of Jesus (Matt. xxvii. 56). We also find that John received Mary into

his house after the death of Jesus. Since this house seems to have been situated at Jerusalem (ἀπ' ἐκείνης τῆς ὥρας, John xix. 27), it would appear that he was the owner of two houses. John's acquaintance, also, with the high-priest (xviii. 15) seems to indicate that he lived at Jerusalem, and belonged to the wealthier class. We may suppose that from a tender age he nourished religious feelings, since Salome, who evinced so much love for Jesus, probably fostered at an earlier period those hopes of a Messiah which she expresses in Matt. xx. 20; and we find that he entered into communion with the Baptist from pure motives. The occupation, also, of a fisherman was adapted to promote holy meditations, since it would frequently lead him to pass whole nights in stillness upon the water, amid a charming country similar to the environs of the lake of Locarno. On the banks of the Jordan the Baptist directed John to Jesus, and he immediately became the Lord's disciple and accompanied him on his return to Galilee. Having arrived there, he at first resumed his trade, but was afterwards called to remain permanently with the Redeemer (Luke v. 5-10). Jesus was particularly attached to John (John xiii. 23; xix. 26; xx. 2; xxi. 7), who was one of the three who were distinguished above the other apostles (Matt. xvii. 1; xxvi. 37; Mark v. 37). After the ascension, John abode at Jerusalem, where Paul met him on his third journey, about the year 52 (Gal. ii. 3-9). Since he had undertaken the care of the mother of Jesus we cannot well suppose that he left Jerusalem before Mary's death; and, indeed, we find that about the year 58, when Paul was at Ephesus, John was not yet living there. If we consider the great importance of Ephesus among the various churches of Asia Minor, and the dangers arising from false teachers, who were prevalent there as early as the days of Paul (Acts xx. 29), it will appear likely that John was sent to Ephesus after Paul had left that scene, about the year 65. During the time of his activity in Asia Minor he was exiled by the Roman emperor to Patmos, one of the Sporadic isles in the Ægean Sea, where, according to Revelations i. 9, he wrote the Apocalypse. Irenæus (*Adv. Hær.* v. 30) and, following him, Eusebius (*Hist. Eccles.* iii. 18) state that John beheld the visions of the Apocalypse about the close of the reign of Domitian. If this statement can be depended upon, the exile to Patmos also took place under Domitian, who died A.D. 96. Tertullian (*Præscr. adv. Hær.* c. 30) relates that in the reign of Domitian John was forcibly conveyed to Rome, where he was thrown into a cask of oil; that he was miraculously released, and then brought to Patmos. But since none of the ancient writers besides the rather undiscriminating Tertullian, relate this circumstance, and since this mode of capital punishment was unheard of at Rome, we ought not to lay much stress upon it (compare Mosheim, *Dissertationes ad Historiam Ecclesiasticam*, i. p. 497, sq.). It is, however, likely that John was called to suffer for his faith, since Polycrates, bishop of Ephesus, writing about A.D. 200, calls him μάρτυς (Euseb. *Hist. Eccles.* v. 24). According to Eusebius (*Hist. Eccles.* iii. 20, 23), he returned from exile during the reign of Nerva. The three epistles of John, as also the affecting account concerning his fidelity as a spiritual pastor, given by Clemens Alexandrinus (*Quis Dives Salvus?* c. 52), testify that he was the pastor of a large diocese. John's second epistle, verse 12, and third epistle, verse 14, indicate that he made journeys of pastoral visitation. John died at Ephesus past the age of ninety, in the reign of the Emperor Trajan. According to Jerome, he was a hundred years old, and according to Suidas, a hundred and twenty.

If we endeavour to picture to ourselves an image of John as drawn from his Gospel and his Epistles, aided by a few traits of his life preserved by the fathers,* he appears to have been of a wise, affectionate, and rather feminine character.

It seems that originally this softness of disposition would sometimes blaze up in wrath, as feminine characters in general feel themselves as strongly repelled as attracted. An instance of his wrath we find in Luke ix. 54, sq. We trace also a degree of selfishness in Mark ix. 38; x. 35. Hence it appears that love, humility, and mildness were in John the works of transforming grace. At a later period his writings indicate not only mildness, but also a strict moral earnestness (1 John i. 6; iii. 9, 20; v. 16; 2 John 10, 11).

II. *The Gospel of John.—Its authenticity and credibility.*—During the eighteenth century and the first ten years of the nineteenth, the Gospel of John was attacked, but with feeble arguments, by some English Deists and by four German theologians. Bretschneider attempted a stronger attack in his book entitled *Probabilia de Evangelii et Epistolarum Johannis origine et indole*, 1820. According to him, the Gospel was written during the first half of the second century, for the purpose of spreading the metaphysical doctrine of the divinity of Christ. Although this attack was very learned, it met with but little approbation. The same arguments were, however, resumed and sharpened by Strauss, who, although in the third edition of *The Life of Jesus* he manifested an inclination to give up his doubts, yet resolutely returned to them in the fourth edition, principally, as he himself confesses, because 'without them one could not escape from believing the miracles of Christ.' Strauss attacked the authenticity of the Gospel of John principally with arguments deduced from the subject-matter of the book itself, while Lützelberger opposed it on historical grounds (*Die kirchliche Tradition über den Apostel Johannes und seine Schriften*, 1840). Schwegler published a treatise on the writings of John, which is inserted in *Der Montanismus und die Christliche Kirche des zweiten Jahrhunderts*, 1841, and in which he endeavours to prove from the facts of ecclesiastical history, that the Gospel of John was written in Asia Minor about the year of Christ 170 by one of the followers of the elder Apollinaris, and that it was ascribed

* Jerome (*Comm. ad Gal.* iii. p. 314, mart.) relates that when John had attained a great age he was so feeble that he could not walk to the assemblies of the church; he, therefore, caused himself to be carried in by young men. He was no longer able to say much, but he constantly repeated the words, 'Little children, love one another.' On being asked why he constantly repeated this one saying, he replied, 'Because it is the command of the Lord; and enough is done if this is done.'

to the apostle in order to influence the converts from Judaism. If we attached much importance to the arguments employed by those who deny the authenticity of John's Gospel, we should here explicitly point out how these arguments may be refuted; but since we deem them unimportant, and since, even in Germany, the opponents of its authenticity have not met with much sympathy, we refrain from discussion. It may suffice to observe that during the lapse of ages up to the conclusion of the eighteenth century, no one ever expressed a doubt respecting the genuineness of John's Gospel, except the small sect of the ἄλογοι, whose scepticism, however, was not based upon historical, but merely upon dogmatical grounds.

The credibility of the Gospel of St. John is open to attack on account of its differing so much, as well in substance as in form, from the three first Gospels, and on account of its apparent contradiction of them. Among the apparent contradictions may be mentioned the statements, that Christ was crucified on the same day on which the Passover was to be eaten (John xviii. 28), while according to the other Gospels Jesus ate the Passover with his disciples; and that Jesus, before he went to Gethsemane, offered up a prayer full of sublimity and confidence (xvii.), while according to the other Gospels he endured in Gethsemane a very heavy internal conflict, respecting which John is silent. But the most striking difference is that of the speeches. This difference is, perhaps, still more apparent in the form than in the substance of them.

The History and the Speeches.—We will first consider the difference of the Contents. This difference may be accounted for by supposing that John intended to relate and complete the history of the Lord according to his own view of it. We are led to this supposition from the following circumstances: that, with the exception of the history of his passion and his resurrection, there are only two sections in which John coincides with the synoptic gospels (vi. 1-21; xii. 1); that he altogether omits such important facts as the baptism of Jesus by John, the history of his temptation and transfiguration, the institution of the Lord's supper, and the internal conflict at Gethsemane; and that chapters i. 32, iii. 24, xi. 2, indicate that he presupposed his readers to be already acquainted with the Gospel history. He confined himself to such communications as were wanting in the others, especially with regard to the speeches of Jesus. The historical section in ch. vi. he communicated because it is connected with the subsequent speeches of Jesus; and ch. xii. 1, because it was of importance for him to relate the history of Judas, so that each event should clearly be understood to be the result of a preceding fact. The history of Christ's sufferings and resurrection, being a prominent part, could not be omitted, although, in the account of these also, John differs in his statements from the writers of the other Gospels. Clemens Alexandrinus (Euseb. *Hist. Eccles.* vi. 14) relates, as he says, upon the statement of old Presbyters, that John wrote his Gospel at the request of his friends, in order to place by the side of the σωματικὰ εὐαγγέλια, *bodily gospels*, his πνευματικὸν εὐαγγέλιον, *spiritual gospel*. The same account is confirmed by a Latin fragment of the second century preserved by Muratori, which bears that the aged apostle was solicited by his co-disciples to commit his Gospel to writing.

Now with regard to the difference of Form. In the Gospel of John, Jesus seldom speaks in gnomes, sentences, and parables, but generally in longer speeches, the parts of which are not closely connected, containing frequent repetitions, and the linguistic characteristics of which strongly resemble those of his epistles. De Wette considers John to be the author of this Gospel, but has, nevertheless, given up the authenticity of a considerable portion of the speeches, and maintains that the Evangelist at a later period, on account of an overflow of his subjectivity, gave his own thoughts as those of the Redeemer. This question does not admit of a brief solution; therefore, consult a full discussion of the subject in Tholuck's *Glaubwürdigkeit der evangelischen Geschichte*, 2nd edit. p. 314, sq. We here direct attention only to the following particulars. The gentle and feminine character of the disciple allows us to suppose that, to a certain degree, he adopted as his own the expressions of the Redeemer, and, consequently, that many terms in which the Epistles agree with the Gospel did not originate with the disciple, but with Christ himself. We find an example of the manner in which the disciple adopted the expressions of his Master in John xii. 43, compared with v. 41-44. We do not deny that the formation of sentences and expressions is considerably influenced by the peculiar character of the disciple, but with regard to the particular contents of the speeches, we see no reason why we should doubt their authenticity. Strauss himself makes a concession from which much results, namely, that the most characteristic speeches in John are those in which occur the antitheses of σάρξ and πνεῦμα, *flesh* and *spirit*, φῶς and σκότος, *light* and *darkness*, ζωή and θάνατος, *life* and *death*, ἄνω and κάτω, *above* and *below;* and also the mystical expressions of ἄρτος τῆς ζωῆς, *bread of life*, ὕδωρ ζῶν, *living water*. These terms are even by Strauss (vol. i. p. 176) considered to be parts of the original speeches of Christ, and he asserts that the evangelist only developed them in the style of the Alexandrian writers.

It must be granted that the peculiarities of John's Gospel more especially consist in the four following doctrines.

1. That of the mystical relation of the Son to the Father.

2. That of the mystical relation of the Redeemer to believers.

3. The announcement of the Holy Ghost as the Comforter.

4. The peculiar importance ascribed to Love.

Although there can be shown in the writings of the other evangelists some isolated dicta of the Lord, which seem to bear the impress of John, it can also be shown that they contain thoughts not originating with that disciple, but with the Lord himself. Matthew (xi. 27) speaks of the relation of the Son to the Father so entirely in the style of John that persons not sufficiently versed in Holy Writ are apt to search for this passage in the Gospel of John. The mystical union of the Son with believers is expressed in Matt. xxviii. 20. The promise of the effusion of the Holy Ghost in order to perfect the disciples is found in Luke xxiv. 49. The doctrine of Paul with respect to

love, in 1 Cor. xiii., entirely resembles what, according to John, Christ taught on the same subject. Paul here deserves our particular attention. In the writings of Paul are found Christian truths which have their points of coalescence only in John, viz., that Christ is Εἰκὼν τοῦ Θεοῦ τοῦ ἀοράτου, *the image of the invisible God*, by whom all things are created (Col. i. 15, 16). Paul considers the Spirit of God in the church, *the spiritual Christ*, as Jesus himself does (John xiv. 16), frequently using the words εἶναι ἐν Χριστῷ.

That the speeches of Christ have been faithfully reported may be seen by a comparison of the speeches of the Baptist in the Gospel of John. The Baptist's speeches bear an entirely Old Testament character: they are full of gnomes, allusions to the Old Testament, and sententious expressions (John iii. 27-30; i. 26-36).

b. The purport and plan of the Gospel of John.—We have already given our own opinion on this subject. Most of the earlier critics considered the Gospel of John to have had a polemico-dogmatical purport. According to Irenæus (*Adv. Hær.* iii. 12), John wrote with the intention of combating the errors of Cerinthus the Gnostic. Grotius, Herder, and others suppose that the polemics of the evangelist were directed against the Zabii, or disciples of John the Baptist. Michaelis, Storr, and Hug assert that they were directed against both the Zabii and the Gnostics. It is not improbable that the evangelist had in view, both in his Prologus and also in ch. xix. 34, 35, some heretical opinions of those times, but it cannot be maintained that this is the case throughout the whole of the Gospel. He himself states (xx. 31) that his work had a more general object.

One of the peculiarities of John is that, in speaking of the adversaries of Jesus, he always calls them οἱ Ἰουδαῖοι. This observation has, in modern times, given rise to a peculiar opinion concerning the plan of John's Gospel; namely, that the evangelist has, from the very beginning of the Gospel, the following theme before his eyes:—THE ETERNAL COMBAT BETWEEN DIVINE LIGHT AND THE CORRUPTION OF MANKIND, EXEMPLIFIED BY THE MUTUAL OPPOSITION SUBSISTING BETWEEN THE HOSTILE JEWISH PARTY AND THE MANIFESTATION OF THE SON OF GOD, WHICH COMBAT TERMINATES IN THE VICTORY OF LIGHT.

The Prologus of the Gospel of John expresses this theme in speaking of the opposition of the world to the incarnate Logos. This theme is here expressed in the same manner as the leading idea of a musical composition is expressed in the overture. As the leading idea of the whole epistle to the Romans is contained in chr. i. 17, so the theme of the Gospel of John is contained in ch. i. 11-13. The Gospel is divided into two principal sections. The first extends to ch. xii. It comprehends the public functions of Jesus, and terminates with a brief summary (ver. 44-50). The second section contains the history of the Passion and of the Resurrection. The reader is prepared for this section by chr. xii. 23-32. The leading idea of this speech is, that Destruction is necessary, because without it there can be no Resurrection.

With ch. xiii. begins the history of our Lord's Passion. In the third verse the apostle directs attention to the fact that the suffering would finally lead to glory.

In the first section is described how the opposition of the influential men among the Jews was gradually increased until the decisive fact of the resurrection of Lazarus led to a public outburst of their hatred. This description terminates with the official decree of Caiaphas (xi. 49, 50).

c. The place, time, and language in which John's Gospel was written.—The Fathers supposed that the Gospel of John was written at Ephesus. The author of a synopsis annexed to the works of Athanasius makes an observation which deserves to be noticed on account of the assurance with which it is advanced. It is, that John wrote the Gospel which bears his name in Patmos, but that it was edited by the same Gaius whom Paul in the epistle to the Romans calls ὁ ξένος μου, *mine host* (Athanasii *Opera*, vol. ii. p. 155, Venet.). One might be inclined to explain by this circumstance the postscript contained in John xxi. 24, 25.

There is some internal evidence in favour of the statement that this Gospel was written at Ephesus—namely, that the author sometimes alludes to the tenets of Hellenistic theosophy, and that he has in view readers who do not live in Palestine (John ii. 6, 13; iv. 9; v. 1, 2). In addition to this must be mentioned the command of the Hellenistic Greek evinced by the writer. It is, however, not unlikely that John acquired his knowledge of Greek in his native country. The researches of Dr. Paulus, Hug, and Credner, have rendered it highly probable that the knowledge of Greek was then widely spread in Palestine. Even James, the brother of our Lord, although he never left his native country, writes in his epistle tolerably good Greek.

The language of John's Gospel is not very periodic, but moves uniformly on between the particles δέ and οὖν. For instance, in chapter xix. the particle οὖν occurs at the commencement of verses 20, 21, 23, 24 twice, 26, 29, 30, 31, 32, 38, 40, 42. Quite as frequent is the simple connection by the conjunction καὶ (iii. 14; v. 27; viii. 21, 49; xvii. 11). This defect of style may, however, be explained by the mental characteristics of the disciple. John's mind was deficient in the dialectic element; he wanted the logical acuteness of Paul. Even where he reports the speeches of Christ, we often find a want of precision in his representation. The simplicity of John's character is also evinced by the repetition of certain leading thoughts, reproduced in the same words both in the Gospel and in the Epistles; such as μαρτυρία, *testimony*; δόξα, *glory*; ἀλήθεια, *truth*; φῶς, *light*; σκότος, *darkness*; ζώη αἰώνιος, *eternal life*; μένειν, *to abide*. Although the language of the Gospels and of the Epistles is not so excellent as Eusebius asserts, we find only such impurities as belong to the Alexandrine Greek in general. For instance, the barbarism ἔγνωκαν in xvii. 7; and according to the codex AD., also ἑώρακαν in verse 6; and according to some manuscripts εἴχωσαν, instead of εἶχον; and in xvi. 20, 22, χαρήσομαι, instead of χαρῶ.

d. The interpreters of the Gospel of John.—Among the ancient commentators upon John's Gospel, Chrysostom deserves the first place. The two compilers, Theophylact, who died A.D. 1107, and Euthymius Zigabenus, who died after A.D.

1118, are also worthy of notice. Among the Roman Catholic interpreters, Maldonatus, who died in 1583, is distinguished by originality and accuracy. Calvin is distinguished above the other Reformers for the originality and ease of his interpretation, but his commentary on the Epistles is more carefully worked out than that on the Gospel. Beza is characterized by philological and critical learning. The most complete commentary on the Gospel of John is that of Lampe, *Commentarius Exegetico-Analyticus in Evangelium Johannis*, Amstelodami, 1637, 3 vols. 4to. The style of this commentary is tasteless and stiff, but in learning the author has not been surpassed by any other interpreter. Lücke (3rd ed. 1840) is the most comprehensive of the modern commentators. Shorter commentaries have been written by Tholuck* (5th ed.), by Olshausen (3rd ed. 1832), and by De Wette (2nd ed. 1839).

As introductions to the study of the writings of John, we may mention Frommann's *Johanneiseher Lehrbegriff*, 1831, and Neander's *Abriss der Johanneisehen Lehre* in his *Geschichte der Pflanzung der Christliehen Kirehe* (3rd ed. 1841, p. 757, sq.).

III. *The Epistles of John.*—For the authenticity of the first epistle very ancient testimony may be adduced. Papias, the disciple of John, quotes some passages from it. Polycarp, also, another disciple of John, quotes a passage from this epistle (*ad Philipp.*, c. 7). So, also, Irenæus (*Adv. Hær.* iii. 16; v. 8).

The author of the first epistle describes himself, at its commencement, as an eye-witness of the life of our Lord. The style and language manifestly harmonize with those of the author of the Gospel of John. The polemics, also, which in ch. ii. 18-26, are directed against the Docetic Gnostics, in ch. iv. 1-3, agree with the sphere of action in Asia Minor in which the Evangelist John was placed. We may, therefore, suppose that the epistle was written to Christian congregations in Asia Minor, which were placed under the spiritual care of the apostle. It is generally admitted that ch. i. 2 refers to the Gospel. If this is correct, the apostle wrote this epistle at a very advanced age, after he had written his gospel. The epistle breathes love and devotion, but also zeal for moral strictness (iii. 6-8; v. 16). There is a remarkable absence of logical connection in the form of separate expressions, and in the transitions from one thought to another. Some writers have been inclined to find a reason for this in the advanced age of the writer. Old age may, perhaps, have contributed to this characteristic, but it is chiefly attributable to the mental peculiarity of the apostle.

Eusebius places the second and third epistles of John among the ἀντιλεγομένα (*Hist. Eccles.* iii. 25). These two epistles were originally wanting in the ancient Syriac translation. From their nature, it may easily be explained how it happened that they were less generally known in ancient Christian congregations, and that the fathers do not quote them so often as other parts of Scripture, since they are very short, and treat of private affairs. The private nature of their contents removes also the suspicion that they could have been forged, since it would be difficult to discover any purpose which could have led to such a forgery. The passage in the second epistle, verse 11, which might seem to have some doctrinal importance, is several times quoted by the fathers; for instance, by Irenæus (*Adv. Hær.* i. 16. 3). Clemens Alexandrinus, who, according to Eusebius and Photius, wrote a commentary on all the seven Catholic epistles, mentions several genuine epistles of John. Origen speaks doubtingly about the authenticity of the second and third epistles, and states that they were not generally admitted to be genuine.

The second epistle is addressed to a lady, called Κυρία, which name frequently occurs in ancient writers as that of a woman (comp. Lücke's *Commentar*, p. 351).

The third epistle is addressed to Gaius, a person otherwise unknown. It is remarkable that the writer of this epistle calls himself ὁ πρεσβύτερος. If this means the same as *president*, as in 1 Pet. v. 1, it is surprising that John should make use of this official designation in a private letter, and not in the first epistle, which is addressed to the congregation. If πρεσβύτερος is here used in the signification of *old man*, as Paul calls himself in the Epistle to Philemon, verse 9, one is surprised that John should not have chosen the clearer expression, ὁ γέρων or ὁ πρεσβύτης. Some writers have been inclined to ascribe these letters to the presbyter John, who is sometimes spoken of in the ancient church, and to whom even the Apocalypse has been attributed; but if the presbyter John wrote these epistles, John's Gospel also must be ascribed to the same person, of whom otherwise so little is known. This, however, is inadmissible. The omission of the title, at the commencement of the first epistle, cannot be received as proof that πρεσβύτερος, in the second and third epistles, is not to be taken as an official designation; since, in the first epistle, there is no inscription at all, which in itself is a rather startling circumstance. We may suppose that the term πρεσβύτερος expressed in the epistles of John a degree of friendliness, and was chosen on account of the advanced age of the writer. The apostle Paul, also, in his friendly letter to Philemon, abstains from the title Apostle. The circumstances and events in the church, to which the second epistle alludes, coincide with those which are otherwise known to have happened in John's congregation. Here, also, are allusions to the dangers arising from the Gnostic heresy. The admonition, in verse 10, not to receive such heretics as Christian brethren, agrees with the ancient tradition, that John made haste to quit a public bath after Cerinthus the Gnostic entered it, declaring he was afraid the building would fall down.

Rickli's *Johannis erster Brief erklärt und angewendet mit historisehem vorbericht und erklärenden Anmerkungen* (Lucerne, 1828); and Lücke's *Auslegung* (2nd ed. 1836), will assist in interpreting the first Epistle of John.—A. T.

[In the English language there are several works on separate portions of St. John's Gospel; but the only one on the whole of it is in the Rev. Dr. Shepherd's *Notes on the Gospels and Epistles of St. John*, 4to. 1796; and the only separate work on the Epistles is Hawkins' *Commentary*

* Of this admirable commentary there exists an English translation in the United States, of which two editions have been published.—Ed.

on the Epistles of St. John, 1808. A translation of Lücke's *Commentary on the Epistles of St. John* exists in the *Biblical Cabinet*, vol. xv.]

JOHN, EPISTLES OF. In the canon of the New Testament, as at present received in the universal church, there are three Epistles ascribed to the Apostle St. John, although none of them bears his name. The first of these ranks among the *homologoumena*, respecting which no doubts ever existed; the two latter form part of the *antilegomena*, or controverted books. All three are included in the catholic Epistles [EPISTLES].

The First Epistle was known to Papias, bishop of Hieropolis in the second century, who was contemporary with the followers of the Apostles, and who, as we are informed by Eusebius (*Hist. Eccles.* iii. 39), 'made use of testimonies from the First Epistle of St. John.' Polycarp also, in his *Epistle to the Philippians* (ch. vii.), a work which, as Lücke justly observes, cannot be proved to be either spurious or interpolated, has the following remarkable passage, which seems evidently to refer to 1 John iv. 3: 'Every one who does not confess that Jesus Christ is come in the flesh is antichrist.' Irenæus also, the disciple of Polycarp, is stated by Eusebius (*Hist. Eccles.* v. 8), to have extracted many testimonies from it (comp. Irenæus, *Adv. Hær.* iii. 15. 5, 8, with 1 John ii. 18; iv. 1, 3; v. 1). Clement of Alexandria also (*Stromata*, ii. 389) observes that John in his *larger Epistle* uses the words, 'If any man see his brother sin a sin,' &c. (1 John v. 16). Tertullian expressly cites John as the author of the passage, 'Which we have heard,' &c. (1 John i. 1); and Origen (Euseb. *Hist. Eccles.* vi. 25) observes, 'He [John] has also left us an Epistle containing a very few στίχοι: it may be also a second and third are from him, but not all agree that they are genuine; but both together do not contain a hundred στίχοι;' and Eusebius himself observes (iii. 25) that 'John's First Epistle is universally acknowledged by those of the present day and by the ancients' (see also iii. 26). There is no ancient catalogue which does not include the First Epistle, and it forms a part of all the ancient versions, including the Syriac, a work of the second century. In fact the only persons who appear not to have recognised this Epistle are the ancient heretics, the Alogi and the Marcionites, the latter of whom were acquainted with none of the writings of St. John, and the former rejected them all, ascribing them to Cerinthus, not upon critical, but purely arbitrary and dogmatical grounds.

Complete, however, as is the *external* evidence in favour of the genuineness of John's First Epistle, the *internal* is no less conclusive. This is manifest from its exact resemblance in substance, phraseology, and sentiment to the Gospel of St. John, leaving no doubt that both these compositions proceeded at least from one and the same author [JOHN, GOSPEL OF]. Indeed, this harmony of the two compositions has been acknowledged by critics of every school, while the allusions are so natural and incidental as to preclude the idea of the Epistle being the production of a more modern imitator of the style of St. John (Eichhorn's *Introduction*). De Wette (*Introduction*) furnishes a host of passages from the Gospel and Epistle, which will enable the reader to perceive at a glance that both of these compositions proceed from the same author, inasmuch as both bear 'the most certain stamp of relationship, as well in diction as in the form of their contents; both exercise the same spell on the mind of the reader.' A few German theologians in our own times (Lange, *Schriften des Joh.* iii. 4, sq.; Cludius, *Uransichten des Christenth.* p. 52, sq.; Bretschneider, *Probabilia*, p. 166, sq.) have been the first critics to throw doubts on the genuineness of any of John's writings, but they have met with complete refutations from the pens of Bertholdt (vi.), Harmsen (*Authent. de Schr. d. Evangel. Johan*), and Lücke (*Commentary on the Epistles of St. John*, in *Bib. Cab.* vol. xv.). The only serious objections to the Epistles are those of Bretschneider, who has equally attacked the genuineness of the Gospel. He maintains that the doctrine concerning the *logos*, and the anti-docetic tendency of St. John's First Epistle, betray an author of the second century, whom he assumes to be John the Presbyter. But it is beyond all question, says Lücke (*l. c.*), that the *logos* doctrine of St. John, substantially, although not fully developed, existed in the Jewish theological notions respecting the Son of God; and that we find it distinctly expressed, although in different words, in the Pauline representation of Christ's exalted dignity (Coloss. i. comp. with Heb. 1); that the rudiments of it appear in the literature of the Jews, canonical and apocryphal, Chaldaic and Alexandrian; that in the time of Christ it was considerably developed in the writings of Philo, and still more strongly in the fathers of the second century, who were so far from retaining the simple, Hebraizing, and canonical mode of expression peculiar to John, that in them it had assumed a gnostically erudite form, although essentially identical. St. John intends by the *Word* (*logos*) to express the divine nature of Christ, but the patristic logology attempts to determine the relation between the *logos* and the invisible God on one side, and the world on the other. The earliest fathers, as Justin Martyr and Tatian, while they make use of John's phraseology, further support their doctrines by ecclesiastical *tradition*, which, as Lücke observes, must have its root in doctrines which were known in the first century. But from Theophilus of Antioch downwards, the fathers, mentioning John by name, expressly connect their elucidations with the canonical foundation in the Gospel of St. John, without the granting of which the language of Justin would be inexplicable (Olshausen, *On the Genuineness of the Four Gospels*, p. 306, sq.). Accordingly, adds Lücke, on this side, the authenticity of the Gospel and Epistle remains unassailable.

On similar grounds may be refuted Bretschneider's arguments, derived from the anti-docetic character of John's Epistle. It is true, docetism, or the idealistic philosophy, was not fully developed before the second century; but its germ existed before the time of Christ, as has been shown by Mosheim, Walch, and Niemeyer. Traces of Jewish theology and Oriental theosophy having been applied to the Christian doctrine in the apostolic age, are to be found in the Epistles of St. Paul, and it would be unaccountable to suppose that the fully developed docetism should have first made its appearance in the Epistles of Irenæus and Polycarp. We have the authority

of the former of these for the fact that Cerinthus taught the docetic heresy in the lifetime of St. John, in the simple form in which it seems to be attacked in 1 John iv. 1-3; ii. 22; 2 John 7.

These attacks of modern writers are said to have been made rather by way of experiment than with any serious view of undermining the genuineness of John's writings; and Lücke concludes his masterly reply to Bretschneider in these words: 'We honour and respect the unprejudiced divine, whose modest doubts will ever have the merit of having promoted once more the scientific appreciation and established certainty respecting the genuineness and canonical dignity of such a noble portion of the apostolical literature' (*Introduction to Comment.*).

Time and place of writing the First Epistle.—On this head nothing certain can be determined. It has been conjectured by many interpreters, ancient and modern, that it was written at the same place as the Gospel. The more ancient tradition places the writing of the Gospel at Ephesus, and a less authentic report refers it to the island of Patmos. Hug (*Introduction*) infers, from the absence of writing materials (3 John 13), that all John's Epistles were composed at Patmos! The most probable opinion is that it was written somewhere in Asia Minor, in which was the ordinary residence of the Apostle (Euseb. *Hist. Eccl.* iii. 23), perhaps, according to the tradition of the Greek church, at Ephesus; but for this we have no historical warrant (Lücke's *Commentary*).

It is equally difficult to determine the time of the writing of this Epistle, although it was most probably posterior to the Gospel, which seems to be referred to in 1 John i. 4. Some are of opinion that the Epistle was an envelope or accompaniment to the Gospel, and that they were consequently written nearly simultaneously (Hug's *Introd.*). As, however, the period when the Gospel was written, according to the evidence of tradition and criticism, 'fluctuates between the sixth and ninth decennium of the first century' (Lücke's *Comment.*), we are at a loss for data on which to found any probable hypothesis respecting the exact time of the writing of the Epistle; but that it was posterior to the Gospel is further rendered probable from the fact that it is formed on such a view of the person of Jesus as is found only in St. John's Gospel, and that it abounds in allusions to the speeches of Jesus, as there recorded. Lücke concludes, from its resembling the Gospel in its apologetical and polemical allusions, that it indicates such a state of the Christian community as proves that it must be posterior even to the last Epistles of St. Paul, and consequently that the ancient church was justified in classing it among the Catholic Epistles, which all bear this chronological character.

It has been argued by several, from ch. ii. 18 (ἐσχάτη ὥρα ἐστίν), that the Epistle was written *before* the destruction of Jerusalem; while others, founding their conjecture on the same passage, maintain the very reverse. Among the former are to be found the names of Hammond, Grotius, Calovius, Lange, and Häenlein; and among the latter those of Baronius, Basnage, Mill, and Le Clerc.

Equally unsatisfactory is the argument, in respect to the time when this Epistle was written, derived from its supposed senile tone [JOHN]; for, although the style is somewhat more tautological than the Gospel, this can be accounted for by its epistolary character, without ascribing it to the effects of senile forgetfulness. In fact this character is altogether denied by some of the ablest critics.

It is equally difficult to determine who were the persons to whom the Epistle was addressed. In ancient Latin manuscripts of the Scriptures it frequently bears the subscription '*ad Parthos*.' This title is also given to it by St. Augustine; but there is no authority for supposing that John ever went on a mission to the Parthians. Various conjectures, more or less happy, have been made to account for this inscription. Whiston (*Comment. on the Three Cath. Epist.*) supposes that the true superscription was πρὸς παρθένους, to the virgins (the uncorrupted), and that παρθένους gave rise to the Latin reading, *Parthos*. This conjecture has been improved by Hug (*Introd.*), who observes that the second Epistle, addressed to the 'elect lady,' is called by some of the ancients, including Clem. Alex. (*Frag.* ed. Potter, p. 1011), 'Epist. ad Virgines,' πρὸς παρθένους; that this phrase, in an abridged form, 'πρὸς παρθους,' occurred as a colophon to the Second Epistle, and that this colophon sometimes appearing as a superscription to the Second Epistle, to which it seemed unsuitable, it was transferred as a colophon to the First. Wegscheider ingeniously conjectures that 'ad Parthos' was a mistake for 'ad Sparsos,' and observes that in one ancient MS. (which, however, he unfortunately does not particularize), it is both superscribed and subscribed πρὸς τοὺς διασπαρσαμένους, 'to the dispersed.' This conjecture is further favoured by the corruption 'ad Spartos,' which appears in a Latin Bible in the Geneva Library, of the eleventh century. Schölz observes that 'ad Sparsos' occurs in a great number of MSS. Various, indeed, have been the hypotheses regarding the persons to whom this Epistle was written, but it is by no means improbable, from the absence of Old Testament references, that it was addressed to Gentile converts, of which there were several congregations in Asia Minor, where John exercised his apostolic and episcopal functions. If we are to understand the term catholic, as applied to this Epistle, in the sense of circular, we may naturally infer, from the absence of the *epistolary form*, that this was an encyclical letter addressed to several of John's congregations, and in all probability to the churches of the Apocalypse [EPISTLES].

Object and design.—The main object and design of this Epistle has been generally perceived to consist in the refutation of certain errors and heresies in the churches subject to St. John's episcopate. But opinions are divided as to who the teachers of these heresies were, whether Jews, Ebionites, Gnostics, Docetæ, Cerinthus and his followers, or finally the disciples of John the Baptist. This polemical object appears, however, to form but a secondary part of the design of John, his main object being rather to enforce the necessity of progressive sanctification, genuine brotherly love, and the renunciation of the world. The design of the Epistle is didactic rather than polemical; and the Apostle shows

that the great aim of the Christian is to overcome the world: in corroboration of which he appeals to the threefold testimony in its favour, showing that those who receive the witness of man should still more receive the witness of God (1 John v. 8, 9). The problem of the Christian life is thus by faith and love to overcome the infidel and antichristian world, whether Jewish or pagan, which is using both violence and stratagem to destroy the Christian faith. The Ebionites, or Judaizing Christians, recognized only the human nature of Christ, and in their rigid monotheism could not lift up their minds to the divinity of the heavenly *logos* manifested in Christ; while Cerinthus denied his humanity, reducing it to a mere *docetism* or appearance. Against both these errors the polemical portion of the Epistle seems to be addressed.

Another portion of this Epistle seems directed against a certain class of antinomian Christians, who perverted Christian liberty into antichristian licentiousness and libertinism, and decided what was sinful or otherwise, not according to the positive law of God, but by their own internal feelings—thus confounding light and darkness, God and the world. This vital error was rather to be found among the heathen than the Jewish Christians, and was probably founded on a perversion of St. Paul's doctrine of justification by faith.

Allusion has already been made to the supposed senile and incoherent character of the epistle. Lücke, who in his Commentary has given a copious analysis of its contents, rejects this supposition. Its grace and cordiality, adds this able and discriminating writer, its depth and simplicity; in spite of this simplicity, so much freshness; in spite of obscurity in particulars, so great perspicuity in the whole; in spite of apparent disorder and abruptness, so much of internal order and connection; in spite of explicitness in the prevailing ideas, so much of slight allusions and touches on truths that have been expressed; and then, above all, this elevated and pure light and love-image of Christianity—all this has, from the earliest ages, had such an enchanting effect on all nobler minds, as to make this epistle a favourite book, especially with those who more particularly take up Christianity as a religion of love, a religion of the heart—who seek no light without warmth, no faith and no knowledge without love and deed, and who endeavour to render the communion with the Redeemer effective in the love of their brother. See Augustine, *Tractat.* x. *in Ep. Johannis ad Parthos.* Luther's *Zwiefache Ausleg.* ed. Walch. vol. ix. Bullinger, *In Epist. Joan. cum brevi et catholica Exposit.* Episcopius, *Lectt. Sacr.* Whiston's *Commentary on the 3 Cath. Epist. of St. John.* Morius, *Prælect. Exiget.* Lange, *Die Schriften des John.* Lücke *Commentar,* and *Biblical Cabinet* (ut supra.)

There has been no subject connected with Biblical literature which has attracted more attention than this epistle, in consequence of the controversies which have existed since the commencement of the sixteenth century, respecting the once contested but now rejected passage in 1 John v. 7, 8. Of its literary history we shall here present our readers with a brief sketch.

In all the first printed Bibles, which were those of the Latin Vulgate, as amended by Jerome, the clause appeared in the following form:—'Et spiritus est qui testificatur, quoniam *Christus* est veritas. Quoniam tres sunt qui testimonium dant [in cælo, Pater, Verbum, et Spiritus Sanctus, et hi tres unum sunt; et tres sunt qui testimonium dant in terra] spiritus, aqua et sanguis, et tres unum sunt' (*Ed. Princeps,* 1462) (And it is the Spirit that beareth witness, because *Christ* is truth. For there are three which bear witness [in heaven, the Father, the Word, and the Holy Spirit, and these three are one; and there are three which bear witness in earth], the Spirit, and the Water, and the Blood, and these three are one). Such was also the form of the clause in the great majority of manuscripts of the Vulgate. It may therefore be considered as the generally received form at that period. But when the first edition of the Greek Testament appeared, which was that of Erasmus, published at Basle in 1516, the part of the clause which we have placed within brackets (that referring to the three heavenly witnesses) was wanting! and the clause appeared in the following seemingly mutilated form:—Καὶ τὸ πνεῦμά ἐστι τὸ μαρτῦρουν, ὅτι τὸ πνεῦμά ἐστιν ἡ ἀλήθεια· ὅτι τρεῖς εἰσιν οἱ μαρτυροῦντες, τὸ πνεῦμα, καὶ τὸ ὕδωρ, καὶ τὸ αἷμα, καὶ οἱ τρεῖς εἰς τὸ ἕν εἰσιν. 'And it is the Spirit which beareth witness, because the *Spirit* is truth. For there are three which bear witness, the Spirit, and the Water, and the Blood, and these three agree in one.' Hence arose the literary controversy respecting the genuineness of the clause, which has continued with more or less of asperity to our own times. Erasmus was attacked by Stunica, one of the editors of the Complutensian Polyglott, of which the New Testament in Greek and Latin had been printed in 1714 (and consequently before the appearance of Erasmus's edition), although not published until 1522. Erasmus replied to Stunica by observing that he had faithfully followed the Greek manuscripts from which he had edited his text; but professed his readiness to insert the clause in another edition, provided but a single Greek manuscript was found to contain it. Such a manuscript was found in England; upon which Erasmus, although entertaining strong suspicions respecting this manuscript, yet, faithful to his word, inserted the clause in his third edition, which was published in 1522, as follows:—Καὶ τὸ πνεῦμα ἐστι τὸ μαρτυροῦν, ὅτι τὸ πνεῦμά ἐστιν ἡ ἀλήθεια· ὅτι τρεῖς εἰσιν οἱ μαρτυροῦντες ἐν τῷ οὐρανῷ, πατὴρ, λόγος, καὶ πνεῦμα ἅγιον, καὶ οὗτοι οἱ τρεῖς ἕν εἰσι· καὶ τρεῖς εἰσὶν οἱ μαρτυροῦντες ἐν τῇ γῇ, πνεῦμα, καὶ ὕδωρ, καὶ αἷμα, καὶ οἱ τρεῖς εἰς τὸ ἕν εἰσιν. Εἰ τὴν μαρτυρίαν, κ.τ.λ. 'And it is the Spirit which beareth witness, because the Spirit is truth. For there are three which bear witness in heaven, Father, Word, and Holy Spirit, and these three are one; and there are three which bear witness in earth, Spirit, and Water, and Blood, and these three agree in one.'

Indeed, the absence of the article from the six nouns in the disputed passage in this pretended manuscript is of itself sufficient to excite suspicions of, if not completely to overthrow, its genuineness. What has become of the manuscript is not known; but it is generally believed to have been the same with that now possessed by the library of Trinity College, Dublin, called the

Codex Montfortianus, or *Dublinensis*, in which the disputed clause thus appears :—Καὶ τὸ πνεῦμά ἐστι τὸ μαρτυροῦν, ὅτι ὁ Χριστός ἐστιν ἀλήθεια. Ὅτι τρεῖς εἰσιν οἱ μαρτυροῦντες ἐν τῷ οὐρανῷ, πατὴρ, λόγος, καὶ πνεῦμα ἅγιον, καὶ οὗτοι οἱ τρεῖς ἕν εἰσιν. καὶ τρεῖς εἰσιν οἱ μαρτυροῦντες ἐν τῇ γῇ, πνεῦμα, ὕδωρ, καὶ αἷμα. Εἰ τὴν, κ.τ.λ. 'And it is the Spirit that beareth witness, because Christ is truth. For there are three which bear witness in heaven, Father, Word, and Holy Spirit, and these three are one; and there are three which bear witness in earth, Spirit, Water, and Blood. If we receive, &c.' (*without the final clause.*) The Dublin manuscript thus differs from the text of Erasmus's third edition in its remarkable omission of the final clause, as well as in its omission of καὶ before ὕδωρ, while it differs still more from the text of the supposed *Codex Britannicus*, as described by Erasmus himself, when he observes (*Annot.* p. 697, ed. 4) :—'Veruntamen, ne quid dissimulem, repertus est apud Anglos Græcus codex unus, in quo habetur quod in Vulgatis deest; scriptum est enim in hunc modum :'—ὅτι τρεῖς εἰσιν οἱ μαρτυροῦντες ἐν τῷ οὐρανῷ, πατὴρ, λόγος, καὶ πνεῦμα, καὶ οὗτοι οἱ τρεῖς ἕν εἰσιν· καὶ τρεῖς εἰσιν μαρτυροῦντες ἐν τῇ γῇ, πνεῦμα, ὕδωρ, καὶ αἷμα εἰς* τὴν μαρτυρίαν τῶν ἀνθρώπων, κ.τ.λ. 'And that I may not dissemble, there has been discovered one manuscript in England, in which the clause is found which is wanting in the vulgar text of the Greek manuscripts; for it is thus written: "For there are three which bear witness in heaven, Father, Word, *and Spirit*, and these three are one; and there are three bearing witness on earth, Spirit, Water, and Blood, *into* * the testimony of men,"' &c.; while on another occasion he observes that 'the British MS. had οὗτοι οἱ τρεῖς (these three), while the Spanish edition had only καὶ οἱ τρεῖς (and *the* three), which was also the case in the Spirit, Water, and Blood; that the British had ἕν εἰσι (are one), the Spanish εἰς τὸ ἕν εἰσιν (agree in one), and finally that the British added to the earthly witnesses καὶ οἱ τρεῖς εἰς τὸ ἕν εἰσι (and the three agree in one), which was not here added in the Spanish edition.' The Dublin manuscript is generally ascribed to the fifteenth or sixteenth century, and cannot possibly be older than the thirteenth, inasmuch as it contains the Latin chapters, which belong to this century. It is also the *only* Greek manuscript which follows the Vulgate in reading Χριστός for πνεῦμα in the 6th, and ὦμεν for ἐσμεν in the 20th verse of this chapter. It reads, however, θεός, where the Vulgate reads *quod* (1 Tim. iii. 16); which shows that it is not a servile imitation of that version, as some have supposed. The clause has been also found, although in a form still more corrupt, in a manuscript in the Vatican (*Cod. Ottobon.* 298), of the fifteenth century, first collated by Dr. Scholz, of Bonn, as follows :—Ὅτι τρεῖς εἰσιν οἱ μαρτυροῦντες ἀπὸ τοῦ οὐρανοῦ, πατὴρ, λόγος, καὶ πνεῦμα ἅγιον, καὶ οἱ τρεῖς εἰς τὸ ἕν εἰσιν· καὶ τρεῖς εἰσιν οἱ μαρτυροῦντες ἀπὸ τῆς γῆς, τὸ πνεῦμα, καὶ τὸ ὕδωρ, καὶ τὸ αἷμα. Εἰ τὴν μαρτυρίαν, κ.τ.λ. 'For there are three which bear witness *from* heaven, Father, Word, and Holy Spirit, *and the three agree in one;* and there are three which bear witness *from* earth, the Spirit, and the Water, and the Blood. If we receive, &c.' The Latin Vulgate, which is annexed, also omits the final clause of the 8th verse in this copy.

The above is the amount of Greek manuscript authority for this celebrated clause; for although all the libraries in existence have been examined, no other copy has been found which contains a vestige of it.* Nor has it been once cited by a single Greek father, although abundant opportunities presented themselves for introducing it, which they could not have failed to avail themselves of, had it existed in their copies; but they have invariably cited the passage as it has been preserved in all the ancient manuscripts. It found its way, however, into the *received text* of the Greek Testament, having been copied from Erasmus's third, fourth, and fifth editions (1522, 1527, and 1535), with more or less of variation, into all Stephens's editions, from the third or folio edition of which it was adopted by Beza in all his editions, the first of which was published in 1565, and again by Elzevir, in his edition of 1624, to which his anonymous editor gave the name of *Textus undique receptus*. The following is the form which it finally assumed in these editions :—Ὅτι τρεῖς εἰσιν οἱ μαρτυροῦντες ἐν τῷ οὐρανῷ, ὁ πατὴρ, ὁ λόγος, καὶ τὸ ἅγιον πνεῦμα· καὶ οὗτοι οἱ τρεῖς ἕν εἰσι· 8. Καὶ τρεῖς εἰσιν οἱ μαρτυροῦντες ἐν τῇ γῇ, τὸ πνεῦμα, καὶ τὸ ὕδωρ, καὶ τὸ αἷμα· καὶ οἱ τρεῖς εἰς τὸ ἕν εἰσιν. 'For there are three which bear witness in heaven, the Father, the Word, and the Holy Spirit, and these three are one; and there are three which bear witness in earth, the Spirit, and the Water, and the Blood, and the three agree in one.'

The earliest Greek form in which the disputed clause is found is contained in the Latin translation of the Acts of the Council of Lateran, held in 1215, viz. :—Ὅτι τρεῖς εἰσιν οἱ μαρτυροῦντες ἐν οὐρανῷ, ὁ πατὴρ, λόγος, καὶ πνεῦμα ἅγιον· καὶ τοῦτοι οἱ τρεῖς ἕν εἰσιν, καθὼς δὲ προστίθησι * * * * καθὼς ἐν τισὶ κώδηξιν εὑρίσκεται. 'For there are three which bear witness in heaven, the Father, Word, and Holy Spirit, and these three are one; and it is immediately added * * * * as it is found in some copies.' The omitted passages, represented by the asterisks, are thus supplied in the original :—Statimque subjungitur, Et tres sunt qui testimonium dant in terra, spiritus, aqua, et sanguis; et tres unum sunt; sicut in codicibus quibusdam invenitur. 'And it is immediately added, and there are three which bear witness in earth, the Spirit, the Water, and the Blood; and these three are one, as is found in some copies;' meaning that the final clause, *et hi tres unum sunt* (*and these three are one*), is found in some copies of the Latin Vulgate.

The first Greek writer who absolutely cites any part of it is Manuel Calecas, a Dominican monk of the fourteenth century, who has the words—τρεῖς εἰσιν οἱ μαρτυροῦντες, ὁ πατὴρ, ὁ λόγος, καὶ τὸ πνεῦμα τὸ ἅγιον. 'There are three which bear witness, the Father, the Word, and the Holy

* This is probably a misprint.

* There are above one hundred and eighty Greek manuscripts of this Epistle, known to exist in various libraries, written between the fifth and fifteenth centuries, not one of which contains a vestige of the disputed clause.

Spirit;' and in the next century it is thus cited by Joseph Bryennius, a Greek monk:—Καὶ τὸ πνεῦμά ἐστι μαρτυροῦν, ὅτι ὁ Χριστός ἐστιν ἡ ἀλήθεια. ὅτι τρεῖς εἰσιν οἱ μαρτυροῦντες ἐν τῷ οὐρανῷ, ὁ πατὴρ, ὁ λόγος, καὶ τὸ πνεῦμα τὸ ἅγιον· καὶ οὗτοι οἱ τρεῖς ἕν εἰσι. καὶ τρεῖς εἰσιν οἱ μαρτυροῦντες ἐν τῇ γῇ, τὸ πνεῦμα, τὸ ὕδωρ, καὶ τὸ αἷμα. 'And it is the Spirit which beareth witness, because *Christ* is truth. For there are three which bear witness in heaven, the Father, the Word, and the Holy Spirit, and these three are one; and there are three which bear witness on earth, the Spirit, the Water, and the Blood.'

It will have been observed that these writers all omit the final clause of the 8th verse, contrary to the authority of all the Greek manuscripts, and in this they were followed by the Complutensian editors, whose form of the verse we have not before noticed, as it does not appear whether they had any manuscript authority whatever for the clause, which, however, they inserted in their splendid Polyglott edition, begun in 1502, finished in 1517, but not published until 1522, wherein it appears in the following form:—Καὶ τὸ πνεῦμά ἐστι τὸ μαρτυροῦν, ὅτι τὸ πνεῦμά ἐστιν ἡ ἀλήθεια. ὅτι τρεῖς εἰσιν οἱ μαρτυροῦντες, ἐν τῷ οὐρανῷ, ὁ πατὴρ, καὶ ὁ λόγος, καὶ τὸ ἅγιον πνεῦμα· καὶ οἱ τρεῖς εἰς τὸ ἕν εἰσι. καὶ τρεῖς εἰσιν οἱ μαρτυροῦντες ἐπὶ τῆς γῆς, τὸ πνεῦμα, καὶ τὸ ὕδωρ, καὶ τὸ αἷμα. Εἰ τὴν μαρτυρίαν, κ.τ.λ. 'And it is the Spirit which beareth witness, because the Spirit is truth. For there are three which bear witness in heaven, the Father, and the Word, and the Holy Spirit, *and the three agree in one* (as in Cod. Ottob.); and there are three which bear witness *on* earth, the Spirit, and the Water, and the Blood. If we receive, &c.' These editors have thus also omitted the final clause of the 8th verse, as well in the Greek as in their edition of the Latin Vulgate. For this latter omission they had the authority of several modern manuscripts of the Vulgate, and of the Council of Lateran, to which they add in a note that of Thomas Aquinas, who had charged the Arians with having forged this final clause, which had been interpreted by the Abbot Joachim to have implied a unity of love and consent only, and not of essence.

This final clause of the 8th verse, however, exists in all manuscripts of the Vulgate written before the thirteenth century, and in the printed editions published by authority of the Roman See since the Council of Trent, which have *hi* tres unum sunt.

The clause of the three heavenly witnesses is also absent from all existing manuscripts of the Latin Vulgate, written between the eighth and tenth centuries, anterior to which date there is no manuscript of this version now in existence, containing the Catholic Epistles. Nor has any writer of the western church cited the passage before Cassiodorus at the close of the sixth century, although even the fact of his having done so is doubted by Porson (*ut infra*). There is, indeed, a preface to the *canonical* Epistles, bearing the name of St. Jerome, in which the omission of this clause is ascribed to 'false translators;' but this, as we shall hereafter see, is a forgery. The clause is also wanting in *all* the manuscripts of the Syriac, Armenian, and other ancient versions.

From the circumstance, however, of the clause in question having been cited by two north-west African writers of the fifth century—Vigilius, Bishop of Thapsus (the supposed author of the Athanasian Creed), and Victor Vitensis, the historian of the Vandal persecution—it has been fairly presumed that it existed in their time in some of the African copies of the old Latin version, from whence, or from the citations of these writers, it may have found its way into the later manuscripts of the Vulgate. It is thus cited by Victor, as contained in the Confession of Faith drawn up by Eugenius, Bishop of Carthage:—Tres sunt qui testimonium perhibent in cœlo, Pater, Verbum, et Spiritus Sanctus, et hi tres unum sunt. 'There are three which furnish testimony in heaven, the Father, the Word, and the Holy Spirit, and these three are one.' Vigilius, however, cites it in so many various ways, that little reliance can be placed on his authority; he transposes the clauses thus:—'Johannes Evangelista ad Parthos: tres sunt qui testimonium perhibent in terrâ, aqua, sanguis, et *caro*, et tres *in nobis* sunt, et tres sunt qui testimonium perhibent in cœlo, Pater, Verbum, et Spiritus, et hi tres unum sunt' (John the Evangelist to the Parthians: There are three which furnish testimony in earth, the Water, the Blood, and the *Flesh*, and the three are *in us;* and there are three which offer testimony in heaven, the Father, the Word, and the Spirit, and these three are one). *Contra Varimadum.* And again, 'Tres sunt qui testimonium *dicunt* in cœlo, Pater, et Verbum, et Spiritus, et in *Christo Jesu unum sunt*' (There are three which speak testimony in heaven, the Father, the Word, and the Spirit, and the three are one in Christ Jesus). After this it is cited by St. Fulgentius, Bishop of Rusopa, in the beginning of the sixth century, but omitted in the same century by Facundus, Bishop of Hermione, from which it is at least evident that the copies in that age and country varied. But, at a much earlier period, the whole clause is thus cited by St. Augustine of Hippo:—Tres *sunt testes, Spiritus, aqua, et sanguis, et tres unum sunt.* '*There are three witnesses, the Spirit, and the Water, and the Blood, and these three are one.*' Tertullian and Cyprian have been supposed, indeed, to have referred to the clause, but the proof of this depends on the proof of the previous fact, whether the clause existed or not in their copies. The citation of Cyprian, 'Qui tres unum sunt' (which three are one), and of Tertullian, 'et hi tres unum sunt' (and these three are one), belong equally to the eighth as well as the seventh verse; and there is nothing surprising in these fathers mystically applying the spirit, the water, and the blood, to signify the three persons of the Trinity, as was evidently done by Augustine at a later period (*Cont. Maximin.* iii. 22; and by Eucherius, in the 5th century).

It has been maintained that, although no ancient Greek manuscripts now extant contain the clause, it must have existed in some of those which were used by the original editors, especially Robert Stephens. In his beautiful folio edition (1550) Stephens cites seven Greek manuscripts in the Catholic Epistles, of which he had three from the King's library. When any words are omitted in any of his manuscripts he places in his text an obelus before the first word, and a small semicircle or crotchet after the last. In the passage in question the obelus is placed before ἐν τῷ οὐρανῷ, and the crotchet immediately after

these words; from which it has been inferred that these words only, and not the whole passage, were absent from his seven MSS. Subsequent inquiries, however, undertaken by Lucas Brugensis, Father Simon, and the late Bishop Marsh, seem to leave no doubt that the crotchet was inserted in the wrong place; for not one of the manuscripts now in the King's library contains the passage; and one of Stephens's manuscripts, now in the university of Cambridge, is equally without it. Archdeacon Travis, indeed, denies the identity of this manuscript; but Bishop Marsh (*Letters to Travis*) shows that the probability of their identity is as two nonillions to a unity. Bishop Marsh's *Letters to Travis* have been in other respects truly designated as 'a mass of recondite and useful biblical erudition.' We have mentioned this circumstance in order that the reader may fully understand the assertion of Mr. Gibbon, which we shall presently refer to: 'The three witnesses have been established in our Greek Testament, by the prudence of Erasmus, the honest bigotry of the Complutensian editors, the typographical fraud or error of Robert Stephens, in the placing of a crotchet, or the deliberate fraud or strange misapprehension of Theodore Beza.'

The following are some of the principal literary controversies to which this famous clause has given rise, of which a more complete account will be found in Mr. Charles Butler's *Horæ Biblicæ*. The earliest was the dispute between Erasmus and Lee, afterwards Archbishop of York, and between Erasmus and Stunica, one of the Complutensian editors. Erasmus was the first to suspect the genuineness of the preface to the *Canonical* Epistles above referred to, which ascribes the omission of the clause to false translators or transcribers. The genuineness of this preface, which led Sir Isaac Newton to charge St. Jerome with being the fabricator of the disputed clause (whereas it is certain that that learned Father was totally unacquainted with its existence) of the text, is now given up. It is considered in the Benedictine edition of Jerome's works to be a forgery of the 9th century (Burigni, *Vie d'Erasme*, Paris, 1757, i. 372-381; ii. 163-175; *Crit. Sac.* vii. 1229).

It was afterwards attacked by Sandius the Arian (*Nucleus Hist. Ecclesiast.* Cosmopoli 1669; and *Interpret. Paradox. in Johan.*). It was defended by Selden (*De Synedricis Ebræor.*) and ably attacked by the Roman Catholic Father Simon (*Hist. Critique du Texte*, 1680, &c. &c.). It was defended again by Martin (pastor of the Reformed church in Utrecht, 1717), who was replied to by Thomas Emlyn, the celebrated and much persecuted English Presbyterian (*A full Inquiry*, &c. 1715-1720), and by Cæsar de Missy, French preacher in the Savoy. There are other able treatises on the same side by Dr. Benson, Sir Isaac Newton, and the learned printer Mr. Bowyer; and in its favour by Smith (1690), Kettner, Calamy (1722), as well as by Bossuet (16—), and by Calmet (1720) in France, and Semler in Germany (1751). In Germany it was also attacked by Schmidt (*Hist. Antiqua*, 1774), and Michaelis, in his *Introduction;* but found an able defender in the excellent Bengel (*Gnomon*, 1773), who conceived that the passage contained a divine internal evidence, but at the same time maintained that its genuineness depended on the transposition of the two verses so as to make the earthly witnesses precede the heavenly, according to the citation (*supra*) of Vigilius of Thapsus. (See *Christian Remembrancer*, vol. iv. p. 43, note.)

The third and most important stage of the controversy may be said to commence with the note of Gibbon, above referred to, and which was attacked by Archdeacon Travis in three letters, 1784-1786. This publication gave rise to the most celebrated work which had yet appeared on the subject, Professor Porson's *Letters* (1788): 'an eternal monument of his uncommon erudition, sagacity, and tact' (*Horæ Biblicæ*). Mr. Butler concludes his enumeration with the *Observations* of Dr. Adam Clarke on the text of the heavenly witnesses (1805).

Our space will not allow us to enter into detail in regard to the principal publications which have appeared on the subject since this period. We shall only refer to a few of the principal. Griesbach's *Diatribe*, at the close of the second volume of his celebrated critical edition of the Greek Testament (1806), contains a complete and masterly view of the evidence on both sides; but as this eminent critic had completely rejected the passage from the text, he met with an indefatigable adversary in this country in the late Bishop Burgess. See his *Vindication* (1821), and *Introduction* (1833). The writings of this prelate drew down many learned replies, but his most able and successful opponent was Dr. Turton, Regius Professor at Cambridge, and now Dean of Westminster (see especially Dean Turton's *Vindication of the Literary Character of Professor Porson from the Animadversions of the Right Rev. Thomas Burgess, D.D., &c.*, published under the name of Crito-Cantabrigiensis, 1827). A temperate vindication of the genuineness of the passage had been published by the late Bishop Middleton (1808), in his work on the Greek article, which was also replied to by Dr. Turton (*ut supra*). The *Memoir of the Controversy respecting the Heavenly Witnesses* (1830), by the Rev. W. Orme, contains interesting critical notices of the principal writers on both sides of this much agitated question.

In the year 1834, Dr. Wiseman renewed the controversy in favour of the clause, in *Two Letters* in the *Catholic Magazine*, vol. ii. and iii., reprinted at Rome, 1835. Dr. Wiseman's principal arguments are founded on the citations in African writers. He supposes that there were two ancient recensions of the Vulgate, the Italian, from which, as well as from the Greek MSS., the clause had been lost at an early period, and the African. He supposes that this recension contained the clause which existed in the Greek MSS. from which it was made, and that these were of greater antiquity than any we can now inspect. He further maintains, after Eichhorn, that, as the Greek language was sufficiently known in Italy to preclude the necessity of an early translation of the Latin in that country, Africa was most probably the birthplace of the primary Latin translation, and that consequently the African recension of this version is far superior in authority to the Italian. He therefore draws the inference that 'the existence of an African recension containing the verse gives us a right to consider as quotations passages of African writers (such as those of Cyprian and Tertullian) which in the works of Italian authors might be considered doubtful.' As, however,

Augustine's acknowledged writings all evince his ignorance of the existence of this passage, Dr. Wiseman supposes that Augustine ordinarily made use of the Italian recension, which did not contain it. However he adduces the authority of a manuscript of the *Speculum* of Augustine preserved at Rome, in the monastery of the Holy Cross of Jerusalem, to prove that Augustine occasionally used the African recension, and that he has cited the identical passage as follows:—Item Johannis in Æpistolâ.....Item illic Tres sunt qui testimonium dicunt in cœlo, Pater, Verbum et Spiritus Sanctus, et hi tres unum sunt (cap. ii. fol. 19, *De Distinct. Personarum*). Dr. Wiseman supposes this manuscript, which is mentioned by Blanchini, to have been written in the seventh century. It has not, however, been proved to be a genuine work of Augustine. (See Wright's *Appendix to his Translation of Seiler's Hermeneutics*, which contains some account of the state of the controversy respecting this clause to the year 1835; also Horne's *Introduction*, 8th edition, vol. ii. pt. ii. p. 185, vol. iv. p. 448-471).

The most remarkable circumstance connected with the literary history of the clause, since this period, properly belongs to the history of editions of the New Testament. The clause appears in the principal printed editions of the New Testament before the time of Griesbach. These were the editions of Mill (1707), Bengel (1734), and Wetstein (1751); the two former of whom held it to be genuine. Since the time of Griesbach it has been generally omitted in all critical editions, and especially in that of the learned Roman Catholic Professor Scholz, of Bonn (1836), who, though following a different system of recensions from that of Griesbach, has altogether rejected the passage from the text as decidedly spurious, and as opposed to the authority of all authentic Greek MSS., of all ancient MSS., of the Latin Vulgate, and of the Greek, Latin, and Oriental Fathers. The venerable Bishop Burgess replied to Scholz three weeks before his death, in 1836.

Various have been the opinions respecting the internal evidence for and against the genuineness of the passage. The advocates of the clause have generally maintained that the context requires its insertion, while its adversaries maintain that the whole force of the argument is destroyed by it. Lücke, one of the ablest modern commentators on St. John's writings, maintains that internal evidence alone would be sufficient to reject the passage, inasmuch (besides other reasons) as St. John never uses ὁ πατήρ and ὁ λόγος as correlates, but ordinarily, like St. Paul, and every other writer of the New Testament, associates ὁ υἱος with ὁ πατήρ (ii. 22, 23; iv. 14; v. 9, 11, 20, &c.), and always refers the λόγος in Christ to ὁ θεός, and not to ὁ πατήρ. He unites with those critics who look upon the rejected passage as an allegorical gloss, which found its way into the Latin text, where it has, 'ever since the fourth century, firmly maintained its place as a welcome and protective passage,' &c. He adds, however, that exegetical conscience will, in our age, forbid the most orthodox to apply this passage, even if it were genuine, for such a purpose, as ἐν εἶναι has quite a different sense from that which is required by the doctrine of the Trinity. Here Lücke fully coincides with the late Bishop Middleton (*Greek Article*). Lücke's conclusion is a strong one. 'Either these words are genuine, and the Epistle, in this case, a production of the third or fourth century, or the Epistle is a genuine work of St. John's, and then these words spurious.'

The latest attempt to vindicate the genuineness of the passage is that of M. Gaussen of Geneva, in his *Theopneustia* (1839). But his reasonings are founded on a palpable error—the interpolation of the words ἐν τῇ γῇ (*in the earth*) in the eighth verse, which he absolutely cites upon the authority of Griesbach's text, *where they do not exist!* The corresponding words *in terrâ* are, indeed, found in the *present* text of some MSS. of the Vulgate, and of some ancient writers, although wanting in the seventh verse.

Luther uniformly rejected this clause from all his translations. It is absent from his last edition (1546), published after his death, and was first inserted in the Frankfort edition of 1574, but again omitted in 1583, and in subsequent editions. Since the beginning of the seventeenth century, with the exception of the Wittemberg edition of 1607, its insertion has been general. This was, however, in opposition to Luther's injunction.

It is inserted in all the early English printed versions, commencing with Coverdale's in 1536, but is generally printed either in brackets or in smaller letters. It was, however, printed in the editions of 1536, 1552, and in the Geneva Bible (1557), without any marks of doubt. It found its way perhaps from Beza's Greek Testament into the then authorized English version. The following is probably the oldest form extant, in which they appear in the English language, in a translation from the Vulgate earlier than the time of Wicliff:—'For three ben that geven witnessing in heven, the Fadir, the Word or Sone, and the Holy Ghoost, and these three ben oon; and three ben that geven witnessing in erthe, the Spirit, Water, and Blood, and these three ben oon' [Scriptures, Holy].—W. W.

JOHN, EPISTLES, II. and III. [Antilegomena, see John].

JOHN MARK. [Mark.]

JOHN HYRCANUS. [Maccabees.]

JOIADA (יוֹיָדָע, contraction of Jehoiada, which see), a high-priest of the Jews, successor to Eliashib, or Joashib, who lived under Nehemiah, about B.C. 434 (Neh. xiii. 28).

JOKSHAN (יָקְשָׁן, *fowler;* Sept. Ἰεξάν), second son of Abraham and Keturah, whose sons Sheba and Dedan appear to have been the ancestors of the Sabæans and Dedanites, who peopled a part of Arabia Felix (Gen. xxv. 2, 3) [Arabia].

JOKTAN (יָקְטָן, *small;* Sept. Ἰεκτάν), one of the sons of Eber, a descendant from Shem (Gen. x. 25, 26), and the supposed progenitor of many tribes in Southern Arabia. The Arabians call him Kahtan, and recognise him as one of the principal founders of their nation. See Schultens, *Hist. Imperii Joctandin. in Arabia Feliee;* Pocock, *Spec. Hist. Arab.* pp. 3, 38; Bochart's *Phaleg.* iii. 15 [Arabia].

JOKTHEEL (יָקְתְאֵל, *God-subdued;* Sept. Ἰεθοήλ). 1. A name given by King Azariah to the city Sela, or Petra, the capital of Arabia Petræa,

when he took it from the Edomites (2 Kings xiv. 7) [PETRA]. 2. There was also a city of this name in the tribe of Judah (Josh. xv. 38).

JONADAB (יְהוֹנָדָב, contraction of יְהוֹנָדָב, *God-impelled;* Sept. Ἰωναδάβ). 1. A nephew of David, a crafty person, whose counsel suggested to his cousin Amnon the means by which he accomplished his abominable design upon his half-sister Tamar (2 Sam. xiii. 4, 5).

2. A son or descendant of Rechab, the progenitor of those nomadic Rechabites, who held themselves bound by a vow to abstain from wine, and never to relinquish the nomadic life. The principle on which the tribe acted may be considered elsewhere [RECHABITES]. Jonadab was at the head of this tribe at the time when Jehu received his commission to exterminate the house of Ahab, and is supposed to have added to its ancient austerities the inhibition of wine. He was held in great respect among the Israelites generally: and Jehu, alive to the importance of obtaining the countenance and sanction of such a man to his proceedings, took him up in his chariot, when on his road to Samaria to complete the work he had begun at Jezreel. The terms of the colloquy which took place on this occasion are rather remarkable. Perceiving Jonadab, he saluted him, and called out, 'Is thine heart right, as my heart is with thy heart?' Jonadab answered, 'It is.' Then said Jehu, 'If it be, give me thine hand.' And he gave him his hand, and was taken up into the chariot, Jehu inviting him to 'Come and see my zeal for the Lord' (2 Kings x. 15-17; Jer. xxxv. 6-10). It would seem that the Rechabites were a branch of the Kenites, over another branch of whom Heber was chief in the time of Deborah and Barak (Judg. iv. 11, 17): and as it is expressly said that Jonadab went out to meet Jehu, it seems probable that the people of Samaria, alarmed at the menacing letter which they had received from Jehu, had induced Jonadab to go to meet and appease him on the road. His venerated character, his rank as the head of a tribe, and his neutral position, well qualified him for this mission; and it was quite as much the interest of Jonadab to conciliate the new dynasty, in whose founder he beheld the minister of the divine decrees, as it was that of Jehu to obtain his concurrence and support in proceedings which he could not but know were likely to render him odious to the people.

JONAH (יוֹנָה; Sept. Ἰωνᾶς), the fifth in order of the minor prophets. No era is assigned to him in the book of his prophecy, yet there is little doubt of his being the same person who is spoken of in 2 Kings xiv. 25. The Jewish doctors, with their usual puerility, have supposed him to be the son of the widow of Sarepta: 'Now by this I know,' said she to Elijah, 'that thou art a man of God, and that the word of the Lord in thy mouth is truth' אמת (1 Kings xvii. 24). The restored child was thenceforward named בן־אמתי, a title which was to preserve the memory of his miraculous resuscitation (Hieron. *Præfat. in Jonam*). His birthplace was Gath-hepher, in the tribe of Zebulon. Jonah flourished in or before the reign of Jeroboam II., and predicted the successful conquests, enlarged territory, and brief prosperity of the Israelitish kingdom under that monarch's sway. The oracle itself is not extant, though Hitzig has, by a novel process of criticism, amused himself with a fancied discovery of it in chaps. xv. and xvi. of Isaiah. Hitzig, *Des Proph. Jon. Orakel. ueber Moab Kritisch-vindicrit, &c.*, Heidelberg, 1831.

The book of Jonah contains an account of the prophet's commission to denounce Nineveh, and of his refusal to undertake the embassy—of the method he employed to escape the unwelcome task [TARSHISH], and the miraculous means which God used to curb his self-willed spirit, and subdue his petulant and querulous disposition. The third and fourth chapters briefly detail Jonah's fulfilment of the divine command, and present us with another exemplification of his refractory temper. His attempt to flee from the presence of the Lord must have sprung from a partial insanity, produced by the excitement of distracting motives in an irascible and melancholy heart. The temerity and folly of the fugitive could scarcely be credited, if they had not been equalled by future outbreaks of a similar peevish and morbid infatuation. The mind of Jonah was dark and moody, not unlike a lake which mirrors in the waters the gloomy thunder-clouds which overshadow it, and flash over its sullen waves a momentary gleam.

The history of Jonah is certainly striking and extraordinary. Its characteristic prodigy does not resemble the other miraculous phenomena recorded in Scripture; yet we must believe in its literal occurrence, as the Bible affords no indication of being a mythus, allegory, or parable. On the other hand, our Saviour's pointed and peculiar allusion to it is a presumption of its reality (Matt. xii. 40). The opinion of the earlier Jews (Tobit xiv. 4; Joseph. *Antiq.* ix. 10. 2) is also in favour of the literality of the adventure. It requires less faith to credit this simple excerpt from Jonah's biography, than to believe the numerous hypotheses that have been invented to deprive it of its supernatural character, the great majority of them being clumsy and far-fetched, doing violence to the language, and despite to the spirit of revelation; distinguished, too, by tedious adjustments, laborious combinations, historical conjecture, and critical jugglery. In vindication of the reality of this striking narrative, it may be argued that the allusions of Christ to Old Testament events on similar occasions are to actual occurrences (John iii. 14; vi. 48); that the purpose which God had in view justified his miraculous interposition; that this miracle must have had a salutary effect both on the minds of the Ninevites and on the people of Israel. Neither is the character of Jonah improbable. Many reasons might induce him to avoid the discharge of his prophetic duty—fear of being thought a false prophet, scorn of a foreign and hostile race, desire for their utter destruction, a false dignity which might reckon it beneath his prerogative to officiate among uncircumcised idolaters (Verschuir, *Opusc.* p. 73, &c.; Alber, *Institut. Hermen. Vet. Test.* iii. 399, 407; Jahn, *Introduction to the Old Testament*, translated by S. Turner, pp. 372, 373, translator's notes; Budleus, *Hist. Eccles. V. T.* ii. 589, sqq.; Laberenz, *De Vera. lib. Jonæ Interp.* Fulda, 1836). Some, who cannot altogether reject the reality of the narrative, suppose it to have had a historical basis, though its present form be fanciful or mythical. Such an opinion is the evident result of a mental struggle between receiving it as

a real transaction or regarding it as wholly a fiction (Goldhorn, *Excurs. z. B. Jon.* p. 28; Friedrischsen, *Krit. Ueberblick der Ausichten B. Jon.* p. 219). Grimm, in his *Uebersetz*, p. 61, regards it as a dream produced in that sleep which fell upon Jonah as he lay on the sides of the ship. The opinion of the famous Herman von der Hordt, in his *Jonas in luce*, &c. a full abstract of which is given by Rosenmüller (*Prolegom. in Jonam.* p. 19), was, that the book is a historical allegory, descriptive of the fate of Manasseh, and Josiah his grandson, kings of Judah. The fancy of this eccentric author has found ample gratification. Tarshish, according to him, represents the kingdom of Lydia; the ship, the Jewish republic, whose captain was Zadok the high-priest; while the casting of Jonah into the sea symbolized the temporary captivity of Manasseh in Babylon. We cannot say, with Rosenmüller, that this theory deserves even the praise of ingenious fiction.

Others regard this book as an allegory, such as Bertholdt and Rosenmüller, Gesenius, and Winer —an allegory based upon the Phœnician Mythus of Hercules and the Sea-monster. Less, in his tract, *Von Historischen Styl der Urwelt*, supposed that all difficulty might be removed by imagining that Jonah, when thrown into the sea, was taken up by a ship having a large fish for a figure-head—a theory somewhat more pleasing than the rancid hypothesis of Anton, who fancied that the prophet took refuge in the interior of a dead whale, floating near the spot where he was cast overboard (Rosen. *Prolegom. in Jon.* p. 328). Not unlike the opinion of Less is that of Charles Taylor, in his Fragments affixed to Calmet's *Dictionary*, No. cxlv., that דג signifies a life-preserver, a notion which, as his manner is, he endeavours to support by mythological metamorphoses founded on the form and names of the famous fish-god of Philistia. De Wette regards the story as not a true history, yet not a mere fiction; its materials being derived from popular legends, and wrought up with the design of making a didactic work. But many regard it as a mere fiction with a moral design—the grotesque coinage of a Hebrew imagination. This opinion, variously modified, seems to be that of Semler, Michaelis, Herder, Stäudlin, Eichhorn, Augusti, Meyer, Pareau, and Maurer.

The plain, literal import of the narrative, being set aside with misapplied ingenuity, the supposed design of it has been very variously interpreted. Michaelis (*Ubersetz d. N. T.* part xi. p. 101) and Semler (*Apparat. ad Lib. Vet. Test. Interpret.* p. 271) supposed the purpose of the narrative to be the injustice of that arrogance and hatred cherished by the Jews towards other nations. Eichhorn (*Einleit.* § 577), and Jahn (*Introduct.* § 127) think the design was to teach the Jews that other people with less privileges excelled them in pious obedience. Kegel (*Bebel d. A. und N. Test.* vol. vii. p. 129, sqq.) argues that this episode was meant to solace and excite the prophets under the discharge of difficult and dangerous duties; while Paulus (*Memorabilia*, vi. 32, sqq.) maintains that the object of the author of *Jonah* is to impress the fact that God remits punishment on repentance and reformation. Similar is the idea of Kimchi and Pareau (*Interpretation of Old Testament*, Biblical Cabinet, No. xxv. p. 263). Krahmer thinks that the theme of the writer is the Jewish colony in its relation to the Samaritans (*Des B. Jon. Krit. untersucht*, p. 65). Maurer (*Comment. in Proph. Min.*) adheres to the opinion which lies upon the surface, that it inculcates the sin of not obeying God, even in pronouncing severe threatenings on a heathen people; and lastly, Koester (*Die Propheten des A. und N. Test*, Leipz. 1839) favours the malignant insinuation that its chief end was to save the credit of the prophets among the people, though their predictions against foreign nations might not be fulfilled, as Nineveh was preserved after being menaced and doomed.

These hypotheses are all vague and baseless, and do not merit a special refutation. Endeavouring to free us from one difficulty they plunge us into others yet more intricate and perplexing. Much profane wit has been expended on the miraculous means of Jonah's deliverance, very unnecessarily and very absurdly; it is simply said, 'The Lord had prepared a great fish to swallow up Jonah.' Now the species of marine animal is not defined, and the Greek κῆτος is often used to specify, not the genus whale, but any large fish or sea-monster. All objections to its being a whale which lodged Jonah in its stomach from its straitness of throat, or rareness of haunt in the Mediterranean, are thus removed. Hesychius explains κῆτος as θαλάσσιος ἰχθὺς παμμεγέθης. Eustathius explains its correspondent adjective κητώεσσαν by μεγάλην, in the Homeric line (*Iliad*, ii. 581)—

οἱ δ' εἶχον κοίλην Λακεδαίμονα κητώεσσαν.

Diodorus Siculus speaks of terrestrial monsters as κητώδη ζῶα, and describes a huge fish as κῆτος ἄπιστον τὸ μέγεθος. The Scripture thus speaks only of an enormous fish, which under God's direction swallowed the prophet, and does not point out the species to which the voracious prowler belonged. There is little ground for the supposition of Bishop Jebb, that the asylum of Jonah was not in the stomach of a whale, but in a cavity of its throat, which, according to naturalists, is a very capacious receptacle, sufficiently large, as Captain Scoresby asserts, to contain a merchant ship's jolly-boat full of men (Bishop Jebb, *Sacred Literature*, p. 178). Since the days of Bochart it has been a common opinion that the fish was of the shark species, *Lamia canis carcharias*, or 'sea-dog' (Bochart, *Op.* iii. 72; Calmet's *Dissertation sur Jon.*). Entire human bodies have been found in some fishes of this kind. The stomach, too, has no influence on any living substance admitted into it. Granting all these facts as proof of what is termed the economy of miracles, still must we say, in reference to the supernatural preservation of Jonah, Is anything too hard for the Lord?

Though we cannot accede to the system of Gale, Huet, Bryant, Faber, and Taylor, in tracing all pagan fiction, legend, and mythology to scripture facts and events, yet we are inclined to believe that in the miraculous incident of the book of Jonah is to be found the origin of the various fables of Arion and the Dolphin (Herodot. i. 24), and the wild adventure of Hercules which is referred to in Lycophron (*Cassandra*, v. 33):—

Τριεσπέρου λέοντος ὃν ποτε γνάθοις
Τρίτωνος ἡμάλαψε κάρχαρος κύων.

Oft that three-sighted lion whom of old
Triton's fierce dog with furious jaws devoured.

Cyrillus Alex., in his *Comment. in Jon.*, notices this similitude between the incident of Jonah and the fabled enterprise of the son of Alcmena. Compare, too, Theophylact (*Opp.* tom. iv. p. 169). On what portion of the coast Jonah was set down in safety we are not informed. The opinions held as to the peculiar spot by Rabbins and other Thaumaturgic expositors need not to be repeated. The prophet proceeded, on receiving a second commission, to fulfil it. The fearful menace had the desired effect. The city humbled itself before God, and a respite was vouchsafed. The king (Pul, according to Usher) and his people fasted, and their penitence was accepted. The spirit of Jonah was chafed that the doom he had uttered was not executed. He retired to a station out of the city whence he might witness the threatened catastrophe. Under the shadow of a gourd prepared by God he reclined, while Jehovah taught him by the growth and speedy death of this plant, and his attachment to it, a sublime lesson of patient and forgiving generosity. No objection against the credibility of this book can be brought from the described size and population of the Assyrian metropolis (*Pictorial Bible*, sub loc.). The gourd, קִיקָיוֹן, was probably the *Ricinus*, whose name *Kiki* is yet preserved in some of the tongues of the East. The Sept. renders it κολοκύνθη. Jerome translates it *hedera*, but against his better judgment and for fear of giving offence to the critics of his age, as he quietly adds in justification of his less preferable rendering, 'sed timuimus grammaticos.' The book of Jonah is a simple narrative, with the exception of the prayer or thanksgiving in chap. ii. Its style and mode of narration are uniform. There are no traces of compilation, as Nactigall supposed; neither is the prayer, as De Wette (*Einleit.* § 237) imagines, improperly borrowed from some other sources. That prayer contains, indeed, not only imagery peculiar to itself, but also such imagery as at once was suggested to the mind of a pious Hebrew preserved in circumstances of extreme jeopardy. On this principle we account for the similarity of some portions of its phraseology to Ps. lix., xlii., &c. The language in both places had been hallowed by frequent usage, and had become the consecrated idiom of a distressed and succoured Israelite. Perhaps the prayer of Jonah might be uttered by him, not during his mysterious imprisonment, but after it. May not מִמְּעֵי הַדָּגָה be rendered 'on account of,' a common signification of the particle מִן (Gesen. *Lex.* sub voc.)? or rather may not מִן have what Nordheimer calls its primary signification, viz., that of 'distance *from* a place or person?' Jonah prayed unto the Lord his God out, *i. e.* when out, of the fish's belly (compare Job xix. 26; xi. 15). The hymn seems to have been composed after his deliverance, and the reason why his deliverance is noted after the hymn is recorded may be to show the occasion of its composition. 'The Lord had spoken unto the fish, and it had vomited Jonah on the dry land.' There was little reason either for dating the composition of this book later than the age of Jonah, or for supposing it the production of another than the prophet himself. The Chaldæisms which Jahn and others find may be accounted for by the nearness of the canton of Zebulon, to which Jonah belonged, to the northern territory, whence by national intercourse Aramaic peculiarities might be insensibly borrowed. Gesenius and Bertholdt place it before the exile; Jahn and Koester after it. Rosenmüller supposes the author may have been a contemporary of Jeremiah; Hitzig postpones it to the period of the Maccabees. Apocryphal prophecies ascribed to Jonah may be found in the pseudo-Epiphanius (*De Vitis Proph.* c. 16), and the *Chronic. Paschale*, p. 149. Various spots have been pointed out as the place of his sepulchre, such as Mosul in the East, and Gath-hepher in Palestine; while the so-called Epiphanius speaks of his retreating to Tyre and being buried there in the tomb of Cenezæus, judge of Israel.

Among the numerous commentators on Jonah may be noticed J. Gerhardi, *Annot. in Proph. Am. et Jon.* &c. Frag. 1692; Lessing, *Observat. in Vatic. Jon.* 1782; Grimm, *Der Proph. Jionas af. Neue Ubersetz*, 1798; Forbiger, *Prolusio*, &c. 1827; Krahmer, *Das B. Jon. Hist. Krit. untersucht*, Cassel, 1839.—J. E.

1. JONATHAN (יוֹנָתָן, *God-given;* comp. Theodoros; Sept. Ἰωνάθαν), a Levite descended from Gershom, the son of Moses (Judg. xviii. 30). It is, indeed, said, in our common copies, that the Gershom from whom this Jonathan sprang was 'the son of Manasseh;' but it is on very good grounds supposed that in the name Moses (מֹשֶׁה), the single letter *n* (נ) has been interpolated, changing it into Manasseh (מְנַשֶּׁה), in order to save the character of the great lawgiver from the stain of having an idolater among his immediate descendants. The singular name Gershom, and the date of the transaction, go far to establish this view. Accordingly, the Vulgate, and some copies of the Septuagint, actually exhibit the name of Moses instead of Manasseh. The interpolation, however, has been very timidly executed. The letter נ was originally placed above the line of the other letters (as it now appears in the printed Hebrew Bibles), as if rather to suggest than to make an alteration; but in process of time the letter sunk down into the body of the word. The Hebrew writers themselves admit the fact of the interpolation, and allege the intention to veil the disgrace of Moses, by suggesting a figurative descent from Manasseh. The history of this Jonathan is involved in the narrative which occupies Judges xvii., xviii.; and is one of the two accounts which form a sort of appendix to that book. The events themselves appear to have occurred soon after the death of Joshua, and of the elders who outlived him, when the government was in a most unsettled state. Its proper place, in the chronological order, would have been between the second and third chapters of the book.

Jonathan, who was resident at Bethlehem, lived at a time when the dues of the sanctuary did not afford a livelihood to the numerous Levites who had a claim upon them; and belonged to a tribe destitute of the landed possessions which gave to all others a sufficient maintenance. He, therefore, went forth to seek his fortune. In Mount Ephraim he came to 'a house of gods,' which had been established by one Micah, who wanted nothing but a priest to make his establishment complete [Micah]. This person made Jonathan what was manifestly considered the handsome

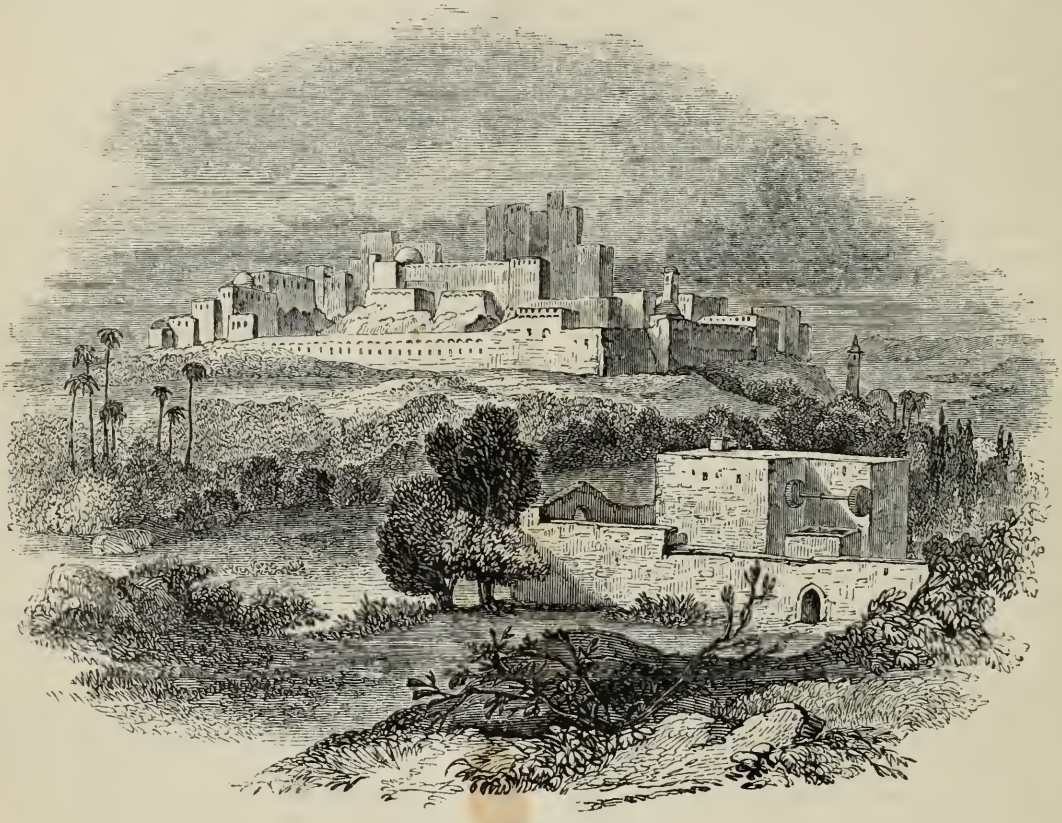
offer of engaging him as his priest for his victuals, a yearly suit of clothes, and ten shekels (twenty-five shillings) a year in money. Here he lived for some time, till the Danite spies, who were sent by their tribe to explore the north, passed this way and formed his acquaintance. When, not long after, the body of armed Danites passed the same way when going to settle near the sources of the Jordan, the spies mentioned Micah's establishment to them; on which they went and took away not only 'the ephod, the teraphim, and the graven image,' but the priest also, that they might set up the same worship in the place of which they were going to take possession. Micah vainly protested against this robbery; but Jonathan himself was glad at the improvement in his prospects, and from that time, even down to the captivity, he and his descendants continued to be priests of the Danites in the town of Laish, the name of which they changed to Dan.

There is not any reason to suppose that this establishment, whether in the hands of Micah or of the Danites, involved an apostacy from Jehovah. It appears rather to have been an attempt to localize or domesticate His presence, under those symbols and forms of service which were common among the neighbouring nations, but were forbidden to the Hebrews. The offence here was two-fold,—the establishment of a sacred ritual different from the only one which the law recognised, and the worship by symbols, naturally leading to idolatry, with the ministration of one who could not legally be a priest, but only a Levite, and under circumstances in which no Aaronic priest could legally have officiated. It is more than likely that this establishment was eventually merged in that of the golden calf, which Jeroboam set up in this place, his choice of which may very possibly have been determined by its being already in possession of 'a house of gods.'

2. JONATHAN, eldest son of Saul, king of Israel, and consequently heir apparent of the throne which David was destined to occupy (1 Sam. xiv. 9; 1 Chron. viii. 33; ix. 39). The war with the Philistines, which occupied the early part of his father's reign, afforded Jonathan more than one opportunity of displaying the chivalrous valour and the princely qualities with which he was endowed. His exploit in surprising the Philistine garrison at Michmash, attended only by his armour-bearer, is one of the most daring which history or even romance records (1 Sam. xiv. 1-14). His father came to follow up this victory, and in the ensuing pursuit of the confounded Philistines, Jonathan, spent with fatigue and hunger, refreshed himself with some wild honey which he found in a wood through which he passed. He knew not that his father had rashly vowed to put to death any one who touched a morsel of food before night. When the fact transpired, Saul felt himself bound to execute his vow even upon his gallant son; but the people, with whom the young prince was a great favourite, interposed, saying, 'Shall Jonathan die, who hath wrought this great salvation in Israel? God forbid! As the Lord liveth, there shall not one hair of his head fall to the ground; for he hath wrought with God this day' (1 Sam. xiv. 16-52).

Jealousy and every mean or low feeling were strangers to the generous heart of Jonathan. Valiant and accomplished himself, none knew better how to acknowledge valour and accomplishment in others. The act of David in meeting the challenge of Goliath, and in overcoming that huge barbarian, entirely won his heart; and from that day forward the son of Jesse found no one who loved him so tenderly, who admired his high gifts with so much enthusiasm, or who risked so much to preserve him from harm, as the very prince whom he was destined to exclude from a throne. Jonathan knew well what was to happen, and he submitted cheerfully to the appointment which gave the throne of his father to the young shepherd of Bethlehem. In the intensity of his love and confidence he shrank not to think of David as his destined king and master; and his dreams of the future pictured nothing brighter than the day in which David should reign over Israel, and he be one with him in friendship, and next to him in place and council—not because he was covetous even of this degree of honour, but because 'next to David' was the place where he wished always to be, and where he desired to rest.

When Saul began to hate David as his intended successor, he was highly displeased at the friendship which had arisen between him and his son. This exposed Jonathan to much contumely, and even to danger of life; for, once at least, the king's passion against him on this account rose so high that he cast a javelin at him 'to smite him to the wall.'



This unequivocal act taught Jonathan that the court of Saul was no safe place for David. He told him so, and they parted with many tears. David then set forth upon those wanderings among strangers and in solitary places, which lasted all the time of Saul. The friends met only once more. Saul was in pursuit of David when he was in the wilderness of Ziph; and Jonathan could not forbear coming to him secretly in the wood to give him comfort and encouragement (1 Sam. xxiii. 16-18). Nothing more is related of Jonathan till both he and his father lost their lives in the fatal battle of Gilboa, combating against the enemies of their country.

There is, perhaps, nothing in Hebrew poetry more beautiful and touching than the lamentation of David for the loss of his friend—nothing more complete as a whole, or more full of fine images and tender thoughts. The concluding strophe may be quoted by way of specimen:—

'O Jonathan, slain on thy own mountains!
I am distressed for thee, my brother Jonathan:
Very dear hast thou been to me:
Thy love to me was wonderful,
Surpassing the love of women!
How are the mighty fallen,
And the weapons of war perished!'

JOPPA (Ἰόππη; in Hebrew Japho, יָפוֹ; which name is still preserved in the Arabic Yaffa, or Jaffa), a sea-port town and haven on the coast of Palestine, situated on an eminence, in a sandy soil, about forty miles N.W. of Jerusalem, and nine miles W.N.W. from Ramleh. It was a very ancient town. An existence prior to the Deluge is claimed for it (Pomp. Mela, i. 14; Plin. *Hist. Nat.* v. 13). Rabbinical writers derive its name from Japhet, while the Classical geographers refer it to Iope, daughter of Æolus, and affirm that it was on this shore that Andro-

meda was rescued by Perseus from the sea-monster (Strabo, xvi. 2, 28; Plin. *Hist. Nat.* v. 14; Jerome, *In Jon.* i.). These and other fables connected with the place, suffice to show the great antiquity of the town. But this evidence is not needed, as the place existed when the Israelites invaded the land of Canaan, and is mentioned as lying on the border of the tribe of Dan (Josh. xix. 46). Joppa was the only port possessed by the Israelites till Herod formed the harbour at Cæsarea; and hence it was here that the timber from Lebanon destined for both the first and second temples was landed (1 Kings v. 9; 2 Chron. ii. 16; Ezra iii. 7). It was the place to which Jonah went, in expectation of finding a ship bound on some distant voyage, and where he found one going to Tarshish (Jonah i. 3). Joppa belonged to the powers which were successively dominant on this shore; and it does not again appear in Jewish history till the time of Judas Maccabæus, when the inhabitants having, contrary to the faith of treaties, thrown 200 Jews into the sea, the hero, to avenge them, surprised the haven by night, and set the shipping on fire (2 Macc. xii. 3-7). The town itself was a few years after taken by Jonathan (1 Macc. x. 74-76); but was not long retained, as we find it again taken by Simon (xii. 34), and mentioned as an acquisition of especial importance, which he strongly fortified (xiv. 5; xv. 28). Joppa was annexed by Pompey to the Roman government of Syria, together with several other towns on the coast of which the Jews had obtained possession (Joseph. *Antiq.* xiv. 4. 4). It is mentioned in the New Testament only in connection with the visit of the Apostle Peter, who here raised Tabitha from the dead, and lodged in the outskirts of the town with Simon, the tanner, when favoured

365. [Joppa.]

with the vision which taught him to 'call no man common or unclean' (Acts ix. 36-39; x. 5, 18; xi. 5). During the Jewish war Joppa was taken by surprise by Cestius, when it was plundered and burnt, and 8400 of the inhabitants were put to the sword (Joseph. *De Bell. Jud.* ii. 18. 10). Its ruins afterwards became the refuge of a great number of persons who had escaped from the destruction of other cities by Vespasian, and who took to piracy for a subsistence. Hence the Romans again marched against the place, when the inhabitants fled to their boats, but were driven back by a storm and destroyed. The city was then utterly demolished (*De Bell. Jud.* iii. 9). Joppa was the seat of a bishopric in the time of Constantine the Great, as well as when taken by the Arabians under Omar in A.D. 636. There was a bishop of Joppa in the council held at Jerusalem in A.D. 536. During the crusades Joppa was besieged and taken by Baldwin I.; and was recovered by the Moslems under Saladin in A.D. 1186. From the first crusade down to our own day, Joppa has been the landing-place of pilgrims going to Jerusalem, and is hence mentioned in almost all the innumerable itineraries and books of travels in the Holy Land which have appeared in different languages. There is still here an hospital for pilgrims, dependent on the convent of St. Salvador in Jerusalem, and occupied by Spanish monks. In 1797 the place was taken by storm by the French army under Napoleon, and was sacked without mercy; when the Turkish prisoners, to the number of 500 or 600, were carried to the neighbouring sand-hills and put to death by his order.

Josephus describes the natural unfitness of Jaffa for a haven in terms very similar to those which modern travellers employ (*De Bell. Jud.*

iii. 9. 3). The fact is, the port is so dangerous, from exposure to the open sea, that the surf often rolls in with the utmost violence, and even so lately as 1842 a lieutenant and some sailors were lost in pulling to the shore from an English steamer that lay in the harbour (Stent's *Egypt and the Holy Land*, ii. 28). But however bad, it was the only port which existed within reach of the important district which lay behind it inland: and the miserable state of the ancient roads, or rather perhaps the absence of any roads, made a near harbour, however incommodious, of more immediate consequence than a good one at a greater distance.

The town is approached on the land side through rich and extensive gardens and orchards, and is very picturesquely situated upon an eminence or promontory, which is crowned by a castle. It chiefly faces the north; and the buildings appear, from the steepness of the site, as if standing upon one another. The most prominent features of the architecture from without are the flattened domes by which most of the buildings are surmounted, and the appearance of arched vaults. But the aspect of the whole is mean and gloomy, and inside the place has all the appearance of a poor though large village. There are no public buildings to engage the eye, and the houses are mean and comfortless. No ancient ruins have been observed, nor are any to be expected in a place so often destroyed in war. From the steepness of the site many of the streets are connected by flights of steps, and the one that runs along the sea-wall is the most clean and regular of the whole. There are three mosques in Joppa, and Latin, Greek, and Armenian convents. The former is that in which European pilgrims and travellers usually lodge. The town still enjoys a considerable trade with the neighbouring coasts. Its chief manufacture is soap, which is largely consumed in the baths of Cairo and Damascus; and its excellent fruits are exported in large quantities, especially water-melons, which are very extensively cultivated here and in other parts of the plain of Sharon. The inhabitants are said not to exceed 4000, of whom one-fourth are reckoned to be Christians. A British consul is now resident in the place. (Raumer's *Palästina;* Volney, i. 136, sq.; Chateaubriand, ii. 103; Clarke, iv. 438, sq.; Buckingham, i. 227, sq.; Richter, p. 12; Richardson, ii. 16; Skinner, i. 175-184; Robinson, i. 18; Stent, ii. 27).

JORAM (יוֹרָם; Sept. Ἰωράμ, a contraction of Jehoram), ninth king of Israel, son of Ahab, and successor to his elder brother Ahaziah, who died childless. He began to reign B.C. 896, and reigned twelve years (2 Kings i. 17; iii. 1). Joram adhered to the sinful policy of Jeroboam in the matter of the golden calves; but, although his mother Jezebel was still alive, he discontinued the dark idolatries of Baal which she had introduced and maintained at such high cost of guilt and blood to the nation.

The Moabites had been tributary to the crown of Israel since the separation of the two kingdoms. But king Mesha deemed the defeat and death of Ahab so heavy a blow to the power of Israel that he might safely assert his independence. He accordingly did so, by withholding his tribute of '100,000 lambs and 100,000 rams, with the wool.' The short reign of Ahaziah had afforded no opportunity for any operations against the revolters; but the new king hastened to reduce them again under the yoke they had cast off. The good king of Judah, Jehoshaphat, was too easily induced to take a part in the war. He perhaps feared that the example of Moab, if allowed to be successful, might seduce into a similar course his own tributary, the king of Edom, whom he now summoned to join in this expedition. The deliverance of the allies from perishing for lack of water, and the signal overthrow of the Moabites at the word of Elisha, have been already described under Elisha and Jehoshaphat.

After this a more redoubtable enemy, Benhadad, king of Syria, occupied for a long time the attention and strength of the king. In the sacred records the more striking events of this war seem to be recorded for the sake of showing forth the great acts of Elisha, and they have therefore been related under his name. It suffices here to indicate that they consisted in the Syrian king being constrained to terminate one campaign in consequence of all his plans being made known by the prophet to the king of Israel (2 Kings vi. 1-23); and in the deliverance of Samaria, according to the prediction of the prophet, from a horrible famine, caused by the city being besieged by the Syrians (2 Kings vi. 24-33; vii.). An interval of the war also afforded occasion for the remarkable cure of Naaman, the Syrian leper, by the same prophet (2 Kings v.) [Naaman]. These events serve to manifest the uncertain character of Joram, and the too strong influence of instant circumstances upon his faith and conduct. So in his conduct to Elisha, we find him at one time obedient to the prophet, and full of respectful admiration of his office and character; and at another time devoting his head to destruction, sending messengers to put him to death, and then starting himself after them—probably to prevent his own orders from being executed (2 Kings vii. 31-33).

After the death of Benhadad, Joram found a new and active enemy in his murderer and successor, Hazael. During the illness of Benhadad, the king of Israel seems to have employed himself in strengthening his eastern frontier against the Syrians, and in fortifying Ramoth-Gilead, which had fallen into his hands, and which his father had perished in the attempt to recover from the Syrians. This strong fortress thenceforth became the head-quarters of the operations beyond the river. Hazael was scarcely settled on the throne before he took arms, and marched against Ramoth, in the environs of which the Israelites sustained a defeat, and the king was wounded. He returned to Jezreel to be healed of his wounds, leaving the army in the charge of Jehu, one of his ablest and most active generals. It was in this interval that Jehu was anointed king of Israel by the messenger of Elisha, and immediately proceeded to Jezreel to fulfil his commission to exterminate the house of Ahab. The king, who went forth from the city to meet him when the watchman on the tower of Jezreel announced his approach, was slain under the circumstances described in the article Jehu; and Ahaziah, the king of Judah, who was at Jezreel on a visit to his sick cousin, shared his fate (B.C. 884). With Joram ended the dynasty of

Ahab, which reigned forty-four years in Israel (2 Kings viii. 25-29; ix. 1-20).

JORDAN, the principal river of Palestine. [PALESTINE.]

JOSEPH (יוֹסֵף; Sept. Ἰωσήφ), son of Jacob and Rachel, born under peculiar circumstances, as may be seen in Gen. xxx. 22; on which account, and because he was the son of his old age (xxxvii. 3), he was beloved by his father more than were the rest of his children, though Benjamin, as being also a son of Jacob's favourite wife, Rachel, was in a peculiar manner dear to the patriarch. The partiality evinced towards Joseph by his father excited jealousy on the part of his brethren, the rather that they were born of different mothers (xxxvii. 2). Joseph had reached his seventeenth year, having hitherto been engaged in boyish sports, or aiding in pastoral duties, when some conduct on the part of 'the sons of Bilhah and the sons of Zilpah, his father's wives,' seems to have been such as in the opinion of Joseph to require the special attention of Jacob, to whom, accordingly, he communicated the facts. This regard to virtue, and this manifestation of filial fidelity, greatly increased his brothers' dislike, who henceforth 'hated him, and could not speak peaceably unto him' (xxxvii. 4). Their aversion, however, was carried to the highest pitch when Joseph acquainted them with two dreams that he had had, to the effect—the first, that while he and they were binding sheaves, his sheaf arose and stood erect, while theirs stood round and did obeisance to his; the second, that 'the sun and the moon and the eleven stars paid him homage.' These dreams appeared to indicate that Joseph would acquire pre-eminence in the family, if not sovereignty; and while even his father rebuked him, his brothers were filled with envy. Jacob, however, was not aware of the depth of their ill will; so that on one occasion, having a desire to hear intelligence of his sons, who were pasturing their flocks at a distance, he did not hesitate to make Joseph his messenger for that purpose. His appearing in view of his brothers was the signal for their malice to gain head. They began to devise means for his immediate destruction, which they would unhesitatingly have effected, but for his half-brother, Reuben, who, as the eldest son, might well be the party to interfere on behalf of Joseph. A compromise was entered into, in virtue of which the youth was stripped of the distinguishing vestments which he owed to his father's affection, and cast into a pit. Having performed this evil deed, and while they were taking refreshment, the brothers beheld a caravan of Arabian merchants, who were bearing the spices and aromatic gums of India down to the well-known and much-frequented mart, Egypt. Judah on this feels a bitter emotion arise in his mind, and proposes that, instead of allowing Joseph to perish, they should sell him to the merchants, whose trade obviously from this embraced human beings as well as spicery. Accordingly the unhappy young man was sold for a slave, to be conveyed by his masters into Egypt. While on his way thither, Reuben returned to the pit, intending to rescue his brother, and convey him safely back to their father. Joseph was gone. On which Reuben went to the wicked young men, who, not content with selling a brother into slavery, determined to punish their father for his partiality towards the unoffending sufferer. With this view they dipped Joseph's party-coloured garment in the blood of a kid and sent it to Jacob, in order to make him believe that his favourite child had been torn to pieces by some wild beast. The trick succeeded, and Jacob was grieved beyond measure.

Meanwhile the merchants sold Joseph to Potiphar, an officer of Pharaoh's, and captain of the royal guard, who was a native of the country. It is by no means easy to determine who at this time was the Pharaoh, or ruling monarch, though, what is far more important, the condition of the country, and therein the progress of civilization, are in certain general and important features made clear in the course of the narration. According to Syncellus, however, the general opinion in his day was that the sovereign's name who ruled Egypt at the time of the deportation of Joseph was Aphophis.

In Potiphar's house Joseph enjoyed the highest confidence and the largest prosperity. A higher power watched over him; and whatever he undertook succeeded, till at length his master gave every thing into his hands. The Hebrew race have always been remarkable for personal beauty, of which Joseph seems to have had an unusual share. This fact explains, if it cannot palliate, the conduct of Potiphar's wife, who tried every means to bring the uncontaminated and pure-minded youth to fulfil her unchaste desires. Foiled in her evil wishes, she resolved to punish Joseph, who thus a second time innocently brings on himself the vengeance of the ill-disposed. Charged with the very crime to which he had in vain been tempted, he is, with a fickleness characteristic of Oriental lords, at once cast into the state prison.

The narrative, which is obviously constructed in order to show the workings of divine Providence, and may not impossibly have received some shape or hue from the predominant idea, states, however, that Joseph was not left without special aid, in consequence of which he gained favour with the keeper of the prison to such an extent that every thing was put under his direction. If the suddenness and magnitude of this and other changes in the lot of Joseph should surprise any one, the feeling will be mainly owing to his want of acquaintance with the manners and customs of the East, where vicissitudes not less marked and sudden than are those presented in our present history are not uncommon; for those who come into the charmed circle of an Eastern court, especially if they are persons of great energy of character, are subject to the most wonderful alternations of fortune, the slave of to-day being the vizier of to-morrow.

Among the many advantages secured to posterity by this interesting and admirable narrative regarding the patriarch Joseph, is an intimate acquaintance (so far as it goes) with the state, at the time to which it refers, of civilization in Egypt. In the part at which we are now arrived we read of 'the chief of the butlers' and 'the chief of the bakers;' officers who vouch, by the duties which they had to discharge, for the advanced and complex condition of society in which their services were required and supplied. How true and trustworthy, too, the Biblical narrative is, may be learned by an implication which is here offered.

The head-butler had a dream in which he saw a vine. On the authority of Herodotus and others, it was long denied that the vine grew in Egypt; and if so, the imagery of the butler's dream would hardly have been appropriate. Wilkinson, however, has shown beyond a question that vines did grow in Egypt, and thus not only removed a doubt, but given a positive confirmation of the sacred record (*Manners of the Anc. Egypt.* ii. 152).

The two regal officers just mentioned had, while in prison with Joseph, each one a dream, which Joseph interpreted correctly. The butler, whose fate was auspicious, promised the young Hebrew to employ his influence to procure his restoration to the free air of day; but when again in the enjoyment of his 'butlership,' 'he forgat' Joseph (xl.). Pharaoh himself, however, had two dreams, which found in Joseph a successful expounder; for the butler remembered the skill of his prison-companion, and advised his royal master to put it to the test in his own case. Pharaoh's dream, as interpreted by Joseph, foreboded the approach of a seven years' famine; to abate the evils of which Joseph recommended that some 'discreet and wise' man should be chosen and set in full power over the land of Egypt. The monarch was alarmed, and called a council of his advisers. The wisdom of Joseph was recognised as of divine origin and supereminent value; and the king and his ministers (whence it appears that the Egyptian monarchy—at Memphis—was not despotic, but constitutional) resolved that Joseph should be made (to borrow a term from Rome) Dictator in the approaching time of need. 'And Pharaoh said unto Joseph, Forasmuch as God hath shewed thee all this, there is none so discreet and wise as thou art. Thou shalt be over my house, and according unto thy word shall all my people be ruled: only in the throne will I be greater than thou. See, I have set thee over all the land of Egypt. And Pharaoh took off his ring and put it upon Joseph's hand, and arrayed him in vestures of fine linen, and put a gold chain about his neck; and he made him to ride in the second chariot which he had; and they cried before him, Bow the knee. And Pharaoh said unto Joseph, I am Pharaoh, and without thee shall no man lift up his hand or foot in all the land of Egypt. And Pharaoh called Joseph's name Zaphnath-paaneah ('saviour of the world'; comp. Jablonsky, *Opusc.* i. 207, sq.); and he gave him to wife Asenath, the daughter of Poti-pherah, priest of On. And Joseph went out over all the land of Egypt' (xli. 39, sq.). It has been supposed that Joseph was taken into the priestly order, and thus ennobled. The Biblical narrative does not support this opinion, though it leaves it without a doubt that in reality, if not in form as well, the highest trust and the proudest honours of the state were conferred on one so recently a Hebrew slave.

Seven years of abundance afforded Joseph opportunity to carry into effect such plans as secured an ample provision against the seven years of need. The famine came, but it found a prepared people. The visitation did not depend on any mere local causes, for 'the famine was over all the face of the earth;' 'and all countries came into Egypt to Joseph to buy corn' (ver. 56, 57). Among these customers appeared ten brethren, sons of the Hebrew Jacob. They had of necessity to appear before Joseph, whose licence for the purchase of corn was indispensable. Joseph had probably expected to see them, and he seems to have formed a deliberate plan of action. His conduct has brought on him the always ready charges of those who would rather impeach than study the Bible, and even friends of that sacred book have hardly in this case done Joseph full justice (Niemeyer, *Charakt.* ii. 366; Heuser, *Diss. non inhumaniter sed prudentissime Josephum cum fratribus fecisse*, Hal. 1773). Joseph's main object appears to have been to make his brothers feel and recognise their guilt in their conduct towards him. For this purpose suffering, then as well as now, was indispensable. Accordingly Joseph feigned not to know his brothers, charged them with being spies, threatened them with imprisonment, and allowed them to return home to fetch their younger brother, as a proof of their veracity, only on condition that one of them should remain behind in chains, with a prospect of death before him should not their words be verified. Then it was, and not before, that 'they said one to another, We are verily guilty concerning our brother, in that we saw the anguish of his soul and would not hear; therefore is this distress come upon us. And Reuben said, Spake I not unto you, saying, Do not sin against the child, and ye would not hear? therefore, behold, also his blood is required' (xlii. 21). On which, after weeping bitterly, he by common agreement bound his brother Simeon, and left him in custody. How deeply concerned Joseph was for his family, how true and affectionate a heart he had, may be learned from the words which escape from the brothers in their entreaty that Jacob would allow Benjamin to go into Egypt, as required by Joseph: 'The man asked us straitly of our state and of our kindred, saying, Is your father yet alive? have ye another brother?' (xliii. 7). At length Jacob consents to Benjamin's going in company with his brothers: 'And God Almighty give you mercy before the man, that he may send away your other brother, and Benjamin. If I be bereaved of my children, I am bereaved' (ver. 14). Thus provided, with a present consisting of balm, honey, spices and myrrh, nuts and almonds, and with double money in their hands (double, in order that they might repay the sum which Joseph had caused to be put into each man's sack at their departure, if, as Jacob supposed, 'it was an oversight'), they went again down to Egypt and stood before Joseph (xliii. 15); and there, too, stood Benjamin, Joseph's beloved brother. The required pledge of truthfulness was given. If it is asked why such a pledge was demanded, since the giving of it caused pain to Jacob, the answer may be thus: Joseph knew not how to demean himself towards his family until he ascertained its actual condition. That knowledge he could hardly be certain he had gained from the mere words of men who had spared his life only to sell himself into slavery. How had these wicked men behaved towards his venerable father? His beloved brother Benjamin, was he safe? or had he suffered from their jealousy and realised the worse fate with which he himself had been threatened? Nothing but the sight of Benjamin could answer these questions, and resolve these doubts.

Benjamin had come, and immediately a natural change took place in Joseph's conduct: the

brother began to claim his rights in Joseph's bosom. Jacob was safe, and Benjamin was safe. Joseph's heart melted at the sight of Benjamin: 'And he said to the ruler of his house, Bring these men home, and slay and make ready, for these men shall dine with me at noon' (xliii. 16). But guilt is always the ready parent of fear. Accordingly the brothers expected nothing but being reduced to slavery. When taken to their own brother's house, they imagined they were being entrapped. A colloquy ensued between them and Joseph's steward, whence it appeared that the money put into their sacks, to which they now attributed their peril, was in truth a present from Joseph, designed, after his own brotherly manner, to aid his family in their actual necessities. The steward said, 'Peace be to you, fear not: your God and the God of your father hath given you the treasure in your sacks. I had your money' (ver. 23).

Noon came, and with it Joseph, whose first question regarded home: 'He asked them of their welfare, and said, Is your father well, the old man of whom ye spake? is he yet alive? And he lifted up his eyes and saw his brother Benjamin, his mother's son, and said, Is this your younger brother? And he said, God be gracious unto thee, my son!' 'And Joseph made haste, for his bowels did yearn upon his brother, and he sought where to weep, and he entered into his chamber and wept there.' Does this look like harshness?

The connection brings into view an Egyptian custom, which is of more than ordinary importance, in consequence of its being adopted in the Jewish polity; 'And they set on (food) for him by himself (Joseph), and for them by themselves (the brethren), and for the Egyptians which did eat with them, by themselves: because the Egyptians might not eat bread with the Hebrews; for that is an abomination with the Egyptians' (ver. 32). This passage is also interesting, as proving that Joseph had not, in his princely grandeur, become ashamed of his origin, nor consented to receive adoption into a strange nation: he was still a Hebrew, waiting, like Moses after him, for the proper season to use his power for the good of his own people.

Other customs appear in this interesting narrative: 'And they (the brothers) sat before him (Joseph), *the first-born according to his birthright*, and the youngest according to his youth.' 'And he sent messes (delicacies) unto them from before him; but Benjamin's mess was five times so much as any of theirs' (ver. 32, 33). Fear had now given place to wonder, and wonder at length issued in joy and mirth (comp. ver. 18, 33, 34). Thus ended the second act in the drama. Another now opens.

Joseph, apparently with a view to ascertain how far his brethren were faithful to their father, hit upon a plan which would in its issue serve to show whether they would make any, and what, sacrifice, in order to fulfil their solemn promise of restoring Benjamin in safety to Jacob. Accordingly he orders not only that every man's money (as before) should be put in his sack's mouth, but also that his 'silver cup, in which my lord drinketh, and whereby he divineth,' should be put in the sack's mouth of the youngest. The brethren leave, but are soon overtaken by Joseph's steward, who charges them with having surreptitiously carried off this costly and highly-valued vessel. They on their part vehemently repel the accusation, adding, 'with whomsoever of thy servants it be found, both let him die, and we also will be my lord's bondmen.' A search is made, and the cup is found in Benjamin's sack. Accordingly they return to the city. And now comes the hour of trial: Would they purchase their own liberation by surrendering Benjamin? After a most touching interview, in which they prove themselves worthy and faithful, Joseph declares himself unable any longer to withstand the appeal of natural affection. On this occasion Judah, who is the spokesman, shows the deepest regard to his aged father's feelings, and entreats for the liberation of Benjamin even at the price of his own liberty. In the whole of literature we know of nothing more simple, natural, true, and impressive; nor, while passages of this kind stand in the Pentateuch, can we even understand what is meant by terming that collection of writings 'the Hebrew national epic,' or regarding it as an aggregation of historical legends. If here we have not history, we can in no case be sure that history is before us (xliv.).

Most natural and impressive is the scene also which ensues, in which Joseph, after informing his brethren who he was, and inquiring, first of all, 'Is my father alive?' expresses feelings free from the slightest taint of revenge, and even shows how, under Divine Providence, the conduct of his brothers had issued in good—'God sent me before you to preserve a posterity in the earth, and to save your lives by a great deliverance.' Five years had yet to ensue in which 'there would be neither earing nor harvest;' and therefore the brethren were directed to return home and bring Jacob down to Egypt with all speed. 'And he fell upon his brother Benjamin's neck and wept; and Benjamin wept upon his neck. Moreover, he kissed all his brethren and wept upon them; and after that his brethren talked with him' (xlv. 14, 15).

The news of these striking events was carried to Pharaoh, who being pleased at Joseph's conduct, gave directions that Jacob and his family should come forthwith into Egypt—'I will give you the good of the land of Egypt, and ye shall eat the fat of the land; regard not your stuff, for the good of all the land is yours.' The brethren departed, being well provided for—'And to his father Joseph sent ten asses laden with the good things of Egypt, and ten she asses laden with corn and bread and meat for his father by the way.'

The intelligence which they bore to their father was of such a nature that 'Jacob's heart fainted, for he believed them not.' When, however, he had recovered from the thus naturally told effects of his surprise, the venerable patriarch said, 'Enough; Joseph my son is yet alive: I will go and see him before I die' (xlv. 26, 28).

Accordingly Jacob and his family, to the number of threescore and ten souls, go down to Egypt, and by the express efforts of Joseph, are allowed to settle in the district of Goshen, where Joseph met his father: 'And he fell on his neck, and wept on his neck a good while.' There Joseph 'nourished his father and his brethren, and all his father's household, with bread, according to their families' (xlvii. 12).

Meanwhile the predicted famine was pauper-

ising Egypt. The inhabitants found their money exhausted, and their cattle and substance all gone, being parted with in order to purchase food from the public granaries, until at length they had nothing to give in return for sustenance but themselves. 'Buy us'—they then imploringly said to Joseph—'and our land for bread, and we and our land will be slaves unto Pharaoh.' 'And Joseph bought all the land of Egypt for Pharaoh, so the land became Pharaoh's.' The people too, 'Joseph removed to cities from one end of the borders of the land to the other end.' Religion, however, was too strong to submit to these political and social changes, and so the priests still retained their land, being supplied with provisions out of the common store gratuitously. The land, which was previously the people's own, was now let to them on a tenancy, at the rent of one-fifth of the produce: the land of the priests being exempted.

This is one of the greatest, if not the greatest, social revolution recorded in history. Under the pressure of famine an entire nation is reduced from freedom to dependance; while the population, which had been apparently limited to certain districts, was distributed all over the land on different spots.

At this distant period it may not be easy to understand and explain the entire conduct observed by Joseph in this crisis of the nation's fate; but we must protest against the application to it of measures of judgment which are derived from modern notions, and the pure and lofty morality of the Gospel. If a great change was suddenly effected in the social condition of the people, we are not hastily to conclude that the change was for the worse, especially considering that a very long and grievous famine had afflicted so fertile a land as Egypt under the previously existing social condition. And if an opportunity was taken to increase the royal power over the nation, it cannot be denied that the nation was saved from impending destruction by the foresight, wisdom, and benevolence of the Hebrew vizier.

Joseph had now to pass through the mournful scenes which attend on the death and burial of a father. Having had Jacob embalmed, and seen the rites of mourning fully observed, the faithful and affectionate son—leave being obtained of the monarch—proceeded into the land of Canaan, in order, agreeably to a promise which the patriarch had exacted, to lay the old man's bones with those of his fathers, in 'the field of Ephron the Hittite.' Having performed with long and bitter mourning Jacob's funeral rites, Joseph returned into Egypt. The last recorded act of his life forms a most becoming close. After the death of their father, his brethren, unable, like all guilty people, to forget their criminality, and characteristically finding it difficult to think that Joseph had really forgiven them, grew afraid now they were in his power, that he would take an opportunity of inflicting some punishment on them. They accordingly go into his presence, and in imploring terms and an abject manner, entreat his forgiveness. 'Fear not'—this is his noble reply—'I will nourish you and your little ones.'

Joseph lived an hundred and ten years, kind and gentle in his affections to the last; for we are told, 'The children of Machir, the son of Manasseh, were brought up upon Joseph's knees' (l. 23). And so having obtained a promise from his brethren, that when the time came, as he assured them it would come, that God should visit them, and 'bring them unto the land which he sware to Abraham, to Isaac, and to Jacob,' they would carry up his bones out of Egypt, Joseph at length 'died, and they embalmed him, and he was put in a coffin' (l. 26). This promise was religiously fulfilled. His descendants, after carrying the corpse about with them in their wanderings, at length put it in its final resting-place in Shechem, in a parcel of ground that Jacob bought of the sons of Hamor, which became the inheritance of the children of Joseph (Josh. xxiv. 32).

By his Egyptian wife Asenath, daughter of the high priest of Heliopolis, Joseph had two sons, Manasseh and Ephraim (Gen. xli. 50, sq.), whom Jacob adopted (Gen. xlviii. 5), and who accordingly took their place among the heads of the twelve tribes of Israel. Among other authorities the following may be consulted:—Wolfenb. *Fragment;* Less, *Geschichte der Rel.* i. 267; J. T. Jacobi, *Sämmtl. Schrift.* 3 thl.; Hess, *Gesch. der Patriarch.* ii. 324; Niemeyer, *Charakt.* ii. 340; *Allg. Welthist.* ii. 322; Heeren, *Ideen,* ii. 551.—J. R. B.

JOSEPH, 'the husband of Mary, of whom was born Jesus, who is called Christ' (Matt. i. 16). By Matthew he is said to have been the son of Jacob, whose lineage is traced by the same writer through David up to Abraham. Luke represents him as being the son of Heli, and traces his origin up to Adam. This is not the place to attempt to reconcile these two accounts, as it would lead to discussion and detail, for which we have not space; but it may be mentioned that Luke appears to have had some specific object in view, since he introduces his genealogical line with words of peculiar import:—'Jesus being (as was supposed) the son of Joseph, which was the son of Heli' (Luke iii. 23)—ὡς ἐνομίζετο, 'as was supposed,' in other terms, as accounted by law, as enrolled in the family registers; for Joseph being the husband of Mary, became thereby, in law (νόμος), the father of Jesus. And as being the legal father of Jesus, he might have his origin traced in the line of Mary's family, as well as in that of his own.

The statements of Holy Writ in regard to Joseph are few and simple. According to a custom among the Jews, traces of which are still found, such as hand-fasting among the Scotch, and betrothing among the Germans, Joseph had pledged his faith to Mary; but before the marriage was consummated she proved to be with child. Grieved at this, Joseph was disposed to break off the connection; but, not wishing to make a public example of one whom he loved, he contemplated a private disruption of their bond. From this step, however, he is deterred by a heavenly messenger, who assures him that Mary has conceived under a divine influence. 'And she shall bring forth a son, and thou shalt call his name Jesus; for he shall save his people from their sins' (Matt. i. 18, sq.; Luke i. 27). To this account various objections have been taken; but most of them are drawn from the ground of a narrow, short-sighted, and half-informed rationalism, which judges everything by its own small standard, and either denies miracles alto-

gether, or admits only such miracles as find favour in its sight; attempting not to learn what Christianity is, nor what was suitable and proper in the days of Christ, but to construct a Christianity of its own, and then to impose the new creation on the writers of the Gospel, and the primitive church.

Joseph was by trade a carpenter, in which business he probably educated Jesus. In Matt. xiii. 55, we read, 'Is not this the son of the carpenter?' and in Mark vi. 3, 'Is not this the carpenter, the son of Mary?' The term employed, τεκτων, is of a general character (from τεύχω, 'I form'), and may be fitly rendered by the English word 'artificer' or 'artizan,' signifying any one that labours in the *fabr*ication (*faber* in Latin) of articles of ordinary use, whatever the material may be out of which they are made. Accordingly, sometimes it denotes a smith as well as a carpenter or joiner, and in the Septuagint the additional term 'iron' (σιδήρου) or 'wood' (ξύλων) is employed, in order to denote its specific application. If some doubt may exist whether 'carpenter' is the necessary rendering of the word when applied to Joseph, yet there is no impropriety in that rendering, for not seldom the word, when used without any explanatory addition, has that signification. Schleusner (*in voc.*) asserts that the universal testimony of the ancient church represents our Lord as being a carpenter's son. This is, indeed, the statement of Justin Martyr (*Dial. cum Tryphone*, § 88), for he explains the term τέκτων, which he applies to Jesus, by saying that he made ἄροτρα καὶ ζυγά, *ploughs and yokes;* but Origen, in replying to Celsus, who indulged in jokes against the humble employment of our Lord, expressly denied that Jesus was so termed in the Gospels (see the passage cited in Otho's *Justin Martyr*, tom. ii. p. 306, Jenæ, 1843)—a declaration which suggests the idea that the copies which Origen read differed from our own; while Hilarius, on Matthew (quoted in Simon's *Dictionnaire de la Bible*, i. 691), asserts, in terms which cannot be mistaken, that Jesus was a smith (*ferrum igne vincentis, massamque formantis, etc.*). Of the same opinion was the venerable Bede; while others have held that our Lord was a mason, and Cardinal Cajetan, that he was a goldsmith.

The last notion probably had its origin in those false associations of more modern times which disparage hand-labour. Among the ancient Jews all handicrafts were held in so much honour, that they were learned and pursued by the first men of the nation.

Jewish tradition (*Hieros. Schaph.* c. 14) names the father of Jesus פנדירא, Phenedira, and represents him (Orig. *c. Cels.* i. 32) as a rough soldier, who became the father of Jesus, after Mary was betrothed to Joseph. Another form of the legend sets him forth (*Toled Jeschu*, p. 3, ed. Wagenseil; Epiphan. *Hær.* 78. 7) under the name of Pandira. Christian tradition makes Joseph an old man when first espoused to Mary (Epiphan. *Hær.* 78. 7), being no less than eighty years of age, and father of four sons and two daughters. Theophylact, on Matt. xiii. 55, says that Jesus Christ had brothers and sisters, all children of Joseph, whom he had by his sister-in-law, wife of his brother Cleophas, who having died without issue, Joseph was obliged by law to marry his widow. Of the sons, James, the brother of the Lord, was, he states, the first bishop of Jerusalem. Eusebius (*Hist. Eccles.* ii. 1) agrees in substance with Theophylact; so also does Epiphanius, adding that Joseph was fourscore years old when he married Mary. Jerome, from whom it appears that the alleged mother's name was Escha, opposes this tradition, and is of opinion that what are termed the brothers of Jesus were really his cousins. The painters of Christian antiquity conspire with the writers in representing Joseph as an old man at the period of the birth of our Lord—an evidence which is not to be lightly rejected, though the precise age mentioned may be but an approximation to fact.

Another account (Niceph. ii. 3) gives the name of Salome as that of Joseph's first wife, who was related to the family of John the Baptist.

It is not easy to determine when Joseph died. That event may have taken place before Jesus entered on his public ministry. This has been argued from the fact, that his mother only appeared at the feast at Cana in Galilee. The premises, however, hardly bear out the inference. With more force of argument, it has been alleged (Simon, *Dict. de la Bible*) that Joseph must have been dead before the crucifixion of Jesus, else he would in all probability have appeared with Mary at the cross. Certainly the absence of Joseph from the public life of Christ, and the absence of reference to him in the discourses and history, while 'Mary' and 'His brethren' not unfrequently appear, afford evidence not only of Joseph's death, but of the inferior part which, as the legal father only of our Lord, Joseph might have been expected to sustain. So far as our scanty materials enable us to form an opinion, Joseph appears to have been a good, kind, simple-minded man, who, while he afforded aid in protecting and sustaining the family, would leave Mary unrestrained to use all the impressive and formative influence of her gentle, affectionate, pious, and thoughtful soul. Those who may wish to pursue this subject in its details, we refer to the following works:—J. T. Meyer, *Num Jos. tempore Nativ. C. fuerit senex decrepitus; Hist. Joseph. fabri lignar.*, Arab. ed. G. Wallin, a Latin translation of which may be found in Fabricii *Pseudepigr.* i. 309. The traditions respecting Joseph are collected in *Act. Sanct.* iii. p. 4, sq.; there is a Life of Joseph written in Italian by Affaitati.—J. R. B.

JOSEPH OF ARIMATHEA. The name Arimathea denotes probably the place where Joseph was born, not that where he resided. We make this remark because Michaelis (*Begräbniss- und auferstehungs gesch. Christi*, p. 44, translated into English) states it as his opinion that it was unlikely that Joseph possessed a burial-place in or near Jerusalem, since that city was not his ordinary abode. So easy is it to be led away by modern associations in interpreting the Scripture, that even a man of Michaelis' learning could allow Germany to overpower Palestine, and modern days to give their colouring to ancient ones, and thus hold that 'of Arimathea' must of necessity denote the residence and not the birth-place of Joseph; whereas a little reflection might have taught him that in a measure in his own times, and fully so in the days of our Lord, such a form of speech indicated rather a man's birth-place than his customary abode.

Arimathea lay in the territory of Benjamin, on the mountain range of Ephraim, at no great distance south of Jerusalem (Josh. xviii. 25; Judg. iv. 5), not far from Gibeah (Judg. xix. 13; Isa. x. 29; Hos. v. 8).

Joseph was a secret disciple of Jesus—'an honourable counseller (*βουλευτής*), who waited for the kingdom of God' (Mark xv. 43), and who, on learning the death of our Lord, 'came and went in boldly unto Pilate, and craved the body of Jesus.' Pilate having learned from the centurion, who commanded at the execution, that 'Jesus was actually dead,' gave the body to Joseph, who took it down and wrapped his deceased Lord in fine linen which he had purchased for the purpose; after which he laid the corpse in a sepulchre which was hewn out of a rock, and rolled a stone unto the door of the sepulchre (Mark xv. 43, sq.). From the parallel passages in Matthew (xxvii. 58, sq.), Luke (xxiii. 50, seq.), and John (xix. 38, seq.), it appears that the body was previously embalmed at the cost of another secret disciple, Nicodemus, and that the sepulchre was new, 'wherein never man before was laid;' also that it lay in a garden, and was the property of Joseph himself. This garden was 'in the place where Jesus was crucified.' Luke describes the character of Joseph as 'a good man and a just,' adding that 'he had not consented to the counsel and deed of them,' *i. e.* of the Jewish authorities. From this remark it is clear that Joseph was a member of the Sanhedrim: a conclusion which is corroborated by the epithet 'counsellor,' applied to him by both Luke and Mark. Whether or not Joseph was a priest, as Lightfoot (*Hor. Heb.* p. 669) thought, there is not evidence to determine. Various opinions as to his social condition may be found in Thiess (*Krit. Comment.* ii. 149). Tradition represents Joseph as having been one of the Seventy, and as having first preached the Gospel in our own country (Ittig, *Diss. de Pat. Apostol.* § 13; Assemani *Biblioth. Orient.* iii. 1. 319, sq.). For an attempt to fix the precise spot where Jesus died and was buried, see the article Golgotha.—J. R. B.

JOSEPH called BARSABAS was one of the two persons whom the primitive church, immediately after the resurrection of Christ, nominated, praying that the Holy Spirit would show which of them should enter the apostolic band in place of the wretched Judas. On the lots being cast, it proved that not Joseph, but Matthias, was chosen.

Joseph bore the honourable surname of Justus, which was not improbably given him on account of his well-known probity. He was one of those who had 'companied with the Apostles all the time that the Lord Jesus went in and out amongst them, beginning from the baptism of John,' until the ascension (Acts i. 15, sq.). Tradition also accounted him one of the Seventy (Euseb. *Hist. Eccles.* i. 12). The same historian relates (iii. 39), on the authority of Papias, that Joseph the Just 'drank deadly poison, and by the grace of God sustained no harm.' It has been maintained that he is the same as Joses surnamed Barnabas, mentioned in Acts iv. 36; but the manner in which the latter is characterized seems to point to a different person (Heinrichs, *On Acts* i. 23; Ullmann, in the *Theolog. Stud. und Kritik*, i. 377).—J. R. B.

1. JOSES (Ἰωσῆς), son of Mary and Cleopas, and brother of James the Less, of Simon and of Jude, and, consequently, one of those who are called the 'brethren' of our Lord (Matt. xiii. 55; xxvii. 56; Mark vi. 3; xv. 40, 47). [James; Jude]. He was the only one of these brethren who was not an apostle—a circumstance which has given occasion to some unsatisfactory conjecture. It is perhaps more remarkable that three of them were apostles than that the fourth was not.

2. JOSES [Barnabas].

JOSHUA. The name יְהוֹשֻׁעַ, יְהוֹשֻׁעַ, or יֵשׁוּעַ, is rendered by Josephus, the Septuagint, and the New Testament, Ἰησοῦς. In the same manner is spelt the name of the author of the apocryphal book Ecclesiasticus. This is the name of four persons in the Old Testament, and means *whose salvation is Jehovah* (compare the German name *Gotthilf*). The most distinguished of the four persons, so called, who occur in the Old Testament, is Joshua the son of Nun, of the tribe of Ephraim, the assistant and successor of Moses. His name was originally הוֹשֵׁעַ, *salvation* (Num. xiii. 8); and it seems that the subsequent alteration of it by Moses (Num. xiii. 16) was significant, and proceeded on the same principle as that of Abram into Abraham (Gen. xvii. 5), and of Sarai into Sarah (Gen. xvii. 15).

According to the *Tsemach David*, Joshua was born in Egypt, in the year of the Jewish era 2406 (B.C. 1037). In the Bible he is first mentioned as being the victorious commander of the Israelites in their battle against the Amalekites at Rephidim (Exod. xvii. 8-16). He distinguished himself by his courage and intelligence during and after the exploration of the land of Canaan, on which occasion he represented his tribe, which was that of Ephraim (Num. xiii., xiv.). Moses, with the divine sanction, appointed him to command the Israelites, even during his own lifetime (Num. xxvii. 18-23; Deut. iii. 28; xxxi. 23). After the death of Moses he led the Israelites over the Jordan, fortified a camp at Gilgal (Josh. ix. 6; x. 6-43), conquered the southern and middle portions of Canaan (vi.-x.), and also some of the northern districts (ix.). But the hostile nations, although subdued, were not entirely driven out and destroyed (xiii.; xxiii. 13; Judg. i. 27-35). In the seventh year after entering the land, it was distributed among the various tribes, which then commenced individually to complete the conquest by separate warfare (xv. 13, sq.; xvi. 10; xvii. 12, sq.). Joshua died 110 years old (B.C. 1427), and was buried at Timnath-serah (Josh. xxiv.), on Mount Ephraim. According to the *Archæologia* or *Antiquities* of Josephus (v. 1. 29), Joshua commanded the Jews twenty-five years, but, according to other Jewish chronologers, twenty-seven years. The *Tsemach David*, on the years of the Jewish era 2489 and 2490, remarks:—'It is written in the *Seder Olam* that Joshua judged Israel twenty-five years, commencing from the year 2488, immediately from the death of Moses, to the year 2516. This, however, would not be known to us but for cabbalistic tradition, but in some degree also by reasoning,' &c. Hottinger (*Smegma*, p. 409), says:—'According to the *Midrash*, Rahab was ten years old when the Israelites left Egypt, she played the whore

during the forty years in which the Israelites were in the desert. She became the wife of Joshua, and eight prophets descended from her, viz. Jeremiah, Mahasia, Hanamael, Shallum, Baruch, Ezekiel. Some say also that Huldah the prophetess was her descendant.' Some chronologers have endeavoured to reduce the rule of Joshua to seventeen, and others to twenty-one years.

There occur some vestiges of the deeds of Joshua in other historians besides those of the Bible. Procopius mentions a Phœnician inscription near the city of Tingis in Mauritania, the sense of which in Greek was:—'Ημεῖς ἐσμεν οἱ φυγόντες ἀπὸ προσώπου Ἰησοῦ τοῦ λῃστοῦ υἱοῦ Ναυῆ—'We are those who fled before the face of Joshua the robber, the son of Nun' (*De Bell. Vandal.* ii. 10). Suidas (sub voce Χαναάν):—ἡμεῖς ἐσμεν Χαναναῖοι οὓς ἐδίωξεν Ἰησοῦς ὁ λῃστής—'We are the Canaanites whom Joshua the robber persecuted.' Compare Fabricii *Codex Pseudepigraphus Veteris Testamenti*, i. 889, sq., and the doubts respecting this statement in Dale, *De Origine et Progressu Idolatriæ*, p. 749, sq.

A letter of Shaubech, שובך, king of Armenia Minor, in the Samaritan book of Joshua (ch. xxvi.), styles Joshua אלדיב אלקאתול, *lupus percussor*, 'the murderous wolf;' or, according to another reading in the book *Juchasin* (p. 154, f. 1), and in the *Shalsheleth Rakkabbalah* (p. 96), זאב ערבות, *lupus vespertinus*, 'the evening wolf' (comp. Hab. i. 8; Hottinger, *Historia Orientalis*, Tiguri, 1651, p. 40, sq.; Budder, *Hist. Eccles.* p. 964, sq.). A comparison of Hercules, according to the Phœnician and Greek mythology, with Joshua has been attempted by Hercklitz (*Quod Hercules idem sit ac Josua*, Lipsiæ, 1706, 4to.)

The book of Joshua is so called from the personage who occupies the principal place in the narration of events contained therein, and may be considered as a continuation of the Pentateuch. It commences with the word ויהי, which may be rendered *thereupon it happened*. Books beginning with what Dr. Samuel Lee calls *the illative vau*, are to be regarded as continuations of earlier works. The Pentateuch, and especially Deuteronomy, are repeatedly referred to in the book of Joshua, the narration of which begins with the death of Moses and extends to the death of Joshua, embracing a chronological period of somewhat less than thirty years. The subject of the book is thus briefly stated in ch. i. 5, 6: 'There shall not any man be able to stand before thee all the days of thy life. As I was with Moses, so I will be with thee: I will not fail thee, nor forsake thee. Be strong and of a good courage; for unto this people shalt thou divide for an inheritance the land which I sware unto their fathers to give them.' In these two verses is also indicated the division of the book into two principal portions, with reference to the conquest and the distribution of the land of Canaan. The conquest is narrated in the first twelve, and the distribution in the following ten chapters. In the last two chapters are subjoined the events subsequent to the distribution up to the death of Joshua. The history of the conquest of Canaan is a series of miracles, than which none more remarkable are recorded in any part of sacred history. The passage into the Promised Land, as well as that out of Egypt, was through water. Jericho was taken not by might, but by the falling of the walls on the blast of the trumpets of seven priests; and in the war against Gibeon the day was prolonged to afford time for the completion of the victory.

It is generally granted that the first twelve chapters form a continuous whole: although the author in ch. x. 13, refers to another work, he not merely transcribes but intimately combines the quotation with the tenor of his narration. It is certain that there sometimes occur episodes which seem to interrupt the chronological connection, as for instance the portion intervening between chs. i., ii., and iii. 1. Especially it has been asserted that the whole of the second chapter is an episode interposed between chapters i. and iii.; but it belongs to the nature of detailed historical works to contain such episodes. It would not be difficult to select analogous instances from profane works which are considered to be finished models of historiography. Even in writers who have most carefully digested their materials, such as Thucydides, Tacitus, Gibbon, Hume, Robertson, and others, we meet occasionally with such episodes; and it may be truly said that, from the nature of history in general, occasional digressions must occur; consequently it is an indication of thoughtless assertion when those which are found in the book of Joshua are declared to prove a variety of authorship, if anything is meant beyond the truism, that no historical writer originates, but only communicates, historical truth.

We return to our subject, and assert that if the facts contained in the second chapter were to be related at all, they stand very properly between those of the first and third chapters, and that it would be difficult to find for them a more fitting place.

The whole tenor of the first twelve chapters bespeaks an eye-witness who bore some part in the transactions. Compare the expression עברנו, WE *passed over*, in ch. v. 1, where the *kri* has עברם, Sept. διαβαίνειν αὐτούς, Vulg. *transirent*. The Chaldee paraphrase in the *Targum* of Jonathan has also עד דעברו, *until* THEY *passed over*, and so the Syriac and Arabic. On account of this *kri* and the various ancient renderings, which substitute the third for the first person, we must not lay too much stress on the usual reading, although we deem it correct, corresponding as it does to לנו, *to us*, in the sixth verse. But we rely less on such isolated expressions than on the circumstantial vividness of the narrative, which clearly indicates that the writer was an eye-witness. This feature is so striking that Van Herweden, who, in his *Disputatio de libro Josuæ, sive de diversis ex quibus constat Josuæ liber monumentis, deque ætate qua eorum vixerunt auctores*, Groningæ, 1826, has endeavoured to dissect the book of Joshua into ten different *monumenta*, or original documents, nevertheless, in page 123, says, in reference to Josh. vi. 25:—alterutrum esse verum oportet: aut impostor hæc scripsit, æqualem se esse rerum gestarum præ se ferens, quem tamen non esset, AUT REVERA SCRIPSIT ÆQUALIS—'This was written either by an impostor who falsely pretended that he was a contemporary of the events related, or a contemporary really wrote it.'

The authority ascribed to the book of Joshua by the Apostles, compels us to embrace the latter horn of this dilemma. Therefore we maintain that the first twelve chapters were written by a contemporary of the events recorded, and most probably by Joshua himself, towards the close of his life. The statement that the monuments which he erected were extant *to this day*, indicates that he did not promulgate the book immediately after the events narrated (comp. iv. 9; vii. 26; viii. 28, 29; x. 27). The book could not have been written very long after the time of Joshua, because we find that Rahab was still alive when it was composed (vi. 29). The section from chapter xiii. to xxii. inclusive, which contains an account of the distribution of the land, seems to be based upon written documents, in which the property was accurately described. That this was the case is likely not merely on account of the peculiar nature of the diplomatic contents by which this 'Doomsday Book' is distinguished from the preceding part of Joshua, but also on account of the statement in chapter xviii. 4, where Joshua says to the children of Israel, 'Give out from among you three men from each tribe: and I will send them, and they shall rise, and go through the land, and describe it (ויכתבו אותה) according to the inheritance of them; and they shall come again to me.' Compare verse 6, 'Ye therefore shall describe the land (תכתבו את הארץ) into seven parts.' Compare also verses 8 and 9, 'And the men arose and went away; and Joshua charged them that went to *describe* the land, saying, Go, and walk through the land, and *describe* it, and come again to me, that I may here cast lots for you before the Lord in Shiloh. And the men went and passed through the land, and *described* it by cities into seven parts in a *book*, and came again to Joshua to the host at Shiloh.' It seems that the author of this section, following the 'Doomsday Book' compiled by the body, to which each tribe sent three representatives, furnished a more accurate description than was contained in the book compiled under Joshua's direction. It may thus be explained how, when the various towns mentioned are summed up, they seem to be more than the towns introduced into the lists of the possessions of the separate tribes, and *vice versâ*. This circumstance cannot be explained by supposing a corruption of the Hebrew text, since the text in the book of Joshua is particularly correct. However Judah had more towns than are mentioned in chapter xv. Zabulon had more towns than are mentioned in chapter xix. 15. Naphtali had more towns than are mentioned in xix. 35-39. This discrepancy arose not merely from new towns springing up, but also from the fact, that it was unnecessary to specify in the 'Doomsday Book' all the inferior localities of the various tribes, especially since the constant addition subjoined to the names of the more important towns (וחצריהן, literally *and their inclosures*, usually translated *and their villages*) obviates all quibbles.

Although there is a degree of uniformity in the commencement and close of the descriptions of the various tribes, there is a considerable difference in the contents. There is no little variety in the arrangement and order of the notices concerning each tribe. The boundaries are stated sometimes with greater, sometimes with less precision; and in the description of the tribe of Issachar (xix. 17-23), they are omitted altogether. Such discrepancies in the mode of description will be found particularly striking on comparing chapters xiii. and xiv. with xviii. and xix. Hence we infer that the original documents from which these chapters were compiled differed considerably in form, and that the compiler did not feel authorized, in his manifest endeavour after uniformity, to introduce any changes in the contents.

The list of towns granted to the Levites in Josh. xxi. differs from that in 1 Chron. vi. 39-66 so much that we must suppose the latter to contain abstracts from a source different from that in the book of Joshua. That a change of circumstances might demand changes in such lists becomes evident, if we consider the fate of individual cities. For instance, Ziklag was given to the tribe of Simeon (Josh. xix. 5); nevertheless we read in 1 Sam. xxvii. 6, that Achish gave Ziklag to David, and therefore 'Ziklag pertaineth to the kings of Judah unto this day.' The town of Nob does not occur in the list of Levitical towns in the book of Joshua, but in the days of Saul it is styled עיר הכהנים, *city of the priests*. All this abundantly proves that there took place changes in regard to particular places which required corresponding changes in the lists written at various periods.

Since the book of Joshua contains also a description of the territories of Reuben, Gad, and the half tribe of Manasseh, situated on the left bank of the Jordan, which tribes entered into possession before the death of Moses, the Pentateuch itself may be considered as one of the sources from which the second part of the book of Joshua has been compiled. That the author of the book of Joshua derived part of his information from the Pentateuch is evident, if we compare Deut. xviii. 1, 2, and Num. xviii. 20, with Josh. xiii. 14, 33; xiv. 4. Even the unusual form אִשֵּׁי is repeated in Joshua. Compare also Num. xxxi. 8, with Josh. xiii. 21 and 22.

The author of the book of Joshua frequently repeats the statements of the Pentateuch in a more detailed form, and mentions the changes which had taken place since the Pentateuch was written. Compare Num. xxxiv. 13 and 14, with Josh. xiii. 7, sq.; Num. xxxii. 37, with Josh. xiii. 17, sq.; Num. xxxv. with Josh. xxi.

There is also considerable similarity between the following passages in the books of Joshua and Judges:—Josh. xiii. 4, Judg. iii. 3; Josh. xv. 13, sq., Judg. i. 10, 20; Josh. xv. 15-19, Judg. i. 11-15; Josh. xv. 62, Judg. i. 21; Josh. xvi. 10, Judg. i. 29; Josh. xvii. 12, Judg. i. 27; Josh. xix. 47, Judg. xviii. The book of Joshua seems to explain the text of the book of Judges by brief notices; as, for instance, the names Shesha, Achiman, and Talmai (Josh. xv. 14), by בני הענק and ילודי הענק (comp. Judg. i. 13), and makes use of more regular grammatical forms, such as עליות and תחתיות, instead of the more unusual forms in the book of Judges, עלית and תחתית. For these and other equally inconclusive reasons, even Hävernick asserts that the second part of the book of Joshua was written after the book of Judges. Hävernick particularly urges that the fact mentioned in Josh. xix. 47, happened according to Judges xviii. 2, after the death of Joshua, and

that the private expeditions of separate tribes against the inhabitants of the land of Canaan commenced, according to the express statement of the book of Judges, only after the death of Joshua. These assertions of Hävernick are not sufficiently supported by the sacred text. We certainly learn from the book of Judges that the private expeditions against the Canaanites were especially frequent subsequently to the death of Joshua, but it is nowhere stated that no such expedition happened before the death of Joshua. On the contrary, we read in Josh. xvii. 15, that Joshua replied to the children of Joseph, who complained that their territory was not proportionate to their numbers, 'Get thee up to the wood-country, and cut down *for thyself* there in the land of the Perizzites and the giants.'

The whole position of the tribes would render it likely that such expeditions were as frequent as the hostile incursions of the Dutch boors at the Cape of Good Hope are into the territories of the Bushmen, Hottentots, and Caffres; which incursions, if they do not lead to permanent possession, are frequently repeated under similar circumstances. If we take this into consideration it must appear very doubtful, whether the facts mentioned in Josh. xix. 47, and Judg. xviii. 2, are one and the same; and even if they are admitted to be so, the priority of the book of Judges does not necessarily follow.

The discourses of Caleb, Joshua, and Phinehas, recorded in Josh. xiii. 1-6; xiv. 6-15; xvii. 14; xviii. 22, are not contained in the above-mentioned sources, and are either derived from written documents, or are the condensations of a witness present at their delivery.

It seems to have been the intention of the author of chapters xiii.-xxii. to furnish authentic records concerning the arrangements made by Joshua after the conquest of Canaan. Since we do not find in the subsequent history that the tribes, after the death of Joshua, disagreed among themselves about the ownership of the land, it would appear that the object of the book of Joshua, as a 'Doomsday Book,' was fully attained. The circumstance that the book of Joshua contains many Canaanitish names of places to which the Hebrew names are added, seems also to indicate that the second part originated in an early age, when neither the Canaanitish name was entirely forgotten, nor the Hebrew name fully introduced; so that it was expedient to mention both.

In the last two chapters occur two orations of Joshua, in which he bids farewell to the people whom he had commanded. In chapter xxiv. 26, we read, 'And Joshua WROTE these words in the book of the law of God.' The expression, *these words*, seems to refer only to his last address, and the subsequent resolution of the people to follow his example. We are here, however, expressly informed that Joshua did WRITE this much; and consequently, we deem it the more likely that he also committed to writing the other memorable events connected with his career, such as the conquest and the distribution of the land.

Viewing all the circumstances together, we consider it highly probable that the whole book of Joshua was composed by himself up to the twenty-eighth verse of the last chapter; to which a friendly hand subjoined some brief notices, contained in verses 29-33, concerning the death, age, and burial of Joshua; the continuance of his influence upon the people; the interment, in Shechem, of the bones of Joseph, which the children of Israel had brought from Egypt; and the death and burial of Eleazar, the son of Aaron, whom his son Phinehas interred in his allotment on Mount Ephraim. We wish, however, to imitate the modesty of Hermann Witsius, who, in the second edition of his *Miscellanea Sacra* (p. 209), thus sums up the argument on this head:—'It seems to me that the argumentation of Huet has not the weight of a real demonstration, who, from the words just quoted—"Joshua wrote all these words in the book of the law of the Lord"—makes the following inference:—"This certainly proves that Joshua, like Moses, wrote an account of his own doings, and that he subjoined his book to the Mosaical law, which is still its place." But I say that every attentive reader will easily perceive that in Josh. xxiv. 26 there is not mentioned the whole history of Joshua, but only the solemn renewal of the covenant, and that it is by no means stated there that another volume should be subjoined to the volume of the law, but only that the repetition of the covenant was inscribed in the volume of the law. But the opposite arguments also are mostly such as might easily be refuted. Therefore I beg leave to withhold my decision.'

The authority of the book of Joshua mainly rests upon the manner in which it is treated in other parts of the Bible.

Besides the above allusions in the book of Judges, we find Joshua referred to in 1 Kings xvi. 34:—'In his days did Hiel the Bethelite build Jericho: he laid the foundation thereof in Abiram, his first-born, and set up the gates thereof in his youngest son Segub, according to the word of the Lord, which he spake by Joshua the son of Nun.' (Comp. Josh. vi. 26.) The second and third verses of Psalm xliv. contain a brief summary of the whole book of Joshua:—'Thou didst drive out the heathen with thy hand, and plantedst them: thou didst afflict the people, and cast them out. For they got not the land in possession by their own sword, neither did their own arm save them: but thy right hand and thine arm, and the light of thy countenance, because thou hadst a favour unto them.' (Compare Psalm lxviii. 12-14; lxxviii. 54, 55; cxiv. 3 and 5, which refer to the book of Joshua.) Also, Hab. iii. 11: 'The sun and moon stood still in their habitation,' &c. Heb. xiii. 5: 'For he hath said, I will never leave thee, nor forsake thee.' (Compare Josh. i. 5.) Heb. xi. 31: 'By faith the harlot Rahab perished not with them that believed not, when she had received the spies with peace;' and James ii. 25: 'Likewise also was not Rahab the harlot justified by works, when she had received the messengers, and had sent them out another way?' (Compare Josh. ii. and vi. 22-25.) Acts vii. 45: 'Which (the tabernacle) also our fathers that came after brought in with Jesus into the possession of the Gentiles, whom God drave out before the face of our fathers.' (Compare Josh. iii. 14.) Heb. xi. 30: 'By faith the walls of Jericho fell down, after they were compassed about seven days.' (Compare Josh. vi. 17-23.) Heb. iv. 8: 'For if Jesus [JOSHUA] had given them rest, then would he not afterwards have spoken of another day.'

The value ascribed to the book of Joshua will be variously estimated according to the theological and philosophical system of the divines who have ventured, and who venture, to express their opinion on this subject. It is evident that writers who proceed on the supposition that nothing miraculous ever has happened, must, in consistency, declare the contents of the book of Joshua to be fabulous, mythical, unhistorical, and even immoral and wicked; while those divines who are convinced that miracles are possible, and have actually happened, find no difficulty in admitting the authority ascribed to the book of Joshua in the New Testament, where it is repeatedly quoted. The chief stumbling-block has been the quotation from the book of Jasher respecting the standing still of the sun and moon at the command of Joshua: but this subject has been already considered in the article JASHER.

The inquiry respecting the author of the book of Joshua, led Carpzov to a result which he thus expresses in his Introduction, p. 155: 'It is likely that Joshua himself committed to writing most of the contents of this book, although it cannot be said that he composed the whole book; and it cannot be made out clearly whether Samuel, or some other pious person, composed the whole book, or only augmented and completed it by adding the events which happened after the death of Joshua.'

Our investigations have led us to a more definite result; namely, that the book was written before the death of Rahab (vi. 26), but not immediately after the erection of monuments by Joshua, because it is said that they exist *until this day*—an observation which indicates that they had been standing for some time. As, however, various opinions concerning the author, and concerning the so-called apparent contradictions of the book of Joshua, have occupied the attention of biblical scholars, so much so as to become themselves subjects of history, it is becoming that we furnish our readers with a brief survey of these rather inconclusive lucubrations.

It has been urged especially that the conquest of the whole country is ascribed to Joshua in some passages of this book, while in others, and in the book of Judges, it is stated that some portions were still to be subdued. To this we reply that Joshua conquered the whole country, so far as to render it possible for individual tribes and families gradually to complete its occupation by private warfare. We read in x. 40, 'Joshua smote all the country of the hills, and of the south; and in xi. 16, 'Joshua took all that land, the hills, and all the south country.' It is urged that these passages strikingly contradict xiii. 4, where it is read, 'There remaineth yet very much land to be possessed from the south, all the land of the Canaanites unto Mearah, that beside the Sidonians,' &c. Here it has been overlooked, that the south country beside the Sidonians differs from the southern regions of Palestine.

In a similar manner the distribution of the country ascribed to Joshua, has been said to be contradicted by subsequent distributions in the book of Judges; but we reply that the later distribution in detail is perfectly consistent with an earlier general distribution.

When the destruction of all the Canaanites is ascribed to Joshua, it is meant that none could stand in battle before him, and that he destroyed those whom he overcame. But this is not contradicted by the fact that some Canaanites kept out of the way, having taken refuge in their fastnesses, and that these gathered strength again after the days of Joshua. It has also been urged that Jericho and Ai, which Joshua destroyed, were at a later period inhabited again; but this argument seems to have no weight, and therefore requires no answer, the purpose of Joshua being fulfilled by the demolition of their fortifications. It is also doubtful whether the new cities stood on the sites which the old ones occupied [JERICHO].

The quotation from the book of Jasher (Josh. x. 13) is said to be contradicted by 2 Sam. i. 18, where it appears that this book was written in the days of David. But this is by no means clear from the passage referred to; and even if it were so, it would seem that the book of Jasher was an anthologia, augmented in the days of David. Others have based upon this quotation the inference that the book of Joshua was written after the times of David. De Wette, in his *Einleitung* (Berlin, 1833, p. 219), asserts that the book of Joshua was written after the Babylonian captivity.

The mention of the book of Jasher has given rise to some spurious compilations under that name, as well in Hebrew as in English. See the article JASHER.

The Samaritans, who for dogmatical purposes endeavoured to depreciate the authority of persons mentioned in the latter books of the Old Testament, such as Eli, Samuel, Zerubbabel, and others, had no such interest to attack the person of Joshua. Eulogius, according to Photii *Codex*, p. 230, states: Τῶν Σαμαρειτῶν τὸ πλῆθος οἱ μὲν Ἰησοῦν τὸν Ναυῆ ἐδόξαζον εἶναι περὶ οὗ Μωυσῆς εἶπε, προφήτην ἡμῖν ἀναστήσει Κύριος, etc.—'The Samaritan multitude believes that Joshua, the son of Nun, is the person concerning whom Moses said, "The Lord will raise us up a prophet,"' &c. (Compare Lampe, *Comment. in Evangelium Johannis*, vol. i. p. 748.) The Samaritans even endeavoured to exalt the memory of Joshua by making him the nucleus of many strange legends which they embodied into their Arabic book of Joshua, a work which seems to have been compiled in the middle ages, and is quoted by the Rabbinical chroniclers of that period, Sepher Juchasin, R. Samuel, Schullam (f. 154), Schalscheleth (*Nakabbalah*, p .96), Hottinger (*Historia Orientalis*, p. 40, sq.), Zunz (*Gottesdienstliche Gebräische der Juden*, p. 140). Reland supposed that this book was written at an earlier period, and augmented in the middle ages; but it is more likely that the whole is a late compilation. (Compare Johannis Henrici Hottingeri *Historia Orientalis*, p. 40, sq.; and Hottingeri *Smegma*, p. 468.)

The so-called book of Joshua of the Samaritans consists of compilations from the Pentateuch, our book of Joshua, the books of Judges, and of Samuel, intermixed with many Jewish legends. Its compiler pretends that it is translated from the Hebrew into Arabic, but it was probably originally written in Arabic, and manifestly after the promulgation of the Koran, which exercised a perceptible influence upon it. Compare Reland *De Samaritanis*, *Dissertationes Miscellaneæ*, ii. pp. 12 and 68. The author of this compilation

endeavours to prove that the Samaritans are Israelites, and he claims for them the celebrity of the Jews. He attempts to turn the traditions of Jewish history in favour of the Samaritans. By his account Joshua built the temple on Mount Gerizim, and there established public worship; the schism between Jews and Samaritans commenced under Eli, who, as well as Samuel, was an apostate and sorcerer; after the return from the Babylonian exile, the Samaritan form of worship was declared to be the legitimate form; Zerubbabel and his sacred books, which were corrupted, were authoritatively rejected; Alexander the Great expressed his veneration, not for the Jews, but for the Samaritans; these were oppressed under the Emperor Adrian, but again obtained permission to worship publicly on Mount Gerizim. The whole book consists of a mixture of biblical history and legends, the manifest aim being to falsify facts for dogmatical purposes. This book terminates with the history of the Jewish war under Adrian. The only known copy of this book is that of Jos. Scaliger, which is now in the library at Leyden. Although the language is Arabic, it is written in Samaritan characters. Even the Samaritans themselves seem to have lost it. Huntington, in his *Epistolæ*, London, 1704, p. 48, mentions that he could not find it at Nabulus, nor have subsequent inquiries led to its discovery there.

Besides this adulterated version of the history of Joshua, there exists still another in the Samaritan chronicles of Abul Phetach. See *Acta Eruditorum Lips.*, anni 1691, p. 167; Schnurrer's *Samaritanischer Briefwechsel*, in Eichhorn's *Repertorium*, ix. 54; a specimen by Schnurrer, in Paulus's *Neuem Repertorium*, i. 117, sq.

The other persons of this name in the Bible are:

Joshua, a Beth-shemite (1 Sam. vi. 14, 18), an Israelite, the owner of the field into which the cart came which bore the ark on its return from the land of the Philistines.

Joshua (2 Kings xxiii. 8), the governor of the city of Jerusalem at the commencement of the reign of Josiah.

Joshua, the son of Josedec (Hagg. i. 1, 12, 14; Zech. iii. 1, 3, 9; vi. 11), a high-priest in the time of Haggai and Zechariah [Jeshua].

JOSIAH (יֹאשִׁיָּהוּ, *God-healed;* Sept. Ἰωσίας), seventeenth king of Judah, and son of Amon, whom he succeeded on the throne in B.C. 698, at the early age of eight years, and reigned thirty-one years.

As Josiah thus early ascended the throne, we may the more admire the good qualities which he manifested, seeing, as Coquerel remarks, 'qu'il est difficile de recevoir une bonne éducation sur le trône' (*Biographie Sacrée*, p. 305). Avoiding the example of his immediate predecessors, he 'did that which was right in the sight of the Lord, and walked in all the ways of David his father, and turned not aside to the right hand or to the left' (2 Kings xxii. 1, 2; 2 Chron. xxxiv. 1, 2). So early as the sixteenth year of his age he began to manifest that enmity to idolatry in all its forms which distinguished his character and reign; and he was not quite twenty years old when he proclaimed open war against it, although more or less favoured by many men of rank and influence in the court and kingdom. He then commenced a thorough purification of the land from all taint of idolatry, by going about and superintending in person the operations of the men who were employed in breaking down idolatrous altars and images, and cutting down the groves which had been consecrated to idol-worship. His detestation of idolatry could not have been more strongly expressed than by ransacking the sepulchres of the idolatrous priests of former days, and consuming their bones upon the idol altars before they were overturned. Yet this operation, although unexampled in Jewish history, was foretold 326 years before Josiah was born, by the prophet who was commissioned to denounce to Jeroboam the future punishment of his sin. He even named Josiah as the person by whom this act was to be performed; and said that it should be performed in Beth-el, which was then a part of the kingdom of Israel (1 Kings xiii. 2). All this seemed much beyond the range of human probabilities. But it was performed to the letter; for Josiah did not confine his proceedings to his own kingdom, but went over a considerable part of the neighbouring kingdom of Israel, which then lay comparatively desolate, with the same object in view; and at Beth-el, in particular, executed all that the prophet had foretold (2 Kings xxiii. 1-19; 2 Chron. xxxiv. 3-7, 32). In these proceedings Josiah seems to have been actuated by an absolute *hatred* of idolatry, such as no other king since David had manifested, and which David had scarcely occasion to manifest in the same degree.

In the eighteenth year of his reign and the twenty-sixth of his age, when the land had been thoroughly purified from idolatry and all that belonged to it, Josiah proceeded to repair and beautify the temple of the Lord. In the course of this pious labour, the high-priest Hilkiah discovered in the sanctuary a volume, which proved to contain the books of Moses, and which, from the terms employed, seems to have been considered the original of the law as written by Moses. On this point there has been much anxious discussion and some rash assertion. Some writers of the German school allege that there is no external evidence—that is, evidence beside the law itself—that the book of the law existed till it was thus produced by Hilkiah. This assertion it is the less

necessary to answer here, as it is duly noticed in the art. PENTATEUCH. But it may be observed that it is founded very much on the fact that the king was greatly astonished when some parts of the law were read to him. It is indeed perfectly manifest that he had previously been entirely ignorant of much that he then heard; and he rent his clothes in consternation when he found that, with the best intentions to serve the Lord, he and all his people had been living in the neglect of duties which the law declared to be of vital importance. It is certainly difficult to account for this ignorance. Some suppose that all the copies of the law had perished, and that the king had never seen one. But this is very unlikely; but however scarce complete copies may have been, the pious king was likely to have been the possessor of one. The probability seems to be that the passages read were those awful denunciations against disobedience with which the book of Deuteronomy concludes, and which from some cause or other the king had never before read, or which had never before produced on his mind the same strong conviction of the imminent dangers under which the nation lay, as now when read to him from a volume invested with a character so venerable, and brought with such interesting circumstances under his notice.

The king in his alarm sent to Huldah 'the prophetess,' for her counsel in this emergency [HULDAH]: her answer assured him that, although the dread penalties threatened by the law had been incurred and would be inflicted, he should be gathered in peace to his fathers before the days of punishment and sorrow came.

It was perhaps not without some hope of averting this doom that the king immediately called the people together at Jerusalem, and engaged them in a solemn renewal of the ancient covenant with God. When this had been done, the Passover was celebrated with careful attention to the directions given in the law, and on a scale of unexampled magnificence. But all was too late; the hour of mercy had passed; for 'the Lord turned not from the fierceness of his great wrath, wherewith his anger was kindled against Judah' (2 Kings xxii. 3-20; xxiii. 21-27; 2 Chron. xxxiv. 8-33; xxxv. 1-19).

That removal from the world which had been promised to Josiah as a blessing, was not long delayed, and was brought about in a way which he had probably not expected. His kingdom was tributary to the Chaldæan empire; and when Pharaoh-necho, king of Egypt, sought a passage through his territories, on an expedition against the Chaldæans, Josiah, with a very high sense of the obligations which his vassalage imposed, refused to allow the march of the Egyptian army through his dominions, and prepared to resist the attempt by force of arms. Necho was very unwilling to engage in hostilities with Josiah: the appearance of the Hebrew army at Megiddo, however, brought on a battle, in which the king of Judah was so desperately wounded by arrows that his attendants removed him from the war-chariot, and placed him in another, in which he was taken to Jerusalem, where he died. No king that reigned in Israel was ever more deeply lamented by all his subjects than Josiah: and we are told that the prophet composed on the occasion an elegiac ode, which was long preserved among the people, but which is not now in existence (2 Kings xxiii. 29-37; 2 Chron. xxxv. 20-27).

1. JOTHAM (יוֹתָם, *God is upright;* Sept. Ἰωάθαμ), the youngest of Gideon's seventy legitimate sons; and the only one who escaped when the rest were massacred by the order of Abimelech. When the fratricide was made king by the people of Shechem, the young Jotham was so daring as to make his appearance on Mount Gerizim for the purpose of lifting up a protesting voice, and of giving vent to his feelings. This he did in a beautiful parable, wherein the trees are represented as making choice of a king, and bestowing on the bramble the honour which the cedar, the olive, and the vine would not accept. The obvious application, which indeed Jotham failed not himself to point out, must have been highly exasperating to Abimelech and his friends; but the speaker fled, as soon as he had delivered his parable, to the town of Beer, and remained there out of his brother's reach. We hear no more of him; but three years after, if then living, he saw the accomplishment of the malediction he had pronounced (Judg. ix. 5-21).

2. JOTHAM, tenth king of Judah, and son of Uzziah, whom he succeeded in B.C. 758, at the age of twenty-five: he reigned sixteen years. His father having during his last years been excluded by leprosy from public life [UZZIAH], the government was administered by his son. Jotham profited by the experience which the reign of his father, and of the kings who preceded him, afforded, and he ruled in the fear of God, although he was unable to correct all the corrupt practices into which the people had fallen. His sincere intentions were rewarded with a prosperous reign. He was successful in his wars. The Ammonites, who had 'given gifts' as a sort of tribute to Uzziah, but had ceased to do so after his leprosy had incapacitated him from governing, were constrained by Jotham to pay for three years a heavy tribute in silver, wheat, and barley (2 Chron. xxvi. 8; xxvii. 5, 6). Many important public works were also undertaken and accomplished by Jotham. The principal gate of the temple was rebuilt by him on a more magnificent scale; the quarter of Ophel, in Jerusalem, was strengthened by new fortifications; various towns were built or rebuilt in the mountains of Judah; and castles and towers of defence were erected in the wilderness. Jotham died greatly lamented by his people, and was buried in the sepulchre of the kings (2 Kings xv. 38; 2 Chron. xvii. 3-9).

JUBAL (יוּבָל, *jubilum*, i. e. *music;* Sept. Ἰουβάλ), one of Cain's descendants, son of Lamech and Adah. He is described as the inventor of the כִּנּוֹר *kimor*, and the עוּגָב *ugab*, rendered in our version 'the harp and the organ,' but perhaps more properly 'the lyre and mouth-organ,' or Pandean pipe (Gen. iv. 21) [MUSIC].

JUBILEE (שְׁנַת הַיּוֹבֵל, or merely יוֹבֵל, as in Lev. xxv. 28; Sept. ἔτος τῆς ἀφέσεως, or simply ἄφεσις; Vulg. *Annus Jubilei*, or *Jubileus*), according to some a period of fifty years, according to others, of forty-nine years, the termination of which led to certain great changes in the condition of the Hebrews, all of which seem to have been designed and fitted to bring about from time

to time a restoration of the original social state instituted by Moses, and so to sustain in its unimpaired integrity the constitution of which he was the author. We remark at the commencement, that notwithstanding the many great names which favour the shorter period — namely, forty-nine years—we consider that the language of Scripture is very clear in behalf of the longer one: an opinion for which it would be easy to marshal at least as many and as great authorities as for the other. Many of these authorities may be found mentioned in the most recent tractate with which we are acquainted on the subject, that of J. T. Kranold, *De Anno Hebræo Jubilæo*, Gotting. p. 23. In the same piece the reader may find a pretty full discussion respecting the derivation and import of the term Jubilee (p. 18 sq.); of which it may suffice here to say that, while difference of opinion prevails as to its exact signification—and hence appears the propriety of the course taken by King James's translators in retaining the original word itself—the root-idea of the word seems to be connected with two external acts—*flowing* (Gen. vi. 17) and *sounding* (Gen. iv. 21), which are obviously one and the same in different aspects; for sound is but the flow of breath or wind, as a stream is the flow of water. From this idea of pouring forth came the particular meaning of the term Jubilee, as employed in relation to the year so called, which was announced and introduced by the blast of a trumpet, the signal for the dissolution of certain existing arrangements, and a general system of restitution: whence is seen the propriety of that translation of the Hebrew which the Seventy give, ἔτος ἀφέσεως, 'year of release' or 'restoration.' And as the restitutions which then took place were occasions of joy to thousands, so the term Jubilee came to imply a period of general gladness.

Intimately connected with the Jubilee was another singular Mosaic institution, namely, the Sabbatical year. On this account we shall speak briefly of the latter, as preparatory to a right understanding of the former.

While yet wandering in the wilderness, and therefore, before they had entered 'the land of promise,' the children of Israel received from the lips of their great legislator the following law—'six years thou shalt sow thy land, and shalt gather in the fruits thereof: but the *seventh year* thou shalt let it rest; that thine ox and thine ass may rest, and the son of thy handmaid and the stranger may be refreshed' (Exod. xxiii. 10 sq.). This injunction is repeated in Lev. xxv. 1-7, where it stands as proceeding immediately from the Lord. The land is to keep 'a sabbath for the Lord.' It is added—'that which groweth of its own accord of thy harvest thou shalt not reap, neither gather the grapes of thy vine undressed. And the sabbath of the land shall be meat for you; for thee, and for thy servant, and for thy cattle.' Then in immediate sequence follows the law relating to the Jubilee (Lev. xxi. 8). 'And thou shalt number seven sabbaths of years unto thee, seven times seven years, forty and nine years; then shalt thou cause the trumpet of the Jubilee to sound in the tenth day of the seventh month, in the day of atonement shall ye make the trumpet sound throughout all your land. And ye shall *hallow the fiftieth year*, and proclaim liberty throughout all the land unto all the inhabitants thereof; and ye shall return every man unto his possession and unto his family. A Jubilee shall *that fiftieth* year be unto you. Ye shall not sow, neither reap that which groweth of itself in it, nor gather the grapes of thy vine undressed; for it is the Jubilee; it shall be holy unto you; ye shall eat the increase thereof out of the field. And if thou sell ought unto thy neighbour or buyest ought, according to the number of years after the Jubilee thou shalt buy, and according to the fewness of years (to the ensuing Jubilee) thou shalt diminish the price of it, for according to the number of the fruits (or harvests) doth he sell. And the land shall yield her fruits, and ye shall eat your fill and dwell therein in safety. I will command my blessing upon you in the sixth year ('in six years' conjectures Michaelis, *Comment.* vol. i. p. 290), and it shall bring forth fruit for three years. And ye shall sow the eighth year and eat of old fruit until the ninth year. The land shall not be sold for ever, for the land is mine: in all the land of your possession ye shall grant a redemption for the land' (Lev. xxv. 8-24). Land might be redeemed by a kinsman or by the party who sold it; but in the Jubilee year it must return to its original proprietor. Dwelling-houses within a walled city might be redeemed within the first year; if not redeemed within the space of a full year they became the freehold of the purchaser. The houses of villages were to be counted as the fields of the country. The cities and houses of the Levites were redeemable at any time, and could never be held longer than the ensuing Jubilee: the field of the suburbs of their cities might not be sold (vers. 25-38). Israelites who were hired servants (Israelitish *bond*-servants were not allowed) might serve till the year of Jubilee, when they returned to their possessions. A Hebrew sold as a slave to a foreigner resident in Palestine was redeemable by himself or relatives at any time, by making payment according to the number of years to elapse before the next Jubilee; but at the Jubilee such bondsman was, under all circumstances, to be set at liberty (vers. 39-55). The only exception to this system of general restitution was in the case of property set apart and devoted to the Divine service—'Every devoted thing is most holy unto the Lord; none devoted shall be redeemed' (Lev. xxvii. 28-29).

With these scriptural details the account given by Josephus (*Antiq.* iii. 12. 3) substantially agrees. The latter, however, states that in the year of Jubilee 'debtors are freed from their debts.' And in regard to the restitution of land, he says, 'when the Jubilee is come, which name denotes liberty, he that sold the land and he that bought it meet together, and make an estimate on one hand of the fruits gathered, and on the other of the expenses laid out upon it. If the fruits gathered come to more than the expenses laid out, he who sold it takes the land again; but if the expenses prove more than the fruits, the present possessor receives of the former owner the difference, and leaves the land to him; and if the fruits received and the expenses laid out prove equal, the present possessor relinquishes it to the former owner.'

Our object in making this quotation is not merely to afford an illustration of the way in which the law of release was worked, but to show

that the Jewish historian speaks of the law as a reality, as a present reality, as something in actual operation: the importance of which evidence will presently appear.

The time required by the Sabbatical year and by the Jubilee to be rescued from the labours of the field, was very considerable. Strictly interpreted the language we have cited would take out of the ordinary course of things every sixth, seventh, and eighth year, during each successive septenary, till the circle of fifty years was in each period completed. Nay more, the old store, produced in the sixth year, was to last until the ninth year, for the sixth year was to bring forth fruits for three years.

The reader has now before him the whole of this extraordinary piece of legislation, which, viewed in all its bearings—in its effects on human labour, on character, on religious institutions and observances, as well as on the general condition of society, no less than on the productiveness of the land, and the means of sustenance to its inhabitants—is wholly unparalleled by any event in the history of the world. But are we therefore to disbelieve and reject it? The admission that these laws were not only given but executed, is of course an acknowledgment of the divinity of the Mosaic institutions: an acknowledgment which involves the further recognition of miracle—indeed of a continually revolving cycle of miracles. Such a recognition, however, is opposed to what some theologians, with a strange perversion of the name, have regarded as a first principle in their system, namely, that miracles are inadmissible, either as being impossible or improbable. Accordingly, since the existence of the law is unquestionable, its execution has been denied.

We at once admit that the Scriptures do not afford strictly historical data by which we are enabled to prove that the law was carried into effect in the earlier periods of the Jewish state. But how rash to deduce a positive conclusion from a mere negation! In order that such an inference should possess any weight, it is necessary to show that the sacred history was designed and fitted to give a complete detail of all that concerned the Hebrew nation, and specially to exhibit in actual operation the laws given by Moses. No such aim have the Scriptures in view, no such office do they execute; nor are we sure that their credibility would be at all enhanced, did they appear framed for any such unlikely, not to say suspicious, purpose.

There are some presumptions in favour of the reality of the laws under consideration. The recurring periods of seven years are in keeping with the institution of the seventh day as a Sabbath for man and beast. The aim in both is similar—needful repose. The leading idea involved in the Jubilee—namely, restitution—also harmonizes with the fundamental principles of the Mosaic system. The land was God's, and was entrusted for use to the chosen people in such a way that every individual had his portion. A power of perpetual alienation would have been a virtual denial of God's sovereign rights, while the law of Jubilee was one continued recognition of them. The conception is purely *theocratical* in its whole character and tendencies. The theocracy was of such a nature as to disallow all subordinate 'thrones, principalities, and powers;' and consequently, to demand entire equality on the part of the people. But the power of perpetual alienation in regard to land would have soon given rise to the greatest inequalities of social condition, presenting what modern states have, alas! exhibited but too much of—splendid affluence on one side and sordid pauperism on the other. But these laws tended to preserve the original level which had a divine origin; for they would prevent vast accumulations, restrain cupidity, preclude domestic tyranny, and constantly remind rich and poor of their essential equality in themselves, in the state, and before God. A passage in Deuteronomy (xv. 4), when rightly understood, as in the marginal translation—'to the end that there be no poor among you'—seems expressly to declare that the aim in view, at least, of the Sabbatical release, was to prevent the rise of any great inequality of social condition, and thus to preserve unimpaired the essential character of the theocracy. Equally benevolent in its aim and tendency does this institution thus appear, showing how thoroughly the great Hebrew legislator cared and provided for individuals, instead of favouring classes. Beginning with a narrow cycle of seven days, he went on to a wider one of as many years, embracing at last seven times seven annual revolutions, seeking in all his arrangements rest for man and beast, and, by a happy personification, rest even for the brute earth; and in the rest which he required for human beings, providing for that more needful rest of mind which the sharp competitions and eager rivalries of modern society deny to ten thousand times ten thousand. As being of a benign character and tendency, the law of the Sabbatical and Jubilee year is in accordance with the general spirit of the Mosaic legislation, and appears not unworthy of its divine origin.

Warburton adduced this law (*Divine Legation of Moses*) in order to show that Moses was in truth sent and sustained by God, since nothing but a divine power could have given the necessary supplies of food in the sixth year. That there is some force in this argument no unprejudiced person can well deny: how much surprised then will the reader be, after perusing the foregoing remarks, to find Michaelis (*Comment.* i. 389, note) speaking thus:—'This proof would in plain English amount to this: this law is *so extremely absurd*, that he who gave it must necessarily have been sent from God, because none but God is capable of counteracting the destructive effects of such a law.'

To our mind, we remark in continuation of these presumptive evidences, there is something noble, as well as self-relying in the announciation of these laws in the desert, ere yet the land was gained, as a part of a general system of religious and social polity, before a horde rather than a nation, a people thirsting for a tranquil settlement, and therefore hostile to any mere illusions, and likely to visit on their author's head such fond notions as, according to Michaelis, these commands appeared. And why, if the attempt was unreal or unsupported, why this legislation for future times? Why, unless Moses was supported by a consciousness of a divine guidance, this risk of provoking either the ridicule or the disgust of his wandering tribes? In truth, however, Moses in these laws lays the foundation, while yet in

the wilderness, of institutions which were in full harmony with the entire system which he said he had received of God.

But these laws either emanated from Moses, or they did not. If they did not, they arose after the settlement in Canaan, and are of such a nature as to convict their fabricator of imposture, if, indeed, any one could have been found so daring as to bring forth laws implying institutions which did not exist, and which under ordinary circumstances could not find permanence, even if they could ever be carried into operation at all. But if these laws emanated from Moses, is it credible that he would have given utterance to commands which convict themselves of impossibility? or caused the rise of institutions, which, if unsupported of heaven, must come to a speedy termination, and in so doing act to his own discredit as a professed divine messenger? There is a species of self-confidence, there is a moral daring which of itself vindicates its divine origin: the case before us seems to be an instance.

Nor can we see that the law is either 'absurd' or 'pernicious' (Michaelis, *ut supra*). That for its successful execution special divine aid was needful, we by no means deny; but the Mosaic polity was in its origin, and in its very nature, special, and, 'according to the Scriptures,' received special aid of God.

So far as the system of restitution is concerned, we see nothing but what the power of law and the authority of religion were capable of bringing about. But could the land sustain the people? Why not? Palestine had a most fertile soil. Every man having land, would be a husbandman, and therefore every part would be carefully tilled. And as his sustenance and that of his family would, in the case of each proprietor, depend, not only on his industry but his forethought, on making provision not for a contingent but a certain want; so every head of a house would labour wisely and well, and husband with due care for the year of rest: thus, while making provision for his bodily wants, rising in a proper self-respect, and cultivating many important moral qualities. Besides, a year of rest was a great thing to work for; which would sharpen all a man's faculties and quicken his hands; and when at length the wished for time arrived, the excellence of character which the system fostered would save the licence from abuse, if not turn it to most important intellectual and religious purposes. We shall be much deceived in our estimate of the moral and social effects of the Jubilee, if we judge from what is probable in regard to the overworked, uninstructed, and irreligious thousands which crowd our modern cities or cover our fields. On the possibility of the land's affording sufficient food, we find the following important passage in Palfrey's '*Lectures on the Jewish Scriptures*,' Boston, 1841, vol. i. p. 303: 'I find no difficulty arising from any inadequacy of the produce of six years to afford sustenance to the people for seven. To say that this was intended would merely be to say that the design was that the consumption of each year should only amount on an average to six-sevenths of its produce. In such an arrangement it cannot be thought that there was anything impracticable. There are states of this Union which export yearly more than half their produce, and subsist substantially on the remainder, their imports consisting mostly of luxuries. Again, in England nearly three quarters of the families are engaged in commerce, manufactures, professions, and unproductive pursuits; but in Judæa every man was a producer of food, with the advantage of a fine climate and a rich soil.' The remainder is worth consulting.

It may be of some importance to remark that those who believe that these laws were good, and were also executed, are not therefore required to maintain that the regular and intended series of things was never interrupted. The promises of God are in all cases conditioned on human obedience. This condition is expressly laid down in the case before us (Lev. xxv. 18, 36, 38). At the same time, the silence of the sacred history before the captivity looks as if the law in question was so uninterruptedly, regularly, and as a matter of course, observed from Jubilee to Jubilee, that no occasion transpired for remark. In history, as in every day life, more is said of the exceptional than the periodical and the ordinary.

The tenor of these observations will probably lead the reader to consider it a somewhat surprising assertion, that these laws were not executed before the Babylonish exile; yet such is the statement of Winer (*Real-wörterb.* s. v. 'Jubeljahr') and De Wette (*Lehrb. der Archäol.* p. 158). Some passages of Scripture are referred to, which are thought to imply the truth of this position, as 1 Kings xxi. 2; Isa. v. 8; 2 Chron. xxxvi. 21; Lev. xxvi. 34. Our space does not allow us to go into a critical examination of these texts, but we may say, that having carefully considered their import and bearing, we cannot find in them the alleged implication.

For the opposite view, there is, in agreement with the general tenor of this article, some positive evidence which must be briefly indicated. The Roman historian Tacitus bears witness to the observance of the Sabbatical year at least, in the following terms:—'Septimo die otium placuisse ferunt, quod is finem laborum tulerit; dein blandiente inertia, septimum quoque annum ignaviæ datum:' 'They give the seventh day to ease because it put an end to labours; moreover, through the allurements of idleness, the seventh year also is given to inactivity' (Tac. *Hist.* v. 4). Of course this is an enemy's version, but the evidence is distinct, pointed, and unquestionable. We find another strong evidence furnished by Josephus (*Antiq.* xiv. 10. 6), where, giving certain decrees of Julius Cæsar in the terms in which they were issued, he records these words:—'Cæsar hath ordained that the Jews pay a tribute yearly excepting *the seventh*, which they call the *Sabbatical year*, because thereon they neither receive the fruits of their trees, nor do they sow their land;' further on he says: 'every year, the seventh year excepted, which they call the Sabbatic year, whereon they neither plough nor receive the product of their trees.' Another testimony is found in 1 Macc. vi. 49: 'for they came out of the city (Bethura), because they had no victuals there to endure the siege, *it being a year of rest to the land*.' In Ezekiel a passage occurs, where beyond a question the year of Jubilee is intended (xlvi. 17): 'if he give a gift of his inheritance to one of his servants, then it shall be his *to the year of liberty*.' But there is a passage in Isaiah (lxi.

1, 2) which appears to us to furnish remarkable and satisfactory evidence that the Jubilee itself was observed before the captivity:—'The spirit of the Lord God is upon me, because the Lord hath anointed me to preach good tidings unto the meek, to proclaim liberty to the captives, and the opening of the prison to them that are bound, *to proclaim the acceptable year of the Lord*.'

The words of Isaiah we consider very strong. It is admitted that they allude to the year of Jubilee (Kranold *De Anno Jubilæo*, p. 80)—but then they are poetry, not history. Why, what a purblind objection is this! The clear implications of poetry are the best and truest history, for they are an appeal to what is generally known and recognised in the public mind. There would have been no pertinency in the words of Isaiah, had not the Jubilee been a thing of which the world around him had actual experience; just as the force and import of the words do not appear to the mind of a modern reader, until he is acquainted with the Mosaic laws, and the Jewish observances on the point.

If, however, the essential element of this system of law, namely the Sabbatical year, was, as we have seen, an established institution in the days of Tacitus, Josephus, the Maccabees, Ezekiel, and Isaiah, we think the fair and legitimate inference is in favour of those laws having been long previously observed, probably from the early periods of the Hebrew republic. Their existence in a declining state of the commonwealth cannot be explained without seeking their origin nearer the fountain-head of those pure, living waters, which, with the force of all primitive enthusiasm, easily effected great social wonders, especially when divinely guided and divinely sustained.—

J. R. B.

JUDÆA, the southernmost of the three divisions of the Holy Land. It denoted the kingdom of Judah as distinguished from that of Israel. But after the captivity, as most of the exiles who returned belonged to the kingdom of Judah, the name Judæa (Judah) was applied generally to the whole of Palestine west of the Jordan (Hag. i. 1, 14; ii. 2). Under the Romans, in the time of Christ, Palestine was divided into Judæa, Galilee, and Samaria (John iv. 4, 5; Acts ix. 31), the last including the whole of the southern part west of the Jordan. But this division was only observed as a political and local distinction, for the sake of indicating the part of the country, just as we use the name of a county (Matt. ii. 1, 5; iii. 1; iv. 25; Luke i. 65); but when the whole of Palestine was to be indicated in a general way, the term Judæa was still employed. Thus persons in Galilee and elsewhere spoke of going to Judæa (John vii. 3; xi. 7), to distinguish the part of Palestine to which they were proceeding; but when persons in Rome and other places spoke of Judæa (Acts xxviii. 21), they used the word as a general denomination for the country of the Jews, or Palestine. Indeed, the name seems to have had a more extensive application than even to Palestine west of the Jordan. It denoted all the dominions of Herod the Great, who was called king of Judæa; and much of these lay beyond the river. After the death of Herod, however, the Judæa to which his son Archelaus succeeded was only the southern province so called (Matt. ii. 22); which afterwards became a Roman province dependent on Syria and governed by procurators, and this was its condition during our Lord's ministry. It was afterwards for a time partly under the dominion of Herod Agrippa the elder (Acts xii. 1-19), but on his death it reverted to its former condition under the Romans.

It is only Judæa, in the provincial sense, that requires our present notice, the country at large being described in the article PALESTINE. In this sense, however, it was much more extensive than the domain of the tribe of Judah, even more so than the kingdom of the same name. There are no materials for describing its limits with precision; but it included the ancient territories of Judah, Benjamin, Dan, Simeon, and part of Ephraim. It is, however, not correct to describe Idumæa as not anciently belonging to Judah. The Idumæa of later times, or that which belonged to Judæa, was the southern part of the ancient Judah, into which the Idumæans had intruded during the exile, and the annexation of which to Judæa only restored what had anciently belonged to it.

In the rabbinical writings Judæa, as a division of Palestine, is frequently called 'the south,' or 'the south country,' to distinguish it from Galilee, which was called 'the north' (Lightfoot, *Chorog. Cent.* xii.). The distinction of the tribe of Judah into 'the Mountain,' 'the Plain,' and 'the Vale,' which we meet with in the Old Testament (Num. xiii. 30), was preserved under the more extended denomination of Judæa. The *Mountain*, or hill country of Judæa (Josh. xxi. 11; Luke i. 39), was that 'broad back of mountains,' as Lightfoot calls it (*Chorog. Cent.* xi.), which fills the centre of the country from Hebron northward to beyond Jerusalem. The *Plain* was the low country towards the sea-coast, and seems to have included not only the broad plain which extends between the sea and the hill country, but the lower parts of the hilly region itself in that direction. Thus the rabbins allege that from Betheron to the sea is one region (*T. Hieros. Sheviith*, ix. 2). The *Vale* is defined by the rabbins as extending from Engedi to Jericho (Lightfoot, *Panergon*, § 2); from which, and other indications, it seems to have included such parts of the Ghor, or great plain of the Jordan, as lay within the territory of Judæa. This appropriation of the terms is far preferable to that of some writers, such as Lightfoot, who suppose 'the Plain' to be the broad plain of the Jordan, and 'the Valley' to be the lower valley of the same river. That which is called *the Wilderness of Judæa*, was the wild and inhospitable region lying eastward of Jerusalem, in the direction of the Jordan and Dead Sea (Isa. xl. 3; Matt. iii. 1; Luke i. 80; iii. 2-4). We may have some notion of the extent northward which Judæa had obtained, from Josephus calling Jerusalem the centre of the country (*De Bell. Jud.* iii. 3, 5); which is remarkable, seeing that Jerusalem was originally in the northernmost border of the tribe of Judah. In fact, he describes the breadth of the country as extending from the Jordan to Joppa, which shows that this city was in Judæa. How much further to the north the boundary lay, we cannot know with precision, as we are unacquainted with the site of Annath, otherwise Borceos, which he says lay on the boundary line between Judæa and Samaria. The

mere fact that Josephus makes Jerusalem the centre of the land seems to prove that the province did not extend so far to the south as the ancient kingdom of the same name. As the southern boundary of Judæa was also that of the whole country, the questions connected with it belong to the article PALESTINE; and it is only necessary to remark that Josephus places the southern boundary of the Judæa of the time of Christ at a village called Jardan, on the confines of Arabia Petræa. No place of this name has been found; and the indication is very indistinct, from the fact that all the country which lay beyond the Idumæa of those times was then called Arabia. In fixing this boundary, Josephus regards Idumæa as part of Judæa, for he immediately after reckons that as one of the eleven districts into which Judæa was divided. Most of these districts were denominated, like our counties, from the chief towns. They were, 1. Jerusalem; 2. Gophna; 3. Acrabatta; 4. Thumna; 5. Lydda; 6. Emmaus; 7. Pella; 8. Idumæa; 9. Engaddi; 10. Herodium; and 11. Jericho.

Judæa is, as the above intimations would suggest, a country full of hills and valleys. The hills are generally separated from one another by valleys and torrents, and are, for the most part, of moderate height, uneven, and seldom of any regular figure. The rock of which they are composed is easily converted into soil, which being arrested by the terraces when washed down by the rains, renders the hills cultivable in a series of long, narrow gardens, formed by these terraces from the base upwards. In this manner the hills were in ancient times cultivated most industriously, and enriched and beautified with the fig-tree, the olive-tree, and the vine; and it is thus that the scanty cultivation which still subsists is now carried on. But when the inhabitants were rooted out, and the culture neglected, the terraces fell to decay, and the soil which had been collected in them was washed down into the valleys, leaving only the arid rock, naked and desolate. This is the general character of the scenery; but in some parts the hills are beautifully wooded, and in others the application of the ancient mode of cultivation still suggests to the traveller how rich the country once was and might be again, and how beautiful the prospects which it offered. As, however, much of this was the result of cultivation, the country was probably anciently, as at present, *naturally* less fertile than either Samaria or Galilee. The present difference is very pointedly remarked by different travellers; and Lord Lindsay plainly declares that 'all Judæa, except the hills of Hebron and the vales immediately about Jerusalem, is barren and desolate. But the prospect brightens as soon as you quit it, and Samaria and Galilee still smile like the land of promise.' But there is a season—after the spring-rains, and before the summer heat has absorbed all the moisture left by them—when even the desert is clothed with verdure; and at that season the valleys of Judæa present a refreshingly green appearance. This vernal season, however, is of short duration, and by the beginning of May the grass upon the mountains, and every vestige of vegetation upon the lower grounds, have in general completely disappeared (see *Pictorial History of Palestine; Introduct.* pp. 39, 40, 119, 120; Nau, p. 439; Roger, p. 182; Mariti, ii. 362; Lindsay, ii. 70; Stephens, ii. 249; Elliot, p. 408, 409; Olin, ii. 323).

JUDAH (יְהוּדָה, *celebrated;* Sept. Ἰούδας), fourth son of Jacob and Leah (B.C. 1755). The narrative in Genesis brings this patriarch more before the reader, and makes known more of his history and character, than it does in the case of any other of the twelve sons of Jacob, with the single exception of Joseph. It is indeed chiefly in connection with Joseph that the facts respecting Judah transpire; and as they have already been given in the articles JACOB and JOSEPH, it is only necessary to indicate them shortly in this place. It was Judah's advice that the brethren followed when they sold Joseph to the Ishmaelites, instead of taking his life. By the light of his subsequent actions we can see that his conduct on this occasion arose from a generous impulse, although the form of the question he put to them has been sometimes held to suggest an interested motive:—'What profit is it if we slay our brother and conceal his blood? Come, let us sell him,' &c. (Gen. xxxvii. 26, 27).

Not long after this Judah withdrew from the paternal tents, and went to reside at Adullam, in the country which afterwards bore his name. Here he married a woman of Canaan, called Shuah, and had by her three sons, Er, Onan, and Shelah. When the eldest of these sons became of fit age, he was married to a woman named Tamar, but soon after died. As he died childless, the patriarchal law, afterwards adopted into the Mosaic code (Deut. xxv. 6), required him to bestow upon the widow his second son. This he did: but as Onan also soon died childless, Judah became reluctant to bestow his only surviving son upon this woman, and put her off with the excuse that he was not yet of sufficient age. Tamar accordingly remained in her father's house at Adullam. She had the usual passion of Eastern women for offspring, and could not endure the stigma of having been twice married without bearing children, while the law precluded her from contracting any alliance but that which Judah withheld her from completing.

Meanwhile Judah's wife died, and after the time of mourning had expired, he went, accompanied by his friend Hirah, to attend the shearing of his sheep at Timnath in the same neighbourhood. These circumstances suggested to Tamar the strange thought of connecting herself with Judah himself, under the guise of a loose woman. Having waylaid him on the road to Timnath, she succeeded in her object, and when the consequences began to be manifest in the person of Tamar, Judah was highly enraged at her crime, and, exercising the powers which belonged to him as the head of the family she had dishonoured, he commanded her to be brought forth, and committed to the flames as an adulteress. But when she appeared, she produced the ring, the bracelet, and the staff, which he had left in pledge with her; and put him to confusion by declaring that they belonged to the father of her coming offspring. Judah acknowledged them to be his, and confessed that he had been wrong in withholding Shelah from her. The result of this painful affair was the birth of two sons, Zerah and Pharez, from whom, with Shelah, the tribe of

Judah descended. Pharez was the ancestor of the line from which David, the kings of Judah, and Jesus came (Gen. xxxviii.; xlvi. 12; 1 Chron. ii. 3-5; Matt. i. 3; Luke iii. 33).

These circumstances seem to have disgusted Judah with his residence in towns; for we find him ever afterwards at his father's tents. His experience of life, and the strength of his character, appear to have given him much influence with Jacob; and it was chiefly from confidence in him that the aged father at length consented to allow Benjamin to go down to Egypt. That this confidence was not misplaced has already been shown [JOSEPH]; and there is not in the whole range of literature a finer piece of true natural eloquence than that in which Judah offers himself to remain as a bond-slave in the place of Benjamin, for whose safe return he had made himself responsible to his father. The strong emotions which it raised in Joseph disabled him from keeping up longer the disguise he had hitherto maintained, and there are few who have read it without being, like him, moved even to tears.

We hear nothing more of Judah till he received, along with his brothers, the final blessing of his father, which was conveyed in lofty language, glancing far into futurity, and strongly indicative of the high destinies which awaited the tribe that was to descend from him.

2. JUDAH, TRIBE OF. This tribe sprang from Judah, the son of Jacob. When the Israelites quitted Egypt, it already exhibited the elements of its future distinction in a larger population than any of the other tribes possessed. It numbered 74,000 adult males, being nearly 12,000 more than Dan, the next in point of numbers, and 34,100 more than Ephraim, which in the end contested with it the superiority among the tribes. During the sojourn in the wilderness, Judah neither gained, like some tribes, nor lost like others. Its numbers had increased to 76,500, being 12,100 more than Issachar, which had become next to it in population (Num. i. 25). In the first distribution of lands, the tribe of Judah received the southernmost part of Palestine, to the extent of fully one-third of the whole country to be distributed among the nine and a half tribes for which provision was to be made. This oversight was discovered and rectified at the time of the second distribution, which was founded on an actual survey of the country, when Simeon and Dan received allotments out of the territory which had before been wholly assigned to Judah (Josh. xix. 9). That which remained was still very large, and more proportioned to the future greatness than the actual wants of the tribe. We now also know, through the researches of recent travellers, that the extent of good land belonging to this tribe, southward, was much greater than had usually been supposed, much of that which had been laid down in maps as mere desert, being actually composed of excellent pasture land, and in part of arable soil, still exhibiting some traces of ancient cultivation. When Judah became a kingdom, the original extent of territory assigned to the tribe was more than restored or compensated, for it must have included the domains of Simeon, and we know that Benjamin was included in it.

The history of the Judges contains fewer facts respecting this important tribe than might be expected. It seems however to have been usually considered that the birthright which Reuben forfeited had passed to Judah under the blessing of Jacob; and a sanction was given to this impression when, after the death of Joshua, the divine oracle nominated Judah to take precedence of the other tribes in the war against the Canaanites (Judg. i. 2). It does not appear that any tribe was disposed to dispute the superior claim of Judah on its own account, except Ephraim, although in doing this Ephraim had the support of other tribes. Ephraim appears to have rested its claims to the leadership of the tribes upon the ground that the house of Joseph, whose interest it represented, had received the birthright, or double portion of the eldest, by the adoption of the two sons of Joseph, who became the founders of *two* tribes in Israel. The existence of the sacerdotal establishment at Shiloh, in Ephraim, was doubtless also alleged by the tribe as a ground of superiority over Judah. When, therefore, Judah assumed the sceptre in the person of David, and when the sacerdotal establishment was removed to Jerusalem, Ephraim could not brook the eclipse it had sustained, and took the first opportunity of erecting a separate throne, and forming separate establishments for worship and sacrifice. Perhaps the separation of the kingdoms may thus be traced to the rivalry of Judah and Ephraim. After that separation the rivalry was between the two kingdoms; but it was still popularly considered as representing the ancient rivalry of these great tribes; for the prophet, in foretelling the repose of a coming time, describes it by saying, 'The envy also of Ephraim shall depart, and the adversaries of Judah shall be cut off: Ephraim shall not envy Judah, and Judah shall not vex Ephraim' (Isa. xiii. 12).

3. JUDAH, KINGDOM OF. When the territory of all the rest of Israel, except Judah and Benjamin, was lost to the kingdom of Rehoboam, a special single name was needed to denote that which remained to him; and almost of necessity the word *Judah* received an extended meaning, according to which it comprised not Benjamin only, but the priests and Levites, who were ejected in great numbers from Israel, and rallied round the house of David. At a still later time, when the nationality of the ten tribes had been dissolved, and every practical distinction between the ten and the two had vanished during the captivity, the scattered body had no visible head, except in Jerusalem, which had been re-occupied by a portion of *Judah's* exiles. In consequence the name Judah (or *Jew*) attached itself to the entire nation from about the epoch of the restoration. But in this article Judah is understood of the people over which David's successors reigned, from Rehoboam to Zedekiah. Under the article ISRAEL the chronology of the two kingdoms has been discussed, which, however, was not carried below the capture of Samaria. In the lower part of the list we lose the check which the double line of kings afforded; but for the same reason the problem is simpler. The only difficulty encountered here rises out of the ages assigned to some of the kings of Judah. For this reason, in the following list, all their ages are inserted, so far as they are recorded. It has been thought sufficient to add Ussher's chronology to the dates as given above in the article ISRAEL.

Accession of	Years of Reign.	Age.	B. C.	Father's Age at Son's Birth.
Rehoboam . .	17	41	975	—
Abijah . . .	3	—	957	*22
Asa	41	—	955	*22
Jehoshaphat . .	25	35	914	*22
[Jehoram *installed*]	8	32	—	—
Jehoram *alone* .	—	(35)	889	25
Ahaziah . . .	1	22	885	17
[Queen Athaliah]	7	—	884	—
Jehoash . . .	39?	7	878	22
Amaziah . . .	29	25	838	22
Uzziah . . .	53?	16	809	38
Jotham . . .	16	25	757	43
Ahaz	16	20	741	22
Hezekiah . . .	29	25	726	10
Manasseh . . .	55	12	696	42
Amon	2	22	641	45
Josiah	31	8	639	16
Jehoahaz . . .	¼	23	609	15
Jehoiakim, his brother	11	25?	609	13?
Jehoiachin . .	¼	18	598	18
Zedekiah, his father's brother .	11	21	598	28
Zedekiah is deposed	—	—	588	—

The ages of Abijah and Asa at their accession not being given, the three first numbers in the last column are averages only, Rehoboam having been born 66 or 67 years before Jehoshaphat. It is clearly impossible that Ahaz should have been only 10 years older than his son Hezekiah. To lessen the absurdity, Mr. Clinton follows the reading of the Sept. in 2 Chron. xxviii. 1, which makes Ahaz 25 years of age at his accession But in 2 Kings xvi. 2, the Sept. has 20, so that no weight can be laid on its reading in the other passage. Besides, this is inadequate to untie the knot; for it still remains that Jotham was a grandfather by the male line at the age of 31 (indeed, a year earlier in Mr. Clinton's scheme, who places the accession of Jotham in B.C. 756); nor is it probable that three kings in succession ascended the throne at the age of 25 years. If arbitrary change must be used, the most effectual would be to lower the age of Hezekiah at his accession by 10 years; but no certainty on these matters can be effected. A similar difficulty occurs with Jehoiakim, whose father Josiah is made to have been but 13 years older than he. Since, however, it is probable that Jehoahaz was older than Jehoiakim, perhaps the number 25, which expresses Jehoiakim's age at his accession, is corrupt.

From Rehoboam to Jehoiachin are 16 generations and 400 years, between the births of the first and last; which gives an average of 25 years to a generation. This is rather short for the direct line of descent, especially when we consider that, where polygamy is practised, the *eldest* son is by no means so certain, when alive, to succeed to the throne as with us. In fact, from the ages of their fathers we may probably infer that Amon, Manasseh, Jotham, and Uzziah, were younger sons, as Ahaziah is said to have been (2 Chron. xxii. 1). The three last generations of the series together occupy but 16+13+18 = 47 years; so that Amon, had he lived, would have been a great-grandfather (*in the male line*) at the age of 47; a thing so unparalleled as to lead to the suspicion that the later chronology, where we lose the double series of kings, is less to be depended on. There is an apparent difficulty also as to Ahaziah, found in 2 Chron. xxii. 1, 2. That he was '42 years old' at his accession is an obvious error for 22 (2 Kings viii. 26): that he should have been the youngest of many sons, and yet only 17 years younger than his father, is to be explained by his father *already* having many wives; but still it is remarkable.

Where polygamy prevails, the extermination of a royal house by the enmity of brothers is notoriously to be dreaded, in spite of the number of posterity which single monarchs can sometimes count. That the house of David encountered *this* danger is not expressly mentioned in the Kings. Two massacres are therein found; one of 'the brethren of Ahaziah,' 'forty-two men,' the sons of Jehoram, by the hypocritical zeal of Jehu; and, almost simultaneously, 'all the seed-royal' (the *sons* of Ahaziah?) by Queen Athaliah (2 Kings x. 13, 14; xi. 1). Only an infant son of Ahaziah (*all* in fact must have been of tender age) was saved from this slaughter, who, 44 years afterwards, was assassinated by his own people (2 Kings xii. 20), as was his son Amaziah (xiv. 19), and at a later period Amon (xxi. 23); but no massacre of the royal family accompanied either of these murders. In the Chronicles (2 Chron. xxi. 4) we read that Jehoram slew all his brethren, the sons of Jehoshaphat, from jealousy of the power with which their father had invested them; and Jehoram's own sons are said to have been all slain, but one, by the Philistines and Arabians; so that Ahaziah had no *brethren* left for Jehu to slay; but 'brethren' must be taken with some latitude to mean 'brothers' sons' (2 Chron. xxi. 4, 17; xxii. 1, 8). It must, however, be confessed that this is irreconcilable with the chronology; for at this time the age of Jehoram, their supposed grandfather (had he been alive), would have been 38 years; so that the eldest of these 'forty-two men' could barely have been 6 years old. Some error, therefore, must be admitted in the narrative of the Chronicler concerning Jehoram and his son; and, in fact, this is not the only point in which it is inconsistent with that in the Kings. Jehoram is said to have received a letter from Elijah the prophet (2 Chron. xxi. 12) at a time when he had already ascended into heaven, according to the Kings: also, in 2 Kings viii. 24, he is stated to have been buried 'with his fathers,' which is directly contradicted by 2 Chron. xxi. 20. To finish the subject of chronology it may be observed: (1.) It is remarkable that Jehoshabeath, the daughter of Ahaziah, should have been wife of Jehoiada the priest (2 Chron. xxii. 11). For as Jehoiada lived to the age of 130 (xxiv. 15), and died many years before Jehoash, the priest must have been some 70 years older than his wife. (2.) The date '36 years,' in 2 Chron. xvi. 1, is certainly wrong, since Baasha died in the twenty-sixth year of Asa. The number 16 instead of 36 would agree sufficiently well with the history; but we cannot with propriety so correct the text, because of the date 35 in the last verse of the preceding chapter; not to mention that the narrative in the Chronicles represents the

declension of the pious Asa as being only towards the end of his reign (xv. 17). Clinton overlooks this, and wishes ('with many commentators') to interpret 'the thirty-sixth year of the reign of Asa' to mean 'the thirty-sixth year of the divided monarchy;' but this is not interpretation at all.

When the kingdom of Solomon became rent with intestine war, it might have been foreseen that the Edomites, Moabites, and other surrounding nations would at once refuse their accustomed tribute, and become again practically independent; and some irregular invasion of these tribes might have been dreaded. It was a mark of conscious weakness, and not a result of strength, that Rehoboam fortified 15 cities (2 Chron. xi. 5-11), in which his people might find defence against the irregular armies of his roving neighbours. But a more formidable enemy came in, Shishak king of Egypt, against whom the fortresses were of no avail (xii. 4), and to whom Jerusalem was forced to open its gates; and, from the despoiling of his treasures, Rehoboam probably sustained a still greater shock in its moral effect on the Moabites and Edomites, than in the direct loss: nor is it easy to conceive that he any longer retained the commerce of the Red Sea, or any very lucrative trade. Judged of by the number of soldiers recounted in the Chronicles, the strength of the early kings of Judah must have been not only great, but rapidly increasing. The following are the armies there given:—

Rehoboam gathered 180,000 chosen men (2 Chron. xi. 1). (Shishak attacked him with 60,000 horse, 1200 chariots, besides infantry.) Abijah set in array 400,000 valiant men (xiii. 3, 17), and slew 500,000 of Jeroboam's 800,000 in one battle. Asa had 300,000 heavy armed, and 280,000 light armed men (xiv. 8). (Zerah invaded him with 1,000,000 men and 300 chariots.) Jehoshaphat kept up:—

300,000	under Adnah,
280,000	under Jehonahan,
200,000	under Amasiah.
200,000	(light armed) under Eliadah,
180,000	under Jehozabad (xvii. 14-19).
Total . 1,160,000	for field service.

'These waited on the king;' *besides* the garrisons 'in the fenced cities.'

After Jehoshaphat followed the calamitous affinity with the house of Ahab, and the massacres of both families. Under Jehoiada the priest, and Jehoash his pupil, no martial efforts were made; but Amaziah son of Jehoash, after hiring 100,000 Israelites to no purpose, made war on the Edomites, slew 10,000, and threw 10,000 more down from the top of their rock (xxv. 5, 6, 11, 12). His own force in Judah, from 20 years old and upwards, was numbered at only 300,000 choice men, able to handle spear and shield. His son Uzziah had 2600 military officers, and 307,500 men of war (xxvi. 12, 13). Ahaz lost, in a single battle with Pekah, 120,000 valiant men (xxviii. 6), after the severe slaughter he had received from Rezin king of Syria; after which no further military strength is ascribed to the kings of Judah. As to all these numbers the Vatican Sept. agrees with the received Hebrew text.

These figures have caused no small perplexity, and have suggested to some the need of conjectural emendation. But if they have been corrupted, it is by system, and on purpose; for there is far too great uniformity in them to be the result of accident. It perhaps deserves remark, that in the book of Kings no numbers of such startling magnitude are found. The army ascribed to Rehoboam (1 Kings xii. 21) is, indeed, as in Chronicles, 180,000 men; but if we explain it of those *able* to fight, the number, though certainly large, may be dealt with historically. See the article on Population.

As the most important external relations of Israel were with Damascus, so were those of Judah with Edom and Egypt. Some revolution in the state of Egypt appears to have followed the reign of Shishak. Apparently the country must have fallen under the power of an Ethiopian dynasty; for the name of the *Lubim*, who accompanied Zerah in his attack on Asa, is generally regarded as proving that Zerah was from Sennaar, the ancient Meroë. But as this invasion was signally repulsed, the attempt was not repeated; and Judah enjoyed entire tranquillity from that quarter until the invasion of Pharaoh-necho. In fact it may seem that this success assisted the reaction, favourable to the power of Judah, which was already begun, in consequence of a change in the policy of Damascus. Whether Abijah had been in league with the father of Benhadad I. (as is generally inferred from 1 Kings xv. 19) may be doubted; for the address cannot be rendered, '*Let there be* a league between me and thee, *as there was* between my father and thine;' and it possibly is only a hyperbolical phrase of friendship for, 'Let us be in close alliance; *let us count* our fathers *to have been* allies.' However this may be, Asa bought, by a costly sacrifice, the serviceable aid of the Damascene king. Israel was soon distressed, and Judah became once more formidable to her southern neighbours. Jehoshaphat appears to have reasserted the Jewish authority over the Edomites without war, and to have set his own viceroy over them (1 Kings xxii. 47). Intending to resume the distant commerce which had been so profitable to Solomon, he built ships suitable for long voyages ('ships *of* Tarshish' as they are rightly called in 1 Kings xxii. 48—a phrase which the Chronicler has misunderstood, and translated into 'ships *to go to* Tarshish,' 2 Chron. xx. 36); but not having the advantage of Tyrian sailors, as Solomon had, he lost the vessels by violent weather before they had sailed. Upon this, Ahaziah, king of Judah, offered the service of his own mariners, probably from the tribe of Asher and others accustomed to the Mediterranean; but Jehoshaphat was too discouraged to accept his offer, and the experiment was never renewed by any Hebrew king. The Edomites, who paid only a forced allegiance, soon after revolted from Jehoram, and elected their own king (2 Kings viii. 20, 22). At a later time they were severely defeated by Amaziah (2 Kings xiv. 7), whose son, Uzziah, fortified the town of Elath, intending, probably, to resume maritime enterprise; but it remained a barren possession, and was finally taken from them by Rezin, in the reign of Ahaz (2 Kings xvi. 6). The Philistines, in these times, seem to have fallen from their former greatness, their league having been so long dissolved. The most remarkable event in which they are concerned is the assault on Je-

rusalem, in the reign of Jehoram (2 Chron. xxi. 16, 17).

It is strikingly indicative of the stormy scenes through which the line of David passed, that the treasures of the king and of the Temple were so often plundered or bargained away. First, under Rehoboam, all the hoards of Solomon, consecrated and common alike, were carried off by Shishak (1 Kings xiv. 26). Two generations later, Asa emptied out to Benhadad all that had since accumulated 'in the house of Jehovah or in the king's house.' A third time, when Hazael had taken Gath, and was preparing to march on Jerusalem, Jehoash, king of Judah, turned him away by sending to him all 'that Jehoshaphat, Jehoram, Ahaziah and Jehoash himself had dedicated, and all the gold that was found in the treasures of the house of Jehovah and in the king's house' (2 Kings xii. 18). In the very next reign Jehoash, king of Israel, defeated and captured Amaziah, took Jerusalem, broke down the walls, carried off hostages, and plundered the gold and silver deposited in the temple and in the royal palace (2 Kings xiv. 11-14). A fifth sacrifice of the sacred and of the royal treasure was made by Ahaz to Tiglath-pileser (2 Kings xvi. 8). The act was repeated by his son Hezekiah to Sennacherib, who had demanded '300 talents of silver and 30 talents of gold.' It is added, 'Hezekiah cut off the gold which he had overlaid, from the doors of the temple and from the pillars' (2 Kings xviii. 14-16). In the days of Josiah, as in those of Jehoash, the temple appears to have been greatly out of repair (xii. and xxii.); and when Pharaoh-necho, having slain Josiah, had reduced Judah to submission, the utmost tribute that could be exacted was 100 talents of silver and one talent of gold. Even this sum was obtained by direct taxation, and no allusion is made to any treasure at all, either in the temple or in the king's house. It is the more extraordinary to find expressions used when Nebuchadnezzar took the city, which at first sight imply that Solomon's far-famed stores were still untouched. 'Nebuchadnezzar carried out all the treasures of the house of Jehovah and of the king's house, and cut in pieces all the vessels of gold which Solomon had made in the temple of Jehovah' (2 Kings xxiv. 13). They must evidently have been few in number, for in 1 Kings xiv. 26, 'all' must, at least, mean 'nearly all:' 'Shishak took away the treasures of the house of Jehovah, and of the king's house; he *even* took away *all*.' Yet the vessels of gold and silver taken away by Nebuchadnezzar and restored by Cyrus are reckoned 5400 in number (Ezra i. 11).

The severest shock which the house of David received was the double massacre which it endured from Jehu and from Athaliah. After a long minority, a youthful king, the sole surviving male descendant of his great-grandfather, and reared under the paternal rule of the priest Jehoiada, to whom he was indebted not only for his throne but even for his recognition as a son of Ahaziah, was not in a situation to uphold the royal authority. That Jehoash conceived the priests to have abused the power which they had gained, sufficiently appears in 2 Kings xii., where he complains that they had for twenty-three years appropriated the money, which they ought to have spent on the repairs of the temple. Jehoiada gave way; but we see here the beginning of a feud (hitherto unknown in the house of David) between the crown and the priestly order; which, after Jehoiada's death, led to the murder of his son Zachariah. The massacre of the priests of Baal, and of Athaliah, grand-daughter of a king of Sidon, must also have destroyed cordiality between the Phœnicians and the kingdom of Judah; and when the victorious Hazael had subjugated all Israel and showed himself near Jerusalem, Jehoash could look for no help from without, and had neither the faith of Hezekiah nor a prophet like Isaiah to support him. The assassination of Jehoash in his bed by 'his own servants' is described in the Chronicles as a revenge taken upon him by the priestly party for his murder of 'the sons' of Jehoiada; and the same fate, from the same influence, fell upon his son Amaziah, if we may so interpret the words in 2 Chron. xxv. 27: 'From the time that Amaziah turned away from following Jehovah they made a conspiracy against him,' &c. Thus the house of David appeared to be committing itself, like that of Saul, to permanent enmity with the priests. The wisdom of Uzziah, during a long reign, averted this collision, though a symptom of it returned towards its close. No further mischief from this cause followed, until the reign of his grandson, the weak and unfortunate Ahaz: after which the power of the kingdom rapidly mouldered away. On the whole it would appear that, from Jehoiada downward, the authority of the priests was growing stronger, and that of the crown weaker; for the king could not rule successfully, except by submitting to (what we might call) 'the constitutional check' of the priests; and although it is reasonable to believe that the priests became less simple-minded, more worldly, and less religious, as their order advanced in authority (whence the keen rebukes of them by the prophets), it is not the less certain that it was desirable for Judah, both in a temporal and a spiritual sense, to have the despotic power of the king subjected to a strong priestly pressure.

The struggle of the crown against this control was perhaps the most immediate cause of the ruin of Judah. Ahaz was probably less guided by policy than by superstition, or by architectural taste, in erecting his Damascene altar (2 Kings xvi. 10-18). But the far more outrageous proceedings of Manasseh seem to have been a systematic attempt to extirpate the national religion because of its supporting the priestly power; and the 'innocent blood very much,' which he is stigmatized for shedding (2 Kings xxi. 16), was undoubtedly a sanguinary attack on the party opposed to his impious and despotic innovations. The storm which he had raised did not burst in his lifetime; but, two years after, it fell on the head of his son Amon; and the disorganization of the kingdom which his madness had wrought is commemorated as the cause of the Babylonish captivity (2 Kings xxiii. 26; xxiv. 3, 4). It is also credible that the long-continued despotism had greatly lessened patriotic spirit; and that the Jewish people of the declining kingdom were less brave against foreign invaders than against kindred and neighbour tribes or civil opponents. Faction had become very fierce within Jerusalem itself (Ezek. xxii.), and civil bloodshed was common. Wealth, where it existed, was generally a source of corruption, by introducing foreign luxury, tastes, manners, superstitions, immo-

rality, or idolatry; and when consecrated to pious purposes, as by Hezekiah and Josiah, produced little more than a formal and exterior religion.

Thoroughly to understand the political working of the monarchy, we ought to know, 1. What control the king exercised over ecclesiastical appointments; 2. How the Levites were supported when ejected from Israel; 3. What proportion of them acted as judges, lawyers, and scribes, and how far they were independent of the king. The nature of the case and the precedent of David may satisfy us that the king appointed the high-priest at his own pleasure out of the Aaronites; but (as Henry II. of England and hundreds of monarchs besides have found) ecclesiastics once in office often disappoint the hopes of their patron, and to eject them again is a most dangerous exertion of the prerogative. The Jewish king would naturally avoid following the law of descent, in order to preserve his right of election unimpaired; and it may be suspected that the line of Zadok was rather kept in the background by royal jealousy. Hilkiah belonged to that line; and if any inference can be drawn from his genealogy, as given in 1 Chron. vi. 8-15, it is, that none of his ancestors between the reigns of Solomon and Josiah held the high-priesthood. Even Azariah, who is named in 2 Chron. xxxi. 10 as of the line of Zadok, is not found among Hilkiah's progenitors. Jehoiada, the celebrated priest, and Urijah, who was so complaisant to the innovating Ahaz (2 Kings xvi.), were of a different family. It would seem that too many high-priests gained a reputation for subservience (for it often happens in history that the ecclesiastical heads are more subservient to royalty than the mass of their order); so that, after Hilkiah, the race of Zadok became celebrated for uprightness, in invidious contrast to the rest of the priests; and even the Levites were regarded as more zealous than the generality of the Aaronites (2 Chron. xxix. 34). Hence in Ezekiel and other late writers the phrase 'the priests the sons of Zadok,' or even 'the priests the Levites,' is a more honourable title than 'the priests the sons of Aaron.' Hilkiah's name seems to mark the era at which (by a reaction after the atrocities of Manasseh and Amon) the purer priestly sentiment obtained its triumph over the crown. But the victory came too late. Society was corrupt and convulsed within, and the two great powers of Egypt and Babylon menaced it from without. True lovers of their God and of their country, like Jeremiah, saw that it was a time rather for weeping than for action; and that the faithful must resign themselves to the bitter lot which the sins of their nation had earned.—F. W. N.

JUDAS is merely the Greek form of the Hebrew name JUDAH. The Septuagint, however, represents Judah by Ἰούδα, *Juda*, which we find also in Luke iii. 26, 30, as the name of two of the ancestors of Christ not otherwise known. The persons named Judas were the following:—

1. JUDAS MACCABÆUS. [MACCABEES.]

2. JUDAS ISCARIOT. The object of this article is not to elucidate all the circumstances recorded respecting this person, but simply to investigate his motives in delivering up Jesus to the chief-priests. The evangelists relate his proceedings, but give no opinion. The subject is consequently open to inquiry. Our conclusions must be guided by the facts of the case, and the known feelings and principles of human nature. Some hypothesis is necessarily formed by every reader. That one of our Lord's immediate followers and delegates, the treasurer of his household, who was admitted to his most secret counsels, and to the observation of his most private character, should at that particular juncture wait upon the Jewish rulers, and engage, for a pecuniary recompense, to lead their officers to his retiring-place, and, after time for reflection, should actually fulfil his engagement, and thus become the means of bringing his Master to the cross, is a fact too nearly connected with the honour of Christianity to allow us to remain unconcerned as to his motives. Even the credibility of this part of the narrative depends upon our being able to form a rational conception of them. There is no reason to doubt his sanity. We can neither ascribe his conduct to the mere love of evil, nor can we entertain the idea that it resulted from an arbitrary decree or impulse of the Almighty. His conduct might have been foreseen (Acts i. 16), but surely it was not commanded. Even supposing him to have been perfectly obdurate, and judicially abandoned to fall by his own wickedness, we must still seek the proximate cause of his ruin in his own intelligible motives. But his well known confession and remorse clearly prove that he was not wholly obdurate. Had he been so, he would have persisted in his conduct, or have attempted to calumniate Jesus and his disciples; or, perhaps, under the auspices of the chief-priests, have headed a most powerful opposition to Christianity. The only conceivable motives for the conduct of Judas are, a sense of duty in bringing his Master to justice, resentment, avarice, dissatisfaction with the procedure of Jesus, and a consequent scheme for the accomplishment of his own views. With regard to the first of these motives, if Judas had been actuated by a sense of duty in bringing his Master to justice for anything censurable in his intentions, words, or actions, he would certainly have alleged some charge against him in his first interview with the chief-priests, and they would have brought him forward as a witness against Jesus, especially when they were at so great a loss for evidence; or they would have reminded him of his accusations when he appealed to them after our Lord's condemnation, saying, 'I have sinned in that I have betrayed innocent blood'—a confession which amounts to an avowal that he had never seen anything to blame in his Master, but everything to approve. Moreover, the knowledge of the slightest fault in Jesus would have served, at least for the present, to tranquillize his own feelings, and prevent his immediate despair. The chief-priests would also most certainly have alleged any charge he had made against Jesus, as a justification of their conduct, when they afterwards endeavoured to prevent his apostles from preaching in his name (Acts iv. 15-23; v. 27, 28-40). The second motive supposed, namely, that of resentment, is rather more plausible. Jesus had certainly rebuked him for blaming the woman who had anointed him in the house of Simon the leper, at Bethany (comp. Matt. xxvi. 8-17; John xii. 4, 5); and Matthew's narrative seems to connect his going to the

chief-priests with that rebuke (ver. 14). 'Then one of the twelve, called Judas Iscariot, went unto the chief-priests;' but closer inspection will convince the reader that those words are more properly connected with ver. 3. Besides, the rebuke was general, 'Why trouble *ye* the woman?' Nor was it nearly so harsh as that received by Peter, 'Get thee behind me, Satan' (Matt. xvi. 23), and certainly not so public (Mark viii. 32, 33). Even if Judas had felt ever so much resentment, it could scarcely have been his sole motive; and as nearly two days elapsed between his contract with the chief-priests and its completion, it would have subsided during the interval, and have yielded to that covetousness which we have every reason to believe was his ruling passion. St. John expressly declares that Judas 'was a thief, and had the bag, and bare (that is, conveyed away from it, stole, ἐβάσταζεν) what was put therein' (xii. 6; comp. xx. 15, in the original, and see a similar use of the word in Joseph. p. 402. 39, ed. Huds.). This rebuke, or rather certain circumstances attending it, might have determined him to act as he did, but is insufficient, of itself, to account entirely for his conduct, by which he endangered all his expectations of worldly advancement from Jesus, at the very moment when they seemed upon the verge of being fulfilled. It is, indeed, a most important feature in the case, that the hopes entertained by Judas, and all the apostles, from their Master's expected elevation, as the Messiah, to the throne of Judæa, and, as they believed, to the empire of the whole world, were never more stedfast than at the time when he covenanted with the chief-priests to deliver him into their hands. Nor does the theory of mere resentment agree with the terms of censure in which the conduct and character of Judas are spoken of by our Lord and the evangelists. Since, then, this supposition is insufficient, we may consider another motive to which his conduct is more commonly ascribed, namely, covetousness. But if by covetousness be meant the eager desire to obtain 'the thirty pieces of silver,' with which the chief-priests 'covenanted with him' (Matt. xxvi. 15), it presents scarcely a less inadequate motive. Can it be conceived that Judas would deliberately forego the prospect of immense wealth from his Master, by delivering him up for about four pounds ten shillings of our money, upon the highest computation, and not more than double in value, a sum which he might easily have purloined from the bag? Is it likely that he would have made such a sacrifice for any further sum, however large, which we may suppose 'they *promised* him' (Mark xiv. 11), and of which the thirty pieces of silver might have been the mere earnest (Luke xxii. 5)? Had covetousness been his motive, he would have ultimately applied to the chief-priests, not to bring again the thirty pieces of silver with the confession, 'I have sinned in that I have betrayed the innocent blood' (Matt. xxvii. 4), but to demand the completion of their agreement with him. We are now at liberty to consider the only remaining motive for the conduct of Judas, namely, dissatisfaction with the procedure of his Master, and a consequent scheme for the furtherance of his own views. It seems to us likely, that the impatience of Judas for the accomplishment of his worldly views, which we conceive to have ever actuated him in following Jesus, could no longer be restrained, and that our Lord's observations at Bethany served to mature a stratagem he had meditated long before. He had no doubt been greatly disappointed at seeing his Master avoid being made a king, after feeding the five thousand in Galilee. Many a favourable crisis had he seemed to lose, or had not dared to embrace, and now while at Bethany he talks of his burial (John xii. 7); and though none of his apostles, so firm were their worldly expectations from their Master, could clearly understand such 'sayings' (Luke xviii. 34); yet they had been made 'exceeding sorry' by them (Matt. xvii. 23). At the same time Judas had long been convinced by the miracles he had seen his Master perform that he was the Messiah (John vii. 31). He had even heard him accept this title from his apostles in private (Matt. xvi. 16). He had promised them that when he should 'sit upon the throne of his glory, they should sit upon twelve thrones judging the twelve tribes of Israel' (Matt. xix. 28). Yet now, when everything seemed most favourable to the assumption of empire, he hesitates and desponds. In his daily public conferences, too, with the chief-priests and pharisees, he appears to offend them by his reproofs, rather than to conciliate their favour. Within a few days, the people, who had lately given him a triumphal entry into the city, having kept the passover, would be dispersed to their homes, and Judas and his fellow apostles be, perhaps, required to attend their Master on another tedious expedition through the country. Hence it seems most probable that Judas resolved upon the plan of delivering up his Master to the Jewish authorities, when he would be compelled, in self-defence, to prove his claims, by giving them the sign from heaven they had so often demanded; they would, he believed, elect him in due form as the King Messiah, and thus enable him to reward his followers. He did, indeed, receive from Jesus many alarming admonitions against his design; but the plainest warnings are lost upon a mind totally absorbed by a purpose, and agitated by many violent passions. The worst he would permit himself to expect, was a temporary displeasure for placing his Master in this dilemma; but as he most likely believed, judging from himself, that Jesus anticipated worldly aggrandizement, he might calculate upon his forgiveness when the emergency should have been triumphantly surmounted. Nor was this calculation wholly unreasonable. Many an ambitious man would gladly be spared the responsibility of grasping at an empire, which he would willingly find forced upon him. Sextus Pompey is recorded to have rebuked his servant Menas, who offered to put him in possession of the empire by the treacherous seizure of the triumvirs, for not having, unknown to him, performed the service, which, when proposed to him, he felt bound in honour to reject (Suet. *Octav.*). In Shakspeare's version of his language—

> 'Ah, this thou shouldst have done,
> And not have spoke on't. . . . .
> Being done unknown
> I should have found it afterwards well done.'
> *Ant. and Cleop.*

Judas could not doubt his master's ability to extricate himself from his enemies by miracle. He had known him do so more than once (Luke

iv. 30; John viii. 59; x. 39). Hence his directions to the officers to 'hold him fast,' when he was apprehended (Matt. xxvi. 48). With other Jews he believed the Messiah would never die (John xii. 34); accordingly, we regard his pecuniary stipulation with the priests as a mere artful cover to his deeper and more comprehensive design; and so that he served their purpose in causing the apprehension of Jesus, they would little care to scrutinize his motive. All they felt was being 'glad' at his proposal (Mark xiv. 11), and the plan appeared to hold good up to the very moment of our Lord's condemnation; for after his apprehension his miraculous power seemed unabated, from his healing Malchus. Judas heard him declare that he could even then 'ask, and his father would give him twelve legions of angels' for his rescue. But when Judas, who awaited the issue of the trial with such different expectations, saw that though Jesus had avowed himself to be the Messiah, he had not convinced the Sanhedrim; and, instead of extricating himself from their power by miracle, had submitted to be 'condemned, buffeted, and spit upon' by his judges and accusers; then it should seem he awoke to a full view of all the consequences of his conduct. The prophecies of the Old Testament, 'that Christ should suffer,' and of Jesus, concerning his own rejection and death, flashed on his mind in their true sense and full force, and he found himself the wretched instrument of their fulfilment. He made a last desperate effort to stay proceedings. He presented himself to the chief-priests, offered to return the money, confessed that he had sinned in that he had betrayed the innocent blood, and upon receiving their heartless answer was wrought into a phrenzy of despair, during which he committed suicide. There is much significancy in these words of Matt. xxvii. 3, 'Then Judas, *when he saw he was condemned*,' not expiring on the cross, 'repented himself,' &c. If such be the true hypothesis of his conduct, then, however culpable it may have been, as originating in the most inordinate covetousness, impatience of the procedure of Providence, crooked policy, or any other bad quality, he is certainly absolved from the direct *intention* of procuring his Master's death. 'The difference,' says Archbishop Whately, 'between Iscariot and his fellow apostles was, that though they all had the same expectations and conjectures, *he* dared to *act* on his conjectures, departing from the plain course of his known duty to follow the calculations of his worldly wisdom, and the schemes of his worldly ambition.' F. D.

3. JUDAS, or JUDE, surnamed Barsabas, a Christian teacher sent from Jerusalem to Antioch along with Paul and Barnabas (Acts xv. 22, 27, 32). He is supposed to have been one of the seventy disciples, and brother of Joseph, also surnamed Barsabas (son of Sabas), who was proposed, with Matthias, to fill up the place of the traitor Judas (Acts i. 23). Judas and Silas (who was also of the party) are mentioned together as 'prophets' and 'chief men among the brethren.'

4. JUDAS. [Jude.]

5. JUDAS, a Jew of Damascus with whom Paul lodged (Acts ix. 11).

6. JUDAS, surnamed the Galilæan (ὁ Γαλιλαῖος, Acts v. 37), so called also by Josephus (*Antiq.* xviii. 1. 6; xx. 5. 2; *De Bell. Jud.* ii. 8. 1), and likewise 'the Gaulonite' (ὁ Γαυλονίτης; *Antiq.* xviii. 1. 1). In company with one Sadoc he attempted to raise a sedition among the Jews, but was destroyed by Cyrenius (Quirinus), then proconsul of Syria and Judæa.

JUDE, or JUDAS (Ἰούδας). There were two of this name among the twelve Apostles—Judas, called also Lebbæus and Thaddæus (Matt. x. 4; Mark iii. 18, which see), and Judas Iscariot. Judas is the name of one of our Lord's brethren, but it is not agreed whether our Lord's brother is the same with the Apostle of this name [James]. Luke (Gospel, vi. 16; Acts i. 13) calls him Ἰούδας Ἰακώβου, which in the English Authorized Version is translated 'Judas, *the brother* of James.' The ellipsis, however, between Ἰούδας and Ἰακώβου is supplied by the old Syriac translator (who was unacquainted with the epistle of Jude, the writer of which calls himself Ἰούδας ἀδελφὸς Ἰακώβου) with the word *son*, and not *brother*. Among our Lord's brethren are named James, Joses, and Judas (Matt. xiii. 55; Mark vi. 3). If, with Helvidius among the ancients (see Jerome, *Contra Helvidium*), and Kuinoel, Neander, and a few other modern commentators, we were to consider our Lord's brethren to be children of Joseph and the Blessed Virgin (an hypothesis which Kuinoel acknowledges to be incapable of proof from Scripture), we should be under the necessity of supposing that there was a James, a Joses, and a Judas, who were uterine brothers of our Lord, together with the Apostles James and Judas, who were children of Mary, the sister or cousin of the Virgin (see Pearson *On the Creed*, art. iv.). If, however, the hypothesis of their being children of the Blessed Virgin be rejected, an hypothesis inconsistent with the ancient and universal tradition of the perpetual virginity of the Virgin, a tradition the truth of which is received even by Dr. Lardner (*Hist. of the Apostles*), there remains for us only a choice between the two opinions, that our Lord's brethren were children of Joseph by a former wife (Escha or Salome, according to an Apocryphal tradition), which was the sentiment of the majority of the fathers (still received in the Oriental church), and that adopted in the Western church, and first broached by St. Jerome (*Cont. Helvid.*), that the brethren of our Lord were his cousins, as being children of Mary, the wife of Cleophas, who must therefore be considered as the same with Alphæus [see James]. If we consider James, the brother of our Lord, to be a different person from James the son of Alphæus, and not one of the twelve, Jude, the brother of James, must consequently be placed in the same category [James]; but if they are one and the same, Jude must be considered as the person who is numbered with our Lord's Apostles. We are not informed as to the time of the vocation of the

Apostle Jude to that dignity. Indeed, the only circumstance relating to him which is recorded in the Gospels consists in the question put by him to our Lord (John xiv. 22). 'Judas saith unto him (not Iscariot), Lord, how is it that thou wilt manifest thyself to us, and not unto the world?' Nor have we any account given of his proceedings after our Lord's resurrection, for the traditionary notices which have been preserved of him rest on no very certain foundation. It has been asserted that he was sent to Edessa, to Abgarus, king of Osroëne (Jerome, *Annot. in Matt.*), and that he preached in Syria, Arabia, Mesopotamia, and Persia; in which latter country he suffered martyrdom (Lardner's *Hist. of the Apostles*). Jude the Apostle is commemorated in the Western church, together with the Apostle Simon (the name, also, of one of our Lord's brethren) on the 8th of October. There is an interesting account preserved by Hegesippus (Eusebius, *Hist. Eccles.* iii. 20) concerning some of Jude's posterity: 'When Domitian,' he observes, 'inquired after David's posterity, some grandsons of Jude, called the Lord's brother, were brought into his presence. Being asked concerning their possessions and mode of life, they assured him that they had thirty-nine acres of land, the value of which was nine thousand denarii, out of which they paid him taxes, and maintained themselves by the labour of their hands. The truth of this was confirmed by the hardness of their hands. Being asked concerning Christ and the nature of his kingdom, they replied that it was not a kingdom of this world, but of a heavenly and angelic nature; that it would be manifested at the end of the world, when he would come in glory to judge the living and the dead, and render to every man according to his works. Having observed their humble condition and their harmless principles, he dismissed them with contempt, after which they ruled the churches, both as witnesses and relatives of the Lord.'

St. Luke (Acts xv. 22, 27-33) speaks of Judas, the son of Barsabas, in company with Silas, both of whom he styles 'prophets,' and 'chief men among the brethren.' Schott supposes that Barsabas means the son of Sabas, or Zabas, which he looks upon as an abridged form for Zebedee, and concludes that the Judas here mentioned was a brother of the elder James and of John.

JUDE, EPISTLE OF [Antilegomena], is placed by Eusebius among the *controverted books* (*Hist. Eccles.*, vii. 25), having been rejected by many of the ancients. 'Jude, the brother of James,' says Jerome, 'has left us a short epistle, which is one of the seven called Catholic, and because it cites a testimony from the apocryphal book of Enoch it is rejected by most. It has, however, obtained such authority by antiquity and use that it is now reckoned among the Holy Scriptures.' It is cited by Clemens Alexandrinus (*Strom.* iii. 431), by Origen (*Com. in Matt.*, &c. &c.), and by Tertullian (*De Habit. Fœm*). It is also included among the books of the New Testament in the ancient catalogue discovered by Muratori, a work of the second century. It is found in the catalogues of the Councils of Laodicea, Hippo, and Carthage, and in the Apostolical canons, but is wanting in the Peshito, or ancient Syriac version. It is, however, cited as of authority by Ephrem. In modern times its apostolic source at least, if not its canonicity, was called in question by Luther (*Walchised.* vol. xiv. 150), Grotius, Bolten, Dahl, Berger, and Michaelis, but it is acknowledged by most to be genuine. Indeed, the doubts thrown upon its genuineness arose, as we have already seen, from the fact of the writer having cited two apocryphal books (Enoch and the Assumption of Moses). In reference to this subject Tertullian has a long statement, in which, from the fact that 'Enoch had *some value as an authority with the apostle Jude*,' he is disposed to uphold the authenticity of the book of Enoch. As, however, that book, which is still extant, is universally reckoned a spurious production, the circumstance of Jude's having employed a citation from it is one of the most difficult and embarrassing in sacred criticism, especially as Jude expressly calls Enoch the 'seventh from Adam' (ver. 14). That the ancients were acquainted with the *Prophecy of Enoch* is evident from the testimony of several of the fathers, and from the copious fragments of it preserved by Syncellus in his *Chronography* (Fabricii *Cod. Pseud.*), which were discovered by George Scaliger. None of these, however, contain the passage in Jude 14.

It was not until the eighth century that the book of Enoch sunk into oblivion. Since the commencement of the seventeenth century, however, it had been supposed that this long-lost book was still extant in an Ethiopic version in Abyssinia, and this fact was fully established by Bruce, who first brought it into Europe [Enoch]. This work contains the words of the prophecy cited by Jude; but whether Jude cited it from the book of Enoch, or from a Jewish tradition, is a point still in debate. The decision of this question is inseparably connected with that of the age of the present book of Enoch, a point on which critics are not quite agreed. Dr. Laurence (its learned translator) attributes the book of Enoch to an early period of the reign of Herod the Great, to which time Hoffmann (*Das Buch Henoch*) also assigns it; while Lücke and others, who have subsequently investigated the subject, place it in the second half of the first century, and after the destruction of Jerusalem (see Lücke, *Versuch einer vollständigen Einleitung in die Offenbarung Johannis*). It was a well known book at the time of the writing of the *Testament of the Twelve Patriarchs* at the close of the first or commencement of the second century* [Revelations, Spurious].

The writer of the epistle is also supposed to have cited an apocryphal work (in ver. 9), where he speaks of the dispute of the archangel Michael with the Devil respecting the body of Moses. Origen found this very relation in a Jewish Greek book called the *Assumption of Moses* (Ἀνάληψις Μωσέως), and was so persuaded that this was the book which Jude had cited, that he quoted the work itself as of authority (Marsh's *Michaelis*, vol. vi. p. 379). The work is also cited by Œcumenius (vol. ii. p. 629), where the passage actually refers to the dispute of Michael the archangel and the devil respecting the body

* A writer in the *Christian Observer* (vol. xxx.) attempts to prove the book of Enoch a work which could not have been written earlier than the middle of the second century.

of Moses. There is a work still extant in Hebrew, entitled *Phetirah Moshe*, or 'The death of Moses:' of this two editions have been published, one at Constantinople in 1518, and the other at Venice in 1544 and 1605. De la Rue and other critics have supposed that this is the same work which was known to Origen. But Michaelis has shown that the present work is so unlike the former (besides containing quotations from the Talmud also, and even from Aben Ezra), that, although it contains similar relations, it is unquestionably a modern production.

Others, embarrassed by the circumstance of Jude's citing an apocryphal book, not merely for illustration, as St. Paul cites Aratus, Menander, and Epimenides, but as of authority (as when he cites Enoch, the *seventh from Adam*), have endeavoured to give a mystical explanation to Jude's assertion respecting the dispute about the body of Moses. Among these are Vitringa and Dr. Lardner. They think that by the body of Moses is meant the Jewish nation, and that Jude alludes to the vision in Zech. iii. 1; and Vitringa even proposes to alter the 'body of Moses' into the 'body of *Joshua*.' For the details of this ingenious explanation we must refer the reader to Lardner's *Hist. of the Apostles*.

Author, age, &c.—Notwithstanding these difficulties, this epistle was treated by the ancients with the highest respect, and regarded as the genuine work of an inspired writer. Although Origen on one occasion speaks doubtfully, calling it the 'reputed epistle of Jude,' yet on another occasion, and in the same work (*Com. in Matt.*), he says, 'Jude wrote an epistle, of few lines indeed, but full of the powerful words of heavenly grace, who at the beginning says, "Jude, the servant of Jesus Christ and brother of James."' The same writer (*Com. in Rom.* and *De Princip.* iii. 2, i. 138) calls it the writing of Jude the *Apostle*. The moderns are, however, divided in opinion between Jude the apostle and Jude the Lord's brother, if indeed they be different persons: Hug and De Wette ascribe it to the latter. The author simply calls himself Jude, the brother of James, and a servant of Jesus Christ. This form of expression has given rise to various conjectures. Hug supposes that he intimates thereby a nearer degree of relationship than that of an apostle. This accords also with the sentiment of Clemens Alexandrinus (*Adumb.; Opp.* ii. p. 1007, ed. Venet.): 'Jude, who wrote the Catholic epistle, one of the sons of Joseph, a pious man, although he well knew his relationship to Jesus, yet did not call himself his brother, but said, Jude, the servant of Jesus Christ (as the Lord), and the brother of James.' At the same time it must be acknowledged that the circumstance of his not naming himself an apostle is not of itself necessarily sufficient to militate against his being the apostle of that name, inasmuch as St. Paul does not upon all occasions (as in Philippians, Thessalonians, and Philemon) use this title. From his calling himself the brother of James, rather than the brother of the Lord, Michaelis deduces that he was the son of Joseph by a former wife, and not a full brother of our Lord's, as Herder contends [JAMES, JUDE]. From the great coincidence both in sentiment and subject which exists between our epistle and the second of St. Peter, it has been thought by many critics that one of these writers had seen the other's work; but we shall reserve the discussion as to which was the earlier writing until we come to treat of St. Peter's Epistle. Dr. Lardner supposes that Jude's Epistle was written between the years 64 and 66, Beausobre and L'Enfant between 70 and 75 (from which Dodwell and Cave do not materially differ), and Dr. Mill fixes it to the year 90. If Jude has quoted the apocryphal book of Enoch, as seems to be agreed upon by most modern critics, and if this book was written, as Lücke thinks, after the destruction of Jerusalem, the age of our epistle best accords with the date assigned to it by Mill.

It is difficult to decide who the persons were to whom this epistle was addressed, some supposing that it was written to converted Jews, others to all Christians without distinction. Many of the arguments seem best adapted to convince the Jewish Christians, as appeals are so strikingly made to their sacred books and traditions.

The design of this epistle is to warn the Christians against the false teachers who had insinuated themselves among them and disseminated dangerous tenets of insubordination and licentiousness. The author reminds them, by the example of Sodom and Gomorrah, that God had punished the rebellious Jews; and that even the disobedient angels had shared the same fate. The false teachers to whom he alludes 'speak evil of dignities,' while the archangel Michael did not even revile Satan. He compares them to Balaam and Korah, to clouds without water, and to raging waves. Enoch, he says, foretold their wickedness; at the same time he consoles believers, and exhorts them to persevere in faith and love. The epistle is remarkable for the vehemence, fervour, and energy of its composition and style.—W. W.

JUDGES. This name is applied to fifteen persons who at intervals presided over the affairs of the Israelites during the 450 years which elapsed from the death of Joshua to the accession of Saul. The term *Judges*, used in the English Bibles, does not exactly represent the original שֹׁפְטִים *shophetim*, *i. e.* 'rulers of the people,' from שׁפט, which is not synonymous with דִּין *judicare*, but signifies in its general acceptation, *causam alicujus agere, tueri* (see Bertholdt, *Theolog. Litt. Blatt.* vii. 1, sq.; comp. Gesenius *s.v.* שׁפט). The station and office of these *shophetim* are involved in great obscurity, partly from the want of clear intimations in the history in which their exploits and government are recorded, and partly from the absence of parallels in the history of other nations, by which our notions might be assisted. In fact the government of the judges forms the most singular part of the Hebrew institutions, and that which appears most difficult to comprehend. The kings, the priests, the generals, the heads of tribes—all these offer some points of comparison with the same functionaries in other nations; but the judges stand alone in the history of the world: and when we think that we have found officers resembling them in other nations, the comparison soon breaks down in some point of importance, and we still find that nothing remains but to collect and arrange the concise intimations of the sacred text, and draw our conclusions from the facts which it records.

The splendid administrations of Moses and of Joshua so fill the mind of the reader of Scrip-

ture, that after their death a sense of vacancy is experienced, and we wonder how it happens that no successor to them was appointed, and how the machinery of the government was to be carried on without some similar leaders. But when we come to examine the matter more closely, we perceive that the offices filled by Moses and Joshua, whose presence was so essential for the time and the occasion, were not at all involved in the general machinery of the Hebrew government. These persons formed no part of the system: they were specially appointed for particular services, for the performance of which they were invested with extraordinary powers; but when their mission was accomplished, society reverted to its permanent institutions and its established forms of government. It is, therefore, in the working of these institutions, after the functions of the legislator and the military leader had ceased, that we must look for the circumstances that gave rise to the extraordinary leaders which engage our present attention. Now we shall find that, apart from such offices as those of Moses and Joshua, a very excellent provision existed for the government of the chosen people, both as regarded the interests of the nation generally, as well as of the several tribes.

To this latter branch of the government it is important to draw particular attention, because, as it existed before the law, and is *assumed* throughout as the basis of the theocratical constitution, we hear but little of it in the books of Moses, and are apt to lose sight of it altogether. This part of the subject belongs, however, to the art. TRIBE; and it suffices to mention in this place that every tribe had its own hereditary chief or 'prince,' who presided over its affairs, administered justice in all ordinary cases, and led the troops in time of war. His station resembled that of the Arabian emirs, or rather, perhaps, of the khans of the Tartar tribes inhabiting Persia and the countries further east. He was assisted in these important duties by the subordinate officers, the chiefs of families, who formed his council in such matters of policy as affected their particular district, supported his decisions in civil or criminal inquiries, and commanded under him in the field of battle (Num. xxvi. xxvii.; Josh. vii. 16-18). This was, in fact, the old patriarchal government, to which the Hebrews were greatly attached. It seems to have been sufficient for all the purposes of the separate government of the tribes: but, as we find in similar cases, it was deficient in force of cohesion among the tribes, or in forming them into a compacted nation. In fact, it was an institution suited to the wants of men who live dispersed in loosely connected tribes, and not to the wants and exigencies of a nation. It was in principle segregative, not aggregative; and although there are traces of united agreement through a congress of delegates, or rather of national chiefs and elders of the tribes, this was an inefficient instrument of general government, seeing that it was only applicable or applied to great occasions, and could have no bearing on the numerous questions of an administrative nature which arise from day to day in every state, and which there should somewhere exist the power to arrange and determine. This defect of the general government it was one of the objects of the theocratical institutions to remedy.

Jehovah had taken upon himself the function of king of the chosen people, and he dwelt among them in his palace-tabernacle. Here he was always ready, through his priest, to counsel them in matters of general interest, as well as in those having reference only to particular tribes; and to his court they were all required by the law to repair three times every year. Here, then, was the principle of a general administration, calculated and designed to unite the tribes into a nation, by giving them a common government in all the higher and more general branches of administration, and a common centre of interest for all the political and ecclesiastical relations of the community.

It was on this footing that the law destined the government of the Hebrews to proceed, after the peculiar functions of the legislator and the conqueror had been fulfilled.

The fact is, however, that, through the perversity of the people, this settlement of the general government on theocratical principles was not carried out in its proper form and extent; and it is in this neglect we are to seek the necessity for those officers called Judges, who were from time to time raised up to correct some of the evils which resulted from it. It is very evident, from the whole history of the judges, that after the death of Joshua the Israelites threw themselves back upon the segregative principles of their government by tribes, and all but utterly neglected, and for long periods did utterly neglect, the rules and usages on which the general government was established. There was, in fact, no human power adequate to enforce them. They were good in themselves, they were gracious, they conferred high privileges; but they were enforced by no sufficient authority. No one was amenable to any tribunal for neglecting the annual feasts, or for not referring the direction of public affairs to the Divine King. Omissions on these points involved the absence of the divine protection and blessing, and were left to be punished by their consequences. The man who obeyed in this and other things, was blessed; the man who did not, was not blessed; and general obedience was rewarded with national blessing, and general disobedience with national punishment. The enormities and transgressions into which the people fell in consequence of such neglect, which left them an easy prey to idolatrous influences, are fully recorded in the book of Judges. The people could not grasp the idea of a Divine and Invisible King: they could not bring themselves to recur to him in all those cases in which the judgment of a human king would have determined the course of action, or in which his arm would have worked for their deliverance. Therefore it was that God allowed them judges, in the persons of faithful men, who acted for the most part as agents of the divine will, regents for the Invisible King; and who, holding their commission directly from him, or with his sanction, would be more inclined to act as dependent vassals of Jehovah than kings, who, as members of royal dynasties, would come to reign with notions of independent rights and royal privileges, which would draw away their attention from their true place in the theocracy. In this greater dependence of the judges upon the Divine King we see the secret of their institution. The Israelites were disposed to rest upon their separate interests as

tribes; and having thus allowed the standing general government to remain inoperative through disuse, they would in cases of emergency have been disposed 'to make themselves a king like the nations,' had their attention not been directed to the appointment of officers whose authority could rest on no tangible *right* apart from character and services; which, with the temporary nature of their power, rendered their functions more accordant with the principles of the theocracy than those of any other public officers could be. And it is probably in this adaptation to the peculiar circumstances of the Hebrew theocracy that we shall discover the reason of our inability to find any similar office among other nations. In being thus peculiar it resembled the Dictatorship among the Romans; to which office indeed that of the judges has been compared; and perhaps this parallel is the nearest that can be found. But there is this great difference, that the dictator laid down his power as soon as the crisis which had called for its exercise had passed away, and in no case could this unwonted supremacy be retained beyond a limited time (Liv. ix. 34); but the Hebrew judge remained invested with his high authority during the whole period of his life; and is therefore usually described by the sacred historian as presiding to the end of his days over the tribes of Israel, amid the peace and security which his military skill and counsels had, under the divine blessing, restored to the land.

Having thus traced the origin of the office to the circumstances of the times and the condition of the people, it only remains to inquire into the nature of the office itself, and the powers and privileges which were connected with it. This is by no means an easy task, as the nature of the record enables us to perceive better what they were not than what they were, what they could not than what they could accomplish.

It is usual to consider them as commencing their career with military exploits to deliver Israel from foreign oppression; but this is by no means invariably the case. Eli and Samuel were not military men; Deborah judged Israel before she planned the war against Jabin; and of Jair, Ibzan, Elon, and Abdon, it is at least uncertain whether they ever held any military command. The command of the army can therefore be scarcely considered the distinguishing characteristic of these men, or military exploits the necessary introduction to the office. In many cases it is true that military achievements were the means by which they elevated themselves to the rank of judges; but in general the appointment may be said to have varied with the exigencies of the times, and with the particular circumstances which in times of trouble would draw the public attention to persons who appeared suited by their gifts or influence to advise in matters of general concernment, to decide in questions arising between tribe and tribe, to administer public affairs, and to appear as their recognised head in their intercourse with their neighbours and oppressors. As we find that many of these judges arose *during* times of oppression, it seems to us that this last circumstance, which has never been taken into account, must have had a remarkable influence in the appointment of the judge. Foreigners could not be expected to enter into the peculiarities of the Hebrew constitution, and would expect to receive the proposals, remonstrances, or complaints of the people through some person representing the whole nation, or that part of it to which their intercourse applied. The law provided no such officer except in the high-priest; but as the Hebrews themselves did not recognise the true operation of their theocracy, much less were strangers likely to do so. On the officer they appointed to represent the body of the people, under circumstances which compelled them to deal with foreigners mightier than themselves, would naturally devolve the command of the army in war, and the administration of justice in peace. This last was among ancient nations, as it is still in the East, regarded as the first and most important duty of a ruler, and the interference of the judges was probably confined to the cases arising between different tribes, for which the ordinary magistrates would find it difficult to secure due authority to their decisions.

In nearly all the instances recorded the appointment seems to have been by the free unsolicited choice of the people. The election of Jephthah, who was nominated as the fittest man for the existing emergency, probably resembled that which was usually followed on such occasions; and probably, as in his case, the judge, in accepting the office, took care to make such stipulations as he deemed necessary. The only cases of direct divine apointment are those of Gideon and Samson, and the last stood in the peculiar position of having been from before his birth ordained 'to begin to deliver Israel.' Deborah was called to deliver Israel, but was already a judge. Samuel was called by the Lord to be a prophet, but not a judge, which ensued from the high gifts which the people recognised as dwelling in him; and as to Eli, the office of judge seems to have devolved naturally, or rather *ex-officio*, upon him; and his case seems to be the only one in which the high-priest appears in the character which the theocratical institutions designed for him.

The following clear summary of their duties and privileges is from Jahn (*Biblisches Archäologie*, th. ii. bd. 1, sect. 22; Stowe's translation, ii. 86):—'The office of judges or regents was held during life, but it was not hereditary, neither could they appoint their successors. Their authority was limited by the law alone; and in doubtful cases they were directed to consult the Divine King through the priest by Urim and Thummim (Num. xxvii. 21). They were not obliged in common cases to ask advice of the ordinary rulers; it was sufficient if these did not remonstrate against the measures of the judge. In important emergencies, however, they convoked a general assembly of the rulers, over which they presided and exerted a powerful influence. They could issue orders, but not enact laws; they could neither levy taxes nor appoint officers, except perhaps in the army. Their authority extended only over those tribes by whom they had been elected or acknowledged; for it is clear that several of the judges presided over separate tribes. There was no income attached to their office, nor was there any income appropriated to them, unless it might be a larger share in the spoils, and those presents which were made them as testimonials of respect (Judg. viii. 24). They bore no external marks of dignity, and maintained no retinue of cour-

tiers, though some of them were very opulent. They were not only simple in their manners, moderate in their desires, and free from avarice and ambition, but noble and magnanimous men, who felt that whatever they did for their country was above all reward, and could not be recompensed; who desired merely to promote the public good, and who chose rather to deserve well of their country than to be enriched by its wealth. This exalted patriotism, like everything else connected with politics in the theocratical state of the Hebrews, was partly of a religious character, and those regents always conducted themselves as the officers of God; in all their enterprises they relied upon Him, and their only care was, that their countrymen should acknowledge the authority of Jehovah, their invisible king (Judg. viii. 22, sq.; comp. Heb. xi.). Still they were not without faults, neither are they so represented by their historians; they relate, on the contrary, with the utmost frankness, the great sins of which some of them were guilty. They were not merely deliverers of the state from a foreign yoke, but destroyers of idolatry, foes of pagan vices, promoters of the knowledge of God, of religion, and of morality; restorers of theocracy in the minds of the Hebrews, and powerful instruments of Divine Providence in the promotion of the great design of preserving the Hebrew constitution, and, by that means, of rescuing the true religion from destruction.'

The same writer, in the ensuing section, gives a clear view of the general condition of the Hebrews in the time of the judges. 'By comparing the periods during which the Hebrews were oppressed by their enemies, with those in which they were independent and governed by their own constitution, it is apparent that the nation in general experienced much more prosperity than adversity in the time of the judges. Their dominion continued four hundred and fifty years; but the whole time of foreign oppression amounts only to one hundred and eleven years, scarcely a fourth part of that period. Even during these one hundred and eleven years, the whole nation was seldom under the yoke at the same time, but for the most part separate tribes only were held in servitude; nor were their oppressions always very severe; and all the calamities terminated in the advantage and glory of the people, so soon as they abolished idolatry and returned to their King, Jehovah. Neither was the nation in such a state of anarchy at this time as had been generally supposed. There were regular judicial tribunals at which justice could be obtained; and when there was no supreme regent, the public welfare was provided for by the ordinary rulers' (Ruth iv. 1-11; Judg. viii. 22; x. 17, 18; xi. 1-11; 1 Sam. iv. 1; vii. 1-2).

'These times would certainly not be considered so turbulent and barbarous, much less would they be taken, contrary to the clearest evidence and to the analogy of all history, for a heroic age, if they were viewed without the prejudices of a preconceived hypothesis. It must never be forgotten that the book of Judges is by no means a complete history. This no impartial inquirer can ever deny. It is, in a manner, a mere register of diseases, from which, however, we have no right to conclude that there were no healthy men, much less that there were no healthy seasons; since the book itself, for the most part, mentions only a few tribes in which the epidemic prevailed, and notices long periods during which it had universally ceased. Whatever may be the result of more accurate investigation, it remains undeniable that the condition of the Hebrews during this period perfectly corresponds throughout to the sanctions of the law; and they were always prosperous when they complied with the conditions on which prosperity was promised them; it remains undeniable that the government of God was clearly manifested, not only to the Hebrews, but to their heathen neighbours; that the fulfilling of the promises and threatenings of the law were so many sensible proofs of the universal dominion of the Divine King of the Hebrews; and, consequently, that all the various fortunes of that nation were so many means of preserving the knowledge of God on the earth. The Hebrews had no sufficient reason to desire a change in their constitution; all required was, that they should observe the conditions on which national prosperity was promised them.'

The chronology of the period in which the judges ruled is beset with great and perhaps insuperable difficulties. There are intervals of time the extent of which is not specified; as, for instance, that from Joshua's death to the yoke of Cushan Rishathaim (ii. 8); that of the rule of Shamgar (iii. 31); that between Gideon's death and Abimelech's accession (viii. 31, 32); and that of Israel's renewal of idolatry previous to their oppression by the Ammonites (x. 6, 7). Sometimes round numbers seem to have been given, as forty years for the rule of Othniel, forty years for that of Gideon, and forty years also for the duration of the oppression by the Philistines. Twenty years are given for the subjection to Jabin, and twenty years for the government of Samson; yet the latter never completely conquered the Philistines, who, on the contrary, succeeded in capturing him. Some judges, who are commonly considered to have been successive, were in all probability contemporaneous, and ruled over different districts. Under these circumstances, it is impossible to fix the date of each particular event in the book of Judges; but attempts have been made to settle its general chronology, of which we must in this place mention the most successful.

The whole period of the judges, from Joshua to Eli, is usually estimated at 299 years, in order to meet the 480 years which (1 Kings vi. 1) are said to have elapsed from the departure of the Israelites from Egypt to the foundation of the temple by Solomon. But St. Paul says (Acts xiii. 20), 'God gave unto the people of Israel judges about the space of 450 years until Samuel, the prophet.' Again, if the number of years specified by the author of our book, in stating facts, is summed up, we have 410 years, exclusive of those years not specified for certain intervals of time above mentioned. In order to reduce these 410 years and upwards to 299, events and reigns must, in computing their years of duration, either be entirely passed over, or, in a most arbitrary way, included in other periods preceding or subsequent. This has been done by Archbishop Usher, whose peculiarly faulty system has been adopted in the Authorized Version of the Scriptures. He excludes the repeated intervals during which the Hebrews were in subjection to their enemies, and

reckons only the years of peace and rest which were assigned to the successive judges. For example, he passes over the eight years of servitude inflicted upon the Hebrews by Cushan-rishathaim, and, without any interruption, connects the peace obtained by the victories of Othniel with that which had been conferred on the land by the government of Joshua; and although the sacred historian relates in the plainest terms possible that the children of Israel served the king of Mesopotamia eight years, and were afterwards delivered by Othniel, who gave the land rest forty years, the archbishop maintains that the forty years now mentioned began, not after the successes of this judge, but immediately after the demise of Joshua. Nothing certainly can be more obvious than that in this case the years of tranquillity and the years of oppression ought to be reckoned separately. Again, we are informed by the sacred writer, that after the death of Ehud the children of Israel were under the oppression of Jabin king of Hazor for twenty years, and that afterwards, when their deliverance was effected by Deborah and Barak, the land had rest forty years. Nothing can be clearer than this; yet Usher's system leads him to include the twenty years of oppression in the forty of peace, making both but forty years. All this arises from the obligation which Usher unfortunately conceived himself under of following the scheme adopted by the Masoretic Jews, who, as Dr. Hales remarks, have by a curious invention included the four first servitudes in the years of the judges who put an end to them, contrary to the express declarations of Scripture, which represents the administrations of the judges, not as synchronising with the servitudes, but as succeeding them. The Rabbins were indeed forced to allow the fifth servitude to have been distinct from the administration of Jephthah, because it was too long to be included in that administration; but they deducted a year from the Scripture account of the servitude, making it only six instead of seven years. They sank entirely the sixth servitude of forty years under the Philistines, because it was too long to be contained in Samson's administration; and, to crown all, they reduced Saul's reign of forty years to two years only.

The necessity for all these tortuous operations has arisen from a desire to produce a conformity with the date in 1 Kings vi. 1, which, as already cited, gives a period of only 480 years from the Exode to the foundation of Solomon's temple. As this date is incompatible with the sum of the different numbers given in the book of Judges, and as it differs from the computation of Josephus and of all the ancient writers on the subject, whether Jewish or Christian, it is not unsatisfactory to find grounds which leave this text open to much doubt and suspicion. We cannot here enter into any lengthened proof; but that the text did not exist in the Hebrew and Greek copies of the Scripture till nearly three centuries after Christ, is evident from the absence of all reference to it in the works of the learned men who composed histories of the Jews from the materials supplied to them in the sacred books. This may be shown by reference to various authors, who, if the number specified in it had existed, could not fail to have adduced it. In particular, it is certain that it did not exist in the Hebrew or Greek Bibles in the days of Josephus; for he alludes to the verse in which it is contained without making the slightest observation in regard to it, although the period which he, *at the same time*, states as having elapsed between the exode and the foundation of the temple, is directly at variance with it to the extent of not less than 112 years (*Antiq.* viii. 3). If the number '480 years' had then existed in the text, he could not, while referring to the passage where it is now inserted, have dared to state a number so very different. Then we have the testimony of St. Paul (Acts xiii. 20), who makes the rule of 'the judges until Samuel' extend over 450 years, which, with the addition of ascertained numbers, raises the amount for the whole period to 592 years. This evidence seems so conclusive that it is scarcely necessary to add any other; but it may be mentioned that Origen, in his *Commentary on St. John*, cites 1 Kings vi. 1, and even mentions the year of Solomon's reign, and the month in which he began to build the temple, without the slightest notice of the number of years (as now stated in the text) which intervened between that event and the exode. It has consequently been inferred, with good reason, that in A.D. 230, when Origen wrote, the interpolation of the date in question had not yet taken place. Eusebius, however, in his *Chronicon*, written about A.D. 325, does use the date as the basis of a chronological hypothesis; whence it is inferred that the date was inserted about the beginning of the fourth century, and probably under the direction of the Masoretic doctors of Tiberias. It is also to be remarked that Eusebius, in the *Præp. Evangelica*, a work written some years *after* the *Chronicon*, and in all his other works, uses the more common and ancient system of dates.

It may also be remarked that even the ancient versions, as they at present exist, do not agree in the number. The present copies of the Septuagint, for instance, have 440, not 480 years; on which and other grounds some scholars, who have hesitated to regard the text as an interlopation, have deemed themselves authorized to alter it to 592 years instead of 480, producing in this way the same result which would be obtained if the text had no existence. This, it has been already remarked, is the number given by Josephus (*Antiq.* viii. 3. 1), and is in agreement with the statement of St. Paul. The computation of the Jews in China has also been produced in support of it (see Isaac Voss, *Dissert. de LXX. Interp. eorumque translatione et chronologia.* Hagæ Comit. 1664. 4; Michaelis, *Orientalische Bibliothek*, v. 81). There would then be for the period from Moses's death to Saul's accession 468 years, and the whole period of the judges from the death of Joshua to that of Samuel might be estimated at 450 years, agreeably to Acts xiii. 20. If we add to these 450 years forty years for the march in the desert, eighty-four years for the reign of Saul, David, and Solomon, until the foundation of the temple, the amount would be 574 years. For the time when Joshua acted as an independent chieftain, eighteen years may be counted, which added to 574 would make up the above number of 592 years (comp. Michaelis, *Orientalische Bibliothek*, v. 228, whose arrangement of years differs in some points from the above). It must, however, be observed that the

number of 450 years represents only the sum total of all chronologically specified facts of our book down to the death of Eli, and does not include the intervals of time of which the years are not given. The statement of Josephus above referred to rests only on his own individual computation, and is contrary to another statement of the same author (*Antiq.* xx. 10; *Cont. Apion.* ii. 2).

The latest attempt towards settling the chronology of the Judges is that of Dr. Keil, in his work *Dörptsche Beiträge zu den Theologischen Wissenschaften*, or, 'Contributions towards the furtherance of the theological sciences,' by professors of the university of Dorpat. He supports the number of 480 years in 1 Kings vi. 1, and from the invasion of Cushan-rishathaim to Jair (Judg. iii.-x.) retains the chronological statements of our book for events which he considers successive. But the period of the domination of the Philistines over the (western) Israelites until the death of Saul, a space of seventy-nine years, he considers contemporaneous with the time of oppression and deliverance of the eastern and northern tribes, for which (Judg. x. 12) are reckoned forty years. He next estimates the period from the distribution of the land under Joshua to the invasion by the king of Mesopotamia at ten years, and the period from the time when the Philistines were conquered until the death of Saul at thirty-nine years, thus making up the above number of 480 years. In this attempt at settling the chronology of the book of Judges Dr. Kiel evinces great ingenuity and learning; but it appears that his computations rest on historical and chronological assumptions which can never be fully established. In order satisfactorily to settle the chronology we lack sufficient data, and the task has therefore been abandoned by the ablest modern critics, as Eichhorn, De Wette, and others. Nothing beyond general views is attainable on this subject.

Having explained this matter, it only remains to arrange the different systems of the chronology of this period so as to exhibit them in one view to the eye of the reader. It has been deemed right, for the better apprehension of the differences,

† Besides the 20 years under the sixth servitude.

to make the table embrace the whole period from the exode to the building of Solomon's temple. The *headings* are taken from Hales, simply because, from being the most copious, they afford a framework within which all the explanations may be inserted.

The authorities for this table are: Josephus, *Antiquities*, v. 1-10; Theophilus, Bp. of Antioch (A.D. 330), *Epist. ad Autolycum*, iii.; Eusebius (A.D. 330), *Præparatio Evangelica*, x. 14; Usher (1650), *Chronologia Sacra*, p. 71; Jackson, (1752), *Chronological Antiquities*, p. 145; Hales, (1811), *Analysis of Chronology*, i. 101; Russell (1827), *Connection of Sacred and Profane History*, i. 147. In the last work the full tables, with others, are given; and we have here combined them for the sake of comparison. Other authorities on the subject of this article are: Herzfeld, *Chronologia Judicum*, Berol. 1836; Moldenhauer, *Gedanken über die Zeitrechnung im Buch der Richter*, p. 15, sq.; Ditmar, *Geschichte der Israeliten*, p. 91; Hug, in the *Freiburger Zeitschrift*, i. p. 129, sq.; Carpzov, *Introduct. V. T.*, i. 169; Simon, *Hist. Crit. de V. Test.*; Jahn, *Bibl. Archäolog.*, ii. 1. 85; De Wette, *Lehrbuch*, p. 30.

JUDGES, BOOK OF, the third in the list of the historical compositions of the Old Testament. It consists of two divisions, the first comprising chaps. i-xvii.; the second, being an appendix, chaps. xvii.-xxi.

I. Plan of the Book.—That the author, in composing this work, had a certain design in view, is evident from ch. ii. 11-23, where he states the leading features of his narrative. He introduces it by relating (ch. i.) the extent to which the wars against the Canaanites were continued after the death of Joshua, and what tribes had spared them in consideration of a tribute imposed; also by alluding (ch. ii. 1-10) to the benefits which Jehovah had conferred on them, and the distinguished protection with which he had honoured them. Next he states his leading object, namely, to prove that the calamities to which the Hebrews had been exposed since the death of Joshua were owing to their apostacy from Jehovah, and to their idolatry. 'They forsook the Lord, and served Baal and Ashtaroth' (ch. ii. 13); for which crimes they were deservedly punished and greatly distressed (ch. ii. 15). Nevertheless, when they repented and obeyed again the commandments of the Lord, he delivered them out of the hand of their enemies by the *Shophetim* whom he raised up, and made them prosper (ch. ii. 16-23). To illustrate this theme, the author collected several fragments of the Hebrew history during the period between Joshua and Eli. Some episodes occur; but in arguing his subject he never loses sight of his leading theme, to which, on the contrary, he frequently recurs while stating facts, and shows how it applied to them; the moral evidently being, that the only way to happiness was to shun idolatry and obey the commandments of the Lord. The design of the author was not to give a connected and complete history of the Hebrews in the period between Joshua and the kings; for if he had intended a plan of that kind, he would also have described the state of the domestic affairs and of the government in the several tribes, the relation in which they stood to each other, and the extent of power exercised by a judge; he would have further stated the number of tribes over whom a judge ruled, and the number of years during which the tribes were not oppressed by their heathen neighbours, but enjoyed rest and peace. The appendix, containing two narratives, further illustrates the lawlessness and anarchy prevailing in Israel after Joshua's death. In the first narrative (chaps. xvii.-xviii.), a rather wealthy man, Micah, dwelling in Mount Ephraim, is introduced. He had 'a house of gods,' and molten and graven images in it, which he worshipped. After having, at an annual salary, engaged an itinerant Levite to act as his priest and to settle in his family, the Danites, not having as yet an inheritance to dwell in, turn in thither, seize the images, and take the priest along with them. They then establish idolatry at Leshem, or Laish, in Cœle-Syria, which they conquered, smiting the quiet and secure inhabitants with the edge of the sword. The second narrative (chaps. xix.-xxi.) first gives an account of the brutal and criminal outrage committed by the Benjamites of Sibeah against the family of a Levite dwelling, in the age immediately subsequent to Joshua's death, on the side of Mount Ephraim; and next relates its consequence, a bloody civil war, in which all the tribes joined against the tribe of Benjamin and nearly destroyed it. The appendix then does not continue the history of the first sixteen chapters, and may have an author different from him who composed the first division of the book, to which inquiry we now turn.

II. Author.—If the first and second divisions had been by the same author, the chronological indications would also have been the same. Now the author of the second division always describes the period of which he speaks thus: 'In those days there was no king in Israel, but every man did that which was right in his own eyes' (ch. xvii. 6; xviii. 1; xix. 1; xxi. 25); but this expression never once occurs in the first division. If one author had composed both divisions, instead of this chronological formula, we should rather have expected, 'In the days of the Shophetim,' 'At a time when there was no Shophet,' &c., which would be consonant with the tenor of the first sixteen chapters. The style also in the two divisions is different, and it will be shown that the appendix was written much later than the first part. All modern critics, then, agree in this, that the author of the first sixteen chapters of our book is different from him who composed the appendix (see L. Bertholdt, *Historisch-Kritische Einleitung in die sämmtlichen Schriften des A. und N. T.*, p. 876; Eichhorn's *Einleitung in das A. T.*, iii. § 457). The authorship of the first sixteen chapters has been assigned to Joshua, Samuel, and Ezra. That they were not written by Joshua appears from the difference of the method of relating subjects, as well as from the difference of the style. In the book of Joshua there is a continual reference to the law of Moses, which is much less frequent in the book of Judges; and in Joshua, again, there are no such inferences from history as are common in Judges (ch. iii. 1, 4; viii. 27; ix. 56). The style of the book of Joshua is neater than that of Judges; the narration is more clear, and the arrangement is better (comp. ch. i. 10, 11, 20, with Josh. xiv. 6-15, and xv. 13-19; also ch. ii. 7-10, with Josh. xxiv. 29-31). That the book of Judges was composed by Samuel is an invention of the Talmudists, unsupported by any evidence; nor

will the opinion that it was written by Ezra be entertained by any who attentively peruses the original. For it has a phraseology of its own, and certain favourite ideas, to which it constantly reverts, but of which there is not a trace in Ezra. If Ezra had intended to continue the history of the Hebrews from Joshua down to Eli in a separate work, he would not have given a selection of incidents to prove a particular theme, but a complete history. The orthography of the book of Ezra, with many phrases characteristic of his age, do not appear in the book of Judges. The prefix שׁ occurs, indeed (ch. v. 7; vi. 17; vii. 12; viii. 26); but this cannot be referred to in proof that the language is of the time of Ezra, for it belonged to the dialect of North Palestine, as Ewald and others have proved. מה, instead of אשר, is found also in Deut. xxiii. 3. Forms like עממים, ver. 14, and יבב, ver. 28, מדין, ver. 10, תנה, ver. 11, resemble Chaldaisms, but may be accounted for by the poetical style of the song of Deborah. The forms אתי (ch. xvii. 2), and פלגש (ch. xix. 1), belonging to a late age of the Hebrew language, may be considered as changes introduced by copyists (see Ottmar, in *Henke's Magazin*, vol. iv.; W. M. L. de Wette, *Lehrbuch der Einleitung in die Bibel*, Berlin, 1833-39, 2 vols. 8vo.).

But though we cannot determine the authorship of the book of Judges, still its age may be determined from internal evidence. The first sixteen chapters must have been written under Saul, whom the Israelites made their king in the hope of improving their condition. Phrases used in the period of the Judges may be traced in them, and the author must consequently have lived near the time when they were yet current. He says that in his time 'the Jebusites dwelt with the children of Benjamin in Jerusalem' (ch. i. 21): now this was the case only before David, who conquered the town and drove out the Jebusites. Consequently, the author of the first division of the book of Judges must have lived and written before David, and under king Saul. If he had lived under David, he would have mentioned the capture of Jerusalem by that monarch, as the nature of his subject did not allow him to pass it over in silence. The omission, moreover, of the history, not only of Samuel but also of Eli, indicates an author who, living in an age very near that of Eli, considered his history as generally known, because so recent. The exact time when the appendix was added to the book of Judges cannot indeed be determined, but its author certainly lived in an age much later than that of the recorded events. In his time the period of the events which he relates had been long forgotten: which may be inferred from the frequent chronological formula, 'in those days there was no king in Israel' (ch. xvii. 6); and certain particulars of his narrative could no longer be ascertained, which caused him to omit the name of the Levite whose history is given in ch. xix. In his time also the house of God was no longer in Shiloh (ch. xviii. 31); and it will be recollected that it was David who brought the ark to Jerusalem. The author knew also that the posterity of Jonathan were priests of the graven image in Dan, or Laish, 'until the day of the captivity of the land' עד יום גלות הארץ (ch. xviii. 30). This latter circumstance proves, as already observed by Le Clerc and others, that the appendix was not published until after the Babylonian captivity, or at least until after that of Israel by Shalmaneser and Esar-haddon. It cannot be understood of the domination of the Philistines over the Israelites, which would very improperly be called גלות הארץ, this expression always implying the deportation of the inhabitants of a country. The circumstance that the author, in mentioning Shiloh, adds, 'which is in the land of Canaan' (ch. xxi. 12), and that the topographical description of the site of Shiloh is given (ch. xxi. 19), has led some interpreters to assert that the author of the appendix must have been a foreigner, as to an Israelite such remarks would have appeared trivial (see *Briefe einiger Holländischen Gottesgelehrten über R. Simon's kritische Geschichte des A. T.*, edited by Le Clerc at Zurich, p. 490). The inference is certainly specious, but to judge of it duly we must look at the context. The first passage runs thus: 'And they found among the inhabitants of *Jabesh-gilead* four hundred young virgins that had known no man, and they brought them unto the camp to *Shiloh*, *which is in the land of Canaan*.' The second passage is: 'There is a feast of the Lord in Shiloh yearly, in a place which is on the north side of Bethel, on the east side of the highway that goes up from Bethel to Shechem, and on the south of Lebonah.' It appears that in the first passage Shiloh is opposed to Jabesh in Gilead, a town without the land of Canaan, and that this led the author to add to Shiloh that it was in Canaan. The second passage describes not the site of Shiloh, but of a place in its neighbourhood, where an annual feast was celebrated, when the daughters of Shiloh came out to dance, to sing, and to play on instruments of music. The author thus enabled his readers, and all those who had never been at Shiloh, to form a distinct idea of the festival, and to find its scene without the employment of a guide; his topographical observation was calculated to raise the interest of his narrative, and was consequently very proper and judicious. It cannot, therefore, authorize us to infer that he was a foreigner.

III. Character of the Book.—Parts of the work are undoubtedly taken from ancient records and genealogies, others from traditions and oral information. From ancient authentic documents are probably copied the song of Deborah (ch. v.), the beautiful parable of Jotham (ch. ix. 8-15), and the beginning of Samson's epinician, or triumphal poem (ch. xv. 16). In their genealogies the Hebrews usually inserted also some historical accounts, and from this source may have been derived the narrative of the circumstances that preceded the conception of Samson, which were given as the parents related them to others (ch. xiii.). These genealogies were sometimes further illustrated by tradition, and several incidents in the history of Samson appear to have been derived from this kind of information. But on many points tradition offered nothing, or the author rejected its information as not genuine, and unworthy of belief. Thus it is that of Tola, Jair, Ibzan, Elon, and Abdon, the author gives only the number of years that they governed and the number of their children, but relates none of their

transactions (ch. x. 1-5; xii. 8, 9, 11, 13). In some instances the very words of the ancient documents which the author used seem to have been preserved; and this proves the care with which he composed. Thus in the first division of our book, but nowhere else, rich and powerful men are described as men riding on ass-colts רכבים על עירים (ch. x. 4; xii. 14, &c.). It is remarkable that this phrase occurs also in the song of Deborah, which is supposed to have been written out in her time (ch. v. 9, 10): 'My heart is towards the governors of Israel, that offered themselves willingly among the people. Speak ye *that ride on white asses*, ye that sit in judgment.' In the appendix also of this book, but nowhere else, a priest has the honorary title of father given him (ch. xvii. 10; xviii. 19). But though the author sometimes retained the words of his sources, still the whole of the composition is written in a particular style, distinguishing it from all other books of the Old Testament. The idea of the Israelites being overcome by their enemies, he expresses often in this way: 'The anger of the Lord was hot against Israel, and he sold them into the hands of their enemies,' ויחר אף יהוה בישראל וימכרם ביד אויביהם (ch. ii. 14; iii. 8; iv. 2; x. 7). A courageous and valiant warrior is described as a person upon whom rests the spirit of Jehovah, ותהי רוח יהוה עליו, or as a person whom the spirit of Jehovah clothed, רוח יהוה לבשה את גדעון (ch. vi. 34; ix. 29; xiv. 6, 19; xv. 14, &c.).

IV. Authority of the Book.—It was published at a time when the events related were generally known, and when the veracity of the author could be ascertained by a reference to the original documents. Several of its narratives are confirmed by the books of Samuel (comp. Judg. iv. 2; vi. 14; xi., with 1 Sam. xii. 9-12: Judg. ix. 53 with 2 Sam. xi. 21). The Psalms not only allude to the book of Judges (comp. Ps. lxxxiii. 11, with Judg. vii. 25), but copy from it entire verses (comp. Ps. lxviii. 8, 9; xcvii. 5; with Judg. v. 4, 5). Philo and Josephus knew the book, and made use of it in their own compositions. The New Testament alludes to it in several places (comp. Matt. ii. 13-23 with Judg. xiii. 5; xvi. 17; Acts xiii. 20; Heb. xi. 32). This external evidence in support of the authority of the book of Judges is corroborated by many internal proofs of its authenticity. All its narratives are in character with the age to which they belong, and agree with the natural order of things. We find here that shortly after the death of Joshua the Hebrew nation had, by several victories, gained courage and become valorous (ch. i. and xix.); but that it afterwards turned to agriculture, preferred a quiet life, and allowed the Canaanites to reside in its territory in consideration of a tribute imposed on them, when the original plan was that they should be expelled. This changed their character entirely: they became effeminate and indolent—a result which we find in the case of all nations who, from a nomadic and warlike life, turn to agriculture. The intercourse with their heathen neighbours frequently led the uncultivated Hebrews to idolatry; and this, again, further prepared them for servitude. They were consequently overpowered and oppressed by their heathen neighbours. The first subjugation, indeed, by a king of Mesopotamia, they endured but eight years; but the second, more severe, by Eglon, lasted longer: it was the natural consequence of the public spirit having gradually more and more declined, and of Eglon having removed his residence to Jericho with a view of closely watching all their movements (Joseph. *Antiq.* v. 5). When Ehud sounded the trumpet of revolt, the whole nation no longer rose in arms, but only the inhabitants of Mount Ephraim (ch. iii. 27); and when Barak called to arms against Sisera, many tribes remained quietly with their herds (ch. v. 14, 15, 26, 28). Of the 30,000 men who offered to follow Gideon, he could make use of no more than 300, this small number only being, as it would seem, filled with true patriotism and courage. Thus the people had sunk gradually, and deserved for forty years to bear the yoke of the Philistines, to whom they had the meanness to deliver Samson, who, however, loosed the cords with which he was tied, and killed a large number of them (ch. xv.). It is impossible to consider such an historical work, which perfectly agrees with the natural course of things, as a fiction: at that early period of authorship, no writer could have, from fancy, depicted the character of the Hebrews so conformably with nature and established facts. All in this book breathes the spirit of the ancient world. Martial law we find in it, as could not but be expected, hard and wild. The conquered people are subjected to rough treatment, as is the case in the wars of all uncivilized people; the inhabitants of cities are destroyed wholesale (ch. viii. 16, 17; xx.). Hospitality and the protection of strangers received as guests is considered the highest virtue: a father will rather resign his daughter than allow violence to be done to a stranger who stops in his house for the night (ch. xix.; comp. Gen. xix.).

In the state of oppression in which the Hebrews often found themselves during the period from Joshua to Eli, it was to be expected that men, filled with heroism, should now and then rise up and call the people to arms in order to deliver them from their enemies. Such valiant men are introduced by our author, and he extols them, indeed, highly; but on the other hand he is not silent respecting their faults, as may be seen in the instances of Ehud, whom he reports to have murdered a king to recover liberty for his country (ch. iii. 16, sq.); of Gideon, who is recorded to have punished the inhabitants of Succoth and Penuel cruelly, for having refused bread to his weary troops (ch. viii. 16, 17); and of Jephthah, who vows a vow that if he should return home as a conqueror of the Ammonites, he would offer as a burnt-offering whatever should first come out of the door of his house to meet him: in consequence of this inconsiderate vow, his only daughter is sacrificed by a savage father, who thus becomes a gross offender against the Mosaic law, which expressly forbids human immolations (ch. xi. 34). This cannot be a fiction; it is no panegyric on Israel to describe them in the manner the author has done. And this frank, impartial tone pervades the whole work. It begins with displaying the Israelites as a refractory and obstinate people, and the appendix ends with the statement of a crime committed by the Benjamites, which had the

most disastrous consequences. At the same time due praise is bestowed on acts of generosity and justice, and valiant feats are carefully recorded.

But are not the exploits of its heroes exaggerated in our book, like those of Sesostris, Semiramis, and Hercules? Their deeds are, no doubt, often splendid; but they do not surpass belief, provided we do not add to the narrative anything which the original text does not sanction, nor give to particular words and phrases a meaning which does not belong to them. Thus, when we read that 'Shamgar *slew* of the Philistines 600 men' (ch. iii. 31), it would have been more correct if the Hebrew וַיַּךְ had been rendered by 'put to flight;' and it should be further recollected, that Shamgar is not stated to have been alone and unassisted in repelling the enemy: he did it, no doubt, supported by those brave men whose leader he was. It frequently happens that to the leader is attributed what has been performed by his followers. We find (1 Sam. xiii. 3) that Jonathan repulsed the Philistines, and no one doubts that it was done by the 1000 men mentioned in the beginning of the chapter. We read also (1 Sam. xviii. 7) that 'Saul has slain his thousands, and David his ten thousands,' but of course with the assistance of troops; and many more passages of the Old Testament are to be interpreted on the same principle, as 1 Sam. xviii. 27; 2 Sam. viii. 2. Nor can it offend when, in the passage quoted above, it is said that Shamgar repelled the Philistines with an ox-goad; for this was exactly the weapon which an uncultivated Oriental warrior, who had been brought up to husbandry, would choose in preference to other instruments of offence. From the description which travellers give of it, it appears to have been well suited to such a purpose [AGRICULTURE]. It is, however, chiefly the prodigious strength of Samson which to very many readers seems exaggerated, and surpassing all belief. He is, *e. g.*, reported to have, unarmed, slain a lion, (ch. xiv. 5, 6); to have caught 300 jackals (שׁוּעָלִים), bound their tails to one another, put a firebrand between two tails, and let them go into the standing corn of the Philistines, which was thus burnt up (ch. xv. 4, 5, 8); to have broken, with perfect ease, the new cords with which his arms were bound, &c. (ch. xv. 14; xvi. 7-9, 11). Now, there is in these and other recorded feats of Samson nothing which ought to create difficulty, for history affords many instances of men of extraordinary strength, of whom Goliath among the Philistines is not the least remarkable; and for others we refer to T. Ludolf, *Historia Æthiopiæ*, i. 10; to the *Acta Dei per Francos*, i. 75, 314; and to Schillinger, *Missionsbericht*, iv. 79. Lions were also slain by other persons unarmed, as by David (1 Sam. xvii. 36) and Benaiah (2 Sam. xxiii. 20). The explanation of Samson's other great exploits will be found under his name [SAMSON]. It will be easy to show that, when properly understood, they do not necessarily exceed the limits of human power. Extraordinary indeed they were; but they are not alleged by the Scripture itself to have been supernatural. Those, however, who do hold them to have been supernatural cannot reasonably take exception to them on the ground of their extraordinary character. A cautious reader may, perhaps, resolve on abstaining entirely from giving his views of Samson's feats; but, at all events, he will not presume to say that they exceed human power, and are fabulous. He may say that they do not necessarily exceed human power, and are therefore neither supernatural on the one hand, nor fabulous on the other; or if he believes them above human power, he must admit that they are supernatural, and will have no right to conclude that they are fabulous. Considering the very remote period at which our book was written—considering also the manner of viewing and describing events and persons which prevailed with the ancient Hebrews, and which very much differs from that of our age—taking, moreover, into account the brevity of the narratives, which consist of historical fragments, we may well wonder that there do not occur in it more difficulties, and that not more doubts have been raised as to its historical authority (see Herder, *Geist der Hebräischen Poesie*, ii. 250, 59; Eichhorn, *Repertorium der Biblischen und Morgenländischen Litteratur*, vii. 78).—J. v. H.

JUDGMENT-HALL. Πραιτώριον occurs Matt. xxvii. 27; Mark xv. 16; John xviii. 28, 33; xix. 9; Acts xxiii. 35; Phil. i. 13; in all which places the Vulgate has *prætorium*. The English version, however, uses prætorium but once only, and then unavoidably, Mark xv. 16, 'The hall called Prætorium.' In all the other instances it gives an explanation of the word rather than a translation: thus, Matt. xxvii. 27, 'the common-hall;' margin, 'or governor's house:' John xviii. 28, 33, 'the judgment-hall;' margin, 'or Pilate's house:' Philipp. i. 13, 'the palace;' margin, 'or Cæsar's court.' The object of the translators, probably, was to make their version intelligible to the mere English reader, and to exhibit the various senses in which they considered the word to be used in the several passages. It is plainly one of the many Latin words to be found in the New Testament [LATINISMS], being the word *prætorium* in a Greek dress, a derivative from *prætor;* which latter, from *præeo*, 'to go before,' was originally applied by the Romans to a military officer—the general. But because the Romans subdued many countries and reduced them to provinces, and governed them afterwards, at first by the generals who had subdued them, or by some other military commanders, the word prætor came ultimately to be used for any civil governor of a province, whether he had been engaged in war or not; and who acted in the capacity of Chief Justice, having a council associated with him (Acts xxv. 12). Accordingly the word prætorium, also, which originally signified the general's tent in a camp, came at length to be applied to the residence of the civil governor in provinces and cities (Cic. *Verr.* ii. v. 12); and being properly an adjective, as is also its Greek representative, it was used to signify *whatever* appertained to the prætor or governor; for instance, his residence, either the whole or any part of it, as his dwelling-house, or the place where he administered justice, or even the large enclosed court at the entrance to the prætorian residence (Bynæus, *De Morte Jes. Christ.* ii. 407, Amst. 1696).

These observations serve to elucidate the several uses of the word in the New Testament, which have, however, much exercised the ingenuity and research of many eminent scholars, as may be seen upon referring to Pitisci *Lex. Antiq. Roman.*,

s. v. 'Prætorium.' Upon comparing the instances in which the evangelists mention the prætorium, it will be seen, first, that it was the residence of Pilate; for that which John relates in ch. xviii. 28, 'Then led they Jesus from Caiaphas into the prætorium,' &c., is most certainly the same incident which Luke relates in ch. xxiii. 1, 'And the whole multitude arose and led him to Pilate,' &c. A collation of the subsequent verses in each passage will place this point beyond doubt. Nonnus says, that leaving the house of Caiaphas, they took Jesus εἰς δόμον ἡγεμόνος, 'to the governor's house.' This residence of Pilate seems to have been the magnificent palace built by Herod, situated in the north part of the upper city, west of the temple (Joseph. *Antiq.* xv. 9. 3), and overlooking the temple (xx. 8. 11). The reasons for this opinion are, that the Roman procurators, whose ordinary residence was at Cæsarea (Acts xxiii. 23, &c.; xxv. 1, &c.), took up their residence in this palace when they visited Jerusalem, their tribunal being erected in the open court or area before it. Thus Josephus states that Florus took up his quarters at the palace (ἐν τοῖς βασιλείοις αὐλίζεται); and on the next day he had his tribunal set up before it, and sat upon it (*De Bell. Jud.* ii. 14. 8). Philo expressly says that the palace, which had hitherto been Herod's, was now called τὴν οἰκίαν τῶν ἐπιτρόπων, 'the house of the prætors' (*Legat. ad Caium*, p. 1033, ed. Franc.). Secondly, the word is applied in the New Testament, by synecdoche, to a particular *part* of the prætorian residence. Thus, Matt. xxvii. 27, and Mark xv. 16, 'And the soldiers led Jesus away into the hall called Prætorium, and gathered unto them the whole band, and they clothed him with purple,' &c.; where the word rather refers to the court or area in front of the prætorium, or some other court where the procurator's guards were stationed. In John xix. 9, the word seems applied, when all the circumstances are considered, to Pilate's *private examination room*. In like manner, when Felix 'commanded Paul to be kept in Herod's prætorium' (Acts xxiii. 25), the words apply not only to the whole palace originally built at Cæsarea by Herod, and now most likely inhabited by the prætor, but also to the *keep* or *donjon*, a prison for confining offenders, such as existed in our ancient royal palaces and grand baronial castles. Thirdly, in the remaining instance of the word, Phil. i. 3, 'So that my bonds in Christ are manifest in all the prætorium,' 'palace,' it is, in the opinion of the best commentators, used by hypallage to signify the *prætorian camp* at Rome, a select body of troops constituted by Augustus to guard his person and to have charge of the city, the 'cohortes prætorianæ' (Suet. *Tib.* 37; *Claud.* 10; *Ner.* 8; Tacitus, *Annal.* xii. 69); so that the words of the apostle really mean, 'My bonds in Christ are manifest to all the prætorians, and by their means to the public at large' (Bloomfield's *Recensio Synopt.*, in loc.). The præfect of this camp was the στρατοπεδάρχης to whose charge Paul was committed (Acts xxviii. 26), as the younger Agrippa was once imprisoned by this officer at the express command of the Emperor Tiberius (Joseph. *Antiq.* xviii. 6. 6; Olshausen, *Topogr. des alt Jerusalem*, § iii. 9; Perizonius, *De Origine et Significatione et usu vocum Prætoris et Prætorii*, Frank. 1690; Perizonius, *Disquisitio cum Ulrico Hubero*, Lugdm. Bat. 1696; Shorzius, *De Prætorio Pilati* in *Exercit. Phil.* Hag. Com. 1771; Zornius, *Opuscula Sacra*, ii. 699; Winer, *Bibl. Real-Wörterbuch*, art. 'Richthaus').—J. F. D.

JUDITH ('Ιουδίθ; or 'Ιουδήθ, *Judeth*, as in the English version, and in Origen) [APOCRYPHA], the name of one of the apocryphal or deuterocanonical books of the Old Testament, is placed in manuscripts of the Alexandrine version between the books of Tobit and Esther. In its external form this book bears the character of the record of an historical event, describing the complete defeat of the Assyrians by the Jews through the prowess of a woman.

The following is a sketch of the narrative:—Nebuchadnezzar, or, as he is called in the Greek, Nabuchodonosor, king of the Assyrians, having, in the twelfth year of his reign, conquered and taken Arphaxad, by whom his territory had been invaded, formed the design of subduing the people of Asia to the westward of Nineveh his capital, who had declined to aid him against Arphaxad. With this view he sent his general, Holofernes, at the head of a powerful army, and soon made himself master of Mesopotamia, Syria, Libya, Cilicia, and Idumæa. The inhabitants of the sea-coast made a voluntary submission; which, however, did not prevent their territories from being laid waste, their sacred groves burned, and their idols destroyed, in order that divine honours should be paid only to Nebuchadnezzar. Holofernes, having finally encamped in the plain of Esdraelon (ch. i. 3), remained inactive for a whole month—or two, according to the Latin version. But the Jews, who had not long returned from captivity, and who had just restored their temple and its worship, prepared for war under the direction of their high-priest Joacim, or Eliakim, and the senate. The high-priest addressed letters to the inhabitants of Bethulia (Gr. Βετυλούα) and Betomestham, near Esdraelon (ch. iv. 6), charging them to guard the passes of the mountains. The Jews at the same time kept a fast, and called upon God for protection against their enemies. Holofernes, astonished at their audacity and preparations, inquired of the Moabites and Ammonites who these people were. Achior, the leader of the Ammonites, informed him of the history of the Jews, adding, that if they offended their God he would deliver them into the hands of their enemies, but that otherwise they would be invincible. Holofernes, however, prepares to lay siege to Bethulia, and commences operations by taking the mountain passes, and intercepting the water, in order to compel the inhabitants to surrender. Ozias, the governor of the city, holds out as long as possible; but at the end of thirty-four days' siege, the inhabitants are reduced to that degree of distress from drought, that they are determined to surrender unless relieved within five days. Meantime Judith, a rich and beautiful woman, the widow of Manasseh, forms the patriotic design of delivering the city and the nation. With this view she entreats the governor and elders to give up all idea of surrender, and to permit the gates of the city to be opened for her. Arrayed in rich attire, she proceeds to the camp of Holofernes, attended only by her maid, bearing a bag of provisions. She is admitted into the presence of Holofernes, and informs him that the Jews could not be overcome so long as they remained faithful to God, but that they had now

sinned against Him in converting to their own use the tithes, which were sacred to the priests alone; and that she had fled from the city to escape the impending and inevitable destruction which awaited it. She obtains leave to remain in the camp, with the liberty of retiring by night for the purpose of prayer, and promises that at the proper moment she will herself be the guide of Holofernes to the very walls of Jerusalem. Judith is favourably entertained; Holofernes is smitten with her charms, gives her a magnificent entertainment, at which, having drunk too freely, he is shut up with her alone in the tent. Taking advantage of her opportunity, while he is sunk in sleep, she seizes his falchion and strikes off his head. Giving it to her maid, who was outside the tent door, she leaves the camp as usual, under pretence of devotion, and returns to Bethulia, displaying the head of Holofernes. The Israelites, next morning, fall on the Assyrians, who, panic-struck at the loss of their general, are soon discomfited, leaving an immense spoil in the hands of their enemies. The whole concludes with the triumphal song of Judith, who accompanies all the people to Jerusalem to give thanks to the Lord. After this she returns to her native city Bethulia, gives freedom to her maid, and dies at the advanced age of 105 years. The Jews enjoying a profound and happy peace, a yearly festival (according to the Vulgate) is instituted in honour of the victory.

The difficulties, historical, chronological, and geographical, comprised in the narrative of Judith are so numerous and serious as to be held by many divines altogether insuperable. Events, times, and manners are said to be confounded, and the chronology of the times before and those after the exile, of the Persian and Assyrian, and even of the Maccabæan period, confusedly and unaccountably blended.

The first and greatest difficulty is to fix the period when the alleged events took place. Those who place them before the exile are divided in opinion between the time of Manasses and that of Zedekiah. Among those who refer the history to the time of Manasseh are Calmet (*Commentary*), Prideaux (*Connection*), Montfaucon, who places the scene in the latter part of his reign (*Hist. Ver. Judith.*), and Bellarmine (*De Verbo Dei*). These writers consider Nebuchadnezzar to be the same with Saosduchin. See also Lud. Capell (*Comm. Crit.*), and Huet (*Dem. Evangel.*).

As the events in Judith are positively asserted to have taken place after the captivity (ch. iv. 3; v. 18, 19 in the Greek; ch. v. 22, 23 in the Vulgate), the commentators who adopt the view just referred to assume that it is only some temporary and transient captivity (as that of Manasseh) which is here meant. Calmet is not disconcerted by supposing that Judith might in this case be sixty-three or sixty years old, 'being then what we call a fine woman, and having an engaging air and person,' 'likely,' adds Du Pin, 'to charm an old general.' Jahn, however, maintains that it would be altogether inconsistent with historical truth to assert that the Jews had no idols in the reign of Manasseh (ch. viii. 18).

The reign of Zedekiah has been held by others as the era of Judith; and Genebrard is of opinion that the Nebuchadnezzar of Judith is Nebuchadnezzar the Great [NEBUCHADNEZZAR]. Jahn conceives that the author of Judith confounds Nebuchadnezzar with Nereglissor, who, in preparing his expedition against the Medes, invited the Lydians, Phrygians, Carians, Cappadocians, Cilicians, Paphlagonians, and other neighbouring nations to the war, when, however, he was himself overcome and slain by Cyrus (*Bibl. Archæol.* part ii. tom. i. § 47, p. 216).

Those who consider the events recorded in Judith to have taken place after the captivity, find equal difficulty in fixing the era. The most ancient tradition of the Jews (preserved by Eusebius in his *Chronicon*) considers Cambyses as the Nebuchadnezzar of Judith. Julius Africanus, who is followed by the Roman Catholic Professor Alber, of Pesth, ascribes the history to the time of Xerxes, others to that of Darius Hystaspis (Whiston, *Hist. of the Old Test.*), or of Artaxerxes Ochus (Sulpitius Severus, *Hist. Sac.* ii. 12). Jahn (*Introd.*) maintains that there was no time *after the exile* when it was possible for these events to have taken place, for he observes that the Jews were subject to the Persians for 207 years, after which they were subject to Alexander the Great, then to the Ptolemies, and to the kings of Syria, until they obtained their independence. The only time to which they could possibly be referred is that of Antiochus Epiphanes, but this supposition is inconsistent with the fact that the Jews had but recently returned from captivity, and restored the worship of God in the Temple. The geographical difficulties are equally embarrassing.

While some have endeavoured to account for these difficulties by imputing them to the errors of transcribers, others have supposed that the book of Judith could not possibly have been intended by its author to be a purely historical narrative. Grotius conceived it to be an allegory, the design of which was to encourage the Jews in their hopes of deliverance from the Syrians, when the Temple was polluted by Antiochus Epiphanes. Judith, he says, represents the Jewish nation; Bethulia, the Temple; the sword issuing from them, the prayers of the saints; Nebuchadnezzar, the devil; and Holofernes (הלפר נחש, the Officer of the Serpent), Antiochus Epiphanes, who wishes to overcome the beautiful but widowed Judæa. The prayers of the saints were heard, and he was punished by God. Eliakim, the name of the high-priest, signifies that God will arise. Among the Roman Catholics this notion of an allegory is favoured by Jahn, who maintains that the difficulties are otherwise insuperable. De Wette, however, considers that the fact of Holofernes being an historical name (together with other reasons), militates against the notion of an allegory, as maintained by Grotius. The name Holofernes is found in Appian (*In Syriac.* c. 47), and in Polybius (x. 11). The latter historian states that Holofernes, having conquered Cappadocia, lost it by endeavouring to change the customs of the country, and to introduce the drunken rites of Bacchus; and Casaubon (*ad Athen.*) conjectures that this was the Holofernes of Judith. From its termination the name is supposed to be of Persian extraction, as Tissaphernes, Artaphernes, Bargaphernes, &c.

Luther first conceived the idea that the book of Judith was a patriotic romance, a drama or sacred poem, written by some pious man, with the

intention of showing that God was accustomed to assist the Israelites who had faith in his promises. This view was subsequently adopted by Buddeus (*Hist. Eccles. V. T.*, ii. 611, sq.), Semler, and Bertholdt. 'Judith,' says Luther, 'is a beautiful composition; it is good, sound, and worthy of being read with attention by Christians. Its contents ought to be read as the work of a sacred poet, or of a prophet animated by the Holy Spirit, who instructs by the characters whom he introduces on the stage to speak in his name' (*Pref. to Judith*). And again, 'If the action of Judith could be justified by proof drawn from incontestable historical documents, it would doubtless merit to be received into the number of sacred books as an excellent work.'

Date of the composition, and author.—The authorship of the book is as uncertain as its date. It is not named either by Philo or Josephus; nor have we any indication whatever by which to form a conjecture respecting its author. But it has been supposed by some that it could not have been written by a contemporary, from the circumstance of the family of Achior being mentioned as still in existence, and of the Festival of Judith being still celebrated. If this festival ever took place, it must have been of temporary duration, for, as Calmet observes, no record of it can be traced since the exile. Professor Alber of Pesth, however, maintains that it is still recorded in the Jewish calendars. Jahn, after Grotius, refers the date of the book to the Maccabæan period, and derives an argument for its late composition from the fact of the Feast of the New Moon being mentioned (ch. viii. 6, compared with Mark xv. 42). De Wette (*Einleitung*) conceives that the whole composition bespeaks an author who was a native of Palestine, who could not have lived beyond the end of the first century of the Christian era (the date assigned to it by Eichhorn), inasmuch as it is then cited by Clement of Rome; but that the probability is that it was much earlier written. Movers, a Roman Catholic Professor at Bonn, a man of great penetration in similar investigations respecting the canonical books of the Old Testament, endeavours to fix the date of its composition in the year B.C. 104. 'The author,' he observes, 'who has transferred the geographical relations of his own time to a former period,* makes the Jewish territory commence at Scythopolis (ch. iii. 10), and makes Bethulia, against which Holofernes directed his attack, the first Jewish city at the entrance into Judæa (iv. 7), reckoning the territory intervening between this and Samaria as tributary to the Jewish high-priest. This state of affairs continued from the time of John Hyrcanus to Pompey's invasion of Judæa. Hyrcanus had seized upon Samaria, and wrested Scythopolis, with the surrounding territory, from Epicrates, the general of Ptolemy Lathurus (Josephus, *Antiq.* xiii. 10. 3), B.C. 110, according to Usher. But Samaria and Scythopolis, with other acquisitions of the Maccabees, were lost for ever to the Jewish nation, when Pompey, B.C. 48, reduced Judæa to its ancient limits. The sea-coast (ch. iii. 1), independent of the Jews, continued, since the last years of the reign of Alexander Jannæus, to be a Jewish possession; but Carmel, which (ch. i. 8) was inhabited by the Gentiles, was still independent in the beginning of his reign, and he first seized it after the war with Ptolemy Lathurus (xiii. 15. 4). It is to this war that Movers considers the book of Judith to refer, and he supposes it to have been written after the unfortunate battle at Asochis in Galilee (or rather Asophen on the Jordan) (Movers, *Ueber die Ursprache der Deuterokan. Bueher*, in the *Bonner Zeitschrift*, xiii. 36, sq.). De Wette conceives that this hypothesis is opposed by the following geographical combinations:—1. Galilee belonged to the Asmonæans, the proof of which, indeed, is by no means certain, while the following indications thereof present themselves:—(*a*) Asochis seems to have belonged to Alexander Jannæus, as it received Ptolemy Lathurus (Joseph. *Antiq.* xiii. 12. 4, comp. with xv. 4). (*b*) Hyrcanus had his son Alexander Jannæus brought up in Galilee (xiii. 12. 1). (*c*) Antigonus returned from Galilee (*De Bell. Jud.* i. 3. 3). (*d*) Aristobulus seized upon Ituræa (*Antiq.* xiii. 11. 3), which presupposes the possession of Galilee. (*e*) Even after the limits of Galilee were circumscribed by Pompey, it still belonged to the Jewish high-priest (*De Bell. Jud.* i. 10. 4). 2. Idumæa belonged to the Jewish state, but the sons of Esau came to Holofernes (vii. 8. 18). 3. If the author had the war with Ptolemy Lathurus in view, the irruption of Holofernes would rather correspond with the movements of the Cyprian army, which proceeded from Asochis to Sepphoris, and thence to Asophen (*Einleitung*, § 307).

Language of Judith.—The original language is uncertain. Eichhorn and Jahn (*Introduction*) and Seiler (*Biblical Hermeneutics*), with whom is Bertholdt, conceive it to have been Greek. Calmet states on the authority of Origen (*Ep. ad African.*), that the Jews had the book of Judith in Hebrew in his time. Origen's words, however, are, 'They make no use of Tobit, nor of Judith, nor have they them even in the Apocrypha in Hebrew, as we have learned from themselves.' Jerome (*Pref. to Judith*) states that it is written in Chaldee, from which he translated it, with the aid of an interpreter, giving rather the sense than the words. He also complains of numbers of incorrect copies of Judith in the Latin translation, which he had expurgated, retaining only what was in the Chaldee. Many of the errors of Jerome's translation can be corrected by the Greek; as, for instance, ἀπάτης, 'of deceit' (ch. xi. 5), was mistaken for ἀγάπης, and translated *caritatis*; κλαύσονται was mistaken for καύσονται, and translated *urentur*, &c. &c. The Chaldee text, from which Jerome translates, and which varies

* The Rev. Charles Forster (*Geography of Arabia*, 1844) observes (i. 185), 'that in the book of Judith the race of Ishmael is noticed by their patronymic as extending to the southern confines of Syria and Cilicia. Holofernes, moving south from Cilicia, spoiled all the children of Rasses and the children of Ishmael which were towards the wilderness, at the south of the land of the Chillians. The same verse,' he adds (Judith ii. 23), 'makes mention of "Phud and Lud" as inhabitants of the hill country, or Upper Cilicia, and thereby corrects the geography of Bochart and Wells, who not only carry these two nations into Africa, but confine them exclusively to that continent. The march of Holofernes is wholly inconsistent with this notion.'

considerably from the Greek, betrays, according to De Wette, many and undoubted marks of a Hebrew original. It is impossible, however, to say whether this was best represented by the Greek or by the Chaldee. Jerome probably himself, or his interpreter, took many liberties with the original, with which he states that he was but imperfectly acquainted.

The Syriac version seems evidently taken from the Greek, and the more correct manner in which the names of cities are given, as well as other variations, have been supposed to attest the existence of more correct Greek copies than those which we now possess, as no book in the Septuagint has so few Greek particles as the book of Judith.

Gesenius, and especially Movers, have been very successful in their efforts to correct the present geographical errors by the supposition of a Hebrew original. Betani (ch. i. 9) the latter conceives to be Beth-anoth (Josh. xv), and the *two seas* (ch. i. 12), the two arms of the Nile. For χαλλαίων he reads χαλδαίων, and considers Rasses to be an oversight for Tarshish. Movers, observes De Wette, explains the historical inaccuracies and anachronisms, by a free poetical use of history after the manner of Shakspeare. Movers may therefore be included among those writers who have followed Luther in considering Judith an historical romance. Seiler (*Biblical Hermeneutics*) conceives it to be a fiction, founded on fact, written by a Palestinian Jew.

The old Latin ante-hieronymian version (from the Greek) is still extant, and the many discrepancies between it and Jerome's version, confirm the fact of the great and faulty variety in the copies, of which that father complains. The text of this version is by some supposed to have been mixed with that of Jerome, and the variations between the Vulgate and the Greek are numerous and considerable.

Authority of Judith in the Church.—Although the book of Judith never formed part of the Jewish canon [DEUTERO-CANONICAL], and finds no place in the ancient catalogues, its authority in the Christian church has been very great. It is thus referred to by Clemens Romanus, the companion of the Apostles, in his first (or genuine) epistle to the Corinthians :—'The blessed Judith, when the city was besieged, asked leave of the elders to go to the camp of the foreigners, and fearless of danger in her patriotism, she proceeded, and the Lord delivered Holofernes into the hands of a woman. In like manner, Esther,' &c. &c. Jerome observes that 'Ruth, Esther, and Judith had the honor of giving their names to sacred books' (*Ad Principiam*). Among the Hebrews, he observes, 'it is reckoned among the Hagiographa (or Apocrypha) whose authority is not proper for confirming controverted matters,' but he adds, 'since the council of Nicæa is read (*legitur*) to have reckoned Judith among the sacred Scriptures, I have agreed to your request (to translate it). . . . Receive Judith as an example of chastity. . . . He who was the rewarder of her chastity gave her such virtue as to enable her to overcome him who was invincible.' It is spoken of by Origen as received by the church (*Hom.* xix. *in Gen.* & i. iii. *in Johan.*), and is cited by Tertullian (*De Monogamia*), Ambrose (lib. iii. *De Offic.*), and Chrysostom (*Homil.*).

Indeed, no question as to Judith's being an historical personage appears to have been raised before the era of the Reformation, and this question is still unsettled. 'Even,' says Calmet (*ut supra*), 'if by the force of our adversaries' reasons we should be compelled to acknowledge that the book contains but a parable, or a fiction written for the encouragement of the Jews in their affliction, and to give them a model of virtue in the person of Judith, we do not perceive what advantage they would derive against us, and against the authenticity of the book. Would it be on that account the less divine, less inspired, less worthy of the Holy Spirit? The fathers who have cited it, the councils which have received it into the canon, the church which authorizes it and receives it,—would they be on this account in error? and would religion suffer the least injury? Does not the Old Testament, as well as the New, abound in parables, so circumstantially detailed as to present the appearance of real histories, &c.?' (*Pref. to Comm.*) And as to the action of Judith, the same able commentator observes: 'We cannot approve in all respects, either the prayer or the action of Judith; we commend her good intentions, and think that the uprightness of her design and her ignorance abate much of the crime. . . . Yet will not this suffice entirely to excuse her; a lie told with so much solemnity, and carried on through her whole conversation with Holofernes, is still indefensible. The employing her beauty and her little winning arts to inflame his passion, and thereby exposing her person to a rude attack, is a step likewise not to be justified.'

The book of Judith is supposed by some to be referred to by St. Paul (1 Cor. x. 9, 10, comp. with Judith viii. 24, 25). Judith, with the other deuterocanonical books, has been at all times read in the church, and lessons are taken from it in the Church of England in course.—W. W.

JULIA (Ἰουλία, a name common among the Romans), a Christian woman of Rome, to whom St. Paul sent his salutations (Rom. xvi. 15); she is named with Philologus, and is supposed to have been his wife or sister.

JULIUS (Ἰούλιος), the centurion who had the charge of conducting Paul as a prisoner to Rome, and who treated him with much consideration and kindness on the way (Acts xxvii. 1, 3).

JUNIAS (Ἰουνίας), a person who is joined with Andronicus in Rom. xvi. 7: 'Salute Andronicus and Junias, my kinsmen and fellow-prisoners, who are of note among the apostles.' They were, doubtless, Jewish Christians.

JUSTIFICATION. Justification may be defined, in its theological sense, as the non-imputation of sin, and the imputation of righteousness. That there is a reciprocation between Christ and believers, *i. e.* in the *imputation* of their sins unto Him, and of His righteousness unto them; and that this forms the ground of the sinner's justification and acceptance with God, it will be the object of the following remarks to demonstrate.

The *vicarious* nature of the Redeemer's sufferings was set forth under the Mosaic dispensation by very significant types, one of the most expressive of which was the offering of the scapegoat: 'And Aaron shall lay his hands upon the head of the live goat, and confess over him all the iniquities of the children of Israel, and all their transgressions in all their sins, putting them

on the head of the goat, and the goat shall bear upon him all their iniquities' (Lev. xvi. 21, 22). Abarbinel, in the introduction to his commentary on Leviticus (*De Viel.* p. 301), represents this ceremony as a symbolical translation of the sins of the offender upon the head of the sacrifice, and as a way by which the evil due to his transgression was to be deprecated.

Nachmaindes also, commenting on Lev. i., observes, respecting the burnt-offerings and sacrifices for sin: 'It was right the offerer's own blood should be shed, and his body burnt, but that the Creator, in His mercy, hath accepted this victim from him as a *vicarious* substitute and atonement, that its blood should be poured out instead of his blood, and its life stand in place of his life.'

We are informed by Herodotus (ii. 39) that the practice of imprecating on the head of the victim the evils which the sacrificer wished to avert from himself was usual also amongst the heathen. The Egyptians, he adds, would not taste the head of any animal, but flung it into the river as an abomination.

If this type foreshadowed the vicarious nature of the sufferings and death of Christ—and who with the inspired comment of the author of the Epistle to the Hebrews before him can doubt this?—we may with confidence appeal also to the voice of prophecy, and the expositions of apostles, for the further illustration and enforcement of the same truth. The 53rd chapter of Isaiah is so full upon this point, that Bishop Louth says, 'This chapter declares the circumstances of our Saviour's sufferings so exactly, that it seems rather a history of His passion than a prophecy.' In verses 5 and 6 we are told that God 'laid upon Him the iniquities of us all, that by His stripes we might be healed'—that our sin was laid on Him, and He bare it (ver. 11). St. Paul, re-echoing the same truth, says, 'He was made sin for us who knew no sin, that we might be made the righteousness of God in Him' (2 Cor. v. 21). This is the reciprocation spoken of above. Again, in Rom. viii. 3, 4, the apostle informs us that God sent His own Son in the likeness of sinful flesh, and for sin condemned sin in the flesh, that the righteousness of the law might be fulfilled in us; that sin was made His, and he bore its penalty; His righteousness is forensically transferred to the believer, and he becomes a happy participator of its benefits. This, then, is the change in relation to God from which the soul of a convinced sinner can find peace. Before we notice the objections which have been, and still are, urged against this view of the question, we may inquire *how far* it is confirmed by the earliest and most eminently pious fathers of the Christian church.

Amongst these fathers none could have been better acquainted with the mind of St. Paul than the venerable Clement of Rome, inasmuch as he is honourably recorded by the apostle as one of his fellow-labourers in the Gospel whose names are written in the book of life (Philipp. iv. 3). Nothing can be more explicit than this writer is on the point of *forensic justifying righteousness*, and of *intrinsic sanctifying righteousness* (see Clem. Rom. *Epist. ad Corinth.* i. sect. 32, 33). Chrysostom's commentary on 2 Cor. (ch. v. *Hom.* 11) is also very expressive on this subject: 'What word, what speech is this, what mind can comprehend or speak it? for he saith, He made Him who was righteous to be made a sinner, that He might make sinners righteous; nor yet doth He say so neither, but that which is far more sublime and excellent. For He speaks not of an inclination or affection, but expresseth the quality itself. For He says not, He made Him a sinner, but sin, that we might be made not merely righteous, but righteousness, and that the righteousness of God, when we are justified not by works (for if we should, there must be no spot found in them), but by grace, whereby all sin is blotted out.'

Again, Justin Martyr (*Epist. ad Diognet.*) speaks to the same purpose: 'He gave His son a ransom for us; the holy for transgressors; the innocent for the guilty; the just for the unjust; the incorruptible for the corrupt; the immortal for mortals. For what else could hide our sins but His righteousness? In whom else could we wicked and ungodly ones be justified, or esteemed righteous, but in the Son of God alone? O sweet permutation or change! O unsearchable work, or curious operation! O blessed beneficence, exceeding all expectation! That the iniquity of many should be hid in one Just One, and the righteousness of one should justify many transgressors!'

So Gregory Nyssen (*Orat. II. in Cant.*) deserves notice: 'He hath transferred to Himself the filth of my sins, and communicated unto me His purity, and made me partaker of His beauty!'

Augustine also speaks to the same effect: 'He was sin that we might be righteousness, not our own, but the righteousness of God, not in ourselves, but in Him' (*Enchirid. ad Laurent.* c. 41).

As our limits will not admit of more quotations from those who are usually designated 'the fathers of the church,' we must refer the reader to Suicer's *Thesaurus*, tom. i. p. 900.

In accordance with the above expressed views of the fathers on the important doctrine of justification, is that which is taken by the church of England. Articles eleventh, twelfth, and thirteenth run thus:—

'We are accounted righteous before God, only for the merit of our Lord and Saviour Jesus Christ by faith, and not for our own works or deservings. Wherefore, that we are justified by faith only is a most wholesome doctrine, and very full of comfort, as more largely is expressed in the Homily of Justification.'

'Albeit that good works, which are the fruits of faith, and follow after justification, cannot put away our sins, and endure the severity of God's judgment; yet are they pleasing and acceptable to God in Christ, and do spring out necessarily of a true and lively faith, insomuch that by them a lively faith may be as evidently known as a tree discerned by the fruit.'

'Works done before the grace of Christ, and the inspiration of His Spirit, are not pleasant to God, forasmuch as they spring not of faith in Jesus Christ, neither do they make men meet to receive grace, or (as the School-authors say) deserve grace of congruity: yea, rather, for that they are not done as God hath willed and commanded them to be done, we doubt not but they have the nature of sin.'

The homily referred to in the eleventh article, under the title of the Homily of Justification, is styled in the first book of Homilies itself, 'A

Sermon of the Salvation of Mankind, by only Christ our Saviour, from sin and death everlasting.' In this sermon the reader will find strikingly set forth the inseparable connection there is between *justification* and *sanctification*, the one the cause, the other the effect.

It was this doctrine of justification which constituted the great ground of controversy between the reformers and the church of Rome (see Luther to Geo. Spenlein, *Epist.* Ann. 1516, tom. i.). That the reader may be able to see in a contrasted form the essential differences upon this head between the two churches, we subjoin what the Tridentine fathers have stated. In sess. vi. c. xvi. p. 54, they announce the views of their church on justification in the following language :—

'Jesus Christ, as the head into the members, and as the vine into the branches, perpetually causes His virtue to flow into the justified. This virtue always precedes, accompanies, and follows their good works; so that without it such good works could in nowise be acceptable to God, and bear the character of meritoriousness. Hence we must believe, that to the justified themselves nothing more is wanting which needs to prevent us from thinking both that they have satisfied the divine law, according to the state of this life, by those works which are performed in God; and also that, in their own time, provided they depart in grace, they truly merit the attainment of eternal life. Thus neither our own proper righteousness is so determined to be our own, as if it were from ourselves; nor is the righteousness of God either unknown or rejected. For that which is called our righteousness, because through its being inherent in us we are justified, that same is the righteousness of God, because it is infused into us by God through the merit of Christ. Far, however, be it from a Christian man that he should either trust or glory in himself, and not in the Lord; whose goodness to all is so great, that what are truly His gifts He willeth to be estimated as their merits.'

Such, so far as the justification and acceptance of man before God are concerned, is the doctrinal scheme of the church of Rome; and nothing can be more foreign than it is from the system set forth by the church of England. In the view of the latter, justification signifies making *just* in trial and judgment, as sanctification is making holy; but not making just by infusion of grace and holiness into a person, according to the view of the former, thus confounding justification and sanctification together. On the Protestant principle justification is not a real change of a sinner in himself, though a real change is annexed to it; but only a relative change in reference to God's judgment. Thus we find the word used in Rom. iii. 23, 24, 25, 26. In fine, the doctrine of Justification by Faith may be expressed in Scriptural language thus: 'All have sinned and come short of the glory of God; every mouth must be stopped, and all the world become guilty before God; therefore, by the deeds of the law there shall no flesh living be justified in His sight. But we are justified freely by His grace through the redemption which is in Christ Jesus, whom God hath set forth as a propitiation through faith in His blood, to declare His righteousness for the remission of sins that are past, through the forbearance of God. Where is boasting, then? It is excluded. By what law? of works? Nay: but by the law of faith. Therefore we conclude that a man is justified by faith without the deeds of the law.' For a full exposition of the differences between the two churches, see Möhler's *Symbolik*, translated from the German by Robertson.

We now come to notice the objections which may be urged against this view of justification.

1. It does not consist, say some, with the truth and holiness of God, that the *innocent* should suffer for the *guilty*. We answer, that it is no injustice, or cruelty, for an innocent person to suffer for the guilty, as Christ did, provided there be these conditions :—

1. That the person suffering be of the same nature with those for whom he suffers.
2. That he suffers of his own free will.
3. That he be able to sustain all that shall be laid upon him.
4. That a greater amount of glory redound to the divine attributes than if he had not so suffered. Now the Scriptures assure us that all these conditions were realized in the incarnate Saviour.

Bishop Butler (*Analogy*, ch. v.) has a striking answer to this objection. He shows that in the daily course of God's natural providence the innocent do often and constantly suffer for the guilty; and then argues that the Christian appointment against which this objection is taken, is not only of the same kind, but is even less open to exception, 'because, under the former, we are in many cases commanded, and even necessitated, whether we will or no, to suffer for the faults of others; whereas the sufferings of Christ were voluntary. The world's being under the righteous government of God does, indeed, imply that, finally, and upon the whole, every one shall receive according to his personal deserts; and the general doctrine of the whole Scripture is, that this shall be the completion of the divine government. But during the progress, and for aught we know, even in order to the completion of this moral scheme, vicarious punishments may be fit, and absolutely necessary. Men, by their follies, run themselves into extreme distress—into difficulties which would be absolutely fatal to them, were it not for the interposition and assistance of others. God commands by the law of nature that we afford them this assistance, in many cases where we cannot do it without very great pains, and labour, and sufferings to ourselves. And we see in what variety of ways one person's sufferings contribute to the relief of another, and how, or by what particular means, this comes to pass, or follows from the constitution or laws of nature which come under our notice, and, being familiarised with it, men are not shocked with it. So that the reason of their insisting upon objections of the foregoing kind against the satisfaction of Christ, is either that they do not consider God's settled and uniform appointments as His appointments at all, or else, they forget that vicarious punishment is a providential appointment of every day's experience; and then, from their being unacquainted with the more general laws of nature or divine government over the world, and not seeing how the sufferings of Christ could contribute to the redemption of it unless by arbitrary and tyrannical will, they conclude his sufferings could not contribute to it any other

way. And yet, what has been often alleged in justification of this doctrine, even from the apparent natural tendency of this method of our redemption—its tendencies to vindicate the authority of God's laws and deter his creatures from sin,—this has never yet been answered, and is, I think, plainly unanswerable.'

2. Again it is objected, if we are justified on receiving Christ by faith as the Lord our righteousness, and if this be the sole ground of salvation propounded by St. Paul, there is then a palpable discrepancy between him and St. James; for the former states, that a man is justified by faith without the deeds of the law (Rom. iii. 8; Gal. ii. 16); while the latter says, 'a man is justified by works and not by faith only' (James ii. 24). That there is a difficulty here there can be no question, and that it led Eusebius and Jerome, together with Luther and Erasmus, to question the authority of St. James's Epistle, is notorious to every reader of ecclesiastical history. The church of Rome builds her system of man being justified by reason of inherent righteousness, on the assumption that when St. Paul says 'by the deeds of the law shall no flesh be justified,' he means the *ceremonial* and not the *moral* law. In this way she would establish her own system of human merit, and harmonise the two apostles. But it is quite clear to the impartial reader of the Epistle to the Romans, that the scope of St. Paul's argument must include both the moral and the ceremonial law; for he proves both Jew and Gentile guilty before God, and this with the view of establishing the righteousness of faith in the imputed merits of Christ as the only ground of a sinner's salvation. Leaving, then, this sophistical reconcilement, we come to that which our Protestant divines propose. This is of a two-fold character, viz., first, by distinguishing the double sense of *justification*, which may be taken either for the absolution of a sinner in God's judgment, or for the declaration of his righteousness before men. This distinction is found in Scripture, in which the word *justify* is used in both acceptations. Thus St. Paul speaks of justification *in foro Dei;* St. James speaks of it *in foro hominis.* A man is justified by faith without works, saith the one; a man is justified by works, and not by faith only, declares the other. That this is the true solution of the difficulty appears from the fact that the two apostles draw their apparently opposite conclusions from the same example of *Abraham* (Rom. iv. 9-23; comp. James ii. 21-24).

'If Abraham were justified by works, he hath whereof to glory, but not before God. For what saith the Scripture? Abraham believed God, and it was imputed unto him for righteousness' (Rom. iv. 2, 3). Thus speaks St. Paul; yet St. James argues in manner following: 'Was not Abraham our father justified by works when he had offered Isaac his son upon the altar? Seest thou how faith wrought with his works; and from works faith was perfected? And the Scripture was fulfilled which saith, Abraham believed God, and it was counted unto him for righteousness. Ye see then how from works a man is justified, and not from faith only.'

Another mode of reconciling the apostles is by regarding *faith* in the double sense in which it is often found in Scripture. St. Paul, when he affirms that we are justified by faith only, speaks of that faith which is true and living, working by love. St. James, when he denies that a man is justified by faith only, disputes against that faith which is false and unproductive; when the true Christian, speaking to the hypocritical boaster of his faith, asks, 'Show me thy faith without thy works, and I will show thee my faith by my works.'

3. One objection more may be urged against this fundamental doctrine, that sinners are justified by the free grace of God through the imputed righteousness of the Redeemer, namely, that it weakens the obligations to *holiness* of life. This objection the apostle himself anticipates when he asks, 'What shall we say then? shall we continue in sin that grace may abound?' To which he answers by rejecting the consequence with the utmost abhorrence, and in the strongest manner affirming it to be without any foundation. 'How shall we,' he continues, 'that are dead to sin, live any longer therein?' (Rom. vi. 1-2). He who expects justification by the imputed righteousness of Christ, has the clearest and strongest convictions of the obligation of the law of God, and of its extent and purity. He sees in the vicarious sufferings of his Saviour the awful nature of sin and the infinite love of God; and this love of God, being thus manifested, constrains him to deny ungodliness and worldly lusts, and to live soberly, righteously, and godly in this world. In a word, he loves *much* because he feels that God hath forgiven him much, because the love of God is shed abroad in his heart by the Holy Ghost which is given unto him. What a practical illustration have we of this in the life of the great apostle of the Gentiles himself? (See further on this subject the several treatises on Justification by Hooker; Winterspoon, vol. i.; Anthony Burgess, Lond. 1655; Wm. Pemble, Oxon. 1629; Faber, Lond. 1839; Walter Marshall, Lond. 1692).—J. W. D.

1. JUSTUS (Ἰοῦστος), surnamed Barsabas. [JOSEPH.]

2. JUSTUS, a Christian at Corinth, with whom Paul lodged (Acts xviii. 7).

3. JUSTUS, called also JESUS, a believing Jew, who was with Paul at Rome when he wrote to the Colossians (Col. iv. 11). The apostle names him and Marcus as being at that time his only fellow-labourers.

K.

KABBALAH (קַבָּלָה, from קבל, *to receive*). This word is an abstract, and means *reception*, a doctrine received by oral transmission; so that with mere reference to its etymological signification, it is the correlate of מְסוֹרָה, *tradition*. The term Kabbalah is employed in the Jewish writings to denote several traditional doctrines, as, for example, that which constituted the creed of the patriarchal age before the giving of the law; that unwritten ritual interpretation which the Jews believe was revealed by God to Moses on the mount, and which was at length committed to writing and formed the Mishnah. Besides being applied to these and other similar traditions, it has also been used in, comparatively speaking, modern times, to denote a singular mystical mode

of interpreting the Old Testament, in which sense only it forms the subject of the present article.

This Kabbalah is an art of eliciting mysteries from the words and letters of the Old Testament by means of some subtle devices of interpretation, or it is an abstruse theosophical and metaphysical doctrine containing the traditional arcana of the remotest times. It is of two kinds, practical * and speculative (מעשׂית and עיונית). The speculative Kabbalah, to which we confine ourselves, is again subdivided into the artificial and inartificial, which correspond to the terms of our definition.

The artificial Kabbalah, which is so called because it is a system of interpretation the application of which is bound by certain rules, is divided into three species. The first, Gematria (גימטריא, from the Greek γεωμετρία, but used in a wider sense), is the arithmetical mode of interpretation, in which the letters of a word are regarded with reference to their value as numeral signs, and a word is explained by another whose united letters produce the same sum. For example, the word *Shiloh* (שילה, Gen. xlix. 10), the letters of which amount, when considered as numerals, to 358, is explained to be *Messiah* (משיח), because they are both numerically equivalent, and the three Targums have actually so rendered it. The second species, Temurah (תמורה, *permutation*), is the mode by which one word is transformed into another different one by the transposition or systematic interchange of their letters; as when מלאכי, *my angel* (Exod. xxiii. 23), is made into מיכאל, *Michael*. The kinds of commutation described in the article Atbach also belong to this species. The third species, Notarikon (נוטריקון, from the Latin *notare*), is that in which some or all of the letters of a word are considered to be signs denoting other words of which they are the initials, and is of two kinds. In the one, either the *initial* or the *final* letter of two or more words occurring together in the Old Testament are combined to form one new word, as when מכבי, *Maccabee*, is made out of מי כמוך באלים יהוה (Exod. xv. 11); or when the divine name יהוה is extracted from לי מה שׁמו מה (Exod. iii. 13). In the other, the several letters of one word are taken in *their series* to be the initials of several other words, as when אדם is explained by מרה, דם, אפר, *dust, blood, gall*.

The inartificial or dogmatical Kabbalah consists solely of a traditional doctrine on things divine and metaphysical, propounded in a symbolical form. It treats principally of the mysteries of the doctrine of emanation, of angels and spirits, of the four Kabbalistical worlds, and of the ten Sephiroth or so-called Kabbalistic tree. It is a system made up of elements which are also found in the Magian doctrine of emanation, in the Pythagorean theory of numbers, in the philosophy of the later Platonists, and in the tenets of the Gnostics; but these doctrines are here stated with enigmatical obscurity, and without the coherence and development of a single and entire scheme. Its general tenor may be conceived from the eminent prerogatives which it assigns to the law, and from the consequent latitude of interpretation. Thus, it is argued in the book of Sohar: 'Alas for the man who thinks that the law contains nothing but what appears on its surface; for, if that were true, there would be men in our day who could excel it. But the law assumed a body; for if angels are obliged, when they descend to this world, to assume a body in order that they may subsist in the world, and it be able to receive them, how much more necessary was it that the law, which created them and which was the instrument by which the world was created, should be invested with a body in order that it might be adapted to the comprehension of man? That body is a history, in which if any man think there is not a soul, let him have no part in the life to come.' Manasseh-ben-Israel, who makes this citation from the book of Sohar, enforces this view with many arguments (*Conciliator*, Amstelod. 1633, p. 169).

The ten Sephiroth have been represented in three different forms, all of which may be seen in H. More's *Opera Philos.* i. 423; and one of which, although not the most usual one, has been already given in the article God. The Sephiroth have been the theme of endless discussion; and it has even been disputed whether they are designed to express theological, philosophical, or physical mysteries. The Jews themselves generally regard them as the sum and substance of Kabbalistical theology, as indicating the emanating grades and order of efflux according to which the nature and manifested operation of the Supreme Being may be comprehended. Several Christian scholars have discerned in them the mysteries of their own faith, the trinity, and the incarnation of the Messiah.* In this they have received some sanction by the fact noticed by Wolf, that most learned Jewish converts endeavour to demonstrate the truth of Christianity out of the doctrines of the Kabbalah (*Biblioth. Hebr.* i. 360). The majority of all parties appear to concur in considering the first three Sephiroth to belong to the essence of God, and the last seven to denote his attributes, or modes of existence. The following treatises on this subject

* It may suffice for our present purpose merely to notice the existence of the *practical* Kabbalah, which differs little from magic. He who is curious in such things will find one of the fullest details of the portentous miracles which are said to have been effected by its agency in Edzard's edition of the second chapter of the tract *Abodah Zarah*, p. 346, sq.

* It is worth while to adduce the words of Count G. Pico della Mirandola, as cited in Hottinger's *Thesaurus Philologicus*, p. 439: 'Hos ego libros non mediocri impensa mihi cum comparassem, summa diligentia, indefessis laboribus cum perlegissem, vidi in illis (testis est Deus) religionem non tam Mosaicam, quam Christianam. Ibi Trinitatis mysterium, ibi Verbi incarnatio, ibi Messiæ divinitas, ibi de peccato originali, de illius per Christum expiatione, de cœlesti Hierusalem, de casu dæmonum, de ordinibus angelorum, de purgatoriis, de inferorum pœnis: eadem legi, quæ apud Paulum et Dionysium, apud Hieronymum et Augustinum quotidie legimus .... In plenum, nulla est ferme de re nobis cum Hebræis controversia, de qua ex libris Cabbalistarum ita redargui convincique non possint, ut ne angulus quidem reliquus sit, in quem se condant.'

are among the most remarkable: a dissertation by Rhenferd, *De Stylo Apocalypseos Cabbalistico*, in Danz's *Nov. Test. ex Talmude illust.* p. 1090, in which he endeavours to point out many extraordinary coincidences between the theosophy of the Kabbalah and the book of Revelation (which may be compared with an essay of similar tendency in Eichhorn's *Bibl. Biblioth.* iii. 191); and a dissertation by Vitringa, *De Sephiroth Kabbalistarum*, in his *Observat. Sacr.* i. 126, in which he first showed how the Sephiroth accorded with the human form.

The origin of the Kabbalah is involved in great obscurity. The Jews ascribe it to Adam, or to Abraham, or to Moses, or to Ezra; the last being apparently countenanced by 2 Esdras xiv. 20-48. The opinions of Christian writers are as variously divided; and the Kabbalah is such a complex whole, and has been aggregated together at such distant periods, that no general judgment can apply to it. Their opinions need only be noticed in their extremes. Thus, on the one hand, Rhenferd and others maintain that the Jewish church possessed, in its inartificial Kabbalah, an ancient unwritten traditional doctrine, by which they were instructed that the types and symbols of the Mosaic dispensation were (to use Luther's words) but the manger and the swaddling-clothes in which the Messiah lay—of which genuine doctrine, however, they nevertheless believe our present Kabbalah to contain only fragments amidst a mass of Gentile additions. On the other hand, Eichhorn accounts for the origin of that important part of this Kabbalah, the system of allegorical interpretation (by which their occult doctrine was either generated, or, if not, at least brought into harmony with the law), by supposing that the Jews adopted it immediately from the Greeks. According to him, when the Jews were brought into contact with the enlightened speculations of the Greek philosophers, they felt that their law (as they had hitherto interpreted it) was so far behind the wisdom of the Gentiles, that—both to vindicate its honour in the eyes of the scoffing heathen, as well as to reconcile their newly adopted philosophical convictions with their ancient creed—they borrowed from the Greek allegorizers of Homer the same art of interpretation, and applied it to conjure away the unacceptable sense or the letter, or to extort another sense which harmonized with the philosophy of the age (*Bibl. Biblioth.* v. 237, sq.).

Both these opinions, however, coincide at a certain point, in assuming that the Jews did adopt the doctrines of Gentile philosophy; and a wide field is open for conjectures as to the particular sources from which the several elements of the Kabbalah have been derived. Thus, whether the Persian religion, in which the doctrine of emanation is so prominent (the *zeruane akerene*, or *infinite time*, being the אין סוף of the Sephiroth), supplied that theory to the Jews during the Babylonian captivity; or whether it was borrowed from any other scheme containing that doctrine, down as late as the origin of Gnosticism; or even whether, as H. More asserts, the Kabbalah itself is the primitive fountain from which the Gentiles have themselves drawn—these, and the many such questions which could be raised about the origin of the other Kabbalistic doctrines, can only receive a probable solution.

However these matters may be decided, the date of the most important works in which the doctrine of the Kabbalah is contained may be brought to a nearer certainty. Of these the book Jezirah (יצירה, *creation*), which is the oldest of them, and which is attributed to the patriarch Abraham, cannot be credibly ascribed to any earlier author than the Rabbi Akibah, who lived in the first century of our era; but the cautious Wolf thinks that it is prudent not to insist on any earlier or more precise date for it than that it was written before the completion of the Talmud, as it is cited in the treatise Sanhedrin. It has often been printed; as by Rittangel, a converted Jew, with a Latin version and notes, Amsterd. 1642, 4to.; and, more recently, with a German version, notes, and a glossary, by J. F. von Meyer, Leipz. 1830, 4to. The obscure book of Sohar (זוהר, *splendour*), which has been called the Bible of the Kabbalists, is ascribed to Simeon ben Jochai, who was a pupil of R. Akibah; but the earliest mention of its existence occurs in the year 1290; and the anachronisms of its style, and of the facts referred to, together with the circumstance that it speaks of the vowel-points and other Masoretic inventions, which are clearly posterior to the Talmud, justify J. Morinus (although too often extravagant in his wilful attempts to depreciate the antiquity of the later Jewish writings) in asserting that the author could not have lived much before the year 1000 of the Christian era (*Exercitationes Biblicæ*, pp. 358-369). The best edition of the book of Sohar is that by Baron C. von Rosenroth, with Jewish commentaries, Sulzbach, 1684, fol., to which his rare *Cabbala Denudata*, 1677-1684, 4to., forms an ample introduction.

Wolf has given an extended account of the Kabbalah, and of the numerous manuscripts and printed Jewish works in which its principles are contained, as well as abundant references to Christian authors who have treated of it (*Biblioth. Hebr.* ii. 1191, sq.). The work of P. Beer (*Geschichte der Lehren aller Secten der Juden, und der Cabbala*, Brünn, 1822, 2 vols. 8vo.), which is mentioned with approbation, has not been available for this article.—J. N.

KADESH (קָדֵשׁ; Sept. Καδής), or KADESH-BARNEA, a site on the south-eastern border of the Promised Land towards Edom, of much interest as being the point at which the Israelites twice encamped with the intention of entering Palestine, and from which they were twice sent back; the first time in pursuance of their sentence to wander forty years in the wilderness, and the second time from the refusal of the king of Edom to permit a passage through his territories. It was from Kadesh that the spies entered Palestine by ascending the mountains; and the murmuring Israelites afterwards attempting to do the same were driven back by the Amalekites and Canaanites, and afterwards apparently by the king of Arad, as far as Hormah, then called Zephath (Num. xiii. 17; xiv. 40-45; xxi. 1-3; Deut. i. 41-44; comp. Josh. x. 7). There was also at Kadesh a fountain (Kadesh-mishpat) mentioned long before the exode of the Israelites (Gen. xiv. 7), and the miraculous supply of water took place only on the second visit, which implies that at the first there was no lack of this necessary article. After this Moses sent messengers to the

king of Edom, informing him that they were in Kadesh, a city in the uttermost part of his border, and asking leave to pass through his country, so as to continue their course round Moab, and approach Palestine from the East. This Edom refused, and the Israelites accordingly marched to Mount Hor, where Aaron died; and then along the Arabah (desert of Zin) to the Red Sea (Num. xx. 14-29). The name of Kadesh again occurs in describing the southern quarter of Judah, the line defining which is drawn 'from the shore of the Salt Sea, from the bay that looked southward; and it went out to the south side of Akrabbim, and passed along to Zin, and ascended up on the south side to Kadesh-barnea' (Josh. xv. 1-3; comp. Num. xxxiv. 3, 4).

From these intimations the map-makers, who found it difficult to reconcile them with the place usually assigned to Kadesh (in the desert about midway between the Mediterranean and Dead Sea), were in the habit of placing a second Kadesh nearer the Dead Sea and the Wady Arabah. It was left for the editor of the *Pictorial Bible* to show (Note on Num. xx. 1) that one Kadesh would sufficiently answer all the conditions required, by being placed more to the south, nearer to Mount Hor, on the west border of the Wady Arabah, than this second Kadesh. The gist of the argument lies in the following passage:—'We conclude that there is but one Kadesh mentioned in Scripture, and that the difficulties which have seemed to require that there should be a second or even a third place of the name, may be easily and effectually obviated by altering the position commonly assigned to Kadesh-barnea, that is, the Kadesh from which the spies were sent in the fifteenth chapter, and from which the wanderings commenced. We are at perfect liberty to make this alteration, because nothing whatever is distinctly known of such a place, and its position has been entirely fixed upon conjectural probabilities. But being once fixed, it has generally been received and reasoned upon as a truth, and it has been thought better to create another Kadesh to meet the difficulties which this location occasioned, than to disturb old maps and old topographical doctrines. Kadesh is usually placed within or close upon the southern frontier of Palestine, about midway between the Dead Sea and the Mediterranean. This location would seem in itself improbable without strong counter-reasons in its favour. For we do not find that a hostile people, when not prepared for immediate action, confront themselves directly with their enemies, but encamp at some considerable distance and send scouts and spies to reconnoitre the country; nor is it by any means likely that they would remain so long at Kadesh as they seem to have done at their first visit, if they had been in the very face of their enemies, as must have been the case in the assigned position. We should, therefore, on this ground alone, be inclined to place Kadesh more to the south or south-east than this. Besides, if this were Kadesh, how could Kadesh be on the borders of Edom, seeing that the Edomites did not, till many centuries later, occupy the country to the south of Canaan, and were at this time confined to the region of Seir? Moreover, from a Kadesh so far to the north they were not likely to send to the king of Edom without moving down towards the place where they hoped to obtain permission to cross Mount Seir, particularly as by so moving they would at the same time be making progress towards the point which the refusal of the Edomites would oblige them to pass, and which they actually did pass. Therefore, the stay of the host at Kadesh, waiting for the king's answer, seems to imply that Kadesh was so near as not to make it worth while to move till they knew the result of their application to him. Further, we read in ch. xxxiii., xxxvi., after an enumeration of distances of manifestly no great length, that in the present instance (the second) the move to Kadesh was Eziongeber, at the head of the Gulf of Akabah, the distance between which and the Kadesh of the maps is about 120 miles; and this is the consideration which has chiefly influenced those who have determined that there must have been two places of the name. And we must confess that while thinking over the other reasons which have been stated we were, for a time, inclined to consider them as leading to that conclusion, and that the second Kadesh must have been very near Mount Hor. And this impression (as to Kadesh being near Mount Hor) was confirmed when, happening to find that Eusebius describes the tomb of Miriam (who died at Kadesh), being still in his time shown at Kadesh, *near Petra, the capital of Arabia Petræa*, we perceived it important to ascertain where this author fixed Petra, since one account places this city more to the north than another; and we found that he places Petra near Mount Hor, on which Aaron died and was buried; and consequently the Kadesh of Num. xx. 1, where Miriam died and was buried, must, in the view of Eusebius, have been at no very great distance from Mount Hor.'

Other arguments are adduced to show that if there were two Kadeshes, the one of the second journey must have been in the position indicated, and that *one* in this position would answer all the demands of Scripture. According to these views Kadesh was laid down in the map (in the *Illuminated Atlas*) prepared under the writer's direction, in the same line, and not far from the place which has since been assigned to it from actual observation by Dr. Robinson. This concurrence of different lines of research in the same result is curious and valuable, and the position of Kadesh will be regarded as now scarcely open to dispute. It was clear that the discovery of the fountain in the northern part of the great valley would go far to fix the question. Robinson accordingly discovered a fountain called Ain el-Weibeh, which is even at this day the most frequented watering-place in all the Arabah, and he was struck by the entire adaptedness of the site to the Scriptural account of the proceedings of the Israelites on their second arrival at Kadesh. 'Over against us lay the land of Edom; we were in its uttermost border; and the great Wady el-Ghuweir afforded a direct and easy passage through the mountains to the table-land above, which was directly before us; while further in the south Mount Hor formed a prominent and striking object, at the distance of two good days' journey for such a host' (*Bib. Researches*, ii. 538). Further on (p. 610) he adds: 'There the Israelites would have Mount Hor in the S.S.E. towering directly before them

. . . . in the N.W. rises the mountain by which they attempted to ascend to Palestine, with the pass still called Sufah (Zephath); while further north we find also Tell Arad, marking the site of the ancient Arad. To all this comes then the vicinity of the southern bay of the Dead Sea, the line of cliffs or offset separating the Ghôr from the Arabah, answering to the ascent of Akrabbim; and the desert of Zin, with the place of the same name between Akrabbim and Kadesh, not improbably at the water of Hasb, in the Arabah. In this way all becomes easy and natural, and the Scriptural account is entirely accordant with the character of the country.'

KADMONITES (קַדְמֹנִי; Sept. Κεδμωναῖοι), one of the nations of Canaan, which is supposed to have dwelt in the north-east part of Palestine, under Mount Hermon, at the time that Abraham sojourned in the land (Gen. xv. 19). As the name is derived from קדם *kedem*, which means 'east,' it is supposed by Dr. Wells and others to denote '*an eastern* people,' and that they were situated to the east of the Jordan, or rather that it was a term applied collectively, like 'Easterns,' or 'Orientals,' to all the people living in the countries beyond that river. To this opinion we incline, as the Kadmonites are not elsewhere mentioned as a distinct nation; and the subsequent discontinuance of the term, in the assigned acceptation, may be easily accounted for, by the nations beyond the river having afterwards become more distinctly known, so as to be mentioned by their several distinctive names. The reader may see much ingenious trifling respecting this name in Bochart (*Canaan*, i. 19); the substance of which is, that Cadmus, the founder of Thebes, in Bœotia, was originally a Kadmonite, and that the name of his wife Hermione, was derived from Mount Hermon.

KALI (קָלִי, קָלְיָא). This word occurs in several passages of the Old Testament, in all of which, in the Authorized Version, it is translated *parched corn*. The correctness of this translation has not, however, been assented to by all commentators. Thus, as Celsius (*Hierobot.* ii. 231) says, 'Syrus interpres, Onkelos, et Jonathan Ebræa voce utuntur, Lev. xxiii. 14; 1 Sam. xvii. 17; xxv. 18; 2 Sam. xvii. 28.' Arias Montanus and others, he adds, render *kali* by the word *tostum*, considering it to be derived from קָלָה, which in the Hebrew signifies *torrere*, 'to toast' or 'parch.' So in the Arabic قلي *kali* signifies anything cooked in a frying-pan, and is applied to the common Indian dish which by Europeans is called currie or curry. قالي *kalee*, and قلا *kalla* signify one that fries, or a cook. From the same root is supposed to be derived the word *kali* or *al'kali*, now so familiarly known as alkali, which is obtained from the ashes of burnt vegetables. But as, in the various passages of Scripture where it occurs, *kali* is without any adjunct, different opinions have been entertained respecting the substance which is to be understood as having been toasted or parched. By some it is supposed to have been corn in general; by others, only wheat. Some Hebrew writers maintain that flour or meal, and others, that *parched meal*, is intended, as in the passage of Ruth ii. 14, where the Septuagint translates *kali* by ἄλφιτον, and the Vulgate by *polenta*. A difficulty, however, occurs in the case of 2 Sam. xvii. 28, where the word occurs twice in the same verse. We are told that Shobi and others, on David's arrival at Mahanaim, in the further limit of the tribe of Gad, 'brought beds, and basins, and earthen vessels, and wheat, and barley, and flour, and *parched corn* (kali), and beans, and lentils, and *parched pulse* (kali), and honey, and butter, and sheep, and cheese of kine, for David and for the people that were with him to eat.' This is a striking representation of what may be seen every day in the East: when a traveller arrives at a village, the common light beds of the country are brought him, as well as earthen pots, with food of different kinds. The meaning of the above passage is explained by the statement of Hebrew writers, that there are two kinds of kali—one made of *parched corn*, the other of *parched pulse;* or, according to R. Salomon, *ex Avoda Zarah*, fol. xxxviii. 2, as quoted by Celsius (ii. 233), 'Dicunt Rabbini nostri, duas diversas species kali debere hic intelligi. Nam duplicis generis schetitam adduxerat Barsillai Davidi; unum e tritico, et alterum e lentibus, sicut (*in textu*) dicitur: *farinam et kali:* et hæc fuit e tritico. *Fabas, et lentes, et kali:* hæc fuit e speciebus leguminum, quæ arefecerant in fornace, utpote viridia et dulcia. Postea molebant ea, et faciebant ex illis cibum, quam vocabant שחית.'

There is no doubt that in the East a little meal, either parched or not, mixed with a little water, often constitutes the dinner of the natives, especially of those engaged in laborious occupations, as boatmen while dragging their vessels up rivers, and unable to make any long delay. Another principal preparation, much and constantly in use in Western Asia, is *burgoul*, that is, corn first boiled, then bruised in the mill to take the husk off, and afterwards dried or parched in the sun. In this state it is preserved for use, and employed for the same purposes as rice. The meal of parched corn is also much used, particularly by travellers, who mix it with honey, butter, and spices, and so eat it; or else mix it with water only, and drink it as a draught, the refrigerating and satisfying qualities of which they justly extol (*Pictorial Bible*, ii. p. 537). Parched grain is also, no doubt, very common. Thus, in the bazaars of India not only may rice be obtained in a parched state, but also the seeds of the *Nymphæa*, and of the *Nelumbsium Speciosum*, or bean of Pythagoras, and most abundantly the pulse called *gram* by the English, on which their cattle are chiefly fed. This is the *Cicer Arietinum* of botanists, or chick-pea, which is common even in Egypt and the south of Europe, and may be obtained everywhere in India in a parched state, under the name of *chebenne*. We know not whether it be the same pulse that is mentioned in the article Dove's Dung, a sort of pulse or pea, which appears to have been very common in Judæa. Belon (*Observat.* ii. 53) informs us that large quantities of it are parched and dried, and stored in magazines at Cairo and Damascus. It is much used during journeys, and particularly by the great pilgrim caravans to Mecca.

Considering all these points, it does not appear to us by any means certain that *kali* is correctly translated 'parched corn,' in all the passages of Scripture. Thus, in Lev. xxiii. 14: 'Ye shall eat neither bread, nor parched corn (kali), nor green ears, until....'. So in Ruth ii. 14, 'And he (Boaz) reached her *parched corn* (kali), and she did eat.' 1 Sam. xvii. 17: 'Take now for thy brethren an ephah of *parched corn*.' And again, xxv. 18, where five measures of parched corn are mentioned. Bochart says (*Hieroz.* part ii. lib. i. c. 7) 'kali ab Hieronymo redditur *frixum cicer*;' and to show that it was the practice among the ancients to parch the cicer, he quotes Plautus (*Bacch.* iv. 5. 7): 'Tam frictum ego illum reddam, quam frictum est cicer;' also Horace (*De Arte Poetica, l.* 249) and others: and shows from the writings of the Rabbins, that *kali* was also applied to some kind of pulse. 'Kali sunt leguminum species, quæ adhuc recentia in furno exsiccantur, et semper manent dulcia et commoluntur, et fit ex iis cibus quem vocant *sethith*' (R. Selomo). The name *kali* seems, moreover, to have been widely spread through Asiatic countries. Thus in Shakspeare's *Hindee Dictionary*, قلاي *kalae*, from the Sanscrit कलाय translated *pulse* — leguminous seeds in general. The present writer found it applied in the Himalayas to the common field-pea, and has thus mentioned it elsewhere: '*Pisum arvense*. Cultivated in the Himalayas, also in the plains of north-west India, found wild in the Khadie of the Jumna, near Delhi; the *corra muttur* of the natives, called *Kullae* in the hills' (*Illust. of Himalayan Botany*, p. 200). Hence we are disposed to consider the pea, or the chick-pea, as more correct than parched corn in some of the above passages of Scripture.—J. F. R.

KANEH (קָנֶה) occurs in several places of the Old Testament, in all of which, in the Authorized Version, it is translated *reed;* as in 1 Kings xiv. 15; 2 Kings xviii. 21; Job xl. 21; Isa. xix. 6; xxxv. 7; xxxvi. 6; xlii. 3; Ezek. xxix. 6. The Hebrew *Kaneh* would seem to be the original of the Greek κάννα, the Latin *canna*, and the modern *canna, canne, cane*, &c., signifying a 'reed' or 'cane,' also a fence or mat made of reeds or rushes: the Latin word also denotes the sugar-cane, a pipe, &c. Hence the term appears to have been used in a general sense in ancient as well as in modern times. Thus we find in Hakluyt, 'Then they pricke him (the elephant) with sharp *canes*;' Milton (*Par. Lost.* iii. 439) describes the Tatars as driving—

'With sails and wind their cany waggons light;'

Grainger also, when referring to the Indians, as described by Lucan, says 'That sucke sweete liquor from their sugar-canes.' In later times the term cane has been applied more particularly to the stems of the *Calamus Rotang*, and other species of rattan canes, which we have good grounds for believing were unknown to the ancients, notwithstanding the opinion of Sprengel (*Hist. Rei Herb.* i. 171), 'Ctesias duo genera καλάμου facit, marem sine medulla et feminam eo præditam, hanc sine dubio *Calamum Rotang*, illam *Bambusam* nostram. Repetit ea Plinius (xvi. 36).'

The Greek word κάλαμος appears to have been considered the proper equivalent for the Hebrew *Kaneh*, being the term used by St. Matthew (xii. 20), when quoting the words of Isaiah (xlii. 3), 'A bruised *reed* (Kaneh) shall he not break.' The Greek word Latinized is well known in the forms of *calamus* and *culmus*. Both seem to have been derived from the Arabic قلم *kalm*, signifying a 'reed' or 'pen,' and forming numerous compounds, with the latter signification, in the languages of the East. It also denotes a weaver's reed, and even cuttings of trees for planting or grafting. Or they may all be derived from the Sanscrit कलम *kalm*, having the same signification. The German *halm*, and the English *haulm*, usually applied to the straw or stems of grasses, would seem to have the same origin. The Greek κάλαμος, and the Latin *calamus*, were used with as wide a signification as the Oriental *kalm*, and denoted a reed, the stalk or stem of corn, or anything made therefrom, as a pen, an arrow, a reed-pipe. Κάλαμος is also applied to any plant which is neither shrub, bush (ὕλη), nor tree (δένδρον) (*vid.* Liddell and Scott's *Greek Lex.*). So *calamus* means any twig, sprig, or scion. Thus Pliny (xvi. 14. 24), 'ipsique in eo medullæ calamum imprimebant;' and in India we every day hear the expression 'kalm lugana,' *i. e.* 'to apply' or 'fix' a graft. Pliny (xxiv. 14. 75), speaking of the *Rubus*, or bramble, says, 'Rarioribus calamis innocentioribusque, sub arborum umbra nascens.'

Such references to the meaning of these words in different languages, may appear to have little relation to our present subject; but κάλαμος occurs very frequently in the New Testament, and apparently with the same latitude of meaning: thus, in the sense of a reed or culm of a grass, Matt. xi. 7; Luke vii. 24, 'A reed shaken by the wind;' of a pen, in 3 John 13, 'But I will not with *pen* (κάλαμος) and ink write unto thee;' Matt. xxvii. 29, 'Put a reed in his right hand;' ver. 30, 'took the reed and smote him on the head;' and in Mark xv. 19, it may mean a reed or twig of any kind. So also in Matt. xxvii. 48, and Mark xv. 36, where it is said that they filled a sponge with vinegar, and put it on a *reed*, while in the parallel passage, John xix. 29, it is said that they filled a sponge with vinegar, and put it upon *hyssop*, and put it to his mouth. From which it is probable that the term κάλαμος was applied by both the Evangelists to the stem of the plant named hyssop, whatever this may have been, in like manner as Pliny applied the term *Calamus* to the stem of a bramble.

In most of the passages of the Old Testament the word *Kaneh* seems to be applied strictly to reeds of different kinds growing in water, that is, to the hollow stems or culms of grasses, which are usually weak, easily shaken about by wind or by water, fragile, and breaking into sharp-pointed splinters. Thus in 1 Kings xiv. 15, 'As a reed is shaken in the water;' Job xl. 21, 'He lieth in the covert of the reed (*Kaneh*); Isa. xix. 6, 'And they shall turn the rivers far away; and the reeds and flags shall wither.' Also in ch. xxxv. 7; while in 2 Kings xviii. 21; Isa. xxxvi. 6; and Ezek. xxix. 7, there is reference to the weak and fragile nature of the reed, 'Lo,

thou trustest in the staff of this broken reed, on Egypt, whereon if a man lean, it will go into his hand, and pierce it.'

366. [Arundo donax.]

In order to determine what particular kinds of reed-like plants are intended in these several passages, the preferable mode is probably first to ascertain the plants to which the above names were applied by the Greeks and Romans, and particularly those which are indigenous in Syria and Egypt. Dioscorides describes the different kinds in his chapter περὶ καλάμου (i. 114). 1. Κάλαμος ὁ ναστός, or the *Arundo farcta*, of which arrows are made (*Arundo arenaria?*). 2. The female, of which reed pipes were made (*A. Donax?*). 3. Hollow, with frequent knots, fitted for writing, probably a species of *Saccharum*. 4. Thick and hollow, growing in rivers, which is called *donax*, and also *Cypria* (*Arundo Donax*). 5. *Phragmites* (*Arundo Phragmites*), slender, light-coloured, and well-known. 6. The reed called *Phleos* (*Arundo ampelodesmos Cyrillii*). (*Flora Neapol.* t. xii.). These are all described (*l. c.*) immediately before the Papyrus, while κάλαμος ἀρωματικός is described in a different part of the book, namely, in ch. 17, along with spices and perfumes. The Arabs describe the different kinds of reed under the head of قصب *Kusb*, or *Kussub*, of which they give *Kalamus*, as the synonymous Greek term. Under the head of *Kussub*, both the Bamboo and the Arundo are included as varieties, while *Kusb-al-Sukr* is the sugar-cane, or *Saccharum officinarum*, and *Kusb-el-Zurireh* appears to be the *Calamus aromaticus* (Kaneh-bosem). All these were, no doubt, partially known to the ancients. Pliny mentions what must have been the Bamboo, as to be seen of a large size in temples.

From the context of the several passages of Scripture in which *Kaneh* is mentioned, it is evident that it was a plant growing in water; and we have seen from the meaning of the word in other languages that it must have been applied to one of the true reeds; as for instance, *Arundo Ægyptiaca* (perhaps only a variety of *A. Donax*), mentioned by M. Bové as growing on the banks of the Nile; or it may have been the *Arundo isiaca* of Delile, which is closely allied to *A. Phragmites*, the *Canna* and *Canne* of the south of Europe, which has been already mentioned under Agmon.

In the New Testament κάλαμος seems to be applied chiefly to plants growing in dry and even barren situations, as in Luke vii. 24; 'What went ye into the wilderness to see? a reed shaken by the wind?' To such passages, some of the species of reed-like grasses, with slender stems and light flocculent inflorescence, formerly referred to *Saccharum*, but now separated as distinct genera, are well suited; as, for instance, *Imperata cylindrica* (*Arundo epigeios*, Forsk.), the *hulfeh* of the Arabs; which is found in such situations, as by Desfontaines in the north of Africa, by Delile in Lower Egypt, by Forskal near Cairo and Rosetta. Bové mentions that near Mount Sinai, 'Dans les déserts qui environnent ces montagnes, j'ai trouvé plusieurs Saccharum,' &c. In India, the natives employ the culm of different species of this genus for making their reed-pens and arrows.

Hence, as has already been suggested by Rosenmüller, the noun *Kaneh* ought to be restricted to reeds, or reed-like grasses, while *Agmon* may indicate the more slender and delicate grasses or sedges growing in wet situations, but which are still tough enough to be made into ropes.—J. F. R.

KANEH BOSEM (קָנֶה בֹשֶׂם, 'reed of fragrance'), and Kaneh Hattob (קָנֶה חַטּוֹב, *calamus bonus*, 'good' or 'fragrant reed'), appear to have reference to the same substance. It is mentioned under the name of *kaneh bosem* in Exod. xxx. 23, and under that of *kaneh hattob* in Jer. vi. 20. It is probably intended also by *kaneh* ('reed') simply in Cant. iv. 14; Isa. xliii. 24; and Ezek. xxvii. 17; as it is enumerated with other fragrant and aromatic substances. *Kaneh*, as we have seen in the preceding article, is probably the original of *canna*, κάλαμος being the Greek equivalent for both. Of all these the primary signification seems to have been the hollow stems of grasses. They were applied afterwards to things made of such stems. From the passages in which this sweet cane or *calamus* is mentioned we learn that it was fragrant and reed-like, and that it was brought from a far country (Jer. vi. 20; Ezek. xxvii. 19): Dan also and Javan going to and fro carried bright iron, cassia, and calamus to the markets of Tyre.

If we recur to the method which we have adopted in other cases, of examining the writings of ancient heathen authors, to ascertain if they describe anything like the substances noticed in the sacred writings, we shall experience no difficulty in identifying the 'sweet cane, or reed, from

a far country.' For though the common reeds are described by Dioscorides, in book i. c. 114, we find in a very different part of the same book, namely, in c. 17, a *κάλαμος ἀρωματικός*, described among the *aromata*, immediately after *Σχοῖνος*.

367. [Andropogon calamus aromaticus.]

It is stated to be a produce of India, of a tawny colour, much jointed, breaking into splinters, and having the hollow stem filled with pith, like the web of a spider; also that it is mixed with ointments and fumigations on account of its odour. Hippocrates was acquainted with apparently the same substance, which he calls *κάλαμος εὐώδης* and *σχοῖνος εὔοσμος*, also *κάλαμος σχοῖνος*: though it is impossible to say that the *σχοῖνος* of Dioscorides, or schœnanthus, is not intended by some of these names. Theophrastus describes both the calamus and schœnus as natives of Syria, or more precisely, of a valley between Mount Lebanon and a small mountain, where there is a plain and a lake, in parts of which there is a marsh, where they are produced, the smell being perceived by any one entering the place. This account is virtually followed by Pliny, though he also mentions the sweet calamus as a produce of Arabia. A writer in the *Gardener's Chronicle* (ii. 756) has adduced a passage from Polybius (v. 46), as elucidating the foregoing statement of Theophrastus: 'From Laodicea Antiochus marched with all his army, and having passed the desert, entered a close and narrow valley, which lies between the Libanus and Anti-Libanus, and is called the Vale of Marsyas. The narrowest part of the valley is covered by a lake with marshy ground, *from whence are gathered aromatic reeds, ἐξ ὧν ὁ μυρεψικὸς κείρεται κάλαμος.*' A British officer who had an opportunity of examining this locality writes thus from Beyrout, 6th Feb. 1842: 'Further down, about twenty miles, the vale of Marsyas, or the vale of Baalbec, becomes much narrower, and about four miles south of Zachli the ground is now very marshy, and intersected with endless ditches to draw off the water. Here formerly there might have been a large lake. This is the narrowest part of the valley, and is covered with reeds, but whether aromatic or not I cannot say.' Among the ancient authorities Strabo ought not to be omitted. He mentions that the calamus grows in the country of the Sabæi (xvi. 4); but speaking of Cœle-Syria and its mountains, Libanus and Anti-Libanus, he says (xvi. 2), 'It is intersected by rivers, irrigating a rich country, abounding in all things. It also contains a lake, which produces the aromatic rush (*σχοῖνος*) and reed (*κάλαμος*). There are also marshes. The lake is called Gennesaritis. The balsam also grows here.' But how little dependence is to be placed upon the statements of those who do not pay special attention to the localities of plants, might be made evident by quotations from several modern authors, who often mistake the last place of export for the native country of a plant, and sometimes even place in the Old World plants which are only found in America. Rauwolff even, who was so good and intelligent an observer, on leaving Mount Libanus, says, 'I was also informed of others, viz. of the *costus Syriacus*, which they still know by the name of *chast*, and is found about Antiochia; and not far off from thence is also found the *nux vomica*, as some esteem them, by the inhabitants called *cutschula*, which, together with a great many other famous ones, I might have obtained, if I could have had a true, faithful, and experienced guide.' It is hardly necessary to say that no guide would have availed him; because both the substances he mentions are articles of Indian commerce, about which there can be no mistake, as he has given us their Asiatic, in addition to their scientific names; for *chast* is no doubt the *koot* or *koost* of the Arabs, which has been traced within the last few years to the mountains which surround Cashmere, while the *nux vomica* is the produce of *strychnes nux vomica*, a native of the south of India, and there called *koochla*. A portion of the confusion respecting the native country of these Indian drugs, must be ascribed partly to the undue extension of the name Syria in ancient times, and partly to many Indian drugs making their way into Europe by the route of the caravans, or by the Persian Gulf and the Euphrates, across Syria, to the shores of the Mediterranean.

That there may be some moderately sweet-scented grass, or rush-like plant, such as the *Acorus Calamus* of botanists (long used as a substitute for the true calamus), in the flat country between Libanus and Anti-Libanus, is quite possible; but we have no proof of the fact. Burckhardt, in that situation, could find only ordinary rushes and reeds. Though Theophrastus, Polybius, and Strabo mention this locality as that producing the calamus, yet Strabo, Diodorus Siculus and others, even including Pliny, give Arabia, or the country of the Sabæans,

as that which produced the aromatic reed; while Dioscorides, the only author who writes expressly of the drugs known to the ancients, mentions it being the produce of India. Bochart argues against India being the sole country producing calamus, because he supposes that it could not have been open to commerce in those early times: 'Tamen solum in India crevisse non concesserim, cum *Mosis* ævo Judæis jam fuerit notus, ejusque adeo mentio fiat, Exod. xxx. 23. Indiam enim Judæis, aut vicinis gentibus, jam tum fuisse apertam, mihi non fit verisimile' (*Hieroz.* pars ii. lib. v. c. 6). Dr. Vincent, on the contrary (*Periplus of the Erythræan Sea*, ii. 365), says, 'So far as a private opinion is of weight, I am fully persuaded that this line of communication with the East is the oldest in the world—older than Moses or Abraham.' Indeed it is now generally acknowledged that India and Egypt must have had commercial intercourse during the flourishing state of the kingdom of the Pharaohs. For in this way only can we account for numerous Indian products being mentioned in the Bible, and for their being known to the early Greek writers. Many of these substances are treated of under their respective heads in this work.

The author of the present article, in his *Essay on the Antiquity of Hindoo Medicine*, p. 33, remarks, 'With this (that is, the true Spikenard or Nard) has often been confounded another far-famed aromatic of Eastern climes, that is, the true *calamus aromaticus*, *κάλαμος ἀρωματικὸς* of Dioscorides, said by him to grow in India. This he describes immediately after *σχοῖνος*, translated *juncus odoratus*, a produce of Africa and Arabia, and generally acknowledged by botanists to be the *andropogon schœnanthus*, or lemon-grass, a native both of Arabia and India, perhaps also of Africa. The *calamus aromaticus* immediately following this, stated to be also a native of India, and among other uses being mixed with ointments on account of its odour, appears to me to have been a plant allied to the former. There is no plant which more closely coincides with every thing that is required, that is, correspondence in description, analogy to *σχοῖνος*, the possession of remarkable fragrance and stimulant properties, being costly, and the produce of a far country, than the plant which yields the fragrant grass-oil of Namur (*Calcutta Med. Trans.* vol. i. p. 367). This oil has been already described by Mr. Hatchett (*On the Spikenard of the Ancients*), who refers it to *andropogon Iwarancusa*. It is derived, however, as appears by specimens in my possession, from a different plant; to which, believing it to be a new species, I have given the name of *andropogon calamus aromaticus*' (p. 34). 'This species is found in Central India, extends north as far as Delhi, and south to between the Godavery and Nagpore, where, according to Dr. Malcolmson, it is called spear-grass. The specimens which Mr. H. obtained from Mr. Swinton, I have had an opportunity of examining: they are identical with my own from the same part of India' (Royle, *Illust. Himal. Bot.* p. 425).

As this plant is a true grass, it has necessarily reed-like stems (the *συρίγγια* of Dioscorides). They are remarkable for their agreeable odour: so are the leaves when bruised, and also the delightfully fragrant oil distilled from them. Hence it appears more fully entitled to the commendations which the *calamus aromaticus* or sweet-cane has received, than any other plant that has been described, even the attar of roses hardly excepted. That a grass similar to the fragrant *andropogon*, or at least one growing in the same kind of soil and climate, was employed by the ancients, we have evidence in the fact of the Phœnicians who accompanied Alexander in his march across the arid country of Gedrosia having recognised and loaded their cattle with it, as one of the perfumes of commerce. It is in a similar country, that is, the arid plains of Central India, that the above *andropogon calamus aromaticus* is found, and where the fragrant essential oil is distilled from its leaves, culms, and roots (*Essay on Hindoo Medicine*, p. 142).

If we compare the foregoing statement with the different passages of Scripture, we shall find that this fragrant grass answers to all that is required. Thus in Exod. xxx. 23, the fragrant reed, along with the principal spices, such as myrrh, sweet cinnamon, and cassia, is directed to be made into an oil of holy ointment. So the *calamus aromaticus* may be found mentioned as an ingredient in numerous fragrant oils and ointments, from the time of Theophrastus to that of the Arabs. Its essential oil is now sold in the shops, but under the erroneous name of oil of spikenard, which is a very different substance [Nard]. In Cant. iv. 14 it is mentioned along with spikenard, saffron, cinnamon, trees of frankincense, myrrh, and aloes. Again, its value is indicated in Isa. (xliii. 24) 'thou hast bought me no sweet cane with money;' and that it was obtained from a distant land is indicated in Jer. vi. 20, 'to what purpose cometh there to me incense from Sheba, and the sweet cane from a far country?'—while the route of the commerce is pointed out in Ezek. xxvii. 19, 'Dan also and Javan going to and fro occupied in thy fairs: bright iron, cassia, and calamus were in thy market.' To the Scripture notices, then, as well as to the description of Dioscorides, the tall grass which yields the fragrant grass-oil of Central India answers in every respect: the author of this article consequently named and figured it as the *Kaneh bosem* in his *Illustr. of Himal. Botany*, p. 425, t. 97.—J. F. R.

KARCOM (כַּרְכֹּם; Sept. *κρόκος*) occurs only once in the Old Testament, viz. in Cant. iv. 14, where it is mentioned along with several fragrant and stimulant substances, such as spikenard, calamus, and cinnamon, trees of frankincense, myrrh, and aloes (ahalim); we may, therefore, suppose that it was some substance possessed of similar properties. The name, however, is so similar to the Persian كركم *karkam*, and both to the Greek *κρόκος*, that we have no difficulty in tracing the Hebrew *karcom* to the modern crocus or saffron; but, in fact, the most ancient Greek translators of the Old Testament considered *κρόκος* as the synonyme for *karcom*. It is also probable that all three names had one common origin, saffron having from the earliest times been cultivated in Asiatic countries, as it still is in Persia and Cashmere. Crocus is mentioned by Homer, Hippocrates, and Theophrastus. Dioscorides describes the different kinds of it, and Pliny states that the benches of the public theatres

were strewed with saffron: indeed 'the ancients frequently made use of this flower in perfumes. Not only saloons, theatres, and places which were to be filled with a pleasant fragrance were strewed with this substance, but all sorts of vinous tinctures retaining the scent were made of it, and this costly perfume was poured into small fountains, which diffused the odour which was so highly esteemed. Even fruit and confitures placed before guests and the ornaments of the rooms were spread over with it. It was used for the same purposes as the modern pot-pourri' (Rosenmüller, *Bibl. Bot.* p. 138). In the present day a very high price is given in India for saffron imported from Cashmere; native dishes are often coloured and flavoured with it, and it is in high esteem as a stimulant medicine. The common name, saffron, is no doubt derived from the Arabic زعفران *zafran*, as are the corresponding terms in most of the languages of Europe.

368. [Crocus sativus.]

Nothing, therefore, was more likely than that saffron should be associated with the foregoing fragrant substances in the passage of Canticles, as it still continues to be esteemed by Asiatic nations, and, as we have seen, to be cultivated by them. Hasselquist also, in reference to this Biblical plant, describes the ground between Smyrna and Magnesia as in some places covered with saffron, and Rauwolf mentions gardens and fields of crocus in the neighbourhood of Aleppo, and particularizes a fragrant variety in Syria.

The name *saffron*, as usually applied, does not denote the whole plant, nor even the whole flower of *crocus sativus*, but only the stigmas, with part of the style, which, being plucked out, are carefully dried. These, when prepared, are dry, narrow, thread-like, and twisted together, of an orange-yellow colour, having a peculiar aromatic and penetrating odour, with a bitterish and somewhat aromatic taste, tinging the mouth and saliva of a yellow colour. Sometimes the stigmas are prepared by being submitted to pressure, and thus made into what is called *cake* saffron, a form in which it is still imported from Persia into India. Hay saffron is obtained in this country chiefly from France and Spain, though it is also sometimes prepared from the native crocus cultivated for this purpose. Saffron was formerly highly esteemed as a stimulant medicine, and still enjoys high repute in Eastern countries, both as a medicine and as a condiment.—J. F. R.

KARPAS (כַּרְפַּס) occurs in the book of Esther (i. 6), in the description of the hangings 'in the court of the garden of the king's palace,' at the time of the great feast given in the city Shushan, or Susan, by Ahasuerus, who 'reigned from India even unto Ethiopia.' We are told that there were white, *green* (*karpas*), and blue hangings fastened with cords of fine linen and purple to silver rings and pillars of marble. *Karpas* is translated *green* in our version, on the authority, it is said, 'of the Chaldee paraphrase,' where it is interpreted *leek-green*. Rosenmüller and others derive the Hebrew word from the Arabic كرفس *kurufs*, which signifies 'garden-parsley,' *apium petroselinum*, as if it alluded to the green colour of this plant; at the same time arguing that as 'the word *karpas* is placed between two other words which undoubtedly denote colours, viz., the *white* and the *purple-blue*, it probably also does the same.' But if two of the words denote colours, it would appear a good reason why the third should refer to the substance which was coloured. This, there is little doubt, is what was intended. If we consider that the occurrences related took place at the Persian court at a time when it held sway even unto India, and that the account is by some supposed to have been originally written in the ancient language of Persia, we may suppose that some foreign words may have been introduced to indicate even an already well-known substance: but more especially so if the substance itself was then first made known to the Hebrews.

The Hebrew *karpas* is very similar to the Sanscrit *karpasum*, *karpasa*, or *karpase*, signifying the cotton-plant. Celsius (*Hierobot.* i. 159) states that the Arabs and Persians have *karphas* and *kirbas* as names for cotton. These must no doubt be derived from the Sanscrit, while the word *kapas* is now applied throughout India to cotton with the seed, and may even be seen in English prices-current. Κάρπασος occurs in the Periplus of Arrian, who states that the region about the Gulf of Barygaze, in India, was productive of *carpasus*, and of the fine Indian muslins made of it. The word is no doubt derived from the Sanscrit *karpasa*, and though it has been translated *fine muslin* by Dr. Vincent, it may mean cotton cloths, or calico in general. Mr. Yates, in his recently published and valuable work, *Textrinum Antiquorum*, states that the earliest notice of this Oriental name in any classical author which he has met with, is the line '*Carbasina*, molochina, ampelina' of Cæcilius Statius, who died B.C. 169. Mr. Yates infers that as this poet translated from the Greek, so the Greeks must have made use of muslins or calicoes, &c., which were brought from India as early as 200 years B.C. See his work, as well as that of Celsius, for numerous quotations from classical authors, where *carbasus* occurs; proving that not only the word, but the substance which it indicated, was known to the ancients subsequent

to this period. It might, indeed must, have been known long before to the Persians, as constant communication took place by caravans between the north of India and Persia, as has been clearly shown by Heeren. Cotton was known to Ctesias, who lived so long at the Persian court.

Nothing can be more suitable than cotton, white and blue, in the above passage of Esther, as the writer of this article long since (1837) remarked in a note in his *Essay on the Antiquity of Hindoo Medicine*, p. 145: 'Hanging curtains made with calico, usually in stripes of different colours and padded with cotton, called purdahs, are employed throughout India as a substitute for doors.' They may be seen used for the very purposes mentioned in the text in the court of the King of Delhi's palace, where, on a paved mosaic terrace, rows of slender pillars support a light roof, from which hang by rings immense padded and striped curtains, which may be rolled up or removed at pleasure. These either increase light or ventilation, and form, in fact, a kind of movable wall to the building, which is used as one of the halls of audience. This kind of structure was probably introduced by the Persian conquerors of India, and therefore may serve to explain the object of the colonnade in front of the palace in the ruins of Persepolis [Cotton].

J. F. R.

KEDAR (קֵדָר, *black;* Sept. Κηδάρ), a son of Ishmael, and the name of the tribe of which he was the founder. The name is sometimes used in Scripture as that of the Bedouins generally, probably because this tribe was the nearest to them, and was best acquainted with them (Cant. i. 5; Isa. xxi. 16, 17; lx. 7). A great body of speculation founded upon the meaning of the word, namely, 'black,' may be dismissed as wholly useless. The Kedarenes were so called from Kedar, and not because they lived in 'black' tents, or because they were 'blackened' by the hot sun of Southern Arabia; neither of which circumstances could, even if true, have been foreseen at the time that Kedar received his name.

KEDEMOTH (קְדֵמֹת; Sept. Βακεδμώθ), a city in the tribe of Reuben (Josh. xiii. 18), near the river Arnon, which gave its name to the wilderness of Kedemoth, on the borders of that river, from whence Moses sent messengers of peace to Sihon, king of Heshbon (Deut. ii. 26), the southern frontier of whose kingdom, and the boundary between the kingdom of the Ammonites and the Moabites, was the Arnon.

KEDESH (קֶדֶשׁ; Sept. Κάδης). There were two cities of this name, one in the tribe of Judah (Josh. xv. 23), and the other in the tribe of Naphtali (xix. 37). This last was the more considerable of the two: it was a Levitical city, and one of the six cities of refuge. As the Kedesh, whose king was slain by Joshua, is mentioned among the cities of the north (xii. 22), it was doubtless the Kedesh of Naphtali, of which also Barak was a native (Judg. iv. 6).

KEDRON. [Kidron.]

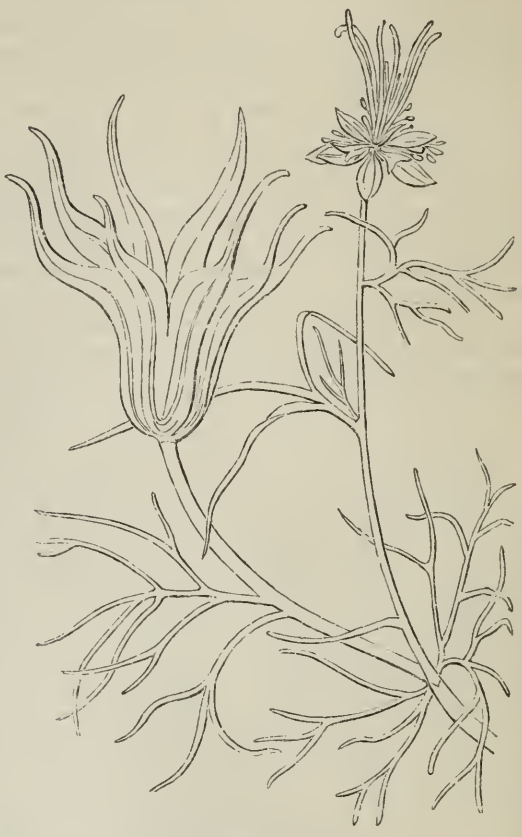
KEILAH (קְעִילָה; Sept. Κειλά), a city of the tribe of Judah (Josh. xv. 44), about twenty miles south-west from Jerusalem. When this city was besieged by the Philistines, David was commissioned by God to relieve it; notwithstanding which, if he had not made his escape, the ungrateful inhabitants would have delivered him into the hands of Saul (1 Sam. xxiii. 1-13). Keilah was a considerable city in the time of Nehemiah (Neh. iii. 17, 18), and existed in the days of Eusebius and Jerome, who place it eight Roman miles from Eleutheropolis on the road to Hebron.

KEMUEL (קְמוּאֵל, *assembly of God;* Sept. Καμουήλ), third son of Abraham's brother Nahor, and father of six sons, the first of whom is named Aram, and the last Bethuel (Gen. xxii. 21, 23). All these are unknown, except the last, who was the father of Laban and Rebekah (Gen. xxiv. 15). Aram is manifestly no other than a proper name which Kemuel gave to his firstborn; but as it is also the Hebrew name of Syria, some commentators have most strangely conceived that the Syrians were descended from him. This is truly surprising, seeing that Syria was already peopled ere he was born, and that Laban (Gen. xxviii. 5) and Jacob (Deut. xxvi. 5) are both called 'Syrians,' although neither of them was descended from Kemuel's son Aram. The misconception originated with the Septuagint, which too often undertakes to *translate* proper names, and in this case renders אבי ארם, 'father of Aram,' by πατέρα Σύρων, 'father of the Syrians.'

KENAZ (קְנַז, *hunting;* Sept. Κενέζ). 1. A descendant of Esau; also a place or tract of country in Arabia Petræa, named after him (Gen. xxxvi. 11, 15, 42).

2. The younger brother of Caleb, and father of Othniel, who married Caleb's daughter (Josh. xv. 17; Judg. i. 13; 1 Chron. iv. 13).

3. A grandson of Caleb (1 Chron. iv. 15).



KENITES (קֵינִי; Sept. Κιναῖοι), a tribe of Midianites dwelling among the Amalekites (1 Sam. xv. 6; comp. Num. xxiv. 20, 21), or occupying in semi-nomadic life the same region with the latter people in Arabia Petræa. When Saul was sent to destroy the Amalekites, the Kenites, who had joined them, perhaps upon compulsion, were ordered to depart from them that they might not share their fate; and the reason assigned was, that they 'shewed kindness to the children of Israel when they came out of Egypt.' This kindness is supposed to have been that which Jethro and his family showed to Moses, as well as to the Israelites themselves, in consequence of which the whole tribe appears to have been treated with consideration, while the family of Jethro itself accompanied the Israelites into Palestine, where they continued to lead a nomadic life, occupying there a position similar to that of the Tartar tribes in Persia at the present day. To this family belonged Heber, the husband of that Jael who slew Sisera, and who is hence called 'Heber the Kenite' (Judg. iv. 11). At a later age other families of Kenites are mentioned as resident in Palestine, among whom were the Rechabites (1 Chron. ii. 55; Jer. xxxv. 2); but it is not clear whether these were subdivisions of the increasing descendants of Jethro, as seems most likely, or families which availed themselves of the friendly dispositions of the Israelites towards the tribe to settle in the country. It appears

that, whatever was the general condition of the Midianites, the tribe of the Kenites possessed a knowledge of the true God in the time of Jethro [HOBAB]; and that those families which settled in Palestine did not afterwards lose that knowledge, but increased it, is clear from the passages which have been cited [MIDIANITES; RECHABITES].

KENIZZITES (קְנִזִּי; Sept. Κενεζαῖοι), a Canaanitish tribe, mentioned in Gen. xv. 19, along with others, over which it was promised that the seed of Abraham should have dominion. The notion that they sprung from Kenaz, the grandson of Edom, and had their dwelling somewhere in Idumæa, cannot be entertained, seeing that the tribe is named long before Kenaz had existence. The Kenizzites of Num. xxxii. 12; Josh. xiv. 6, appear, however, to be a different race, the origin of which may without improbability be ascribed to Kenaz. The Kenizzites are not named among the nations whom the Israelites eventually subdued; whence it may be supposed that they had by that time merged into some of the other nations which Israel overcame.

KETURAH (קְטוּרָה, *incense;* Sept. Χετ-τούρα), the second wife, or, as she is called in 1 Chron. i. 32, the concubine of Abraham, by whom he had six sons, Zimran, Jokshan, Medan, Midian, Ishbak, and Shuah, whom he lived to see grow to man's estate, and whom he established 'in the East country,' that they might not interfere with Isaac (Gen. xxv. 1-6). As Abraham was 100 years old when Isaac was born, who was given to him by the special bounty of Providence when 'he was as good as dead' (Heb. xi. 12), as he was 140 years old when Sarah died; and as he himself died at the age of 175 years,—it has seemed improbable that these six sons should have been born to Abraham by one woman after he was 140 years old, and that he should have seen them all grow up to adult age, and have sent them forth to form independent settlements in that last and feeble period of his life. If Isaac was born to him out of the course of nature when he was 100 years old, how could six sons be born to him in the course of nature after he was 140? It has therefore been suggested by good commentators, that as Keturah is called Abraham's 'concubine' in Chronicles, and as she and Hagar are probably indicated as his 'concubines' in Gen. xxv. 6, Keturah had in fact been taken by Abraham as his secondary or concubine-wife before the death of Sarah, although the historian relates the incident after that event, that his leading narrative might not be interrupted. According to the standard of morality then acknowledged, Abraham might quite as properly have taken Keturah before as after Sarah's death; nor can any reason why he should not have done so, or why he should have waited till then, be conceived. This explanation obviates many difficulties, and does not itself contain any.

KETZACH (קֶצַח; Sept. μελάνθιον), also written KEZACH and KETSAH, occurs only in Isa. xxviii. 25, 27, and is translated *fitches*, that is, *vetches*, in the Authorized Version. It is no doubt from the difficulty of proving the precise meaning of *ketzach*, that different plants have been assigned as its representative. But if we refer to the context, we learn some particulars which at least restrict it to a certain group, namely, to such as are cultivated. Thus, ver. 25, 'When he (the ploughman) hath made plain the face thereof, doth he not cast abroad the *fitches* (*ketzach*)?' And again, ver. 27, 'For the *fitches* are not threshed with a threshing instrument, neither is a cart-wheel turned about upon the cummin; but *fitches* are beaten out with a staff, and the cummin with a rod.' From which we learn that the grain called *ketzach* was easily separated from its capsule, and therefore beaten out with a stick.

369. [Nigella sativa.]

Although *ketzach*, in Chaldee *kizcha*, is always acknowledged to denote some seed, yet interpreters have had great difficulty in determining the particular kind intended, some translating it *peas*, others, as Luther and the English Version, *vetches*, but without any proof. Meibomius considers it to be the *white poppy*, and others, a *black seed*. This last interpretation has the most numerous, as well as the oldest, authorities in its support. Of these a few are in favour of the black poppy-seed, but the majority, of a black seed common in Egypt, &c. (Celsius, *Hierobot.* ii. 70). The Sept. translates it μελάνθιον, the Vulg. *git*, and Tremellius *melanthium*, while the Arabic has *shoonez*. All these mean the same thing, namely, a very black-coloured and aromatic seed, still cultivated and in daily employment as a condiment in the East. Thus Pliny (xx. 17. 71), '*Gith* ex Græcis, alii melanthion, alii melanspermon vocant. Optimum, quam excitatissimi odoris et quam nigerrimum.' By Dioscorides (iii. 93), or the ancient author who is supposed to have added the synonymes, we are informed that μελάνθιον was also called the 'wild black poppy,' that the seed was black, acrid, and aromatic, and that it was

added to bread or cakes. Σπέρμα μέλαν, δριμύ, εὐῶδες, καταπλασσόμενον εἰς ἄρτους. Pliny also says, 'Melanthii, vel melanspermi semen gratissime panes condit.' Melanthium is universally recognised by botanists to be the Nigella. Thus Bauhin Pinax, 'Nigella, a nigro seminis colore communiter dicta μελάνθιον est.' The شونيز *shoonez*, of the Arabs is, moreover, the same plant or seed, which is usually called 'black cumin.' So one kind of cumin is said by Dioscorides to have seeds like those of melanthion or nigella. It was commonly cultivated in Egypt, and P. Alpinus mentions it as 'Sunneg Ægyptiis.' The Arabs, besides *shoonez*, also call it *hub-al-souda*, and the Persians *seah dana*, both words signifying *black seed*. One species, named *N. Indica* by Dr. Roxburgh, is called *kala jeera* in India, that is, black zeera or cumin, of the family of Ranunculaceæ. 'Nigella sativa is alone cultivated in India, as in most eastern countries, and continues in the present day, as in the most ancient times, to be used both as a condiment and as a medicine' (*Illust. Himal. Bot.*, p. 46). If we consider that this appears to have been always one of the cultivated grains of the East, and compare the character of nigella with the passages in which *ketzach* is mentioned, we shall find that the former is applicable to them all. Indeed, Rabbi Obadias de Bartenora states, that the barbarous or vulgar name of the *kezach*, was nielle, that is, nigella. The various species of nigella are herbaceous (several of them being indigenous in Europe, others cultivated in most parts of Asia), with their leaves deeply cut and linear, their flowers terminal, most of them having under the calyx leafy involucres which often half surround the flower. The fruit is composed of five or six capsules, which are compressed, oblong, pointed, sometimes said to be hornlike, united below, and divided into several cells, and enclosing numerous, angular, scabrous, black-coloured seeds. From the nature of the capsules, it is evident, that when they are ripe, the seeds might easily be shaken out by moderate blows of a stick, as is related to have been the case with the *ketzach* of the text.—J. F. R.

KETZIOTH (קְצִיעוֹת) is translated Cassia in the Authorized Version, and is said to be derived from קָצַע, *to cut off*: it therefore denotes 'pieces cut off,' or 'fragments,' and hence is applicable to *cassia*. But many of these derivations have often been traced out in ignorance of the names and properties of the various substances known to the nations of antiquity. Cassia is mentioned in three places (Exod. xxx. 24; Ezek. xxvii. 19; and in Ps. xlv. 8), in conjunction with myrrh, cinnamon, sweet calamus, and ahalim, or eaglewood. All these are aromatic substances, and, with the exception of myrrh, which is obtained from Africa, are products of India and its islands. It is probable, therefore, that *ketzioth* is of a similar nature, and obtained from the same countries. Both cinnamon [Kinnamon] and cassia [Kiddah] were no doubt known to the ancients, and this is one step of the investigation; but to prove that the Hebrew words are correctly translated is another, which must be proceeded with before we can infer that the *kiddah* of Exod. xxx. 24 and Ezek. xxvii. 19, and the *ketzioth* of Ps. xlv. 8, both signify the same thing. This has not been the opinion of several translators and commentators; the first having been variously rendered iris, stacte, *costus*, ginger, canna, fistula, amber, *ketziah*, and cassia, while *ketzioth*, or *ketziah*, has been rendered cassia, acacia, amber, ginger, and aloes. The Arabic translator has considered it synonymous with the Arabic name *salicha*, which is no doubt applied to cassia.

Mr. Harmer has already remarked that, little copious as the Hebrew language is, there are in it no fewer than four different words, at least, which have been rendered 'linen,' or 'fine linen,' by our translators. This would hardly have been the case had there not been different kinds of linen. The same thing may be said of cassia, for which we have seen that there are two distinct words in the Hebrew—*Kiddah*, which will be treated of in a separate article, and *Ketzioth*, to which it is now our object to direct attention. It occurs only once, in Ps. xlv. 8: 'All thy garments smell of myrrh, and aloes (*ahalim*), and *cassia* (*ketzioth*).' It has been observed with reference to this passage that 'The garments of princes are often imbued with costly perfumes, those of the high-priests were anointed with holy ointment.' We have seen above that *ketzioth* has been variously translated, but no one seems to have noticed the resemblance of this word to the *kooth* and *koost* of the Arabs, of which *Kooshta* is said by their authors to be the Syriac name, and from which there is little doubt that the κόστος of the Greeks, and *costus* of the Latins, are derived.

'Costum molle date, et blande mihi turis odores,
Ure puer costum Assyrium redolentibus aris.'

Κόστος is enumerated by Theophrastus (*Hist. Pl.* ix. 7.) among the fragrant substances employed in making ointment. Three kinds of it are described by Dioscorides, among his *Aromata* (i. 15), of which the Arabian is said to be the best, the Indian to hold the second place, and the *Syrian* the third. Pliny mentions only two kinds (xv. 12), 'Radix et folium Indis est maximo pretio. Radix costi gustu fervens, odore eximio, frutice alias inutili. Primo statim introitu amnis Indi in Patale insula, duo sunt ejus genera — nigrum, et quod melius, candicans.' The Persian writers on Materia Medica in use in India, in giving the above synonymes, evidently refer to two of the three kinds of *Costus* described by Dioscorides, one being called *Koost Hindee*, and the other *Koost Arabee*. The writer of this article obtained both these kinds in the bazaars of India, and found, moreover, that the *koot* or *koost* of the natives was often, by European merchants, called Indian orris, *i. e.* Iris root, the odour of which it somewhat resembles. Subsequently he ascertained that this article was known in Calcutta as *Puchuk*, the name under which it is exported to China. The identity of the substance indicated by these various names was long ago ascertained, though not then known to the present writer. Thus Garcias ab Horto, 'Est ergo Costus dictus Arabibus *Cost* aut *Cast*:'— 'In Malacca, ubi ejus plurimus est usus, *Pucho*, et inde vehitur in Sinarum regionem.' Having obtained the *koost* in the north-western provinces of India, the writer traced it afterwards as one

of the substances brought across the Indus from Lahore (*Illust. Himal. Bot.* p. 360). When Dr. Falconer proceeded on his journey to Cashmere, he was requested to make inquiries respecting this substance, and he discovered that it was exported from that valley in large quantities into the Punjab; whence it finds its way to Bombay (as in the time of Pliny to Patala) and Calcutta, for export to China, where it is highly valued as one of the ingredients in the incense which the Chinese burn in their temples and private houses. Finding the plant to belong to a new genus, he named it *Aucklandia*, in compliment to the Governor-General of India, and the species *Aucklandia Costus* (*Linn. Trans.* xix. 23). Considering, therefore, that *costus* was one of the articles of ancient commerce and is mentioned by Theophrastus as employed in the composition of perfumed unguents, and considering the similarity of the Syriac *kooshta*, and the Arabic *kast*, to the *ketzioth* of Scripture, and from their correspondence in properties and uses, the latter appears more likely to be the *costus* of the ancients, than *cassia*, for which there is another name [KIDDAH].—J. F. R.

KIBEROTH-HATTAVAH, an encampment of the Israelites in the wilderness [WANDERING].

KIDDAH (קְדָה), as well as KETZIOTH, is rendered CASSIA in our Authorized Version; but translators do not uniformly coincide in, though the great majority are in favour of, this interpretation. It is well known that the Greeks were acquainted with several varieties of cassia; and as one of these was called *kitto*, κιττώ (Dioscor. i. 12), this has been thought to be the same word as the Hebrew קדה, from קדד, in Arabic قدّ, *to split, hew, or tear anything lengthwise*, as must be done in separating cassia bark from the tree. But it does not follow that this is a correct interpretation of the origin of the name of an Eastern product. The word occurs first in Exod. xxx. 24, where cassia (*kiddah*) is mentioned in connection with olive oil, pure myrrh, sweet cinnamon, and sweet calamus; secondly, in Ezek. xxviii. 19, where Dan and Javan are described as bringing bright iron, cassia (*kiddah*), and calamus to the markets of Tyre. There is no reason why the substance now called cassia might not have been imported from the shores of India into Egypt and Palestine. Considerable confusion has, however, been created by the same name having been applied by botanists to a genus containing the plants yielding senna, and to others, as the *cassia fistula*, which have nothing to do with the original cassia. Cassia-buds, again, though no doubt produced by a plant belonging to the same, or to some genus allied to that producing cinnamon and cassia, were probably not known in commerce at so early a period as the two latter substances. There is some difficulty also in determining what the ancient cassia was. The author of this article, in his *Antiquity of Hindoo Medicine*, p. 84, has already remarked, 'The cassia of the ancients it is not easy to determine; that of commerce, Mr. Marshall says, consists of only the inferior kinds of cinnamon. Some consider cassia to be distinguished from cinnamon by the outer cellular covering of the bark being scraped off the latter, but allowed to remain on the former. This is, however, the characteristic of the (Cochin-Chinese) *cinnamomum aromaticum*, as we are informed by Mr. Crawford (*Embassy to Siam*, p. 470) that it is not cured, like that of Ceylon, by freeing it from the epidermis.' There is, certainly, no doubt that some cassia is produced on the coast of Malabar. The name also would appear to be of Eastern origin, as *kasse koronde* is one kind of cinnamon, as mentioned by Burmann in his *Flora Zeylonica;* but it will be preferable to treat of the whole subject in connection with cinnamon [KINNAMON].—J. F. R.

KIDRON (קִדְרוֹן, *the turbid:* Sept. Κέδρων), the brook or winter torrent which flows through the valley of Jehoshaphat (as it is now called), on the east side of Jerusalem. 'The brook Kidron' is the only name by which 'the valley' itself is known in Scripture; for it is by no means certain, nor even probable, that the name 'valley of Jehoshaphat' in Joel (iii. 12) was intended to apply to this valley. The word rendered 'brook' (2 Sam. xv. 23; 1 Kings ii. 37, &c.), is נחל *nachal*, which may be taken as equivalent to the Arabic *Wady*, meaning a stream *and* its bed or valley, or properly the valley of a stream, even when the stream is dry. The Septuagint, Josephus, and the Evangelists (John xviii. 1), designate it χειμάρρος, a storm brook, or winter torrent.

The brook Kidron derives all its importance from its vicinity to the holy city, being nothing more than the dry bed of a winter torrent, bearing marks of being occasionally swept over by a large volume of water. No stream flows through it, except during the heavy rains of winter, when the waters descend into it from the neighbouring hills. But even in winter there is no constant flow, and the resident missionaries assured Dr. Robinson that they had not during several years seen a stream running through the valley. The ravine in which the stream is collected takes its origin above a mile to the north-east of the city. This ravine deepens as it proceeds, and forms an angle opposite the temple. It then takes a south-east direction, and, passing between the village of Siloam and the city, runs off in the direction of the Dead Sea, through a singularly wild gorge, the course of which few travellers have traced (*Pictorial Palestine*, Introd. p. cxciv.). It is in this ravine that the celebrated monastery of Santa Saba is situated. Mr. Madden, who went through the valley to the Dead Sea, thus speaks of the character which it assumes as it approaches the monastery:—'After traversing for the last hour a wild ravine, formed by two rugged perpendicular mountains, the sides of which contained innumerable caverns, which once formed a sort of troglodyte city, in which the early Christians resided, the sight of the convent in this desolate place was like a glimpse of paradise.' On leaving the convent the next day he says that he 'marched through the bed of the Kidron, along the horrible ravine which he entered the day before;' but he gives no account of its outlet into the Dead Sea. This defect is supplied by Dr. Robinson (*Biblical Researches*, ii. 249), who, on passing along the western borders of the lake, came 'to the deep and almost impassable ravine of the Kidron, running down by Mar Saba, and thence called Wady-er-Rahib, "Monk's Valley;"

but here also bearing the name of Wady en-Nar, "Fire Valley." At this place it was running E.S.E., in a deep narrow channel, between perpendicular walls of rock, as if worn away by the rushing waters between these desolate chalky hills. There was, however, no water in it now; nor had there apparently been any for a long time.'

KIKAYON (קִיקָיוֹן) occurs only in Jonah iv., where it is several times mentioned, as in ver. 6, 7, 9, 10. It is translated *gourd* in our Authorized Version, probably from the κολοκύνθη of the Septuagint, often rendered *cucurbita*. In the margin of the English Bible, *Palm-Christ* is given. In the Vulgate *kikayon* is translated *hedera*, 'ivy.' Neither the gourd nor ivy is considered by modern writers to indicate the plant intended; which is remarkable for having given rise to some fierce controversies in the early ages of the Church. The difficulties here, however, do not appear to be so great as in many other instances. But before considering these, it is desirable to ascertain what are the characteristics of the plant as required by the text. We are told, 'The Lord God prepared a *gourd* (*kikayon*), and made it to come over Jonah, that it might be a shadow over his head,' &c. (ver. 6). 'But God prepared a worm when the morning rose the next day, and it smote the gourd that it withered' (ver. 7). And in ver. 10 it is said of the gourd that it 'came up in a night, and perished in a night.' Hence it appears that the growth of the *kikayon* was miraculous, but that it was probably a plant of the country, being named specifically; also that it was capable of affording shade, and might be easily destroyed. There does not appear anything in this account to warrant us in considering it to be the ivy, which is a plant of slow growth, cannot support itself, and is, moreover, not likely to be found in the hot and arid country of ancient Nineveh, though we have ourselves found it in more southern latitudes, but only in the temperate climate of the Himalayan Mountains. The ivy was adduced probably only from the resemblance of its Greek name, κισσός, to *kikayon*. That the *kikayon* was thought to be a gourd seems to have arisen from the *kiki* of the Egyptians being the خروع *kherwa*, of the Arabs, often incorrectly written *keroa*, that is, without the aspirate, which makes it very similar to قرع *kara*, when written in Roman characters; which last in the East is applied to the gourd or pumpkin (Avicenna, c. 622), and is probably the *Lagenaria vulgaris*. Many modern authors mistake the one for the other. To this plant, no doubt, the following passages refer, 'The Christians and Jews of Mosul (Nineveh) say it was not the *keroa* whose shadow refreshed Jonah, but a sort of gourd, *el-kera*, which has very large leaves, very large fruit, and lasts but about four months' (Niebuhr, *Arabia*, as quoted by Dr. Harris). So Volney: 'Whoever has travelled to Cairo or Rosetta knows that the species of gourd called *kerra* will, in twenty-four hours, send out shoots near four inches long' (*Trav.* i. 71).

The Hebrew name *kikayon* is so similar to the *kiki* of Dioscorides, that it was early thought to indicate the same plant. Dioscorides (iv. 164, περὶ κίκεως) states that the *kiki*, or *cratum*, is called *wild sesamum* by some:—'Ricini autem nomen accepit a similitudine quæ est illius semini cum ricino animali. Arbuscula est parvæ ficus altitudine, foliis platani, truncis ramisque cavis in calami modum, semine in uvis asperis. Ex eo *oleum kikinum* exprimitur, cibis quidem ineptum; sed alias et ad lucernas et emplastra utile.' Thus giving in a few words a graphic description of *Ricinus communis*, or castor-oil plant, of which the seeds have some resemblance to the insect commonly called *tick* in English, and which is found on dogs and

370. [Ricinus communis.]

other animals. It has also been called *Pentadactylus* and *Palma Christi*, from the palmate division of its leaves. It was known at much earlier times, as Hippocrates employed it in medicine; and Herodotus mentions it by the name of σιλλικύπριον (ii. 94) when speaking of Egypt:—'The inhabitants of the marshy grounds make use of an oil which they term *kiki*, expressed from the Sillicyprian plant.' That it has been known there from the earliest times is evident from Cailliaud having found castor-oil seeds in some very ancient sarcophagi. That the Arabs considered their خروع *kherwa* to be the same plant, is evident from Avicenna on this article, or *kharwa* of the translation of Plempius (p. 301):—'Plantum hic scribit Dioscorides, quidam *crotona* appellant, hoc est *ricinum*, a similitudine quæ est illius semini cum ricino animali.' So Serapion (xii. c. 79):—'Cherva sive kerua, sicuti ejus oleum, oleum *kiche*.' This oil was not only employed by the Greeks, but also by the Jews, being the קִיק שֶׁמֶן, *kik*-oil of the Talmudists, prepared from the seeds of the *ricinus* (Rosenmüller, p. 127). 'Oleum (*kik*) est quod exit ex grano.' Lady Calcott states that the modern Jews of London use this oil, by the name of oil of *kik*, for their Sabbath lamps, it

being one of the five kinds of oil which their traditions allow them to employ.

Having ascertained that the *kiki* of the Greeks is what is now called *Ricinus communis*, we shall find that its characters correspond with everything that is required, except the rapidity of growth, which must be granted was miraculous. Dr. Harris indeed states that the passage means, 'Son of the night it was, and as a son of the night it died;' and that, therefore, we are not compelled to believe that it grew in a single night, but rather, by a strong Oriental figure, that it was of rapid growth. This, there is no doubt, it is highly susceptible of in warm countries where there is some moisture. It attains a considerable size in one season; and though in Europe it is only known as a herb, in India it frequently may be seen, especially at the margins of fields, the size of a tree. So at Busra Niebuhr saw an *el-keroa* which had the form and appearance of a tree. The stems are erect, round, and hollow; the leaves broad, palmate, 5 to 8 or 10 lobed, peltate, supported on long foot-stalks. The flowers in terminal panicles; the lower, male; the upper, female. Capsule tricoccous, covered with spines. The seeds are oblong, oval, externally of a greyish colour, but mottled with darker-coloured spots and stripes. From the erect habit, and the breadth of its foliage, this plant throws an ample shade, especially when young. From the softness and little substance of its stem, it may easily be destroyed by insects, which Rumphius describes as sometimes being the case. It would then necessarily dry up rapidly. As it is well suited to the country, and to the purpose indicated in the text, and as its name *kiki* is so similar to *kikayon*, it is doubtless the plant which the sacred penman had in view.—J. F. R.

KIMOSH and KIMSHON (קִמּוֹשׂ and קִמְשׁוֹן) occur, the first in Isa. xxxiv. 13, and Hos. ix. 6, and the second in Prov. xxiv. 31, where it is mentioned along with *charul*, which we believe to indicate *charlock*. The field of the slothful is there described as being grown over with thorns (*charullim*), 'and nettles (*kimshon*) had covered the face thereof.' In Isaiah it is said, 'And thorns (*choach*) shall come up in the palaces, nettles (*kimosh*) and brambles in the fortresses thereof.' Hos. ix. 6, 'The pleasant places for their silver, nettles (*kimosh*) shall possess them; thorns (*choach*) shall be in their tabernacles.'

Though different interpretations have been given of this word, as thorns, thistles, wild chamomile, &c., the greatest number of authors have united in adopting nettles, chiefly in consequence of the authority of Jewish writers. Thus, Rosenmüller says, Rabbi Tanchum, on Hos. ix. 6, explains *kimosh* by the common nettle, قرسص in Pococke's *Comment. on Hosea.* So R. Ben Melech, as quoted and translated by Celsius (*Hierobot.* ii. p. 207) 'ex antiquioribus Ebræis, ad Proverb. xxiii. 13, *species est spinarum, et dicitur vulgo* Urtica.' Nettles no doubt spring up rapidly in deserted as in inhabited places, in fields, ditches, and road sides, but most frequently where there is some moisture in the soil or climate. Though they are found in tropical situations, as well as in temperate climes, yet the springing up of nettles in deserted places is rather an European than an Oriental idea. Though *kimosh* has not yet been proved to indicate the nettle, this plant has been received by the rabbins, and is as well suited to the passages in which it occurs as any other which has hitherto been suggested.—J. F. R.

KING, a title applied in the Scriptures to men (Luke xxii. 25; 1 Tim. ii. 1, 2; 1 Pet. ii. 13-17), to God (1 Tim. i. 17; vi. 15, 16), and to Christ (Matt. xxvii. 11; Luke xix. 38; John i. 49; vi. 15; xviii. 32-37)—to men, as invested with regal authority by their fellows; to God, as the sole proper sovereign and ruler of the universe; and to Christ, as the Messiah, the Son of God, the King of the Jews, the sole Head and Governor of his church. The kingdom of Christ, in Luke i. 32, 33, is declared to be without end; whereas, in 1 Cor. xv. 28, we are taught that it will have a period, when God shall be all in all. The contradiction is only in form and appearance. The kingdom of the Messiah, considered as a mediatorial instrumentality for effecting the salvation of the world, will, of course, terminate when the purposes for which it was established shall have been accomplished; while the reign of the Son of God, associated with his Father in the empire of the world, will last as long as that empire itself, and never cease, so long as the effects endure which the redemption of the world shall produce alike in its remotest as in its nearer consequences.

Regal authority was altogether alien to the institutions of Moses in their original and unadulterated form. Their fundamental idea was that Jehovah was the sole king of the nation (1 Sam. viii. 7): to use the emphatic words in Isa. xxxiii. 22, 'The Lord is our judge, the Lord is our lawgiver, the Lord is our king.' This important fact, however, does not rest on the evidence of single texts, but is implied in the entire Pentateuch, not to say the whole of the Old Testament. The Scriptural statements or implications are as follows:—God is the creator of the world; he saved a remnant from the flood; towards the descendants of Noah he manifested his special favour; to Abraham, Isaac, and Jacob, he promised a land flowing with milk and honey; in the fulness of time he accomplished, by apparently the most unlikely and untoward means, the oath which he more than once sware to the fathers of Israel; so that eventually, having furnished his people with a complete code of laws, he put them in possession of the promised territory, assuming the government, and setting forth sanctions alike of ample good and terrible ill, in order to keep the people loyal to himself as to the only Creator and God of the universe, and specially as their supreme sovereign.

We consider it as a sign of that self-confidence and moral enterprise which are produced in great men by a consciousness of being what they profess, that Moses ventured, with his half-civilized hordes, on the bold experiment of founding a society without a king, and that in the solicitude which he must have felt for the success of his great undertaking, he forewent the advantages which a regal government would have afforded. Nor is such an attempt a little singular and novel at a period and in a part of the world in which royalty was not only general, but held in the greatest respect, and sometimes rose to the very height of pure despotism. Its novelty is an evi-

dence of the divine original to which Moses referred all his polity. Equally honourable is the conduct of Moses in denying to his lower nature the gratifications which a crown would have imparted—we say denying himself, because it is beyond a question that the man who rescued the Jews from bondage and conducted them to the land of Canaan, might, had he chosen, have kept the dominion in his own hands, and transmitted a crown to his posterity. If Washington, at this late period of human history, after the accumulating experience of above three thousand years, has added its sanctions to the great law of disinterested benevolence, is held deserving of high honour for having preferred to found a republic rather than attempt to build up a throne, surely very unequal justice is done to Moses, if, as is too generally the case, we pass in neglect the extraordinary fact that, with supreme power in his hands, and, to all appearance, scarcely any hindrance to the assumption of regal splendour, the great Hebrew patriot and legislator was content to die within sight of the land of promise, a simple, unrewarded, unhonoured individual, content to do God's work regardless of self. It is equally obvious that this self-denial on the part of Moses, this omission to create any human kingship, is in entire accordance with the import, aim, and spirit of the Mosaic institutions, as being divine in their origin, and designed to accomplish a special work of Providence for man; and, therefore, affords, by its consistency with the very essence of the system of which it forms a part, a very forcible argument in favour of the divine legation of Moses.

That great man, however, well knew what were the elements with which he had to deal in framing institutions for the rescued Israelites. Slaves they had been, and the spirit of slavery was not yet wholly eradicated from their souls. They had, too, witnessed in Egypt the more than ordinary pomp and splendour which environ a throne, dazzling the eyes and captivating the heart of the uncultured. Not improbably the prosperity and abundance which they had seen in Egypt, and in which they had been, in a measure, allowed to partake, might have been ascribed by them to the regal form of the Egyptian government. Moses may well, therefore, have apprehended a not very remote departure from the fundamental type of his institutions. Accordingly he makes a special provision for this contingency (Deut. xvii. 14), and labours, by anticipation, to guard against the abuses of royal power. Should a king be demanded by the people, then he was to be a native Israelite; he was not to be drawn away by the love of show, especially by a desire for that regal display in which horses have always borne so large a part, to send down to Egypt, still less to cause the people to return to that land; he was to avoid the corrupting influence of a large harem, so common among Eastern monarchs; he was to abstain from amassing silver and gold; he was to have a copy of the law made expressly for his own study—a study which he was never to intermit till the end of his days; so that his heart might not be lifted up above his brethren, that he might not be turned aside from the living God, but observing the divine statutes, and thus acknowledging himself to be no more than the vicegerent of heaven, he might enjoy happiness, and transmit his authority to his descendants.

This passage has, indeed, been pronounced to stand apart from any connection in the Pentateuch, and to betray a much later hand than that of Moses. If our view is correct, it has a very obvious connection, and proceeds from the Hebrew legislator himself. Nor can it, we think, be denied that the reason is by no means an unlikely nor insufficient one, by which we have supposed Moses to have been prompted in promulgating the provisional and contingent arrangements which are found in the passage under consideration. Most emphatically is the act of taking a king ascribed by Moses to the people themselves, whom he represents as being influenced by considerations not dissimilar to those which we have assigned: 'When thou,' &c., 'and shalt say, *I will set a king over me, like as all the nations that are about me.*' Winer, however, from whom (*Real-wörterb.*) we have taken this objection, argues in opposition to Stäudlin (Bertholdt's *Theol. Journ.*, iii. 259, 361, sq.), that if Moses had anticipated a demand for a king, he would have made provision for such a demand at an earlier period—a remark which rests on no evidence of verisimilitude whatever, the opposite of the supposed course being just as probable. Besides, it may be affirmed, without the possibility of receiving any contradiction but that of mere assertion, that he made the provision as soon as he foresaw the probable need. Less solid, if possible, is Winer's other argument, namely, that in the passage (1 Sam. viii.) in which are recorded the people's demand of a king and the prophet Samuel's reply, no trace is found of a reference to the alleged Mosaic law on the point. A reference in form Winer could scarcely expect, a reference in substance we see very clearly. We have not room to go into particulars; but recommend the reader carefully to compare the two passages.

The Jewish polity, then, was a sort of sacerdotal republic—we say sacerdotal, because of the great influence which, from the first, the priestly order enjoyed, having no human head, but being under the special supervision, protection, and guidance of the Almighty. The nature of the consequences, however, of that divine influence avowedly depended on the degree of obedience and the general faithfulness of the nation. The good, therefore, of such a superintendence in its immediate results was not necessary, but contingent. The removal of Moses and of Joshua by death soon left the people to the natural results of their own condition and character. Anarchy ensued. Noble minds, indeed, and stout hearts appeared in those who were termed Judges; but the state of the country was not so satisfactory as to prevent an unenlightened people, having low and gross affections, from preferring the glare of a crown and the apparent protection of a sceptre, to the invisible and, therefore, mostly unrecognised arm of omnipotence. A king accordingly is requested. The misconduct of Samuel's sons, who had been made judges, was the immediate occasion of the demand being put forth. The request came with authority, for it emanated from all the elders of Israel, who, after holding a formal conference, proceeded to Samuel, in order to make him acquainted with their wish. Samuel was displeased; but, having sought in prayer to learn the divine

will, he is instructed to yield to the demand on a ground which we should not assuredly have found stated, had the book in which it appears have been tampered with or fabricated for any courtly purposes or any personal ends, whether by Samuel himself, or by David, or any of his successors—'for they have not rejected thee (Samuel), but they have rejected me, that I should not reign over them' (ver. 7, see also ver. 8). Samuel is, moreover, directed to 'protest solemnly unto them, and show them the manner of the king that shall reign over them.' Faithfully does the prophet depict the evils which a monarchy would inflict on the people. In vain: they said, 'Nay, but we will have a king over us.' Accordingly, Saul the son of Kish, of the tribe of Benjamin, was, by divine direction, selected, and privately anointed by Samuel 'to be captain over God's inheritance:' thus he was to hold only a delegated and subordinate authority. Under the guidance of Samuel, Saul is subsequently chosen by lot from among the assembled tribes; and though his personal appearance had no influence in the choice, yet when he was plainly pointed out to be the individual designed for the sceptre, Samuel called attention to those qualities which in less civilized nations have a preponderating influence, and are never without effect, at least, in supporting 'the divinity which doth hedge a king:' 'See ye him whom the Lord hath chosen, that there is none like him among all the people,' for he was higher than any of the people from his shoulders and upward; 'and all the people shouted, God save the king.'

Emanating as the royal power did from the demand of the people and the permission of a prophet, it was not likely to be unlimited in its extent or arbitrary in its exercise. The government of God, indeed, remained, being rather concealed and complicated than disowned, much less superseded. The king ruled not in his own right, nor in virtue of the choice of the people, but by concession from on high, and partly as the servant and partly as the representative of the theocracy. How insecure, indeed, was the tenure of the kingly power, how restricted it was in its authority, appears clear from the comparative facility with which the crown was transferred from Saul to David; and the part which the prophet Samuel took in effecting that transference points out the quarter where lay the power which limited, if it did not primarily, at least, control the royal authority. It must, however, be added, that if religion narrowed this authority, it also invested it with a sacredness which could emanate from no other source. Liable as the Israelite kings were to interference on the part of priest and prophet, they were, by the same divine power, shielded from the unholy hands of the profane vulgar; and it was at once impiety and rebellion to do injury to 'the Lord's anointed' (Ps. ii. 6, 7, sq.). Instances are not wanting to corroborate and extend these general observations. When Saul was in an extremity before the Philistines (1 Sam. xxviii.), he resorted to the usual methods of obtaining counsel: 'Saul inquired of the Lord, the Lord answered him not, neither by dreams, nor by Urim, nor by prophets.' So David, when in need of advice in war (1 Sam. xxx. 7), resorted to Abiathar the priest, who, by means of the ephod, inquired of the Lord, and thereupon urged the king to take a certain course, which proved successful (see also 2 Sam. ii. 1). Sometimes, indeed, as appears from 1 Sam. xxviii., it was a prophet who acted the part of prime minister, or chief counsellor, to the king, and who, as bearing that sacred character, must have possessed very weighty influence in the royal divan (1 Kings xxii. 7, sq.). We must not, however, expect to find any definite and permanent distribution of power, any legal determination of the royal prerogatives as discriminated from the divine authority; circumstances, as they prompted certain deeds, restricted or enlarged the sphere of the monarch's action. Thus, in 1 Sam. xi. 4, sq., we find Saul, in an emergency, assuming, without consultation or deliberation, the power of demanding something like a levy *en masse*, and of proclaiming instant war. With the king lay the administration of justice in the last resort (2 Sam. xv. 2; 1 Kings iii. 16, sq.). He also possessed the power of life and death (2 Sam. xiv.). To provide for and superintend the public worship was at once his duty and his highest honour (1 Kings viii.; 2 Kings xii. 4; xviii. 4; xxiii. 1). One reason why the people requested a king was, that they might have a recognised leader in war (1 Sam. viii. 20). The Mosaic law offered a powerful hindrance to royal despotism (1 Sam. x. 25). The people also, by means of their elders, formed an express compact, by which they stipulated for their rights (1 Kings xii. 4), and were from time to time appealed to, generally in cases of 'great pith and moment' (1 Chron. xxix. 1; 2 Kings xi. 17; Joseph., *De Bell. Jud.* ii. 1. 2). Nor did the people fail to interpose their will, where they thought it necessary, in opposition to that of the monarch (1 Sam. xiv. 45). The part which Nathan took against David shows how effective, as well as bold, was the check exerted by the prophets; indeed, most of the prophetic history is the history of the noblest opposition ever made to the vices alike of royalty, priesthood, and people. If needful, the prophet hesitated not to demand an audience of the king, nor was he dazzled or deterred by royal power and pomp (1 Kings xx. 22, 38; 2 Kings i. 15). As, however, the monarch held the sword, the instrument of death was sometimes made to prevail over every restraining influence (1 Sam. xxii. 17).

After the transfer of the crown from Saul to David, the royal power was annexed to the house of the latter, passing from father to son, with preference to the eldest born, though he might be a minor. Jehoash was seven years old when he began to reign (2 Kings xi. 21). This rule was not, however, rigidly observed, for instances are not wanting in which nomination of a younger son gave him a preferable title to the crown (1 Kings i. 17; 2 Chron. xi. 21): the people, too, and even foreign powers, at a later period, interrupted the regular transmission of royal authority (2 Kings xxi. 24; xxiii. 24, 30; xxiv. 17). The ceremony of anointing, which was observed at least in the case of Saul, David, and Solomon (1 Sam. ix. 14; x. 1; xv. 1; xvi. 12; 2 Sam. ii. 4; v. 1; 1 Kings i. 34; xxxix. 5), and in which the prophet or high-priest who performed the rite acted as the representative of the theocracy and the expounder of the will of heaven, must have given to the spiritual power very considerable influence; and both in this particular

and in the very nature of the observance directs the mind to Egypt, where the same custom prevailed, and where the power of the priestly caste was immense (Wilkinson's *Ancient Egyptians*, v. 279). Indeed, the ceremony seems to have been essential to constitute a legitimate monarch (2 Kings xi. 12; xxiii. 30); and thus the authorities of the Jewish church held in their hands, and had subject to their will, a most important power, which they could use either for their own purposes or the common good. In consequence of the general observance of this ceremony, the term 'anointed,' 'the Lord's anointed' (1 Sam. ii. 10; xvi. 6; xxiv. 6; 2 Sam. xix. 21; Ps. ii. 2; Lam. iv. 20), came to be employed in rhetorical and poetical diction as equivalent in meaning to the designation king. We have seen in the case of Saul that personal and even external qualities had their influence in procuring ready obedience to a sovereign; and further evidence to the same effect may be found in Ps. xlv. 3; Ezek. xxviii. 12: such qualities would naturally excite the enthusiasm of the people, who appear to have manifested their approval by acclamations (1 Sam. x. 24; 1 Kings i. 25; 2 Kings ix. 13; xi. 13; 2 Chron. xxiii. 11; see also Joseph. *De Bell. Jud.*, i. 33. 9). Jubilant music formed a part of the popular rejoicings (1 Kings i. 40); thank-offerings were made (1 Kings i. 25); the new sovereign rode in solemn procession on the royal mule of his predecessor (1 Kings i. 38), and took possession of the royal harem—an act which seems to have been scarcely less essential than other observances which appear to us to wear a higher character (1 Kings ii. 13, 22; 2 Sam. xvi. 22). A numerous harem, indeed, was among the most highly estimated of the royal luxuries (2 Sam. v. 13; 1 Kings xi. 1; xx. 3). It was under the supervision and control of eunuchs, and passed from one monarch to another as a part of the crown-property (2 Sam. xii. 8). The law (Deut. xvii. 17), foreseeing evils such as that by which Solomon, in his later years, was turned away from his fidelity to God, had strictly forbidden many wives; but Eastern passions and usages were too strong for a mere written prohibition, and a corrupted religion became a pander to royal lust, interpreting the divine command as sanctioning eighteen as the minimum of wives and concubines. In the original distribution of the land no share, of course, was reserved for a merely possible monarch; yet the kings were not without several sources of income. In the earlier periods of the monarchy the simple manners which prevailed would render copious revenues unnecessary; and a throne which was the result of a spontaneous demand on the part of the people, would easily find support in free-will offerings, especially in a part of the world where the great are never approached without a present. There seems also reason to conclude that the amount of the contributions made by the people for the sustenance of the monarch depended, in a measure, on the degree of popularity which, in any particular case, he enjoyed, or the degree of service which he obviously rendered to the state (1 Sam. x. 27; xvi. 20; 2 Sam. viii. 11; 1 Kings x. 11, 25, sq.). That presents of small value and humble nature were not despised or thought unfit for the acceptance of royalty, may be learnt from that which Jesse sent to Saul (1 Sam. xvi. 20), 'an ass, with bread and a bottle of wine, and a kid.' The indirect detail 'of the substance which was king David's,' found in 1 Chron. xxvii. 25, sq. (comp. 1 Sam. viii. 14; 2 Chron. xxvi. 10, sq.), shows at how early a period the Israelitish throne was in possession of very large property, both personal and real. The royal treasury was replenished by confiscation, as in the case of Naboth (1 Kings xxi. 16; comp. Ezek. xlvi. 16, sq.; 2 Sam. xvi. 4). Nor were taxes unknown. Samuel had predicted (1 Sam. viii. 15), 'He will take the tenth of your seed and of your vineyards,' &c.; and so in other passages (1 Kings v. 13; ix. 21) we find that levies both of men and money were made for the monarch's purposes; and, in cases of special need, these exactions were large and rigorously levied (2 Kings xxiii. 35), as when Jehoiakim 'taxed the land to give the money according to the commandment of Pharaoh; he exacted the silver and the gold of the people of the land, of every one according to his taxation.' So long, however, as the native vigour of a young monarchy made victory easy and frequent, large revenues came to the king from the spoils of war (2 Sam. viii. 2, sq.). Commerce also supplied abundant resources (1 Kings x. 15). In the 14th verse of the chapter last referred to, it is said that 'the weight of gold that came to Solomon in one year was six hundred three score and six talents of gold.' In the same connection we find particulars which give a high idea of Solomon's opulence and splendour: 'Two hundred targets of beaten gold, each of six hundred shekels; three hundred shields of beaten gold, of three pounds of gold each; a great throne of ivory, overlaid with the best gold; drinking-vessels of gold: silver was accounted nothing of in Solomon's days.' A navy is also spoken of, which was at sea with the navy of Hiram, king of Tyre: this navy came once in every three years, bringing gold and silver, ivory, apes, and peacocks. 'So king Solomon exceeded all the kings of the earth for riches.'

According to Oriental custom, much ceremony and outward show of respect were observed. Those who were intended to be received with special honour were placed on the king's right hand (1 Kings ii. 19). The most profound homage was paid to the monarch, which was required not merely by common usage, but by the voice of religious wisdom (Prov. xxiv. 21)—a requirement which was not unnatural in regard to an office that was accounted of divine origin, and to have a sort of vice-divine authority. Those who presented themselves before the royal presence fell with their face towards the ground till their forehead touched it (1 Sam. xxv. 23; 2 Sam. ix. 6; xix. 18), thus worshipping or doing obeisance to the monarch, a ceremony from which even the royal spouse was not exempted (1 Kings i. 16). A kiss was among the established tokens of reverence (1 Sam. x. 1; Ps. ii. 12), as were also hyperbolical wishes of good (Dan. ii. 4; iii. 9). Serious offences against the king were punished with death (1 Kings xxi. 10).

Deriving their power originally from the wishes of the people, and being one of the same race, the Hebrew kings were naturally less despotic than other Oriental sovereigns, mingled more with their subjects, and were by no means difficult of access (2 Sam. xix. 8; 1 Kings xx. 39; Jer. xxxviii. 7;

1 Kings iii. 16; 2 Kings vi. 26; viii. 3). After death the monarchs were interred in the royal cemetery in Jerusalem: 'So David slept with his fathers, and was buried in the city of David' (1 Kings ii. 10; xi. 43; xiv. 31). But bad kings were excluded 'from the sepulchres of the kings of Israel' (2 Chron. xxviii. 27). In 1 Kings iv. will be found an enumeration of the high officers of state under the reign of Solomon (see also 1 Kings x. 5; xii. 18; xviii. 3; 2 Kings viii. 16; x. 22; xviii. 18; xix. 2; 1 Chron. xxvii. 25; Isa. xxii. 15; Jer. lii. 25). The misdeeds of the Jewish crown, and the boldness with which they were reproved, may be seen exemplified in Jer. xxii.: 'Thus saith the Lord, Execute judgment and righteousness, and do no wrong; do no violence to the stranger, the fatherless, nor the widow; neither shed innocent blood. But if ye will not hear these words, this house shall become a desolation,' &c. Reference on the subject here treated of may be made to Schickard, *Jus Regium Hebræor.* Tübing. 1621; Carpzov, *Appar. Crit.* p. 52; Michaelis, *Mos. Recht*, i. 298; Othon. *Lex. Rabbin*, p. 575.—J. R. B.

KINGS, BOOKS OF. The two books of Kings formed anciently but one book in the Jewish Scriptures. The present division, following the Septuagint and Latin versions, has been common in the Hebrew Bibles since the Venetian editions of Bomberg. That the book was originally an unbroken treatise is affirmed by Origen and Jerome, Melito of Sardis, and Josephus, (Origen, apud Euseb. *Praep. Evang.* vi. 25, Βασιλείων τριτη, τεταρτη, εν ἑνι Ουαμμελεχ Δαβιδ; Hieronym. *Prolog. Gal.;* Joseph. *Cont. Apion.* i. 8). Great stress cannot always be laid on the Jewish forms of the sacred books, as they were arranged so as to correspond with the letters of the Hebrew alphabet. The old Jewish name was borrowed, as usual, from the commencing words of the book, והמלך דוד, Grecized as in the above quotation from Eusebius. The Septuagint and Vulgate now number them as the third and fourth books of Kings, reckoning the two books of Samuel the first and second. Their present title, מלכים, Βασιλείων, *Regum*, in the opinion of Hävernick, has respect more to the formal than essential character of the composition (*Einleitung*, § 168); yet under such forms of government as those of Judah and Israel the royal person and name are intimately associated with all national acts and movements, legal decisions, warlike preparations, domestic legislation, and foreign policy. The reign of an Oriental prince is identified with the history of his nation during the period of his sovereignty. More especially in the theocratic constitution of the Jewish realm the character of the monarch was an important element of national history, and, of necessity, it had considerable influence on the fate and fortunes of the people.

The books of Kings contain the brief annals of a long period, from the accession of Solomon till the dissolution of the commonwealth. The first chapters describe the reign of Solomon over the united kingdom, and the revolt under Rehoboam. The history of the rival states is next narrated in parallel sections till the period of Israel's downfall on the invasion of Shalmanezer. Then the remaining years of the principality of Judah are recorded till the conquest of Nebuchadnezzar and the commencement of the Babylonish captivity. In the article Israel, the period comprised has been exhibited under the name and reign of the kings who are mentioned in these books, and there also, and in the article Judah, the chronology of the books has been sufficiently considered.

There are some peculiarities in this succinct history worthy of attention. It is very brief, but very suggestive. It is not a biography of the sovereigns, nor a mere record of political occurrences, nor yet an ecclesiastical register. King, church, and state are all comprised in their sacred relations. It is a theocratic history, a retrospective survey of the kingdoms as existing under a theocratic government. The character of the sovereign is tested by his fidelity to the religious obligations of his office, and this decision in reference to his conduct is generally added to the notice of his accession. The new king's religious character is generally portrayed by its similarity or opposition to the way of David, of his father, or of Jeroboam, son of Nebat, 'who made Israel to sin.' Ecclesiastical affairs are noticed with a similar purpose, and in contrast with past or prevalent apostacy, especially as manifested in the popular superstitions, whose shrines were on the 'high places.' Political or national incidents are introduced in general for the sake of illustrating the influence of religion on civic prosperity; of showing how the theocracy maintained a vigilant and vengeful guardianship over its rights and privileges—adherence to its principles securing peace and plenty, disobedience to them bringing along with it sudden and severe retribution. The books of Kings are a verification of the Mosaic warnings, and the author of them has kept this steadily in view. He has given a brief history of his people, arranged under the various political chiefs in such a manner as to show that the government was essentially theocratic, that its spirit, as developed in the Mosaic writings, was never extinct, however modified or inactive it might sometimes appear.

Thus the books of Kings appear in a religious costume, quite different from the form they would have assumed either as a political or ecclesiastical narrative. In the one case legislative enactments, royal edicts, popular movements, would have occupied a prominent place; in the other, sacerdotal arrangements, Levitical service, music and pageantry, would have filled the leading sections of the treatise. In either view the points adduced would have had a restricted reference to the palace or the temple, the sovereign or the pontiff, the court or the priesthood, the throne or the altar, the tribute or tithes, the nation on its farms, or the tribes in the courts of the sacred edifice. But the theocracy conjoined both the political and religious elements, and the inspired annalist unites them as essential to his design. The agency of divinity is constantly recognised, the hand of Jehovah is continually acknowledged. The chief organ of theocratic influence enjoys peculiar prominence. We refer to the incessant agency of the prophets, their great power and peculiar modes of action as detailed by the composer of the books of Kings. They interfered with the succession, and their instrumentality was apparent in the schism. They roused the

people, and they braved the sovereign. The balance of power was in their hands; the regal dignity seemed to be sometimes at their disposal. In times of emergency they dispensed with usual modes of procedure, and assumed an authority with which no subject in an ordinary state can safely be intrusted, executing the law with a summary promptness which rendered opposition impossible, or at least unavailing. They felt their divine commission, and that they were the custodiers of the rights of Jehovah. At the same time they protected the interests of the nation, and, could we divest the term of its association with unprincipled turbulence and sedition, we would, like Winer, style them the demagogues of Israel (Winer, *Realwört.* art. *Prophet*). The divine prerogative was to them a vested right, guarded with a sacred jealousy from royal usurpation or popular invasion; and the interests of the people were as religiously protected against encroachments, too easily made under a form of government which had not the safeguard of popular representation or aristocratic privilege. The priesthood was in many instances, though there are some illustrious exceptions, merely the creature of the crown, and therefore it became the *prophetenthum* to assert its dignity and stand forth in the majestic insignia of an embassy from heaven.

The truth of these sentiments, as to the method, design, and composition of the books of Kings, is confirmed by ample evidence.

1. Large space is occupied with the building of the temple—the palace of the Divine Protector—his throne in it being above the mercy-seat and between the cherubim (ch. v.-viii.). Care is taken to record the miraculous phenomenon of the descent of the Schekinah (ch. viii. 10). The prayer of Solomon at the dedication of the house is full of theocratic views and aspirations.

2. Reference is often made to the Mosaic Law with its provisions; and allusions to the earlier history of the people frequently occur (1 Kings ii. 3; iii. 14; vi. 11, 12; viii. 58, &c.; 2 Kings x. 31; xiv. 6; xvii. 13, 15, 37; xviii. 4-6; xxi. 1-8). Allusions to the Mosaic code are found more frequently toward the end of the second book, when the kingdom was drawing near its termination, as if to account for its decay and approaching fate.

3. Phrases expressive of Divine interference are frequently introduced (1 Kings xi. 31; xii. 15; xiii. 1, 2, 9; and xx. 13, &c.).

4. Prophetic interposition is a very prominent theme of record. It fills the vivid foreground of the historical picture. Nathan was occupied in the succession of Solomon (1 Kings i. 45); Ahijah was concerned in the revolt (xi. 29-40). Shemaiah disbanded the troops which Rehoboam had mustered (xii. 21). Ahijah predicted the ruin of Jeroboam, whose elevation he had promoted (xiv. 7). Jehu, the prophet, doomed the house of Baasha (xvi. 1). The reign of Ahab and Ahaziah is marked by the bold, rapid, mysterious movements of Elijah. Under Ahab occurs the prediction of Micaiah (xxii. 8). The actions and oracles of Elisha form the marvellous topics of narration under several reigns. The agency of Isaiah is also recognised (2 Kings xix. 20; xx. 16). Besides 1 Kings xiii. presents another instance of prophetic operation; and in xx. 35, the oracle of an unknown prophet is also rehearsed. Huldah, the prophetess, was an important personage under the government of Josiah (2 Kings xxii. 14). Care is also taken to report the fulfilment of striking prophecies, in the usual phrase, 'according to the word of the Lord' (1 Kings xii. 15; xv. 29; xvi. 12; 2 Kings xxiii. 15-18; ix. 36; xxiv. 2). So, too, the Old Syriac version prefixes, 'Here follows the book of the kings who flourished among the ancient people; and in this is also exhibited the history of the prophets who flourished during their times.'

5. Theocratic influence is recognised both in the deposition and succession of kings (1 Kings xiii. 33; xv. 4, 5, 29, 30; 2 Kings xi. 17, &c.). Compare on the whole of this view Hävernick, *Einleit.* § 168; Jahn, *Introduct.* § 46; Gesenius, *Ueber Jes.* vol. i. p. 934. It is thus apparent that the object of the author of the Books of Kings was, to describe the history of the kingdoms, especially in connection with the theocratic element. This design accounts for what De Wette (*Einleit.* § 185) characteristically terms *der steife prophetische pragmatismus*, and for the frequent myths which this writer finds in these books.

The authorship and age of this historical treatise may admit of several suppositions. Whatever were the original sources, the books are evidently the composition of one writer. The style is generally uniform throughout. The same forms of expression are used to denote the same thing, *e. g.* the male sex (1 Kings xiv. 10, &c.); the death of a king (1 Kings xi. 43, &c.); modes of allusion to the law (1 Kings xi. 13); fidelity to Jehovah (1 Kings viii. 63, &c.; De Wette, *Einleit.* § 184, *a*; Hävernick, *Einleit.* § 171). Similar idioms are ever recurring, so as to produce a uniformity of style (*Monotonie der Darstellung*, Hävernick, *l. c.*). The sources whence this historic information has been derived have been variously named. That annals contemporary with the events which they describe were written in the early period of the Jewish state, may be at once admitted. Eichhorn supposes that the sources of 'Kings' were private historical works (*Einleit.* § 482). De Wette, from the legends related in them, cannot believe them to be official documents. Bertholdt, Hävernick, and Movers hold that the books are extracts from the public annals (comp. Hävernick, § 169). The inspired historiographer refers his readers to these sources of evidence in such frequent phrases as יתר דברי 'the *rest* of the acts.' Such a reference is made especially to the sources, when other royal acts than those narrated in the books of Kings are glanced at. These sources are styled the book of the Chronicles of the kings of Judah, or Israel. Similar phraseology is used in Esther x. 2; vi. 1, to denote the official annals of the Persian empire. Public documents are spoken of in the same way (Neh. xii. 23). There is little reason to suppose that the book referred to in this last passage is that styled Chronicles in our copy of the Scriptures (Movers, *Chronik*, § 234). So we infer that the 'Book of the Chronicles of the Kings,' so often alluded to, was an authentic document, public and official. Once indeed mention is made of a work entitled 'The Book of the Acts of Solomon.'

That the prophets themselves were employed in recording contemporaneous events, is evident

from 2 Chron. xx. 34; 1 Chron. xxix. 29. In the course of the narrative we meet with many instances of description, having the freshness and form of nature, and which are apparently direct quotations from some journal, written by one who testified what he had seen (1 Kings xx. 10; 2 Kings xii. 15; xiv. 8). Thus the credibility of the history contained in these books rests upon a sure foundation. What neologists style their mythical character or colouring furnishes to every believer in the reality of the theocratic government established by Moses, continued evidence that the Jews were God's peculiar people—that Jehovah was their sovereign (Hävernick, § 170; Hengstenberg, *Beitr.* ii. 169).

As to what has been termed the anti-Israelitish spirit of the work (Bertholdt, *Einleit.* p. 949), we do not perceive it. Truth required that the kingdom of Israel should be described in its real character. Idol-worship was connected with its foundation; moscholatry was a state provision; fidelity obliged the annalist to state that all its kings patronized the institutions of Bethel and Dan, while eight, at least, of the Jewish sovereigns adhered to the true religion, and that the majority of its kings perished in insurrection, while those of Judah, in general, were exempted from seditious tumults and assassination.

Now, the compiler from these old documents —he who shaped them into the form they have in our present books of Kings—must have lived in a late age. The Second Book of Kings concludes with an account of the liberation of Jehoiachin, king of Judah, from prison in Babylon—an event which, according to Jahn, happened in the twenty-sixth, or according to Prideaux, in the twenty-eighth year after the destruction of Jerusalem. Jahn and Hävernick place the composition of 'Kings' in the reign of Evil-merodach; and De Wette, towards the end of the Captivity. Instances of later phraseology occurring in the books of Kings are given by De Wette (§ 115. 6). Jewish tradition makes Jeremiah the author (*Baba-bathra*, fol. 15. 1). Calmet ascribes the authorship to Ezra. The former opinion, adopted by Grotius, and lately revindicated by Hävernick, certainly appears the more probable. There is considerable linguistic affinity between the books of Kings and the prophecy of Jeremiah.

Kings.	Jeremiah.
2 K. xvii. 13 . .	vii. 13.
1 K. x. 8 . . .	xxii. 8.
2 K. xxiv.-xxv. . .	lii.
1 K. xi. 4; viii. 25; ix. 5.	xxxiii. 17; xiii. 13; xvii. 25.
2 K. xxi. 12 . .	xix. 3.

In the absence of certain evidence this opinion may be deemed the most likely, and is a more simple theory than that of Movers, who supposes that Jeremiah compiled a more ancient production —a book of Kings—the source of our present treatise. It explains the close similarity of the books of Kings and Jeremiah in spirit, style, and tendency, more easily and more satisfactorily than the supposition of De Wette, or any other conjecture of like nature. Objections against this opinion, from the hasty way in which Jeremiah has described his own times, admit of an easy solution. Contemporaries were familiar with his life and times, while his own prophecy contains the desired information. Another objection, that Jeremiah could not have lived longer than Evil-merodach, is noticed and refuted by Hävernick (*Ueber Daniel*, p. 14). The age of the Jewish tradition as to the authorship of the books of Kings, may be inferred from the fact that they are placed among the נביאים.

In reference to apparent contradictions or anachronisms, it must be borne in mind that the text of these books is not in a very pure state, and that in nothing do copyists blunder more than in the transcription of numerals. [Chronicles.] As to points of real or alleged contradiction, see Davidson's *Sacred Hermeneutics*, p. 516. It has been sometimes thought that the books of Samuel were the production of the same *redactor* who composed the books of Kings. Both compositions form a history almost continuous, though 2 Sam. xvi.-xxiv. is evidently an appendix. That there should be many points of similarity in two works of history on kindred themes, and having a similar purpose in view, surprises no one. The close philological affinity on which Stähelin insists so much (see Tholuck's *Literar. Anzeig*, 1838, p. 526), may thus be easily accounted for; yet there are also points of dissimilarity. The language of 'Samuel' has few marks of later usage; the style has more traces of an early age about it. The books of Samuel have not the compactness and symmetry of the books of Kings. The greater portion of them seems to be an original work, rather than a compilation.

The age of the books of Kings may be intermediate between the early work of Samuel and the later treatise of Chronicles.

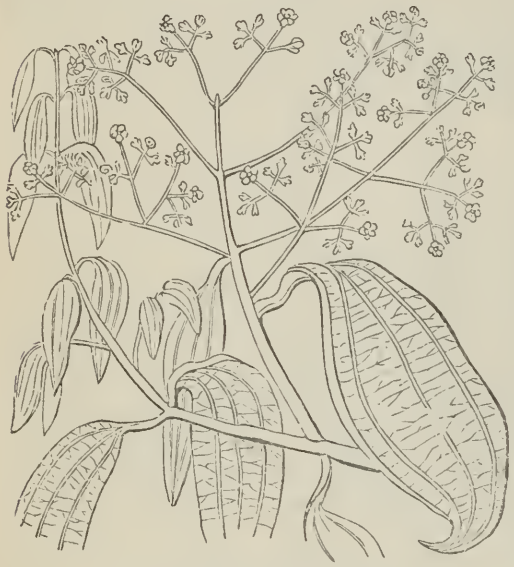
The 'Introductions' referred to in the course of this article may be consulted. Modern commentators upon 'Kings' are scarce, and there are not many old ones: Seb. Leonhardi Ὑπομνήματα, *in Libb. Reg.* Erf. 1606, Lips. 1610-14; Seb. Schmidii *Annot. in Libb. Reg.* Strasb. 1687; and the various authors in the *Critici Sacri*.—J. E.

KINNAMON (קִנָּמוֹן), translated 'cinnamon,' occurs in three places of Scripture; first, about 1600 years before the Christian era, in Exod. xxx. 23, where it is enumerated as one of the ingredients employed in the preparation of the holy anointing oil: 'Take thou also unto thee powerful spices, myrrh, and of sweet cinnamon (*kinnamon besem*) half as much (*i. e.* 250 shekels), together with sweet calamus and cassia.' It is next mentioned in Prov. vii. 17, 'I have perfumed my bed with myrrh, aloes (*ahalim*), and *cinnamon*.' And again in Cant. iv. 14, 'Spikenard and saffron; calamus and *cinnamon*, with all trees of frankincense; myrrh and aloes (*ahalim*), with all the chief spices. While in Rev. xxiii. 13, among the merchandise of Babylon, we have 'cinnamon, and odours, and ointments, and frankincense.'

In the earliest notice, it is called *kinnamon besem*, or 'sweet cinnamon.' Dr. Vincent is inclined to consider *khennah besem* and *khinnamon besem* as derived from the same root.

Many writers have doubted whether the *kinnamon* of the Hebrews is the same article that we now call cinnamon. Celsius quotes R. Ben Melech (*ad Cant.* iii. 14) and Saadias (Exod.

xxx.) as considering it to be the *Lign Aloe*, or *Agallochum*. Others have doubted whether our cinnamon was at all known to the ancients. But the same thing has been said of almost every other drug which is noticed by them. If we were to put faith in all these doubts, we should be left without any substances possessed of sufficiently remarkable properties to have been articles of ancient commerce. The word *κίνναμωμον* occurs in many of the Greek authors, as Herodotus, Hippocrates, Theophrastus, Dioscorides, Galen, &c. The first of these, writing 400 years before the Christian era, describes Arabia as the last inhabited country towards the south, and as the only region of the earth which produces frankincense, myrrh, cinnamon, cassia, and ledanum. Of cinnamon he says, 'which we, as instructed by the Phœnicians, call *κιννάμωμον*.' He states, moreover, that the Arabians were unacquainted with the particular spot in which it was produced, but that some asserted it grew in the region where Bacchus was educated. From all this we can only infer that it was the production of a distant country, probably India, and that it was obtained by the route of the Red Sea. Theophrastus (ix. 5) gives a fuller but still fabulous account of its production, and it is not until the time of Dioscorides, Galen, and the Periplus of the Erythræan sea, that we get more definite information. Galen says that cassia and cinnamon are so much alike that it is not an easy matter to distinguish the one from the other. This is a difficulty that still continues to be experienced. Dioscorides (i. 12) says that cassia grows in Arabia, and that there are several kinds of it; and of cinnamon he states also (i. 13) that there are several species, named from the different places where it is procured. But the best sort is that which is like the cassia of Mosylon, and is itself called Mosyllitic, or as Pliny says, 'Portus Mosyllites quo cinnamomum devehitur' (vi. 29). Mr. Cooley, however, in his edition of Larcher's *Notes to Herodotus*, adduces from Bruce's *Travels* (vol. vii. p. 329), 'the bastard kind of cinnamon, called by the Italians *canella*, which, notwithstanding what Bellonius says, and before him Pliny, grows plentifully among the incense and myrrh at Cape Guardafui, the *Mosylon promontorium* and *promontorium aromaticum*, and here only the distinction obtains of mountain cassia and that which grows on the plain.' Notwithstanding this, it would require the testimony of a careful and well-qualified botanist to prove that the cinnamon plant grows in Africa as well as in Ceylon. Several kinds are described by Dioscorides, and no fewer than ten kinds in the Periplus of Arrian (vid. Vincent, *Periplus*, ii. p. 711), and among these the Σκληροτερά, from the Greek *σκληρός*, 'hard,' which he translates 'xylocassia,' or 'wood cinnamon,' and states to be 'a term which occurs frequently, and perhaps distinguishes the *cassia lignea* (wood cinnamon) from the *cassia fistula* (*cannella*, or pipe cinnamon).' It is curious that the Persians and Arabians denominate cinnamon, for which they give *akimona* as the Greek name, *dar-seeni*, evidently derived from the Hindoo *dar-cheenee*, or Chinese wood, as if it had, like the cinnamon of the Greeks, been originally only the small branches and twigs, and not the separated bark, as in modern cinnamon and cassia. It has been asked 'whether the foreign element (*κιν*) in the Greek name *κιννάμωμον*, does not point to the Chinese origin of the production so named?' But the Cingalese *cacyn-nama* (dulce lignum) and the Malayan *kaimanis* are more probable derivations.



Cinnamon of the best quality is imported in the present day from Ceylon, and also from the Malabar coast, in consequence of the cinnamon plant (*Cinnamomum Zeylanicum*) having been introduced there from Ceylon. An inferior kind is also exported from the peninsula of India, the produce of other species of *cinnamomum*, according to Dr. Wight. From these countries the cinnamon and cassia of the ancients must most likely have been obtained, though both are also produced in the islands of Sumatra and Borneo, in China, and in Cochinchina. Cinnamon is imported in bales and chests—the bundles weighing about 1 lb. each. The pieces consist of compound quills, are about three feet long, slender, and inclose within them several smaller quills. These are thin, smooth, of a brownish colour, of a warm, sweetish, and agreeable taste, and fragrant odour; but several kinds are known in modern markets, as they were in ancient times.

371. [Laurus kinnamomum.]

In Ceylon cinnamon is carefully cultivated, the best cinnamon gardens being on the south-western coast, where the soil is light and sandy, and the atmosphere moist from the prevalent southern winds. The plants begin to yield cinnamon when about six or seven years old, after which the shoots may be cut every three or four years. The best kinds of cinnamon are obtained from twigs and shoots; less than half, or more than two or three inches in diameter, are not peeled. 'The peeling is effected by making two opposite, or when the branch is thick, three or four longitudinal incisions, and then elevating the bark by introducing the peeling knife beneath it. In twenty-four hours the epidermis and greenish pulpy matter are carefully scraped off. In a few hours the smaller quills are introduced into the larger ones, and in this way congeries of quills are formed, often measuring forty inches in length. The bark is then dried in the sun, and afterwards made into bundles, with pieces of split bamboo twigs' (Percival's *Account of Ceylon*). Besides cinnamon, an oil of cinnamon is obtained in Ceylon, by macerating the coarser pieces of the bark, after being reduced to a coarse powder, in sea-water, for two days, when both are submitted to distillation. A fatty substance is also obtained by

bruising and boiling the riper fruit, when an oily body floats on the surface, which on cooling concretes into a dirty whitish, rather hard, fatty matter. Some camphor may be procured from the roots. Respecting the former, it yields a striking confirmation of the minute knowledge which the ancients had of some products of India. Thus, as we have elsewhere mentioned (*Essay on Antiquity of Hindoo Medicine*, p. 105), Theophrastus (ix. 7) along with cinnamon and cassia, describes two kinds of *comacum*, one a fruit, and the other employed for mixing with the most precious ointments. Bodæus a Stapel (p. 1009) says, 'Quale fuerit hoc comacum, quod unguentis addebatur, me ignorare fateor.' These seem to me to be substances of which we have only in recent times acquired any correct knowledge, namely, the fruit of the cinnamon plant, and the fatty oil extracted from it, of which there are specimens in the (King's) College Museum of Materia Medica (*Essay*, p. 106).

372. [Kinnamomum cassia.]

Cassia bark, as we have seen, was distinguished with difficulty from cinnamon by the ancients. In the present day it is often sold for cinnamon; indeed, unless a purchaser specify *true* cinnamon, he will probably be supplied with nothing but cassia. It is made up into similar bundles with cinnamon, has the same general appearance, smell, and taste; but its substance is thicker and coarser, its colour darker, its flavour much less sweet and fine than that of Ceylon cinnamon, while it is more pungent, and is followed by a bitter taste; it is also less closely quilled, and breaks shorter than genuine cinnamon. Dr. Pereira, whose description we have adopted, has ascertained that cassia is imported into the London market from Bombay (the produce of the Malabar coast), and also from the Mauritius, Calcutta, Batavia, Singapore, the Philippine Islands, and Canton. Mr. Reeves (*Trans. Med. Bot. Soc.* 1828, p. 26) says, 'Vast quantities both of cassia seeds (buds) and cassia lignea are annually brought to Canton from the province of Kwangse, whose principal city (*Kweihin*, literally 'cassia forest') derives its name from the forests of cassia around it. The Chinese themselves use a much thicker bark, unfit for the European market.' The Malabar cassia lignea is thicker and coarser that that of China. From the various sources, independently of the different qualities, it is evident, as in the case of cinnamon, that the ancients might have been, as no doubt they were, acquainted with several varieties of cassia. These, we have no doubt, are yielded by more than one species. Mr. Marshall, from information obtained while he was staff-surgeon in Ceylon, maintained that cassia, or at least a part of it, was the coarser bark of the true cinnamon. Dr. Wight has ascertained that more than one species yields the cassia of Malabar, often called cinnamon. The Chinese cassia is supposed to be produced by the *cinnamomum aromaticum* of Nees von Esenbeck, the *cinnamomum cassia* of Blume, which Dr. Christison ascertained is cultivated in our hot-houses, and confounded with the true cinnamon. It was first imported, we believe, by the Messrs. Loddiges from China. Besides cassia bark, there is also a cassia oil, and cassia buds, supposed to be produced by the same tree. There can be no reasonable doubt, as cinnamon and cassia were known to the Greeks, that they must have been known to the Hebrews also, as the commerce with India can be proved to have been much more ancient than is generally supposed [Kiddah].—J. F. R.

KIPPOD (קִפּוֹד). This name occurs but three times in Scripture (Isa. xiv. 23; xxxiv. 11; and Zeph. ii. 14), and has been variously interpreted—owl, osprey, tortoise, porcupine, otter, and in the Arabic, bustard. Bochart, Shaw, Lowth, and other great authorities, have supported the opinion that it refers to the porcupine. The main stress of their argument seems to depend upon the component parts of the original word, of which the first syllable is said to be derived from קָנָה *kana*, 'spine;' in confirmation of which Bochart, with his wonted learning, cites the Chaldee, Hebrew, Arabic, and Ethiopian names of the porcupine and hedgehog, which apparently confirm his opinion; but although derivations, when they are supported by apparent identity of meaning in other kindred languages, may satisfy the judgment of mere philologists, something more will be demanded by naturalists, who, looking for more positive indications than apparent synonyma and inferential derivation, have recourse mainly to the context for the real conditions, which must determine the meaning of disputed terms. Now, in Isa. xiv. 23, 'I will make it a possession for the kippod (bittern), and pools of water,' &c., the words are plain and natural. Marshes and pools are not the habitation of hedgehogs, for they shun water. In Isa. xxxiv. 11, it is said, 'The cormorant (*Sterna caspia*) and the kippod (bittern) shall possess it, the owl also and the raven shall dwell in it,' &c.; that is, in the ruins of Idumæa. Here, again, the version is plain, and a hedgehog most surely would be out of place. Zeph. ii. 14, 'Both the cormorant (*Sterna caspia*) and the kippod (bittern) shall lodge in the upper lintels of it; and their voice shall sing in the windows,' &c. Surely here kippod cannot mean the hedgehog, a nocturnal, grovelling, worm-eating animal, entirely or nearly mute, and incapable of climbing up walls; one that does not haunt ruins, but earthy banks in wooded regions, and that is absolutely solitary in its habits. We thus see that the arguments respecting kippod, supplied by kephud, or kephod—for we find these various readings—are all mere specu-

lations, producing at best only negative results. Those drawn from indications of manners, such as the several texts contain, are, on the contrary, positive, and leave no doubt that the animal meant is not a hedgehog, nor even a mammal, but a bird. Hence, though we admit the assumed root of the denomination, still it must bear an interpretation which is applicable to one of the feathered tribes, probably to certain wading species, which have, chiefly on the neck, long pointed feathers, more or less speckled. The Arabian bustard, *Otis houbara*, might be selected, if it were not that bustards keep always in dry deserts and uplands, and that they never roost, their feet not admitting of perching, but rest on the ground. We think the term most applicable to the heron tribes, whose beaks are formidable spikes that often kill hawks; a fact well known to Eastern hunters. Of these, *Nycticorax Europæus*, or common night heron, with its pencil of white feathers in the crest, is a species, not uncommon in the marshes of Western Asia; and of several species of bittern, *Ardea (botaurus) stellaris* has pointed long feathers on the neck and breast, freckled with black, and a strong pointed bill. After the breeding-season it migrates and passes the winter in the south, frequenting the marshes and rivers of Asia and Europe, where it then roosts high above ground, uttering a curious note before and after its evening flight, very distinct from the booming sound produced by it in the breeding-season, and while it remains in the marshes. Though not building, like the stork, on the tops of houses, it resorts, like the heron, to ruined structures, and we have been informed that it has been seen on the summit of Tauk Kesra at Ctesiphon.—C. H. S.

KIR (קִיר; Sept. Κύριος), a people and country subject to the Assyrian empire, to which the conquered Damascenes were transplanted (2 Kings xvi. 9; Isa. xxii. 6; Amos i. 5), and whither also the Aramæans in the east of Syria once wandered (Amos ix. 7). This is supposed by Major Rennel to be the same country which still bears the name of *Kur*distan or *Kour*distan (*Geog. of Herodot.* 391). There are, however, objections to this view, which do not apply so strongly to the notion of Rosenmüller and others, that it was a tract on the river Cyrus, or rather Kuros (Κῦρος and Κύρρος), in Zend Koro, which rises in the mountains between the Euxine and Caspian Seas, and runs into the latter after being joined by the Araxes. *Gur*jistan, or Grusia (Grusiana), commonly called Georgia, seems also to have derived its name from this river Kur, which flows through it.

KIR-HARESH; KIR-HARESETH; KIR-HERES. [KIR-MOAB.]

KIRJATH. This word means *town* or *city*, and is much used in the formation of names of places, like our own *town*. The following are the principal places distinguished by this term:—

1. KIRJATHAIM (קִרְיָתַיִם, *double town*; Sept. Καριαθαίμ), one of the most ancient towns in the country east of the Jordan, as it was possessed by the gigantic Emim (Gen. xiv. 5), who were expelled by the Moabites (Deut. ii. 9, 10), who in their turn were dispossessed by the Amorites, from whom it was taken by the Israelites. Kirjathaim was then assigned to Reuben (Num. xxxii. 37; Josh. xiii. 19). But during the Assyrian exile, the Moabites again took possession of this and other towns (Jer. xlviii. 1-23; Ezek. xxv. 9). Eusebius places it about half an hour west of the ruins of Medeba. Burckhardt found other ruins, called *El Teym*, which he conjectures to have been Kiria*thaim*, the last syllable of the name being retained. This is somewhat doubtful, as the Καριάδα (Καριάθα) of Eusebius is placed ten miles west of Medeba, whereas El Teym is but two miles. There was another place of this name in the tribe of Naphtali (1 Chron. vi. 76).

2. KIRJATH-ARBA, the ancient name of Hebron, but still in use in the time of Nehemiah (vi. 26) [HEBRON].

3. KIRJATH-BAAL (*city of Baal*). This city is more usually called KIRJATH-JEARIM.

4. KIRJATH-HUZOTH (*city of streets*), a town in Moab (Num. xxii. 39).

5. KIRJATH-JEARIM (קִרְיַת יְעָרִים, *city of forests*; Sept. Καριαθιαρίμ), one of the towns of the Gibeonites (Josh. ix. 17). It was to this place that the ark was brought from Beth-shemesh, after it had been removed from the land of the Philistines, and where it remained till removed to Jerusalem by David (1 Sam. vii.; 1 Chron. xiii.). This was one of the ancient sites which were again inhabited after the exile (Ezra ii. 25; Neh. vii. 29). Eusebius and Jerome speak of it as being in their day a village nine or ten miles from Diospolis (Lydda), on the road to Jerusalem. Dr. Robinson thinks it possible that the ancient Kirjath-jearim may be recognised in the present Kuryet-el-Enab. The first part of the name (Kirjath, Kuryet, signifying *city*) is the same in both, and is most probably ancient, being found in Arabic proper names only in Syria and Palestine, and not very frequently even there. The only change has been, that the ancient 'city of forests' has, in modern times, become the 'city of grapes.' The site is also about three hours, or nine Roman miles from Lydda, on the road to Jerusalem, and not very remote from Gibeon, from which Kirjath-jearim could not well have been distant. So close a correspondence of name and position seems to warrant the conclusion of Dr. Robinson in favour of Kuryet-el-Enab. This place is that which ecclesiastical tradition has identified with the Anathoth of Jeremiah, which Dr. Robinson refers to Anata [ANATHOTH]. It is now a poor village, its principal buildings being an old convent of the Minorites, and a Latin church. The latter is now deserted, but not in ruins, and is said to be one of the largest and most solidly constructed churches in Palestine (Robinson, ii. 109; 334-337).

6. KIRJATH-SANNAH (*city of palms*; Josh. xv. 49), otherwise KIRJATH-SEPHER (*city of the book*), a city of the tribe of Judah, called also DEBIR, which see (Josh. xv. 15, 16; Judg. i. 11, 12).

KIR-MOAB (קִיר־מוֹאָב, *the wall, stronghold, or citadel of Moab*; Sept. τὸ τεῖχος τῆς Μωαβιτίδος; Isa. xv. 1); called also KIR-HARESETH and KIR-HERES (קִיר־חֲרֶסֶת and קִיר־חָרֶס, *brick-fortress*, Isa. xvi. 7, 11; Jer. xlviii. 31), a fortified city in the territory of Moab. Joram king of Israel took the city, and destroyed it, except the

walls; but it appears from the passages here cited that it must have been rebuilt before the time of Isaiah. In his prophecy (xv. 1), the Chaldee paraphrast has put כרכא־מואב *kerraka Moab*, 'castle of Moab;' and the former of these words, pronounced in Arabic *karak*, *kerek*, or *krak*, is the name it bears in 2 Macc. xii. 17, Χάρακα: in Steph. Byzant. it is called Χαράκμωβα, in Abulfeda (*Tab. Syr.* p. 89), and in the historians of the Crusades. Abulfeda describes Karak as a small town, with a castle on a high hill, and remarks that it is so strong that one must deny himself even the wish to take it by force. In the time of the Crusades, and when in possession of the Franks, it was invested by Saladin; but after lying before it a month he was compelled to raise the siege (Bohaeddim, *Vita Saladin.* p. 55). The first person who visited the place in modern times was Seetzen, who says, 'Near to Karak the wide plain terminates which extends from Rabbah, and is broken only by low and detached hills, and the country now becomes mountainous. Karak, formerly a city and bishop's see, lies on the top of the hill near the end of a deep valley, and is surrounded on all sides with lofty mountains. The hill is very steep, and in many places the sides are quite perpendicular. The walls round the town are for the most part destroyed, and Karak can at present boast of little more than being a small country town. The castle, which is uninhabited, and in a state of great decay, was formerly one of the strongest in these countries. The inhabitants of the town consist of Mohammedans and Greek Christians. The present bishop of Karak resides at Jerusalem. From this place one enjoys, by looking down the Wady Karak, a fine view of part of the Dead Sea, and even Jerusalem may be distinctly seen in clear weather. The hill on which Karak lies is composed of limestone and brittle marl, with many beds of blue, black, and grey flints. In the neighbouring rocks there are a number of curious grottoes; in those which are under ground wheat is sometimes preserved for a period of ten years' (Zach's *Monatliche Correspond.* xviii. 434). A fuller account of the place is given by Burckhardt (*Travels in Syria*, pp. 379-387), by whom it was next visited; and another description is furnished by Irby and Mangles (*Travels*, pp. 361-370). From their account it would seem that the caverns noticed by Seetzen were probably the sepulchres of the ancient town. We also learn that the Christians of Karak (which they and Burckhardt call Kerek), are nearly as numerous as the Turks, and boast of being stronger and braver. They were, however, on good terms with the Turks, and appeared to enjoy equal freedom with them.

KISH, son of Ner, and father of King Saul (1 Sam. ix. 1).

KISHON (קִישׁוֹן; Sept. Κισῶν), a river which, after traversing the plain of Acre, enters the bay of the same name at its south-east corner. It is celebrated in Scripture for the overthrow of the host of Sisera in its overflowing stream (Judg. iv. 13; v. 21). It has been usual to trace the source of this river to Mount Tabor; but Dr. Shaw affirms that in travelling along the south-eastern brow of Mount Carmel, he had an opportunity of seeing the sources of the river Kishon, three or four of which lie within less than a furlong of each other, and are called Ras el Kishon, or the head of the Kishon. These alone, without the lesser contributions near the sea, discharge water enough to form a river half as large as the Isis. During the rainy season all the waters which fall upon the eastern side of Carmel, or upon the rising grounds to the southward, empty themselves into it in a number of torrents, at which time it overflows its banks, acquires a wonderful rapidity, and carries all before it. It was doubtless in such a season that the host of Sisera was swept away, in attempting to ford it. But such inundations are only occasional, and of short duration, as is indeed implied in the destruction in its waters of the fugitives, who doubtless expected to pass it safely.

The course of the stream, as estimated from the sources thus indicated, is not more than seven miles. It runs very briskly till within half a league of the sea; but when not augmented by rains, it never falls into the sea in a full stream, but insensibly percolates through a bank of sand, which the north winds have thrown up at its mouth. It was in this state that Shaw himself found it in the month of April, 1722, when it was crossed by him.

Notwithstanding Shaw's contradiction, the assertion that the Kishon derives its source from Mount Tabor has been repeated by modern travellers as confidently as by their ancient predecessors. Buckingham's statement, being made with reference to the view from Mount Tabor itself, deserves attention. He says that near the foot of the mountain on the south-west are 'the springs of the Ain-es-Sherrar, which send a perceptible stream through the centre of the plain of Esdraelon, and form the brook Kishon of antiquity.' Further on, the same traveller, on reaching the hills which divide the plain of Esdraelon from that of Acre, saw the pass through which the river makes its way from the one plain to the other (*Travels in Palest.* i. 168, 177). We have had opportunities of seeing much of streams similarly constituted; and it does not seem to us difficult to reconcile the seemingly conflicting statements with reference to the Kishon. On further inquiry, and more extensive comparison of observations made at different times of the year, it will probably be found that the remoter source of the river is really in Mount Tabor; but that the supply from this source is cut off in early summer, when it ceases to be maintained by rains or contributory torrents; whereas the copious supply from the nearer springs at Ras el Kishon, with other springs lower down, keep it up from that point, as a perennial stream, even during the drought of summer. Thus during one part of the year the source of the river may appear to be in Mount Tabor, while during another part the source of the diminished stream is at Ras el Kishon. In this view of the case we should expect that travellers crossing the plain in or shortly after the season of rain, would have encountered the temporary stream from Mount Tabor before the point where it meets the perennial streams from Carmel. The fact is, however, that the route has been little travelled in that season; but the required evidence is by no means wanting. Mariti (ii. 112) mentions the case of the English dragoman who was drowned, and his horse with him, in the attempt to cross such a stream in February, 1761. During the battle of Mount Tabor, between the French and Arabs,

April 16, 1799, many of the latter were drowned in their attempt to cross a stream, coming from Deburieh, which then inundated the plain (Burckhardt, *Syria*, p. 339). Monro, who crossed the river early in April (in its lower or perennial part), in order to ascend Mount Carmel, describes it as traversing the plain of Esdraelon: which he could not have done if he had not seen a stream flowing in that direction uniting with the river below Mount Carmel. The river, where he crossed it, *in a boat*, was then thirty yards wide. Afterwards, in crossing an arm of it, in the plain from Solam to Nazareth, he incidentally furnishes ground for his former view by stating that he crossed 'a considerable brook, and afterwards some others, which flow into a small lake on the northern side of the plain, and eventually contribute to swell the Kishon' (*Ramble*, i. 55, 281). Dr. Robinson says that this account corresponds with channels that he observed (*Bibl. Researches*, iii. 230). Prokesch also, in April, 1829, when travelling directly from Ramleh to Nazareth, entered the plain of Esdraelon at or near Lejjun, where he came upon the Kishon, flowing in a deep bed through marshy ground; and after wandering about for some time to find his way through the morass, he was at last set right by an Arab, who pointed out the proper ford (*Reise ins H. Land*, p. 129).

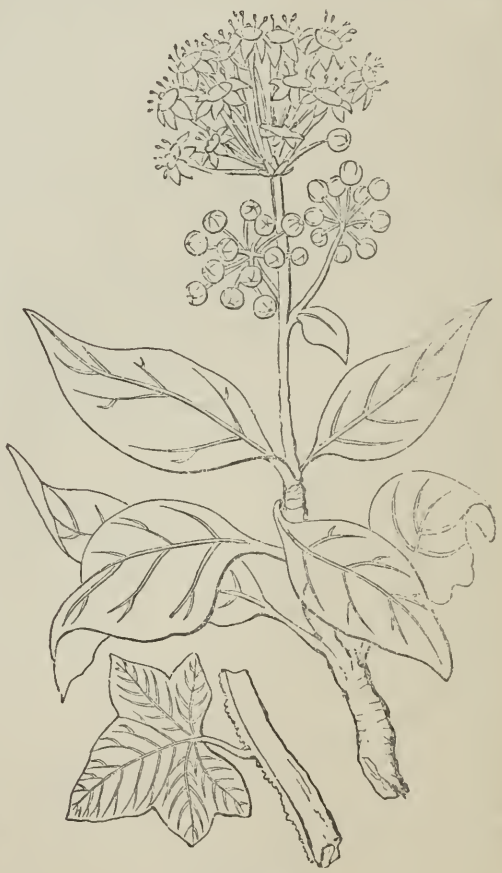
The Scriptural account of the overthrow of Sisera's host manifestly shows that the stream crossed the plain, and must have been of considerable size. The above arguments, to show that it did so, and still does so, notwithstanding Dr. Shaw's account, were, in substance, given several years ago in the *Pictorial History of Palestine* (Introd. p. cxci.); and the writer has had the satisfaction of seeing his view since confirmed by Dr. Robinson, who adds that 'not improbably, in ancient times, when the country was perhaps more wooded, there may have been *permanent* streams throughout the whole plain.'

The transaction of the prophet Elijah, who, after his sacrifice on Carmel, commanded the priests of Baal to be slain at the river Kishon (1 Kings xviii. 40), requires no explanation, seeing that it took place at the perennial lower stream. This also explains, what has sometimes been asked, whence, in that time of drought, the water was obtained with which the prophet inundated his altar and sacrifice.

KISHUIM (קִשֻּׁאִים) is translated *cucumbers* in our Auth. Vers., and the correctness of this rendering has been almost universally admitted. It first occurs in Num. xi. 5, in the verse already quoted in ANATTACHIM, where the Israelites, when in the desert, express their longings for the melons and the *kishuim* or cucumbers of Egypt. Reduced from the plural form, the word *kisha* is so similar to the Arabic قِثَّاء *kissa*, that there can be very little doubt of their both meaning the same thing. Celsius gives *keta*, *kati*, and *kusaia*, as different pronunciations of the same word in different Oriental languages. It does not follow that these names always indicate exactly the same species; since in the different countries they would probably be applied to the kinds of cucumber most common, or perhaps to those which were most esteemed in particular localities. Thus in Egypt the name *kati* appears to be applied to the species which is called *Cucumis chate* by botanists, and 'queen of cucumbers' by Hasselquist, who describes it as the most highly esteemed of all those cultivated in Egypt [ABATTACHIM]. In India the name *kisa*

373. [Cucumis sativus.]

is applied by the Mohammedans to the *Cucumis utilissimus*, or the common *kakree* of the natives; while in Persia and Syria the same name would probably be applied only to the common cucumber, or *Cucumis sativus*, as the two preceding species are not likely to be much known in either country. All travellers in the East notice the extensive cultivation and consumption of cucumbers and other herbs of the same tribe, especially where there is any moisture of soil, or the possibility of irrigation. Thus even in the driest parts, the neighbourhood of a well is often occupied by a field of cucurbitaceous plants, generally with a man or boy set to guard it from plunder, perched up on a temporary scaffolding, with a slight protection from the sun, where he may himself be safe from the attacks of the more powerful wild animals. That such plants appear to have been similarly cultivated among the Hebrews is evident from Isa. i. 8, 'The daughter of Zion is left like a cottage in a vineyard, like a lodge in a garden of cucumbers;' as well as from Baruch vi. 70, 'As a scarecrow in a garden of cucumbers keepeth nothing, so are their gods of wood' [ANATTACHIM].—J. F. R.



KISS. Originally the act of kissing had a symbolical character, and, though this import may now be lost sight of, yet it must be recognised the moment we attempt to understand or explain its signification. Acts speak no less, sometimes far more forcibly, than words. In the early period

of society, when the foundation was laid of most even of our Western customs, action constituted a large portion of what we may term human language, or the means of intercommunication between man and man; because then words were less numerous, books unknown, the entire machinery of speaking, being in its rudimental and elementary state, less developed and called into play; to say nothing of that peculiarity of the Oriental character (if, indeed, it be not a characteristic of all nations in primitive ages) which inclined men to general taciturnity, with occasional outbreaks of fervid, abrupt, or copious eloquence. In this language of action, a kiss, inasmuch as it was a bringing into contact of parts of the body of two persons, was naturally the expression and the symbol of affection, regard, respect, and reverence; and if any deeper source of its origin were sought for, it would, doubtless, be found in the fondling and caresses with which the mother expresses her tenderness for her babe. That the custom is of very early date appears from Gen. xxix. 13, where we read—'When Laban heard the tidings of Jacob, his sister's son, he ran to meet him, and embraced him and kissed him, and brought him to his house:' the practice was even then established and recognised as a matter of course. In Gen. xxvii. 26, 27, a kiss is a sign of affection between a parent and child. It was also, as with some modern nations, a token of friendship and regard bestowed when friends or relations met or separated (Tobit vii. 6; x. 12; Luke vii. 45; xv. 20; Acts xx. 37; Matt. xxvi. 48; 2 Sam. xx. 9). The church of Ephesus wept sore at Paul's departure, and fell on his neck and kissed him. When Orpah quitted Naomi and Ruth (Ruth i. 14), after the three had lifted up their voice and wept, she 'kissed her mother-in-law, but Ruth clave unto her.' It was usual to kiss the mouth (Gen. xxxiii. 4; Exod. iv. 27; xviii. 7; 1 Sam. xx. 41; Prov. xxiv. 26) or the beard, which was then taken hold of by the hand (2 Sam. xx. 9). Kissing of the feet was an expression of lowly and tender regard (Luke vii. 38). Kissing of the hand of another appears to be a modern practice: the passage of Job xxxi. 27, 'Or my mouth hath kissed my hand,' is not in point, and refers to idolatrous usages, namely, the adoration of the heavenly bodies. It was the custom to throw kisses towards the images of the gods, and towards the sun and moon (1 Kings xix. 18; Hosea xiii. 2; Minuc. Felix, ii. 5; Tac. *Hist.* iii. 24. 3; Lucian, *De Salt.* c. 17; Plin. *Hist. Nat.* xxviii. 5). The kissing of princes was a token of homage (Ps. ii. 12; 1 Sam. x. 1; Xenoph. *Cyrop.* vii. 5. 32). Xenophon says (*Agesil.* v. 4) that it was a national custom with the Persians to kiss whomsoever they honoured; and a curious passage to this effect may be found in the *Cyropædia* (i. 4. 27). Kissing the feet of princes was a token of subjection and obedience; which was sometimes carried so far that the print of the foot received the kiss, so as to give the impression that the very dust had become sacred by the royal tread, or that the subject was not worthy to salute even the prince's foot, but was content to kiss the earth itself near or on which he trod (Isa. xlix. 23; Micah vii. 17; Ps. lxxii. 9; Dion Cass. lix. 27; Seneca, *De Benef.* ii. 12). The Rabbins, in the meddlesome, scrupulous, and falsely delicate spirit which animated much of what they wrote, did not permit more than three kinds of kisses, the kiss of reverence, of reception, and of dismissal (Breschith Rabba *on Gen.* xxix. 11).

The peculiar tendency of the Christian religion to encourage honour towards all men, as men, to foster and develop the softer affections, and, in the trying condition of the early church, to make its members intimately known one to another, and unite them in the closest bonds, led to the observance of kissing as an accompaniment of that social worship which took its origin in the very cradle of our religion. Hence the exhortation—'Salute each other with a holy kiss' (Rom. xvi. 16; see also 1 Cor. xvi. 20; 2 Cor. xiii. 12; 1 Thess. v. 26; in 1 Pet. v. 14, it is termed 'a kiss of charity'). The observance was continued in later days, and has not yet wholly disappeared, though the peculiar circumstances have vanished which gave propriety and emphasis to such an expression of brotherly love and Christian friendship.

On the subject of this article consult Pfanner, *De Osculis Christianor. Veter.*; M. Kempius, *De Osculis*, Francof. 1680; Jac. Herrenschmidius, *Osculogia*, Viteb. 1630; P. Muller, *De Osculo Sancto*, 1674; Boberg, *De Osculis Hebr.*—J. R. B.

KISSOS (Gr. κισσός), 'ivy,' is mentioned only once, and that in the Apocrypha (2 Macc. vi. 7), where the Temple is described as being desecrated by the Gentiles, and the Jews forced to depart from the laws of their fathers: 'And when the feast of Bacchus was kept, the Jews were compelled to go in procession to Bacchus, carrying

374. [Hedera helix.]

ivy.' The term κισσός or κιττός seems to have been applied by the Greeks in a general sense, and to have included many plants, and among them, some climbers, as the *convolvulus*, besides the

common ivy, which was especially dedicated to Bacchus, and which was distinguished by the name of 'Hedera poetica, Dionysia aut Bacchica, quod ex ea poëtarum coronæ consuerentur.' It is well known that in the Dionysia, or festivals in honour of Dionysus, and in the processions called *θίασοι*, with which they were celebrated, women also took part, in the disguise of Bacchæ, Naiades, Nymphæ, &c., adorned with garlands of ivy, &c.: thus Ovid (*Fasti*, iii. 766):—

Cum hedera cincta est? hedera est gratissima Baccho.

Bacchus is generally thought to have been educated in India, and the Indian Bâghês has been supposed to be the original of the name. The fact of Bâghês being a compound of two words signifying tiger and master or lord, would appear to confirm the identity, since Bacchus is usually represented as drawn in his chariot by a tiger and a lion, and tigers, &c., are described as following him in his Indian journey. As the ivy, however, is not a plant of India, it might be objected to its being characteristic of an Indian god. But in the mountains which bound India to the north, both the ivy and the vine may be found, and the Greeks were acquainted with the fact that Mount Mero is the only part of India where ivy was produced. Indeed, Alexander and his companions are said to have crowned themselves with ivy in honour of Bacchus. The ivy, *Hedera Helix*, being a native of most parts of Europe, is too well known to require special notice.—J. F. R.

KITE. [Glede.]

KNEADING-TROUGHS. [Bread.]

KOHATH (קְהָת, *assembly*; Sept. Καάθ), son of Levi, and father of Amram, Izhar, Hebron, and Uzziel (Gen. xlvi. 11). The descendants of Kohath formed one of the three great divisions of the Levitical tribe. This division contained the priestly family which was descended from Aaron, the son of Amram. In the service of the tabernacle, as settled in the wilderness, the Kohathites had the distinguished charge of bearing the ark and the sacred vessels (Exod. vi. 16; Num. iv. 4-6).

KOPHER, or Copher (כֹּפֶר), occurs twice in the Song of Solomon, and is in both places translated *camphire* in the Authorized Version. Thus (i. 14), 'My beloved is unto me as a cluster of *camphire (kopher)* in the vineyards of En-gedi;' and in iv. 13, 'Thy plants are an orchard of pomegranates, with pleasant fruits, *camphire (kopher)*, with spikenard.' It has been supposed to indicate a bunch of grapes (*Botrus kopher*), also *camphor*. The word *camphire* is the old mode of spelling *camphor*, but this substance does not appear to have been known to ancient commerce; at least we cannot adduce any proof that it was so. The word *Kopher* is certainly very like *Kafoor*, the Eastern name for *camphor*, but it also closely resembles the Greek *κύπρος*, or *Kupros*, usually written *Cypros*. Indeed, as has been observed, it is the same word, with the Greek pronunciation and termination. The *κύπρος* of the Greeks is, no doubt, the *Lawsonia inermis* of botanists, and is described by Dioscorides (i. 125) and by Pliny (xii. 24):—'Cypros in Ægypto est arbor ziziphi (*oleæ*, Dioscor.) foliis, semine coriandri, flore candido, odorato. Coquitur hoc in oleo, premiturque postea, quod cyprinum (*κύπρινον*, Dioscor. i. 65) vocatur. Optimum habetur e Canope, in ripis Nili natum: secundum Ascalone Judææ: tertium Cypro insula, odoris suavitate præcipuum.' Sir T. Browne and others have inferred that the *κύπρος* of the Greeks was the *kopher* of the Hebrews. Mariti remarks, that 'the shrub known in the Hebrew language by the name of kopher is common in the island of Cyprus, and thence had its Latin name:' also, that 'the *Botrus Cypri* has been supposed to be a kind of rare and exquisite grapes, transplanted from Cyprus to Engaddi; but the *Botrus* is known to the natives of Cyprus as an odoriferous shrub called *henna*, or *alkanna*.' So R. Ben Melek (*ad Cant.* i. 14), as quoted and translated by Celsius (i. 223):—'*Botrus Copher id ipsum est, quod Arabes vocant Al-Hinna.*' Upon this Celsius remarks:—'Hæc in Talmude sæpius memoratur, quod in Judæa cresceret, et Judæorum legibus subjecta esset.' If we refer to the works of the Arabs, we find both in Serapion and Avicenna, reference from their *Hinna* to the description by Dioscorides and Galen, of *Kupros* or *Cypros*. This identity is now universally acknowledged: the *Kupros*, therefore, must have been *Lawsonia inermis*, as the *Hinna* of the Arabs is well known to be. If we examine the works of Oriental travellers and naturalists, we shall find that this plant is universally esteemed in Eastern countries, and appears to have been so from the earliest times, both on account of the fragrance of its flowers, and the colouring properties of its leaves.

375. [Lawsonia inermis.]

Thus Rauwolff, when at Tripoli (*Travels*, iv.), 'found there another tree, not unlike unto our privet, by the Arabians called *Alsana*, or *Henna*, and by the Grecians, in their vulgar tongue, *Schauna*, which they have from Egypt, where, but above all in Cayre, they grow in abundance. The Turks and Moors nurse these up with great care and diligence, because of their sweet-smelling flowers. They also, as I am in-

formed, keep their leaves all winter, which leaves they powder and mix with the juice of citrons, and stain therewith against great holidays the hair and nails of their children of a red colour, which colour may perhaps be seen with us on the manes and tails of Turkish horses.' So Belon (ii. 74), when leaving Cairo for Jerusalem, says :—' Nous trouvasmes un petit arbrisseau nommé Henne ou Alcanna, qu'ils taillent et cultivent diligemment, et font d'iceluy des beaux petits bois taillis. Il est de grand revenu en Egypte, car ils deseichent ses feuilles pour mettre en poudre, à faire de la teinture pour teindre en jaune ; les femmes de tous les pays de Turquie ont coustume de teindre les mains, les pieds, et partie des cheveux en couleur jaune ou rouge ; et les hommes se teignent les ongles en rouge avec la susdicte poudre' (*Observ.* p. 301). This custom of dyeing the nails and the palms of the hands and soles of the feet, of an iron-rust colour, with *henna*, exists throughout the East, from the Mediterranean to the Ganges, as well as in Northern Africa. In some parts the practice is not confined to women and children, but is also followed by men, especially in Persia. In dyeing the beard, the hair is turned to red by this application, which is then changed to black by a preparation of indigo. In dyeing the hair of children, and the tails and manes of horses and asses, the process is allowed to stop at the red colour which the *henna* produces. In reference to this universal practice of the East, Dr. Harris observes that ' the expression in Deut. xxi. 12, "pare her nails," may perhaps rather mean "adorn her nails," and imply the antiquity of this practice. This is a universal custom in Egypt, and not to conform to it would be considered indecent. It seems to have been practised by the ancient Egyptians, for the nails of the mummies are most commonly of a reddish hue.' Seeing, then, that the *henna* is so universally admired in the East, both on account of the fragrance of its flowers and the dye yielded by its leaves, and as there is no doubt that it is the *κύπρος* of the Greeks, and as this word is so similar to the *kopher* of the Hebrews, there is every probability of this last being the *henna* of the Arabs, *Lawsonia alba* of botanists.—J. F. R.

KORAH (קֹרַח, *ice ;* Sept. Κορέ), a Levite, son of Izhar, the brother of Amram, the father of Moses and Aaron, who were therefore cousins to Korah (Exod. vi. 21). From this near relationship we may, with tolerable certainty, conjecture, that the source of the discontent which led to the steps afterwards taken by this unhappy man, lay in his jealousy that the high honours and privileges of the priesthood, to which he, who remained a simple Levite, might, apart from the divine appointment, seem to have had as good a claim, should have been exclusively appropriated to the family of Aaron. When to this was added the civil authority of Moses, the whole power over the nation would seem to him to have been engrossed by his cousins, the sons of Amram. Under the influence of these feelings he organized a conspiracy, for the purpose of redressing what appeared to him the evil and injustice of this arrangement. Dathan, Abiram, and On, the chief persons who joined him, were of the tribe of Reuben; but he was also supported by many more from other tribes, making up the number of 250, men of name, rank, and influence, all who may be regarded as representing the families of which they were the heads. The private object of Korah was apparently his own aggrandizement, but his ostensible object was the general good of the people; and it is perhaps from want of attention to this distinction that the transaction has not been well understood. The design seems to have been made acceptable to a large body of the nation, on the ground that the first-born of Israel had been deprived of their sacerdotal birthright in favour of the Levites, while the Levites themselves announced that the priesthood had been conferred by Moses (as they considered) on his own brother's family, in preference to those who had equal claims ; and it is easy to conceive that the Reubenites may have considered the opportunity a favourable one for the recovery of their birthright—the double portion and civil pre-eminence—which had been forfeited by them and given to Joseph. These are the explanations of Aben-Ezra, and seem as reasonable as any which have been offered.

The leading conspirators having organized their plans, repaired in a body to Moses and Aaron, boldly charged them with their usurpations, and required them to lay down their ill-gotten power. Moses no sooner heard this than he fell on his face, confounded at the enormity of so outrageous a revolt against a system framed so carefully for the benefit of the nation. He left the matter in the Lord's hands, and desired them to come on the morrow, provided with censers for incense, that the Lord himself, by some manifest token, might make known his will in this great matter. As this order was particularly addressed to the rebellious Levites, the Reubenites left the place, and when afterwards called back by Moses, returned a very insolent refusal, charging him with having brought them out of the land of Egypt under false pretences, ' to kill them in the wilderness.'

The next day Korah and his company appeared before the tabernacle, attended by a multitude of people out of the general body of the tribes. Then the Shekinah, or symbol of the divine presence, which abode between the cherubim, advanced to the entrance of the sacred fabric, and a voice therefrom commanded Moses and Aaron to stand apart, lest they should share in the destruction which awaited the whole congregation. On hearing these awful words the brothers fell on their faces, and, by strong intercession, moved the Lord to confine his wrath to the leaders in the rebellion, and spare their unhappy dupes. The latter were then ordered to separate themselves from their leaders and from the tents in which they dwelt. The terrible menace involved in this direction had its weight, and the command was obeyed ; and after Moses had appealed to what was to happen as a proof of the authority by which he acted, the earth opened, and received and closed over the tents of Korah, Dathan, and Abiram. The Reubenite conspirators were in their tents, and perished in them ; and at the same instant Korah and his 250, who were offering incense at the door of the tabernacle, were destroyed by a fire which ' came out from the Lord ;' that is, most probably, in this case, from out of the cloud in which his presence dwelt. The censers which they had used

were afterwards made into plates, to form an outer covering to the altar, and thus became a standing monument of this awful transaction (Num. xvi.). On, although named in the first instance along with Dathan and Abiram, does not further appear either in the rebellion or its punishment. It is hence supposed that he repented in time: and Abendana and other Rabbinical writers allege that his wife prevailed upon him to abandon the cause.

It might be supposed from the Scripture narrative that the entire families of the conspirators perished in the destruction of their tents. Doubtless all who were in the tents perished; but as the descendants of Korah afterwards became eminent in the Levitical service, it is clear that his sons were spared. They were probably living in separate tents, or were among those who sundered themselves from the conspirators at the command of Moses. There is no reason to suppose that the sons of Korah were children when their father perished. The Korahites were appointed by David to the office of guarding the doors of the temple, and of singing praises. They, in fact, occupied a distinguished place in the choral service of the temple, and several of the Psalms (xlii. xliv.-xlix. lxxxiv. lxxxv. lxxxvii. lxxxviii.) are inscribed to them. Heman, the master of song under David, was of this family, and his genealogy is traced through Korah up to Levi (1 Chron. vi. 31-38.)

KOTZ. [Thorn.]

KRINON. [Lily.]

KUSSEMETH (כֻּסֶּמֶת) occurs in three places of Scripture. In the Authorized Version it is translated *rye* in Exod. ix. 32; Isa. xxviii. 25, and *fitches* in Ezek. iv. 9; but its true meaning still remains uncertain. It was one of the cultivated grains both of Egypt and of Syria, and one of those employed as an article of diet. It was also sown along with wheat, or, at least, its crop was in the same state of forwardness; for we learn from Exod. ix. 32, that in the seventh plague the hail-storm smote the barley which was in the ear, and the flax which was bolled; but that the wheat and the *kussemeth* were not smitten, for they were not grown up. Respecting the wheat and the barley, we know that they are often sown and come to maturity in different months. Thus Forskal says, 'Hordeum cum mense Februario maturatur, triticum ad finem Martii persistit' (*Flora Ægypt.*, p. 43). The events above referred to probably took place in February (vid. *Pict. Bible*). That *kussemeth* was cultivated in Palestine we learn from Isa. xxviii. 25, where it is mentioned along with ketzah (nigella) and cummin, wheat and barley; and sown, according to some translators, 'on the extreme border of the fields,' as a kind of fence for other kinds of corn. This is quite an Oriental practice, and may be seen in the case of flax and other grains in India, at the present day. The rye is a grain of cold climates, and is not cultivated even in the south of Europe. Korte declares (*Travels*, p. 168) that no rye grows in Egypt; and Shaw states (p. 351) that rye is little known in Barbary and Egypt (Rosenmüller, p. 76). That the *kussemeth* was employed for making bread by the Hebrews we know from Ezek. iv. 9, where the prophet is directed to 'take wheat, and barley, and beans, and lentiles, and millet, and *kussemeth*, and put them in a vessel, and make bread thereof.'

376. [Triticum spelta.]

Though it is very unlikely that *kussemeth* can mean rye, it is not easy to say what cultivated grain it denotes. The principal kinds of grain, it is to be observed, are mentioned in the same passages with the *kussemeth*. Celsius has, as usual, with great labour and learning, collected together the different translations which have been given of this difficult word. In the Arabic translation of Exod. ix. 32, it is rendered *julban*: 'cicercula, non circula, ut perperam legitur in versione Latina.' By other Arabian writers it is considered to mean peas, and also beans. Many translate it vicia, or vetches, as in the Authorized Version of Exod. ix. 32; for according to Maimonides (*ad Tr. Shabb.* xx. 3), *carschinin* is a kind of legume, which in the Arabic is called *kirsana*, but in the sacred language *kussemeth*. Both *julban* and *kirsana* mean species of pulse, but it is not easy to ascertain the specific kinds. The majority, however, instead of a legume, consider *kussemeth* to indicate one of the cereal grains, as the rye (*secale*), or the oat (*avena*), neither of which is it likely to have been. These have probably been selected because commentators usually adduce such grains as they themselves are acquainted with, or have heard of as commonly cultivated. Celsius, however, informs us that in the Syriac and Chaldee versions *kussemeth* is translated *kunta*; *far* in the Latin Vulgate; *far adoreum*, Guisio, *Tract. Peah*, viii. 5, and *Tract. Chalum*, i. 1; ζειά in the Septuagint, Isa. xxviii. Aquila, Symmachus, and others render it *spelta*. So Ben Melech, on Exod. ix., and Ezekiel iv., says 'kussemeth, vulgo *spelta*,' and the Septuagint has ὄλυρα. Upon which Celsius remarks: 'all these—that is, kunta, far, ador, ζειά, spelta, and ὄλυρα—are one and the same thing.' This he proves satis-

factorily by quotations from the ancient authors (*l. c.* ii. 100). Dr. Harris states that the word *kussemeth* seems to be derived from *casam*, 'to have long hairs;' and that hence a bearded grain must be intended; which confirms the probability of spelt being the true meaning.

Dioscorides has stated (ii. 111), that there are two kinds of Ζειά, one simple, and the other called *dicoccos*. Sprengel concludes that this is, without doubt, the *Triticum Spelta* of botanists; that the *olyra* was a variety which Host has called *Triticum Zea;* and also that the simple kind is the *Triticum monococcon*. That these grains were cultivated in Egypt and Syria, and that they were esteemed as food in those countries, may also be satisfactorily proved. Thus Herodotus states that the Egyptians employ *olyra*, which others call *zea*, as an article of diet. Pliny (*Hist. Nat.* xviii. 8) mentions it as found both in Egypt and in Syria: 'Ægypto autem ac Syriæ, Ciliciæque et Asiæ, ac Græciæ peculiares, zea, olyra, tiphe.' So in more modern times: 'In Ægypto zeam abunde nasci refert Dapperus descriptione Asiæ p. 130. Et Monachos circa Jordanem, pane ὀλυρίτη vesci, scribit Johannes Phocas de Locis Syr. et Palæstinæ p. 34' (Cels. *l. c.* 100). That it was highly esteemed by the ancients is evident from Dioscorides describing it as more nourishing than barley, and grateful in taste. Pliny also (xviii. 11) says: 'Ex zea pulcrius, quam ex tritico fit granum;' and Salmasio: 'quod lautior panis ex zea quam ex tritico fieret.' The goodness of this grain is also implied from the name of semen having been especially applied to it (C. Bauhin, *Pinox*, p. 22).

Triticum Spelta, or *Spelt*, is in many respects so closely allied to the common wheats as to have been thought by some old authors to have been the original stock of the cultivated kinds; but for this there is no foundation, as the kind cultivated for ages in Europe does not differ from specimens collected in a wild state. These were found by a French botanist, Michaux, in Persia, on a mountain four days' journey to the north of Hamadan. It is cultivated in many parts of Germany, in Switzerland, in the south of France, and in Italy. It is commonly sown in spring, and collected in July and August. Though some circumstances seem to point to this species as the *kussemeth* of Scripture, the subject is still susceptible of further investigation, and can only be finally determined by first ascertaining the modern agriculture of eastern countries, and comparing it with the ancient accounts of the agriculture of Syria and Egypt.—J. F. R.

L.

LAANAH (לַעֲנָה), translated *wormwood*, occurs in several passages of Scripture, in most of which it is employed in a figurative sense. Thus, in Deut. xxix. 18, 'Lest there be among you a root that beareth gall and *wormwood*,' is applied to such Israelites as should worship foreign gods. Prov. v. 4, 'But her end is bitter as wormwood.' Jer. ix. 15, 'Behold I will feed them, even this people, with wormwood, and give them gall to drink.' So in Jer. xxiii. 13, and in Lam. iii. 15 and 19, 'Remember mine affliction and my misery, the wormwood and gall,' where it is applied to public and private calamities; and in Amos v. 7, it is said of unrighteous judges, 'Ye who turn judgment to wormwood:' so in verse 12, but here the word *laanah* is translated *hemlock*. That laanah was a plant of an extreme degree of bitterness, is evident from the various passages in which it occurs; and it has hence, as Celsius observes, been adopted to indicate both the sins and the punishments of men. Some translators, as the Septuagint, substitute the proper terms which they conceive the plant to denote as ἀνάγκη, ὀδύνη, πικρια, and χολή. So the Arab translator uses words signifying *dolores*, *adversa*, *calamitates*, *amaritudo*. The Hebrew word *laanah* is supposed by Lexicographers to have been originally derived from the same root as the Arabic لعن *laan*, 'he was accursed;' from which comes the Arabic لعنة *laana*, signifying 'execration' or 'malediction;' and as the Hebrews accounted bitter plants as pernicious and poisonous, so they typified what was disagreeable or calamitous by a bitter plant. Thus, as Celsius remarks, Talmudical writers, in speaking of the blessings and maledictions of Moses, say, 'Illæ mel, hæ absinthium erant.' The Chaldee, and other Oriental translations, as the Syriac and Arabic, in Prov. v. 4; Lam. iii. 19, with the Rabbins, translate *laanah* by words signifying wormwood. This is adopted in the Vulgate, as well as in the English translation. In Revelations viii. 11, we have the Greek word ἄψινθος employed; 'And the name of the star is called wormwood, and the third part of the waters became wormwood (ἄψινθος), and many men died of the waters, because they were bitter.' Some other plants have been adduced, as the colocynth and the oleander, but without anything to support them; while different kinds of artemisia, and of wormwood, are proverbial for their bitterness, and often used in a figurative sense by ancient authors:—

'Parce, precor, lacerare tuum, nec amara paternis
Admiscere velis, ceu melli absinthia, verbis.'
Paulin. Ep. ad Ausonium.

Celsius has no doubt that a species of artemisia, or wormwood, is intended: 'Hanc plantam amaram in Judæa et Arabia copiose nascentem, et interpretum auctoritate egregie suffultam, ipsam esse Ebræorum לענה, pro indubitato habemus.' That species of artemisia are common in Syria and Palestine is well known, as all travellers mention their abundance in particular situations; but as many of them resemble each other very closely in properties, it is more difficult to determine what particular species is meant. It is probable, indeed, that the name is used in a generic rather than a specific sense. The species found in Syria have already been mentioned under Absinthium. The species most celebrated in Arabian works on Materia Medica is that called شيح *sheeh*, which is conspicuous for its bitterness, and for being fatal to worms; hence it has been commonly employed as an anthelmintic even to our own times. This seems to be the same species which was found by Rauwolff in Palestine, and which he says the Arabs call *scheha*. It is his 'Absinthium Santonicum, *scheha* Arabum, unde semen lumbricorum colligitur;' the *Absinthium*

Santonicum Judaicum of Caspar Bauhin, in his *Pinax*, now *Artemisia Judaica;* though it is probable two or three species yield the *Semoni Santonicum*, or wormwood of commerce, which, instead of seed, consists of the *tops* of the plants, and in which the peduncles, calyx flowers, and young seeds are intermixed. *Artemisia Maritima* and *Judaica* are two of the plants which yield it.—J. F. R.

LABAN, son of Bethuel, and grandson of Nahor, brother of Rebekah, and father of Jacob's two wives, Leah and Rachel.

LABOUR is that steady and constant effort of the bodily frame which man undertakes for his own benefit, and, in particular, in order to procure the means of subsistence. This is the primary import of the term labour, whence are derived its applications to the exertions and productions of the mind, and even to the affections, the passions, and their consequences. In Gen. iii. 19, labour is set forth as a part of the primeval curse, 'In the sweat of thy face thou shalt eat bread;' and doubtless there is a view of labour which exhibits it in reality as a heavy, sometimes a crushing burden. But labour is by no means exclusively an evil, nor is its prosecution a dishonour. These impressions, false though they are, have wrought a vast and complicated amount of harm to man, especially to the industrious classes, causing these classes, that is, the great majority of our fellow-creatures, to be regarded, and consequently to be treated, even in Christian lands, as a pariah caste, as hereditary 'hewers of wood and drawers of water,' doomed by Providence, if not primarily by the Creator himself, to a low and degrading yoke, and utterly incapable of entertaining lofty sentiments, or rising to a higher position; to be restrained therefore in every manifestation of impatience, lest they should temporarily gain the upper hand, and lay waste the fair fields of civilization; and to be kept under for the safety of society, if not for their own safety, by social burdens and the depressing influences of disregard and contempt. A better feeling, however, regarding labour and labourers, is beginning to prevail: these notions, which breathe the very spirit of slavery whence they are borrowed, are in word disowned, while they are gradually losing their hold on the heart, and their influence on the life. Individuals rising from time to time from the lowest levels of social life to take, occupy, and adorn its loftiest posts, have irresistibly shown that there is no depression in society which the favours of God may not reach. Especially has a wider and more humane spirit begun to prevail since men have learnt more accurately to know, and more powerfully to feel, the genius and spirit of the Gospel, whose originator was a carpenter's son, and whose heralds were Galilean fishermen. Reason and experience, too, in this as in all cases, have come to confirm divinely revealed truth, tending forcibly to show that labour, if under certain circumstances it has a curse to inflict, has also many priceless blessings to bestow.

The origin of the view of labour which the passage in Genesis (iii. 19) presents, may be found, as has been intimated, in certain unquestionable facts which have not yet passed out of the sphere of reality. That labour involves pain and effort to man appears from an index of his feelings, than which none can be more certain; for labour is often used as synonymous with endurance, trial, and grief (Gen. xxxv. 16); so Virgil (*Æn.* i. 597):—

'O sola infandos Trojæ miserata labores.'

These not unnatural convictions and feelings were in the primitive state of society corroborated by peculiar, and to some extent local, influences. Under an eastern sky hard labour is an almost intolerable as well as crushing burden, to which, when required, hardly any but slaves will submit. And the high-spirited, free, and unrestrained child of the desert, as well as the more tranquil, gentle, but not less free shepherd of the plains, may well, in the primeval ages, have regarded with aversion and stigmatised with opprobrium the hard, and comparatively constant, toils of the tillers of the ground.

However, what is even a penalty in one stage of human development and in one part of the world, may, in the progress of Divine Providence, be converted into a real and lasting blessing—a blessing never to be forfeited unless by folly and sin. Certainly the rewards of labour may accumulate so plenteously around human beings under certain conditions, that they may come to have their minds more frequently struck, and so more deeply impressed, by the advantages than by the evils and inconveniences of labour. Constituted as the frame of man is, labour is beneficial, if not necessary, to the unfolding of his physical powers, and when well apportioned to the variable degrees of growing strength, powerfully conduces, with internal impulses, to carry the body to its state of highest vigour and beauty, imparting meanwhile a sense of deep and pure animal enjoyment, and making food as grateful as it is nutritious, the final immediate result of which is found in sound slumbers and healthful feelings: 'the sleep of a labouring man is sweet' (Eccl. v. 12). A fine passage, which confirms these views, and serves to show that Scripture in process of time regarded labour otherwise than as a curse, may be found in Ps. ciii. 23, 24, sq., in which both labour and its fruits are placed among the proofs of the divine wisdom and bounty.

Labour, however, like every other divine appointment, may be perverted by misuse into an evil. Excessive labour is a curse. Labour apart from certain conditions, whose observance is essential to our physical well-being, entails lasting miseries. Labour which is both severe, long, broken only by brief intervals, whether of riot or of sin, is an infliction as hard as it is unjust—an evil which no man has a right to impose on himself, and which still less can society be justified in compelling or leading any one to endure.

If, however, excessive labour is a crushing load, the absence of labour is a not less intolerable burden. Of all conditions in society, theirs is perhaps the most pitiable who, possessing some degree of mental culture, and being of refined and perhaps morbid sensibilities, suffer under the irremediable calamity of having nothing to do; no regular pursuit, that is, no need of the labour of either head or hands for the sustenance of the body or the upholding of their social state; who rise in the morning not knowing to what to apply their flagging capabilities, and retire to rest at night wearied and jaded, but not solaced by the consciousness of having gained or done some good.

These two extremes—too much labour, and too little or no labour—are among the greatest of the social ills under which English society is at present suffering. They are ills which have grown rapidly, which are growing, and which show no signs of immediate diminution. They are undermining the foundations of religion, which is in self-defence required to raise its mighty voice against them. A successful effort towards the equalization of labour would be a signal blessing not less to the rich than to the poor; and is called for as much by the divine spirit of Christianity as it is by considerations drawn from the interests of individuals and the welfare of society.

If enough had not already been said to establish this position, we could refer to the institution at a very early stage of the world's history of the Sabbath, by which one-seventh of man's brief life was rescued from labour, and appropriated to rest of body and to that improvement of the mind which tends to strengthen, invigorate, and sustain the entire man. To the same effect was the divine appointment of those numerous holidays under the Mosaic dispensation; and we are by no means sure but that the genius of the Gospel was, in this particular at least, better understood and more fully honoured in those days and under those forms of Christian faith which saved for the refreshment and recreation of the labourer many days during the course of the year, than it is now, when we appear to have solved the unhappy problem which asks, What is the extreme of toil that the human frame can bear, without regard to vigorous sensations or length of days?

In regard to the different species of labour in which human beings have been engaged, the Hebrews, like other primitive nations, appear to have been herdsmen before they were agriculturists (Gen. iv. 2, 12, 17, 22); and the practice of keeping flocks and herds continued in high esteem and constant observance as a regular employment and a social condition (Judg. i. 16; iv. 11; Jer. 85; Luke ii. 8). The culture of the soil came in course of time, introducing the discovery and exercise of the practical arts of life, which eventually led to those refinements, both as to processes and to applications, which precede, if they do not create the fine arts (Gen. iv.; xxvi. 12; xxxiii. 19). Agriculture, indeed, became the chief employment of the Hebrew race after their settlement in Canaan, lay at the very basis of the constitution, both civil and religious, which Moses gave them, was held in great honour, and was carried on by the high as as well as the humble in position (Judg. vi. 11; 1 Sam. xi. 5; 1 Kings xix. 19). No small care was bestowed on the culture of the vine, which grew luxuriously on the hills of Palestine (Is. v. 2, 5; Matt. xxi. 33; Num. xiii. 24). The vintage was a season of jubilee (Judg. ix. 27; Jer. xxv. 30; Is. xvi. 10). The hills of Palestine were also adorned with well cultured olive-gardens, which produced fruit useful for food, for anointing, and for medicine (Is. xvii. 6; xxiv. 13; Deut. xxiv. 20; Ezek. xxvii. 17; 1 Kings iv. 25; Hos. xiv. 6, 7). Attention was also given to the culture of the fig-tree (2 Kings xxi. 7; 1 Chron. xxvii. 28), as well as of the date-palm (Lev. xxiii. 40; Judg. i. 16; iv. 5; xx. 33; Deut. xxxiv. 3), and also of balsam (Gen. xliii. 11; Ezek. xxvii. 17; xxxvii. 25; Jer. viii. 22). For the rise and progress of various kinds of hand labour among the people of Israel, see HANDICRAFT.—J. R. B.

LACHISH (לָכִישׁ; Sept. Λάχις), a city in the south of Judah, in the plain between Adoraim and Azekah (Josh. x. 3, 5, 31; xv. 39.) It was rebuilt and fortified by Rehoboam (2 Chron. xi. 9), and seems after that time to have been regarded as one of the strongest fortresses of the kingdom of Judah, having for a time braved the assaults of the Assyrian army under Sennacherib (2 Kings xviii. 17; xix. 8; 2 Chron. xxxii. 9). Eusebius and Jerome place it seven Roman miles from Eleutheropolis towards the south. There has not been any more recent notice of the place, and no modern vestige of the name or site has been discovered.

LAISH. [DAN.]

LAKES. [PALESTINE.]

LAMECH (לֶמֶךְ; Sept. Λάμεχ), son of Methusael, and father of Jabal, Jubal, Tubal-cain, and Naamah (Gen. iv. 18, 24, &c.). He is recorded to have taken two wives, Adah and Zillah; and there appears no reason why the fact should have been mentioned, unless to point him out as the author of the evil practice of polygamy. The manner in which the sons of Lamech distinguished themselves as the inventors of useful arts, is mentioned under their several names. The most remarkable circumstance in connection with Lamech is the poetical address which he is very abruptly introduced as making to his wives. This is not only remarkable in itself, but is the first and most ancient piece of poetry in the Hebrew Scriptures; and, indeed, the only example of Antediluvian poetry extant:—

'Adah and Zillah, hear my voice!
Wives of Lamech, receive my speech!
If I slew a man to my wounding,
And a young man—to my hurt:
If Cain was avenged seven times,
Then Lamech—seventy times seven.'

This exhibits the parallelism and other characteristics of Hebrew poetry, the development of which belongs to another article [POETRY]. It has all the appearance of an extract from an old poem, which we may suppose to have been handed down by tradition to the time of Moses. It is very difficult to discover to what it refers, and the best explanation can be nothing more than a conjecture. The Jewish tradition, or rather fiction, is given by most commentators, and is too absurd to be worth relating. The speech, so far as we can make it out, would seem to be, as Bishop Lowth explains (*Prælect.* iv. 91), an apology for committing homicide, in his own defence, upon some man who had violently assaulted him, and, as it would seem, struck and wounded him: and he opposes a homicide of this nature to the wilful and inexcusable fratricide of Cain. Under this view Lamech would appear to have intended to comfort his wives by the assurance that he was really exposed to no danger from this act, and that any attempt upon his life on the part of the friends of the deceased would not fail to bring down upon them the severest vengeance (comp. Dathe and Rosenmüller, *in loc.*; see also Turner's *Notes on Gencsis*, p. 209). Another view, adopted by Shuckford in his *Connection*, supposes that the descendants of Cain had lived for a long time in

fear of vengeance for the death of Abel from the family of Adam; and that Lamech, in order to persuade his wives of the groundlessness of such fears, used the argument in the text, *i. e.* if any one who might slay Cain, the murderer of his brother, was threatened with sevenfold vengeance, surely they must expect a far sorer punishment who should presume to kill any of us on the same account.' This explanation, however, is less satisfactory than the other; for although both may be equally conjectural, this requires us to assume a greater number of circumstances.

2. LAMECH, son of Methuselah, and father of Noah (Gen. v. 28-31).

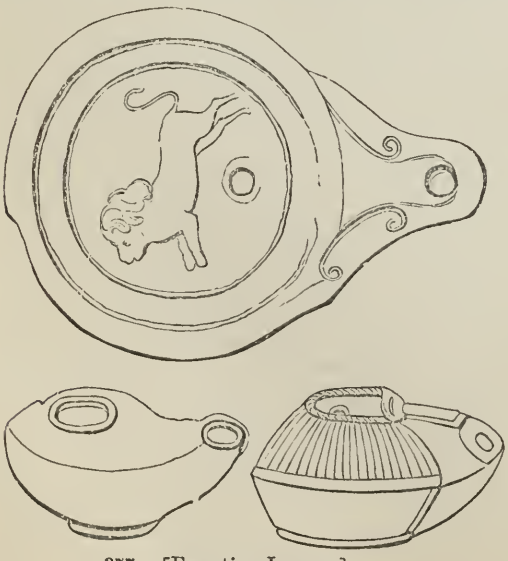
LAMENTATIONS. This book is called by the Hebrews אֵיכָה, '*how*,' from the first word of the book; but sometimes they call it קִינוֹת, *tears*, or 'lamentation,' in allusion to the mournful character of the work, of which one would conceive, says Bishop Lowth, 'that every letter was written with a tear, every word the sound of a broken heart.' From this, or rather from the translation of it in the Septuagint (Θρῆνοι), comes our title of LAMENTATIONS.

The ascription of the Lamentations in the title is of no authority in itself, but its correctness has never been doubted. The style and manner of the book are those of Jeremiah, and the circumstances alluded to, those by which he is known to have been surrounded. This reference of the Lamentations to Jeremiah occurs in the introductory verse which is found in the Septuagint:— Καὶ ἐγένετο μετὰ τὸ αἰχμαλωτισθῆναι τὸν Ἰσραήλ, καὶ Ἰερουσαλὴμ ἐρημωθήναι, ἐκάθισεν Ἱερεμίας κλαίων, καὶ ἐθρήνησε τὸν θρῆνον τοῦτον ἐπὶ Ἰερουσαλήμ, καὶ εἶπε. 'And it came to pass, after Israel had been carried away captive, and Jerusalem was become desolate, that Jeremiah sat weeping, and lamented with this lamentation over Jerusalem, and said.' This has been copied into the Arabic and Vulgate versions; but as it does not exist in the Hebrew, Chaldee, or Syriac, it was regarded by Jerome as spurious, and is not admitted into his version.

It is disputed whether or not this verse existed in the Hebrew copies from which the translation of the Seventy was made. We are certainly not bound by its authority if disposed to question the conclusion which it supports. But it at least shows the opinion which prevailed as to the author, and the occasion of the book, at the time the translation was made. That opinion, as regards the author, has been admitted without dispute; but there has been less unanimity respecting the subject-matter of the Lamentations.

Funeral lamentations, composed by Jeremiah upon the death of king Josiah, are mentioned in 2 Chron. xxxv. 25, and are there said to have been perpetuated by an ordinance in Israel. That the Lamentations thus mentioned are those which we now possess, has been the opinion of many scholars of great eminence. Josephus clearly takes this view (*Antiq.* x. 5. 1), as do Jerome (*Comment. in Zech.* iii. 11), Theodoret, and others of the fathers; and in more modern times, Archbishop Usher (*De LXX. Interpret.*), Michaelis (Note on Lowth's *Sac. Poet. Hebr.* Prælect. xxii.), who afterwards changed his opinion, Dathe (*Proph. Major.* ed. 1), and others. De Wette (*Einleit.* § 273) is clearly of opinion that the passage in 2 Chronicles refers to the existing book of Lamentations, and that the author considered the death of Josiah as its principal subject. This daring writer uses so little ceremony with the author of the book of Chronicles on other occasions, that his own opinion is not to be inferred from this admission; and we are not surprised to find from what follows, that he feels at liberty to take a different view from the one which he believes the writer of Chronicles to have entertained.

The received opinion, namely, that in accordance with the argument prefixed to the book in the Septuagint, is now all but universally acquiesced in. It is adopted by nearly all commentators, who, as they proceed through the book, find that they cannot follow out the details on any other supposition. Indeed, but for the reference suggested by the passage in Chronicles, no one would have been likely to imagine that such expressions as are found in chap. i. 1, 2, 3, 7, could point to any other circumstances than those which attended and followed the destruction of Jerusalem by the Babylonians. Besides, the prophet throughout speaks of the city and temple of Jerusalem as ruined, profaned, and desolated: which certainly was not the case in the time of Josiah, or at his death. We may, under this view, regard the two first chapters as occupied chiefly with the circumstances of the siege, and those immediately following that event. In the third the prophet deplores the calamities and persecutions to which he had himself been exposed: the fourth refers to the ruin and desolation of the city, and the unhappy lot of Zedekiah; and the fifth and last seems to be a sort of prayer in the name, or on behalf of, the Jews in their dispersion and captivity. As Jeremiah himself was eventually compelled to withdraw into Egypt much against his will (Jer. xliii. 6), it has been suggested that the last chapter was possibly written there. Pareau refers chap. i. to Jer. xxxvii. 5, sqq.; chap. iii. to Jer. xxxviii. 2, sqq.; chap. iv. to Jer. xxxix. 1, sqq., and 2 Kings xxv. 1, sqq.; chap. ii. to the destruction of the city and temple; chap. v. is admitted to be the latest, and to refer to the time after that event. Ewald says that the situation is the same throughout, and only the time different. In chaps. i. and ii. we find sorrow without consolation; in chap. iii. consolation for the poet himself; in chap. iv. the lamentation is renewed with greater violence; but soon the whole people, as if urged by their own spontaneous impulse, fall to weeping and hoping' (*Die Poetischen Bucher*). De Wette describes the Lamentations somewhat curtly, as 'five songs relating to the destruction of the city of Jerusalem and its temple (chaps. i. ii. iv. v.), and to the unhappy lot of the poet himself (iii.). The historical relation of the whole cannot be doubted; but yet there seems a gradual ascent in describing the condition of the city' (*Einleit.* § 273).

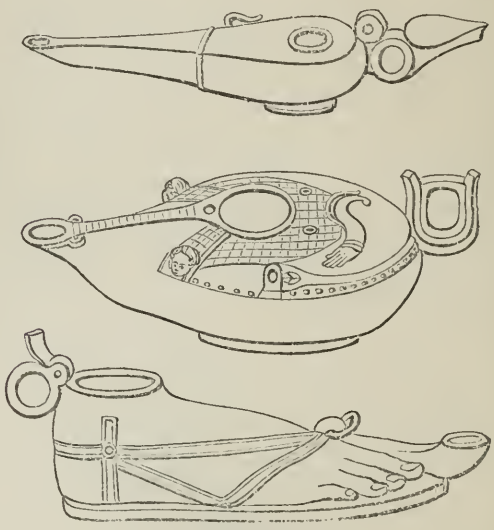


Dr. Blayney, regarding both the date and occasion of the Lamentations as established by the internal evidence, adds, 'Nor can we admire too much the flow of that full and graceful pathetic eloquence, in which the author pours out the effusions of a patriotic heart, and piously weeps over the ruins of his venerable country' (*Jeremiah*, p. 376). 'Never,' says an unques-

tionable judge of these matters, 'was there a more rich and elegant variety of beautiful images and adjuncts, arranged together within so small a compass, nor more happily chosen and applied (Lowth, *De Sacra Poesi Hebr.* Prælect. xxii.).

Jarchi, and some other Jewish commentators, fancy that the book, which, after being publicly read by Baruch, was cut to pieces by king Jehoiachin, and cast into the fire (Jer. xxxvi. 4, 5), was composed of chaps. i. ii. iv. of the Lamentations, to which chap. v. was afterwards added. But this notion does not require confutation, as there is not a shadow of probability in its favour.

In the ancient copies this book is supposed to have occupied the place which is now assigned to it, after Jeremiah. Indeed, from the manner in which Josephus reckons up the books of the Old Testament (*Contra Apion.* i. 8), it has been supposed that Jeremiah and it originally formed but one book (Prideaux, *Connection*, i. 332). In the Bible now used by the Jews, however, the book of Lamentations stands in the Hagiographa, and among the five Megilloth, or books of Ruth, Esther, Ecclesiastes, and Solomon's Song. They believe that it was not written by the gift of prophecy, but by the spirit of God (between which they make a distinction), and give this as a reason for not placing it among the prophets. It is read in their synagogues on the ninth of the month Ab, which is a fast for the destruction of the holy city.



LAMP (לַפִּיד, whence, perhaps, Gr. λαμπάς, the μ being introduced in place of the Hebrew פ, Lat. *lampas*, and our *lamp*). Lamps are very often mentioned in Scripture; but there is nothing to give any notion of their form. Almost the only fact we can gather is, that vegetable oils were burnt in them, and especially, if not exclusively, olive-oil. This, of the finest quality, was the oil used in the seven lamps of the Tabernacle (Exod. xxvii. 20). It is somewhat remarkable, that while the golden candlestick, or rather candelabrum, is so minutely described, not a word is said of the shape, or even the material, of the lamps (Exod. xxv. 37). This was, perhaps, because they were to be of the common

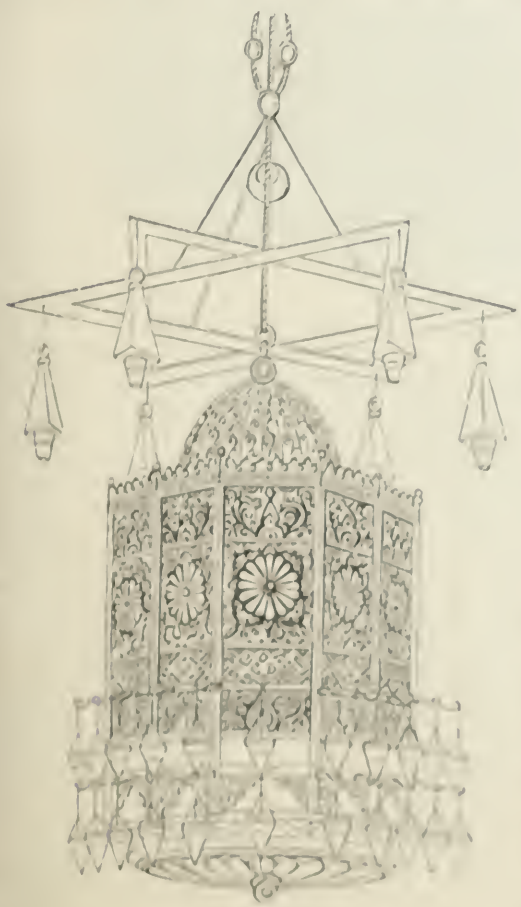
377. [Egyptian Lamps.]

forms, already familiarly known to the Hebrews, and the same probably which were used in Egypt, which they had just quitted. They were in this instance doubtless of gold, although metal is scarcely the best substance for a lamp. The golden candlestick may also suggest, that lamps in ordinary use were placed on stands, and where more than one was required, on stands with two or more branches. The modern Orientals, who are satisfied with very little light in their rooms, use stands of brass or wood, on which to raise the lamps to a sufficient height above the floor on which they sit. Such stands are shaped not unlike a tall candlestick, spreading out at the top. Sometimes the lamps are placed on brackets against the wall, made for the purpose, and often upon stools. Doubtless the same contrivances were employed by the Hebrews.

From the fact that lamps were carried in the pitchers of Gideon's soldiers, from which, at the end of the march, they were taken out, and borne in the hand (Judg. vii. 16, 20), we may with certainty infer that they were not, like many of the classical lamps, entirely open at top, but so shaped that the oil could not easily be spilled.

378. [Classical Lamps.]

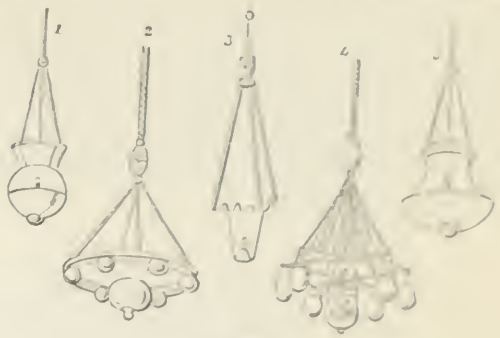
This was remarkably the case in the Egyptian specimens, and is not rare in the classical. Gideon's lamps must also have had handles; but that the Hebrew lamps were always furnished with handles we are not bound to infer: in Egypt we find lamps both with and without handles.



Although the lamp-oils of the Hebrews were exclusively vegetable, it is probable that animal fat was used, as it is at present by the Western Asiatics, by being placed in a kind of lamp, and burnt by means of a wick inserted in it. This we have often witnessed in districts where oil-yielding plants are not common.

Cotton wicks are now used throughout Asia; but the Hebrews, like the Egyptians, probably employed the outer and coarser fibre of flax (Pliny, *Hist. Nat.* xix. 1); and perhaps linen yarn, if the Rabbins are correct in alleging that the linen dresses of the priests were unravelled when old, to furnish wicks for the sacred lamps [Candlestick].

It seems that the Hebrews, like the modern Orientals, were accustomed to burn lamps overnight in their chambers; and this practice may appear to give point to the expression of '*outer*-darkness,' which repeatedly occurs in the New



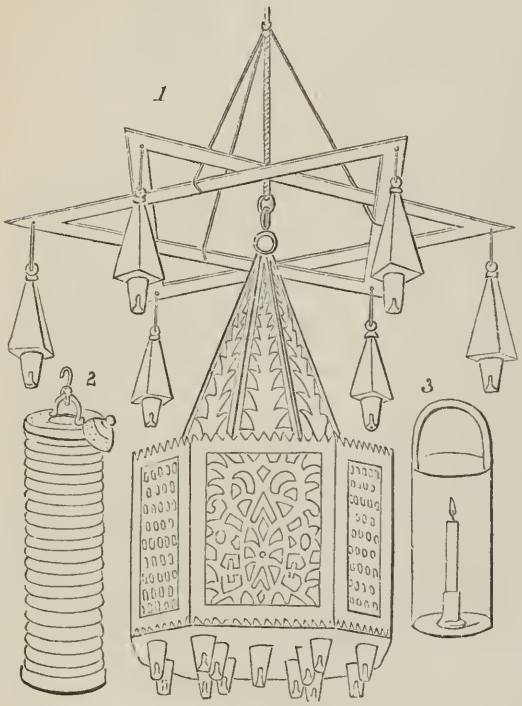
Testament (Matt. viii. 12; xxii. 13): the force is greater, however, when the contrast implied in the term outer is viewed with reference to the effect produced by sudden expulsion into the darkness of night from a chamber highly illuminated for an entertainment. This custom of burning lamps at night, with the effect produced by their going out or being extinguished, supplies various figures to the sacred writers (2 Sam. xxi. 17; Prov. xiii. 9; xx. 20). And, on the other hand, the keeping up of a lamp's light is used as a symbol of enduring and unbroken succession (1 Kings xi. 36; xv. 4; Ps. cxxxii. 17).

It appears from Matt. xxv. 1, that the Jews used lamps and torches in their marriage-ceremonies, or rather when the bridegroom came to conduct home the bride by night. This is still the custom in those parts of the East where, on account of the heat of the day, the bridal procession takes place in the night-time. The connection of lamps and torches with marriage-ceremonies often appears also in the classical poets (Homer, *Iliad*, vi. 492; Eurip. *Phœniss.* 346; *Medea*, 1027; Virg. *Eclog.* viii. 29); and indeed Hymen, the god of marriage, was figured as bearing a torch. The same connection, it may be observed, is still preserved in Western Asia, even where it is no longer usual to bring home the bride by night. During two, or three, or more nights preceding the wedding, the street or quarter in which the bridegroom lives is illuminated with chandeliers and lanterns, or with lanterns and small lamps suspended from cords drawn across from the bridegroom's and several other

379.

houses on each side to the houses opposite; and several small silk flags, each of two colours, generally red and green, are attached to other cords (Lane's *Mod. Egypt.* i. 201). A modern lantern much used on these occasions, with lamps hung about it and suspended from it, is represented in the preceding cut (No. 379). The lamps used separately on such occasions are represented in the following cut (No. 380). Figs. 1, 3, and 5, show very distinctly the

380.



shape of these lamps, with the conical receptacle of wood which serves to protect the flame from the wind. Lamps of this kind are sometimes hung over doors. The shape in fig. 3 is also that of a much-used in-door lamp. It is a small vessel of glass, having a small tube at the bottom, in which is stuck a wick formed of cotton twisted round a piece of straw: some water is poured in first, and then the oil. Lamps very nearly of this shape appear on the Egyptian monuments, and they seem also to be of glass (Wilkinson's *Ancient Egyptians*, iii. 101; v. 376). If the Egyptians had lamps of glass, there is no reason why the Jews also might not have had them, especially as this material is more proper for lamps intended to be hung up, and therefore to cast their light down from above. The Jews certainly used lamps in other festivals besides those of marriage. The Roman satirist (Persius, *Sat.* v. 179) expressly describes them as making illuminations at their festivals by lamps hung up and arranged in an orderly manner; and the Scriptural intimations, so far as they go, agree with this description. If this custom had not been so general in the ancient and modern East, it might have been supposed that the Jews adopted it from the Egyptians, who, according to Herodotus (ii. 62), had a 'Feast of Lamps,' which was celebrated at Sais, and, indeed, throughout the country at a certain season of the year. The description which the historian gives of the lamps employed on this occasion, strictly applies to those in modern use already described, and the concurrence of both these sources of illustration strengthens the probable analogy of Jewish usage. He speaks of them as 'small vases filled with salt and olive-oil, in which the wick floated, and burnt during the whole night.' It does not indeed appear of what materials these vases were made; but we may reasonably suppose them to have been of glass.

The later Jews had even something like this feast among themselves. A 'Feast of Lamps' was held every year on the twenty-fifth of the month Chisleu. It was founded by Judas Maccabæus in celebration of the restoration of the temple worship (Joseph. *Antiq.* xii. 7. 7), and has ever since been observed by the lighting up of lamps or candles on that day in all the countries of their dispersion (Maimon. *Modi. Hanuka-*

nah, fol. 8). Other Orientals have at this day a similar feast, of which the 'Feast of Lanterns' among the Chinese is, perhaps, the best known (Davis's *Chinese*, p. 138).

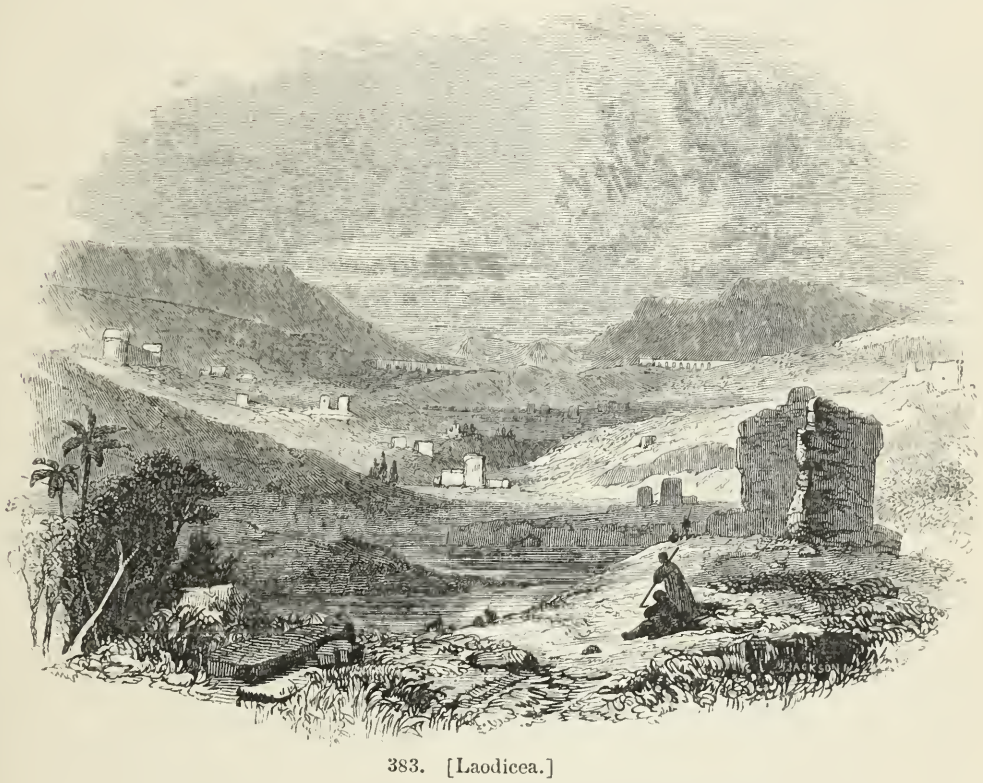
LANGUAGE. [TONGUES, CONFUSION OF.]

LANTERN (*φανός*). This word occurs only in John xviii. 3, where the party of men which went out of Jerusalem to apprehend Jesus in the garden of Gethsemane is described as being provided 'with *lanterns* and torches.' In the article LAMP it has been shown that the Jewish lantern, or, if we may so call it, lamp-frame, was similar to that now in use among the Orientals. Another of the same kind is represented in the annexed engraving (No. 381, fig. 1).

381.

As the streets of Eastern towns are not lighted at night, and never were so, lanterns are used to an extent not known among us. Such, doubtless, was also formerly the case; and it is therefore

382.



remarkable that the only trace of a lantern which the Egyptian monuments offer, is that contained in the present engraving (No. 382). In this case it seems to be borne by the night-watch, or civic guard, and is shaped like those in common use among ourselves. A similar lantern is at this day used in Persia, and perhaps does not materially differ from those mentioned in Scripture. More common at present in Western Asia is a large folding lantern of waxed cloth strained over rings of wire, with a top and bottom of tinned copper (No. 381, figs. 2, 3). It is usually about two feet long by nine inches in diameter, and is carried by servants before their masters, who often pay visits to their friends at or after supper-time. In many Eastern towns the municipal law forbids any one to be in the streets after nightfall without a lantern.

LAODICEA (*Λαοδίκεια*). There were four places of this name, which it may be well to distinguish, in order to prevent them from being confounded with one another. The first was in the western part of Phrygia, on the borders of Lydia; the second, in the eastern part of the same country, denominated Laodicea Combusta; the third, on the coast of Syria, called Laodicea ad Mare, and serving as the port of Aleppo; and the fourth, in the same country, called Laodicea ad Libanum, from its proximity to that mountain. The third of these, that on the coast of Syria, was destroyed by the great earthquake of Aleppo in August, 1822, and at the time of that event was supposed by many to be the Laodicea of Scripture, although in fact not less than four hundred miles from it. But the first named, lying on the confines of Phrygia and Lydia, about forty miles east of Ephesus, is the only Laodicea mentioned in Scripture, and is that one of the 'seven churches in Asia' to which St. John was commissioned to deliver the awful warning contained in Rev. iii. 14-19. The fulfilment of this warning is to be sought, as we take it, in the history of the Christian church which existed in that city, and not in the stone and mortar of the city itself; for it is not the city, but 'the church of the Laodiceans,' which is denounced. It is true that the city is utterly ruined; but this is the case with innumerable other towns in Asia Minor. It is the precise reference to the seven *churches* as such, without any other reference to the cities than as giving them a name, which imparts a marked distinction to the Apocalyptic prophecies. But this has been little heeded by writers on the subject, who somewhat unaccountably seek, in the actual and material condition of these cities, the accomplishment of spiritual warnings and denunciations. At the present day, would an authorized denunciation of 'the church in London,' as in danger of being cast forth for its lukewarmness, be understood to imply that London itself was destined to become a heap of ruins, with its bridges broken down, and its palaces and temples overthrown?

Laodicea was the capital of Greater Phrygia, and a very considerable city at the time it was named in Scripture (Strabo, p. 578); but the frequency of earthquakes, to which this district has always been liable, demolished, some ages after, great part of the city, destroyed many of the inhabitants, and eventually obliged the remainder to abandon the spot altogether. Smith, in his *Journey to the Seven Churches* (1671), was the first to describe the site of Laodicea. He was followed by Chandler and Pococke; and the locality has, within the present century, been visited by Mr. Hartley, Mr. Arundell, and Col. Leake.

Laodicea is now a deserted place, called by the Turks Eski-hissar (*Old Castle*), a Turkish word equivalent to Paleó-kastro, which the Greeks so frequently apply to ancient sites. From its ruins, Laodicea seems to have been situated upon six or seven hills, taking up a large extent of ground. To the north and north-east runs the river Lycus, about a mile and a half distant; but nearer it is watered by two small streams, the Asopus and Caprus, the one to the west, and the other to the south-east, both passing into the Lycus, which last flows into the Mæander (Smith, p. 85).

Laodicea preserves great remains of its importance as the residence of the Roman governors of Asia under the emperors; namely, a stadium, in uncommon preservation, three theatres, one of which is 450 feet in diameter, and the ruins of several other buildings (*Antiq. of Ionia*, pt. ii. p. 32; Chandler's *Asia Minor*, c. 67). Col. Leake says: 'There are few ancient sites more likely than Laodicea to preserve many curious remains of antiquity beneath the surface of the soil; its opulence, and the earthquakes to which it was subject, rendering it probable that valuable works of art were often there buried beneath the ruins of the public and private edifices (Cicero, *Epist. ad Amic.* ii. 17; iii. 5; v. 20; Tacit. *Annal.* xiv. 27). And a similar remark, though in a lesser degree, perhaps, will apply to the other cities of the vale of the Mæander, as well as to

383. [Laodicea.]

some of those situated to the north of Mount Tmolus; for Strabo (pp. 579, 628, 630) informs us that Philadelphia, Sardis, and Magnesia of Sipylus, were, not less than Laodicea and the cities of the Mæander as far as Apameia at the sources of that river, subject to the same dreadful calamity' (*Geography of Asia Minor*, p. 253).

LAPWING, in our version, is used for דּוּכִיפַת *dukiphath*, a word which, occurring only in Lev. xi. 19, and Deut. xiv. 18, affords no internal or collateral evidence to establish the propriety of the translation. It has been surmised to mean 'double-crest;' which is sufficiently correct when applied to the hoopoe; but less so when applied to the lapwing, or the cock of the woods, *Tetrao Urogallus;* for which bird Bochart produces a more direct etymology; and he might have appealed to the fact, that the Attagan visits Syria in winter, exclusive of at least two species of *Pterocles*, or sand-grouse, which probably remain all the year. But these names were anciently, as well as in modern times, so often confounded, that the Greek writers even used the term Gallinacea to denote the hoopoe; for Hesychius explains ἔποψ in Æschylus by the Greek appellations of 'moor-cock' and 'mountain-cock' (see Bochart, in voce *Dukiphath*); and in modern languages similar mistakes respecting this bird are abundant. The Septuagint and Vulgate agree with the Arabian interpreters in translating the Hebrew דוכיפת by ἔποψ, and *upupa;* and as the Syrian name is *kikuphah*, and the Egyptian *kukuphah*, both apparently of the same origin as *dukiphath*, the propriety of substituting hoopoe for lapwing in our version appears sufficiently established.

The hoopoe is not uncommon in Palestine at this day, and was from remote ages a bird of mystery. The summit of the augural rod is said to have been carved in the form of an hoopoe's head; and one of the kind is still used by Indian gosseins, and even Armenian bishops, attention being no doubt drawn to the bird by its peculiarly arranged black and white bars upon a delicate vinous fawn-colour, and further embellished with a beautiful fan-shaped crest of the same colour, tipped with white and black. Its appellations in all languages appear to be either imitations of the bird's voice, or indications of its filthy

habits; which, however, modern ornithologists deny, or do not notice. In Egypt these birds are

384. [Hoopoe.]

numerous; forming, probably, two species, the one permanently resident about human habitations, the other migratory, and the same that visits Europe. The latter wades in the mud when the Nile has subsided, and seeks for worms and insects; and the former is known to rear its young so much immersed in the shards and fragments of beetles, &c. as to cause a disagreeable smell about its nest, which is always in holes or in hollow trees. Though an unclean bird in the Hebrew law, the common migratory hoopoe is eaten in Egypt, and sometimes also in Italy; but the stationary species is considered inedible. It is unnecessary to give further description of a bird so well known as the hoopoe, which, though not common, is nevertheless an annual visitant of England, arriving soon after the cuckoo.—C. H. S.

LATINISMS. This word, which properly signifies idioms or phraseology peculiar to the Latin tongue, is extended by Biblical critics so as to include also the Latin words occurring in the Greek Testament. It is but reasonable to expect the existence of Latinisms in the language of every country subdued by the Romans. The introduction of their civil and military officers, of settlers, and merchants, would naturally be followed by an infusion of Roman terms, &c., into the language of their new subjects. There would be many new things made known to some of them, for which they could find no corresponding word in their own tongues. The circumstance that the proceedings in courts of law were, in every part of the Roman empire, conducted in the Latin language, would necessarily cause the introduction of many Roman words into the department of law, as might be amply illustrated from the present state of the juridical language in every country once subject to the Romans, and among others, our own. Valerius Maximus (ii. 2. 2), indeed, records the tenacity of the ancient Romans for their language in their intercourse with the Greeks, and their strenuous endeavours to propagate it through all their dominions. The Latinisms in the New Testament are of three kinds, consisting (1) of Latin words in Greek letters; (2) of Latin senses of Greek words; and (3) of those forms of speech which are more properly called Latinisms. The following may suffice as examples of each of these: First, Latin words in Greek characters: ἀσσάριον, 'farthing,' from the Latin *assarius* (Matt. x. 29). This word is used likewise by Plutarch, Dionysius of Halicarnassus, and Athenæus, as may be seen in Wetstein, *in loc.* Κῆνσος, *census* (Matt. xvii. 25): κεντυρίων, *centurio* (Mark xv. 39), &c.: λεγεών, *legio*, 'legion' (Matt. xxvi. 53). Polybius (B.C. 150) has also adopted the Roman military terms (vi. 17) 1616. Σπεκουλάτωρ, *speculator*, 'a spy,' from *speculor*, 'to look about;' or, as Wahl and Schleusner think, from *spiculum*, the weapon carried by the speculator. The word describes the emperor's lifeguards, who, among other duties, punished the condemned; hence 'an executioner' (Mark vi. 27), margin, 'one of his guard;' (comp. Tacitus, *Hist.* i. 25; Joseph. *De Bell. Jud.* i. 33. 7; Seneca, *De Irâ*, i. 16). Μάκελλον, from *macellum*, 'a market-place for flesh' (1 Cor. x. 25). As Corinth was now a Roman colony, it is only consistent to find that the inhabitants had adopted this name for their public market, and that Paul, writing to them, should employ it. Μίλιον (Matt. v. 41). This word is also used by Polybius (xxxiv. 11. 8) and Strabo (v. p. 332). Secondly, Latin senses of Greek words: as καρπός (Rom. xv. 28), 'fruit,' where it seems to be used in the sense of *emolumentum*, 'gain upon money lent,' &c.: ἔπαινος, 'praise,' in the juridical sense of *elogium*, a testimonial either of honour or reproach (1 Cor. iv. 5). Thirdly, those forms of speech which are properly called Latinisms: as βουλόμενος τῷ ὄχλῳ τὸ ἱκανὸν ποιῆσαι, 'willing to content the people' (Mark xv. 15), which corresponds to the phrase *satisfacere alicui*: λαβεῖν τὸ ἱκανὸν παρά, 'to take security of,' *satis accipere ab* (Acts xvii. 9): δὸς ἐργασίαν, 'give diligence,' *da operam* (Luke xii. 58); the phrase *remittere ad alium judicem* is retained in Luke xxiii. 15: σὺ ὄψει, 'see thou to that,' *tu videris* (Matt. xxvii. 4) (Aricler, *Hermeneut. Biblica*, Viennæ, 1813, p. 99; Michaelis' *Introduction to the New Testament*, by Marsh, Cambridge, 1793, vol. i. part i. p. 163, sqq.). The importance of the Latinisms in the Greek Testament consists in this, that, as we have partly shown (and the proof might be much extended), they are to be found in the best Greek writers of the *same era*. Their occurrence, therefore, in the New Testament adds one thread more to that complication of probabilities with which the Christian history is attended. Had the Greek Testament been free from them, the objection, though recondite, would have been strong. At the same time the subject is intricate, and admits of much discussion. Dr. Marsh disputes some of the instances adduced by Michaelis (*ut supra*, p. 431, sqq.). Dresigius even contends that there are no Latinisms in the New Testament (*De Latinismis*, Leipsig, 1726; and see his *Vindiciæ Dissertationis de Latinismis*). Even Aricler allows that some instances adduced by him may have a purely Greek origin. Truth, as usual, lies in the middle, and there are, no doubt, many irrefragable instances of Latinisms, which will amply repay the attention of the student (see Georgii *Hierocrit. de Latinismis Novi Test.* Witteberg, 1733; Kypke, *Observ. Sacr.* ii. 219, Wratis. 1755; Pritii *Introductio in Lect. Nov. Test.*, p. 207. sqq. Leips. 1722. Winer refers also to Wernsdorf, *De Christo Latine loquente*, p. 19; Jahn's *Archiv.* ii. iv.; Olearius, *De Stylo Nov. Test.* p. 368, sqq.; Jnchofer, *Sacræ Latinitatis Historia*, Prag. 1742; see *Bibl. Real-Wörterbuch*, art. *Römer, Römisches*, &c.).—J. F. D.

LAVER (כִּיּוֹר and כִּיר; Sept. λουτρόν), a basin to contain the water used by the priests in their ablutions during their sacred ministrations. There was one of brass (fabricated out of the metal mirrors which the women brought from Egypt, Exod. xxxviii. 8). It had a 'foot' or base, which, from the manner in which 'the laver *and* its foot' are mentioned, must have been a conspicuous feature, and was perhaps separable from the basin itself for the purpose of removal. We are not informed of the size or shape of this laver; but it appears to have been large. It stood between the altar of burnt-offerings and the door of the tabernacle (Exod. xxx. 18-21; xl. 30-32). The water of this laver seems to have served the double purpose of washing the parts of the sacrifices, and the hands and feet of the priests. But in the temple of Solomon, when the number of both priests and victims had greatly increased, ten lavers were used for the sacrifices, and the molten sea for the personal ablutions of the priests (2 Chron. iv. 6). These lavers are more minutely described than that of the tabernacle. So far as can be made out from the description, they consisted of a square base or stand mounted upon rollers or wheels, and adorned with figures of palm-trees, cherubim, lions, and oxen. The stand doubtless formed a hollow basin for receiving the water which fell from the laver itself, and which appears to have been drawn from it by means of cocks (1 Kings vii. 27-39). The form of the lavers is not mentioned; but it is stated that each of them contained forty baths, or, according to the usual computation, about 300 English gallons. From the manner in which the bases of the lavers are described, it is evident that they were regarded as admirable works of art; but it is difficult to follow out the details which are given. This is evinced by the great discrepancy in the different figures, drawn from the descriptions which are given by Lamy, Calmet, and Villalpandus.

In the second temple there appears to have been only one laver. Of its size or shape we have no information, but it was probably like those of Solomon's temple.

LAW (תּוֹרָה; Gr. *νόμος*) means a rule of conduct enforced by an authority superior to that of the moral beings to whom it is given. The word law is sometimes also employed in order to express not only the moral connection between free agents of an inferior and others of a superior power, but also in order to express the *nexus causalis*, the connection between cause and effect in inanimate nature. However, the expression *law of nature*, *lex naturæ*, is improper and figurative. The term *law* implies, in its strict sense, *spontaneity*, or the power of deciding between right and wrong, and of choosing between good and evil, as well on the part of the lawgiver, as on the part of those who have to regulate their conduct according to his dictates. It frequently signifies not merely an individual rule of conduct, as תורת העולה, *the law of burnt offering*; תורת היולדת (Lev. xii. 2), the law concerning the conduct of women after childbirth; תורת המצרע, the law concerning the conduct of persons afflicted with leprosy (Lev. xiv. 2); תורת הבית, the description of a building to be erected by an architect:—but it signifies also a whole body of legislation; as תורת משה (1 Kings ii. 3; 2 Kings xxiii. 25; Ezra iii. 2), *the law given by Moses*, which, in reference to its divine origin, is called תורת יהוה, *the law of Jehovah* (Ps. xix. 8; xxxvii. 31; Isa. v. 24; xxx. 9). In the latter sense it is called, by way of eminence, התורה, THE *law* (Deut. i. 5; iv. 8, 44; xvii. 18, 19; xxvii. 3, 8). If not the substance of legislation, but rather the external written code in which it is contained is meant, the following terms are employed: ספר תורת משה (2 Kings xiv. 6; Isa. viii. 31; xxiii. 6); ספר תורת יהוה or ספר תורת אלהים (Josh. xxiv. 26).

In a wider sense the word *νόμος*, 'law,' is employed in order to express any guiding or directing power, originating from the nature of anything existing. The apostolic use of the word has been well expressed by Claudius Guilliaud in his work, *In Omnes Pauli Epistolas Collatio*, p. 21. Law is a certain power restraining from some, and impelling to other things or actions. Whatever has such a power, and exercises any sway over man, may be called law, in a metaphorical sense. Thus the Apostle (Rom. vii. 23) calls the right impulses and the sanctified will of the mind, *νόμος τοῦ νοός*, *the law of the mind*; and the perverse desire to sin which is inherent in our members, *νόμος ἐν τοῖς μέλεσι*, *the law in the members*. In the same manner he calls that power of faith which certainly governs the whole man, since the actions of every man are swayed by his convictions, *νόμος πίστεως*, *the law of faith*. So, the power and value ascribed to ceremonies, or rather to all outward acts, he designates *νόμος τῶν ἐντολῶν*, *the law of precepts*.

Similar expressions are, *νόμος τῆς ἁμαρτίας*, *the law of sin* (Rom. vii. 23); *νόμος τοῦ πνεύματος*, *the law of the Spirit* (viii. 2); *νόμος δικαιοσύνης*, *the law of righteousness* (ix. 31); *νόμος τοῦ ἄνδρος*, the authority of the husband over his wife (vii. 2); *νόμος ἐλευθερίας* (James i. 25; ii. 12), the holy impulse created by the sense of spiritual liberty.

If, however, the word *νόμος* alone is used, it is almost invariably equivalent to *ὁ νόμος Μωσέως*: and *οἱ ἐν τῷ νόμῳ* are the subjects of the Mosaical theocracy, viz., the Jews, who practise the *ἀνάγνωσις τοῦ νόμου*, *the reading of the law* (Acts xiii. 15), are *Ζηλωταὶ τοῦ νόμου* (xxi. 20), *τηρεῖν* (xv. 5, 24), or *φυλάσσειν*, *ποιεῖν* (Rom. ii. 14), *πράσσειν* (ii. 25), *τὸν νόμον* (Acts xxi. 24), *zealots for the observance and performance of the law*, although they debate often *περὶ ζητημάτων τοῦ νόμου αὐτῶν*, about mere legal quibbles; so that, as mere hearers, they cannot expect the blessings promised to the doers of the law.

עדות מצות חקים ומשפטים, *μαρτύρια*, *δικαιώματα*, *ἐντολαί*, *κρίματα*, *κρίσεις*, *προστάγματα*, are the various precepts contained in the law, תורה, *νόμος*.

The law is especially embodied in the last four books of the Pentateuch. In Exodus, Leviticus, and Numbers, there is perceptible some arrangement of the various precepts, although they are not brought into a system. In Deuteronomy the law or legislation contained in the three preceding books is repeated with slight modifications. The whole legislation has for its

manifest object, to found a theocratical hierarchy. We here use the word HIERARCHY without meaning to express that the Mosaical legislation was like some later hierarchies falsely so-called, in which it was attempted to carry into effect selfish and wicked plans, by passing them off as being of divine appointment. In the Mosaical hierarchy the aim is manifest, viz. to make that which is really holy (τὸ ἱερόν) prevail; while in the false hierarchies of later times the profanest selfishness has been rendered practicable by giving to its manifestations an appearance of holiness calculated to deceive the multitude.

In the Mosaical legislation the priests certainly exercise a considerable authority as external ministers of holiness; but we find nothing to be compared with the sale of indulgences in the Romish church. There occur, certainly, instances of gross misdemeanour on the part of the priests, as, for instance, in the case of the sons of Eli; but proceedings originating in the covetousness of the priests were never authorized or sanctioned by the law. In the Mosaical legislation almost the whole amount of taxation was paid in the form of tithe, which was employed in maintaining the priests and Levites as the hierarchical office-bearers of government, in supporting the poor, and in providing those things which were used in sacrifices and sacrificial feasts.

The taxation by tithe, exclusive of almost all other taxes, is certainly the most lenient and most considerate which has ever anywhere been adopted or proposed. It precludes the possibility of attempting to extort from the people contributions beyond their power, and it renders the taxation of each individual proportionate to his possessions; and even this exceedingly mild taxation was apparently left to the conscience of each person. This we infer from there never occurring in the Bible the slightest vestige either of persons having been sued or goods distrained for tithes, and only an indication of curses resting upon the neglect of paying them. Tithes were the law of the land, and nevertheless they were not recovered by law, during the period of the Tabernacle and of the first Temple. It is only during the period of the second Temple, when a general demoralization had taken place, that tithes were farmed and sold, and levied by violent proceedings, in which refractory persons were slain for resisting the levy. But no recommendation or example of such proceedings occurs in the Bible. This seems to indicate that the propriety of paying these lenient and beneficial taxes was generally felt; so much so, that there were few, or perhaps no defaulters, and that it was considered inexpedient on the part of the recipients to harass the needy.

Besides the tithes there was a small poll-tax, amounting to half a shekel for each adult male. This tax was paid for the maintenance of the sanctuary. In addition to this, the first-fruits and the first-born of men and cattle augmented the revenue. The first-born of men and of unclean beasts were to be redeemed by money. To this may be added some fines paid in the shape of sin-offerings, and also the vows and free-will offerings.

The Mosaical legislation is the further development of the covenant between Jehovah and Abraham. It is a politico-religious institution given to a nation of freeholders. The fundamental laws of this constitution are, I. Jehovah alone is God, and the invisible King of the nation (comp. Josephus, *Contra Apionem*, ii. 16).

II. The nation is the peculiar property of Jehovah, its King; and it is therefore bound to avoid all uncleanness, as well moral as physical defilement, which must result from intermixture with foreign nations who are not subjects of the theocracy. A confederacy with these nations is accordingly forbidden (Exod. xxiii. 32, and xxxiv. 12).

III. The whole territory of the state was to be so distributed that each family should have a freehold, which was intended to remain permanently the inheritance of this family, and which, even if sold, was to return at stated periods to its original owners. Since the whole population consisted of families of freeholders, there were, strictly speaking, neither citizens, nor a profane or lay-nobility, nor lords temporal. We do not overlook the fact that there were persons called heads, elders, princes, dukes, or leaders among the Israelites; that is, persons who by their intelligence, character, wealth, and other circumstances, were leading men among them, and from whom even the seventy judges were chosen, who assisted Moses in administering justice to the nation. But we have no proof that there was a nobility enjoying similar prerogatives like those which are connected with birth in several countries of Europe, sometimes in spite of mental and moral disqualifications. We do not find that, according to the Mosaical constitution, there were hereditary peers temporal. Even the inhabitants of towns were freeholders, and their exercise of trades seems to have been combined with, or subordinate to, agricultural pursuits. The only nobility was that of the tribe of Levi, and all the lords were lords spiritual, the descendants of Aaron. The priests and Levites were ministers of public worship, that is, ministers of Jehovah the King; and as such, ministers of state, by whose instrumentality the legislative as well as the judicial power was exercised. The poor were mercifully considered, but beggars are never mentioned. Hence it appears that as, on the one hand, there was no lay nobility, so, on the other, there was no mendicity.

Such is a rapid sketch of the Mosaical constitution, which, however, was certainly considerably modified after its original perfection had been sacrificed to the popular clamour for a visible king.

Owing to the rebellious spirit of the Israelites, the salutary injunctions of their law were so frequently transgressed, that it could not procure for them that degree of prosperity which it was calculated to produce among a nation of faithful observers; but it is evident that the Mosaical legislation, if truly observed, was more fitted to promote universal happiness and tranquillity than any other constitution, either ancient or modern. It has been deemed a defect that there were no laws against infanticide; but it may well be observed, as a proof of national prosperity, that there are no historical traces of this crime; and it would certainly have been preposterous to give laws against a crime which did not occur, especially as the general law against murder, 'Thou shalt not kill,' was applicable to this species also. The words of Josephus (*Contra Apionem*, ii. 24), Καὶ γυναῖξιν ἀπεῖπεν μήτ' ἀμβλοῦν τὸ σπαρέν, μήτε διαφθείρειν· ἀλλὰ ἦν φανείη, τεκνοτόνος

ἂν εἴη ψυχὴν ἀφανιζουσα καὶ γένος ἐλαττοῦσα, can only mean that the crime was against the spirit of the Mosaical law. An express verbal prohibition of this kind is not extant. There occur also no laws and regulations about wills and testamentary dispositions, although there are sufficient historical facts to prove that the next of kin was considered the lawful heir, that primogeniture was deemed of the highest importance, and that if there were no male descendants, females inherited the freehold property. We learn from the Epistle of Paul to the Hebrews (ix. 16, 17), that the Jews disposed of property by wills; but it seems that in the times of Moses, and for some period after him, all Israelites died intestate. However, the word διαθήκη, as used in Matthew, Mark, Acts, Romans, Corinthians, Galatians, Ephesians, and repeatedly in the Hebrews, implies rather a disposition, arrangement, agreement between parties, than a will in the legal acceptation of the term.

There are no laws concerning guardians, and none against luxurious living. The inefficiency of sumptuary laws is now generally recognised, although renowned legislators in ancient times, and in the middle ages, displayed on this subject their wisdom falsely so called. Neither are there any laws against suicide. Hence we infer that suicide was rare, as we may well suppose in a nation of small freeholders, and that the inefficiency of such laws was understood.

The Mosaical legislation recognises the human dignity of women and of slaves, and particularly enjoins not to slander the deaf nor mislead the blind.

The laws of Moses against crimes are severe, but not cruel. The agony of the death of criminals was never artificially protracted, as in some instances was usual in various countries of Europe, even in the present century; nor was torture employed in order to compel criminals to confess their crimes, as was done in the kingdom of Hanover as late as 1817, under the reign of George III., and where the law of torture is perhaps not yet abolished. Forty was the maximum number of stripes to be inflicted. This maximum was adopted for the reason expressly stated, that the appearance of the person punished should not become horrible, or, as J. D. Michaelis renders it, *burnt*, which expresses the appearance of a person unmercifully beaten; while, in this Christian country, in the present year, a guilty soldier was sentenced to suffer 120 stripes.

Moses expressly enjoined not to reap the corners of fields, in consideration of the poor, of persons of broken fortunes, and even of the beasts of the field.

Punishments were inflicted, in order specially to express the sacred indignation of the Divine Lawgiver against wilful transgression of his commandments, and not for any purposes of human vengeance, or for the sake of frightening other criminals.

In lawsuits very much was left to the discretion of the judges, whose position greatly resembled that of a permament jury, who had not merely to decide whether a person was guilty, but who frequently had also to award the amount of punishment to be inflicted.

In some instances the people at large were appealed to, in order to inflict summary punishment by stoning the criminal to death. This was in fact the most usual mode of execution. Other modes of execution, also, such as burning, were always public, and conducted with the co-operation of the people. Like every human proceeding, this was liable to abuse, but not to so much abuse as our present mode of conducting lawsuits, which, on account of their costliness, often afford but little protection to persons in narrow circumstances.

In the Old Testament we do not hear of a learned profession of the law. Lawyers (*νομικοί*) are mentioned only after the decline of the Mosaical institutions had considerably advanced. As, however, certain laws concerning contagion and purification were administered by the priests, these might be called lawyers. They, however, did not derive their maintenance from the administration of these laws, but were supported by glebe-lands, tithes, and portions of the sacrificial offerings. It is, indeed, very remarkable, that in a nation so entirely governed by law, there were no lawyers forming a distinct profession, and that the *νομικοί* of a later age were not so much remarkable for enforcing the spirit of the law, as rather for ingeniously evading its injunctions, by leading the attention of the people from its spirit to a most minute literal fulfilment of its letter. The Jews divide the whole Mosaical law into 613 precepts, of which 248 are affirmative and 365 negative. The number of the affirmative precepts corresponds to the 248 members of which, according to Rabbinical anatomy, the whole human body consists. The number of the negative precepts corresponds to the 365 days of the solar year; or, according to the Rabbinical work *Brandspiegel* (which has been published in Jewish German at Cracow and in other places), the negative precepts agree in number with the 365 veins which, they say, are found in the human body. Hence their logic concludes that if on each day each member of the human body keeps one affirmative precept and abstains from one thing forbidden, the whole law, and not the decalogue alone, is kept. The whole law is sometimes called by Jewish writers *Theriog*, which word is formed from the Hebrew letters that are employed to express the number 613; viz. 400=ת+200=ר+10=י+3=ג. Hence 613 =תריג *theriog*. Women are subject to the negative precepts or prohibitions only, and not to the affirmative precepts or injunctions. This exception arises partly from their nature, and partly from their being subject to the authority of husbands. According to some Rabbinical statements women are subject to 100 precepts only, of which 64 are negative and 36 affirmative. The number 613 corresponds also to the number of letters in the decalogue. Others are inclined to find that there are 620 precepts according to the numerical value of the word כתר= crown; viz., 400 = ת+200=ר+20=כ; and others, again, observe that the numerical value of the letters תורה, *law*, amounts only to 611. The first in order of these laws is found in Gen. i. 27, פרו ורבו, *be fruitful and multiply*. The transgressor of this law is, according to Rabbi Eliezer, as wicked as a murderer. He who is still unmarried at twenty years of age is a transgressor; and the law is binding upon every man, according to Schamai, until he has two sons; or,

according to Hillel, one son and one daughter (compare *Juris Hebræorum leges*, ductu Rabbi Levi Barzelonitæ, auctore J. Henrico Hottinger).

The Jews assert that, besides the *written law*, תורה שבכתב, *νόμος ἔγγραφος*, which may be translated into other languages, and which is contained in the Pentateuch, there was communicated to Moses on Mount Sinai an *oral law*, תורה שבעל פה, *νόμος ἄγραφος*, which was subsequently written down, together with many Rabbinical observations, and is contained in the twelve folio volumes which now constitute the Talmud, and which the Jews assert cannot be, or at least ought not to be, translated [Talmud].

The present article is, of course, closely interwoven with the contents of a number of others which in this Cyclopædia have preceded, or which follow it in alphabetical order, such as Adultery, Blood-revenge, Decalogue, Deuteronomy, Divorce, Exodus, Gospel, Leviticus, Marriage, Moses, Murder, Pentateuch, Retaliation, Robbery, Sabbath, Slavery, Theft, &c. &c. It is, indeed, both unnecessary and impracticable to exhaust in this place all that might with propriety be brought under the head of Law. We therefore make no such attempt, but refer our readers to the cognate articles for further information. The chief point here to be considered, is the authority ascribed in the Bible itself to law in general, and to Biblical law in particular. The misconceptions on this subject prevalent in the religious world are the more surprising, since many distinguished ecclesiastical teachers of various periods, and among these St. Augustine of the fourth and fifth, and the Reformers of the sixteenth century, have stated the Biblical doctrine respecting the law with particular clearness.

The great importance ascribed by the Reformers to the right understanding of the law is thus tersely expressed by Philip Melancthon: 'Hæc demum Christiana cognitio est, scire quod lex poscat, unde faciendæ legis vim, unde peccati gratiam petas, quomodo labascentem animam adversus dæmonem, carnem, et mundum erigas, quomodo adflictam conscientiam consoleris.' 'This alone is Christian knowledge, to be acquainted with the demands of the law, to know whence to obtain the power requisite for fulfilling the law, and whence to obtain pardon for sins committed; to know how to raise up the drooping soul against the devil, the flesh, and the world, and how to comfort the afflicted conscience.'

Christ and the Apostles express themselves respecting the authority of the law so variously, that in order to reconcile their apparent contradictions, the divines of various Christian denominations have usually felt themselves compelled to distinguish between different portions of the law, some of which, they assert, were abolished by Christ, while they maintain that others were established by him. For instance, when Christ says, in the sermon on the mount, that he was not come to destroy the law and the prophets, but to fulfil them, it has usually been asserted that he meant this merely in reference to the moral law, but that he nevertheless abolished the ceremonial and civil law of the Jews. And again, when he declines to enter into the debate pending between the Samaritans and the Jews, concerning the proper place where God ought to be worshipped; when he states as the reason for not entering into this debate, that God is a Spirit and that his true worshippers must worship him in spirit and in truth; when he promises a Comforter, the Spirit of truth, who would lead his true disciples into all truth; and when he indicates that this would be the period up to which the law would remain in force, namely, until all things are fulfilled—divines usually say that this future cessation of the law under the authority of the Spirit could never apply to the moral, but only to the ceremonial and the civil law. In a similar manner the abolition of the law, most clearly set forth in the epistles of Paul to the Romans and the Galatians, where the apostle teaches that Christians are as free from the authority of the law as the widow is free from the authority of her deceased husband, and as the adult is free from the authority of the schoolmaster who ruled his infancy, is said to apply only to the ceremonial and civil, but not to the moral law; while the latter alone is held to be referred to when the Apostle, in apparent contradiction to the general tenor of his epistles, says that 'we establish the law by faith' (Rom. iii. 31).

Against this convenient mode of overcoming the difficulty the following observations may be adduced: I. Neither Christ nor the Apostles ever distinguish between the moral, the ceremonial, and the civil law, when they speak of its establishment or its abolition.

II. They even clearly indicate that the moral law is by no means excepted when they speak of the abolition of the law in general. Thus, for instance, St. Paul, after having stated that the law is not incumbent upon the righteous, guards us against misunderstanding him, as if this referred to the ceremonial law alone; for he specifies various transgressors to whom the law is given, and who are restrained by the same. The transgressors mentioned by St. Paul are not those of the ceremonial, but of the moral law. 'But we know that the law is good, if a man use it lawfully; knowing this, that the law is not made for a righteous man, but for the lawless and disobedient, for the ungodly and for sinners, for unholy and profane, for murderers of fathers and murderers of mothers, for man-slayers, for whoremongers, for them that defile themselves with mankind, for men-stealers, for liars, for perjured persons, and if there be any other thing that is contrary to sound doctrine' (1 Tim. i. 8-10). If it had been the intention of the Apostle to inculcate that the righteous or the Christian believers were exempt from the observance of the ceremonial law, the examples taken from the transgressors of the moral law would not have illustrated, but obscured the subject. Whoever mentions murderers, whoremongers, men-stealers, liars, and perjurers, undoubtedly refers to the moral rather than to the ceremonial law. And whoever says that the law against the crimes alluded to has been abolished, cannot be supposed to speak of the ceremonial law only. And when Christ, in his first public sermon, declares that not a tittle of the law shall perish until all things are fulfilled, he cannot be supposed to mean that two-thirds of the law, viz., the civil and the ceremonial, perished eighteen centuries ago.

The foregoing observations are intended to in-

duce the reader not hastily to reject our position, that the prevalent doctrine concerning the law is not the doctrine of Christ, nor that of St. Paul. Nor is it that of St. Augustine, nor of Luther, Melancthon, and other teachers of the church, who felt no interest in paring truth down to meet the preconceived notions of congregations, but who endeavoured in their respective ages to receive revealed truth faithfully as it was given, and to communicate it in an unadulterated manner, in words as clear as the abstract nature of the subject will allow.

In order to reconcile the apparent contradictions between the various dicta of the New Testament concerning the authority of the law, we must not commence, as is usually done, namely, by distinguishing the MATTER of the law, but the FORM or MANNER in which it is binding or obligatory. He who said that not a jot or a tittle of the law should perish until all things were fulfilled, certainly could not mean that more than two-thirds of the law were abolished, but intended forcibly to express the idea that, in a certain sense, by his instrumentality, the whole law, without any exception, had obtained an increased authority. On the other hand, when the Apostle says, Λογιζόμεθα οὖν πίστει δικαιοῦσθαι ἄνθρωπον, χωρὶς ἔργων νόμου, *Therefore we conclude that a man is justified by faith without the deeds of the law* (Rom. iii. 28), he cannot mean anything else but that, in a certain sense, the whole law, without any exception, is not binding upon the faithful. We, therefore, conceive that in order to reconcile the apparent, but merely apparent, contradictions of the New Testament, we must distinguish not so much the various MATERIALS, ritual, civil, and moral, of which the law is composed, as the various MANNERS in which its *modus obligandi* may exist.

The authority which other beings may exercise upon us is two-fold: it is either *nomothetical* or *didactical*. The *nomothetical* authority, which a book, or the living voice of another moral being may exercise upon us, is either such that it precludes the exercise of our own judgment, like that which Pythagoras is said to have exercised upon his disciples, who were in the habit of settling all their disputes, as by a final reason from which there was no appeal, by αὐτὸς ἔφα, *he has said so;* or the authority is such as to excite the faculties of the listener, so that he perceives the necessity of the truth communicated. In this last case the authority exercised is not *nomothetical*, but *didactical*. The college-tutor who meets the question, how minus multiplied by minus can give plus, by 'Upon my honour, gentlemen, it is so,' endeavours to exercise a *nomothetial* authority; while he who endeavours to illustrate the internal necessity of this, to the uninitiated, startling fact, endeavours to exercise a *didactical* authority.

Beginners in any science, either mental or moral, are obliged for some time to submit to *nomothetical* authority. If, as sometimes happens, we meet with adult pupils who, instead of taking for granted our grammatical statements, constantly endeavour to cavil at the wording of those grammatical rules which we give them, before they are enabled to judge for themselves, we invariably find that such pupils do not make the same progress as others who admit without dispute what their teacher and their grammar state, until they have penetrated so far into the genius of the language to be acquired as to investigate for themselves the applicability of the rules communicated. On the other hand, students of a language who never learn to recognise the spirit of that language pervading the works and discourses of eloquent men as an authority above the rules of grammar and of grammarians, remain always inferior to those who have raised themselves to the recognition of that higher authority which may enable them to surpass their instructors who formerly exercised a *nomothetical* authority over them. The same is the case in any other branch of knowledge or science, viz., beginners are necessarily under the law or under the *nomothetical* power of elementary books and teachers until they are emancipated by seizing the spirit of the science or art; after which the external authority of books and teachers can be for them *didactical* only, and subordinate to that spirit the life of which can never be fully embodied in words.

So it was also with the human race at large: it was necessary that the law of Moses should exercise *nomothetical* authority by 'Cursed is he who does not continue in the words of this law.' And so it is now with a great portion of Christian religionists, who still require frightful curses and opposite benedictions somewhat similar to those formerly pronounced on the mountains Ebal and Gerizim, in order to keep them in the right direction. But the assertion of this *nomothetical* authority was not the ultimate aim of Christ. His most intimate disciple, whom he especially loved, states strikingly, Ὅτι ὁ νόμος διὰ Μωσέως ἐδόθη· ἡ χάρις καὶ ἡ ἀλήθεια διὰ Ἰησοῦ Χριστοῦ ἐγένετο, *For the law was given by Moses, but grace and truth came by Jesus Christ.*

In reference to this text, the Reformers declared it to be improper to call Christ a new lawgiver. This was an objection which drew forth against them the anathema pronounced in the sixth session of the Council of Trent: 'Si quis dixerit Christum Jesum a Deo hominibus datum fuisse ut redemtorem, cui fidant; non etiam ut legislatorem cui obediant; anathema sit.' 'If any man should assert, that God granted Christ Jesus to mankind only as a Redeemer in whom they should trust, and not also as a lawgiver whom they should obey, let him be accursed' (Conc. Trid. Sess. iv. Can. 21).

It is, however, a fact, that Christ did not give new laws, but only new motives for keeping the moral precepts more or less clearly known to Jews and Gentiles, by making it a prominent doctrine, that love is due to God and to men in general, even to our enemies, and that intentions are of greater moral importance than outward acts.

The characteristic of the doctrine of Christ does not consist in new laws given, but rather in the forgiveness offered for past transgressions, and in the guidance of the Holy Spirit promised to his true disciples. The authority of this Holy Spirit is described in the Gospel of John, and in the Epistle to the Romans, as superior to the letter of the law. Whosoever is filled with this Spirit is not under the law, although he fulfils the holy aim and intention of the law. The true disciple of Christ, if asked, Why did you not kill such or such a person? cannot answer, Because it is

written, 'Thou shalt do no murder.' Christians feel that they are filled with a spirit which prevents them from desiring the commission of crimes. But if they grieve that Spirit by forsaking his guidance, they sink again under the power of the written law, because they cease to belong to the δίκαιοι οἷς νόμος οὐ κεῖται, whose actions are not extorted by any external authority, but who follow the holy impulses of their sanctified mind as a νόμος ἐλευθερίας, and thus are enabled to act more in harmony with the supreme scope of the law, viz., holiness unto the Lord, than any subjection to external precepts ever could produce. This is beautifully illustrated by St. Augustine: Augustinus, libro de Spiritu et Litera; 'Per legem cognitio peccati, per fidem impetratio gratiæ contra peccatum, per gratiam sanatio animæ a vitio peccati, per animæ sanitatem libertas arbitrii, per liberum arbitrium justitiæ dilectio, per justitiæ dilectionem legis operatio. Ac per hoc sicut lex non evacuatur, sed firmatur per fidem, quia fides impetrat gratiam, qua lex impleatur; ita liberum arbitrium non evacuatur per gratiam, sed statuitur, quia gratia sanat voluntatem quâ justitia libere diligatur. Omnia hæc (quæ veluti catenatim connexui) habent voces suas in Scripturis sanctis. Lex dicit, non concupisces. Fides dicit (Ps. xl.), "Sana animam meam, quia peccavi." Gratia ait (Joannis 5), "Ecce sanus factus es, jam noli peccare, ne tibi deterius contingat." Sanitas dicit (Ps. xxix.), "Domine Deus meus, exclamavi ad te, sanasti me." Liberum arbitrium dicit (Ps. cxviii.), "Narraverunt mihi injusti delectationes suas, sed non ut lex tua Domine." Hæc Augustinus. Non destruit legem Paulus, qui prædicat factum, quod lex promiserat; eumque nunciat in quem ceu scopum, summa legis spectabat. Nam Rom. x. finis est et perfectio legis Christus, ad justitiam omni credenti, et Christus ait, "Non veni solvere legem, sed adimplere." Compare *In omnes Pauli Epistolas Collatio*, per Claudium Guilliaudum. Paris, 1550, p. 20. It is very surprising that the clear perception of the true source of the law, which was fulfilled even by its abrogation, could have been so effectually obscured as is done by the doctrine current in the religious world concerning the abolition of its civil and ceremonial, and the establishment of its moral precepts. The whole aim and scope of the Mosaical legislation have been established as much as the aim of temporary police-regulations, enacted in order to meet the emergencies of a commonwealth during a period of rebellion, is established and fulfilled by him who restores perfect peace and public tranquillity, although the natural consequence of this peace is, that those regulations cease to be in force. On the other hand, although the Christian, who is under the guidance of a spirit leading him into all truth, cannot be led by this spirit to the commission of any crime contrary to the moral precepts of Moses, it cannot be said, that by not committing murder and adultery, he obeys the Mosaical law, any more than that he obeys the injunctions of the *Code Napoleon*, in these particular instances. However, the didactic authority of the whole Mosaical law is for the Christian much greater than that of any other legislation. This didactic or teaching authority is expressed even in the words of the New Testament. The law is not merely called παιδαγωγὸς εἰς Χριστόν, 'a schoolmaster' (*i. e.* an educational guide) 'to Christ' (Gal. iii. 24), but the whole Old Testament (πᾶσα γραφή) is said to be useful for TEACHING (πρὸς διδασκαλίαν), for convincing, for directing, for EDUCATING (πρὸς παιδείαν) in righteousness, so that the man of God may be fully perfect, throughly furnished unto all good works (2 Tim. iii. 16, 17).

It was the didactic authority of the Mosaical legislation to which Michaelis referred in the dedication of his celebrated *Mosaisches Recht* to Rabenius, who had formerly requested him to instruct him in select points of Mosaic jurisprudence. 'Others will not find my remarks unworthy of their attention: but you, Sir, will regard them with the eye of an actual legislator, on whom his country (Sweden) has devolved the honourable duty of examining the archives of the state and collecting statutes and decisions; in order, thence, and from the laws already known, which had become burdensome by their multitude, to prepare a new digest of national law, not merely for the instruction of students, but for the use of the courts,' &c. Of course neither Michaelis nor Rabenius meant to change the Swedish monarchy into a Mosaical theocracy, by giving to the Pentateuch *nomothetical* force, as the Anabaptists in Germany and other fanatics partly endeavoured to effect.

Luther, who diligently translated and expounded the Pentateuch, and particularly the ten commandments, and who placed the decalogue in his catechisms as one of the five articles chiefly to be inculcated in popular instruction, was undoubtedly convinced of its didactic authority, and he expressed himself against the nomothetical authority of the law in his book *Unterricht wie sich die Christen in Mosen schicken sollen* (*Opera*, ed. Hal. tom. iii.). 'The law belongs to the Jews, and binds us no more. From the text it is clear that the ten commandments also do not belong to us, because he has not led us out of Egypt, but the Jews only. Moses we will take to be our teacher, but not as our lawgiver, unless he agrees with the New Testament and the natural law.' Many even more startling passages of the great Reformer's writings are transcribed in the present writer's work, *De Legis Mosaicæ Abrogatione*, scripsit C. H. F. Bialloblotzky, Göttingæ, 1824. Compare besides Johann David Michaelis, *Mosaisches Recht*, translated by Alexander Smith, under the title, *Commentaries on the Laws of Moses*, by the late John David Michaelis, London, 1814; Josephus, *Contra Apionem*, ii. 16, sq.; *Mosaicarum et Romanarum legum collatio*, referred usually to the fifth century; Jos. Bialloblotzky, Göttingæ, 1821.—C. H. F. B.

LAWYER (*νομικός*). This word, in its general sense, denotes one skilled in the law, as in Tit. iii. 13. When, therefore, one is called a lawyer, this is understood with reference to the laws of the land in which he lived, or to which he belonged. Hence among the Jews a lawyer was one versed in the laws of Moses, which he taught in the schools and synagogues (Matt. xxviii. 35; Luke x. 25). The same person who is called 'a lawyer' in these texts, is in the parallel passage (Mark xii. 28) called a scribe (*γραμματεύς*); whence it has been inferred that the functions of the lawyers and the scribes were identical. The individual may have been *both* a lawyer and a scribe; but it does not thence follow that all lawyers were scribes. Some suppose, however, that the 'scribes' were the public expounders of the law, while the 'lawyers' were the private expounders and teachers of it. But this is a mere conjecture; and nothing more is really known than that the 'lawyers' were expounders of the law, whether publicly or privately, or both.

LAZARUS (Λάζαρος, an abridged form of the Hebrew name Eleazer), an inhabitant of Bethany, brother of Mary and Martha, who was honoured with the friendship of Jesus, by whom he was raised from the dead after he had been four days in the tomb. This great miracle is minutely described in John xi. The credit which Christ obtained among the people by this illustrious act, of which the life and presence of Lazarus afforded a standing evidence, induced the Sanhedrim, in plotting against Jesus, to contemplate the destruction of Lazarus also (John xii. 10). Whether they accomplished this object or not, we are not informed: but the probability seems to be that when they had satiated their malice on Christ, they left Lazarus unmolested.

The raising of Lazarus from the dead was a work of Christ beyond measure great, and of all the miracles he had hitherto wrought undoubtedly the most stupendous. 'If it can be incontrovertibly shown that Christ performed one such miraculous act as this,' says Tholuck (in his *Commentar zum Evang. Johannis*), 'much will thereby be gained to the cause of Christianity. One point so peculiar in its character, if irrefragably established, may serve to develope a belief in the entire evangelical record.' The sceptical Spinoza was fully conscious of this, as is related by Bayle (*Diet.*, art. 'Spinoza'): 'On m'a assuré, qu'il disait à ses amis, que s'il eût pu se persuader la résurrection de Lazare, il auroit brisé en pièces tout son système, il auroit embrassé sans répugnance la foi ordinaire des Chrétiens.'

It is not surprising, therefore, that the enemies of Christianity have used their utmost exertions to destroy the credibility of the narrative. The earlier cavils of Woolston and his followers were, however, satisfactorily answered by Lardner and others; and the more recent efforts of the German neologists have been ably and successfully refuted by Oertelius, Langius, and Reinhard; and by Hübner, in a work entitled *Miraculorum ab Evangelistis narratorum interpretat. grammatico-historica*, Wittenb. 1807; as well as by others of still more recent date, whose answers, with the objections to which they apply, may be seen in Kuinoel. See also Flatt, in *Mag. für Dogm. und Moral.* xiv. 91; Schott, *Opuse.* i. 259; and Ewald's *Lazarus für Gebildete Christusverehrer*, Berl. 1790.

LEAD (עוֹפֶרֶת; Sept. Μόλιβδος), a well-known metal, the first Scriptural notice of which occurs in the triumphal song in which Moses celebrates the overthrow of Pharaoh, whose host is there said to have '*sunk like lead*' in the waters of the Red Sea (Exod. xv. 10).

Before the use of quicksilver was known, lead was used for the purpose of purifying silver, and separating it from other mineral substances (Plin. *Hist. Nat.* xxxii. 31). To this Jeremiah alludes where he figuratively describes the corrupt condition of the people: 'In their fire the lead is consumed (in the crucible); the smelting is in vain, for the evil is not separated' (Jer. vi. 29). Ezekiel (xxii. 18-22) refers to the same fact, and for the same purpose, but amplifies it with greater minuteness of detail. Compare also Mal. iii. 2, 3.

Job (xix. 23, 24) expresses a wish that his words were engraven 'with an iron pen and lead.' These words are commonly supposed to refer to engraving on a leaden tablet; and it is undeniable that such tablets were anciently used as a writing material (Pausan. ix. 31; Plin. *Hist. Nat.* xiii. 11). But our authorized translators, by rendering 'an iron pen and lead in the rock for ever,' seem to have entertained the same view with Rosenmüller, who supposes that molten lead was to be poured into letters sculptured on stone with an iron chisel, in order to raise the inscription. The translator of Rosenmüller (in *Bib. Cabinet*, xxvii. 64) thinks that the poetical force of the passage has been overlooked by interpreters: 'Job seems not to have drawn his image from any thing he had actually seen executed: he only wishes to express in the strongest possible language the durability due to his words; and accordingly he says, "May the pen be iron, and the ink of lead, with which they are written on an everlasting rock," *i. e.* Let them not be written

with ordinary perishable materials.' This explanation seems to be suggested by that of the Septuagint, which has 'Εν γραφείῳ σιδηρῷ καὶ μολίβδῳ, ἢ ἐν πέτραις ἐγγλυφῆναι, *i. e.* 'that they were sculptured by an iron pen and lead, or hewn into rocks.'

Although the Hebrew weights were usually of stone, and are indeed called 'stones,' a leaden weight denominated אנך *anach*, which is the Arabic word for lead, occurs in Amos vii. 7, 8. In Acts xxvii. 28, a plummet for taking soundings at sea is mentioned, and this was of course of lead.

The ancient uses of lead in the East seem to have been very few, nor are they now numerous. One may travel far in Western Asia without discovering any trace of this metal in any of the numerous useful applications which it is made to serve in European countries.

We are not aware that any trace of lead has been yet found within the limits of Palestine. But ancient lead-mines, in some of which the ore has been exhausted by working, have been discovered by Mr. Burton in the mountains between the Red Sea and the Nile; and lead is also said to exist at a place called Sheff, near Mount Sinai.

LEAH, one of the two daughters of Laban who became the wives of Jacob [Jacob].

LEAVEN AND FERMENT. The organic chemists define the process of fermentation, and the substance which excites it, as follows:—'*Fermentation* is nothing else but the putrefaction of a substance containing no nitrogen. *Ferment*, or yeast, is a substance in a state of putrefaction, the atoms of which are in a continual motion' (Turner's *Chemistry*, by Liebig). This definition is in strict accordance with the views of the ancients, and gives point and force to many passages of Sacred Writ (Ps. lxxix. 21; Matt. xvi. 6, 11, 12; Mark viii. 15; Luke xii. 1; xiii. 21; 1 Cor. v. 5-8; Gal. v. 9). *Leaven*, and fermented or even some readily fermentible substances (as honey), were prohibited in many of the typical institutions both of the Jews and Gentiles. The Latin writers use *corruptus*, as signifying *fermented;* Tacitus applies the word to the fermentation of wine. Plutarch (*Rom. Quæst.* cix. 6) assigns as the reason why the priest of Jupiter was not allowed to touch *leaven*, 'that it comes out of corruption, and corrupts that with which it is mingled.' See also Aul. Gellius, viii. 15. All fermented substances were prohibited in the Paschal Feast of the Jews (Exod. xii. 8, 19, 20); also during the succeeding seven days, usually called 'The Feast of Unleavened *Bread*,' though *bread* is not in the original. God forbade either *ferment* or *honey* to be offered to Him in his temple (*i. e.* in the symbolical rites), while they were permitted in offerings designed to be consumed as food (Num. xv. 20, 21). On Lev. ii. 11, Dr. Andrew Willet observes, 'They have a spiritual signification, because *fermentum corruptionem signat*, as St. Paul applyeth (1 Cor. v. 8). The honey is also forbidden because it had *fermentandi vim*, a leavening force' (Junius, *Hexapla*, 1631). On the same principle of symbolism, God prescribes that *salt* shall always constitute a part of the oblations to Him (Lev. ii. 13). Salt prevents corruption or decay, and preserves flesh. Hence it is used as a symbol of incorruption and perpetuity. Thus St. Paul (comp. Col. iv. 6; Eph. iv. 29) uses 'salt' as preservative from corruption, on the same principle which leads him to employ that which is *unfermented* (ἄζυμος) as an emblem of purity and uncorruptedness.

'The usual *leaven* in the East is dough kept till it becomes sour, and which is kept from one day to another for the purpose of preserving leaven in readiness. Thus, if there should be no leaven in all the country for any length of time, as much as might be required could easily be produced in twenty-four hours. *Sour dough*, however, is not exclusively used for leaven in the East, the *lees of wine* being in some parts employed as yeast' (*Pictorial Bible*, vol. i. p. 161).

In the Hebrew we find two distinct words, both translated *leaven* in the common version of the Bible. This is unfortunate, for there is the same distinction between שְׂאֹר *seor*, and חמין *khametz*, in the Hebrew, as between *leaven* and *ferment* in the English. The Greek ζύμη appears to comprehend both senses, viz. fermentation in general, whether of a mass or a liquid. Chemically speaking, the 'ferment' or 'yeast' is the same substance in both cases; but 'leaven' is more correctly applied to solids, 'ferment' both to liquids and solids.

שְׂאֹר *seor*. This word occurs only five times in the Scriptures, in four of which it is rendered 'leaven,' and in the fifth 'leavened *bread*.' It seems to have denoted originally the *remnant* of dough left on the preceding baking, which had fermented and turned acid. Hence (according to the Lexicon of Dr. Avenarius, 1588) the German *sauer*, English *sour*. Its distinctive meaning therefore is, *fermented* or *leavened mass*. It might, in this way, apply to the murk or lees of wine.

חמין *khametz;* Greek, ζύμη. This word ought not to be rendered 'leaven,' but *ferment*. It is a more general term than the former, and is applied, even in our translation, to both liquids and solids. It would be an obvious impropriety to speak of 'leavened wine;' but חמין, in Num. vi. 3, is applied to wine as an adjective. It should there be translated '*fermented* wine,' not '*vinegar of* wine.' In fact, as '*vin aigre*' signifies '*soured wine*,' the translation is equivalent to saying, 'sour-wine-wine!' Professor Lee defines it, comprehensively, as '*anything fermented*.' Castell, and the best and oldest lexicographers support him, applies it both to fermented mass and fermented wine, '*vinum fermentatum*.'

In this last sense it seems to correspond to the Greek ὄξος, a sort of acid wine in very common use amongst the ancients, called by the Latins *posca*, *vinum culpatum* (Adam's *Rom. Antiq.* p. 393; Jahn, *Bib. Antiq.* § 144). This species of wine (and in hot countries pure wine speedily passes into the acetous state) [Drink, Strong] is spoken of by the Talmudists, who inform us that it was given to persons about to be executed, mingled with drugs, in order to stupify them (Prov. xxxi. 6; *Bab. Tr. Sanhedrin*, fol. 43. 1. c. 6). This serves to explain Matt. xxvii. 34. A sour, fermented drink, used by the Tartars (*Koumiss*), appears to have derived its name from the Hebrew *khametz*. חמין is formed from מצה, to *wring* or *press out*, *suck*, &c.; whence also מצה, *unleavened* (not bread, for in several passages 'bread' and 'cakes' are *also* ex-

pressed). In Exod. xiii. 7, both *seor* and *khamets* occur together, and are evidently distinct:—'*unleavened things* (*matzah*) shall be consumed during the seven days, and there shall not be seen with thee *fermented things*, and there shall not be seen with thee *leavened mass* in all thy borders.'—F. R. L.

LEBANON. [Libanus.]

LEBBÆUS, a surname of the apostle Jude [Jude].

LEECH. [Alukah.]

LEEK. [Chatzir.]

LEES. [Shemarim.]

LEGION (Λεγεών), a division of the Roman army. It always comprised a large body of men;

385. [Legionary Soldiers.]

but the number varied so much at different times, that there is considerable discrepancy in the statements with reference to it. The legion appears to have originally contained about 3000 men, and to have risen gradually to twice that number, or even more. In and about the time of Christ it seems

386. [Legionary Soldiers.]

to have consisted of 6000 men; but this was exclusive of horsemen, who usually formed an additional body amounting to one-tenth of the infantry. As all the divisions of the Roman army are noticed in Scripture, we may add that each legion was divided into ten *cohorts* or regiments, each cohort into three *maniples* or bands, and each maniple into three *centuries* or companies of 100 each. This smaller division into centuries or hundreds, from the form in which it is exhibited as a constituent of the larger divisions, clearly shows that 6000 had become at least the formal number of a legion.

The word *legion* came to be used to express a great number or multitude. Thus, the unclean spirit (Mark v. 7), when asked his name, answers, 'My name is Legion, for *we* are many.' Many illustrations of this use of the word might be cited from the Rabbinical writers: who even apply it to inanimate objects, as when they speak of 'a legion of olives,' &c.

LENTIL. [Adashim.]

LEOPARD (נָמֵר *nimr* or *namer*; Cant. iv. 8; Isa. xi. 6; Jer. v. 6; xiii. 23; Hos. xiii. 7; Hab. i. 8; Dan. vii. 6; Rev. xiii. 2; Ecclus. xxviii. 23). Though zoologists differ in opinion respecting the identity of the leopard and the panther, and dispute, supposing them to be distinct, how these names should be respectively applied, and by what marks the animals should be distinguished, nevertheless there can be no doubt that the *nimr* of the Bible is that great spotted feline which anciently infested the Syrian mountains, and even now occurs in the wooded ranges of Libanus; for the Arabs still use نمر

387.

nimr, the same word slightly modified, to denote that animal. The Abyssinian name differs scarcely from either; and in all these tongues it means spotted. Pigikris, according to Kircher, is the Coptic name; and in English, 'leopard' has been adopted as the most appropriate to represent both the Hebrew word and the Greek πάρδαλις, although the Latin *leopardus* is not found in any author anterior to the fourth century, and is derived from a gross mistake in natural history. The variety of leopard, or rather panther, of Syria, is considerably below the stature of a lioness, but very heavy in proportion to its bulk. Its general form is so well known as to require no description beyond stating, that the spots are rather more irregular, and the colour more mixed with whitish, than in the other panthering felines, excepting the Felis Uncia, or Felis Irbis, of High Asia, which is shaggy and almost white. It is a nocturnal, cat-like animal in habits, dangerous to all domestic cattle, and sometimes even to man. In the Scrip-

tures it is constantly placed in juxtaposition with the lion or the wolf; which last, if the hyæna be intended, forms a natural association. There is in Asia Minor a species or variety of panther, much larger than the Syrian, not unfrequent on the borders of the snowy tracts even of Mount Ida, above ancient Troy; and the group of these spotted animals is spread over the whole of Southern Asia to Africa. From several names of places, it appears that, in the earlier ages of Israelitish dominion, it was sufficiently numerous in Palestine. Leopard skins were worn as a part of ceremonial costume by the superiors of the Egyptian priesthood, and by other personages in Nubia; and the animal itself is represented in the processions of tributary nations.—C. H. S.

LEPROSY. Leprosy, or λέπρα, which is derived from λεπίς, *a scale*, is a name that was given by the Greek physicians to a scaly disease of the skin. During the dark ages it was indiscriminately applied to all chronic diseases of the skin, and more particularly to elephantiasis, to which latter, however, it does not bear the slightest resemblance. Hence prevailed the greatest discrepancy and confusion in the descriptions that authors gave of the disease, until Dr. Willan restored to the term *lepra* its original signification. The disease, as it is known at the present day, commences by an eruption of small reddish spots slightly raised above the level of the skin, and grouped in a circle. These spots are soon covered by a very thin, semi-transparent scale or epidermis, of a whitish colour, and very smooth, which in a little time falls off, and leaves the skin beneath red and uneven. As the circles increase in diameter the skin recovers its healthy appearance towards the centre; fresh scales are formed, which are now thicker, and superimposed one above the other, especially at the edges, so that the centre of the scale appears to be depressed. The scales are of a greyish white colour, and have something of a micaceous or pearly lustre. The circles are generally of the size of a shilling or half-crown, but they have been known to attain half a foot in diameter. The disease generally affects the knees and elbows, but sometimes it extends over the whole body; in which case the circles become confluent. It does not at all affect the general health, and the only inconvenience it causes the patient is a slight itching when the skin is heated; or, in inveterate cases, when the skin about the joints is much thickened, it may in some degree impede the free motion of the limbs. It is common to both sexes, to almost all ages, and all ranks of society. It is not in the least infectious, but it is always difficult to be cured, and in old persons, when it is of long standing, may be pronounced incurable. It is commonly met with in this country and in all parts of Europe. Its systematic name is *Lepra vulgaris*. Dr. Willan has described another species, which he observed in this country, under the specific name of *nigricans;* but there is still some doubt as to its existence, and at any rate it must be of very rare occurrence. The Greeks distinguished three species of Lepra, the specific names of which were ἀλφός, λευκή, and μέλας. Now, on turning to the Mosaic account, we also find three species mentioned, which were all included under the generic term of בהרת *Bahéret*, or 'bright spot.' The first is called בהק *Bóhaq*, which signifies 'brightness,' but in a subordinate degree. This species did not render a person unclean. The second was called בהרת לבנה, *Bahéret lebanáh*, or a bright white *Bahéret*. The third was בהרת כהה, *Bahéret kêhâh*, or dusky *Bahéret*, spreading in the skin. These two last were also called צרעת *Tsoráat* (i. e. properly, 'a stroke,' as if a chastisement), and rendered a person unclean. The characteristic marks of the *Bahéret lebanáh* mentioned by Moses, are a glossy white and spreading scale upon an elevated base, the elevation depressed in the middle, the hair on the patches participating in the whiteness, and the patches themselves perpetually increasing. Dr. Good considers the *Bóhaq* and the ἀλφός of the Greeks to be identical with the *Lepra vulgaris*, the *Bahéret lebanáh* with the λευκή, and the *kêhâh* and μέλας with the *nigricans* of Dr. Willan (Good's *Study of Med.*, v. 590). It is very probable that the first two are the same, and it is also probable that he is correct with regard to the second two; for Celsus mentions that the λευκή was the most severe of the three, that the patches were whiter than in ἀλφός, and that the hairs on the patches become white—*in eaque albi pili sunt et lanugini similes;* but he certainly excludes all idea of contagion when he says of Vitiligo, which is the generic name under which he describes the three Greek species, *quamvis per se nullum periculum affert, tamen est fœda et ex malo corporis habitu fit* (*De Re Medica*, v. 28). It must, however, be borne in mind, that it is extremely difficult to determine, even in our day, whether an endemic or epidemic disease be really contagious; and on that account it is safer to suppose that a nation has deceived itself in believing a disease to be contagious, than to assume without further grounds that the disease has changed its character. Less can be said respecting the identity of the *Bahéret kêhâh* of Moses and the μέλας of the Greeks. It may, however, be remarked, that not only do their names correspond, but each is classed with other species which respectively resemble each other. There are some other slight affections mentioned by name in Leviticus, which the priest was required to distinguish from leprosy, such as שאת *Seêt*, שפל *Shaphâl*, נתק *Néteq*, שחין *Shechin*, i. e. 'elevation,' 'depressed,' &c.; and to each of these Dr. Good (*l. c.*) has assigned a modern systematic name. But, as it is useless to attempt to recognize a disease otherwise than by a description of its symptoms, we can have no object in discussing his interpretation of these terms. If a person had any of the above diseases he was brought before the priest to be examined. If the priest found the distinctive signs of a *Tsoráat*, or contagious leprosy, the person was immediately declared unclean. If the priest had any doubt on the subject, the person was put under confinement for seven days, when he was examined a second time. If in the course of the preceding week the eruption had made no advance, he was shut up for another seven days; and if then the disease was still stationary, and had none of the distinctive signs above noticed, he was declared clean (Lev. xiii.).

It may be useful here to subjoin a description of elephantiasis, or the leprosy of the middle ages, as this is the disease from which most of the

prevalent notions concerning leprosy have been derived, and to which the notices of lepers contained in modern books of travels exclusively refer.

Elephantiasis first of all makes its appearance by spots of a reddish, yellowish, or livid hue, irregularly disseminated over the skin and slightly raised above its surface. These spots are glossy, and appear oily, or as if they were covered with varnish. After they have remained in this way for a longer or shorter time, they are succeeded by an eruption of tubercles. These are soft, roundish tumours, varying in size from that of a pea to that of an olive, and are of a reddish or livid colour. They are principally developed on the face and ears, but in the course of years extend over the whole body. The face becomes frightfully deformed; the forehead is traversed by deep lines and covered with numerous tubercles; the eyebrows become bald, swelled, furrowed by oblique lines, and covered with nipple-like elevations; the eyelashes fall out, and the eyes assume a fixed and staring look; the lips are enormously thickened and shining; the beard falls out; the chin and ears are enlarged and beset with tubercles; the lobe and alæ of the nose are frightfully enlarged and deformed; the nostrils irregularly dilated, internally constricted, and excoriated; the voice is hoarse and nasal, and the breath intolerably fetid. After some time, generally after some years, many of the tubercles ulcerate, and the matter which exudes from them dries to crusts of a brownish or blackish colour; but this process seldom terminates in cicatrization. The extremities are affected in the same way as the face. The hollow of the foot is swelled out, so that the sole becomes flat; the sensibility of the skin is greatly impaired, and, in the hands and feet, often entirely lost; the joints of the toes ulcerate and fall off one after the other; insupportable fœtor exhales from the whole body. The patient's general health is not affected for a considerable time, and his sufferings are not always of the same intensity as his external deformity. Often, however, his nights are sleepless or disturbed by frightful dreams; he becomes morose and melancholy; he shuns the sight of the healthy, because he feels what an object of disgust he is to them, and life becomes a loathsome burden to him; or he falls into a state of apathy, and after many years of such an existence he sinks either from exhaustion, or from the supervention of internal disease. The Greeks gave the name of elephantiasis to this disease, because the skin of the person affected with it was thought to resemble that of an elephant, in dark colour, ruggedness, and insensibility, or, as some have thought, because the foot, after the loss of the toes, when the hollow of the sole is filled up and the ankle enlarged, resembles the foot of an elephant. The Arabs called it جذام *G'udhâm*, which means 'mutilation,' 'amputation,' in reference to the loss of the smaller members. They have, however, also described another disease, and a very different one from elephantiasis, to which they gave the name of داء الفيل *Da'l fil*, which means literally *morbus elephas*. The disease to which they applied this name is called by modern writers the *tumid Barbadoes leg*, and consists in a thickening of the skin and subcutaneous tissues of the leg, but presents nothing resembling the tubercles of elephantiasis. Now the Latin translators from the Arabic, finding that the same name existed both in the Greek and Arabic, translated *Da'l fil* by elephantiasis, and thus confounded the Barbadoes leg with the Arabic *G'udhâm*, while this latter, which was in reality elephantiasis, they rendered by the Greek term *lepra*. About the period of the Crusades elephantiasis spread itself like an epidemic over all Europe, even as far north as the Faroe Islands; and henceforth, owing to the above-named mistakes, every one became familiar with leprosy under the form of the terrible disease that has just been described. Leper or lazar-houses abounded everywhere: as many as 2000 are said to have existed in France alone. The disease was considered to be contagious possibly only on account of the belief that was entertained respecting its identity with Jewish leprosy, and the strictest regulations were enacted for secluding the diseased from society. Towards the commencement of the seventeenth century the disease gradually disappeared from Europe, and is now confined to intertropical countries. It existed in Faroe as late as 1676, and in the Shetland Islands in 1736, long after it had ceased in the southern parts of Great Britain. The best authors of the present day who have had an opportunity of observing the disease do not consider it to be contagious. There seems, however, to be little doubt as to its being hereditary (Good's *Study of Med.*, iii. 421; Rayer, *Mal. de la Peau*, ii. 296; Simpson *On the Lepers and Leper Houses of Scotland and England*, in *Edin. Med. and Surg. Journ.*, Jan. 1, 1842).—W. A. N.

LEVI (לֵוִי, *a joining;* Sept. Λευεί), the third son of Jacob and Leah, born in Mesopotamia B.C. 1750 (Gen. xxix. 34). No circumstance is recorded of him save the part which he and his full brother Simeon took in the massacre of the Shechemites, to avenge the wrong done to their sister Dinah (Gen. xxxiv. 25, 26). This transaction was to his last hour regarded by Jacob with abhorrence, and he failed not to allude to it in his dying declaration. As Simeon and Levi were united in that act, so the patriarch couples them in his prophecy: 'Accursed be their anger, for it was fierce; and their wrath, for it was cruel! I will divide them in Jacob, and disperse them in Israel.' And, accordingly, their descendants were afterwards, in different ways, dispersed among the other tribes; although, in the case of Levi, this curse was eventually turned into a benefit and blessing.

LEVIATHAN (לִוְיָתָן, Job iii. 8; xli. 1; Ps. lxxiv. 14; civ. 26; Isa. xxvii. 1) [Behemoth, Crocodile, Dragon]. Gesenius very justly remarks that this word, which denotes any twisted animal, is especially applicable to every great tenant of the waters, such as the great marine serpents and crocodiles, and, it may be added, the colossal serpents and great monitors of the desert. In general it points to the crocodile, and Job xli. is unequivocally descriptive of that Saurian. Probably the Egyptian crocodile is therein depicted in all its magnitude, ferocity, and indolence, such as it was in early days, when as yet unconscious of the power of man, and only individually tamed for the purposes of an imposture, which had

sufficient authority to intimidate the public and protect the species, under the sanctified pretext that it was a type of pure water, and an emblem of the importance of irrigation; though the people in general seem ever to have been disposed to consider it a personification of the destructive principle. At a later period the Egyptians, probably of such places as Tentyris, where crocodiles were not held in veneration, not only hunted and slew them, but it appears from a statue that a sort of Bestiarii could tame them sufficiently to perform certain exhibitions mounted on their backs. The intense musky odour of its flesh must have rendered the crocodile, at all times, very unpalatable food, but breast-armour was made of the horny and ridged parts of its back. We have ourselves witnessed a periodical abstinence in the great Saurians, and have known negro women, while bathing, play with young alligators; which, they asserted, they could do without danger, unless they hurt them and thereby attracted the vengeance of the mother; but the impunity most likely resulted from the period of inactivity coinciding with the then state of the young animals, or from the negro women being many in the water at the same time. The occurrence took place at Old Harbour, Jamaica.

Some misstatements and much irrelevant learning have been bestowed upon the Leviathan. Viewed as the crocodile of the Thebaid, it is not clear that it symbolised the Pharaoh, or was a type of Egypt, any more than of several Roman colonies (even where it was not indigenous, as at Nismes in Gaul, on the ancient coins of which the figure of one chained occurs), and of cities in Phœnicia, Egypt, and other parts of the coast of Africa. But in the Prophets and Psalms there are passages where Pharaoh is evidently apostrophized under the name of Leviathan, though other texts more naturally apply to the whale, notwithstanding the objections that have been made to that interpretation of the term [Whale].—C. H. S.

LEVITES (לְוִיִּם; Sept. Λευῖται), the descendants of Levi, through his sons Gershon, Kohath, and Merari, whose descendants formed so many sub-tribes or great families of the general body. In a narrower sense the term Levites designates the great body of the tribe employed in the subordinate offices of the hierarchy, to distinguish them from that one family of their body—the family of Aaron—in which the priestly functions were vested.

While the Israelites were encamped before Mount Sinai, the tribe of Levi, to which Moses and Aaron belonged, was, by special ordinance from the Lord, set specially apart for sacerdotal services, in the place of the first-born of the different tribes and families to whom such functions, according to ancient usage, belonged; and which indeed had already been set apart as holy, in commemoration of the first-born of the Israelites having being spared when the first-born of the Egyptians were destroyed (Num. iii. 12,13, 40-51; Exod. xiii.). When it was determined to set apart a single tribe of Levi for this service, the numbers of the first-born in Israel and of the tribe selected were respectively taken, when it was found that the former amounted to 22,273, and the latter to 22,000. Those of the first-born beyond the number of the Levites were then redeemed at the rate of five shekels, or 12*s.* 6*d.*, each, and the money assigned to the priests. At the same time the cattle which the Levites then happened to possess were considered as equivalent to all the firstlings of the cattle which the Israelites had; and, accordingly, the firstlings were not required to be brought, as in subsequent years, to the altar and to the priesthood (Num. iii. 41-51).

In the wilderness the office of the Levites was to carry the Tabernacle and its utensils and furniture from place to place, after they had been packed up by the priests (Num. iv. 4-15). In this service each of the three Levitical families had its separate department; the Gershonites carried the hangings and cords of the Tabernacle, for which they were allowed two wains, each drawn by four oxen (Num. iii. 25, 26; iv. 24-28; vii. 7). The Kohathites carried the ark, the table of shew-bread, the candlestick, the two altars, and such of the hangings as belonged to the sanctuary; for this they had no wains or oxen, the whole being carried upon their shoulders (Num. iii. 31; iv. 4-15; vii. 9); the Merarites had charge of the substantial parts of the Tabernacle—the boards, pillars, bars, bases, &c., and also all the ordinary vessels of service, for which they were allowed four wains and eight oxen (Num. iii. 36, 37; iv. 31, 32; vii. 8). In this manner they proceeded in all their journeys; and when they settled in a place, and had erected the Tabernacle, the different families pitched their tents around it in the following manner: the Gershonites behind it on the west (Num. iii. 23), the Kohathites on the south (iii. 29), the Merarites on the north (iii. 35), and the priests on the east (iii. 38). They all assisted Aaron and his sons in taking care of, and attending on, the Tabernacle, when it was pitched; but they were allowed to take no part in the services of the altar (xviii. 2-7).

This was the nature of their service in the desert: but when they entered the land of Canaan, and the tabernacle ceased to be migratory, the range of their service was considerably altered. While part attended at the tabernacle, the rest were distributed through the country in the several cities which were allotted to them. These cities are commonly reckoned forty-eight; but thirteen of them were reserved for the priests, so that only thirty-five belonged to the Levites. The names of these cities, and the tribes in which they were situated, are given in Josh. xxi. 20-42; 1 Chron. vi. 64-81. Of the forty-eight cities six were cities of refuge for the unintentional homicide, of which one, Hebron, was a priestly city (Deut. iv. 41-43; Josh. xx. 2-9).

In the time of David, when the number of the priests and Levites had much increased, a third and very important alteration was effected, as much, or more, with reference to the Temple, for which he made every possible preparation, as for the existing service at the Tabernacle. While the priests were divided into twenty-four courses, that they might attend the Temple in rotation weekly, and only officiate about two weeks in the year, the Levites were also divided into twenty-four courses. In the book of Chronicles we have four times twenty-four courses of Levites mentioned, but all their employments are not distinctly stated (1 Chron. xxiii. 7-23; xxiv. 20-31; xxv. 1-31; xxvi. 1-12). The most conspicuous clas-

sification is that of twenty-four courses of porters and servitors, and twenty-four of musicians.

The courses of the porters and servitors are mentioned in 1 Chron. xxvi. 1-12; their different posts are stated in verses 13-16; and it would appear from 1 Chron. xxvi. 17-19, that the guard of Levites for each day was twenty-four. In 1 Chron. ix. 20-34 there are some further particulars of the articles they had in charge. It is clear from all this that the porters were quite distinct from the singers.

The office of the porters was to open and shut the doors and gates of the Temple-courts, at which they also attended throughout the day to prevent the entrance of any harmful or unclean person or thing (1 Chron. xxvi. 17, 18). They had also the charge of the treasure-chambers in their respective wards; for we find four of the chief porters holding this trust in 1 Chron. ix. 26, and their names and the articles in their charge are given in 1 Chron. xxvi. 20-29; 2 Chron. xxxi. 12-14.

Besides acting as porters and servants during the day, we learn that they were also the guards of the Temple. Minute particulars with reference to the second Temple are given by the Rabbinical and other authors, and so far as they are correct, which they seem to be in substance, they may be supposed to apply equally well to the first Temple, from which they must have been in the main transmitted. Without entering into specific details, it may be remarked that the whole number of guards to the Temple, at night, is stated to have been twenty-four, of whom three were priests. These are described as having been under an overseer, called 'the man of the mountain of the house.' He went his rounds to see that the guards were at their posts: if he found any one seated who should have been standing, he said 'Peace be unto thee;' but if he found any one asleep, he struck him, and sometimes set fire to his clothes (Maimon. *Beth Habech.* ch. viii.). This has been thought to throw light upon Rev. xvi. 15, 'Behold I come as a thief; blessed is he that watcheth and keepeth his garments, lest he walk naked, and they see his shame.'

Bishop Lowth (on Isa. lxii. 6) supposes that Ps. cxxxiv. furnishes an example of the manner in which the watchmen of the Temple acted during the night, and that the whole Psalm is nothing more than the alternate cry of the two different divisions, the first addressing the second, reminding them of their duty, and the second answering by a solemn blessing.

First chorus.—Come on, now, bless ye Jehovah,
all ye servants of Jehovah; ye who stand in
the house of Jehovah in the night;
Lift up your hands towards the holy place, and
bless ye Jehovah.
Second chorus.—Jehovah bless thee out of Zion,
He that made heaven and earth.'

The bishop further supposes that the address and answer constituted a set form which each division proclaimed at stated intervals to notify the time of the night; and he illustrates this view by reference to Isa. lxii. 6—

'Upon thy walls, O Jerusalem! have I appointed
watchmen,
That shall never be silent the whole day nor the
whole night.'

Here, however, the allusion is obviously to the guard of the city, not of the Temple; although the existence of the practice in the city may supply an argument for its existence in the Temple.

We have thus seen that one division of the Levites was employed as porters during the day, and another as guards during the night: a third division served as musicians. A catalogue of these is given in 1 Chron. xxi. 1-9, according to their employments; and another, according to their courses, in 1 Chron. xxi. 9-31. We shall have to speak of MUSIC under that head, and need only here state that on grand occasions, when a full band was formed, the family of Heman sung in the middle (1 Chron. vi. 33-38), the family of Asaph on the right hand (vi. 39-43), and the family of Ethan on the left. The ordinary place for the musicians, vocal and instrumental, was at the east end of the court of the priests, between the court of Israel and the altar. We are told, however, that although the Levites were the regular ministers of sacred song, other men of skill and note, of the commonalty, especially such as were connected by marriage with the priesthood, were occasionally allowed to assist in the instrumental department, with the instruments on which they excelled; but that even these might not, on any account, join in the vocal department, which was considered the most solemn (*T. Bab.* tit. *Erachin*, fol. 11; Maimon. *Keb Mikdash*, ch. iii.). This may help to explain or illustrate 2 Sam. vi. 5.

It seems that the singers could never be under twelve, because that number was particularly mentioned at their first appointment (1 Chron. xxv. 9); but there was no objection to any larger number (*Erachin*, ut supra). The young sons of the Levites were, on such occasions only, allowed to enter the court of the priests with their fathers, that their small voices might relieve the deep bass of the men (*Gemar.* tit. *Succah*, ch. v.); and for this authority was supposed to be found in Ezra iii. 9.

The Levites were not at liberty to exercise any properly sacerdotal functions; but on extraordinary occasions they were permitted to assist in preparing the sacrifices, without, however, in any way concerning themselves with the blood (2 Chron. xxix. 34; xxx. 16, 17; xxxv. 1).

In Num. iv. 3 the Levites are described as commencing their actual service at thirty years of age; but in Num. viii. 24, 25, twenty-five is the age mentioned; and in 1 Chron. xxiii. 24, 25, and Ezra iii. 8, twenty. The reason of these apparent discrepancies is, that from twenty-five to thirty they were in the state of probationers, doing some things, but excluded from others (Aben Ezra, on Num. viii.). At thirty they became qualified for every part of the Levitical service. This was under the Tabernacle; but when the Temple was built, and bodily strength was less required, the age was reduced to twenty. After fifty they were no longer called upon to serve as a matter of obligation; but they might attend if they thought proper, and perform any usual service which was not considered burdensome. Thus, in the wilderness, they ceased at that age to carry any part of the burdens when the ark and Tabernacle were removed (Num. viii. 25, 26).

When the Levitical body was first set apart for its sacred duties, the existing members were consecrated in the manner particularly described in Num. viii. 6, 22. They, and in them their descendants, were thus inducted into their particular office; and, in later times, when any one

became of age, it was sufficient for his admission to prove that he belonged to a Levitical family, and, probably, to offer some trifling sacrifice. It does not appear that the Levites, when at home, had any particular dress to distinguish them from their countrymen; nor is there any positive evidence that they had any distinctive garb, even when on actual service at the tabernacle or temple. Josephus (*Antiq.* xx. 9) relates, that only six years before the destruction of the Temple by the Romans, the Levites were allowed by Agrippa to wear a linen tunic, like the priests—an innovation with which the latter were highly displeased. This shows that the dress of the Levites, even when on duty, had not previously been in any respect similar to that of the priests.

The subsistence of the Levites was provided for in a peculiar manner. It consisted, first, of a compensation for the abandonment of their right to one-twelfth of the land of Canaan; and, secondly, of a remuneration for their services in their official capacity as devoted to the services of the sanctuary. The territorial compensation lay in the 48 cities which were granted to the whole tribe, including the priests. These cities were scattered among the different tribes, as centres of instruction, and had 1000 square cubits, equal to above 305 English acres, attached to each of them, to serve for gardens, vineyards, and pasturage. It is obvious, however, that this alone could not have been an adequate compensation for the loss of one-twelfth of the soil, seeing that the produce of 305 acres could not in any case have sufficed for the wants of the inhabitants of these cities. The further provision, therefore, which was made for them must be regarded as partly in compensation for their sacrifice of territory, although we are disposed to look upon it as primarily intended as a remuneration for the dedication of their services to the public. This provision consisted of the tithe, or tenth of the produce of the grounds allotted to the other tribes. The simplest view of this payment is to regard it, first, as the produce of about as much land as the Levites would have been entitled to if placed on the same footing with regard to territory as the other tribes; and also as the produce of so much more land, which the other tribes enjoyed in consequence of its not having been assigned to the tribe of Levi. In giving the produce of this land to the Levites the Israelites were therefore to be regarded as simply releasing them from the cares of agriculture, to enable them to devote themselves to the service of the sanctuary. The land which produced the tithe was just so much land held by the other tribes in their behalf; and the labour of cultivating this land was the salary paid to the Levites for their official services. The tenth was paid to the whole tribe of Levi; but as the Levites had to give out of this one-tenth to the priests, their own allowance was only nine-tenths of the tenth. A more particular account of tithes belongs to another head [Tithes]. The Levites had also a certain interest in the 'second tithe,' being the portion which, after the first tithe had been paid, the cultivator set apart for hospitable feasts, which were held at the place of the sanctuary in two out of three years, but in the third year at home. This interest, however, extended no further than that the offerer was particularly enjoined to invite the priests and Levites to such feasts.

The earliest notice we have of the numbers of the Levites occurs at their first separation in the desert, when there were 22,300, of a month old and upwards; of whom 8580 were fit for service, or between the ages of 30 and 50 (Num. iii. 22, 28, 34; iv. 2, 34-49). Thirty-eight years after, just before the Israelites entered Canaan, they had increased to 23,000, not one of whom had been born at the time of the former enumeration (Num. xxvi. 57, 62-65). About 460 years after the entry into Canaan (B.C. 1015) they were again numbered by David, a little before his death, and were found to have increased to 38,000 men fit for Levitical service—of whom 24,000 were 'set over the work of the Lord,' 6000 were officers and judges, 4000 were porters, and 4000 were musicians (1 Chron. xxiii. 3, 4, 5). If the same proportion then existed between those come of age and those a month old which existed when the tribe quitted Egypt, the entire number of the Levitical body, in the time of David, must have been 96,433.

After the revolt of the ten tribes, those of the Levites who resided in the territories of those tribes, having resisted the request of Jeroboam to transfer their services to his idolatrous establishments at Dan and Bethel, were obliged to abandon their possessions and join their brethren in Judah and Benjamin (2 Chron. xi. 12, 13, 14; xiii. 9); and this concentration of the Levitical body in the kingdom of Judah must have had an important influence upon its condition and history. That kingdom thus actually consisted of three tribes—Judah, Benjamin, and Levi,—of which one was devoted to sacerdotal uses. This altered position of the Levites—after they had been deprived of most of their cities, and the tithes from ten of the tribes were cut off—presents a subject for much interesting investigation, into which we cannot enter. Their means must have been much reduced; for it cannot be supposed that Judah and Benjamin alone were able, even if willing, to undertake the support of the whole Levitical body on the same scale as when the dues of all Israel flowed into its treasuries. In the subsequent history of Judah the Levites appear less frequently than might have been expected. The chief public measure in which they were engaged was the restoration of the house of David in the person of young Joash (2 Chron. xxiii. 1-11); which may be regarded as mainly the work of the Levitical body, including the priests.

Under the edict of Cyrus, only 341 Levites, according to Ezra (ii. 40-42), or 350, according to Nehemiah (vii. 43-45), returned with Zerubbabel to Jerusalem. This is less surprising than might at first sight appear; for if, before the captivity, the great body of them had been in straitened circumstances and without fixed possessions in Judah, it was only consistent with human prudence that those who had, in all probability, comfortably settled themselves in Babylon, should not be anxious to return in such numbers to Palestine as were likely to produce similar effects. A few more are mentioned in Neh. xii. 24-26. Those who did return seem to have had no very correct notion of their obligations and duties; for there were many who formed matrimonial alliances with the idolaters of the land, and thereby corrupted both their morals and genealogies. But they were prevailed upon to reform this abuse;

and, as a token of obedience, signed the national covenant with Nehemiah, and abode at Jerusalem to influence others by their authority and example (Neh. x. 9-13; xi. 15-19).

The Levites are not mentioned in the Apocryphal books, and very slightly in the New Testament (Luke x. 32; John i. 19; Acts iv. 36); but the 'scribes' and the 'lawyers,' so often named in the Gospels, are usually supposed to have belonged to them.

It would be taking a very narrow view of the duties of the Levitical body if we regarded them as limited to their services at the sanctuary. On the contrary, we see in their establishment a provision for the religious and moral instruction of the great body of the people, which no ancient lawgiver except Moses ever thought of attending to. But that this was one principal object for which a twelfth of the population—the tribe of Levi—was set apart, is clearly intimated in Deut. xxxii. 9, 10: 'They shall teach Jacob thy judgments and Israel thy law; they shall put incense before thee, and whole burnt sacrifice upon thine altar.' They were to read the volume of the law publicly every seventh year at the Feast of Tabernacles (Deut. xxxi. 10-13). 'This public and solemn periodical instruction,' observes Dean Graves (*Lectures*, p. 170), 'though eminently useful, was certainly not the entire of their duty; they were bound from the spirit of this ordinance to take care that at all times the aged should be improved and the children instructed in the knowledge and fear of God, the adoration of his majesty, and the observance of his law; and for this purpose the peculiar situation and privileges of the tribe of Levi, as regulated by the divine appointment, admirably fitted them. Possessed of no landed property, and supported by the tithes and offerings which they received in kind, they were little occupied with labour or secular care; deriving their maintenance from a source which would necessarily fail if the worship of God were neglected, they were deeply interested in their support. Their cities being dispersed through all the tribes, and their families permitted to intermarry with all, they were everywhere at hand to admonish and instruct; exclusively possessed of the high-priesthood, as well as of all other religions offices, and associated with the high-priest and judge in the supreme court of judicature, and with the elders of every city in the inferior tribunals, and guardians of the cities of refuge, where those who were guilty of homicide fled for an asylum, they must have acquired such influence and reverence among the people as were necessary to secure attention to their instructions; and they were led to study the rules of moral conduct, the principles of equity, and, above all, the Mosaic code, with unceasing attention; but they were not laid under any vows of celibacy, or monastic austerity and retirement, and thus abstracted from the intercourse and feelings of social life. Thus circumstanced, they were assuredly well calculated to answer the purpose of their institution, to preserve and consolidate the union of all the other tribes, and to instruct and forward the poor in knowledge, virtue, and piety' (*Lectures*, pp. 169-171; Brown's *Antiquities*, i. 301-347; Godwyn's *Moses and Aaron*, i. 5; Witsius, *Dissert. II. de Theocrat. Israelitar.* add. Goodwin *Moses et Aaron*; Jennings, *Antiquities*, pp. 184-206; Carpzov, *Apparat. Crit.* see Index; Saubert, *Comm. de Sacerdot. et Sacris Hæbr. personis*, Opp. p. 283, sqq.; Gramberg, *Krit. Gesch. der Religionsideen des Alten Test.* vol. i. c. 3).

LEVITICUS, in the Hebrew canon, is called וַיִּקְרָא, and is the third book of Moses.

CONTENTS. — Leviticus contains the further statement and development of the Sinaitic legislation, the beginnings of which are described in Exodus. It exhibits the HISTORICAL progress of this legislation; consequently we must not expect to find the laws detailed in it in a systematic form. There is, nevertheless, a certain order observed, which arose from the nature of the subject, and of which the plan may easily be perceived. The whole is intimately connected with the contents of Exodus, at the conclusion of which book that sanctuary is described with which all external worship was connected (Exod. XXXV.-xl.). Leviticus begins by describing the worship itself. First are stated the laws concerning sacrifices (ch. i.-vii.). In this section is *first* described the general QUALITY of the sacrifices, which are divided into BLOODY and UNBLOODY; *secondly*, their AIM and OBJECT, according to which they are either THANK-OFFERINGS or SIN-OFFERINGS; and *lastly*, the TIME, PLACE, and MANNER in which they should be made.

Then follows a description of the manner in which Aaron and his sons were consecrated as priests, and how, by the manifestation of the divine glory, they were ordained to be mediators between God and his people (ch. viii.-ix.). As formerly the ingratitude of the people had been severely punished (Exod. XXXII. sq.), so now the disobedience of the priests was visited with signal marks of the divine displeasure (Lev. x.). On this occasion were given several laws concerning the requisites of the sacerdotal office.

The theocratical sanctity of the nation was intimately connected with the existence of the sanctuary. Every subject, indeed, connected with the sanctuary was intended to uphold a strict separation between HOLY and UNHOLY things. The whole theocratical life was based on a strict separation of things UNCLEAN from things CLEAN, which alone were offered to God and might approach the sanctuary. The whole creation, and especially all animal life, should, like man himself, bear testimony to the defilement resulting from sin, and to its opposite, viz. the holiness of the Lord (ch. xi.-xv.).

The great feast of atonement formed, as it were, the central point of the national sanctity, this feast being appointed to reconcile the whole people to God, and to purify the sanctuary itself. All preceding institutions, all sacrifices and purifications, receive their completion in the great feast of Israel's atonement (ch. xvi.).

Thus we have seen that the sanctuary was made the POSITIVE central point of the whole nation, or of national holiness; but it was to be inculcated NEGATIVELY also, that all worship should be connected with the sanctuary, and that no sacrifices should be offered elsewhere, lest any pagan abuses should thereby strike root again (ch. xvii.).

The danger of deserting Jehovah and his worship would be increased after the conquest of

Canaan, when the Israelites should inhabit a country surrounded by pagans. The following chapters (xviii.-xx.) refer to the very important relation in which Israel stood to the surrounding tribes, and the positive motive for separating them from all other nations; to the necessity of extirpating the Canaanites; and to the whole position which the people of the Lord should occupy with reference to paganism. Chapter xviii. begins with the description of those crimes into which the people might easily be misled by the influence of their pagan neighbours, viz. fornication, contempt of parents, idolatry, &c.

The priests were specially appointed to lead the nation by their good example scrupulously to avoid every thing pagan and unclean, and thus to testify their faithful allegiance to Jehovah (ch. xxi.-xxii. 16). It is particularly inculcated that the sacrifices should be without blemish; and this is made a means of separating the Israelites from all pagan associations and customs (ch. xxii. 17-33). But the strongest bulwark erected against pagan encroachments was the appointment of solemn religious meetings, in which the attention of the people was directed to the central point of national religion, and which theocratically consecrated their whole proceedings to the worship of God. This was the object of the laws relating to fasts (ch. xxiii.). These laws divided the year into sacred sections, and gave to agricultural life its bearing upon the history of the works of God, and its peculiarly theocratic character, in contradistinction to all pagan worship, which is merely bent upon the symbolisation of the vital powers of nature.

In ch. xxiv. 1-9 follows the law concerning the preparation of the sacred oil, and the due setting forth of the shew-bread. Although this is in connection with ch. xxii. 17, sq., it is nevertheless judiciously placed after ch. xxiii., because it refers to the agricultural relation of the Israelites to Jehovah stated in that chapter. The Mosaical legislation is throughout illustrated by facts, and its power and significance are exhibited in the manner in which it subdues all subjective arbitrary opposition. So the opposition of the law to paganism, and the evil consequences of every approach to pagans, are illustrated by the history of a man who sprang from a mixed marriage, who cursed Jehovah, and was stoned as Jehovah directed (ch. xxiv. 10-24).

The insertion of this fact in its chronological place slightly interrupts the order of the legal definitions. The law concerning the Sabbath and the year of Jubilee, which follow it, are intimately connected with the laws which precede. For the Sabbatical law completes the declaration that Jehovah is the real proprietor and landlord of Canaan, to whom belong both the territory and its inhabitants; and whose right is opposed to all occupation of the country by heathens (ch. xxv.).

This section is concluded with the fundamental position of the law, viz. that Jehovah, the only true and living God, will bless his faithful people who heartily keep his law; and will curse all who despise him and transgress his law (ch. xxvi.).

After it has thus been explained how the people might be considered to be the owners of the country, there appropriately follows the law concerning several possessions which were more exclusively consecrated to Jehovah, or which, like the first-born, belonged to him without being specially offered. The whole concludes with an appendix embracing the law concerning vows and tithes, with a manifest reference to the preceding parts of the legislation (ch. xxvii. 17-24).

Authenticity.—The arguments by which the unity of Leviticus has been attacked are very feeble. Some critics, however, such as De Wette, Gramberg, Vatke, and others, have strenuously endeavoured to prove that the laws contained in Leviticus originated in a period much later than is usually supposed. But the following observations sufficiently support their Mosaical origin, and show that the whole of Leviticus is historically genuine. The laws in ch. i.-vii. contain manifest vestiges of the Mosaical period. Here, as well as in Exodus, when the priests are mentioned, Aaron and his sons are named; as, for instance, in ch. i. 4, 7, 8, 11, &c. The tabernacle is the sanctuary, and no other place of worship is mentioned anywhere. Expressions like the following constantly occur, לפני אהל מועד, *before the tabernacle of the congregation*, or פתח אהל מועד, *the door of the tabernacle of the congregation* (ch. i. 3; iii. 8, 13, &c.). The Israelites are always described as a congregation (ch. iv. 13, sq.), under the command of the זקני העדה, *elders of the congregation* (ch. iv. 15), or of a נשיא, *ruler* (ch. iv. 22). Every thing has a reference to life in a camp, and that camp commanded by Moses (ch. iv. 12, 21; vi. 11; xiv. 8; xvi. 26, 28). A later writer could scarcely have placed himself so entirely in the times, and so completely adopted the modes of thinking of the age, of Moses: especially if, as has been asserted, these laws gradually sprung from the usages of the people, and were written down at a later period with the object of sanctioning them by the authority of Moses. They so entirely befit the Mosaical age, that, in order to adapt them to the requirements of any later period, they must have undergone some modification, accommodation, and a peculiar mode of interpretation. This inconvenience would have been avoided by a person who intended to forge laws in favour of the later modes of Levitical worship. A forger would have endeavoured to identify the past as much as possible with the present.

The section in ch. viii.-x. is said to have a mythical colouring. This assertion is grounded on the miracle narrated in ch. ix. 24. But what could have been the inducement to forge this section? It is said that the priests invented it in order to support the authority of the sacerdotal caste by the solemn ceremony of Aaron's consecration. But to such an intention the narration of the crime committed by Nadab and Abihu is strikingly opposed. Even Aaron himself here appears to be rather remiss in the observance of the law (comp. x. 16, sq., with iv. 22, sq.). Hence it would seem that the forgery arose from an opposite or anti-hierarchical tendency. The fiction would thus appear to have been contrived without any motive which could account for its origin.

In ch. xvii. occurs the law which forbids the slaughter of any beast except at the sanctuary. This law could not be strictly kept in Palestine, and had therefore to undergo some modification (Deut. xii.). Our opponents cannot show any

rational inducement for contriving such a fiction. The law (ch. xvii. 6, 7) is adapted to the nation only while emigrating from Egypt. It was the object of this law to guard the Israelites from falling into the temptation to imitate the Egyptian rites and sacrifices offered to he-goats, שְׂעִירִים; which word signifies also demons represented under the form of he-goats, and which were supposed to inhabit the desert (comp. Jablonsky, *Pantheon Ægyptiacum*, i. 272, sq.).

The laws concerning food and purifications appear especially important if we remember that the people emigrated from Egypt. The fundamental principle of these laws is undoubtedly Mosaical, but in the individual application of them there is much which strongly reminds us of Egypt. This is also the case in Lev. xviii. sq., where the lawgiver has manifestly in view the two opposites, Canaan and Egypt. That the lawgiver was intimately acquainted with Egypt, is proved by such remarks as those about the Egyptian marriages with sisters (ch. xviii. 3); a custom which stands as an exception among the prevailing habits of antiquity (Diodorus Siculus, i. 27; Pausanias, *Attica*, i. 7).

The book of Leviticus has a prophetical character. The lawgiver represents to himself the future history of his people. This prophetical character is especially manifest in chs. xxv., xxvi., where the law appears in a truly sublime and divine attitude, and when its predictions refer to the whole futurity of the nation. It is impossible to say that these were *vaticinia ex eventu*, unless we would assert that this book was written at the close of Israelitish history. We must rather grant that passages like this are the real basis on which the authority of later prophets is chiefly built. Such passages prove also, in a striking manner, that the lawgiver had not merely an external aim, but that his law had a deeper purpose, which was clearly understood by Moses himself. That purpose was to regulate the national life in all its bearings, and to consecrate the whole nation to God. See especially ch. xxv. 18, sq.

But this ideal tendency of the law does not preclude its applicability to matters of fact. The law had not merely an *ideal*, but also a *real* character, evidenced by its relation to the faithlessness and disobedience of the nation. The whole future history of the covenant people was regulated by the law, which has manifested its eternal power and truth in the history of the people of Israel. Although this section has a general bearing, it is nevertheless manifest that it originated in the times of Moses. At a later period, for instance, it would have been impracticable to promulgate the law concerning the Sabbath and the year of Jubilee: for it was soon sufficiently proved how far the nation in reality remained behind the ideal Israel of the law. The sabbatical law bears the impress of a time when the whole legislation, in its fulness and glory, was directly communicated to the people, in such a manner as to attract, penetrate, and command.

The principal works to be consulted with reference to Leviticus will be found under the article PENTATEUCH.—H. A. C. H.

LIBANUS, or LEBANON (לְבָנוֹן; Sept. Λίβανος), the Latin, or rather the Greek name of a long chain of mountains on the northern border of Palestine. The term Libanus is more convenient in use than the Hebrew form Lebanon, as enabling us to distinguish the parallel ranges of Libanus and Anti-Libanus, which have no such distinctive names in connection with the Hebrew designation. Lebanon seems to be applied in Scripture to either or both of these ranges; and we shall also use it in this general sense: but Libanus means distinctively the westernmost of those ranges, which faces the Mediterranean, and Anti-Libanus the eastern, facing the plain of Damascus; in which sense these names will be used in this article. The present inhabitants of the country have found the convenience of distinguishing these parallel ranges; and give to Libanus the name of 'Western Mountain' (Jebel esh-Sharki), and to Anti-Libanus that of 'Eastern Mountain' (Jebel el-Gharbi); although Jebel Libnân (the same name in fact as Lebanon) occurs among the Arabs with special reference to the eastern range.

These two great ranges, which together form the Lebanon of Scripture, commence about the parallel of Tripoli (lat. 34° 28′), run in a general direction from N.E. to S.W., through about one degree of latitude, and form, at their southern termination, the natural frontier of Palestine. These parallel ranges enclose between them a fertile and well-watered valley, averaging about fifteen miles in width, which is the Cœle-Syria (Hollow Syria) of the ancients, but is called by the present inhabitants, by way of pre-eminence, El-Bekaa, or 'the Valley,' which is watered through the greater portion of its length by the river Litany, the ancient Leontes.

Nearly opposite Damascus the Anti-Libanus separates into two ridges, which diverge somewhat, and enclose the fertile Wady et-Teim. The easternmost of these two ridges, which has already been pointed out as the Hermon of Scripture [HERMON], Jebel esh-Sheikh, continues its S.W. course, and is the proper prolongation of Anti-Libanus. From the base of the higher part of this ridge, a low broad spur or mountainous tract runs off towards the south, forming the high land which shuts in the basin and Lake of el-Huleh on the east. This tract is called Jebel Heish, the higher portion of which terminates at Tel el-Faras, nearly three hours north of Fiek. The other ridge of Anti-Libanus takes a more westerly direction. It is long, low, and level; and continues to border the lower part of the great valley of Bekaa, until it seems to unite with the higher bluffs and spurs of Lebanon, and thus entirely to close that valley. In fact, only a narrow gorge is here left between precipices, in some places of great height, through which the Litany finds its way down to the sea, north of Tyre. The chain of Lebanon, or at least its higher ridges, may be said to terminate at the point where it is thus broken through by the Litany. But a broad and lower mountainous tract continues towards the south, bordering the basin of the Huleh on the west. It rises to its greatest elevation about Safed (Jebel Safed); and at length ends abruptly in the mountains of Nazareth, as the northern wall of the plain of Esdraelon. This high tract may very properly be regarded as a prolongation of Lebanon.

The mountains of Lebanon are of limestone rock, which is indeed the general constituent of

the mountains of Syria. In Lebanon it has generally a whitish hue, and from the aspect which the range thus bears in the distance, in its cliffs and naked parts, the name of Lebanon (which signifies 'white') has been supposed to be derived; but others seek its origin in the snows which rest long upon its summits, and perpetually upon the highest of them.

Of the two ranges, that of Libanus is by far the highest. Its uppermost ridge is marked by a line, drawn at the distance of about two hours' journey from the summit, above which all is barren (Burckhardt, p. 4): but the slopes and valleys below this line afford pasturage, and are capable of cultivation, by reason of the numerous springs which are met with in all directions. Cultivation is, however, chiefly found on the seaward slopes, where numerous villages flourish, and every inch of ground is turned to account by the industrious natives, who, in the absence of natural levels, construct artificial terraces in order to prevent the earth from being swept away by the winter rains, and at the same time to retain the water requisite for the irrigation of the crops (Burckhardt, pp. 19, 20, 23). When one looks upward from below, the vegetation on these terraces is not visible; so that the whole mountain appears as if composed only of immense rugged masses of naked whitish rock, traversed by deep wild ravines, running down precipitously to the plain. No one would suspect among these rocks the existence of a vast multitude of thrifty villages, and a numerous population of mountaineers, hardy, industrious, and brave (Robinson, iii. 440). Here, amidst the crags of the rocks, are to be seen the remains of the renowned cedars; but a much larger proportion of firs, oaks, brambles, mulberry-trees, fig-trees, and vines (Volney, i. 272).

Although the general elevation of Anti-Libanus is inferior to that of Libanus, the easternmost of the branches into which it divides towards its termination (Jebel esh-Sheikh) rises loftily, and overtops all the other summits of Lebanon. Our information respecting Anti-Libanus is less distinct than that concerning the opposite range. It appears, however, that it has fewer inhabitants, and is scarcely in any part cultivated. It is, indeed, not equally cultivable: for it would appear from a comparison of the dispersed notices in Burckhardt, that its western declivities, towards the great enclosed valley, are completely barren, without trees or pasture; but on the summits of the eastern side, fronting the plain of Damascus, there seem to be parts, at least, affording good pasturage, and abounding also in stunted oak trees, of which few are higher than 12 or 15 feet. The common route across these mountains, from Baalbec to Damascus, at one time ascends into the region of snow (in the month of March); at another follows the direction of the mountain torrents, between parallel lines of hills, by the side of aspens, oaks, and numerous willows which grow along the water-courses (Burckhardt, pp. 4, 15; Elliot, ii. 276).

None of the summits of Libanus or Anti-Libanus have been measured. The author of the *Pictorial History of Palestine* (Introduct. p. lv.), by comparing the accounts of different travellers as to the continuance of snow upon the higher summits, and adjusting them with reference to the point of perpetual congelation in that latitude, forms a rough estimate, which, though higher than some estimates more loosely constructed, and lower than others, is probably not far from the truth. According to this, the average height of the Libanus mountains, from the top of which the snow entirely disappears in summer, must be considerably below 11,000 feet, probably about 10,000 feet above the level of the sea. But the higher points, particularly the Sannin, which is the highest of all, must be above that limit, as the snow rests on them all the year. By the same rule the average height of the Anti-Libanus range is reckoned as not exceeding 9000 feet: but its highest point, in the Jebel es-Sheik, or Mount Hermon, is considered to be somewhat more lofty than the Sannin, the highest point in Libanus.

In Scripture Lebanon is very generally mentioned in connection with the cedar trees in which it abounded [Eres]; but its wines are also noticed (Hosea xiv. 8); and in Cant. iv. 11; Hos. xiv. 7, it is celebrated for various kinds of fragrant plants (Robinson, *Biblical Researches*, iii. 344, 345, 439; Kitto, *Pictorial History of Palestine*, Introd. pp. xxxii.-xxxv., lv.; Reland, *Palæstina*, i. 311; Rosenmüller, *Biblisch. Alterthum*, ii. 236; Raumer, *Palästina*, pp. 29-35; D'Arvieux, *Mémoires*, ii. 250; Volney, *Voyage en Syrie*, i. 243; Seetzen, in Zach's *Monatl. Corresp.*, June, 1806; Burckhardt, *Travels in Syria*, p. 1, sq.; Richter, *Wallfahrten*, p. 102, &c.; Irby and Mangles, *Travels*, pp. 206-220; Buckingham, *Arab Tribes*, p. 468, sq.; Fisk, in *Missionary Herald*, 1824; Elliot, *Travels*, ii. 276; Hogg, *Visit to Alexandria, Jerusalem*, &c., i. 219, sq.; ii. 81, sq.; Addison, *Palmyra and Damascus*, ii. 43-82).

LIBERTINES (Λιβερτῖνοι). 'Certain of the synagogue, which is called (the synagogue) of the *Libertines*, and Cyrenians, and Alexandrians,' &c., are mentioned in Acts vi. 9. There has been much diversity in the interpretation of this word. It obviously denotes state or condition, not nature (*i. e.* country); and since Libertini here occurs among the names of nations, and Josephus (*Antiq.* xii. 1, and *Cont. Apion.* ii. 4) has told us that many Jews were removed by Ptolemy, and placed in the cities of Libya, Beza, Le Clerc, and others conclude that the word must have been Λιβυστίων, *i. e.* 'sprung from Libya.' But there is no authority of MSS. or versions for this reading. Others, on the same premises, conceive that the word Libertini denotes the inhabitants of some town called Libertus in Africa Proper, or Carthage; but they fail to show that any town of this name existed in that quarter. The most probable opinion, and that which is now generally entertained, is, that the Libertini were Jews, whom the Romans had taken in war and conveyed to Rome, but afterwards freed; and that this synagogue had been built at their expense. Libertini is, therefore, to be regarded as a word of Roman origin, and to be explained with reference to Roman customs. This view is further confirmed by the fact that the word συναγωγῆς does not occur in the middle of the national names, but stands first, and is followed by τῆς λεγομένης: whence it clearly appears that Λιβερτῖνοι is at least not the name of a country or region. Further, we know that there were in the time of Tiberius many

libertini, or 'freed-men,' of the Jewish religion at Rome (Tacit. *Annal.* ii. 85; comp. Suet. *Tib.* 36; and Philo, p. 1014; see Bloomfield, Knimoel, Wetstein, &c. on Acts vi. 9; and comp. Gerdes, *De Synag. Libertinorum*, Gron. 1736; Scherer, *De Synag. Libertin.* Argent. 1754).

LIBNAH (לִבְנָה; Sept. Λεβνά), one of the royal cities of the Canaanites, taken by Joshua immediately after Makkedah (Josh. x. 20, 30). It lay within the territory assigned to Judah (Josh. xv. 42), and became one of the Levitical towns in that tribe (Josh. xxi. 13; 1 Chron. vi. 57). It was a strongly fortified place. The Assyrian king Sennacherib was detained some time before it when he invaded Judæa in the time of Hezekiah; and it was before it that he sustained that dreadful stroke which constrained him to withdraw to his own country (2 Kings xix. 8; Isa. xxxvii. 8). In the reign of King Jehoram, Libnah is said to have revolted from him (2 Kings viii. 22; 2 Chron. xxi. 10). From the circumstance of this revolt having happened at the same time with that of the Edomites, it has been supposed by some to have reference to another town of the same name situated in that country. But such a conjecture is unnecessary and improbable. Libnah of Judah rebelled, because it refused to admit the idolatries of Jehoram; and it is not said in either of the passages in which this act is recorded, as of Edom, that it continued in revolt 'unto this day.' It may be inferred either that it was speedily reduced to obedience, or that, on the re-establishment of the true worship, it spontaneously returned to its allegiance. Libnah existed as a village in the time of Eusebius and Jerome, and is placed by them in the district of Eleutheropolis.

LIBNATH, or, more fully, Shihor-Libnath (שִׁיחֹר לִבְנָת; Sept. Λαβανάθ), a stream near Carmel, on the borders of Asher (Josh. xix. 26). Michaelis conceives this to be the 'glass-river' (לבנה), *i. e.* the Belus, from whose sands the first glass was made by the Phœnicians.

LIBNEH (לִבְנֶה) occurs in two places of Scripture, viz. Gen. xxx. 37; Hos. iv. 13, and is supposed to indicate either the *white poplar* or the *storax tree*. The arguments in support of the respective claims of these are nearly equally balanced, although those in favour of the storax appear to us to preponderate. The *libneh* is first mentioned in Gen. xxx. 37, as one of the rods which Jacob placed in the watering troughs of the sheep; the *lutz* (the almond) and *armon* (the oriental plane) being the two others: he 'pilled white strakes in them, and made the white appear which was in the rods.' In Hos. iv. 13 reference is made to the shade of trees and the burning of incense:—'They sacrifice upon the top of the mountains, and burn incense upon the hills, under oaks (*allon*, 'terebinth tree') and poplars (*libneh*), because the shadow of them is good.'

Libneh, in the passage of Hosea, is translated Λεύκη, 'white poplar,' in the Septuagint, and this translation is adopted by the majority of interpreters. The Hebrew name *libneh*, being supposed to be derived from לבן (*album esse*), has been considered identical with the Greek λεύκη, which both signifies 'white,' and also the 'white poplar,' *Populus alba*. This poplar is said to be called *white*, not on account of the whiteness of its bark, but of that of the under surface of its leaves. It may perhaps be so designated from the whiteness of its hairy seeds, which have a remarkable appearance when the seed covering first bursts. The poplar is certainly common in the countries where the scenes are laid of the transactions related in the above passages of Scripture. Belon (*Obs.* ii. 106) says, 'Les peupliers blancs et noirs, et arbres fruictiers font que la plaine de Damas resemble une forest.' Rauwolf also mentions the white poplar as abundant about Aleppo and Tripoli, and still called by the ancient Arabic name *haur* or *hor* (حور), which is the word used in the Arabic translation of Hosea. That poplars are common in Syria has already been mentioned under the head of Baca.

388.

Others, however, have been of opinion that *libneh* denotes the storax tree rather than the white poplar. Thus, in Gen. xxx. 37, the Septuagint has ῥαβδον στυρακίνην, 'a rod of styrax;' and the Greek translation of the Pentateuch, according to Rosenmüller, is more ancient and of far greater authority than that of Hosea. So R. Jonah, as translated by Celsius, says of *libneh*, *Dicitur lingua Arabum Lubna;* and in the Arabic translation of Genesis (لبني) *lubne* is employed as the representative of the Hebrew *libneh*. *Lubne*, both in Arabic and in Persian, is the name of a tree, and of the fragrant resin employed for fumigating, which exudes from it, and which is commonly known by the name of Storax. This resin was well known to the ancients, and is mentioned by Hippocrates and Theophrastus. Dioscorides describes several kinds, all of which were obtained from Asia Minor; and all that is now imported is believed to be the produce of that country. But the tree is cultivated in the south of Europe, though it does not there yield any storax. It is found in Greece, and is supposed to be a native of Asia Minor, whence it extends into Syria, and probably farther south. It is therefore a native of the country which was the scene of the transaction related in the above passage of Genesis.

From the description of Dioscorides, and his

comparing the leaves of the styrax to those of the quince, there is no doubt of the same tree being intended: especially as in early times, as at the present day, it yielded a highly fragrant balsamic substance which was esteemed as a medicine, and employed in fumigation. From the similarity of the Hebrew name *libneh* to the Arabic *lubne*, and from the Septuagint having in Genesis translated the former by *styrax*, it seems most probable that this was the tree intended. It is capable of yielding white wands as well as the poplar; and it is also well qualified to afford complete shade under its ample foliage, as in the passage of Hos. iv. 13. We may also suppose it to have been more particularly alluded to, from its being a tree yielding incense. 'They sacrifice upon the tops of the mountains, and burn incense upon the hills, under the terebinth and the storax trees, because the shadow thereof is good.'—J. F. R.

LIBYA (Λιβύα, Λιβύη). This name, in its largest acceptation, was used by the Greeks to denote the whole of Africa. But Libya Proper, which is the Libya of the New Testament and the country of the Lubim in the Old, was a large tract, lying along the Mediterranean, to the west of Egypt. It is called Pentapolitana Regio by Pliny (*Hist. Nat.* v. 5), from its five cities, Berenice, Arsinoë, Ptolemais, Apollonia, and Cyrene; and Libya Cyrenaica by Ptolemy (*Geog.* iv. 5), from Cyrene, its capital.

Libya is supposed to have been first peopled by, and to have derived its name from, the Lehabim or Lubim [Nations, Dispersion of]. These, its earliest inhabitants, appear, in the time of the Old Testament, to have consisted of wandering tribes, who were sometimes in alliance with Egypt, and at others with the Ethiopians, as they are said to have assisted both Shishak, king of Egypt, and Zerah the Ethiopian in their expeditions against Judæa (2 Chron. xii. 4; xiv. 8; xvi. 9). They were eventually subdued by the Carthaginians; and it was the policy of that people to bring the nomade tribes of Northern Africa which they mastered into the condition of cultivators, that by the produce of their industry they might be able to raise and maintain the numerous armies with which they made their foreign conquests. But Herodotus assures us that none of the Libyans beyond the Carthaginian territory were tillers of the ground (Herod. iv. 186, 187; comp. Polybius, i. 161, 167, 168, 177, ed. Schweighæuser). Since the time of the Carthaginian supremacy the country, with the rest of the East, has successively passed into the hands of the Greeks, Romans, Saracens, and Turks. The name of Libya occurs in Acts ii. 10, where 'the dwellers in the parts of Libya about Cyrene' are mentioned among the stranger Jews who came up to Jerusalem at the feast of Pentecost.

LICE (כִּנִּם and כִּנִּים) occurs in Exod. viii. 16, 17, 18 (Heb. 12, 13, 14); Ps. cv. 31; Sept. σκνίφες or σκνίπες; Vulg. *cyniphes* and *scyniphes*; Wisd. xix. 10; Sept. σκνίπα (Alex. Ald. σκνίφας); Vulg. *muscas*. The name of the creature employed in the third plague upon Egypt, miraculously produced from the dust of the land. Its exact nature has been much disputed. Those who reason from the root of the word in the Hebrew text, and assume it to be derived from כּוּן, *to fix, settle*, or *establish*, infer lice to be meant, from their fixing themselves on mankind, animals, &c. The meaning of the root is, however, too general to afford by itself any assistance in ascertaining the particular species intended. Dr. A. Clarke has further inferred from the words '*in* man and *in* beast,' that it was the *acarus sanguisugus*, or 'tick' (*Comment. on Exod.* viii. 16). But since it is spoken of as an Egyptian insect, the name for it may be purely Egyptian, and may have no connection with any Hebrew root (Michaelis, *Suppl. ad Lex.* n. 1174). However this may be, the preposition from which Dr. Clarke argues is too various in meaning to assist his hypothesis. Nor is it certain whether the word is singular or plural. The variation, both in letters and points, seems to betoken uncertainty somewhere, though Gesenius takes כִּנִּם in the collective sense. Michaelis also remarks that if it be a Hebrew word for *lice*, it is strange that it should have disappeared from the cognate tongues, the Aramaic, Samaritan, and Ethiopic. The rendering of the Septuagint seems highly valuable when it is considered that it was given by learned Jews resident in Egypt, that it occurs in the most ancient and best executed portion of that version, and that it can be elucidated by the writings of ancient Greek naturalists, &c. Thus Aristotle, who was nearly contemporary with the Septuagint translators of Exodus, mentions the κνίπες (the σκνίφες of the Septuagint) among insects able to distinguish the smell of honey (*Hist. Animal.* iv. 8), and refers to species of birds which he calls σκνιποφάγα, that live by hunting σκνίπες (viii. 6). His pupil Theophrastus says:—ἐγγίνονται δὲ καὶ κνίπες ἐν τισὶ τῶν δένδρων, ὥσπερ ἐν τῇ δρυὶ καὶ τῇ συκῇ. καὶ δοκοῦσιν ἐκ τῆς ὑγρότητος συνίστασθαι τῆς ὑπὸ τὸν φλοιὸν συνισταμένης. αὕτη δὲ ἐστι γλυκεῖα γενομένοις. γίνονται δὲ καὶ ἐν λαχάνοις τίσιν. 'The κνίπες are born in certain trees, as the oak, the fig-tree, and they seem to subsist upon the sweet moisture which is collected under the bark. They are also produced on some vegetables' (*Hist. Plant.* iv. 17, and ii. *ult.*). This description applies to *aphides*, or rather to the various species of 'gall flies' (*Cynips*, Linn.). Hesychius, in the beginning of the third century, explains σκνίψ, ζῶον χλωρόν τὲ τετράπτερον, 'a green four-winged creature,' and quotes Phrynichus as applying the name to a sordid wretch, and adds, ἀπὸ τοῦ θηριδίου τοῦ ἐν τοῖς ξύλοις, τοῦ κατὰ βραχὺ αὐτὰ κατεσθίοντος, 'from the little creature among trees, which speedily devours them.' Philo (A.D. 40) and Origen in the second century, who both lived in Egypt, describe it in terms suitable to the gnat or mosquito (Philo, *Vita Mosis*, i. 97. 2, ed. Mangey; Origen, *Homilia tertia in Exod.*); as does also Augustine in the third or fourth century (*De Convenientia*, &c.). But Theodoret, in the same age, distinguishes between σκνίπες and κώνωπες (*Vita Jacobi*). Suidas (A.D. 1100) says, σκνίψ, ζῶον κωνωπῶδες, 'resembling gnats,' and adds, ἔστι γὰρ ὁ σκνὶψ ζῶον μικρὸν ξυλοφάγον, 'a little creature that eats wood.' These Christian fathers, however, give no authority for their explanations; and Bochart remarks that they seem to be speaking of gnats under the name σκνίπες, which word, he conjectures, biassed them from its resemblance to the Hebrew. Schleusner adds (*Glossema in*

Octateuch. σκνίφες, ζῶα μικρὰ ὑπὸ τοὺς κώνωπας, 'less than gnats,' and (*Lex. Cyrilli*, MS. Brem.) σκνίφες ζωΰφιά ἐστιν ἐοικότα κώνωψιν, 'very small creatures like gnats.' From this concurrence of testimony it would appear that, not lice, but some species of gnats is the proper rendering, though the ancients, no doubt, included other species of insects under the name. Mr. Bryant, however, gives a curious turn to the evidence derived from ancient naturalists. He quotes Theophrastus, and admits that a Greek must be the best judge of the meaning of the Greek word but urges that the Septuagint translators concealed the meaning of the Hebrew word, which he labours to prove is *lice*, under the word they have adopted, for fear of offending the Ptolemies, under whose inspection they translated, and the Egyptians in general, whose detestation of lice was as ancient as the time of Herodotus (ii. 37), (but who includes τὶ ἄλλο μυσαρόν, 'any *other* foul creature'), and whose disgust, he thinks, would have been too much excited by reading that their nation once swarmed with those creatures through the instrumentality of the servants of the God of the Jews (*Plagues of Egypt*, Lond. 1794, p. 56, &c.). This suspicion, if admitted, upsets all the previous reasoning. It is also inconsistent with Bryant's favourite hypothesis, that the plagues of Egypt were so adapted as to afford a practical mortification of the prejudices of the Egyptians. Nor could a plague of lice, upon his own principles, have been more offensive to them than the plague on the river Nile, and the frogs, &c., which he endeavours to show were most signally opposed to their religious notions. Might it not be suggested with equal probability that the Jews in later ages had been led to interpret the word lice as being peculiarly humiliating to the Egyptians? (see Joseph. ii. 14. 3, who, however, makes the Egyptians afflicted with *phthiriasis*.) The rendering of the Vulgate affords us no assistance, being evidently formed from that of the Septuagint, and not being illustrated by any Roman naturalist, but found only in Christian Latin writers (see Facciolati, *in voc.*). The other ancient versions, &c., are of no value in this inquiry. They adopt the popular notion of the times, and Bochart's reasonings upon them involve, as Rosenmüller (apud Bochart) justly complains, many unsafe permutations of letters. If, then, the Septuagint be discarded, we are deprived of the highest source of information. Bochart also reasons upon the similarity of the word כנים to κόνιδες, the word in Aristotle for the eggs of fleas, lice, bugs, &c., whether infesting mankind or beasts (vi. 26), but which is not more like it than κώνωπες; and an enthusiast in etymology might remark that κόνιδες means both 'dust' and 'lice,' which Scaliger explains *lendes*, 'nits,' *ab exiguitate similes pulveri*, 'from their minuteness, like dust' (p. 518). It is strange that it did not occur to Bochart that if the plague had been lice, it would have been easily imitated by the magicians, which was attempted by them, but in vain (Exod. viii. 18). Nor is the objection valid, that if this plague were gnats, &c., the plague of flies would be anticipated, since the latter most likely consisted of one particular species having a different destination [Fly]; whereas this may have consisted of not only mosquitoes or gnats, but of some other species which also attack domestic cattle, as the *œstrus*, or *tabanus*, or *zimb* (Bruce's *Travels*, ii. 315, 8vo.); on which supposition these two plagues would be sufficiently distinct.

But since mosquitoes, gnats, &c., have ever been one of the evils of Egypt, there must have been some peculiarity attending them on this occasion, which proved the plague to be 'the finger of God.' From the next chapter, verse 31, it appears that the flax and the barley were smitten by the hail; that the former was beginning to grow, and that the latter was in the ear—which, according to Shaw, takes place in Egypt in March. Hence the כנים would be sent about February, *i. e.* before the increase of the Nile, which takes place at the end of May, or beginning of June. Since, then, the innumerable swarms of mosquitoes, gnats, &c., which every year affect the Egyptians come, according to Hasselquist, at the increase of the Nile, the appearance of them in February would be as much a variation of the course of nature as the appearance of the *œstrus* in January would be in England. They were also probably numerous and fierce beyond example on this occasion; and as the Egyptians would be utterly unprepared for them (for it seems that this plague was not announced), the effects would be signally distressing. Bochart adduces instances in which both mankind and cattle, and even wild beasts, have been driven by gnats from their localities. It may be added that the proper Greek name for the gnat is ἐμπίς, and that probably the word κώνωψ, which much resembles κνίψ, is appropriate to the mosquito. Hardouin observes that the οἱ κνίπες of Aristotle are not the ἐμπίδες, which latter is by Pliny always rendered *euliees*, but which word he employs with great latitude [Gnat]. For a description of the evils inflicted by these insects upon man, see Kirby and Spence, *Introduction to Entomology*, Lond. 1828, i. 115, &c.; and for the annoyance they cause in Egypt, Maillet, *Description de l'Egypte* par l'Abbé Mascrier, Paris, 1755, xc. 37; Forskal, *Descript. Animal.* p. 85. Michaelis proposed an inquiry into the meaning of the word σκνίφες to the Société des Savants, with a full description of the qualities ascribed to them by Philo, Origen, and Augustine (*Recueil*, &c. Amst., 1744). Niebuhr inquired after it of the Greek patriarch, and also of the metropolitan at Cairo, who thought it to be a species of gnat found in great quantities in the gardens there, and whose bite was extremely painful. A merchant who was present at the inquiry called it *dubâb-el-keb*, or the *dog-fly* (*Description de l'Arabie*, Pref. pp. 39, 40). Besides the references already made, see Rosenmüller, *Scholia in Exod.*; Michaelis, *Suppl. ad Lex. Hebraic.*, p. 1203, sq.; Oedmann, *Verm. Samml. aus der Naturkunde*, i. 6. 71-91; Bakerus, *Annotat. in Et. M.* ii. 1090; Harenberg, *Observ. Crit. de Insectis Ægyptum infestantibus*, in *Miscell. Lips. Nov.*, ii. 4. 617-20; Winer, *Biblisches Real-wörterbuch*, art. 'Mücken.'—J. F. D.

LIGHT is represented in the Scriptures as the immediate result and offspring of a divine command (Gen. i. 3). The earth was void and dark, when God said, 'Let light be, and light was.' This is represented as having preceded the placing of 'lights in the firmament of heaven, the greater

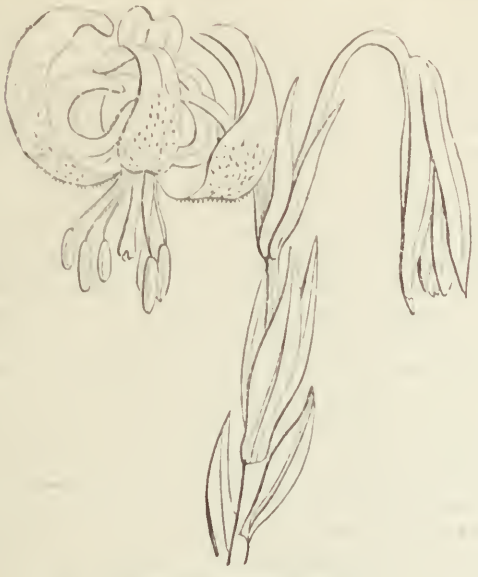
light to rule the day, and the lesser light to rule the night: he made the stars also' (Gen. i. 14, sq.). Whatever opinion may be entertained as to the facility with which these two separate acts may be reconciled, it cannot be questioned that the origin of light, as of every other part of the universe, is thus referred to the exertion of the divine will: as little can it be denied that the narrative in the original is so simple, yet at the same time so majestic and impressive, both in thought and diction, as to fill the heart with a lofty and pleasurable sentiment of awe and wonder.

The divine origin of light made the subject one of special interest to the Biblical nations—the rather because light in the East has a clearness, a brilliancy, is accompanied by an intensity of heat, and is followed in its influence by a largeness of good, of which the inhabitants of less genial climes can have no conception. Light easily and naturally became, in consequence, with Orientals, a representative of the highest human good. All the more joyous emotions of the mind, all the pleasing sensations of the frame, all the happy hours of domestic intercourse, were described under imagery derived from light (1 Kings xi. 36; Isa. lviii. 8; Esther viii. 16; Ps. xcvii. 11). The transition was natural from earthly to heavenly, from corporeal to spiritual things; and so light came to typify true religion and the felicity which it imparts. But as light not only came from God, but also makes man's way clear before him, so it was employed to signify moral truth, and pre-eminently that divine system of truth which is set forth in the Bible, from its earliest gleamings onward to the perfect day of the Great Sun of Righteousness. The application of the term to religious topics had the greater propriety because the light in the world, being accompanied by heat, purifies, quickens, enriches; which efforts it is the peculiar province of true religion to produce in the human soul (Isa. viii. 20; Matt. iv. 16; Ps. cxix. 105; 2 Pet. i. 19; Eph. v. 8; 2 Tim. i. 10; 1 Pet. ii. 9).

It is doubtless owing to the special providence under which the divine lessons of the Bible were delivered, that the views which the Hebrews took on this subject, while they were high and worthy, did not pass into superstition, and so cease to be truly religious. Other Eastern nations beheld the sun when it shined, or the moon walking in brightness, and their hearts were secretly enticed, and their mouth kissed their hand in token of adoration (Job xxxi. 26, 27). This 'iniquity' the Hebrews not only avoided, but when they considered the heavens they recognised the work of God's fingers, and learnt a lesson of humility as well as of reverence (Ps. viii. 3, sq.). On the contrary, the entire residue of the East, with scarcely any exception, worshipped the sun and the light, primarily perhaps as symbols of divine power and goodness, but, in a more degenerate state, as themselves divine; whence, in conjunction with darkness, the negation of light, arose the doctrine of dualism, two principles, the one of light, the good power, the other of darkness, the evil power; a corruption which rose and spread the more easily because the whole of human life, being a chequered scene, seems divided as between two conflicting agencies, the bright and the dark, the joyous and the sorrowful, what is called prosperous and what is called adverse.

When the tendency to corruption to which we have just alluded is taken into account, we cannot but feel both gratified and surprised that, while the Hebrew people employed the boldest personifications when speaking of light, they in no case, nor in any degree, fell into the almost universal idolatry. That individuals among them, and even large portions of the nation, did from time to time down to the Babylonish captivity forget and desert the living God, is very certain; but then the nation, as such, was not misled and corrupted; witnesses to the truth never failed; recovery was never impossible; nay, was more than once effected, till at last affliction and suffering brought a changed heart, which never again swerved from the way of truth.

Among the personifications on this point which Scripture presents we may specify, 1. God. The Apostle James (i. 17) declares that 'every good and perfect gift cometh down from the Father of lights, with whom is no variableness, neither shadow of turning;' obviously referring to the faithfulness of God and the constancy of his goodness, which shine on undimmed and unshadowed. So Paul (1 Tim. vi. 16): 'God who dwelleth in the light which no man can approach unto.' Here the idea intended by the imagery is the incomprehensibleness of the self-existent and eternal God.



2. Light is also applied to Christ: 'The people who sat in darkness have seen a great light' (Matt. iv. 16; Luke ii. 32; John i. 4, sq.). 'He was the true light;' 'I am the light of the world' (John viii. 12; xii. 35, 36).

3. It is further used of angels, as in 2 Cor. xi. 14: 'Satan himself is transformed into an angel of light.' 4. Light is moreover employed of men: John the Baptist 'was a burning and a shining light' (John v. 35); 'Ye are the light of the world' (Matt. v. 14; see also Acts xiii. 47; Eph. v. 8).—J. R. B.

LIGN ALOES. [Ahalim.]

LILY (*κρίνον*). The lily is frequently mentioned in the Authorized Version of the Old Testament as the translation of *shoshun*. We shall reserve for that head the several points of consideration which are connected with it, and confine our attention at present to the *krinon*, or lily, of the New Testament. This plant is mentioned in the well-known and beautiful passage (Matt. vi. 26): 'Consider the lilies of the field, how they grow; they toil not, neither do they spin, and yet I say unto you, that even Solomon, in all his glory, was not arrayed like one of these;' so also in Luke xii. 27. Here it is evident that the plant alluded to must have been indigenous or grown wild, in the vicinity of the sea of Galilee, must have been of an ornamental character, and, from the Greek term *κρίνον* being applied to it, of a liliaceous nature. The name *κρίνον* occurs in all the old Greek writers. Theophrastus first uses it, and is supposed by Sprengel to apply it to species of *Narcissus* and to *Lilium candidum*. Dioscorides indicates two species, but very imperfectly: one of them is supposed to be the *Lilium candidum*, and the other, with a reddish flower, may be *L. martagon*, or *L. chalcedonicum*. He alludes more particularly to the lilies of Syria and of Pamphylia being well suited for making the

ointment of lily. Pliny enumerates three kinds, a white, a red, and a purple-coloured lily. Travellers in Palestine mention that in the month of January the fields and groves everywhere abound with various species of lily, tulip, and narcissus.

389. [Lilium chalcedonicum.]

Benard noticed, near Acre, on Jan. 18th, and about Jaffa, on the 23rd, tulips, white, red, blue, &c. Gumpenberg saw the meadows of Galilee covered with the same flowers on the 31st. Tulips figure conspicuously among the flowers of Palestine, varieties probably of *Tulipa gesneriana* (Kitto's *Palestine*, p. ccxv.). So Pococke says, 'I saw many tulips growing wild in the fields (in March), and any one who considers how beautiful those flowers are to the eye, would be apt to conjecture that these are the lilies to which Solomon in all his glory was not to be compared.' This is much more likely to be the plant intended than some others which have been adduced, as, for instance, the scarlet *amaryllis*, having white flowers with bright purple streaks, found by Salt at Adowa. Others have preferred the *Crown imperial*, which is a native of Persia and Cashmere. Most authors have united in considering the white lily, *Lilium candidum*, to be the plant to which our Saviour referred; but it is doubtful whether it has ever been found in a wild state in Palestine. Some, indeed, have thought it to be a native of the new world. Dr. Lindley, however, in the *Gardeners' Chronicle* (ii. 744), says, 'This notion cannot be sustained, because the white lily occurs in an engraving of the Annunciation, executed somewhere about 1480 by Martin Schongauer; and the first voyage of Columbus did not take place till 1492. In this very rare print the lily is represented as growing in an ornamental vase, as if it were cultivated as a curious object.' This opinion is confirmed by a correspondent at Aleppo (*Gardeners' Chronicle*, iii. 429), who has resided long in Syria, but is acquainted only with the botany of Aleppo and Antioch: 'I never saw the white lily in a wild state, nor have I heard of its being so in Syria. It is cultivated here on the roofs of the houses in pots as an exotic bulb, like the daffodil.' In consequence of this difficulty the late Sir J. E. Smith was of opinion that the plant alluded to under the name of lily was the *Amaryllis lutea* (now *Oporanthus luteus*), 'whose golden liliaceous flowers in autumn afford one of the most brilliant and gorgeous objects in nature, as the fields of the Levant are overrun with them; to them the expression of Solomon, in all his glory, not being arrayed like one of them, is peculiarly appropriate.' Dr. Lindley conceives 'it to be much more probable that the plant intended by our Saviour was the *Ixiolirion montanum*, a plant allied to the *amaryllis*, of very great beauty, with a slender stem, and clusters of the most delicate violet flowers, abounding in Palestine, where Col. Chesney found it in the most brilliant profusion' (*l. c.* p. 744). In reply to this a correspondent furnishes an extract of a letter from Dr. Bowring, which throws a new light upon the subject: 'I cannot describe to you with botanical accuracy the lily of Palestine. I heard it called by the title of *Lilia syriaca*, and I imagine under this title its botanical characteristics may be hunted out. Its colour is a brilliant red; its size about half that of the common tiger lily. The white lily I do not remember to have seen in any part of Syria. It was in April and May that I observed my flower, and it was most abundant in the district of Galilee, where it and the *Rhododendron* (which grew in rich abundance round the paths) most strongly excited my attention.' On this Dr. Lindley observes, 'It is clear that neither the white lily, nor the *Oporanthus luteus*, nor *Ixiolirion*, will answer to Dr. Bowring's description, which seems to point to the Chalcedonian or scarlet *martagon* lily, formerly called the lily of Byzantium, found from the Adriatic to the Levant, and which, with its scarlet turban-like flowers, is indeed a most stately and striking object' (*Gardeners' Chronicle*, ii. 854). As this lily (the *Lilium chalcedonicum* of botanists) is in flower at the season of the year when the sermon on the Mount is supposed to have been spoken, is indigenous in the very locality, and is conspicuous, even in the garden, for its remarkable showy flowers, there can now be little doubt that it is the plant alluded to by our Saviour.—J. F. R.

LINEN. [Bad.]

LINUS (Λίνος), one of the Christians at Rome whose salutations Paul sent to Timothy (2 Tim. iv. 21). He is said to have been the first bishop of Rome after the martyrdom of Peter and Paul (Irenæus, *Adv. Hæres.* iii. 3; Euseb. *Hist. Eccles.* iii. 2, 4; v. 6).

LION (אַרְיֵה *ari;* אַרְיֵה *arjeh;* Sept. λέων), the most powerful, daring, and impressive of all carnivorous animals, the most magnificent in aspect and awful in voice. Being very common in Syria in early times, the lion naturally supplied many forcible images to the poetical language of Scripture, and not a few historical incidents in its narratives. This is shown by the great number of passages where this animal, in all the stages of existence—as the whelp, the young adult, the fully mature, the lioness—occurs under different names, exhibiting that multiplicity of denominations which always results when some great image is constantly present to the popular mind. Thus we have, 1. גּוֹר *gor*, a lion's whelp, a very young lion (Gen. xlix. 9; Deut. xxxiii. 20; Jer. li. 38; Ezek. xix. 2; Nahum ii. 11, 12, &c.).

2. כפיר *chephir*, a young lion, when first leaving the protection of the old pair to hunt independently (Ezek. xix. 2, 3; Ps. xci. 13; Prov. xix. 12, &c.). 3. ארי *ari*, an adult and vigorous lion, a lion having paired, vigilant and enterprising in search of prey (Nahum ii. 12; 2 Sam. xvii. 10; Num. xxiii. 24). This is the common name of the animal. 4. שחל *sachal*, a mature lion in full strength; a black lion? (Job iv. 10; x. 16; Ps. xci. 13; Prov. xxvi. 13; Hosea v. 14; xiii. 7). This denomination may very possibly refer to a distinct variety of lion, and not to a black species or race, because neither black nor white lions are recorded, excepting in Oppian (*De Venat.* iii. 43);

390.

but the term may be safely referred to the colour of the skin, not of the fur; for some lions have the former fair, and even rosy, while in other races it is perfectly black. An Asiatic lioness, formerly at Exeter Change, had the naked part of the nose, the roof of the mouth, and the bare soles of all the feet pure black, though the fur itself was very pale buff. Yet albinism and melanism are not uncommon in the felinæ; the former occurs in tigers, and the latter is frequent in leopards, panthers, and jaguars. 5. ליש *laish*, a fierce lion, one in a state of fury (Job iv. 11; Prov. xxx. 30; Isa. xxx. 6). 6. לביא *labia*, a lioness (Job iv. 11, where the lion's whelps are denominated 'the sons of Labiah,' or of the lioness).

The lion is the largest and most formidably armed of all carnassier animals, the Indian tiger alone claiming to be his equal. One full grown, of Asiatic race, weighs above 450 pounds, and those of Africa often above 500 pounds. The fall of a fore paw in striking has been estimated to be equal to twenty-five pounds' weight, and the grasp of the claws, cutting four inches in depth, is sufficiently powerful to break the vertebræ of an ox. The huge laniary teeth and jagged molars worked by powerful jaws, and the tongue entirely covered with horny papillæ, hard as a rasp, are all subservient to an immensely strong, muscular structure, capable of prodigious exertion, and minister to the self-confidence which these means of attack inspire. In Asia the lion rarely measures more than nine feet and a half from the nose to the end of the tail, though a tiger-skin of which we took the dimensions was but a trifle less than 13 feet. In Africa they are considerably larger, and supplied with a much greater quantity of mane. Both tiger and lion are furnished with a small horny apex to the tail—a fact noticed by the ancients, but only verified of late years, because this object lies concealed in the hair of the tip and is very liable to drop off. All the varieties of the lion are spotted when whelps; but they become gradually buff or pale. One African variety, very large in size, perhaps a distinct species, has a peculiar and most ferocious physiognomy, a dense black mane extending half way down the back, and a black fringe along the abdomen and tip of the tail; while those of southern Persia and the Dekkan are nearly destitute of that defensive ornament. The roaring voice of the species is notorious to a proverb, but the warning cry of attack is short, snappish, and sharp.

If lions in primitive times were as numerous in Western Asia and Africa as tigers still are in some parts of India, they must have been a serious impediment to the extension of the human race; for Colonel Sykes relates that in less than five years, in the Dekkan alone, during his residence there, above 1000 of the latter were shot. But the counterbalancing distribution of endowments somewhat modifies the dangerous vicinity of these animals: like all the felinæ, they are more or less nocturnal, and seldom go abroad to pursue their prey till after sunset. When not pressed by hunger, they are naturally indolent, and, from their habits of uncontrolled superiority, perhaps capricious, but often less sanguinary and vindictive than is expected.

Lions are monogamous, the male living constantly with the lioness, both hunting together, or for each other when there is a litter of whelps; and the mutual affection and care for their offspring which they display are remarkable in animals by nature doomed to live by blood and slaughter. It is while seeking prey for their young that they are most dangerous; at other times they bear abstinence, and when pressed by hunger will sometimes feed on carcasses found dead. They live to more than fifty years; consequently, having annual litters of from three to five cubs, they multiply rapidly when not seriously opposed. After the conquest of Egypt by the Arabs the lion soon spread again into Lower Egypt; and Fidelio, a European traveller, in the beginning of the eighth century, saw one slain at the foot of the pyramids, after killing eight of his assailants. Lately they have increased again on the Upper Nile; and in ancient times, when the devastations of Egyptian, Persian, Greek, and Roman armies passed over Palestine, there can be little doubt that these destroyers made their appearance in great numbers. The fact, indeed, is attested by the impression which their increase made upon the mixed heathen population of Samaria, when Israel was carried away into captivity (2 Kings xvii. 25, 26).

The Scriptures present many striking pictures of lions, touched with wonderful force and fidelity: even where the animal is a direct instrument of the Almighty, while true to his mission, he still remains so to his nature. Thus nothing can be more graphic than the record of the man of God (1 Kings xiii. 28), disobedient to his charge, struck down from his ass, and lying dead, while the lion stands by him, without touching the lifeless body, or attacking the living animal, usually a favourite prey. See also Gen. xlix. 9; Job iv. 10, 11; Nahum ii. 11, 12. Samson's adventure also with the young lion (Judg. xiv. 5, 6),

and the picture of the young lion coming up from the underwood cover on the banks of the Jordan—all attest a perfect knowledge of the animal and its habits. Finally, the lions in the den with Daniel, miraculously leaving him unmolested, still retain, in all other respects, the real characteristics of their nature.

The lion, as an emblem of power, was symbolical of the tribe of Judah (Gen. xlix. 9). The type recurs in the prophetical visions, and the figure of this animal was among the few which the Hebrews admitted in sculpture, or in cast metal, as exemplified in the throne of Solomon. The heathen assumed the lion as an emblem of the sun, of the god of war, of Ares, Ariel, Arioth, Re, the Indian Seeva, of dominion in general, of valour, &c., and it occurs in the names and standards of many nations. Lions, in remote antiquity, appear to have been trained for the chace, and are, even now, occasionally domesticated with safety. Placability and attachment are displayed by them even to the degree of active defence of their friends, as was exemplified at Birr, in Ireland in 1839, when 'a keeper of wild beasts, being within the den, had fallen accidentally upon a tiger, who immediately caught the man by the thigh, in the presence of numerous spectators; but a lion, being in the same compartment, rose up, and seizing the tiger by the neck, compelled it to let go, and the man was saved.' Numerous anecdotes of a similar character are recorded both by ancient and modern writers.

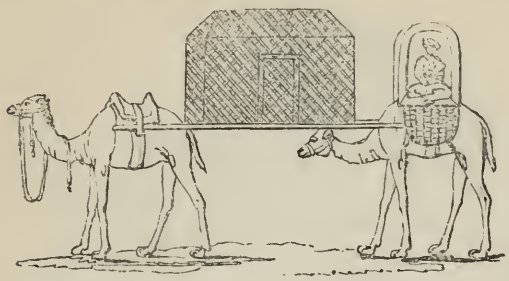
Zoologists consider Africa the primitive abode of lions, their progress towards the north and west having at one time extended to the forests of Macedonia and Greece; but in Asia, never to the south of the Nerbudda, nor east of the lower Ganges. Since the invention of gunpowder, and even since the havoc which the ostentatious barbarism of Roman grandees made among them, they have diminished in number exceedingly, although at the present day individuals are not unfrequently seen in Barbary, within a short distance of Centa.—C. H. S.

LITTER. The word translated litter, in Isa. lxvi. 20, is צב *tzab;* and is the same which, in Numn. vii. 3, denotes the wains or carts *drawn* by oxen, in which the materials of the tabernacle were removed from place to place. The *tzab* was not, therefore, a litter, which is not drawn, but carried. This is the only place in which the word occurs in the Authorized translation. We are not, however, to infer from this that the Hebrews had no vehicles of the kind. Litters, or palanquins, were, as we know, in use among the ancient Egyptians. They were borne upon the shoulders of men (No. 391), and appear to have been used for carrying persons of consideration short distances on visits, like the sedan chairs of a former day in England. We doubt if the Hebrews had this kind of litter, as it scarcely agrees with their simple, unluxurious habits; but that they had litters borne by beasts, such as are still common in Western Asia, seems in the highest degree probable.

In Cant. iii. 9, we find the word אפרין *aphiryon*, Sept. φορεῖον, Vulg. *ferculum*, which occurs nowhere else in Scripture, and is applied to a vehicle used by king Solomon. This word is rendered 'chariot' in our Authorized version, although unlike any other word so rendered in that version. It literally means a *moving couch*, and is usually conceived to denote a kind of

391.

sedan, litter, or rather palanquin, in which great personages and women were borne from place to place. The name, as well as the object, immediately suggests that it may have been nearly the same thing as the تخت روان *takht-ravan*, the *moving throne*, or *seat*, of the Persians.



392.

It consists of a light frame fixed on two strong poles, like those of our sedan-chair. The frame is generally covered with cloth, and has a door, sometimes of lattice work, at each side. It is carried by two mules, one between the poles before, the other behind. These conveyances are used by great persons, when disposed for retirement or ease during a journey, or when sick or feeble from age. But they are chiefly used by ladies of consideration in their journeys (No. 392).

The popular illustrators of Scripture do not appear to have been acquainted with this and the other litters of Western Asia; and have, therefore, resorted to India, and drawn their illustrations from the palanquins borne by men, and from the *howdahs* of elephants. This is unnecessary, as Western Asia still supplies conveyances of this description, more suitable and more likely to have been anciently in use, than any which the further east can produce. If the one already described should seem too humble, there are other takht-ravans of more imposing appearance. Some readers may remember the 'litter of red cloth, adorned with pearls and jewels, together with ten mules (to bear it by turns), which king Zahr-Shah prepared for the journey of his daughter (Lane's *Arab. Nights*, i. 528). This was, doubtless, of the kind which is borne by four mules, two behind and two before. In Arabia, or in the countries where Arabian usages prevail, two camels are usually employed to bear the takht-ravan, and sometimes two horses. When borne by camels, the head of the hindmost of the animals is bent painfully down under the

vehicle. This is the most comfortable kind of litter, and two light persons may travel in it.

393.

The *shibreeyeh* is another kind of camel-litter, resembling the Indian *howdah*, by which name (or rather *hódaj*) it is sometimes called. It is composed of a small square platform with a canopy or arched covering. It accommodates

394.

but one person, and is placed upon the back of a camel, and rests upon two square camel-chests, one on each side of the animal. It is very evident, not only from the text in view, but from others, that the Hebrews had litters; and there is little reason to doubt that they were the same as those now employed in Palestine and the neighbouring countries, where there are still the same circumstances of climate, the same domestic animals, and essentially the same habits of life, as in the Biblical period.

LIVER (כָּבֵד) occurs in Exod. xxix. 13, 22; Lev. iii. 4, 10, 15; iv. 9; vii. 4; viii. 16, 25; ix. 10, 19; Prov. vii. 23; Lam. ii. 11; Ezek. xxi. 21. The Hebrew word is generally derived from כבד, *to be heavy*, in reference to the weight of the liver as the heaviest of all the viscera, just as in English the lungs are called 'the lights,' from their comparative lightness. Gesenius, however, adduces the Arabic كبد, meaning, probably, 'the most precious,' which, indeed, suits the notions of the ancient Orientals, who esteemed the liver to be the most valuable of all the viscera, because they thought it most concerned in the formation of the blood, and held that 'in the blood is the life.' In all the instances where the word occurs in the Pentateuch, it forms part of the phrase יתרת על הכבד, or יתרת הכבד, or מן־הכבד, translated in the Authorized Version, 'the caul that is above the liver,' but which Gesenius, reasoning from the root, understands to be the great lobe of the liver itself, rather than the caul over it; which latter he terms *omentum minus hepaticogastricum*, and which, he observes, is inconsiderable in size, and has but little fat. Jahn thinks the smaller lobe to be meant. The phrase is also rendered in the Sept. τὸν λοβὸν τοῦ ἥπατος, or τὸν ἐπὶ τοῦ, &c., 'the lobe or lower pendent of the liver,' the chief object of attention in the art of hepatoscopy, or divination by the liver among the ancients. (Jerome gives *reticulum jecoris*, 'the net of the liver,' and *arvina*, 'the suet,' and *adeps*, 'the fat;' see Bochart, *Hieroz.* i. 498.) It appears from the same passages that it was burnt upon the altar, and not eaten as sacrificial food (Jahn, *Biblisches Archäol.* § 378, n. 7). The liver was supposed by the ancient Jews, Greeks, and Romans to be the seat of the passions, pride, love, &c. Thus, Gen. xlix. 6, 'with their assembly let not כבדי (literally, 'my liver') be united;' Sept. τὰ ἡπατά; see also Heb. of Ps. xvi. 9; lvii. 9; cviii. 2; and Anacreon, *Ode* iii. fin.; Theocritus, *Idyll.* xi. 16; Horace, *Carm.* i. 13. 4; 25. 15; iv. 1. 12; and the Notes of the Delphin edition; comp. also Persius, *Sat.* v. 129; Juvenal, *Sat.* v. 647. Wounds in the liver were supposed to be mortal; thus the expressions in Prov. vii. 23, 'a dart through his liver,' and Lam. ii. 11, 'my liver is poured out upon the earth,' are each of them a periphrasis for death itself. So also Æschylus uses the words θιγγάνει πρὸς ἧπαρ to describe a mortal wound (*Agamemnon*, l. 442). The passage in Ezekiel contains an interesting reference to the most ancient of all modes of divination, by the inspection of the viscera of animals and even of mankind sacrificially slaughtered for the purpose. It is there said that the king of Babylon, among other modes of divination referred to in the same verse, 'looked upon the liver.' The Cambridge manuscript of the Sept. gives ἥπατι σκοπήσασθαι; other copies use the precise technical term ἡπατοσκοπήσασθαι. The liver was always considered the most important organ in the ancient art of *Extispicium*, or divination by the entrails. Philostratus felicitously describes it as 'the prophesying tripod of all divination' (*Life of Apollonius*, viii. 7. 5). The rules by which the Greeks and Romans judged of it are amply detailed in Adams's *Roman Antiquities*, p. 261, &c., Lond. 1834; and in Potter's *Archæologia Græca*, i. 316, Lond. 1775. It is an interesting inquiry how this regard to it originated. Vitruvius suggests a plausible theory of the first rise of *hepatoscopy*. He says the ancients inspected the livers of those animals which frequented the places where they wished to settle; and if they found the liver, to which they chiefly ascribed the process of sanguification, was injured, they concluded that the water and nourishment collected in such localities were unwholesome (i. 4). But divination is coeval and co-extensive with a belief in the divinity. We accept the argument of the Stoics, '*sunt Dî: ergo est Divinatio.*' We know that as early as the days of Cain and Abel there were certain means of communication between God and man, and that those means were connected with the sacrifice of animals; and we prefer to consider those means as the source of divination in later ages, conceiving that when the real tokens of the divine interest with which the primitive families of man were favoured ceased, in consequence of the multiplying of human transgressions, their descendants endeavoured to obtain counsel and

information by the same external observances. We believe that thus only will the minute resemblances be accounted for, which we discover between the different methods of divination, utterly untraceable to reason, but which have prevailed from unknown antiquity among the most distant regions. Cicero ascribes divination by this and other means to what he calls 'the heroic ages,' by which term we know he means a period antecedent to all historical documents (*De Divinatione*). Prometheus, in the play of that title (l. 474, &c.), lays claim to having taught mankind the different kinds of divination, and that of *extispicy* among the rest; and Prometheus, according to Servius (*ad Virg. Ecl.* vi. 42), instructed the Assyrians; and we know from sacred record that Assyria was one of the countries first peopled. It is further important to remark that the first recorded instance of divination is that of the teraphim of Laban, a native of Padan-aram, a district bordering on that country (1 Sam. xix. 13, 16), but by which teraphim both the Sept. and Josephus understood ἦπαρ τῶν αἰγῶν 'the *liver* of goats' (*Antiq.* vi. 11. 4); nor does Whiston, perhaps, in his note on that passage, unreasonably complain that, 'since the modern Jews have lost the signification of the word כביר, and since this rendering of the Sept., as well as the opinion of Josephus, are here so much more clear and probable, it is unaccountable that our commentators should so much hesitate as to its true interpretation' (Whiston's *Josephus*, p. 169, note, Edinb. 1828; Bochart, i. 41, *De Caprarum Nominibus; Encyclopædia Metropolitana*, art. 'Divination;' Rosenmüller's *Scholia* on the several passages referred to; Perizonius, *ad Ælian.* ii. 31; Pencer, *De Præcipuis Divinationum Generibus*, &c., Witteberg, 1560).—J. F. D.

LIZARD (צָב *tzab*, כַּח *coach*, לְטָאָה *letaah*, אַנָקָה *anakah*, תִּנְשֶׁמֶת *thinsemeth*, חוֹמֶט *chomet*, שְׂמָמִית *semmamith*). Under this denomination the modern zoologist places all the cold-blooded animals that have the conformation of serpents with the addition of four feet. Thus viewed, as one great family, they constitute the Saurians, Lacertinæ, and Lacertidæ of authors; embracing numerous generical divisions, which commence with the largest, that is, the crocodile group, and pass through sundry others, a variety of species, formidable, disgusting, or pleasing in appearance—some equally frequenting the land and water, others absolutely confined to the earth and to the most arid deserts; and though in general harmless, there are a few with disputed properties, some being held to poison or corrode by means of the exudation of an ichor, and others extolled as Aphrodisiacs, or of medical use in pharmacy; but these properties in most, if not in all, are undetermined or illusory. Of some genera, such as the crocodile and chameleon, we have already made mention [Chameleon; Crocodile; Dragon; Leviathan], and therefore we shall confine our present remarks to the lizards that are inhabitants of Western Asia and Egypt, and to those more particularly noticed in the Bible. Of these commentators indicate six or seven species, whereof some indeed may be misapprehended; but when it is considered that the regions of Syria, Arabia, and Egypt are overrun with animals of this family, there is every reason to expect allusion to more than one genus in the Scriptures, where so many observations and similes are derived from the natural objects which were familiar to the various writers. Among the names enumerated above, Bochart refers צב *tzab* (Lev. xi. 29) to one of the group of Monitors or Varanus, the Nilotic lizard. *Lacerta Nilotica*, *Varanus Niloticus*, or *Waran* of the Arabs. Like the other of this form, it is possessed of a tail double the length of the body, but is not so well known in Palestine, where there is only one real river (Jordan), which is not tenanted by this species. We have already shown that the true crocodile frequented the shores and marshes of the coast down to a comparatively late period; and therefore it may well have had a more specific name than Leviathan—a word apparently best suited to the dignified and lofty diction of the prophets, and clearly of more general signification than the more colloquial designation. Jerome was of this opinion; and it is thus likely that *tzab* was applied to both, as *waran* is now considered only a variety of, or a young, crocodile. There is a second of the same group, *Lacerta Scincus* of Merrem (*Varanus Arenarius*), Waran-el-hard, also reaching to six feet in length; and a third, not as yet clearly described, which appears to be larger than either, growing to nine feet, and covered with bright cupreous scales. This last prefers rocky and stony situations. It is in this section of the Saurians that most of the gigantic fossil species, the real בְּנֵי־נְפִילִים *ben-nephilim*, 'children of the giants,' are found to be located; and of the existing species some are reported to possess great strength. One of the last-mentioned pursues its prey on land with a rapid bounding action, feeds on the larger insects, and is said to attack game in a body, sometimes destroying even sheep. The Arabs, in agreement with the ancients, assert that this species will do fierce and victorious battle with serpents.

Considerations like these induce us to assign the Hebrew name כח *coach* (a designation of strength) to the species of the desert; and if the Nilotic *waran* be the *tzab*, then the Arabian *dhab*, as Bruce asserts, will be *Varanus Arenarius*, or Waran-el-hard of the present familiar language, and حردون *chardaun*, the larger copper-coloured species above noticed. But it is evident from the Arabic authorities quoted by Bochart, and from his own conclusions, that there is not only confusion among the species of lizard, but that the ichneumon of Egypt (*Herpestes Pharaonis*) is mixed up with the history of these Saurians.

235. (Lacerta Stellio.)

We come next to the group of lizards most properly so called, which Hebrew commentators

take to be the לטאה *letaah*, a name having some allusion to poison and adhesiveness. The word occurs only once (Lev. xi. 30), where Saurians alone appear to be indicated. If the Hebrew root were to guide the decision, *letaah* would be another name for the *gecko* or *anaka*, for there is but one species which can be deemed venomous; and with regard to the quality of adhesiveness, though the *geckos* possess it most, numerous common lizards run up and down perpendicular walls with great facility. We, therefore, take חומט *chomct*, or the sand lizard of Bochart, to be the true lizard, several (probably many) species existing in myriads on the rocks in sandy places, and in ruins in every part of Palestine and the adjacent countries. There is one species particularly abundant and small, well known in Arabia by the name of Sarabandi. We now come to the *Stelliones*, which have been confounded with the noxious *geckos* and others from the time of Aldrovandus, and thence have been a source of inextricable trouble to commentators. They are best known by the bundles of starlike spines on the body. Among these *Lacerta Stellio*, *Stellio Orientalis*, the κροκόδειλος of the Greeks, and *hardun* of the Arabs, is abundant in the east, and a great frequenter of ruinous walls. The genus *Uromastix* offers *Stellio Spinipes* of Daud. or *Ur-Spinipes*, two or three feet long, of a fine green, and is the species which is believed to strike with the tail; hence formerly denominated *Caudi Verbera*. It is frequent in the deserts around Egypt, and is probably the Guaril of the Arabs. Another subgenus, named *Trapelus* by Cuvier, is exemplified in the *Tr. Ægypticus* of Geoff., with a spinous swelled body, but remarkable for the faculty of changing colour more rapidly than the chameleon.

Next we place the *Geckotians*, among which comes אנקה *anakah*, in our versions denominated *ferret*, but which is with more propriety transferred to the noisy and venomous *abu-burs* of the Arabs. There is no reason for admitting the verb אנק *anak*, *to groan*, *to cry out*, as radical for the name of the ferret, an animal totally unconnected with the preceding and succeeding species in Lev. xi. 29, 30, and originally found, so far as we know, only in Western Africa, and thence conveyed to Spain, prowling noiselessly, and beaten to death without a groan, though capable of a feeble, short scream when at play, or when suddenly wounded. Taking the interpretation 'to cry out,' so little applicable to ferrets, in conjunction with the whole verse, we find the *gecko*, like all the species of this group of lizards, remarkable for the loud grating noise which it is apt to utter in the roofs and walls of houses all the night through: one, indeed, is sufficient to dispel the sleep of a whole family. The particular species most probably meant is the *lacerta gecko* of Hasselquist, the *gecko lobatus* of Geoffroy, distinguished by having the soles of the feet dilated and striated like open fans, from whence a poisonous ichor is said to exude, inflaming the human skin, and infecting food that may have been trod upon by the animal. Hence the Arabic name of *abu-burs*, or 'father-leprosy,' at Cairo. The species extends northwards in Syria; but it may be doubted whether the *gecko fascicularis*, or *tarentola*, of South-Eastern Europe be not also an inhabitant of Palestine; and in that case the שממית *scmmamith* of Bochart would find an appropriate location.

To these we add the *Chamæleons*, already described [Chameleon]; and then follows the *Scincus* (in antiquity the name of *varanus arenarius*), among which *lacerta scincus*, Linn., or *scincus officinalis*, is the *el-adda* of the Arabs, figured by Bruce, and well known in the old pharmacy of Europe. *S. cyprius*, or *lacerta cyprius scincoides*, a large greenish species, marked with a pale line on each flank, occurs also; and a third, *scincus variegatus* or *ocillatus*, often noticed on account of its round black spots, each marked with a pale streak, and commonly having likewise a stripe on each flank, of a pale colour.

Of the species of *Seps*, that is, viviparous serpent-lizards, having the body of snakes, with four weak limbs, a species with only three toes on each foot, the *lacerta chalcides* of Linn., appears to extend to Syria.—C. H. S.

LOAN. The Mosaic laws which relate to the subject of borrowing, lending, and repaying, are in substance as follows:—If an Israelite became poor, what he desired to borrow was to be freely lent to him, and no interest, either of money or produce, could be exacted from him; interest might be taken of a foreigner, but not of an Israelite by another Israelite (Exod. xxii. 25; Deut. xxiii. 19, 20; Lev. xxv. 35-38). At the end of every seven years a remission of debts was ordained; every creditor was to remit what he had lent: of a foreigner the loan might be exacted, but not of a brother. If an Israelite wished to borrow, he was not to be refused because the year of remission was at hand (Deut. xv. 1-11). Pledges might be taken, but not as such the mill or the upper millstone, for that would be to take a man's life in pledge. If the pledge was raiment, it was to be given back before sunset, as being needful for a covering at night. The widow's garment could not be taken in pledge (Exod. xxii. 26, 27; Deut. xxiv. 6, 17). A part of the last passage we must cite entire, as showing a most amiable and considerate spirit on the part of Moses towards the poor: 'When thou dost lend thy brother anything, thou shalt not go into his house to fetch his pledge; thou shalt stand abroad, and the man to whom thou dost lend shall bring out the pledge abroad unto thee; and if the man be poor thou shalt not sleep with his pledge: in any case thou shalt deliver him the pledge again when the sun goeth down, that he may sleep in his own raiment, and bless thee; and it shall be righteousness unto thee before the Lord thy God.' The strong and impressive manner in which the duty of lending is enjoined, is worthy of being exhibited in the words of Scripture: 'If there be among you a poor man of one of thy brethren, thou shalt not harden thy heart nor shut thine hand from thy poor brother, but thou shalt open thine hand wide unto him, and shalt surely lend him sufficient for his need. Beware that there be not a thought in thy wicked heart, saying, the year of release is at hand, and thine eye be evil against thy poor brother, and thou givest him nought, and he cry unto the Lord against thee, and it be sin unto thee: thou shalt surely give him, and thine heart shall not be grieved when thou givest unto him; because that for this thing the Lord thy God shall bless thee in all thy works and in all that thou puttest thy hand unto.'

These laws relating to loans may wear a strange

and somewhat repulsive aspect to the mere modern reader, and cannot be understood, either in their bearing or their sanctions, unless considered from the Biblical point of view. The land of Canaan (as the entire world) belonged to its Creator, but was given of God to the descendants of Abraham under certain conditions, of which this liberality to the needy was one. The power of getting loans therefore was a part of the poor man's inheritance. It was a lien on the land (the source of all property with agricultural people), which was as valid as the tenure of any given portion by the tribe or family to whose lot it had fallen. This is the light in which the Mosaic polity represents the matter, and in this light, so long as that polity retained its force, would it, as a matter of course, be regarded by the owners of property. Thus the execution of this particular law was secured by the entire force with which the constitution itself was recommended and sustained. But as human selfishness might in time endanger this particular set of laws, so Moses applied special support to the possibly weak part. Hence the emphasis with which he enjoins the duty of lending to the needy. Of this emphasis the very essence is the sanction supplied by that special providence which lay at the very basis of the Mosaic commonwealth; so that lending to the destitute came to be enforced with all the power derivable from the express will of God, of the Almighty Creator, of the Redeemer of Israel, of Him whose favour was life and whose frown was dismay and ruin.

It is impossible not to admire the benevolence which runs through the entire of this piece of legislation; and when the age to which its origin is referred, and the peculiar circumstances under which it was produced, are considered, our admiration rises to a very high pitch, and we feel that it is most insufficient praise to say that nothing so benign in spirit had been previously conceived: nothing more beneficent and humane has been carried into effect, even since Jesus came to seek and to save the lost. The conduct which the Romans observed towards the debtor affords a striking contrast to what is thus required by Moses. Insolvent debtors might be compelled to serve their creditors, and often had to endure treatment as bad as that of slaves (Liv. ii. 23; A. Gell. xx. 1, 19; Appian, *Ital.* p. 40). In Athens also the creditor had a claim to the person of the debtor (Plut. *Vit. Sol.* 15). Moses himself seems to have admitted some restrictions to his benevolent laws; for from Lev. xxv. 39, sq., it appears that a poor Israelite might be sold to one possessed of substance: he was, however, to serve, not as a bond, but as a hired servant, who at the jubilee was restored with his children to entire liberty, so that he might return unto the possession of his fathers.

That the system of law regarding loans was carried into effect there is no reason to doubt. It formed an essential part of the general constitution, and therefore came recommended with the entire sanction which that system had on its own behalf; nor were there any predominant antagonist principles at work which would prevent this from proceeding step by step, in its proper place and time, with the residue of the Mosaic legislation. Nor do the passages of Scripture (Job xxii. 6; xxiv. 3; Matt. xviii. 28; Prov. xxviii. 8; Ezek. xviii. 8; Ps. xv. 5; cix. 11) which give us reason to think that usury was practised and the poor debtor oppressed, show anything but those breaches to which laws are always liable, especially in a period when morals grow corrupt and institutions in consequence decline; on the contrary, the stern reproofs which such violations called forth forcibly demonstrate that the legislation in question had taken effect, and had also exerted a powerful influence on the national character, and on the spirit with which the misdeeds of rich oppressors and the injuries of the needy were regarded.

While, however, the benign tendency of the laws in question is admitted, may it not be questioned whether they were strictly just? Such a doubt could arise only in a mind which viewed the subject from the position of our actual society. A modern might plead that he had a right to do what he pleased with his own; that his property of every kind—land, food, money—was his own; and that he was justified to turn all and each part to account for his own benefit. Apart from religious considerations this position is impregnable. But such a view of property finds no support in the Mosaic institutions. In them property has a divine origin, and its use is intrusted to man on certain conditions, which conditions are as valid as is the tenure of property itself. In one sense, indeed, the entire land—all property—was a great loan, a loan lent of God to the people of Israel, who might well therefore acquiesce in any arrangement which required a portion—a small portion—of this loan to be under certain circumstances accessible to the destitute. This view receives confirmation from the fact that interest might be taken of persons who were not Hebrews, and therefore lay beyond the sphere embraced by this special arrangement. It would open too wide a field did we proceed to consider how far the Mosaic system might be applicable in the world at large; but this is very clear to our mind, that the theory of property on which it rests—that is, making property to be divine in its origin, and therefore tenable only on the fulfilment of such conditions as the great laws of religion and morality enforce—is more true and more philosophical (except in a college of atheists) than the narrow and baneful ideas which ordinarily prevail.

Had the Hebrews enjoyed a free intercourse with other nations, the permission to take usury of foreigners might have had the effect of impoverishing Palestine by affording a strong inducement for employing capital abroad; but, under the actual restrictions of the Mosaic law, this evil was impossible. Some not inconsiderable advantages must have ensued from the observance of these laws. The entire alienation and loss of the lent property were prevented by that peculiar institution which restored to every man his property at the great year of release. In the interval between the jubilees the system under consideration would tend to prevent those inequalities of social condition which always arise rapidly, and which have not seldom brought disaster and ruin on states. The affluent were required to part with a portion of their affluence to supply the wants of the needy, without exacting that recompense which would only make the rich richer and the poor more needy; thus superinducing a state of things scarcely more injurious to the one than to

the other of these two parties. There was also in this system a strongly conservative influence. Agriculture was the foundation of the constitution. Had money-lending been a trade, money-making would also have been eagerly pursued. Capital would be withdrawn from the land; the agriculturist would pass into the usurer; huge inequalities would arise; commerce would assume predominance, and the entire commonwealth be overturned—changes and evils which were prevented, or, if not so, certainly retarded and abated, by the code of laws regarding loans. As it was, the gradually increasing wealth of the country was in the main laid out on the soil, so as to augment its productiveness and distribute its bounties.

These views may prepare the reader for considering the doctrine of 'the Great Teacher' on the subject of loans. It is found forcibly expressed in Luke's Gospel (vi. 34, 35): 'If ye lend to them of whom ye hope to receive, what thank have ye? for sinners also lend to sinners, to receive as much again: but love ye your enemies, and do good, and lend, hoping for nothing again; and your reward shall be great, and ye shall be the children of the Highest; for he is kind unto the unthankful and to the evil.' The meaning of the passage is distinct and full, unmistakeable, and not to be evaded. He commands men to lend, not as Jews to Jews, but even to enemies, without asking or receiving any return, after the manner of the Great Benefactor of the Universe, who sends down his rains and bids his sun to shine on the fields of the unjust as well as of the just. To attempt to view this command in the light of reason and experience would require space which cannot here be given; but we must add, that any attempt to explain the injunction away is most unworthy on the part of professed disciples of Christ; and that, not impossibly at least, fidelity to the behests of Him whom we call Lord and Master would of itself answer all doubts and remove all misgivings, by practically showing that this, as every other doctrine that fell from His lips, is indeed of God (John vii. 17).—J. R. B.

LOAVES. [Bread.]

LOCUST (order, *Hemiptera;* species, *Gryllus*, Linn.). There are ten Hebrew words which appear to signify 'locust' in the Old Testament: 1. אַרְבֶּה *arbeh;* 2. גֹּוב *gob;* 3. גָּזָם *gazam;* 4. חָגָב *chagab;* 5. חַנָּמָל *chanamal;* 6. חָסִיל *chasil;* 7. חַרְגֹּל *chargol;* 8. יֶלֶק *yelek;* 9. סָלְעָם *salam;* 10. צְלָצַל *tzelatzal.* It has been supposed, however, that some of these words denote merely the different states through which the locust passes after leaving the egg, viz. the larva, the pupa, and the perfect insect—all which much resemble each other, except that the larva has no wings, and that the pupa possesses only the rudiments of those members, which are fully developed only in the adult locust (Michaelis, *Supplem. ad Lex. Hebr.* ii. 667, 1080). But this supposition is manifestly wrong with regard to the first, fourth, seventh, and eighth, because, in Lev. xi. 22, the word למינו, 'after his kind,' or species, is added after each of them (comp. ver. 14, 15, 16). It is most probable, therefore, that all the rest are also the names of species. But the problem is to ascertain the particular species intended by them respectively. Many writers have endeavoured to solve it. They have first examined the roots of these names, which are nearly all the resources afforded by the Hebrew, since there is only one instance in which any descriptive epithet is applied to the name of a locust which might assist in identifying the species (Jer. li. 27), 'the rough caterpillar.' Bochart thus states the principle of this method of investigation:—'Res latet in verbis, et ex nominibus multa eruuntur quæ ad horum animalium naturam pertinent.'—'The thing signified is couched in the words, and out of the names many things are deduced which relate to the nature of these creatures' (*Hierozoicon*, à Rosenmüller, 1796, vol. iii. p. 251, lib. iv. p. ii. c. 1). But as Hebrew roots afford only abstract ideas, these writers next endeavour to ascertain the particular species intended, by considering to what species of locust the general characteristic especially applies. This would be a sufficiently arduous task, supposing the true Hebrew roots to be known; whereas it will be seen that several Hebrew roots often compete with equal claims for the place of etymon to the same word. The roots of the cognate dialects, to which these writers resort in the absence of any in Hebrew, which is frequently the case, are chargeable with the same vagueness and incertitude. The next resource would seem to be the ancient versions; but the Septuagint, even in the most ancient and accurate portions of it, seldom gives a definite rendering. The renderings of the Vulgate, though nearly an echo of the Sept., are valuable, as furnishing all the illustration which Jerome could give in the fifth century. Bochart has observed, that all the other ancient versions, Chaldaic, Syriac, and Arabic, as well as the Targums and rabbins, afford us no assistance in this inquiry, because 'vel retinent voces Hebræas, vel aliis utuntur nihilo magis notis'—'they either retain the Hebrew words or use others no better understood.' Our only materials, then, consist of reasonings from the Hebrew roots, the Sept. and Vulg., and of those few places where the definite renderings they give can be illustrated from ancient Greek and Roman naturalists, &c. It will now be attempted to lay before the reader the results of these several sources of investigation.

1. ארבה *arbeh;* occurs in Exod. x. 4, Sept. ἀκρίδα πολλήν ('a vast flight of locusts,' or perhaps indicating that several species were employed), Vulg. *locustam;* and, in ver. 12, 13, 14, 19, ἀκρὶς and *locusta*, Eng. locusts; Lev. xi. 22, βροῦχον, *bruchus*, locust; Deut. xxviii. 38, ἀκρὶς, *locustæ*, locust; Judg. vi. 5; vii. 12, ἀκρὶς, *locustarum*, grasshoppers; 1 Kings viii. 37, βροῦχος, *locusta*, locust; 2 Chron. vi. 28, ἀκρὶς, *locusta*, locusts; Job xxxix. 20, ἀκρίδες, *locustas*, grasshoppers; Ps. lxxviii. 46, ἀκρίδι, Symm. σκώληκι, *locustæ*, locust; Ps. cv. 34, ἀκρὶς, *locusta*, locust; Ps. cix. 23, ἀκρίδες, *locustæ*, locust; Prov. xxx. 27, ἀκρὶς, *locusta*, locust; Jer. xlvi. 23, ἀκρίδα, *locusta*, grasshoppers; Joel i. 4; ii. 25, ἀκρὶς, *locusta*, locust; Nahum iii. 15, βροῦχος, *bruchus*, locusts, ver. 17, ἀττέλαβος, *locustæ*, locusts. In the foregoing conspectus the word ארבה, in Exod. x., as indeed everywhere else, occurs in the singular number only, though it is there associated with verbs both in the singular and plural (ver. 5, 6), as are the corresponding words in Sept. and

Vulg. This it might be, as a noun of multitude; but it will be rendered probable that four species were employed in the plague on Egypt, ארבה, חסיל, ילק and חנמל (Ps. lxxviii. 46, 47; cv. 34). These may all have been brought into Egypt from Ethiopia (which has ever been the cradle of all kinds of locusts), by what is called in Exodus, 'the east wind,' since Bochart proves that the word which properly signifies 'east' often means 'south' also. The word ארבה may be used in Lev. xi. 22, as the collective name for the locust, and be put first there as denoting also the most numerous species; but in Joel i. 4, and Ps. lxxviii. 46, it is distinguished from the other names of locusts, and is mentioned second, as if of a different species; just, perhaps, as we use the word *fly*, sometimes as a collective name, and at others for a particular species of insect, as when speaking of the hop, turnip, meat fly, &c. When the Hebrew word is used in reference to a particular species, it has been supposed, for reasons which will be given, to denote the *gryllus gregarius* or *migratorius*. Moses, therefore, in Exodus, refers Pharaoh to the visitation of the locusts, as well known in Egypt; but the plague would seem to have consisted in bringing them into that country in unexampled numbers, consisting of various species never previously seen there (comp. Exod. x. 5, 6, 15). The Sept. word *βροῦχος* (Lev. xi. 22) clearly shows that the translator uses it for a winged species of locust, contrary to the Latin fathers (as Jerome, Augustine, Gregory, &c.), who all define the *bruchus* to be the unfledged young or larva of the locust, and who call it *attelabus* when its wings are partially developed, and *locusta* when able to fly; although both Sept. and Vulg. ascribe flight to the bruchus here, and in Nah. iii. 17. The Greek fathers, on the other hand, uniformly ascribe to the *βροῦχος* both wings and flight, and therein agree with the descriptions of the ancient Greek naturalists. Thus Theophrastus, the pupil of Aristotle, who, with his preceptor, was probably contemporaries with the Sept. translators of the Pentateuch, plainly speaks of it as a distinct species, and not a mere state: *χαλεπαὶ μὲν οὖν αἱ ἀκρίδες, χαλεπώτεροι δὲ οἱ ἀττέλαβοι, καὶ τούτων μάλιστα οὓς καλοῦσι βρούκους.*—'The *ἀκρίδες* (the best ascertained general Greek word for the locust) are injurious, the *ἀττέλαβοι* still more so, and those most of all which they call *βροῦκοι*' (*De Anim.*). The Sept. seems to recognise the peculiar destructiveness of the *βροῦχος* in 1 Kings viii. 37 (but has merged it in the parallel passage, 2 Chron.), and in Nah. iii. 15, by adopting it for ארבה. In these passages the Sept. translators may have understood the *G. migratorius* or *gregarius* (Linn.), which is usually considered to be the most destructive species (from *βρώσκω, I devour*). Yet in Joel i. 4; ii. 25, they have applied it to the ילק, which, however, appears there as engaged in the work of destruction. Hesychius, in the third century, explains the *βροῦκος* as *ἀκρίδων εἶδος*, 'a species of locust,' though, he observes, applied in his time by different nations to different species of locusts, and by some to the *ἀττέλαβος*. May not his testimony to this effect illustrate the various uses of the word by the Sept. in the minor prophets? Our translators have wrongly adopted the word 'grasshopper' in Judg. and Jer. xlvi. 23, where 'locusts' would certainly have better illustrated the idea of 'innumerable multitudes:' and here, as elsewhere, have departed from their professed rule, 'not to vary from the sense of that which they had translated before, if the word signified the same in both places' (Translators to the reader, *ad finem*). The Hebrew word in question, is usually derived from רבה, 'to multiply' or 'be numerous,' because the locust is remarkably prolific; which, as a general name, is certainly not inapplicable; and it is thence also inferred, that it denotes the *G. migratorius*, because that species often appears in large numbers. However, the largest flight of locusts upon record, calculated to have extended over 500 miles, and which darkened the air like an eclipse, and was supposed to come from Arabia, did not consist of the *G. migratorius*, but of a red species (Kirby and Spence, *Introd. to Entomology*, i. 210); and, according to Forskal, the species which now chiefly infests Arabia, and which he names *G. gregarius*, is distinct from the *G. migratorius* of Linn. (*Ency. Brit.* art. 'Entomology,' p. 193). Others derive the word from ארב, 'to lie hid,' or 'in ambush,' because the newly hatched locust emerges from the ground, or because the locust besieges vegetables. Rosenmüller justly remarks upon such etymologies, and the inferences made from them, 'Quàm infirmum verò sit hujusmodi e solo nominis etymo petitum argumentum, unusquisque intelliget ipse.' He adds, 'Nec alia est ratio reliquarum specierum' (*Schol. in Joel* i. 4). 'How precarious truly the reasoning is, derived in this manner from the mere etymology of the word, every body may understand for himself. Nor is the principle otherwise in regard to the rest of the species.' He also remarks that the references to the destructiveness of locusts, which are often derived from the roots, simply concur in this, that locusts consume and do mischief. Illustrations of the propriety of his remarks will abound as we proceed. Still it by no means follows from a coincidence of the Hebrew roots, in this or any other meaning, that the *learned* among the ancient Jews did not recognise different species in the different names of locusts. The English word *fly*, from the Saxon *fleon*, the Heb. עוף, and its representative 'fowl' in the Eng. Version (Gen. i. 20, &c.), all express both a general and specific idea. Even a modern entomologist might speak of 'the flies' in a room, while aware that from 50 to 100 different species annually visit our apartments. The scriptures use popular language; hence 'the multitude,' 'the devourer, or 'the darkener,' may have been the familiar appellations for certain species of locusts. The common Greek words for locusts and grasshoppers, &c., are of themselves equally indefinite; yet they also served for the names of species, as *ἀκρίς*, the locust generally, from the tops of vegetables, on which the locust feeds; but it is also used as the proper name of a particular species, as the grasshopper; *τετράπτερυγος*, 'four-winged,' is applied sometimes to the grasshopper; *τριξαλλίς*, from *τρίζω*, 'to chirp,' sometimes to the caterpillar. Yet the Greeks had also distinct names restricted to particular species, as *ὄψις*, *μολοβρίτη*, *κερκώπη*, &c. The Hebrew names may also have served similar purposes.

2. גוב *gob*, Isa. xxxiii. 4; Sept. *ἀκρίδων*; Vulg. is deficient; Eng. locusts; Aquila, *ἀκρίδων ἀκρίδων* (*ἀκρίδων*); Aquila, *βροῦκοι* (*βροῦκοι*);

locustæ, grasshoppers; Nah. iii. 17, ἀττέλεβος, locustæ, grasshoppers. Here the lexicographers, finding no Hebrew root, resort to the Arabic. Bochart derives it from the Arabic* נבא, 'to creep out' (of the ground), as the locusts do in spring. But this applies to the young of all species of locusts, and his quotations from Aristotle and Pliny occur unfortunately in general descriptions of the locust. Castell gives another Arabic root (جب) נאב, *secuit*, 'to cut' or 'tear,' but this is open to a similar objection. Parkhurst proposes גב, anything gibbous, curved, or arched, and gravely adds, 'the locust in the *caterpillar* state, so called from its shape in general, or from its continually *hunching* out its back in moving.' The Sept. word in Nahum, ἀττέλεβος, has already been shown to mean a perfect insect and species. Accordingly, Aristotle speaks of its parturition and eggs (*Hist. Anim.* v. 29; so also Plutarch, *De Isid. et Osir.*). It seems, however, not unlikely that it means a wingless species of locust, genus Podisma of Latreille. Grasshoppers, which are of this kind, he includes under the genus Tettix. Hesychius defines the ἀττέλεβος as ἀκρὶς μικρά, 'a small locust;' and Pliny mentions it as 'locustarum minimæ, sine pennis, quas attelabos vocant' (*Hist. Nat.* xxix. 5). Accordingly the Sept. ascribes only leaping to it, ἐξήλατο ὡς ἀττέλεβος. In Nahum we have the construction גוב גובי, locusta locustarum, which the lexicons compare with קדש קדשים, and explain as a vast multitude of locusts. Archbishop Newcome suggests that 'the phrase is either a double reading where the scribes had a doubt which was the true reading, or a mistaken repetition not expunged.' He adds, that we may suppose גובי the contracted plural for גובים (*Improved Version of the Minor Prophets*, Pontefr. 1809, p. 188).

* From the affinity of Arabic to Hebrew, it might have been hoped that from inquiries in Arabia some light would have been cast upon the Hebrew names of locusts by the traditional names for them still in use in that region. But the modern Arabic names, which may be seen in Bochart, Tychsen, Forskal, Niebuhr, Shaw, &c., bear no resemblance to the Hebrew. The word ארבה was among the topics of inquiry proposed to Niebuhr by Michaelis in 1774 (*Recueil de Questions proposées, &c. Quest.* xxx.). Niebuhr replied, 'Comme la philologie n'est point mon fort, je dois avertir de nouveau, que je ne saurois décider si l'explication en est toujours juste. Je n'ai fait que l'écrire telle que je l'ai reçue des Juifs, Chrétiens, ou Mahométans orientaux. ארבה sont à Bagdad et à Maskat les sauterelles de passage,' &c. (*Descript. de l'Arabie*, 1774, p. 33). Dr. Harris, however, makes Niebuhr say, 'Arbah is *the name* at Bagdad and Maskat of those locusts,' &c. (*Nat. Hist. of the Bible*, London, 1825, art. 'Locust'), which is evidently an *over*-translation. Indeed Forskal, who went in the same expedition with Niebuhr, expressly says that the Arabs *every where* call what he names G. gregarius جيراد *Djerâd*, and that the Jews inhabiting Yemen (Arabia Felix) affirmed that it was the ארבה (*Descriptiones Animalium, &c.* p. 81, Hauniæ, 1775, and *Flora Ægypt.*, p. 83).

3. גזם *gazam;* Joel i. 4; ii. 25; Amos iv. 9; in all which the Sept. reads κάμπη, the Vulg. *eruca*, and the English *palmerworm*. Bochart observes that the Jews derive the word from גוז or גזז, 'to shear' or 'clip,' though he prefers גזם, 'to cut;' because, he observes, the locust gnaws the tender branches of trees, as well as the leaves. Gesenius urges that the Chaldaic and Syriac explain it as the young unfledged bruchus, which he considers very suitable to the passage in Joel, where the גזם begins its ravages before the locusts; but Dr. Lee justly remarks that there is no dependence to be placed on this. Gesenius adds that the root גזם in Arabic, and the Talmud, is kindred with כסם, 'to shear'—a derivation which, however, applies to most species of locusts. Michaelis follows the Sept. and Vulgate, where the word in each most probably means the caterpillar, the larvæ of the lepidopterous tribes of insects (*Suppl. ad Lex.*, p. 290, compared with *Recueil de Quest.*, p. 63). We have, indeed, the authority of Columella, that the creatures which the Latins call *erucæ*, are by the Greeks called κάμπαι, or caterpillars:—'Animalia quæ a nobis appellantur erucæ, græcè autem κάμπαι nominantur' (xi. 3); which he also describes as creeping upon vegetables and devouring them. Nevertheless, the depredations ascribed to the גזם in Amos, better agree with the characteristics of the locust, as, according to Bochart, it was understood by the ancient versions. The English word 'palmerworm,' in our old authors, means properly a hairy caterpillar, which wanders like a palmer or pilgrim, and from its being rough, called also 'beareworm' (Mouffet, *Insectorum Theatrum*, p. 186).

4. חגב *chagab;* Lev. xi. 22; Num. xiii. 33; Isa. xl. 22; Eccles. xii. 5; and 2 Chron. vii. 13; in all which the Sept. reads ἀκρὶς, Vulgate *locusta*, and English *grasshopper*, except the last, where the English has *locusts*. The manifest impropriety of translating this word 'grasshoppers' in Lev. xi. 22, according to the English acceptation of the word, has already been shown [Grasshopper]; in all the other instances it most probably denotes a species of locust. Our translators have, indeed, properly rendered it 'locust' in 2 Chron.; but in all the other places 'grasshopper,' probably with a view to heighten the contrast described in those passages, but with no real advantage. Oedman infers, from its being so often used for this purpose, that it denotes the smallest species of locust; but in the passage in Chronicles voracity seems its chief characteristic. An Arabic root, signifying 'to hide,' is usually adduced, because it is said that locusts fly in such crowds as to hide the sun; but others say, from their hiding the ground when they alight. Even Parkhurst demurs, that 'to veil the sun and darken the air is not peculiar to any kind of locust;' and with no better success proposes to understand the cucullated, or hooded, or veiled species of locust. Tychsen suggests the *G. coronatus*.

5. חנמל *chanamal*, Ps. lxxviii. 47; Sept. πάχνη; Aq. ἐν κρύει; Vulg. *in pruina;* Eng. 'frost.' Notwithstanding this concurrence of Sept., Vulg., and Aquila, it is objected that 'frost' is nowhere mentioned as having been employed in the plagues of Egypt, to which the Psalmist evidently alludes; but that, if his

words be compared with Exod. x. 5, 15, it will be seen that the *locusts* succeeded the hail. The Psalmist observes the same order, putting the devourer after the hail (comp. Mal. iii. 11). Hence it is thought to be another term for the locust. If this inference be correct, and assuming that the Psalmist is describing facts, this would make a fourth species of locust employed against Egypt, two of the others, the ארבה and חסיל, being mentioned in the preceding verse. Proposed derivation, הנה, *to settle*, and מל, *to cut off*, because where locusts settle they cut off leaves, &c., or as denoting some non-migrating locust which settles in a locality (see Bochart, *in voc.*).

6. חסיל *chasil;* Sept. *βροῦχος, ἐρύσιβη*; Vulg. *rubigo, bruchus, ærugo* [Chasil].

7. חרגל *chargol;* Lev. xi. 22; *ὀφιομάχης, ophiomachus* [Chargol]. Since that article was written it has been found that Becmann, reasoning from the Sept. and Vulg., arrived at a similar conclusion; viz., that some insect of the sphex or ichneumon kind was meant (apud Bochart, a Rosenmüller, vol. iii. p. 264). The genus of *locusts* called *truxalis* answers the description. It is some excuse for the English rendering 'beetle' in this place, that Pliny classes one species of gryllus, the house-cricket, *G. domesticus*, under the scarabæi (*Hist. Nat.* xi. 8).

8. ילק *yelek;* Ps. cv. 34, *βροῦχος, bruchus*, caterpillar; Jer. li. 14, 27, *ἀκρίς, brucus*, caterpillar; and in the latter passage the Vulg. reads *brucus aculeatus*, and some copies *horripilantes;* Joel i. 4; ii. 25, *βροῦχος, bruchus*, cankerworm; Nah. iii. 15, 16, *ἀκρίς* and *βροῦχος*, cankerworm. Assuming that the Psalmist means to say that the ילק was really another species employed in the plague on Egypt, the English word caterpillar in the common acceptation cannot be correct, for we can hardly imagine that the larvæ of the Papilionidæ tribe of insects could be carried by 'winds.' Cankerworm means *any worm* that preys on fruit. *Βροῦχος* could hardly be understood by the Sept. translators of the minor prophets as an unfledged locust; for in Nah. iii. 16 they give *βροῦχος ἅρπασε καὶ ἐξεπετάσθη, the βροῦχος flies away.* The Arabic ילק, *to be white*, is offered; hence the white locust or the chafer-worm, which is white (Michaelis, *Recueil de Quest.* p. 64; *Sup. ad Lex. Heb.* p. 1080). Others give לקק, *to lick off*, as Gesenius, who refers to Num. xxii. 4, where this root is applied to the *ox* 'licking' up his pasturage, and which, as descriptive of celerity in eating, is supposed to apply to the ילק. Others suggest the Arabic ולק, *to hasten*, alluding to the quick motions of locusts. The passage in Jer. li. 27 is the only instance where an epithet is applied to the locust, and there we find סכיר ילק, 'rough caterpillars.' As a noun the word means 'nails,' 'sharp pointed spikes.' Hence Michaelis refers it to the rough sharp-pointed feet of some species of chafer (*ut supra*). Oedman takes it for the *G. cristatus* of Linn. Tychsen, with more probability, refers it to some rough or bristly species of locust, as the *G. hæmatopus* of Linn., whose thighs are ciliated with hairs. Many gryll are furnished with spines and bristles; the whole species *acheta*, also the *pupa* species of Linn., called by Degeer *locusta pupa spinosa*, which is thus described:—Thorax ciliated with spines, abdomen tuberculous and spinous, posterior thighs armed beneath with four spines or teeth; inhabits Ethiopia. The allusion in Jer. is to the ancient accoutrement of war-horses, bristling with sheaves of arrows.

9. סלעם *salam;* Lev. xi. 22, *ἀττάκη, atthacus*, 'the bald locust.' A Chaldee root is given by Bochart, סלעם, *to devour*. Another has been proposed, סלע, *a rock* or *stone*, and עלה, *to go up*. Hence the locust, which climbs up stones or rocks; but, as Bochart observes, no locust is known answering to this characteristic. Others give סלע, *a stone*, and עמם, *to hide under;* equally futile. Tychsen thinks the *G. Eversor* of Asso is meant.

10. צלצל *tzelatzal;* Deut. xxviii. 42, *ἐρύσιβη, rubigo*, locust. The root commonly assigned is צלל, *to sound;* hence, says Gesenius, a species of locust that makes a shrill noise. Dr. Lee says a *tree-cricket* that does so. Tychsen suggests the *G. stridulus* of Linn. The song of the grillo-talpa is sweet and loud. With *equal* certainty we might give the Chald. צלא, *to pray*, and thence infer the mantis religiosa, or Prier Dieu, so called from its singular attitude, and which is found in Palestine (Kitto's *Physical History*, p. 419). The words in the Sept. and Vulg. properly mean the mildew on corn, &c., and are there applied *metaphorically* to the ravages of locusts. This mildew was anciently believed by the heathens to be a divine chastisement; hence their religious ceremony called Rubigalia (Pliny, *Hist. Nat.* xviii. 29). The general references to locusts in the Scriptures are well collected by Jahn (*Bibl. Archæol.*, § 23). Some popular errors respecting them are, however, diligently retailed by others. It is well known that locusts live in a republic like ants. Mr. Horne says 'like bees and ants.' Agur, the son of Jakeh, correctly says, 'the locusts have no king.' But Mr. Horne gives them one (*Introduction*, &c., 1839, vol. iii. p. 76), and Dr. Harris, 'a leader whose motions they invariably observe' (*Nat. Hist. of the Bible*, Lond. 1825, art. 'Locust'). See this notion refuted by Kirby and Spence (vol. ii. p. 16), and even by Muffet (*Theat. Insect.* p. 122, Lond. 1634). It is also worthy of remark that no Hebrew root has ever been offered favouring this idea. Our translation (Nah. iii. 17) represents locusts, 'great grasshoppers,' as 'camping in the hedges in the cold day, but when the sun ariseth as fleeing away.' How the locust, גובי, is undoubtedly spoken of as a perfect insect, able to fly, and as it is well known that at *evening* the locusts descend from their flights and form camps for the night, may not the cold day mean the cold portion of the day, i. e. the night, so remarkable for its coldness in the East, the word יום being used here, as it often is, in a comprehensive sense, like the Gr. ἡμέρα and Lat. *dies?* And Gesenius suggests that גדרות, 'hedges,' should here be understood like the Gr. σίμβοι, shrubs, brushwood, &c.

As the result of the whole preceding analysis it would seem that several, if not all, of the Hebrew words denote as many species of locusts; that the roots of these words afford no safe clue to any re-

stance to the particular species intended; that the Sept. and Vulg. afford us assistance only where the definite renderings they give are elucidated by other writers; and that this elucidation goes no further than to render it probable that species and not states of the locust are denoted in such places. Take, for instance, the Sept. word ὀφιομάχης and the corresponding word *ophiomachus* in the Vulg. (Lev. xi. 22), which is one of the few instances of a definite rendering in either, being elucidated by any ancient author, and compare it with the references made by Aristotle (ix. 9) and by Pliny (xi. 29), to locusts fighting with serpents, as the Greek word would indicate, and 'killing them, biting them at the throat;' and even with the testimony of Simon Majolus's gardener (*Colloq.* viii. 123), who told his master that he had seen a locust thus occupied with a serpent; and 'to speak advisedly,' we must confess that in the present state of our knowledge the elucidation is not very clear or satisfactory. There is one instance of agreement between Moses and Aristotle not unworthy of notice. Moses evidently assigns but 'four feet' to locusts (Lev. vi. 22); so does Aristotle in the first instance, but afterwards remarks that they have six, if the parts with which they leap be counted, σὺν τοῖς ἁλτικοῖς μορίοις. Augustine remarks that Moses did not consider these as legs. The true solution appears to us to be, that Moses, and Aristotle also in the first instance, considers the two fore legs as hands and arms, and that Aristotle takes in the parts both *above* and below in the *hind* legs, and with these '*leaping parts*' makes out six (see also Kirby and Spence, vol. i. p. 23). Still it must be confessed with Bochart, that we know not sufficiently how the words *locusta*, *bruchus*, *attacus*, and *ophiomachus* differ from each other, and much less whether these words in Greek and Latin accurately corresponded to the Hebrew. The specific application of the several names was evidently all but lost in the time of the Septuagint translators, since they make no distinctions, and, rather from the want of ability than inclination, we may presume, apply ἀκρίς to four out of the ten names, βροῦχος to three, ἀττέλεβος to two, ἐρύσιβη to two, and all the first three of these Greek words to ארבה. It is doubtful whether they are correct in the only instance in which they observe uniformity of rendering, viz., κάμπη. Even where they have given definite renderings, how know we but that they have done here as Jerome says they have in other places, 'seemed to define this or that, rather because they would say something, than because they were sure of what they said?' (Hieron. *in Ez.* c. iii.) But Jerome has himself followed them in these passages for a similar reason. We must, then, admit, with Rabbi Selomo (apud Bochart), that we know not how to distinguish the several species. Bochart conjectures that till the time of John the Jews were able to do so, otherwise the Baptist, he urges, would not have known which to eat (Matt. iii. 4). But surely the definition alone in Lev. xi. 21 must have been a sufficient guide to him, as it would be now to a Jew. It is a wild speculation of the Jewish doctors, that whenever their nation shall be restored a prophet will be directed to point out by inspiration the creatures distinguished by the different names in their law; it is a speculation, however, originated by the confessed impenetrable obscurity of the general subject. It will be refreshing to the reader to turn from this dry and unsatisfactory, yet useful detail, to some proofs that locusts are not, as they have been commonly represented, wholly an evil; not altogether 'pestis iræ Deorum,' as Pliny calls them (xi. 29). When directed, indeed, by divine agency in enormous numbers and various species, as in the case of Egypt, their depredations might merit Mr. Horne's description as 'one of the most terrible scourges by which mankind can be afflicted' (*Introd.* vol. iii. p. 74, Lond. 1839). With regard to the description in Joel, it is considered by many learned writers as a figurative representation of the ravages of an invading 'army' of *human beings*, as in Rev. ix. 2-12, rather than a literal account, since such a devastation would hardly, they think, have escaped notice in the books of Kings and Chronicles. Accordingly some understand by the four species of locusts there mentioned, Salmaneser, Nebuchadnezzar, Antiochus, and the Romans. Theodoret explains them as the four Assyrian kings, Tiglathpileser, Salmaneser, Sennacherib, and Nebuchadnezzar; and Abarbanel, of the four kingdoms inimical to the Jews, viz. the Babylonians, Persians, Greeks, and Romans (Pococke's *Works*, vol. i. p. 214, &c., London, 1740; Rosenmüller, *Scholia in Joel*, c. i.). Locusts, like many other of the general provisions of nature, may occasion incidental and partial evil; but upon the whole they are an immense benefit to those portions of the world which they inhabit; and so connected is the chain of being that we may safely believe that the advantage is not confined to those regions. 'They clear the way for the renovation of vegetable productions which are in danger of being destroyed by the exuberance of some particular species, and are thus fulfilling the law of the Creator, that of all which he has made should nothing be lost. A region which has been choked up by shrubs and perennial plants and hard half-withered impalatable grasses, after having been laid bare by these scourges, soon appears in a far more beautiful dress, with new herbs, superb lilies, fresh annual grasses, and young and juicy shrubs of perennial kinds, affording delicious herbage for the wild cattle and game' (Sparman's *Voyage*, vol. i. p. 367). Meanwhile their excessive multiplication is repressed by numerous causes. Contrary to the order of nature with all other insects, the males are far more numerous than the females. It is believed that if they were equal in number they would in ten years annihilate the vegetable system. Besides all the creatures that feed upon them, rains are very destructive to their eggs, to the larvæ, pupæ, and perfect insect. When perfect, they always fly with the winds, and are therefore constantly being carried out to sea, and often ignorantly descend upon it as if upon land. Myriads are thus lost in the ocean every year, and become the food of fishes. On land they afford in all their several states sustenance to countless tribes of birds, beasts, reptiles, &c.; and if their office as the scavengers of nature, commissioned to remove all superfluous productions from the face of the earth, sometimes *incidentally* and as the operation of a general law, interferes with the labours of man, as do storms, tempests, &c., they have, from all antiquity to the present hour, afforded him an excellent supply till the land

acquires the benefit of their visitations, by yielding him in the meantime an agreeable, wholesome, and nutritious aliment. They are eaten as meat, are ground into flour, and made into bread. They are even an extensive article of commerce (Sparman's *Voyage*, vol. i. p. 367, &c.). Diodorus Siculus mentions a people of Ethiopia who were so fond of eating them that they were called Acridophagi, 'eaters of locusts' (xxiv. 3). Whole armies have been relieved by them when in danger of perishing (Porphyrius, *De Abstinentia Carnis*). We learn from Aristophanes and Aristotle that they were eaten by the inhabitants of Greece (Aristoph. *Acharnen.* 1116, 1117, ed. Dind.; Aristot. *Hist. Anim.* v. 30, where he speaks of them as delicacies). Their great flights occur only every fourth or fifth season. Those locusts which come in the first instance only fix on trees, and do not destroy grain: it is the young before they are able to fly which are chiefly injurious to the crops. Nor do all the species feed upon vegetables; one, comprehending many varieties, the truxalis, feeds upon insects. Latreille says the house-cricket will do so. 'Locusts,' remarks a very sensible tourist, 'seem to devour not so much from a ravenous appetite as from a rage for destroying.' Destruction, therefore, and not food, is the chief impulse of their devastations, and in this consists their utility; they are in fact omnivorous. The most poisonous plants are indifferent to them; they will prey even upon the crowfoot, whose causticity burns the very hides of beasts. They simply consume *everything* without predilection, vegetable matter, linen, woollen, silk, leather, &c.; and Pliny does not exaggerate when he says 'fores quoque tectorum,' 'and even the doors of houses' (xi. 29), for they have been known to consume the very varnish of furniture. They reduce everything indiscriminately to shreds, which become manure. It might serve to mitigate popular misapprehensions on the subject to consider what would have been the consequence if locusts had been carnivorous like wasps. All terrestrial beings, in such a case, not excluding man himself, would have become their victims. There are, no doubt, many things respecting them yet unknown to us which would still further justify the belief that this, like 'every' other 'work of God is good'—benevolent upon the whole (see Dillon's *Travels in Spain*, p. 256, &c. 4to. Lond. 1780). The best account of their cookery and domestic uses will be found in Kitto's *Physical History of Palestine*, p. 420: for the species whose existence in Palestine is *ascertained*, viz., G. domesticus, nasutus, gryllotalpa, migratorius, and falcatus, and for some beautiful and accurate cuts of locusts, see p. 419; and for an account of the locust-bird, Smurmur, which the Turks believe eats a thousand locusts in a day, pp. 410, 411. We subjoin a list of the principal writers on the Biblical locusts, of whom we may say with Bochart, 'Credimus? an qui amant ipsi sibi somnia fingunt!' Franciscus Stancarus, whom Mouffet records to have written on seven of the Biblical locusts; Faber, *De Locustis Biblicis*, 4to. Vitemb. 1710; Don Ignacio de Asso y Del Rio, *Abhandlung von den Heuschreken*, Rostock, 1787-8, to which is added sometimes in the same vol. Tychsen, *Comment. de Locustis*, in which he has collected all the Chaldaic, Syriac, and Arabic names for locusts, p. 47, &c.; Ludolphus, *Dissert. de Locustis*, Francof. 1694, and Ludol. *Hist. Æthiop.* Frankfort. ad Mænum, 1691; and *ad suam Hist. Æthiop. Comment.* fol. Frank. 1691. He maintains that the *quails* (Num. xi.) were locusts, as do the Jewish Arabs to this day. So does Patrick, in his *Comment. on Numbers*. Oedman, *Vermischte Sammlungen*, fasc. ii. c. vii.; partic. ii. pp. 91, 92. Bochart's *Hieroz.* à Rosenmuller. For general information, Kirby and Spence, *Introduction to Entomology*, vol. i. p. 215, &c., Lond. 1828; and the *Travels* of Russel, Tavernier, Hasselquist, Volney, Burckhardt, Clarke, &c. For the locusts of St. John, see Suicer, *Thesaurus Ecclesiasticus*, tom. i. pp. 169, 179; and Gutherr, *De Victu Johannis Baptist. in Desertis*, Franc. 1785. For the symbolical locusts (Rev. ix.), Newton, *On the Propheeies;* and Woodhouse, *On the Apocalypse*. Among the curiosities in this department is Norelii *Sehediasma de Avibus esu licitis, Arbeh, Solam, Chargol, et Chagab* (Lev. xi. 22), Upsal, 1746, in which the author endeavours to show that these words denote birds and not locusts.—J. F. D.

LOD. [Lydda.]

LOG. [Weights and Measures.]

LOGOS. It was in Egypt, that religion and philosophy came once more into the presence of each other after the lapse of so many ages; and whence they were once more to go forth on their divided, yet united, mission to the nations. We speak not of that forced union of doctrines and principles which was attempted in the Gnostic heresy, and which came so utterly to nothing that our knowledge of that heresy and its leaders is derived altogether from the report of its opponents; but of that real and sound accord between religion and philosophy, between the commands of God and the reason of man, which the Christian desires to make more and more manifest, even to the coming of the perfect day. The Gnostic heresy attempted a union between fanatical feeling and ascetic discipline—a union which too often ends in licentiousness, and which never can attain the sound principles and right practices which together constitute man's reasonable service. On the other hand, the opponents of Gnosticism have too often exhibited an unfairness, a rancour, and a calumny, which must have had the worst effects upon themselves, as it has greatly tended to prejudice their cause, and has left us the example of a spirit so unchristian that we regret to see it associated with a purer faith. In spite of such opponents as the Gnostics—advocates of an unsound religion united to an unsound philosophy—and in spite also of supporters who knew not what spirit they were of, Christianity has triumphed so completely over Gnosticism as to leave of that great heresy little more than the name. Yet are the few and scattered memorials of Gnosticism not without instruction, whether we examine them critically in all fairness, for the purpose of separating the good from the evil, or whether we trace them historically to their sources, or onward to their effects.

In our article on Gnosticism, of which this is a sequel, we have given a brief and clear account, in the words of Professor Burton,—first, of the great leading doctrines of all the Gnostic sects; secondly, of the three principal sources from which Gnosticism was derived; and thirdly, of

the effects produced by the Gnostic heresy on the progress of Christianity, during the time which elapsed between the conversion of St. Paul, and his first preaching to the Gentiles. Before we return to the latter subject, which will be found closely connected with Professor Burton's view of the Logos in St. John's Gospel, we propose to examine a little farther into the merits of that philosophy of Plato, which he considers the immediate, if not the original, cause of the Gnostic heresy. The original cause of that heresy, more ancient even than the theosophy of Babylon, must be sought in the mixed good and evil principles of human nature, which have so often led to folly in opinion, as well as to crime in conduct. But the immediate cause of Gnosticism may certainly be traced to types and shadows in the philosophy of Plato; and we consider Professor Burton to have done a valuable service to the cause of religion and philosophy, in directing the attention of the critic, as well as of the historian, to this source of information.

It would appear that some writers have a sort of dread of the philosophy of Plato, and labour rather disingenuously to fix upon all his writings the character of obscurity and mysticism, from which many of them are altogether free. Others, on the contrary, profess great admiration of his sublime doctrines and pure morality, and speak of him as a sort of herald of Christianity; and, strange to say, ground their admiration of him on some of his most questionable works. It is in these works that we trace the immediate causes of the corruption which the Gnostic heresy attempted to introduce into Christianity,—mysticism, asceticism, and licentiousness; from all which, in spite of that attempt, the Christian religion is so eminently free. Plato, as a writer, at least in many of his works, cannot be spoken of too highly; but Plato, as a philosopher, independently of what he reports of the conversation and teaching of Socrates, appears to us to have been estimated far beyond his deserts. The unsoundness of that which may justly be considered the philosophy of Plato, may be tested by the downward course of the philosophical schools and religious sects which proceeded from that philosophy in Alexandria. It is in this sense that the study of Plato's philosophy may be most profitable to the critic and historian, the moralist and divine; and by which the contrast between Gnosticism and Christianity, in principles as well as in effects, may be made most manifest. And in our estimate of Plato, we would judge him by his own words, before we presume to make him answerable for the mischievous consequences into which his disciples followed out his errors. In like manner, we would not judge of Gnosticism by the unjust and rancorous reports of some of its opponents; but by the fairer views of the lives and doctrines of its professors, which have in many cases been established by the keen and searching criticisms of Beausobre. Indeed, it is hardly possible to overrate the advantage of having, in Professor Burton, a fair arbiter between the parties—between the Gnostics and the Fathers on the one hand, and between Plato and the Gnostics on the other hand.

We have not space here for such an examination of the philosophy of Plato as the largeness and complication of the subject demand. This is the less necessary, however, because the English reader will find in Dr. Enfield's abridgment of Brucker's *Hist. of Philosophy*, a very sound, learned, and intelligible view of Plato's opinions, should he wish to know more of them than is contained in Professor Burton's work. But if we were required to bring the inquiry to a clear issue, and in brief space, we should say that in the fifth book of the *Republic* of Plato may be seen that unsound union of religious mysticism with moral licentiousness, closely connected in other parts of his philosophy with opinions tending to asceticism, which the Professor has shown to have been strangely, but by no means unnaturally, united in the theory and practice of many of the Gnostics, and which union is as much opposed to sound philosophy as to sound religion. The divine and moralist must not shrink from testing Plato's philosophy (for these theories are in manifest disagreement with the practical piety and sound morality of Socrates, and unquestionably cannot be referred to him) by the contents of this celebrated book, in which a system of the most unrestrained indulgence of the sensual appetites is set forth as the completion of politics and the perfection of philosophy; and in strange connection with this immoral plan are exhibited pretensions to a divine knowledge of the most mystic character, which, both in this book and in other works of Plato, is set forth as the elevator and purifier of human nature, just as the gnosis of Gnosticism was set forth at a later period. Here and elsewhere Plato speaks of matter as so altogether incapable of good, from its weakness rather than its malignity, as to thwart the benevolent intentions of the Deity to promote human virtue and human happiness; and, on the other hand, he sets forth intellect as only requiring to be separated from matter in order to be perfect; and in close connection with these views of mind and body, he speaks of a mystic knowledge of the divine nature able to purify and elevate the mind by its intense contemplation, and, in the end, to free it from its corporeal prison-house. It is in the first part of the fifth book of the *Republic* that the affections and duties of husband and wife, parent and child, brothers and sisters, are sacrificed to a system of concubinage, as absurd in the arguments by which it is supported as it would be ruinous to domestic happiness and national character in its consequences; and it is at the close of this very book that there is brought forward in the swelling language of mysticism a secret, and sublime, and a scarcely intelligible gnosis, which is to purify and elevate the intellect whilst the body is, as we have seen, placed in a moral and political system of wide and deep sensualism. These are the deliberate opinions of Plato, put forth in one of the latest, most highly finished, and most closely compacted of his works, and again deliberately confirmed in a subsequent work of still higher pretension. Now, it was to Plato, the mystical propounder of a divine gnosis, that the Gnostic sects gave ear; and whilst some devoted themselves to this divine contemplation, even to the maceration and mortification of the body, others were not wanting who thought such ideal and spiritual purity might render the service of the poor and despised body altogether unnecessary. How unlike is all this to the sound principles and strong sense, the rational piety and wholesome self-com-

mand of Christianity! It is the boast of the Christian religion that not its least pure worship is by the domestic hearth, and that marriage is the most honoured of all institutions by its founder, from Cana of Galilee, where the sign of water turned to wine teaches that a healthful purity must be the foundation of domestic happiness, to the mystic union of Christ with his church, applying the nearest and dearest of ties to express the connection between man and his master and teacher and great exemplar. In the Christian commonwealth woman is neither the poor slave of the harem, nor the spoilt child of Feudalism, nor yet the Aspasia of Plato's *Republic*, but the help meet for man, appointed to aid in working out the highest destinies of our race, beginning, not in the gymnasia or syssitia of Plato, but in the home of our affections, where must be born, bred, and educated a race strong in body, firm in mind, and stedfast in principle. It is plain that of these great domestic and national objects the system of Plato would be utterly destructive, tending to concubinage instead of marriage, fanaticism instead of piety, and asceticism instead of self-command. And as the licentiousness of Plato, and of some of his Gnostic followers, is in direct opposition to the precepts and practice of Christ and his disciples, so there is not a word in the New Testament that would warrant divine contemplation being substituted for holiness of life, whether that contemplation consisted in endless genealogies of divine emanations, or in mystic reveries on the divine perfections; even though these were accompanied with a voluntary humility in the worshipping of angels, or in fasting and prayer more rigidly ceremonial than those of the Pharisee. Those who feel themselves in danger of being mastered by some strong passion will do well to call to their aid such means, whether of prayer or fasting, as may enable them to overcome the temptation. But this use of a sound means to a good end, and under extraordinary circumstances, of which the individual can be and ought to be the only judge, is very different from the yoke of an ascetic discipline, whether it be dictated by a fanaticism which aims at something unsuited to our nature, or by that hard task-master, a spiritual tyranny. If the mystical ideas of Plato are fairly compared, on the one hand, with the plain Evidences of the Being, Power, Wisdom, and Goodness of God, as set forth by Socrates in the *Memorabilia* of Xenophon, and, on the other hand, with the clear definitions of Species, Genus, Differentia, Property, and Accident, as laid down by Aristotle in his *Works on Logical Analysis*, it will be seen that little was gained to religion or to philosophy by a theory, which certainly diverted men's minds from the right direction into which Socrates had turned them, both in philosophy and religion. Socrates had ascended step by step, by a process of logical reasoning, from matter to spirit, from the world to its Creator; and had arrived by that process at the sound conclusion, that such unity of design demonstrates the oneness of the designer. Plato, on the other hand, descends, as it were, in the theatrical machine of the *Timæus*, from heaven to earth, bringing with him the fruits of his great master's philosophy, under the fanciful disguise of a mythological mysticism. This purely imaginative statement of Plato might be more imposing to some minds, and more adapted to the perverted tastes of some periods, than the sound, rational statements of Socrates; more especially when these dogmas of Plato came to be exhibited at one time as a political remedy in the *Republic*, at another as metaphysical abstraction in the *Parmenides*, now in the mythological form of the *Timæus*, and now as the foundation of asceticism in the *Phædon*. The sound philosophical reasoning of Socrates receives a constantly increasing evidence from every fresh discovery in the physical and moral sciences; whilst the ideal types of Plato are sickly exotics which cannot be revived—personified ideas in religion, and extracted essences in philosophy.

Professor Burton's lectures, to which, as containing his remarks on the *Logos* of St. John's Gospel, and on its connection with Gnosticism, we must now return, will supply many texts from the New Testament clearly directed against the religious and moral errors of the Gnostic sects, and which cannot be rightly understood, unless this is constantly borne in mind. The following passages give a summary of this part of the Professor's work:—

'I pointed out in my first lecture the importance of the fact, that nearly fifteen years elapsed between our Saviour's death and St. Paul's first apostolical journey. During the greater part of this period, Simon Magus and his followers were spreading their doctrines; and I have shown that Christ, as one of the Æons, held a conspicuous place in their theological system. There is reason therefore to suppose that in many countries, before they were visited by an apostle, the name of Christ was introduced in a corruption of the Platonic doctrines.' Applying the same important remark to the later period when St. John's Gospel is supposed to have been written, Professor Burton adds:—'St. John was as far as possible from being the first to apply the term *Logos* to Christ. I suppose him to have found it so universally applied, that he did not attempt to stop the current of popular language, but only kept it to its proper channel, and guarded it from extraneous corruptions.' In these few words we have a brief statement of Professor Burton's theory respecting the *first use* of the term Logos by the Christian converts, and its *subsequent adoption* into the Gospel of St. John. In other parts of Professor Burton's work he shows how often the misuse of the term Logos, amongst other Gnostic errors, is referred to in the Epistles, and how many texts in the New Testament have a primary reference to the Gnostic Heresy. Professor Burton's theory respecting the first use of the term Logos is supported with great learning and moderation, and appears to us to tend equally to truth, faith, and charity. Professor Burton considers the term Logos to have been borrowed by the first Christian converts from the Gnostics, and to have been applied by them to Christ, and that it is one of the peculiar objects of St. John's Gospel to show *in what sense* the term Logos can be applied properly to Christ. As the latter part of the inquiry respects some of the chief ends and objects of Christianity, in so far as Christ is set forth by St. John as the Word of God, it is our intention to return to this part of the subject in an article under that title.

The errors of the Gnostics, intellectual, religious and moral, are rooted in human nature; and to

guard against those corruptions is to guard against the evil tendencies of our own natures. But before we can clearly understand the application of such lessons as are contained in the Scriptures to ourselves, we must understand clearly their more immediate application to the errors against which they were first directed. Doubtless there is an *absolute* meaning in each of the texts quoted by Dr. Burton, which is as true now as it was true then; but in order to get at this absolute meaning, we must attend closely to the *relative* meaning of the text, as it applied to the opinions, practices, and persons against whom it was primarily directed. The truth of this remark, when fairly stated and considered, is equally obvious and important; yet it is too commonly neglected, and hence great mistakes, and, we may add, great dangers have arisen, not only to individual Christians, but to Christian societies, and to Christianity itself. To use the strong language of Scripture, and which is itself an instance of the importance of calling in history to aid the labour of criticism, men wrest texts to their own condemnation, and still more frequently to the condemnation of others, the force of which might be wisely and charitably modified by ascertaining their original relative application. Through the neglect of this many are made enemies, and the love of many waxeth cold. Professor Burton was too stanch a Protestant to be suspected of any leaning towards Rome; but he has had the honest boldness to show that some texts have been applied prophetically to the Romanist, which had a direct historical application to the Gnostic, and could only be applied to the Romanist (and then as a reproof, and not as a prophecy), in so far as the Romanist of that day shared in the errors of the Gnostic at an earlier period. To neglect this plain and obvious caution has a tendency to fasten upon Christianity a narrow, harsh, and sectarian spirit, from which it is, in itself, eminently free; and also tends more than any other thing to obscure that real accord between sound religion and sound philosophy, which, as we have before said, the Christian desires to make more and more manifest, even to the coming of the perfect day.—J. P. P.

LOIS (Λωΐς), the grandmother of Timothy, not by the side of his father, who was a Greek, but by that of his mother. Hence the Syriac has 'thy mother's mother.' She is commended by St. Paul for her faith (2 Tim. i. 5); for although she might not have known that the Christ was come, and that Jesus of Nazareth was he, she yet believed in the Messiah to come, and died in that faith.

LONGEVITY. Longevity is a compound of two Latin words, and signifies *prolongation of life*. The lengthened ages of some of the ante and post-diluvian fathers, as given by Moses in the Hebrew text, are as follows:—

		Years.
Adam	Gen. v. 5	930
Seth	„ 8	912
Enos	„ 11	905
Cainan	„ 14	910
Mahalaleel	„ 17	895
Jared	„ 20	962
Enoch	„ 23	365
Methuselah	„ 27	969
Lamech	„ 31	777
Noah	„ ix. 29	950
Shem	Gen. xi. 10, 11	600
Arphaxad	„ 12, 13	438
Salah	„ 14, 15	433
Eber	„ 16, 17	464
Peleg	„ 18, 19	239
Reu	„ 20, 21	239
Serug	„ 22, 23	230
Nahor	„ 24, 25	148
Terah	„ 32	205
Abraham	„ xxv. 7	175

Infidelity has not failed, in various ages, to attack revelation on the score of the supposed absurdity of assigning to any class of men this lengthened term of existence. In reference to this Josephus (*Antiq.* lib. iii.) remarks:—'Let no one upon comparing the lives of the ancients with our lives, and with the few years which we now live, think that what we say of them is false; or make the shortness of our lives at present an argument that neither did they attain to so long a duration of life.' When we consider the compensating process which is going on, the marvel is that the human frame should not last longer than it does. Some, however, have supposed that the years above named are *lunar*, consisting of about thirty days; but this supposition, with a view to reduce the lives of the antediluvians to our standard, is replete with difficulties. At this rate the whole time, from the creation of man to the Flood, would not be more than about 140 years; and Methuselah himself would not have attained to the age which many even now do, whilst many must have had children when mere infants! Besides, if we compute the age of the post-diluvians by this mode of calculation—and why should we not?—we shall find that Abraham, who is said to have died in *a good old* age (Gen. xxv. 8) could not have been more than *fifteen years* old! Moses must therefore have meant *solar*, not *lunar* years—not, however, exactly so long as ours, for the ancients generally reckoned twelve months, of thirty days each, to the year. 'Nor is there,' observes St. Augustine (*De Civ. Dei*, xv. 12), 'any care to be given unto those who think that one of our ordinary years would make *ten* of the years of these times, being so short; and therefore, say they, 900 years of theirs are 90 of ours—their 10 is our 1 and their 100 our 10. Thus think they, that Adam was but 20 years old when he begat Seth, and he but 20½ when he begat Enos, whom the Scriptures call (the Sept. ver.) 205 years. For, as these men hold, the Scripture divided one year into ten parts, calling each part a year; and each part had a six-fold quadrate, because in six days God made the world. Now 6 times 6 is 36, which multiplied by 10 makes 360—*i. e.* twelve lunar months.' Abarbanel, in his *Comment. on Gen.* v., states that some, professing Christianity, had fallen into the same mistake, viz. that Moses meant *lunar*, and not *solar* years. Ecclesiastical history does not inform us of this fact, except it be to it that Lactantius refers (ii. 12) when he speaks of one Varro:—'The life of man, though temporary, was yet extended to 1000 years; of this Varro is so ignorant that, though known to all from the sacred writings, he would argue that the 1000 years of Moses were, according to the Egyptian mode of calculation, only 1000 months!'

That the ancients computed time differently we learn from Pliny (*Hist. Nat.* vii.), and also

from Scaliger (*De Emend. Temporum*, i.): still this does not alter the case as above stated (see Heideggerus, *De Anno Patriarcharum*).

But it is asked, if Moses meant solar years, how came it to pass that the patriarchs did not begin to beget children at an earlier period than they are reported to have done? Seth was 105 years old, on the lowest calculation, when he begat Enos; and Methuselah 187 when Lamech was born! St. Augustine (i. 15) explains this difficulty in a two-fold manner, by supposing

1. Either that the age of puberty was later in proportion as the lives of the ante-diluvians were longer than ours; or

2. That Moses does not record the first-born sons, but as the order of the genealogy required, his object being to trace the succession from Adam, through Seth, to Abraham. The learned Heideggerus (*De Ætate Ante-Diluv.*) thus confirms this latter view: 'Consilium fuit Mosi, uti cuilibet confectu proclive est, Noæ et Abrahami genealogiam pertexere, tum quia illi duo inter cæteros fide et pietate eminebant et uterque divinitus insigni donatus est prærogativa.'

Whilst the Jews have never questioned the longevity assigned by Moses to the patriarchs, they have yet disputed, in many instances, as to whether it was common to all men who lived up to the period when human life was contracted. Maimonides (*More Nevochim*, ii. 47) says—

'Longævitatem hanc non fuisse nisi quorundam singularium commemoratorum in lege; reliquos illorum seculorum annos attigisse non plures, quam hodie adhuc communiter fieri solet.'

With this opinion Abarbanel, on Gen. v., agrees; Nachmanides, however, rejects it, and shows that the life of the descendants of Cain must have been quite as long as that of the Sethites, though not noticed by Moses; for only seven individuals of the former filled up the space which intervened between the death of Abel and the Flood, whereas ten of the latter are enumerated. We have reason then to conclude, that longevity was not confined to any peculiar tribe of the ante or post-diluvian fathers, but was vouchsafed, in general, to all. Irenæus (*Adversus Hæret.* v.) informs us that some supposed that the fact of its being recorded that no one of the ante-diluvians named attained the age of 1000 years, was the fulfilment of the declaration (Gen. iii.), 'in the day thou eatest thereof thou shalt surely die;' grounding the opinion, or rather conceit, upon Ps. xc. 4, namely, that God's day is 1000 years.

As to the probable reasons why God so prolonged the life of man in the earlier ages of the world, and as to the subordinate means by which this might have been accomplished, Josephus says (*Antiq.* i. 3): 'For those ancients were beloved of God, and lately made by God himself; and because their food was then fitter for the prolongation of life, they might well live so great a number of years: and because God afforded them a longer time of life on account of their virtue and the good use they made of it in astronomical and geometrical discoveries, which would not have afforded the time for foretelling the periods of the stars unless they had lived 600 years; for the great year is completed in that interval.' To this he adds the testimony of many celebrated profane historians, who affirm that the ancients lived 1000 years.

In the above passage Josephus enumerates *four* causes of the longevity of the earlier patriarchs. As to the first, viz., their being dearer to God than other men, it is plain that it cannot be maintained; for the profligate descendants of Cain were equally long-lived, as mentioned above, with others. Neither can we agree in the second reason he assigns; because we find that Noah and others, though born so long subsequently to the creation of Adam, yet lived to as great an age, some of them to a greater age than he did. If, again, it were right to attribute longevity to the superior quality of the food of the ante-diluvians, then the seasons, on which this depends, must, about Moses's time—for it was *then* that the term of human existence was reduced to its present standard—have assumed a fixed character. But no change at that time took place in the revolution of the heavenly bodies, by which the seasons of heat, cold, &c. are regulated: hence we must not assume that it was the nature of the fruits they ate which caused longevity. How far the ante-diluvians had advanced in scientific research generally, and in astronomical discovery particularly, we are not informed; nor can we place any dependence upon what Josephus says about the two inscribed pillars which remained from the old world (see *Antiq.* i. 2. 9). We are not, therefore, able to determine, with any confidence, that God permitted the earlier generations of man to live so long, in order that they might arrive at a high degree of mental excellence. From the *brief* notices which the Scriptures afford of the character and habits of the ante-diluvians, we should rather infer that they had not advanced very far in discoveries in natural and experimental philosophy (see ANTE-DILUVIANS). We must suppose that they did not reduce their language to alphabetical order; nor was it necessary to do so at a time when human life was so prolonged, that the tradition of the creation passed through only two hands to Noah. It would seem that the book ascribed to Enoch is a work of post-diluvian origin (see Jurieu, *Crit. Hist.*, i. 41). Possibly a want of mental employment, together with the labour they endured ere they were able to extract from the earth the necessaries of life, might have been some of the proximate causes of that degeneracy which led God in judgment to destroy the old world. If the ante-diluvians began to bear children at the age on an average of 100, and if they ceased to do so at 600 years (see Shuckford's *Connect.*, i. 36), the world might then have been far more densely populated than it is now. Supposing, moreover, that the earth was no more productive antecedently than it was subsequently to the flood; and that the ante-diluvian fathers were ignorant of those mechanical arts which so much abridge human labour now, we can easily understand how difficult they must have found it to secure for themselves the common necessaries of life, and this the more so if animal food was not allowed them. The prolonged life, then, of the generations before the flood, would seem to have been rather an *evil* than a blessing, leading as it did to the too rapid peopling of the earth. We can readily conceive how this might conduce to that awful state of things expressed in the words, 'And the whole earth was filled with violence.' In the absence of any well regulated system of government, we can

imagine what evils must have arisen: the unprincipled would oppress the weak, the crafty would outwit the unsuspecting, and, not having the fear of God before their eyes, destruction and misery would be in their ways. Still we must admire the providence of God in the longevity of man immediately after the creation and the flood. After the creation, when the world was to be peopled by one man and one woman, the age of the greatest part of those on record was 900 and upwards. But after the flood, when there were three couples to re-people the earth, none of the patriarchs, except Shem, reached the age of 500; and only the three first of his line, viz., Arphaxad, Selah, and Eber, came near that age, which was in the first century after the Flood. In the second century we do not find that any attained the age of 240; and in the third century (about the latter end of which Abraham was born), none, except Terah, arrived at 200; by which time the world was so well peopled, that they had built cities, and were formed into distinct nations under their respective kings (See Gen. xv.; see also Usher and Petavius on the increase of mankind in the three first centuries after the flood).

That the common age of man has been the same in all times since the world was peopled, is manifest from profane as well as sacred history. Plato lived to the age of 81, and was accounted an old man; and those whom Pliny reckons up (vii. 48) as rare examples of long life, may, for the most part, be equalled in modern times. We cannot, then, but see the hand of God in the proportion that there is between births and deaths; for by this means the population of the world is kept up. If the fixed standard of human life were that of Methuselah's age, or even that of Abraham's, the world would soon be overstocked; or if the age of man were limited to that of divers other animals, to 10, 20, or 30 years only, the decay of mankind would then be too fast. But on the present scale the balance is nearly even, and life and death keep an equal pace! In thus maintaining throughout all ages and places these proportions of mankind, and all other creatures, God declares himself to be indeed the ruler of the world. We may, then, conclude in the language of the Psalmist (Ps. civ. 29, 30), 'Thou hidest thy face, all creatures are troubled; thou takest away their breath, they die and return to their dust. Thou sendest forth thy spirit, they are created; and thou renewest the face of the earth.'—J. W. D.

LOOKING-GLASSES [Mirrors].

LORD, a Saxon word signifying ruler or governor. In its original form it is *hlaford* (hlaford), which, by dropping the aspiration, became *laford*, and afterwards, by contraction, *lord*. In the authorized translation of the Scriptures it is used without much discrimination for all the names applied to God; which cannot be helped, as our language does not afford the same number of distinguishing titles as the Hebrew. When, however, the word represents the dread name of Jehovah, it is printed in small capitals, Lord, and is by this contrivance made a distinguishing term. Having already explained the different names of God which the term Lord is made to represent, namely, Adonai, Elohim, Jehovah (see also God), no further statement on the subject is here necessary. It also, however, represents the Greek Κύριος, which, indeed, is used in much the same way and in the same sense as *Lord*. It is from κῦρος, authority, and signifies 'master' or 'possessor.' In the Septuagint this, like Lord in our version, is invariably used for 'Jehovah' and 'Adonai;' while Θεός, like God in our translation, is generally reserved to represent the Hebrew 'Elohim.' Κύριος in the original of the Greek Testament, and *Lord* in our version of it, are used much in the same manner as in the Septuagint; and so also is the corresponding title, *Dominus*, in the Latin versions. As the Hebrew name Jehovah is one never used with reference to any but the Almighty, it is to be regretted that the Septuagint, imitated by our own and other versions, has represented it by a word which is *also* used for the Hebrew 'Adonai,' which *is* applied not only to God, but, like our 'Lord,' to creatures also, as to angels (Gen. xix. 2; Dan. x. 16, 17), to men in authority (Gen. xlii. 30, 33), and to proprietors, owners, masters (Gen. xlv. 8). In the New Testament Κύριος, representing 'Adonai,' and both represented by *Lord*, the last, or human application of the term, is frequent. In fact, the leading idea of the Hebrew, the Greek, and the English words, is that of an owner or proprietor, whether God or man; and it occurs in the inferior application with great frequency in the New Testament. This application is either literal or complimentary: *literal*, when the party is really an owner or master, as in Matt. x. 24; xx. 8; xxi. 40; Acts xvi. 16, 19; Gal. iv. 1, &c.; or when he is so as having absolute authority over another (Matt. ix. 38; Luke x. 2), or as being a supreme lord or sovereign (Acts xxv. 26); and *complimentary*, when used as a title of address, especially to superiors, like the English *Master, Sir;* the French *Sieur, Monsieur;* the German *Herr*, &c., as in Matt. xiii. 27; xxi. 20; Mark vii. 8; Luke ix. 54.

It cannot but be deemed desirable that, instead of the extensive use of the word *Lord* which we have described, discriminating terms should be adopted in translations. Apart from the Jewish superstitions which influenced the Seventy in their translation, there can be no good reason why the name Jehovah should not be retained wherever it occurs in the Hebrew. Then Lord might represent *Adonai;* or perhaps Sir, or Master, might be used when that word is applied to creatures; and God would very properly represent *Elohim*.

LORD'S DAY. The expression so rendered in the Authorized English Version (ἐν τῇ κυριακῇ ἡμέρᾳ) occurs only once in the New Testament, viz. in Rev. i. 10, and is there unaccompanied by any other words tending to explain its meaning. It is, however, well known that the same phrase was, in after ages of the Christian church, used to signify the first day of the week, on which the resurrection of Christ was commemorated. Hence it has been inferred that the same name was given to that day during the time of the apostles, and was in the present instance used by St. John in this sense, as referring to an institution well known, and therefore requiring no explanation.

Others, however, have held that it means simply 'the day of the Lord,' the substantive being merely exchanged for the adjective, as in 1 Cor. xi. 20, κυριακὸν δεῖπνον, 'the Lord's Supper;'

which would make it merely synonymous with ἡ ἡμέρα κυρίου, 'the day of the Lord' (1 Thes. v. 2). Such a use of the adjective became extremely common in the following ages, as we have repeatedly in the fathers the corresponding expressions, Dominicæ crucis, 'the Lord's cross,' Dominicæ nativitatis, 'the Lord's nativity' (Tertullian, *De Idol.* 5); λογίων κυριακῶν (Euseb. *Hist. Eccles.* iii. 9). According to their view the passage would mean, 'In the spirit I was present at the day of the Lord,' the word 'day' being used for any signal manifestation (possibly in allusion to Joel ii. 31), as in John viii. 56, 'Abraham rejoiced to see my day.' And the peculiar use of the word ἡμέρα, as referring to a period of ascendancy, appears remarkably in 1 Cor. iv. 3, where ἀνθρωπίνης ἡμέρας is rendered 'man's judgment.'

But upon the whole, the former interpretation is perhaps the most probable. Without, however, here pursuing further the question of the *name* (to which we shall afterwards recur), let us examine more closely the evidence for the actual *institution*. This, as far as the New Testament records go, is, in fact, very scanty.

We must class with very visionary interpreters those who can see anything really bearing on the question, in the circumstance of our Lord's reappearance on the eighth day after his resurrection (John xx. 26), or in the disciples being then assembled, when we know that they were all along abiding together in concealment for fear of the Jews. Nor, again, will their being in like manner together (Acts ii. 1) on the Feast of Pentecost appear remarkable, on the same grounds, even supposing the computation admitted which makes it fall on a Sunday; which depends on whether the fifty days were reckoned from the Sabbath of the Passover *inclusive* or not, on which difference of opinion has existed. Indeed, on any ground we could hardly look for any settled institution of this kind, till the Christian church had been actually in some degree organized, as it only was after the effusion of the Holy Spirit.

We find that immediately after that great event, the disciples met together *daily* for prayer and communion (Acts ii. 46); and this practice has been supposed by some to be implied, at a later period, in the expressions used in 1 Cor. xi. 21.

But on *one* occasion afterwards, we have it specially recorded, that they 'came together on the first day of the week to break bread' (Acts xx. 7), when 'Paul preached unto them, and continued his speech till midnight.' It has from this last circumstance been inferred by some that the assembly commenced after sunset on the Sabbath, at which hour the first day of the week had commenced, according to the Jewish reckoning (Jahn's *Bibl. Antiq.* § 398), which would hardly agree with the idea of a commemoration of the resurrection.

But further, the words of this passage, Ἐν δὲ τῇ μιᾷ τῶν σαββάτων, συνηγμένων τῶν μαθητῶν τοῦ κλάσαι ἄρτον..... have been by some considered to imply that such a weekly observance was then the *established custom;* yet it is obvious that the mode of expression would be just as applicable if they had been in the practice of assembling *daily*.

The regulation addressed to the church of Corinth (1 Cor. xvi. 2) with respect to charitable contributions 'on the first day of the week,' is not connected with any *mention* of public worship or assemblies on that day. Yet this has been inferred: and the regulation has been supposed to have a reference to the tenets of the Jewish converts, who considered it unlawful to touch money on the Sabbath (Vitringa, *De Synagogâ*, translated by Bernard, pp. 75-167). In consideration for them, therefore, the apostle directs the collection to be made on the following day, on which secular business was lawful; or, as Cocceius observes, they regarded the day 'non ut festum, sed ut ἐργάσιμον,' 'not as a feast, but as a working day' (Vitringa, p. 77). Again, the phrase μία τῶν σαββάτων is generally understood to be, according to the Jewish mode of naming the days of the week, the common expression for the first day. Yet it has been differently construed by some, who render it 'upon *one of the days* of the week' (*Tracts for the Times*, ii. 1. 16).

Thus far, then, we cannot say that the evidence for *any particular observance* of this day amounts to much; still less does it appear what *purpose* or object was referred to. We find no *mention* of any *commemoration*, whether of the resurrection or any other event *in the Apostolic records*.

On these points we have no distinct testimony till a later period. The earliest, or apostolic fathers, make no mention whatever of such an institution, unless we except one passage to which we shall presently refer, but which is at most a mere allusion.

The well-known letter of Pliny to Trajan (about A.D. 100) mentions the Christians assembling together for worship on *a stated day:* 'Soliti stato die ante lucem convenire carmenque Christo quasi Deo dicere,'—'They are accustomed to assemble on a stated day before light, and sing a hymn to Christ as a God' (*Epist.* x. 97).

But it is not till the time of Justin Martyr (A.D. 140) that we find a distinct account of the observance. His statement is clear and circumstantial, to the effect that the Christians were in the practice of assembling for public worship on the first day of the week, as being that on which the work of Creation was commenced, and on which Christ rose from the dead:—Τὴν δὲ τοῦ ἡλίου ἡμέραν κοινῇ πάντες τὴν συνέλευσιν ποιούμεθα, ἐπειδὴ πρώτη ἐστὶν ἡμέρα, ἐν ᾗ ὁ Θεὸς τὸ σκότος, καὶ τὴν ὕλην τρέψας κόσμον ἐποίησε, καὶ ὁ Ἰησοῦς Χριστὸς ὁ ἡμέτερος Σωτὴρ τῇ αὐτῇ τῇ ἡμέρᾳ ἐκ νεκρῶν ἀνέστη:'—'On Sunday we all assemble in common, since that is the first day, on which God, having changed darkness and chaos, made the world, and on the same day our Saviour Jesus Christ rose from the dead' (Justin Mart. *Apol.* i. 67).

In the so-called Epistle of Barnabas, probably a forgery of the second century [BARNABAS], the first day of the week is spoken of as observed with rejoicing in memory of the resurrection:—Ἄγομεν τὴν ἡμέραν τὴν ὀγδόην εἰς εὐφροσύνην ἐν ᾗ καὶ ὁ Ἰησους ἀνέστη ἐκ νεκρῶν:—'We keep the eighth day with joy, on which also Jesus rose from the dead' (Barnab. *Ep.* i. 15).

The earliest authentic instance in which the name of 'the Lord's day' is applied (after the passage in the Apocalypse), is not till A.D. 200, when Tertullian speaks of it as 'die Dominico resurrexionis' (*De Orat.* § 23); again, 'Domini-

cum diem' (*De Idol.* 14); and Dionysius of Corinth (probably somewhat later), as '*ἡμέραν κυριακήν*' (quoted by Euseb. *Hist. Eccles.* iv. 23).

Thus far, also, nothing has appeared relative to any observance of the day beyond that of holding assemblies for religious worship, and a festal commemoration of the resurrection and the beginning of the creation.

But in these last cited writers we trace the commencement of a more formal observance. Thus the whole passage in Tertullian is:—'Solo die Dominico resurrexionis non ab isto tantum (genuflexione), sed enim anxietatis habitu et officio cavere debemus, differentes etiam negotio ne quem diabolo locum demus,'—'On the day of the Lord's resurrection alone we ought to abstain not only from kneeling, but from all devotion to care and anxiety, putting off even business, lest we should give place to the devil;' and that of Dionysius, '*Τὴν σήμερον οὖν κυριακὴν ἁγίαν ἡμέραν διηγάγομεν*,'—'We keep the Lord's day holy;' and at dates later than this we find increasing indications of the same spirit, as appears from Clemens Alexandrinus (*Strom.* vii. p. 744), Hilary, Augustine, and other authorities, of which a large number will be found in Bishop Pearson *On the Creed*, and Notes (vol. ii. p. 341, ed. Oxford).

But we must here notice one other passage of earlier date than any of these, which has often been referred to as bearing on the subject of the Lord's day, though it certainly *contains* no mention of it. It occurs in the Epistle of Ignatius to the Magnesians (about A.D. 100). The whole passage is confessedly obscure, and the text may be corrupt. It has, however, been understood in a totally different sense, and as referring to a distinct subject; and such we confess appears to us to be the most obvious and natural construction of it.

The passage is as follows:—'*Εἰ οὖν οἱ ἐν παλαιοῖς πράγμασιν ἀναστραφέντες, εἰς καινότητα ἐλπίδος ἦλθον—μηκέτι σαββατίζοντες, ἀλλὰ κατὰ κυριακὴν ζωὴν ζῶντες—(ἐν ᾗ καὶ ἡ ζωὴ ἡμῶν ἀνέτειλεν δι' αὐτοῦ, καὶ τοῦ θανάτου αὐτοῦ [ὅν τινες ἀρνοῦνται], δι' οὗ μυστηρίου ἐλάβομεν . . . . &c.), πῶς ἡμεῖς δυνησόμεθα ζῆσαι χωρὶς αὐτοῦ; . . . .*,' &c. (Ignatius, *ad Magnesios*, § ix.; Jacobson's *Patres Apost.* ii. 322. Oxford, 1840).

Now many commentators assume (on what ground does not appear), that after *κυριακὴν* the word *ἡμέραν* is to be understood. On this hypothesis they endeavour to make the rest of the sentence accord with a reference to the observance of the Lord's day, by further supposing *ἐν ᾗ* to refer to *ἡμέρα* understood, and the whole to be put in contrast with *σαββατίζοντες* in the former clause. For opinions in support of this view, the reader is referred to the Notes in Jacobson's edition, p. 324.

Dr. Neander, in his *History of Christianity*, translated by Mr. Rose (i. 336), refers to this passage adopting this supposition, on which the translator remarks (in a note) very truly, though somewhat laconically, that he can only find 'something of the kind' in the passage. The meaning of Neander's version is altogether very confused, but seems to represent the Lord's day as a sort of emblem of the new life of a Christian.

Let us now look at the passage simply as it stands. The defect of the sentence is the want of a substantive to which *αὐτοῦ* can refer. This defect, so far from being remedied, is rendered still more glaring by the introduction of *ἡμέρα*. Now if we take *κυριακὴ ζωή* as simply 'the life of the Lord,' having a more personal meaning, it certainly goes nearer to supplying the substantive to *αὐτοῦ*. Again, *ἐν ᾗ* may well refer to *ζωή*, and *κυριακὴ ζωή*, meaning our Lord's *life*, as emphatically including his *resurrection* (as in Rom. v. 10, &c.), presents precisely the same analogy to the spiritual life of the Christian as is conveyed both in Rom. v.; Coloss. iii. 3, 4, and many other passages. Thus upon the whole the meaning might be given thus:—

'If those who lived under the old dispensation have come to the newness of hope, no longer keeping Sabbaths, but living according to our Lord's life (in which, as it were, our life has risen again, through him, and his death [which some deny], through whom we have received the mystery, &c. . . . .), how shall we be able to live without him?' . . . .

In this way (allowing for the involved style of the whole) the meaning seems to us simple, consistent, and grammatical, without any gratuitous introduction of words understood; and this view has been followed by many, though it is a subject on which considerable controversy has existed. On this view the passage does not refer at all to the Lord's day; but even on the opposite supposition it cannot be regarded as affording any positive evidence to the early use of the term 'Lord's day' (for which it is often cited), since the material word *ἡμέρα* is purely conjectural. It however offers an instance of that species of contrast which the early fathers were so fond of drawing between the Christian and Jewish dispensations, and between the new life of the Christian and the ceremonial spirit of the law, to which the Lord's day (if it be imagined to be referred to) is represented as opposed.

To return, however, to the nature of this observance in the Christian church, we will merely remark that though in later times we find considerable reference to a sort of *consecration of the day*, it does not seem at any period of the ancient church to have assumed the form of such an observance as some modern religious communities have contended for. Nor do these writers in any instance pretend to allege *any divine command, or even apostolic practice*, in support of it.

In the laws of Constantine (A.D. 300), cessation from ordinary work on the Lord's day was first enjoined, but with an express exception in favour of the labours of agriculture. (See Jortin's *Remarks on Eccles. Hist.* iii. 236.)

Chrysostom (A.D. 360) concludes one of his Homilies by dismissing his audience to their respective ordinary occupations. The Council of Laodicea (A.D. 364), however, enjoined Christians to rest (*σχολάζειν*) on the Lord's day. To the same effect is an injunction in the forgery called the *Apostolical Constitutions* (vii. 24), and various later enactments from A.D. 600 to A.D. 1100, though by no means extending to the prohibition of all secular business. In fact, in these subsequent ages of the church we find the ceremonial spirit rather displaying itself in the multiplication of religious festivals and solemnities, than in any increasing precision in the observance of the Lord's day. This is exemplified in the practice

of the unreformed church in modern times, and retained by most of the reformed, with the exception of those formed on the puritanical model, who have adopted a peculiar view of the entire institution, to which we shall refer in another place. [SABBATH.] We may add, also, that as in the case of Constantine, so in some modern states, where a church has been established *by law*, the same *policy* has prevailed of passing temporal enactments for the cessation of business, and even public amusements, on the Lord's day, especially in more recent times.

But to pursue such topics would be beyond our purpose. Upon the whole we would observe, that on questions of this nature it is peculiarly important to bear in mind the propriety of not advancing to gratuitous inferences beyond what the evidence warrants. We can have no proof of the existence of tenets or practices in the first ages beyond the testimony of the writers of those ages; and there was always in operation a powerful tendency to an increasing formality in external observances, which were in all cases introduced gradually from small beginnings.

To those Christians who look to the *written word* as the sole authority for anything claiming apostolic or divine sanction, it becomes peculiarly important to observe, that the New Testament evidence of the observance of the Lord's day amounts merely to the recorded fact that the disciples did assemble on the first day of the week, and the *probable* application of the designation 'the Lord's day' to that day.—B. P.

LOT (לוֹט, *a covering;* Sept. Λώτ), son of Haran and nephew of Abraham, who by the early death of his father had already come into possession of his property when Abraham went into the land of Canaan (Gen. xi. 31). Their united substance, consisting chiefly in cattle, was not then too large to prevent them from living together in one encampment. Eventually, however, their possessions were so greatly increased, that they were obliged to separate; and Abraham with rare generosity conceded the choice of pasture-grounds to his nephew. Lot availed himself of this liberality of his uncle, as he deemed most for his own advantage, by fixing his abode at Sodom, that his flocks might pasture in and around that fertile and well-watered neighbourhood (Gen. xiii. 5-13). He had soon very great reason to regret this choice; for although his flocks fed well, his soul was starved in that vile place, the inhabitants of which were sinners before the Lord exceedingly. There 'he vexed his righteous soul from day to day with the filthy conversation of the wicked' (2 Pet. ii. 7).

About eight years after his separation from Abraham (B.C. 1913), Lot was carried away prisoner by Chedorlaomer, along with the other inhabitants of Sodom, and was rescued and brought back by Abraham (Gen. xiv.), as related under other heads [ABRAHAM; CHEDORLAOMER]. This exploit procured for Abraham much celebrity in Canaan; and it ought to have procured for Lot respect and gratitude from the people of Sodom, who had been delivered from hard slavery and restored to their homes on his account. But this does not appear to have been the result.

At length the guilt of 'the cities of the plain' brought down the signal judgments of Heaven. The avenging angels, after having been entertained by Abraham, repaired to Sodom, where they were received and entertained by Lot, who was sitting in the gate of the town when they arrived. While they were at supper the house was beset by a number of men, who demanded that the strangers should be given up to them, for the unnatural purposes which have given a name of infamy to Sodom in all generations. Lot resisted this demand, and was loaded with abuse by the vile fellows outside on that account. They had nearly forced the door, when the angels, thus awfully by their own experience convinced of the righteousness of the doom they came to execute, smote them with instant blindness, by which their attempts were rendered abortive, and they were constrained to disperse. Towards morning the angels apprised Lot of the doom which hung over the place, and urged him to hasten thence with his family. He was allowed to extend the benefit of this deliverance to the families of his daughters who had married in Sodom; but the warning was received by those families with incredulity and insult, and he therefore left Sodom accompanied only by his wife and two daughters. As they went, being hastened by the angels, the wife, anxious for those who had been left behind, or reluctant to remove from the place which had long been her home, and where much valuable property was necessarily left behind, lingered behind the rest, and was suddenly involved in the destruction, by which—smothered and stiffened as she stood by saline incrustations—she became 'a pillar of salt.'

Lot and his daughters then hastened on to Zoar, the smallest of the five cities of the plain, which had been spared on purpose to afford him a refuge: but, being fearful, after what had passed, to remain among a people so corrupted, he soon retired to a cavern in the neighbouring mountains, and there abode. After some stay in this place, the daughters of Lot became apprehensive lest the family of their father should be lost for want of descendants, than which no greater calamity was known or apprehended in those times: and in the belief that, after what had passed in Sodom, there was no hope of their obtaining suitable husbands, they, by a contrivance which has in it the taint of Sodom, in which they were brought up, made their father drunk with wine, and in that state seduced him into an act which, as they well knew, would in soberness have been most abhorrent to him. They thus became the mothers, and he the father, of two sons, named Moab and Ammon, from whom sprung the Moabites and Ammonites, so often mentioned in the Hebrew history (Gen. xix.). This circumstance is the last which the Scripture records of the history of Lot; and the time and place of his death are unknown.

The difficulties which the narrative that we have sketched has been supposed to involve may be reduced to two—the death of Lot's wife, and the conduct of his daughters. With respect to the former of these, whatever difficulty has been connected with the subject has arisen from the ridiculous notions which have been connected with it, for which no authority is found in the Scriptural narrative. It has been supposed that the woman was literally turned into a pillar of salt, and that this pillar stood for many ages, if it does not still exist, as a standing monument of the transaction.

Indeed, sundry old travellers have averred that they had seen it; and no doubt they did see something which they supposed to be the pillar into which Lot's wife was turned, or were told to be such. This notion originated with the author of the Wisdom of Solomon, which was regarded by the Roman Catholics as Scriptural authority that might not be disputed. Therefore old pilgrims and travellers sought for this monument; and from their example, more modern travellers have done the same: although, if Protestants, they could attach no particular weight to the authority which alone justified their predecessors in their hopes of finding it. The passage referred to is that in which the author, after alluding to the punishment of Sodom and the deliverance of Lot, adverts to the existing evidence of the former, and then adds, somewhat vaguely, ἀπιστούσης ψυχῆς μνημεῖον ἑστηκυια στήλη ἁλός, 'a standing pillar of salt is a monument of an unbelieving soul.' This was no doubt the authority relied upon: indeed, we find it expressly quoted by some old travellers as the ground of their expectation. But the testimony of Josephus is still more explicit, and with us would be quite as authoritative. He expressly says not only that the monument existed, but that he had seen it (*Antiq.* i. 11. 4). His contemporary, Clement of Rome, makes a similar statement (*Epist.* i. § 11); and so, in the next century, does Irenæus (iv. 51, 64). But their evidence is of little original value on a point like this. Josephus and the author of Wisdom no doubt believed what they stated: and their testimony amounts to this, that in their day an object existed which was said to be the pillar into which Lot's wife was turned, and which they believed to be such. But in the present day, when the sources of historical evidence are more carefully investigated than in former times, we regard these authorities, 2000 years after the event, as having no particular weight, unless so far as they may be supported by anterior probabilities and documents, which in this case do not exist. Further, it is all but impossible that if so strange a monument had existed on the borders of the Dead Sea, it should not have been noticed by the sacred historians, and alluded to by the poets: and we may be almost certain that if it had remained when the book of Genesis was written, the frequent formula, that it was there 'unto this day,' would not have been omitted. Indeed there is every probability that, if such a monument had then existed, the Canaanites would have made it one of their idols. The expression of our Lord, 'Remember Lot's wife' (Luke xvii. 32), appears from the context to be solely intended as an illustration of the danger of going back or delaying in the day of God's judgments. From this text, indeed, it would appear as if Lot's wife had gone back, or had tarried so long behind, in the desire of saving some of their property. Then, as it would seem, she was struck dead, and became a stiffened corpse, fixed for the time to the soil by saline or bituminous incrustations. The particle of similitude must here, as in many other passages of Scripture, be understood—'*like* a pillar of salt.'

With respect to Lot's daughters, Whiston and others are unable to see any wicked intention in them. He admits that the incest was a horrid crime, except under the unavoidable necessity which apparently rendered it the only means of preserving the human race: and this justifying necessity he holds to have existed in their minds, as they appear to have believed that all the inhabitants of the land had been destroyed except their father and themselves. But it is incredible that they could have entertained any such belief. The city of Zoar had been spared, and they had been there. The wine also with which they made their father drunk must have been procured from men, as we cannot suppose they had brought it with them from Sodom. The fact would therefore seem to be that, after the fate of their sisters, who had married men of Sodom and perished with them, they became alive to the danger and impropriety of marrying with the natives of the land, and of the importance of preserving the family connection. The force of this consideration was afterwards seen in Abraham's sending to the seat of his family in Mesopotamia for a wife to Isaac. But Lot's daughters could not go there to seek husbands; and the only branch of their own family within many hundred miles was that of Abraham, whose only son, Ishmael, was then a child. This, therefore, must have appeared to them the only practicable mode in which the house of their father could be preserved. Their making their father drunk, and their solicitous concealment of what they did from him, show that they despaired of persuading him to an act which, under any circumstances, and with every possible extenuation, must have been very distressing to so good a man. That he was a good man is evinced by his deliverance from among the guilty, and is affirmed by St. Peter (2 Pet. ii. 7); his preservation is alluded to by our Saviour (Luke xvii. 18, &c.); and in Deut. ii. 9, 19, and Ps. lxxxiii. 9, his name is used to designate the Moabites and Ammonites, his descendants.

LOT (לֹט, sometimes written לוֹט) is mentioned in two passages of Scripture, in both of which it is erroneously translated *myrrh* in the Authorized Version. In Gen. xxxvii. 25, 'Behold, a company of Ishmeelites came from Gilead with their camels bearing spicery (*necoth*), and balm (*tzeri*), and *myrrh* (*lot*), going to carry it down to Egypt.' Again, in ch. xliii. 11, Jacob directs his sons to take into Egypt 'of the best fruits in the land in your vessels, and carry down the man a present, a little balm (*tzeri*), and a little honey, spices (*necoth*), and *myrrh* (*lot*), nuts (*botnim*), and almonds (*shakadim*). In this enumeration, in one case, of merchandise, and in the other, of several articles intended for a present, and both destined for Egypt, at that time a highly civilized nation, it is evident that we are to look only for such substances as were likely to be acceptable in that country, and therefore not such as were produced there, or as were more easily procurable from elsewhere than from Syria, as was the case with myrrh, which was never produced in Syria, and could not have been an article of export from thence. This difficulty has been felt by others, and various translations of *lot* have been proposed, as *lotus*, chesnuts, mastiche, stacte, balsam, turpentine, pistachio nuts. Junius and Tremellius render it *ladanum*, which is suitable, and appears to be correct.

Ladanum, or *gum ladanum*, as it is often called, was known to the Greeks as early as the

times of Herodotus and Theophrastus, and bore the names of *ledon* and *ladanon*, which are very closely allied to *ladun*, the Arabic name of the same drug. It has been well observed by

396. [Ladanum Cistus.]

Rosenmüller that the proper root and origin of these names is *led*, but that the Hebrew has the hard consonant *t* instead of the softer *d*, of which letters many permutations are to be found in these, as well as in other languages. A Hebrew author, as quoted by Celsius (*Hierobot.* i. p. 281), says, 'Est aroma, ex succo arboris cujusdam proveniens.' *Ladanum* is described by Herodotus as particularly fragrant, though gathered from the beards of goats, where it is found sticking. This is explained by referring to the description of Dioscorides, from which we learn that goats, after browsing upon the leaves of the *ladanum* plants, necessarily have this viscid substance adhering to their hair and beards, whence it is afterwards scraped off. Tournefort, in modern times, has given a detailed description of the mode of obtaining *ladanum*, and relates that it is now gathered by means of a kind of rake with whip-like thongs, which is passed over the plants. When these thongs are loaded with the odoriferous and sticky resin, they are scraped with a knife, and the substance rolled into a mass, in which state it is called *ladanum* or *labdanum*. It consists of resin and volatile oil, and is highly fragrant, and stimulant as a medicine, but is often adulterated with sand in commerce. The *ladanum* which is used in Europe is collected chiefly in the Greek isles, and also in continental Greece. It is yielded by species of the genus *Cistus* (especially by *C. creticus*), which are known in this country by the name of Rock Rose. They are natives of the south of Europe, the Mediterranean islands, and the north of Africa. Species are also found in Judæa; and *C. creticus* in some parts of Syria. Some authors have been of opinion that one species, the *Cistus roscus*, is more likely than any other to be the Rose of Sharon, as it is very common in that locality, while nothing like a true rose is to be found there. *Ladanum* seems to have been produced in Judæa, according to writers in the Talmud (Cels. *l. c.* p. 286). It is said by Pliny, as long before by Herodotus, to be a produce of Arabia, though this has not been proved to be the case in modern times. Sufficient, however, has been adduced to show that *ladanum* was known to, and esteemed by, the ancients, and as its Greek and Arabic names are similar to the Hebrew, and as it is stated to have been a produce of Syria, it was very likely to have been sent to Egypt both as a present and as merchandise.—J. F. R.

LOTS, FEAST OF. [Purim.]

LOVE may be regarded either as the internal feeling of good will and kindness which one intelligent being bears to another, or the expression of that benevolence in words and acts which gratify and benefit another; but in its full and proper sense, love is the union of these two—of the internal emotion with the outward act: whence it appears that neither doing good nor wishing good to another can in strict propriety be denominated love. The definition also shows that love is restricted to intelligent beings, takes place only between persons, and cannot be predicated of things, being used in a merely derivative and secondary sense whenever we speak of loving aught but rational beings. It also appears that the emotion implies two intelligent existences; indeed, reciprocity seems an almost essential element in the idea of love. Certainly all durable love is mutual; and if love implies two, then, prior to creation, God, however good he might be, could hardly be said to love; so that love is a consequence of creation, a result of the relations in which God was pleased to place himself in regard to man; and since these relations are best declared, if they are not exclusively made known, by the sacred Scriptures, love is a doctrine which takes its source in revelation, where indeed, considered as existing between God and man, it finds at once its highest sanctions and best supports. But if love, as between God and man, has its origin and its sustentation in Scripture, then, without revelation, this love could not exist, though it may be allowed that a certain evanescent fluttering of the heart on the thought of God might be excited by the survey of the majesty of creation and the bounty of the seasons. All pantheistic notions must be hostile to the formation and existence of love in man's breast—all mere recognition of God as the first cause of life; and whatever tends to bring God before the mind in a personal character, especially as the moral governor of the world, must powerfully conduce to make the human heart love its Creator; for in love between human beings it is the personal and moral element which exerts the strongest, the most lasting, and the most worthy influence. Now it is in a personal character, it is as a moral governor, it is as a Judge as well as a Maker, a Guide as well as a Ruler, above all as a Father and a Redeemer, that the Scriptures, from first to last, with some variations indeed, but with a unity of plan, set forth God for our minds to apprehend and our hearts to love; thus performing a most important office in the spiritual education of the human race, and presenting a distinction, as between this view and the view of God taken by schools of philosophy, or the bare decisions of the human intellect, which is as honourable to revelation as it is momentous to man.

From the relation of love, in which God in his word has condescended to place himself in regard to man, flow all human duties, hopes, and expectations, which, if they be logically deduced from the mother idea, must be no less true than Scriptural, because necessary inferences from the fundamental conception of God which revelation presents. Thus, 'we love God because he first loved us;' 'if God hath so loved us, how ought we to love one another;' 'he that loveth is born of God;' 'if a man say that he love God, and hate his brother, the truth is not in him;' 'if we love one another his love is perfected in us;' 'whoso keepeth his word, in him is the love of God perfected: hereby we know that we are in him;' 'behold what manner of love the Father hath bestowed on us, that we should be called the sons of God;' 'now are we sons of God, and it doth not yet appear what we shall be, but we know that when Christ shall appear we shall be like him, for we shall see him as he is:'—thus, and in more minute particulars, does the Apostle John, the disciple whom Jesus loved, develope the doctrine according to godliness, from the grand idea of the love of God, which filled his mind and warmed his heart, with a dialectic rigour which is no less remarkable than the gentle and affectionate tone that pervades the whole. How truly and how fully John comprehended the root-idea of the Bible may be seen in his aphorism, 'God is love' (1 John iv. 16): thus making love not an attribute of God, nor a mode of the divine existence, nor a display of his providence to man, but the very essence of his nature—the depth which enfolded all other depths, giving its own warm colouring to each.

The New Testament speaks in its great bearings of the love of God towards Christ and towards man. The Son of God, as the most perfect image of the Heavenly Father, is represented as the special object of the divine love; as a consequence of which affection God communicates to Christ all spiritual gifts needful for the redemption of mankind: 'The Father loveth the Son, and showeth him all things whatsoever he doeth' (John v. 20); 'therefore doth my Father love me, because I lay down my life that I might take it again' (John x. 17); 'for thou lovedst me before the foundation of the world' (John xvii. 24); 'God so loved the world, that he gave his only-begotten Son, that whoever believeth in him should not perish, but have everlasting life' (John iii. 16). And so, 'He that spared not his only Son, but freely gave him up for us all, how shall he not with him also freely give us all things?' (Rom. viii. 32): accordingly 'the love of God is shed abroad in our hearts by the Holy Ghost which is given unto us' (Rom. v. 5; see the following verses). The following passages will aid the reader in pursuing this interesting subject into its Scriptural particulars, which want of space compels us to be content with pointing out;—namely, Rom. viii. 35; 2 Cor. xiii. 11; Eph. ii. 4; 2 Thess. iii. 5; 1 John iv.; 1 Tim. i. 1, 2, 4; Tit. ii. 10; John xiii. 35; comp. xv. 17; Mark xii. 30.

Love to Christ is represented in Scripture as a natural consequence of Christ's love to man, and as a necessary concomitant of the love of God, with which it is kindred in nature, causes, operation, and effects. This holy affection manifests itself not in idle reveries nor warm protestations, but in meek and lowly obedience to Jesus as the mediator between God and man; and has for its highest reward the love which God displays towards all those who honour his son; which love, springing from God, fills and sanctifies the heart of man (John viii. 40; xiv. 15, 21, 23, 28; xvi. 27).

Love to man ensues from the universal love of God, as the one Creator and Father of all men, who, in consequence, stand in the relation of brothers one to another, and are, whatever earthly differences or even antipathies they may allow, still, in the sight of God and of his Son, neighbours; and as brothers and neighbours they have a claim on each other for mutual service—a claim which has its roots and sanctions in religion, or rather in the Gospel, considered as the completion of former dispensations. The measure and test of love to others is the love we each bear to self no less than the higher and perfect model which Jesus has given in his own life and death (Matt. xxii. 39; Mark xii. 31; John xv. 12; comp. xiii. 15; 1 Peter ii. 21; 1 John ii. 6). This general good-will and active beneficence may be enhanced and invigorated by those nearer relations which take place between kindred minds, men of 'like precious faith,' whose hearts and aims are one, and who have alike received the gracious and all-prevailing influences of God's spirit; so that Christianity not only places mankind in immediate connection with God, and thus renders all equal and all worthy of each other's love, but creates a new, peculiar, and very intimate relation, making all true disciples one with each other, and with the great head of the church, and thus one, ultimately, with God (John xiii. 34, 35; xv. 12; Rom. xiii. 8, 10; 1 Cor. xiii.). And it is this specific Christian affection—the love of man as a brother, purified and enlarged by the consciousness of being an object of divine mercy and goodness, so as to become a properly Christian emotion—which is to actuate the disciples of Christ in their benevolent efforts for the good of others, and specially for their rescue from the evil that is in the world that bringeth death (2 Cor. v. 14, 19, 20, 21; Acts xx. 24).

This imperfect and incomplete sketch may serve to show how incomparably superior the view is which the Scriptures give of the relation in which God stands to man and in which men stand to each other, to any view whatever that rests upon a mere earthly foundation; and consequently how much of the highest spiritual good they lose who take as their guide philosophy instead of the Gospel.

Perhaps there are few biblical topics of contemplation more fitted than the one before us to excite in the mind a just and therefore a very high estimate of the value of revealed religion in contrast with the view which the highest of heathen civilization put forth on the point. The reader has seen what in a measure love implies in the Bible. What does the corresponding term designate in Greek and Roman writers? This is not the place to pursue the inquiry; we must content ourselves with having pointed to it; but we may add, as the result of some classical reading, that the view given by classic civilization presents a succession of disparities so decided as

to suffice of itself to satisfy the unprejudiced mind that something more than human was concerned in the promulgation of Judaism and Christianity.—J. R. B.

LOVE-FEASTS. [Agape.]

LUBIM, the Libyans. [Libya.]

LUCIFER (הֵילֵל; Sept. ὁ Ἑωσφόρος), a word that occurs once in the English Version in the lines—

> 'How art thou fallen from heaven,
> *Lucifer, son of the morning!*
> How art thou felled to the ground,
> That didst weaken the nations!'

(Isa. xiv. 12). It is taken from the Vulgate, which understood the Hebrew word הילל *helel* to be the *name* of the morning star, and therefore rendered it by the Latin name of that star, *Lucifer*, i. e. 'light-bringing.' This, the popular sense, is conveyed in the note in Barker's Bible: 'Thou that thoughtest thyselfe most glorious, and as it were placed in the heaven; for the morning starre that goeth before the sunne is called Lucifer, to which Nebuchadnezzar is compared.'

הילל *helel*, the word translated 'Lucifer,' however, occurs also in Ezek. xxi. 12 (Heb. 17), as the imperative of ילל *yalal*, 'to howl,' 'to lament,' and is there rendered 'howl.' Some take it in the same acceptation in the above passage, and would translate, 'Howl, son of the morning!' But to this the structure of the verse is entirely opposed; for the parallelism requires the second line to refer entirely to the condition of the star before it had fallen, as the parallel member, the fourth line, does to the state of the tree before it was cut down. This necessity is apparent even in the English version, where the word 'lament,' in the place which 'Lucifer' occupies, would not agree with the context, nor make good sense, or indeed, any sense. Any imperative interjected would spoil the beauty and impair the force of the language. It is from this consideration that we must concur with those who refer the source of the word not to ילל *yalal*, but to הלל *halal*, 'to shine,' and regard it as a verbal noun designed to be intensive in its signification. Hence it would mean 'brilliant,' 'splendid,' 'illustrious,' or, as in the Septuagint, Vulgate, the Rabbinical commentators, Luther, and others, 'brilliant star;' and if הילל, in this sense, was the proper name among the Hebrews of the morning star, then 'Lucifer' is not only a correct but beautiful interpretation, both as regards the sense and the application. And that it was such is probable from the fact that the proper name of the morning star is formed by a word or words expressive of brilliance, in the Arabic and Syriac, as well as in the Greek and Latin. Tertullian and Gregory the Great understood this passage of Isaiah in reference to the fall of Satan; in consequence of which the name Lucifer has since been applied to Satan; and this is now the usual acceptation of the word. But Dr. Henderson, who in his *Isaiah* renders the line, 'Illustrious son of the morning!' justly remarks in his annotation: 'The application of this passage to Satan, and to the fall of the apostate angels, is one of those gross perversions of Sacred Writ which so extensively obtain, and which are to be traced to a proneness to seek for more in any given passage than it really contains, a disposition to be influenced by sound rather than sense, and an implicit faith in received interpretations. "Quum," says Calvin, "temere arripiuntur Scripturæ loci, nec attenditur contextus, hos errores passim oboriri mirum non est"' (*Comment.* in loc.). The scope and connection show that none but the king of Babylon is meant. In the figurative language of the Hebrews כוכב, *a star*, signifies an illustrious king or prince (Num. xxiv. 17; comp. Rev. ii. 28; xxii. 16). The monarch here referred to having surpassed all other kings in royal splendour, is compared to the harbinger of day, whose brilliancy surpasses that of the surrounding stars. Falling from heaven denotes a sudden political overthrow—a removal from the position of high and conspicuous dignity formerly occupied (comp. Rev. vi. 13; viii. 10).

LUCIUS of Cyrene (Λούκιος ὁ Κυρηναῖος), a person named along with Barnabas, Saul, and others, as 'prophets and teachers' in the church at Antioch (Acts xiii. 1). Lucius was probably one of 'the synagogue of the Cyrenians,' and was without doubt one of the men of Cyrene, who went abroad in consequence of the persecution raised on the death of Stephen (Acts vi. 9; xi. 20). Some suppose that he was one of the seventy disciples; and the tradition is, that he was eventually bishop of Cyrene. This is probably the same Lucius who is mentioned in Rom. xvi. 21 as Paul's kinsman; and he has been supposed by some the same with Luke the Evangelist.

LUD, fourth son of Shem (Gen. x. 22). For his descendants, see Nations, Dispersion of.

LUDIM, the descendants of (Gen. x. 13), concerning whom see Nations, Dispersion of.

LUKE. We divide this article into the three following heads—Name, Person, Writings of Luke.

The name Λουκᾶς is a contraction of Λουκανός, *Lucanus*, and indicates that Luke was descended from heathen ancestors, and that he was either a slave or a freedman, *libertus*. The contraction of the final syllable *ανός* into *ᾶς* occurs repeatedly in names given to slaves (comp. Lobeck, *De Substantivis in ᾶς exeuntibus*, in Wolf's *Analecten*, iii. 49). According to ecclesiastical tradition, the author of the Gospel is the same Luke who is mentioned in Paul's Epistles (Philem. 24; 2 Tim. iv. 11; Coloss. iv. 14), and who is called, in the last-mentioned passage, ὁ ἰατρός, 'the physician.' This tradition is confirmed by the Acts of the Apostles, according to which the author of that work accompanied the Apostle Paul in his journeys (Acts xvi. 10, sq.; xx. 5-13). Luke accompanied Paul also in his last journeys to Jerusalem and Rome (Acts xxi. 1-17; xxvii. 28). In addition to this we may observe that the account of the Lord's Supper in 1 Cor. xi. 24, and the quotation in 1 Tim. v. 18, agree more with Luke than with Matt. x. 10, where we find the word *τροφή* instead of *μισθός*. The profession of a physician harmonises also with the condition of a freedman, indicated by the form of the name. The higher ranks of the Romans were disinclined to practise medicine, which they left rather to their freedmen, 'Medicinam factitasse, manumissum' (Quinctil. *Instit.* vii. 2. 27); 'Mitto præterea cum eo ex servis meis medicum, &c.;'

'Besides, I send with him a physician from among my servants' (Suet. *Cal.* 8). It harmonises with this that Paul (Coloss. iv. 14) distinguishes Luke from the Christians of Jewish descent, whom, in verses 11 and 12, he styles ὄντες ἐκ περιτομῆς, 'being of the Circumcision.' Eusebius (*Hist. Eccles.* iii. 4) states that Antioch in Syria was the native city of Luke. In this city there was at an early period a congregation of Christians converted from heathenism. Since Luke was a physician, we must suppose that he was a man of education. Only such slaves as had some talent were taught the *artes ingenuæ*, 'liberal arts.' The freedman Antonius Musa having worked a cure upon Augustus, was raised to the equestrian order, and a statue was erected in honour of him in the temple of Æsculapius. From the time of Antoninus Pius, and perhaps earlier, there was in every city a *collegium archiatrorum*, 'a college of physicians,' to whom was entrusted the examination of medical men, and who probably required of them some knowledge of the writings of Hippocrates (Galenus, *De Theriac. ad Pisonem*, p. 456; *Digest.* i. tit. 18; *De Offic. Præs.*, vi. 7; *Digest.* l. tit. 4).

To those sceptics who excuse their disbelief of the miracles recorded in the Gospels, by the assertion that their authors were ill-informed Jews, greedy of the marvellous, it must appear of some importance to meet in Luke a well-informed Greek, skilled even in the medical sciences. The higher degree of his education is further proved by the classical style in which the proœmium to his Gospel, and the latter portion of the Acts, are written; and also by the explicit and learned details which he gives in the Acts on various antiquarian, historical, and geographical subjects. The classical, connected, periodic, and sustained style of the introduction to the Gospel of St. Luke differs so strikingly from the Hellenistic Greek of the history itself, that we clearly perceive that he made use of written documents. The same difference exists, although in a less striking degree, between the portions of the Acts relating to transactions of which Luke himself was not an eye-witness, and in which he bore no part, and those where he speaks as a companion of Paul. He did not, however, transcribe verbatim from the documents before him, nor did he merely write down verbal traditions; for we find the same characteristic phraseology which belongs to St. Luke's individual style, both in the Gospel and in the Acts. Compare, for instance, the peculiar use of the words καὶ αὐτός, Luke i. 17, 22; ii. 28, 50; iii. 23; iv. 15, 51; Acts ii. 27; v. 1, 9, 51, &c.—ἱκανός, Luke vii. 12; viii. 27, 32; xx. 9; Acts v. 37; ix. 23, 43; xi. 24, &c.—παῖς θεοῦ, Luke i. 54, 69; Acts iii. 13, 16; iv. 25, 27, 30, &c.

It is important to notice what he himself says, in his introduction, of the relation borne by his writings to those of others. It is evident that even then πολλοί, 'many,' had attempted to compose a history of our Lord from the statements of eye-witnesses and of the first ministers of the word of God. Luke follows the example of these authors, with this difference, that he writes ἄνωθεν and καθεξῆς; that is, starting from earlier facts in the history of the Baptist and of the infancy of our Lord, and continuing the narration in uninterrupted succession. Origen, Credner, and Olshausen suppose that the πολλοί were heretical authors; but this is unlikely, since Luke does not express any blame of them. But it is also unsatisfactory to refer the word πολλοί, 'many,' merely to Matthew and Mark, as Hug and De Wette have done, especially since the πολλοί are distinguished from the eye-witnesses. We must therefore suppose that many Christians wrote brief accounts of the life of Jesus, although they had not been eye-witnesses. It is possible that Luke made use of such writings.

It appears to be doubtful whether Luke had the Gospel of Matthew before his eyes, since, had that been the case, he would probably have been more careful to avoid apparent contradictions, especially in the history of the birth of Jesus, in which he seems to have made use of documents referring to the family of Mary, while the accounts given by Matthew refer more to the family of Joseph. This is also confirmed by the aphoristic mode in which he reports the Sermon on the Mount. We can scarcely imagine that he would have communicated a relation so unusually abrupt, if he had seen the well-arranged and complete statements of Matthew.

The Gospel of St. Luke contains exceedingly valuable accounts, not extant in the books of the other evangelists; for instance, those concerning the childhood of Jesus, the admirable parables in chapters xv. and xvi., the narration respecting the disciples at Emmaus, the section from chap. ix. 51 to xix. 27, which contains particulars mostly wanting in the other evangelists. It has been usual, since the days of Schleiermacher, to consider this portion as the report of a single journey to the feast at Jerusalem; but it is evident that it contains accounts belonging to several journeys, undertaken at different periods.

Some critics of modern times, such as D. Schulz, Schleiermacher, Sieffert, and Schneckenburger, were in the habit of ascribing to the reports of Luke a greater historical accuracy than to those of Matthew; but of late, opinions on this subject have changed, and Strauss, De Wette, and Bruno Bauer find in the reports of St. Matthew more of independent and original information than in those of Luke. There is certainly in the details of the historical account given by St. Luke, more clearness; but many discourses of our Redeemer given by St. Matthew have more of the impress of historical precision, especially the Sermon on the Mount, and the Discourse against the Pharisees in ch. xxiii. and xxiv.; although it seems that Matthew sometimes brings into connection similar discourses, held at various periods, concerning which we find in Luke more accurately stated the particular circumstances under which they were delivered.

The statement of Luke himself, at the beginning of his Gospel, must dispose us favourably with regard to its historical credibility. He states that he had accurately investigated the truth of the accounts communicated, and that, following the example of the πολλοί, he had made use of the statements of eye-witnesses. Luke had frequent opportunity of meeting these eye-witnesses when he travelled with Paul. He himself reports, in Acts xxi. 15, that he met James. He gives also, with greater accuracy than the other evangelists, some chronological notices, such as those at the beginning of chapters

ii. and iii., and in Acts vii. 35, &c. Yet these very dates have been quoted by Strauss and De Wette as being quite incorrect, and as proofs that Luke was destitute of accurate historical information.

This daring assertion has induced some modern apologetical authors to examine the matter more closely, who have triumphantly vindicated the historical character of these statements of Luke. (Compare the work of the learned jurist, Huschke, *Ueber den zur Zeit der Geburt Christi gehaltenen Census*, Breslau, 1840, 'On the Census taken at the Birth of Christ;' see also Wieseler, *Chronologische Synopse der vier Evangelien*, Hamburg, 1843; and also Tholuck, *Glaubwürdigkeit der evangelischen Geschichte*).

As to the statements of the ancients concerning the date or time when the Gospel of St. Luke was written, we find in Irenæus (*Adv. Hær.* iii. 1), that Mark and Luke wrote after Matthew. According to Eusebius (*Hist. Eccles.* vi. 28), Origen stated that Luke wrote after Matthew and Mark; but Clemens Alexandrinus, according to the same writer (*Hist. Eccles.* vi. 14), asserted on the authority of the παράδοσις τῶν ἀνέκαθεν πρεσβυτέρων, 'the tradition of the earlier elders,' that the Gospels containing the genealogies were written before the others. According to this view, Mark was written after Luke. It is however likely that this statement arose from a desire to explain why the genealogies were omitted by Mark and John. Eusebius, at least (*Hist. Eccles.* iii. 24), in reference to the Gospel of John, says: Εἰκότως δ'οὖν τὴν μὲν τῆς σαρκὸς τοῦ σωτῆρος ἡμῶν γενεαλογίαν, ἅτε Ματθαίῳ καὶ Λουκᾷ προγραφεῖσαν, ἀποσιωπῆσαι τὸν Ἰωάννην.—'John properly passed over in silence the genealogy according to the flesh of our Saviour, which was detailed by Matthew and Luke.'

Since the extreme criticism of Strauss and De Wette has been unable to produce even a plausible argument against the authenticity of the Gospel of Luke, attempts have been made to prove at least the very late date of this Gospel. De Wette (*Introduction to the New Testament*, 4th edition, p. 176) endeavours to infer from the definiteness with which the destruction of Jerusalem is predicted, and from the circumstance that, according to ch. xxi. 25, some time was to intervene between the destruction of Jerusalem and the second advent of Christ, that this Gospel was written some time after the destruction of the city had taken place, and after it had become apparent from facts that the second advent was not to be immediately consequent upon that destruction.

We do not here enter into the question whether, according to St. Matthew xxiv. 29, it was expected that the second advent should directly follow the destruction of Jerusalem; we merely observe that a *petitio principii* runs through the whole train of this argument, since it sets out with assuming the impossibility of detailed predictions.

From the circumstance that the book of Acts leaves St. Paul a captive, without relating the result of his captivity, most critics have, with considerable probability, inferred that Luke accompanied St. Paul to Rome, that he employed his leisure while there in composing the Acts, and that he left off writing before the fate of Paul was decided. Now, since the Gospel of St. Luke was written before the Acts, it seems to follow that it was written a considerable time before the destruction of Jerusalem. De Wette meets this argument merely by his *petitio principii*, that from the detailed nature of the predictions on that head in the Gospel, it would follow that they were written after the events to which they refer, and consequently after the destruction of Jerusalem.

It is likely that Luke, during Paul's captivity at Cæsarea, employed his leisure in collecting the accounts contained in his Gospel in the localities where the events to which they relate happened. The most ancient testimonies in behalf of Luke's Gospel are those of Marcion, at the beginning of the second century, and of Irenæus, in the latter half of that century.

According to Meyer's opinion, Luke terminates the Acts with Paul's captivity, because the later events were well known to Theophilus, to whom the Acts are dedicated. We do not know who this Theophilus was. Hug, however, infers, from the manner in which Luke mentions Italian localities, that they were well known to Theophilus, and that consequently it was likely he resided in Italy.

A good separate commentary on the Gospel of Luke is still a desideratum. Knabenbauer's *Commentarius in Evangelium Lucæ* (4th ed. 1843) is not quite satisfactory; nor Bornemann's *Scholia in Lucam* (1830). It is therefore necessary to have recourse to the best commentaries on the first three Gospels, and on the New Testament in general.

Besides the Gospel which bears his name, Luke wrote the Acts of the Apostles. This work contains the history of the foundation of the Christian church in two great sections: the first embracing the spread of Christianity among the Jews, chiefly by the instrumentality of Peter (ch. i.-xii.); and the second, its spread among the heathen, chiefly by the instrumentality of Paul (ch. xiii.-xxviii.).

Schneckenburger has lately endeavoured, in his work *Ueber den Zweck der Apostelgeschichte*, 1841, to prove that the Acts had an apologetical tendency, called forth by the particular circumstances of the times. He especially appeals to the manner in which Paul refutes all objections of the Judaizers, who were his enemies.

In those portions of the Acts in which Luke speaks as the companion of Paul, and, consequently, as an eye-witness, his Greek style is more classical than in the rest of the work. This circumstance supports the opinion that Luke followed some written documents in the earlier part of the Acts, as well as in the Gospel. Compare Riehm, *De fontibus Actuum Apostolorum*, Trajecti, 1825; Mayerhoff, *Ueber den Zweck, die Quellen und den Verfasser der Apostelgeschichte* (in his *Einleitung in die petrinischen Schriften*, pp. 1-30); Kling, *Ueber den historischen Character der Apostelgeschichte* (in the *Studien und Kritiken*, 1837, Heft 2).

That the accounts of Luke are authentic may be perceived more especially from a close examination of the inserted discourses and letters. The characteristic marks of authenticity in the oration of the Roman lawyer Tertullus, in ch. xxiv., and in the official letters in ch. xxiii. 26, sq.; xv. 23, sq.;

can scarcely be overlooked. The address of Paul to the elders of the Ephesian church is characteristically Pauline, and even so full of definite allusions and of similarity to the Epistle to the Ephesians, that it furnishes a confirmation of the authenticity of that letter, which has lately been questioned. Respecting these allusions, see an essay of Tholuck in the *Studien und Kritiken*, 1839, p. 306, sq.

Characteristic also are the discourses of Stephen (ch. vii.), and those of Peter, concerning which compare Seyler's *Abhandlungen über die Reden des Petrus*, in the *Studien und Kritiken*, 1832, p. 53, sq. Even De Wette, in his *Introduction*, § 115 a, admits the appropriateness of these discourses.

It is, however, difficult to reconcile some of Luke's statements with the chronological notices in the Epistles of Paul. Very important investigations on this subject are to be found in the work of Angar, *De temporum in Actis Apostolorum ratione*. As for the testimonies in behalf of the authenticity of the Acts, they are the same as for Luke's Gospel. Clemens Alexandrinus, Irenæus, and Tertullian, expressly mention the Acts, and Eusebius reckons them among the Homologoumena. However, the book of Acts was not read and quoted so often in the early church as other parts of Scripture. Chrysostom, in his first homily *In Actus Apostolorum*, says that many Christians in Asia knew neither the book nor its author. The Manichees rejected it for dogmatical reasons (Augustinus, *De utilitate credendi*, ii. 7). So also did the Severiani (Euseb. *Hist. Eccles.* iv. 29). Since the book of Acts was not much read, it is surprising that its text is particularly corrupt. It does not, however, by any means appear that these corruptions arose from intentional alterations made for dogmatical purposes (comp. Eichhorn's *Einleitung ins Neue Testament*, ii. 154).

The most complete commentary on the Acts is that of Kuinoel, 2nd ed., 1827. A student of the Acts ought also to consult the very learned *Dissertationes in Actus Apostolorum*, ab Emanuele Walch, Jenæ, 1756-61, 3 vols. 4to. There are also some valuable manuals, as Meyer's *Commentary*, 1835, and that of De Wette, 2nd ed., 1841.—A. T.

LUNATICS. [Demoniacs.]

LUZ, the ancient name of Bethel (Gen. xxviii. 19) [Bethel]. The spot to which the name of Bethel was given appears, however, to have been at a little distance in the environs of Luz, and they are accordingly distinguished in Josh. xvi. 2, although the name of Bethel was eventually extended to that town. A small place of the same name, founded by an inhabitant of this Luz, is mentioned in Judg. i. 26.

LUZ (לוּז) occurs only once in the Old Testament, namely, in Gen. xxx. 37 (a passage already adduced in the article Libneh), where it indicates one of the kinds of rod from which Jacob peeled the bark and which he placed in the water-troughs of the cattle. *Luz* is translated *hazle* in the Authorized Version, as well as in several others; in some it is rendered by words equivalent to 'walnut,' but 'almond' appears to be its true meaning. For in the Arabic we have لوز *louz*, which is indeed the same word, and which denotes the almond. Thus Abu'l Fadli, as quoted by Celsius (*Hierobot.* i. 254), says, '*Louz* est arbor nota, et magna, foliis mollibus. Species duæ, hortensis et silvestris. Hortensis quoque duæ sunt species, dulcis et amara;' where reference is evidently made to the sweet and bitter almond. Other Arab authors also describe the almond under the name of *louz*. But this name was well known to the Hebrews as indicating the almond; for R. Saadias, in Ab. Esra's *Comment.*, as quoted by Celsius (p. 253), remarks: '*Lus* est amygdalus, quia ita eam appellant Arabes; nam hæ duæ linguæ, et Syriaca, ejusdem sunt familiæ.' Almonds have been always produced in Syria and Palestine, and extend from thence into Affghanistan. But as there is another word by which the almond was known to the Hebrews, we shall reserve our further remarks for that head [Shakad].—J. F. R.

LYCAONIA (Λυκαονία), a province of Asia Minor, having Cappadocia on the east, Galatia on the north, Phrygia on the west, and Isauria and Cilicia on the south. It extends in length about twenty geographical miles from east to west, and about thirteen in breadth. It was an undulating plain, involved among mountains, which were noted for the concourse of wild-asses. The soil was so strongly impregnated with salt that few of the brooks supplied drinkable water, so that good water was sold for money. But sheep throve on the pasturage, and were reared with great advantage (Strabo, xii. p. 568; Pliny, *Hist. Nat.* viii. 69). It was a Roman province when visited by Paul (Acts xiv. 6), and its chief towns were Iconium, Lystra, and Derbe, of which the first was the capital. 'The speech of Lycaonia' (Acts xiv. 11) is supposed by some to have been the ancient Assyrian language, also spoken by the Cappadocians (Jablonsky, *Disquis. de Lingua Lycaonica*, Opusc. iii. 3, sqq.); but it is more usually conceived to have been a corrupt Greek, intermingled with many Syriac words (Guhling, *Dissert. de Lingua Lycaon.*).

LYCIA (Λυκία), a province in the south-west of Asia Minor, having Pamphylia on the east, Phrygia on the north, Caria on the west, and the Mediterranean on the south. Great part of the country, however, consists of a peninsula projecting south into the Mediterranean. It is mountainous, and is watered by numerous small rivers which flow from the mountains. Its inhabitants were believed to be descendants of Cretans, who came thither under Sarpedon, brother of Minos. One of their kings was Bellerophon, celebrated in mythology. The Lycians were a warlike people, powerful on the sea, and attached to their independence, which they successfully maintained against Crœsus, king of Lydia, and were afterwards allowed by the Persians to retain their own kings as satraps. Lycia is named in 1 Macc. xv. 23, as one of the countries to which the Roman senate sent its missive in favour of the Jews. The victory of the Romans over Antiochus (B.C. 189) gave Lycia rank as a free state, which it retained till the time of Claudius, when it was made a province of the Roman empire (Suet. *Claud.* 25; *Vespas.* 8). Lycia contained many towns, two of which are mentioned in the New Testament; Patara (Acts xxi. 1, 2); Myra (Acts xxvii. 5); and one, Phaselis, in the Apocrypha (1 Macc. xv. 23).

LYDDA (Λύδδα; Heb. לֹד), a town within the limits of the tribe of Ephraim, nine miles east of Joppa, on the road between that port and Jerusalem. It bore in Hebrew the name of Lod, and appears to have been first built by the Benjamites, although it lay beyond the limits of their territory; and we find it again inhabited by Benjamites after the Exile (1 Chron. viii. 12; Ezra ii. 33; Neh. xi. 35). It is mentioned in the Apocrypha (1 Macc. xi. 34), as having been taken from Samaria and annexed to Judæa by Demetrius Nicator; and at a later date its inhabitants are named among those who were sold into slavery by Cassius, when he inflicted the calamity of his presence upon Palestine after the death of Julius Cæsar (Joseph. *Antiq.* xiv. 11. 2; xii. 6). In the New Testament the place is only noticed, under the name of Lydda, as the scene of Peter's miracle in healing Æneas (Acts ix. 32, 35). Some years later the town was reduced to ashes by Cestius Gallus, in his march against Jerusalem (Joseph. *De Bell. Jud.* ii. 19. 1); but it must soon have revived, for not long after we find it at the head of one of the toparchies of the later Judæa, and as such it surrendered to Vespasian (Joseph. *De Bell. Jud.* iii. 3, 5; iv. 8). At that time it is described by Josephus (*Antiq.* xx. 6. 2) as a village equal to a city; and the Rabbins have much to say of it as a seat of Jewish learning, of which it was the most eminent in Judæa after Jabneh and Bether (Lightfoot, *Parergon*, § 8). In the general change of names which took place under the Roman dominion, Lydda became Diospolis, and under this name it occurs in coins of Severus and Caracalla, and is often mentioned by Eusebius and Jerome. It was early the seat of a bishopric, and at the different councils the bishops are found to have subscribed their names variously, as of Lydda or Diospolis; but in the later ecclesiastical records the name of Lydda predominates. The latest bishop distinctly mentioned is Apollonius, in A.D. 518. Lydda early became connected with the homage paid to the celebrated saint and martyr St. George, who was not less renowned in the east than afterwards in the west. He is said to have been born at Lydda, and to have suffered martyrdom at Nicomedia in the earliest persecution under Diocletian and Maximian, at the end of the third century. His remains were transferred to his native place, and a church erected in honour of him, by the Emperor Justinian. This church, which stood outside the town, had just been levelled to the ground by the Moslems when the Crusaders arrived at Lydda; but it was soon rebuilt by them, and they established a bishopric of Lydda and Ramleh. Great honours were paid by them to St. George, and they invested him with the dignity of their patron: from this time his renown spread more widely throughout Europe, and he became the patron saint of England and of several other states and kingdoms. The church was destroyed by Saladin in 1191; and there is no evidence that it was ever rebuilt, although there was in later centuries an unfounded impression that the church, the ruins of which were then seen, and which still exist, had been built by our king Richard. From that time there has been little notice of Lydda by travellers. It now exists, under its ancient name of Lod, as a considerable village of small houses, with nothing to distinguish it from ordinary Moslem villages, save the ruins of the celebrated church of St. George, which are situated in the eastern part of the town. The building must have been very large. The walls of the eastern end are standing only in the parts near the altar, including the arch over the latter; but the western end remains more perfect, and has been built into a large mosque, the lofty minaret of which forms the landmark of Lud (Raumer's *Palästina*, 208; Robinson's *Bib. Researches*, iii. 55; Sandys, *Travailes;* Cotovicus, *Itiner.* pp. 137, 138; D'Arvieux, *Mémoires*, ii. 28; Pococke, *Description*, ii. 58; Volney, *Voyage*, i. 278).

LYDIA (Λυδία), a province in the west of Asia Minor, supposed to have derived its name from Lud, the fourth son of Shem (Gen. x. 22: see NATIONS, DISPERSION OF). It was bounded on the east by Greater Phrygia, on the north by Æolis or Mysia, on the west by Ionia and the Ægean Sea, and on the south it was separated from Caria by the Mæander. The country is for the most part level. Among the mountains that of Tmolus was celebrated for its saffron and red wine. In the palmy days of Lydia its kings ruled from the shores of the Ægean to the river Halys; and Crœsus, who was its king in the time of Solon and of Cyrus, was reputed the richest monarch in the world. He was able to bring into the field an army of 420,000 foot and 60,000 horse against Cyrus, by whom, however, he was defeated, and his kingdom annexed to the Persian empire (Herod. i. 6). Lydia afterwards formed part of the kingdom of the Seleucidæ; and it is related in 1 Macc. viii. 8, that Antiochus the Great was compelled by the Romans to cede Lydia to king Eumenes. In the time of the travels of the Apostles it was a province of the Roman empire. Its chief towns were Sardis (the capital), Thyatira, and Philadelphia, all of which are mentioned in the New Testament, although the name of the province itself does not occur. The manners of the Lydians were corrupt even to a proverb (Herod. i. 93).

LYDIA, a woman of Thyatira, 'a seller of purple,' who dwelt in the city of Philippi in Macedonia (Acts xvi. 14, 15). The commentators are not agreed whether 'Lydia' should be regarded as an appellative, or a derivative from the country to which the woman belonged, Thyatira, her native place, being in Lydia. There are examples of this latter sense; but the preceding word ὀνόματι seems here to support the former, and the name was a common one. Lydia was not by birth a Jewess, but a proselyte, as the phrase 'who worshipped God' (σεβομένη τὸν Θεόν) imports. She was converted by the preaching of Paul; and after she and her household had been baptised, she pressed the use of her house so earnestly upon him and his associates, that they were constrained to accept the invitation. The Lydians were famous for the art of dyeing purple vests, and Lydia, as 'a seller of purple,' is supposed to have been a dealer in vests so dyed, rather than in the dye itself (see Kuinoel on Acts xvi. 14).

LYSANIAS (Λυσανίας), tetrarch of Abilene, when John commenced his ministry as the harbinger of Christ (Luke iii. 1). He is supposed to have been son or grandson of another Lysanias, known in history, who was put to death by Mark

Antony, and part of his territories given to Cleopatra [ABILENE].

LYSIAS (Λυσίας), or CLAUDIUS LYSIAS, chiliarch and commandant of the Roman troops who kept guard at the temple of Jerusalem, by whom Paul was secured from the fury of the Jews, and sent under guard to the procurator Felix at Cæsarea (Acts xxi. 27; xxiii. 31).

LYSTRA (Λύστρα), a city of Lycaonia in Asia Minor, to which Paul and Barnabas fled from the danger which threatened them at Iconium (Acts xiv. 6). Here, Paul having miraculously cured a cripple, they were both adored as gods; but afterwards, at the instigation of the Jews, Paul was stoned and left for dead (Acts xiv. 8-21). Timothy was a native of Lystra (Acts xvi. 12; 2 Tim. iii. 11). This city was south of Iconium, but its precise site is uncertain, as well as that of Derbe, which is mentioned along with it. Col. Leake remarks that the sacred text appears to place it nearer to Derbe than to Iconium; for St. Paul, on leaving that city, proceeded first to Lystra, and from thence to Derbe; and in like manner returned to Lystra, to Iconium, and to Antioch of Pisidia. And he observes that this seems to agree with the arrangement of Ptolemy, who places Lystra in Isauria, and near Isaura, which seems evidently to have occupied some part of the valley of Sidy Shehr, or Bey Shehr. Under the Greek Empire Homonada, Isaura, and Lystra, as well as Derbe and Laranda, were all included in the consular province of Lycaonia, and were bishoprics of the metropolitan see of Iconium. Considering all the circumstances, Col. Leake inclines to think that the vestiges of Lystra may be sought with the greatest probability of success at or near Wiran Khatoun, or Khatoun Serai, about thirty miles to the south of Iconium. 'Nothing,' says this able geographer, 'can more strongly show the little progress that has hitherto been made in a knowledge of the ancient geography of Asia Minor, than that of the cities which the journey of St. Paul has made so interesting to us, the site of one only (Iconium) is yet certainly known.' Mr. Arundell supposes that, should the ruins of Lystra not be found at the place indicated by Col. Leake, they may possibly be found in the remains at Kara-hissar, near the lake Bey-shehr (Leake, *Tour and Geog. of Asia Minor;* Arundell, *Discoveries in Asia Minor*).

M.

MAACAH (מַעֲכָה; Sept. Μααχά), or MAACATH (מַעֲכָת), a city and region at the foot of Mount Hermon, not far from Geshur, a district of Syria (Josh. xiii. 13; 2 Sam. x. 6, 8; 1 Chron. xix. 7). Hence the adjacent portion of Syria is called Aram-Maacah, or Syria of Maachah (1 Chron. xix. 6). The Israelites seem to have considered this territory as included in their grant, but were never able to get possession of it (Josh. xiii. 13). In the time of David the small state had a king of its own, who contributed 1000 men to the grand alliance of the Syrian nations against the Jewish monarch (2 Sam. x. 6, 8). The lot of the half-tribe of Manasseh beyond the Jordan extended to this country, as had previously the dominion of Og, king of Bashan (Deut. iii. 14; Josh. xii. 5). The Gentile name is מַעֲכָתִי *Maacathite*, which is also put for the people (Deut. iii. 14; Josh. xii. 5; xiii. 11; 2 Kings xxv. 23). Near, or within the ancient limits of Maacah, was the town called for that reason Abel beth-Maacah [ABEL].

MAACAH, or MAACHAH, is also the name of several persons in the Old Testament, male and female, who may be mentioned to distinguish them from one another, namely—

1. MAACAH, the father of Achish, king of Gath (1 Kings ii. 39).

2. MAACAH, the father of Hanan, one of David's worthies (1 Chron. xi. 43).

3. MAACAH, the father of Shephatiah, the military chief of the Simeonites in the time of David (1 Chron. xxvii. 16).

4. MAACAH, a person whose sex does not appear, one of the offspring of Nahor's concubine Reumah (Gen. xxii. 24).

5. MAACAH, a concubine of Caleb (1 Chron. ii. 48).

6. MAACAH, grand-daughter of Benjamin, who was married to Machir, son of Manasseh (1 Chron. vii. 16).

7. MAACAH, daughter of Talmai, king of Geshur, wife of David, and mother of Absalom (2 Sam. iii. 3). In 1 Sam. xxvii. 8 we read of David's invading the land of the Geshurites, and the Jewish commentators allege that he then took the daughter of the king captive, and, in consequence of her great beauty, married her, after she had been made a proselyte according to the law in Deut. xxi. But this is a gross mistake, for the Geshur invaded by David was to the south of Judah, whereas the Geshur over which Talmai ruled was to the north, and was regarded as part of Syria (2 Sam. xv. 8). The fact appears to be that David, having married the daughter of this king, contracted an alliance with him, in order to strengthen his interest against Ishbosheth in those parts.

8. MAACAH, daughter of Abishalom, wife of Rehoboam, and mother of Abijam (1 Kings xv. 1). In verse 10 we read that Asa's 'mother's name was Maacah, the daughter of Abishalom.' It is evident that here 'mother' is used in a loose sense, and means 'grandmother,' which the Maacah named in verse 1 must have been to the Asa of verse 10. It therefore appears to be a great error to make two persons of them, as is done by Calmet and others. The Abishalom who was the father of this Maacah is called Absalom in 2 Chron. xi. 20, 21, and is generally supposed by the Jews to have been Absalom the son of David; which seems not improbable, seeing that Rehoboam's other two wives were of his father's family (2 Chron. xi. 18). But Josephus says that she was the daughter of Tamar, the daughter of Absalom (*Antiq.* viii. 10. 1), and consequently his granddaughter. This seems not unlikely [ABIJAH]. It would appear that Asa's own mother was dead before he began to reign; for Maacah bore the rank and state of queen-mother (resembling that of the Sultaness Valide among the Turks), the powers of which she so much abused to the encouragement of idolatry, that Asa commenced his reforms by 'removing her from being queen, because she had made an idol in a grove' (1 Kings xv. 13; 2 Chron. xv. 16).

MACCABEES. The etymology of this word

is too uncertain to reward the inquiries made respecting it. As a family, the Maccabees commenced their career of patriotic and religious heroism during the persecution of Antiochus Epiphanes, about the year B.C. 167. At this time the aged Mattathias, a descendant of the Asmonæans, and his five sons, inhabited the town of Modin, to which place Antiochus sent certain of his officers with instructions to erect an altar for heathen sacrifices, and to engage the inhabitants in the celebration of the most idolatrous and superstitious rites. The venerable Mattathias openly declared his resolution to oppose the orders of the tyrant, and one of the recreant Jews approaching the altar which had been set up, he rushed upon him, and slew him with his own hand. His part thus boldly taken, he called his sons and his friends around him, and immediately fled to the mountains, inviting all to follow him who had any zeal for God and the law. A small band of resolute and devoted men was thus formed, and the governor of the district saw reason to fear that a general insurrection would be the consequence of their proceeding. By a sudden attack directed against them on the Sabbath, when he knew the strictness of their principles would not allow them to take measures for their defence, he threw them into disorder, and slew about a thousand of their number, consisting of men, women, and children.

Warned by this event, and yielding to the necessity of their present condition, Mattathias and his sons determined that for the future they would defend themselves on the Sabbath in the same manner as on other days. The mountain-hold of the little band was now guarded more cautiously than before. Fresh adherents to the holy cause were continually flocking in; and in a few months the party found itself sufficiently strong to make attacks upon the towns and villages of the neighbourhood, throwing down the heathen altars, and punishing the reprobates who had taken part with the enemies of God.

By the death of Mattathias, the leadership of the party devolved upon his son Judas Maccabæus, whose worth and heroic courage pointed him out as most capable of carrying on the enterprise thus nobly begun. Judas lost no time in attacking the enemy. He made himself master of several towns, which he fortified and garrisoned. Apollonius, general of the army in Samaria, hastened to stop the progress of the insurgents. Judas met him on the way, joined battle with him, slew him, and routed his army. The same success attended him in his encounter with Seron, general of the Syrians; and it now became evident to Antiochus that the Jewish nation would soon be delivered from his yoke, unless he proceeded against them with a more formidable force. While, therefore, he himself went into Persia to recruit his treasures, Lysias, whom he left as regent at home, sent an army into Judæa, composed of forty thousand foot and seven thousand cavalry. This powerful array was further increased by auxiliaries from the provinces, and by bands of Jews, who dreaded nothing more than the triumph of those virtuous men of their own nation, who were struggling to save it from reprobation. So unequal did the forces of Judas appear to an encounter with such an army, that in addressing his followers he urged those among them who had any especial reason to love the present world to retire at once; while to those who remained he pointed out the promises of God as the best support of their courage and fidelity. By a forced march he reached a portion of the enemy encamped at Emmaus, while utterly unprepared for his approach. Complete success attended this bold proceeding. The several parts of the hostile army were successively put to flight, a splendid booty was secured, and Judas gained a position which made even the most powerful of his opponents tremble. Another and more numerous army was sent against him the following year, but with no better success. At the head of ten thousand determined followers, Judas defeated the army of Lysias, consisting of sixty thousand. A way was thereby opened for his progress to Jerusalem, whither he immediately hastened, with the devout purpose of purifying the temple and restoring it to its former glory. The solemn religious rites having been performed which were necessary to the cleansing of the sacred edifice, the Festival of the Purification was instituted, and added to the number of the other national festivals of more ancient date.

Judas had full occupation for his courage and ability in repelling the incursions of those numerous foes who dreaded the restoration of order and religion. But every day added to his successes. Having overthrown the Syrian commanders sent against him, he occupied Samaria, made himself master of the strong city of Hebron, of Azotus, and other important places, taking signal vengeance on the people of Joppa and Jamnia, who had treacherously plotted the destruction of numerous faithful Jews.

Antiochus Epiphanes was succeeded by Antiochus Eupator. At first this prince acted towards the Jews with moderation and tolerance. But he soon afterwards invaded Judæa with a powerful army, and was only induced to make peace with Maccabæus by the fears which he entertained of a rival aspirant to the throne. His caution did not save him. He was put to death by his own uncle, Demetrius, who, obtaining the throne of Syria, made peace with Judas, but took possession of the citadel of Jerusalem, which was occupied by his general, Nicanor, and a body of troops. This state of things was not allowed to last long. Demetrius listened to the reports of Nicanor's enemies, and threatened to deprive him of his command unless he could disprove the accusation that he had entered into a league with Judas, and was betraying the interests of his sovereign. Nicanor immediately took measures to satisfy Demetrius, and Judas saw it necessary to escape from Jerusalem, and put himself in a posture of defence. A battle took place in which he defeated his enemy. Another was soon after fought at Beth-horon, where he was again victorious. Nicanor himself fell in this battle, and his head and right hand were sent among the spoils to Jerusalem. But the forces of Demetrius were still numerous. Judas had retired to Laish with about three thousand followers. He was there attacked by overwhelming numbers. Only eight hundred of his people remained faithful to him on this occasion. Resolved not to flee, he bravely encountered the enemy, and was speedily slain, regarding his life as a fitting sacrifice to the cause in which he was engaged.

Simon and Jonathan, the brothers of Judas, rallied around them the bravest of their companions, and took up a strong position in the neighbourhood of Tekoa. Jonathan proved himself a worthy successor of his heroic brother, and skilfully evaded the first attack of Bacchides, the Syrian general. For two years after this, the brothers were left in tranquillity, and they established themselves in a little fortress called Bethtasi, situated among the rocks near Jericho. The skill and resolution with which they pursued their measures rendered them formidable to the enemy; and the state of affairs in Syria some time after obliged Demetrius to make Jonathan the general of his forces in Judæa, and to invest him with the authority of governor of Jerusalem. To this he was compelled by the rivalry of Alexander Balas; but his policy was too late to secure the attachment of his new ally. Jonathan received offers from Alexander to support his interests among the Jews, and the high-priesthood was the proffered reward. The invitation was accepted; and Jonathan became the first of the Asmonæan line through which the high-priesthood was so long transmitted. Alexander Balas left nothing undone which might tend to secure the fidelity of Jonathan. He gave him a high rank among the princes of his kingdom, and adorned him with a purple robe. Jonathan continued to enjoy his prosperity till the year B.C. 143, when he fell a victim to the treachery of Trypho, who aspired to the Syrian throne. He was succeeded by his brother Simon, who confirmed the Jews in their temporary independence; and in the year B.C. 141 they passed a decree whereby the dignity of the high-priesthood and of prince of the Jews was rendered hereditary in the family of Simon. He fell a victim to the treachery of his son-in-law, Ptolemy, governor of Jericho; but was succeeded by his son, the celebrated John Hyrcanus, who possessed the supreme authority above thirty years, and at his death left it to be enjoyed by his son Aristobulus, who, soon after his accession to power, assumed the title of king. This dignity continued to be enjoyed by descendants of the Asmonean family till the year B.C. 34, when it ceased with the downfall of Antigonus, who, conquered by Herod and the Romans, was put to death by the common executioner.—H. S.

MACCABEES, BOOKS OF [APOCRYPHA] (Gr. Μακκαβαῖοι), a name usually supposed to have been cabbalistically derived from מַכְּבִי (*Makkabi*), the initial letters of מִי כָמֹכָה בָּאֵלִם יְהוָה ('who among the gods is like Jehovah?'), the motto on the Jewish standard in the war with the Syrians. The books of Maccabees are the titles of certain Jewish histories containing principally the details of the heroic exploits referred to in the preceding article. It has been, however, maintained in our more critical age, that according to the etymology here assigned, the name ought to be written Μαχαβαῖοι with a χ. The word is therefore with more probability supposed to be derived from מקבי, 'a hammer' or 'mallet,' a word expressive of the prowess of Judas Maccabæus, or the *hammerer*. For other derivations of this word, and of *Asmonæans*, see Hottinger's *Thesaurus Philologicus*, p. 516.

There were in all four books (to which some add a fifth) known to the ancients, of which three are still read in the eastern, and two in the western church. Of these the *third* is the first in order of time. We shall, however, to avoid confusion, speak of them in the order in which they are commonly enumerated.

THE FIRST BOOK OF MACCABEES contains a lucid and authentic history of the undertakings of Antiochus Epiphanes against the Jews, from the year B.C. 175 to the death of Simon Maccabæus, B.C. 135. This history is confessedly of great value. Although its brevity, observes De Wette (see 1 Macc. i. 6; viii. 7; xii), renders it in some instances unsatisfactory, defective, and uncritical, and occasionally extravagant, it is upon the whole entitled to credit, chronologically accurate, and advantageously distinguished above all other historical productions of this period (*Einleitung in die Apokryfe Bucher*, § 299). It is the second book in order of time.

Language of the First Book.—There is little question that this book was written in Hebrew, although the original is now lost. The Greek version abounds in Hebraisms and errors of translation. Origen (*apud Eusebium, Eccl. Hist.* vi. 25) gives it a Hebrew title, Σαρβηθ Σαρβανὲ ἔλ, שרבת שר בני אל, 'the prince of the temple, the prince of the sons of God,' or according to others שרביט סרבני אל 'the scourge of the rebels of God.' Jerome (*Prolog. Galeat.*) says that he had seen the Hebrew original. There is a Chaldee work still extant, published by Bartolocci (i. 383), which Hengstenberg (*Beitr.* 1) maintains to be the work referred to by Origen and Jerome. Kennicott, however (*Diss.* 2), observes that this work differs materially from the present Greek. There is a Hebrew version of the Chaldee extant, which is also published by Bartolocci (*ut supra*), with a Latin translation. This work is said by Wolfius (*Bib. Hist.*) to be still found in the Jewish ritual, and to be read by the Jews at the feast of Dedication. Fabricius (*Cod. Apoc.*) has reprinted Bartolocci's Latin version. Wagenseil discovered a copy in Moravia, and there is a MS. Hebrew roll of the same in the library of St. Sepulchre's in Dublin.

Author and Age.—Of the author nothing is known; but he must have been a Palestinian Jew, who wrote some considerable time after the death of Simon Maccabæus, and even of Hyrcanus, and made use of several written, although chiefly of traditionary, sources of information. At the same time it is not impossible that the author was present at several of the events which he so graphically describes.

Versions.—The Greek text of the Alexandrine version is the original of all the others now extant. This text was that made use of by Josephus. The Latin version of the Vulgate is that in use before the time of Jerome, who did not translate the book. There is also a Syrian version, which has been printed in the Polyglotts.

THE SECOND BOOK OF MACCABEES (the third in order of time) is a work of very inferior character to the first. It is an abridgment of a more ancient work, written by a Jew named Jason, who lived at Cyrene in Africa, comprising the principal transactions of the Jews which occurred during the reigns of Seleucus IV., Antiochus Epiphanes, and Antiochus Eupator. It partly goes over the

same ground with the first book, but commences ten or twelve years earlier, and embraces in all a period of fifteen years. It does not appear that the author of either saw the other's work. The second book of Maccabees is divided into two unconnected parts. It commences with a letter from the citizens of Jerusalem and Judæa to the Greek Jews in Egypt, written B.C. 123 (which refers to a former letter written to the same, B.C. 143, acquainting them of their sufferings), and informs them that their worship was now restored, and that they were celebrating the Feast of Dedication. The second part (ii. 18) contains a still more ancient letter, written B.C. 159, to the priest Aristobulus, the tutor of King Ptolemy, recounting, besides some curious matter, the death of Antiochus Epiphanes. The third part contains the preface, in which the author states that he is about to epitomise the five books of Jason. The work commences with the attack of Heliodorus on the temple, and closes with the death of Nicanor, a period of fifteen years. The history supplies some blanks in the first book; but the letters prefixed to it contradict some of the facts recorded in the body of the work, and are consequently supposed to have been added by another hand. Neither are the letters themselves considered genuine, and they were probably written long after the death of Nicanor, and even of John Hyrcanus. This book gives a different account of the place and manner of the death of Antiochus Epiphanes from that contained in the first book.

The narrative, as De Wette observes, abounds in miraculous adventures (iii. 25, sq.; v. 2; xi. 8; xv. 12), historical and chronological errors (x. 3, sq. comp. with 1 Macc. iv. 52, i. 20-29; xi. 1 comp. with 1 Macc. iv. 28, sq.; xiii. 21, sq., comp. with 1 Macc. vi. 31, sq.; iv. 13, comp. with 1 Macc. viii.), extraordinary and arbitrary embellishments (vi. 18, sq.; vii. 27, sq.; ix. 19-27; xi. 16-38), affected descriptions (iii. 14, sq.; v. 11, sq.), and moralising reflections (v. 17, sq.; vi. 12, sq.; ix. 8, sq.). For a solution of the chronological discrepancy between it and the first book (comp. 1 Macc. vi. 20, with 2 Macc. xiii. 1), see *Auctoritas utriusque Lib. Macc.*, p. 129, &c.; Jahn's *Antiq.* ii. 1. 328; Michaelis on 1 Macc. x. 21; and Bertholdt, viii. 1079). The embellishments are those of the epitomiser. The letters in xi. 16, &c., are most probably genuine.

Author and Age.—We are not aware when either Jason himself or his epitomiser lived. S. G. Hasse, who published a German translation of this book, at Jena, in 1786, supposes it to have been written B.C. 150, by the author of the Book of Wisdom. Jahn refers the age of the epitomiser to some time previous to the middle of the last century before the birth of Christ, and De Wette maintains that Jason must have written a considerable time after the year B.C. 161. This book is supposed to be that referred to by Clemens Alexandrinus (*Stromata*) as Μακκαβαϊκων Ἐπιτομή. The mode of computation differs from that in the first book, in which it takes place after the Jewish manner.

Language and Versions.—Jerome (*Prolog. Galeat.*) observes that the phraseology of this book evinces a Greek original. The elegance and purity of the style have misled some persons into the supposition that its author was Josephus. The Latin version (which is ante-Hieronymian) is a free translation from the Greek. The Syriac is also from the Greek, but is not always exact. The Arabic appears to be a compilation from the Greek books of Maccabees, and from the history appended to the works of Josephus. There have been two books of Maccabees found among the Chinese Jews; but whether they are the same with ours is doubtful.

In the celebrated theses of the Jesuit Professors Less and Hamelius, which were condemned by the theological faculties of Louvain and Douai in 1586, and which consisted in denying the necessity of universal verbal inspiration, as well as the immediate inspiration of every truth or sentence contained in Scripture, it is worthy of remark that this book is introduced in illustration of the third thesis, which is as follows:—'Any book, such as the *Second Book of Maccabees*, written by human industry, without the aid of the Holy Spirit, becomes Holy Scripture, if the Holy Spirit afterwards testifies to its containing nothing false.' The truth of these theses, however, was advocated by Cornelius à Lapide, Suarez, Bonfrere, Bellarmine, Huet, Du Pin, Calmet, and Richard Simon (Henderson, *On Inspiration*, lect. i. p. 65).

The Third Book of Maccabees, still read in the Greek church, and contained in the Alexandrian and Vatican MSS. (A. & B.) is, as has been already observed, the first in order of time. It contains an account of the persecution of the Egyptian Jews by Ptolemy Philopater, who is said to have proceeded to Jerusalem after his victory at Raphia over Antiochus the Great, B.C. 217, and after sacrificing in the temple, to have attempted to force his way into the Holy of Holies, when he was prostrated and rendered motionless by an invisible hand. Upon his return to Egypt, he revenged himself by shutting up the Jews in the Hippodrome, and exposing them to be crushed beneath the feet of elephants. This book contains an account of their deliverance by divine interposition. It is anterior in point of date to the Maccabæan period, and has received its designation from a general resemblance to the two first books in the heroic character of the actions which it describes. Calmet (*Commentary*) observes that this book is rejected as apocryphal in the Latin Church; not, however, as not containing a true history, but as not being inspired, as he considers the first two books to be. It is nevertheless regarded by De Wette as a tasteless fable, and notwithstanding the relation which it contains of an annual festival, considered by him as most probably destitute of any historical foundation. Dr. Milman (*Hist. of the Jews*) describes it as a 'romantic story.' There is a similar relation in the Latin version by Rufinus of the Supplement to Josephus, which De Wette considers, although a highly improbable narration, to approach nearer to the truth than the third book of Maccabees. Josephus's narrative is placed fifty years later, not under Ptolemy Philometor, but under Ptolemy Physcon.

Author, Age, and Language.—The author is unknown. Dr. Allix (*Judgment of the Jewish Church*) considers it to have been written A.D. 200, and by the author of Ecclesiasticus. There is a Syriac version in the Polyglotts, but no ancient Latin translation has come down to

us. The work does not appear either in the MSS. or early printed editions of the Vulgate, and is first found in Latin in the edition of Frobenius (1538). There was an English version by Walter Lynne (1550), which was afterwards appended, with some corrections, to Day's folio Bible (1551). It was again translated by Whiston (*Authentic Documents*, 1719 and 1727) and afterwards by Crutwell (*Bible*, 1785), and again by Dr. Cotton (*Five Books of Maccabees*, 1832). There is a French translation by Calmet, appended to his commentary. The version of 3 Maccabees (and of 3 and 4 Esdras), which is found in some German Bibles since Luther's time, was by Daniel Cramer. Luther himself only translated the first two books.

The Fourth Book of Maccabees, which is also found in the Alexandrian and Vatican manuscripts, is generally supposed to be the same with the *Supremacy of Reason*, attributed to Josephus, with which it for the most part accords. It consists of an inflated amplification of the history of the martyrdom of Eleazar, and of the seven brothers, whose torments and death, with that of their mother, form the subject of 2 Macc. ch. vi. vii. In some Greek MSS. it is entitled the *Supremacy of Reason*, by Josephus, or the *Fourth Book of Maccabees*, in others simply the *Fourth Book of Maccabees*. It is found in the Greek Bibles printed at Basle in 1545, and at Francfort in 1597, where it is entitled *The Book of Josippos* (Josephus) *on the Maccabees*. It bears the same title in several other MSS. Philostratus (*Hist. Eccles.*), Jerome (*De Script. Eccles.* and lib. 2 *cont. Pelag.*), and Eusebius (*Hist. Eccles.* iii. 10), ascribe this work to Josephus. Eusebius (*l. c.*) describes it as a 'work of no mean execution, entitled the *Supremacy of Reason*, and by some *Maccabaicum*, because it contains the conflicts of those Jews who contended manfully for the true religion, as is related in the books called Maccabees.' St. Gregory Nazianzen (*Orat. de Maccab.*), St. Ambrose (*De Vita Beatâ*, lib. ii. c. 10, 11, 12), St. Chrysostom (*Homil.* ii. *in Sanct. Maccabæos*), and even St. Jerome (*Epist.* 100), in their eulogies of the consistency of the Maccabæan martyrs, have evidently drawn their descriptions from the *fourth* book. The details given by St. Jerome of their sufferings, such as the breaking of their bodies on the wheel, the history of which, he adds, is read throughout the churches of Christ, are not found in the *second* book.

Calmet (*Preface to the Fourth Book of Maccabees*) has pointed out several contradictions between this and the second book, as well as the books of Moses, together with some opinions derived from the Stoics, such as the equality of crimes; which, he supposes, together with its tedious descriptions, have consigned it to the rank of an Apocryphal book.

The fourth book was printed by Dr. Grabe from the Alexandrian MS. in the British Museum. There is a French translation by Calmet (*Commentary*), and an English one by Dr. Cotton (*Five Books of Maccabees*, 1832).

What has been called the *Fifth book of Maccabees* is now extant only in the Arabic and Syriac languages. It was first published, as the supposed *fourth* book, in the Paris Polyglott, with a Latin version. Before this, Sixtus of Sienna had published an account of a Greek MS. containing the history of the pontificate of John Hyrcanus, which he had seen in the library of Sanctes Pagnini at Lyons, and which he persuaded himself and others to be the long-lost fourth book so often referred to in the ancient church. This unique MS., however, soon after perished in the flames which consumed the library of Pagnini. Josephus remained as the sole authority for the history of these times. The Arabic work, however, above referred to, and which had the appearance of being a version from the Greek, bore such a resemblance to the lost MS. of Pagnini, commencing with the same words, 'After the death of Simon, his son John was made high-priest in his place,' that Le Jay, the editor, had no hesitation in printing it as the *Fourth book of Maccabees*. Calmet, however, has advanced several reasons to show that this was not, in fact, the genuine fourth book. The whole Arabic history was translated into French by Baubrun in his edition of the Bible. Calmet has limited himself to the translation of seven chapters, or that portion which accords with what had been taken by Sixtus of Sienna for the *fourth* book of Maccabees. This is preceded in the Arabic by nineteen, and followed by thirty-two chapters.

It is described in the Paris Polyglott as being derived from a Hebrew original, in which character it also accords with the Greek MS. of Pagnini. From the Paris Polyglott it found its way into the London. Dr. Cotton has given a translation of the Latin version which first appeared in the Paris Polyglott.

Author, Age, and Subject.—It is impossible to ascertain the author, who could scarcely have been Josephus, as he disagrees in many things with that historian (Calmet's *Preface*). Calmet supposes that the original Hebrew may have consisted of ancient annals, but that the Greek or Arabic translator must have lived after the destruction of the temple by the Romans (see 5 Macc. ix.; xxi.). To Samaria he gives its more modern name of Sebaste, and to Sichem that of Neapolis.

The work consists of a history of Jewish affairs, commencing with the attempt on the treasury at Jerusalem by Heliodorus, and ending with the tragic fate of the last of the Asmonæan princes, and with the inhuman execution by Herod of his noble and virtuous wife Mariamne, and of his two sons. This history thus fills up the chasm to the birth of Christ.

Dr. Cotton has pointed out among the 'remarkable peculiarities' found in this book the phrases, 'Peace be unto thee,' and 'God be merciful to them,' showing that the practice of prayer for the dead was at this time prevalent. But the most remarkable passage in reference to this subject is 2 Macc. xii. 40-45, where Judas forwards to Jerusalem 2000, or according to the Syriac 3000, and according to the Vulgate 12,000, drachmas of silver, to make a sin-offering for the Jews slain in action, on whose persons were found things consecrated to idols, which they had sacrilegiously plundered in violation of the law of Moses (Deut. vii. 25, 26). The author of the book remarks that it was a holy and good thought to pray for the dead, which, he observes,

would have been superfluous, had there been no resurrection. Grotius (*in loc.*) supposes that this practice commenced after the exile, when the Jews had learned from the prophets Ezekiel and Daniel a distinct notion of a future state (see Bartolocci's *Biblioth. Rabbin.* ii. 250; Basnage, *Hist. des Juifs*, iii. 4. 32, &c.). Calmet observes that, according to the notions of the Jews and some of the Christian Fathers, the pains of hell for those who died in mortal sin (as appears to have been the case of these Jews) were alleviated by the prayers and alms of the living (Augustine, *De Fide, Spe, et Charitate*, ch. 110), if not entirely removed; and cites a passage from a very ancient Christian Liturgy to the same effect. This learned commentator supposes that the ancient and Catholic practice of prayer for the dead had its origin in this usage of the Jews, although he admits it to be a distinct thing from the doctrine of purgatory as held in the Roman Church. As, however, it is intimated in ver. 45 that this mercy was reserved for those who died piously, which could not be predicated of persons who had died in mortal sin, he conjectures that Judas might have charitably presumed that they had repented before death, or that there were other extenuating circumstances unknown to us, which attended the character of their offence, and rendered them fit objects for the divine mercy.

Church Authority of Maccabees.—The first two books of Maccabees have been at all times treated with a very high degree of respect in the Christian Church. Origen (*apud Eusebium*), professing to give a catalogue of the twenty-two canonical books, of which, however, he actually enumerates only twenty-one, adds, 'besides, there are the Maccabees.' This has given rise to the notion that he intended to include these books in the canon, while others have observed that he has omitted the minor prophets from his catalogue. In his preface to the Psalms he excludes the two books of Maccabees from the books of Holy Scripture, but in his *Princip.* (ii. 1), and in his *Comment. ad Rom.* ch. v., he speaks of them as inspired, and as of equal authority with the other books. St. Jerome says that the *Church* does not acknowledge them as canonical, although he elsewhere cites them as *Holy Scripture* (*Com. ad Isa.* xxiii.; *ad Eccl.* vii., ix.; *ad Dan.* viii.). Bellarmine (*De Verbo Dei*) acknowledges that these, with the other deutero-canonical books, are *rejected* by Jerome, as they had not been then determined by any general council. Vicenzi, however (*Introd. in Scrip. Deuterocan.*), maintains that Jerome only *hesitates* to receive them (*Sanctus dubitat*). St. Augustine (*De Civit. Dei*) observes that the 'books of Maccabees were not found in the canonical Scriptures, but in those which not the Jews, but the Church, holds for canonical, on account of the passions of certain martyrs.' The first councils which included them in the canonical Scriptures were those of Hippo and Carthage; the first council professing itself to be general, which is said to have adopted them, was that of Ferrara or Florence in the year 1439; but the supposed canon of this council which contains them is by others said to be a forgery (see Rainoldi *Censura Lib. Apoc.*, 1611, and Cosin's *History of the Canon*, ch. xvi). However this may be, we have already seen [DEUTEROCANONICAL] that they were received with the other books by the Council of Trent. Basnage, cited by Lardner (*Credibility*), thinks that the word 'Canonical' may be supposed to be used here [by the councils of Hippo and Carthage] loosely, so as to comprehend not only those books which are admitted as a rule of faith, but those which are esteemed useful, and may be publicly read for the edification of the people, in contradistinction to such books as were entirely rejected. This is also the opinion of the Roman Catholic Professor Jahn (*Introd.* § 29), who expresses himself in nearly the same words. Dr. Lardner conceives that Augustine also, unless he would contradict himself, must be understood to have used the word in the same sense. De Wette (*Einleitung*, § 25) observes that as the Jewish Scriptures could only be read in the Alexandrian version, the early Christian writers frequently cite the apocryphal as if they were canonical writings, to which effect he furnishes many examples; and his translator adds that the most celebrated teachers of the second and third centuries ..... regard them with the same esteem as the canonical writings, of which he observes that the books of Maccabees are among those most often appealed to. De Wette (*l. c.*) supposes that at the end of the fourth century the word 'canon' included the collateral idea of an ecclesiastical decision. It is remarkable that the ancient writers of the Greek church uniformly rejected from the canon all books written in the Greek language, in which they were followed in the west by Hilary and Jerome, while others continued to use all the books contained in the Alexandrian version. Dr. Cotton is astonished that 'a Roman Catholic at least should not have bowed with implicit deference to the recorded judgment of St. Jerome, to whom he owns himself indebted for his Bible;' not recollecting that the authority of St. Augustine was at all times greater in the Western church than that of St. Jerome.

It has been supposed by some that the Egyptian Jews had a peculiar canon distinct from the Hebrew; but the utmost that can be said is, that the latter books were held in higher esteem among the Hellenist than among the Palestinian Jews. Bertholdt thinks that the apocryphal books were treated by the Egyptian Jews rather as an appendix to the canon than as a part of it, and were therefore placed, not *in*, but *beside* the canon; but that the ancient Christians, not being acquainted with Hebrew, considered all the books of the Alexandrian codex as genuine and sacred, and made the same use of the Apocrypha and of the Hebrew canon.

The ancient Greek catalogues sometimes enumerate four, sometimes three, and at other times only two books of Maccabees. There are *three* books of Maccabees cited in the 84th of the apostolic canons. Theodoret (*in Dan.* xi. 7) cites the third book as Holy Scripture. The author of the *Synopsis Scripturæ* enumerates *four* books of Maccabees among the *antilegomena* of the Old Testament. Nicephorus cites three only in the same class. Eusebius (*Chronicon*) merely observes that the third book is placed out of its chronological order. Philostorgius (*Eccles. Hist.*) A.D. 425, highly esteems the first book of Maccabees; the second does not appear to him to have been the work of the same author. The third he calls a 'monstrous production,' having

nothing similar to the first book. There are four books of Maccabees named in ancient catalogues given by Coblerius as among the books not of the *Seventy*. Three books of Maccabees are received with equal authority in the Greek church.

It is remarkable that although the Anglican church has received the canon of St. Jerome (art. vi.), she has prescribed no lessons to be read from either of the books of Maccabees [ESTHER, ESDRAS, DEUTEROCANONICAL] which she has appended to the Old Testament. In John x. 22, there is a marginal reference in the authorized version to 1 Macc. iv. 59, and in Heb. xi. 35, 36, there are references to 2 Macc. vi. 18, 19; to vii. 7, &c., and to vii. 1-7.

In the order of the books in the *Codex Alexandrinus* [DEUTEROCANONICAL], the reader will observe the position which the four books of Maccabees occupy. In the *Vatican Codex* Tobit and Judith are placed between Nehemiah and Esther; Wisdom and Ecclesiasticus follow Canticles; Baruch and Lamentations are placed after Jeremiah, and the four books of Maccabees close the canon.—W. W.

MACEDONIA (Μακεδονία), a country lying to the north of Greece Proper, having on the east Thrace and the Ægæan Sea, on the west the Adriatic and Illyria, on the north Dardania and Mæsia, and on the south Thessaly and Epirus. The country is supposed to have been first peopled by Chittim or Kittim, a son of Javan (Gen. x. 4) [NATIONS, DISPERSION OF]; and in that case it is probable that the Macedonians are sometimes intended when the word Chittim occurs in the Old Testament. Macedonia was the original kingdom of Philip and Alexander, by means of whose victories the name of the Macedonians became celebrated throughout the East, and is often used for the Greeks in Asia generally (Esth. Apoc. xviii. 10, 14; 2 Macc. viii. 20). The rise of the great empire formed by Alexander is described by the prophet Daniel under the emblem of a goat with one horn (Dan. viii. 3-8). As the horn was a general symbol of power, and as the oneness of the horn implies merely the unity of that power, we are not prepared to go the lengths of some over-zealous illustrators of Scripture, who argue that if a one-horned goat were not a recognised symbol of Macedonia we should not be entitled to conclude that Macedonia was intended. We hold that there could be no mistake in the matter, whatever may have been the usual symbol of Macedonia. It is, however, curious and interesting to know that Daniel did describe Macedonia under its usual symbol, as coins still exist in which that country is represented under the figure of a one-horned goat. There has been much discussion on this subject—more curious than valuable—but the kernel of it lies in this fact. The particulars may be seen in Murray's *Truth of Revelation Illustrated*, and in the article *Macedonia*, in Taylor's Calmet.

When subdued by the Romans under Paulus Æmilius (B.C. 168), Macedonia was divided into four provinces; but afterwards (B.C. 142) the whole of Greece was divided into two great provinces, Macedonia and Achaia [GREECE, ACHAIA]. Macedonia therefore constituted a Roman province, governed by a proconsul (*provincia proconsularis*; Tacit. *Annal.* i. 76; Suet. *Claud.* 26), in the time of Christ and his Apostles.

The Apostle Paul being summoned in a vision, while at Troas, to preach the Gospel in Macedonia, proceeded thither, and founded the churches of Thessalonica and Philippi (Acts xvi. 9), A.D. 55. This occasions repeated mention of the name, either alone (Acts xviii. 5; xix. 21; Rom. xv. 26; 2 Cor. i. 16; xi. 9; Phil. iv. 15), or along with Achaia (2 Cor. ix. 2; 1 Thess. i. 8). The principal cities of Macedonia were Amphipolis, Thessalonica, Pella, and Pelagonia (Liv. xlv. 29); the towns of the province named in the New Testament, and noticed in the present work, are Amphipolis, Thessalonica, Neapolis, Apollonia, and Berœa.

MACHPELAH (מַחְפֵּלָה, *twofold, double;* Sept. διπλοῦς), the name of the plot of ground containing the cave which Abraham bought of Ephron the Hittite for a family sepulchre (Gen. xxiii. 9, 17) [HEBRON].

MADAI (מָדַי; Sept. Μαδοί), third son of Japhet (Gen. x. 2), from whom the Medes, &c., are supposed to have descended [GOG; NATIONS, DISPERSION OF].

MADMANNAH (מַדְמַנָּה; Sept. Μαδμηνά), a city of Simeon (Josh. xv. 31), very far south towards Gaza (1 Chron. ii. 49), which in the first distribution of lands had been assigned to Judah. Eusebius and Jerome identify it with a town of their time, called Menois, near the city of Gaza (*Onomast.* p. 89).

MADMENAH (מַדְמֵנָה; Sept. Μαδεβηνά), a town only named in Isa. x. 31, where it is manifestly placed between Nob and Gibeah. It is generally confounded with the preceding, which is much too far southward to suit the context.

MAGDALA (Μαγδαλά), a town mentioned in Matt. xv. 39, and the probable birthplace of Mary Magdalene, *i. e.* Mary of Magdala. It must have taken its name from *a tower* or *castle*, as the name signifies. It was situated on the lake Gennesareth, but it has usually been placed on the *east* side of the lake, although a careful consideration of the route of Christ before he came to, and after he left, Magdala, would show that it must have been on its *western* shore. This is confirmed by the Jerusalem Talmud (compiled at Tiberias), which several times speaks of Magdala as being adjacent to Tiberias and Hamath, or the hot-springs (Lightfoot, *Chorog. Cent.* cap. lxxvi.). It was a seat of Jewish learning after the destruction of Jerusalem, and the Rabbins of Magdala are often mentioned in the Talmud (Lightfoot, *l. c.*). A small Moslem village, bearing the name of Mejdel, is now found on the shore of the lake about three miles north by west of Tiberias; and although there are no ancient ruins, the name and situation are very strongly in favour of the conclusion that it represents the Magdala of Scripture. This was probably also the Migdal-el, in the tribe of Naphtali, mentioned in Josh. xix. 38 (Burckhardt, *Syria*, p. 559; Seetzen in *Monat. Corresp.* xviii. 349; Fisk, *Life*, p. 316; Robinson, *Researches*, iii. 279).

MAGI. The Magi were originally one of the six tribes (Herod. i. 101; Plin. *Hist. Nat.* v. 29) into which the nation of the Medes was divided,

who, like the Levites under the Mosaic institutions, were intrusted with the care of religion: an office which was held in the highest honour, gave the greatest influence, and which they probably acquired for themselves only after a long time, as well as many worthy efforts to serve their country, and when they had proved themselves superior to the rest of their brethren. Power originally has always excellence of some kind for its basis; and, since the kind of power exerted by the Magi was the highest on earth, as being concerned with religion, so is it certain that they surpassed their fellow-countrymen in all the finer and loftier points of character. As among other ancient nations, as the Egyptians, and Hebrews, for instance, so among the Medes, the priestly caste had not only religion, but the arts and all the higher culture, in their charge. Their name points immediately to their sacerdotal character (from *Mag* or *Mog*, which in the Pehlvi denotes 'priest'), either because religion was the chief object of their attention, or more probably because, at the first, religion and art were so allied as to be scarcely more than different expressions of the same idea.

Little in detail is known of the Magi during the independent existence of the Median government; they appear in their greatest glory after the Medes were united with the Persians. This doubtless is owing to the general imperfection of the historical materials which relate to the earlier periods. So great, however, was the influence which the Magi attained under the united empire, that the Medes were not ill compensated for their loss of national independence. Under the Medo-Persian sway the Magi formed a sacred caste or college, which was very famous in the ancient world (Xenoph. *Cyrop.* viii. 1. 23; Ammian. Marcell. xxiii. 6; Heeren, *Ideen*, i. 451; Schlosser, *Universal Uebers.* i. 278). Porphyry (*Abst.* iv. 16) says, 'the learned men who are engaged among the Persians in the service of the Deity are called Magi;' and Suidas, 'Among the Persians the lovers of wisdom (*φιλόσοφοι*) and the servants of God are called Magi.' In the earlier periods of the world, science, being built altogether on appearances, comprised and sanctioned error as well as truth; and, when cultivated in close connection with a corrupt form of religion, could hardly fail to produce a plentiful crop of tares: hence divination, astrology, and magic. How completely the last is to be traced ultimately to the East appears from the word itself, derived as it is from Magi. According to Strabo (tom. ii. p. 1084, ed. Falcon.) the Magi practised different sorts of divination—1. by evoking the dead; 2. by cups or dishes (Joseph's divining cup, Gen. xliv. 5); 3. by means of water. By the employment of these means the Magi affected to disclose the future, to influence the present, and to call the past to their aid. Even the visions of the night they were accustomed to interpret, not empirically, but according to such established and systematic rules as a learned priesthood might be expected to employ (Strabo, xvi. p. 762; Cic. *De Divin.* i. 41; Ælian. *V. H.* ii. 17). The success, however, of their efforts over the invisible world, as well as the holy office which they exercised, demanded in themselves peculiar cleanliness of body, a due regard to which and to the general principles of their caste would naturally be followed by professional prosperity, which in its turn conspired with prevailing superstition to give the Magi great social consideration, and make them of high importance before kings and princes (Diog. Laert. ix. 7. 2)—an influence which they appear to have sometimes abused, when, descending from the peculiar duties of their high office, they took part in the strife and competitions of politics, and found themselves sufficiently powerful even to overturn thrones (Herod. iii. 61, sq.).

Abuses bring reform; and the Magian religion, which had lost much of its original character, and been debased by some of the lowest elements of earthly passions, loudly called for a renovation, when Zoroaster appeared to bring about the needful change. As to the time of his appearance, and in general the particulars of his history, differences of opinion prevail, after all the critical labour that has been expended on the subject. Winer (*Real-wört.*) says he lived in the second half of the seventh century before Christ. He was not the founder of a new system, but the renovator of an old and corrupt one, being, as he himself intimates (Zendavesta, i. 43), the restorer of the word which Ormuzd had formerly revealed, but which the influence of Dews had degraded into a false and deceptive magic. To destroy this, and restore the pure law of Ormuzd, was Zoroaster's mission. After much and long-continued opposition on the part of the adherents and defenders of existing corruptions, he succeeded in his virtuous purposes, and caused his system eventually to prevail. The Magi, as a caste, did not escape from his reforming hand. He appears to have remodelled their institute, dividing it into three great classes:—1. Herbeds, or learners; 2. Mobeds, or masters; 3. Destur Mobeds, or perfect scholars (Zendav. ii. 171, 261). The Magi alone he allowed to perform the religious rites; they possessed the forms of prayer and worship; they knew the ceremonies which availed to conciliate Ormuzd, and were obligatory in the public offerings (Herod. i. 132). They accordingly became the sole medium of communication between the Deity and his creatures, and through them alone Ormuzd made his will known; none but them could see into the future, and they disclosed their knowledge to those only who were so fortunate as to conciliate their good will. Hence the power which the Magian priesthood possessed. The general belief in the trustworthiness of their predictions, especially when founded on astrological calculations, the all but universal custom of consulting the will of the divinity before entering on any important undertaking, and the blind faith which was reposed in all that the Magi did, reported, or commanded, combined to create for that sacerdotal caste a power, both in public and in private concerns, which has probably never been exceeded. Indeed the soothsayer was a public officer, a member, if not the president, of the privy council in the Medo-Persian court, demanded alike for show, in order to influence the people, and for use, in order to guide the state. Hence the person of the monarch was surrounded by priests, who, in different ranks, and with different offices, conspired to sustain the throne, uphold the established religion, and conciliate or enforce the obedience of the subject. The fitness of the Magi for, and their usefulness to, an Oriental court were not a little enhanced by

the pomp of their dress, the splendour of their ceremonial, and the number and gradation of the sacred associates. Well may Cyrus, in uniting the Medes to his Persian subjects, have adopted, in all its magnificent details, a priesthood which would go far to transfer to him the affections of his conquered subjects, and promote, more than any other thing, his own aggrandisement and that of his empire. Neither the functions nor the influence of this sacred caste were reserved for peculiar, rare, and extraordinary occasions, but ran through the web of human life. At the break of day they had to chant the divine hymns. This office being performed, then came the daily sacrifice to be offered, not indiscriminately, but to the divinities whose day in each case it was—an office therefore which none but the initiated could fulfil. As an illustration of the high estimation in which the Magi were held, it may be mentioned that it was considered a necessary part of a princely education to have been instructed in the peculiar learning of their sacred order, which was an honour conceded to no other but royal personages, except in very rare and very peculiar instances (Cicero, *De Divin.* i. 23; Plutarch, *Themist.*). This Magian learning embraced everything which regarded the higher culture of the nation, being known in history under the designation of the law of the Medes and Persians. It comprised the knowledge of all the sacred rites, customs, usages, and observances, which related not merely to the worship of the gods, but to the whole private life of every worshipper of Ormuzd —the duties which, as such, he had to observe, and the punishments which followed the neglect of these obligations; whence may be learnt how necessary the act of the priest on all occasions was. Under the veil of religion the priest had bound himself up with the entire of public and domestic life. The judicial office, too, appears to have been, in the time of Cambyses, in the hands of the Magi; for from them was chosen the college or bench of royal judges, which makes its appearance in the history of that monarch (Herod. iv. 31; vii. 194; Esther i. 13). Men who held these offices, possessed this learning, and exerted this influence with the people, may have proved a check to Oriental despotism, no less powerful than constitutional, though they were sometimes unable to guarantee their own lives against the wrath of the monarch (Herod. vii. 194; Dan. ii. 12); and they appear to have been well versed in those courtly arts by which the hand that bears the sword is won to protect instead of destroying. Thus Cambyses, wishing to marry his sister, inquired of the Magi (like our Henry VIII.) if the laws permitted such an union: 'We have,' they adroitly answered, 'no law to that effect; but a law there is which declares that the king of the Persians may do what he pleases' (Heeren, *Ideen*, 1; Hyde, *Rel. Vet. Persarum;* Brisson, *Princip. Pers.*).

If we turn to the books of Scripture we find the import of what has been said confirmed; and hence are justified in holding that the Scriptures have an historical worth which learning may illustrate, but cannot, even when guided by infidelity, invalidate, much less destroy. Let the book of Daniel be studied on this point. There the great influence of the Magi is well illustrated, and it is seen that their functions were not only numerous, but held in the highest regard. In the 1st verse of the 2nd chapter, Nebuchadnezzar, being troubled by a dream, invokes the aid of none other than the magicians, and the astrologers, and the sorcerers, the Chaldæans, and the soothsayers (ver. 27). The precise import of some of these terms it may not be easy to assign; but it is clear that there were various kinds of wise men, and it is probable that the above were classes belonging to one great order, which comprised, under the general name of Magi, all who were engaged in the service of religion; so that we find here an ample priesthood, a sacred college, graduated in rank and honour. Indeed, in Jer. xxxix. 3, we find this order or caste expressly so denominated, רב מג, which, in the English version, is given as a proper name, Rab-mag, which denotes the chief of the Magi, Summus Pontifex, or high priest—an office to which Daniel was elevated in consequence of his skill in interpreting the king's dream after the established authorities had failed (Dan. ii. 48). The acts which accompanied this appointment serve as illustrations of the high reverence in which the Magi were held: 'Then the king Nebuchadnezzar fell upon his face and worshipped Daniel, and commanded that they should offer an oblation and sweet odours unto him' (ver. 46; see also ver. 48). From the 49th verse it would seem not unlikely that the administration of justice in the last resort belonged to this priestly order, as we know it did to the hierarchy of northern and more modern courts.

The Magi were not confined to the Medes and Persians. Since they are mentioned by Herodotus as one of the original tribes of the Medes, they may have been primitively a Median priesthood. If so, they extended themselves into other lands. Possibly Magi may have been at first not the name of a particular tribe or priestly caste, but a general designation for priests or learned men; as Pharaoh denoted not an individual, but generally king or ruler. However this may be, the Chaldæans also had an organised order of Magi, a caste of sacerdotal scholars, which bore the name of 'wise men' (Jer. l. 35); 'the wise men of Babylon' (Dan. ii. 12), among whom Daniel is classed (ii. 18, 24). Among the Greeks and Romans they were known under the name of Chaldæans (Strabo, xvi. p. 762; Diog. Laert. *Proœm.* 1), and also of Magi (Diog. Laert. viii. 1. 3). They lived scattered over the land in different places (Dan. ii. 14; Strabo, xvi. p. 739), and had possessions of their own. The temple of Belus was employed by them for astronomical observations; but their astronomy was connected with the worship of the heavenly bodies practised by the Babylonians (Diod. Sic. ii. 31; Ephraem Syr. *Op.* ii. 488; consult Ideler, in the *Transactions of the Berlin Academy for* 1824-5), and was specially directed to vain attempts to foretell the future, predict the fate of individuals or of communities, and sway the present, in alliance with augury, incantation, and magic (A.Gell. iii. 10. 9; xiv. 1; Am. Marcell. xxiii. 6; p. 352, ed. Bipont; Diod. Sic. ii. 29; Isa. xlvii. 9, 13; Dan. ii.).

It is easy to understand how the lofty science (so called) of these Magi—lofty while its scholars surpassed the rest of the world in knowledge, and were the associates, the advisers, the friends, and the monitors of great and flourishing monarchs,

of indeed successively the rulers of the world—might, could indeed hardly fail, as resting on no basis of fact or reality, in process of time, to sink into its own native insignificance, and become either a mere bugbear to frighten the ignorant, or an instrument to aid the fraudulent: thus hastening on to the contempt into which all falsities are sure sooner or later to fall. The decline was indeed gradual; ages passed ere it was completed; but as soon as it ceased to have the support afforded by the mighty and splendid thrones of Asia, it began to lose its authority, which the progress of knowledge and the advent of Christ prevented it from ever regaining. Yet is it impossible to contemplate this, any more than any other powerful system of religious influence, without emotions that are akin to admiration. Even in the latter days of the Roman empire, however, a remnant of the Magian system was found, though in a low and degenerate condition. The civilized world was overrun with magicians, not very much more respectable than our modern conjurors, who managed to delude the ignorant vulgar, and sometimes to 'carry captive' the noble and the rich, or even to sway the councils of princes, by pretending to a knowledge and a power over the occult qualities and the more mighty agencies of earth, heaven, and hell. They could interpret the language of the stars; they could predict the future; they could expound dreams; they could cure otherwise incurable diseases; and the skill which an individual might be so happy as to possess, he, having derived it from some predecessor, who had again had it from another, himself the last in a long line of wise men, could, and for money or other considerations did, impart to others. Egypt and the East generally, Solomon, and Pharaoh were accounted the great fountains whence this much-esteemed knowledge and these dark mysteries were to be drawn (Othon. *Lex. Rabbin.* p. 101; Tacit. *Ann.* ii. 27; xii. 2. 32; vi. 29; Joseph. *De Bell. Jud.* ii. 7. 3). The case of Simon Magus (Acts viii. 9; see also Acts xiii. 6, sq.) may be taken as a specimen of these wandering impostors; and those who are curious to trace the steps by which the Magi declined and sunk may see the same Simon in conflict with Peter in the *Apostolical Constitutions*. The estimation, however, in which Simon is evidently held, as recorded in the Acts ('some great one,' &c.), gives reason to think that Magianism still retained a large share of its influence at the commencement of our era. It seems, indeed, to have held a sort of middle position, half way between its ancient splendour and its coming degradation: whence we may understand the propriety of the visit paid by the Magi to the new-born King of the Jews (Matt. ii., 'star in the East'). For if the system had been then sunk so low as to correspond in any degree with our conception of these pretended arts, it is difficult to assign, at least to the unbeliever, a sufficient reason why the visit was made, or at any rate why it was recorded; but its credibility is materially furthered if the circumstances of the case are such as to allow us to regard that visit as a homage paid by the representatives of the highest existing influences to the rising star of a new day, in the fuller light of which they were speedily to vanish.—J. R. B.

MAGICIANS. [MAGI.]

MAGOG (מָגוֹג; Sept. Μαγώγ), son of Japhet (Gen. x. 2). In Ezekiel (xxxviii. 2; xxxix. 6) it occurs as the name of a nation, coupled with Gog, and is supposed to represent certain Scythian or Tartar tribes descended from the son of Japhet [NATIONS, DISPERSION OF].

MAHALATH, the title of Psalms liii. and lxxxviii. [PSALMS.]

MAHANAIM (מַחֲנַיִם, *two hosts;* Sept. Μαναΐμ), a place beyond the Jordan, north of the river Jabbok, which derived its name from Jacob's having been there met by the angels on his return from Padan-aram (Gen. xxxii. 2). The name was eventually extended to the town which then existed, or which afterwards arose in the neighbourhood. This town was in the territory of the tribe of Gad (Josh. xiii. 26, 30), and was a city of the Levites (Josh. xxi. 39). It was in this city that Ish-bosheth, the son of Saul, reigned (2 Sam. ii. 8), probably because he found the influence of David's name less strong on the east than on the west of the Jordan. The choice, at least, seems to show that Mahanaim was then an important and strong place. Hence, many years after, David himself repaired to Mahanaim when he sought refuge beyond the Jordan from his son Absalom (2 Sam. xvii. 24, 27; 1 Kings ii. 8). We only read of Mahanaim again as the station of one of the twelve officers who had charge, in monthly rotation, of raising the provisions for the royal establishments under Solomon (1 Kings iv. 14). The site has not yet been identified. In Dr. Robinson's Arabic list of names of places in Jebel Ajlun (*Bib. Researches*, vol. iii. Append. xi. p. 166), we find *Mahneh*, and this may possibly prove to be Mahanaim.

MAHER-SHALAL-HASH-BAZ (מַהֵר שָׁלָל חָשׁ בַּז; Sept. Τοῦ ὀξέως προνομὴν ποιῆσαι σκύλων), words prognostic of the sudden attack of the Assyrian army ('he hasteth to the spoil'), which the prophet Isaiah was first commanded to write in large characters upon a tablet, and afterwards to give as a symbolical name to a son that was to be born to him (Isa. viii. 1, 3). It is, as Dr. Henderson remarks, the longest of any of the Scripture names, but has its parallels in this respect in other languages, especially in our own during the time of the Commonwealth.

MAHLON, one of the two sons of Elimelech and Naomi, and first husband of Ruth the Moabitess (Ruth i. 2, sq.). [RUTH.]

MAKKEDAH (מַקֵּדָה; Sept. Μακκηδά), a royal city of the ancient Canaanites (Josh. xii. 16), in the neighbourhood of which was the cave in which the five kings who confederated against Israel took refuge after their defeat (Josh. x. 10-29). It afterwards belonged to Judah (Josh. xv. 41). Makkedah is placed by Eusebius and Jerome 8 Roman miles to the east of Eleutheropolis (*Onomast.* s. v. Maceda).

MALACHI (מַלְאָכִי; Sept. Μαλαχίας; Vulg. *Malachias*), the last of the minor prophets, and consequently the latest writer in the canon of the Old Testament. Ch. iv. 4, 5, 6, might almost suggest that he was the last of the Hebrew prophets till John the Baptist appeared. Nothing is known of his person or history. It appears that he lived after Zechariah, since in his time the second

temple was already built (ch. iii. 10); and it is probable that he was contemporary with Nehemiah (comp. ch. ii. 11, with Neh. xiii. 23-27, and ch. iii. 8, with Neh. xiii. 10). Tradition, as usual, has not failed to supply the lack of authentic information. Malachi is represented to have been of the tribe of Zebulon, and a native of Sapha (Saphir?); to have died young, and to have been buried with his ancestors at Sapha, after having assisted as a member of the great Synagogue, on the re-establishment of order and prosperity in his country (Epiphanius, *De Proph. Vita et Interitu*, cap. xxii.; Isidor. *De Vita et Morte Sanct.* cap. li.).

The name Malachi (מלאכי) means, as some understand it, *my angel;* but it seems more correct to regard it as a contracted form of מלאכיה, *angel of Jehovah.* The traditionists already cited regard it as a proper name, given to the prophet on account of the beauty of his person and his unblemished life. The word translated 'angel,' however, means also a 'messenger,' angels being, in fact, the messengers of God; and as the prophets are often styled angels or messengers of Jehovah, it is supposed that 'Malachi' is merely a general title descriptive of this character, and not a proper name. It has been very generally supposed that it denotes Ezra. The Chaldee paraphrast is of this opinion, as is R. Joshua Ben Korcha and other Jewish writers; but Kimchi resists this, alleging that Ezra is never called a prophet, but a scribe, and Malachi never a scribe, but a prophet. R. Nachman supposes Malachi to have been Mordecai, and that he was so called because he was second to the king; the force of which reason is not very apparent. The current opinion of the Jews is that of the Talmud, in which this question is mooted, and which decides, it seems to us rightly, that this prophet is not the same with Mordecai, or Ezra, or Zerubbabel, or Nehemiah, whose claims had all been advocated by different parties, but a distinct person named Malachi (*T. Bab. Megillah*, fol. xv. 1). Jerome, however, supports the claim of Ezra (*Comment. in Mal.* i. 1), and many modern commentators have yielded to his authority; but the prevailing opinion is in favour of the separate existence of Malachi. Some, however, have been content to leave the authorship unsettled, and to suppose that the title is taken from the promise of an angel or messenger of the Lord, in ch. iii. 1, 'Behold, I send *my messenger*,' &c. where the word (מלאכי *malachi*) is the very same that forms the title of the book. Considering the peculiar importance of this text, which was fulfilled in John the Baptist, the harbinger of the new covenant, it cannot be denied that there is much force in this conjecture, although that for which we have intimated a preference seems to offer still stronger claims in its favour. By some the word *malachi* has been taken very literally to denote an incarnate angel. This was one of the many vagaries of Origen, and it has been adopted by a good number of ancient and modern commentators, the rather, perhaps, as the Septuagint affords it some countenance by translating the first verse, Λῆμμα λόγου κυρίου ἐπὶ τὸν Ἰσραὴλ ἐν χειρὶ ἀγγέλου αὐτοῦ—'The burden of the word of the Lord to Israel by the hand of *his angel.*'

Although there has been a faint disposition to regard Zechariah as the last of the prophets (Lactant. *De Vera Sapent.* iv. 5), the received opinion decides for Malachi. Accordingly Aben Ezra calls him סוף הנביאים, 'the end of the prophets;' Kimchi, אחרן שבם, 'the last of them;' and not seldom he is distinguished by the Rabbins as חותם הנביאים, 'the seal of the prophets.' But although it is well agreed that Malachi was the last of the prophets, the date of his prophecy has been variously determined. Usher makes him contemporary with Nehemiah, in B.C. 416; and the general opinion that this prophet was contemporary with, or immediately followed, Nehemiah, makes most of the proposed alternatives range within a few years of that date. He censures the same offences which excited the indignation of Nehemiah, and which that governor had not been able entirely to reform. Speaking of God's greater kindness to the Israelites than to the Edomites, he begins with declaiming against the priests for their profane and mercenary conduct, and against the people for their multiplied divorces and intermarriages with idolatrous nations; he threatens them with punishment and rejection, declaring that God would 'make his name great among the Gentiles' (ch. i. 11), for that he was wearied with the impiety of Israel (ch. i. ii.). From this the prophet takes occasion solemnly to proclaim that the Lord whom they sought should suddenly come to his temple, preceded by that messenger who, like a harbinger, should prepare his way; that the Lord when he should appear would purify the sons of Levi from their unrighteousness, and refine them as metal from the dross (ch. iii. 1-3); that then 'the offering of Judah,' the spiritual sacrifice of the heart, 'should be pleasant to the Lord,' as was that of the patriarchs and their uncorrupted ancestors (ch. iii. 4); and that the Lord would quickly exterminate the corruptions and adulteries which prevailed. The prophet then proceeds with an earnest exhortation to repentance; promising high rewards and remembrance to the righteous in that last day when the Lord shall make up his peculiar treasures, and finally establish a distinction of doom and condition between the righteous and the wicked (ch. iii. 16-18). Malachi then concludes with an impressive assurance of approaching salvation to those who feared God's name from that 'sun of righteousness,' who should arise with healing in his wings, and render them triumphant; enjoining in the solemn close of his exhortation, when uttering as it were the last admonition of the Jewish prophets, an observance of the law of Moses, till the advent of Elijah the prophet (ch. iv. 5, or John the Baptist, who came in the spirit and power of Elias, Mark xi. 12; Luke i. 17), who before the coming of that 'great and dreadful day of the Lord, should turn the hearts of the fathers to the children, and the heart of the children to their fathers' (ch. iv.). Thus Malachi sealed up the volume of prophecy with the description of that personage at whose appearance the evangelists begin their gospel history.

The claim of the book of Malachi to its place in the canon of the Old Testament has never been disputed; and its authority is established by the references to it in the New Testament (Matt. xi. 10; xvii. 12; Mark i. 2; ix. 11, 12; Luke i. 17; Rom. ix. 13).

The manner of Malachi offers few, if any, distinguishing characteristics. The style, rhythm, and imagery of his writings are substantially those of the old prophets, but they possess no remarkable vigour or beauty. This is accounted for by his living during that decline of Hebrew poetry, which we trace more or less in all the sacred writings posterior to the Captivity.

In consequence of the peculiar questions which arise out of this prophecy and its authorship, the literature connected with Malachi is very ample. Copious notices will be found in the Latin, German, and English Introductions to the Old Testament, and in the Prefatory Dissertations of the various commentators. The principal separate works on the subject are:—Chytræus, *Explicat. Malach. Prophet.* Rost. 1568; Grynæus, *Hypomnemata in Malach.* Frcf. 1652; Stock, *Commentary upon the whole Prophesye of Malachy*, Lond. 1641; Schlater, *A Brief and Plain Commentary upon the whole Prophecie of Malachy*, Lond. 1650; Ursinus, *Comment. in Malach.* Frcf. 1652; Sal. van Til, *Malach. illustratus*, Lug. Bat. 1701; Wesselius, *Malachias enucleatus*, Lubeck, 1729; *Malachia Propheta c. Targum Jonathis et Radaki Raschii ac Aben-Esræ Comment. et Interpret.* J. C. Hebenstreit, Lips. 1746; Venema, *Comment. in Malach.* Leovard. 1759; Bahrdt, *Comment. in Malachiam, c. examine verss. vett. et lectt. variant. Houbigantii*, Lips. 1768; J. M. Faber, *Comment. in Malachiam*, Onold. 1779; J. F. Fischer, *Observatt. Crit. in Malachiam*, Lips. 1759; J. M. Faber, *Abweischungen der alten Uebersetzer d. Propheten Malachias*, in Eichhorn's *Repert.* vi. 104-124.

MALCHUS (Μάλχος), the servant of the high-priest Caiaphas, whose right ear was cut off by Peter in the garden of Gethsemane (John xviii. 10). The name of Malchus was not unfrequent among the Greeks (see Wetstein, *in loc.*); but as it was usually applied to persons of Oriental countries, there is reason to suppose it derived from the Hebrew מלך, *melech*, and, if so, it exactly corresponds to our title 'King.' Some, however, compare it with the Hebrew מלוך *mallauch*, 'counsellor.'

MALLUACH (מַלּוּחַ) occurs only once in Scripture, namely, in the passage where Job complains that he is subjected to the contumely of the meanest people, those 'who cut up *mallows* (*malluach*) by the bushes—for their meat' (Job xxx. 4). The proper meaning of the word *malluach* has been a subject of considerable discussion among authors, in consequence, apparently, of its resemblance to the Greek μαλάχη (*malakhe*), signifying 'mallow,' and also to *maluch*, which is said to be the Syriac name of a species of *Orache*, or *Atriplex*. It is difficult, if not impossible, to say which is the more correct interpretation, as both appear to have some foundation in truth, and seem equally adapted to the sense of the above-quoted passage. The *malakhe* of the Greeks is distinguished by Dioscorides into two kinds; of which he states that the cultivated is more fit for food than the wild kind. Arab authors apply the description of Dioscorides to *khoob-bazee*, a name which in India we found applied both to species of *Malva rotundifolia* and of *M. sylvestris*, which extend from Europe to the north of India, and which are still used as food in the latter country, as they formerly were in Europe, and probably in Syria. That some kind of mallow has been so used in Syria we have evidence in the quotation made by Mr. Harmer from Biddulph, who says, 'We saw many poor people collecting *mallows* and three-leaved grass, and asked them what they did with it; and they answered, that it was all their food, and that they boiled it, and did eat it.' Dr. Shaw, in his *Travels*, on the contrary, observes that '*Mellou-kcah*, or *mulookiah*, מלוחיא, as in the Arabic, is the same with the *melochia* or *corchorus*, being a podded species of mallows, whose pods are rough, of a glutinous substance, and used in most of their dishes. *Mellou-keah* appears to be little different in name from מלוח (Job xxx. 4), which we render "mallows;" though some other plant, of a more saltish taste, and less nourishing quality, may be rather intended.' The plant alluded to is *Corchorus olitorius*, which has been adopted and figured in her *Scripture Herbal* by Lady Calcott, who observes that this plant, called Jews' Mallow, appears to be certainly that mentioned by the patriarch. Avicenna calls it *olus Judaicum*; and Rauwolf saw the Jews about Aleppo use the leaves as potherbs; 'and this same mallow continues to be eaten in Egypt and Arabia, as well as Palestine.' But there are so many plants of a mild mucilaginous nature which are used as articles of diet in the East, that it is hardly possible to select one in preference to another, unless we find a similarity in the name. Thus species of *Amaranthus*, of *Chenopodium*, of *Portulacca*, as well as the above *Corchorus*, and the *mallow*, are all used as food, and might be adduced as suitable to the above passages, since most of them are found growing wild in many parts of the countries of the East.

The learned Bochart, however, contends (*Hieroz.* part i. t. iii. c. 16) that the word *malluach* denotes a saltish plant called ἅλιμος by the Greeks, and which with good reason is supposed to be the *Atriplex Halimus* of botanists, or tall shrubby *Orache*. The Septuagint, indeed, first gave ἅλιμα as the interpretation of *malluach*. Celsius adopts it, and many others consider it as the most correct. A good abstract of Bochart's arguments is given by Dr. Harris. In the first place the most ancient Greek translator interprets *malluach* by *halimos*. That the Jews were in the habit of eating a plant called by the former name, is evident from the quotation given by Bochart from the Talmudical Tract *Kidduschin*, (c. iii. 66), where it is said: 'Ivit in urbem Cochalith, quæ est in deserto. Et invitatis omnibus sapientibus Israelis dixit, Patres nostri (præ inopia) *malluchim* comederunt quo tempore laborabant in ædificatione Templi secundi: et nos quoque *malluchim* comedimus in memoriam patrum nostrorum. Et allati sunt *malluchim* super mensas aureas, et comederunt.' By Ibn Buetar, *malookh* is given as the synonyme of *el kutuf al buhuri*, i. e. the sea-side *Kutuf* or *Orache*, which is usually considered to be the *Atriplex marinum*, now *A. Halimus*. Bochart, indeed, remarks: 'Dioscorides libro primo halimum, quod populus Syriæ vocat *maluch*, ait esse arbustum, ex quo fiunt sepes, thymo simile, nisi quod caret spinis, et folio simili oleæ, sed latiori, et crescit

ad litora maris, et circa sepes.' This notice evidently refers to the Ἅλιμος of Dioscorides (Diosc. i. 121), which, as above stated, is supposed to be the *Atriplex Halimus* of botanists, and the *Kutuf buhuree* of the Arabs, while the ἀτράφαξις of the same author (ii. 145) is their *kutuf* and *Atriplex hortensis*, Linn. Bochart quotes Galen as describing the tops of the former as being used for food when young. Dioscorides also says that its leaves are employed for the same purpose. What the Arab writers state as to the tops of the plants being eaten, corresponds to the description of Job, who states that those to whom he refers *cropped upon the shrub*—which by some is supposed to indicate that the *malluach* grew near hedges. These, however, do not exist in the desert. There is no doubt that species of *Orache* were used as articles of diet in ancient times, and, probably, still are so in the countries where they are indigenous; but there are many other plants, similar in nature, that is, soft and succulent, and usually very saline, such as the *Salsolas*, *Salicornias*, &c., which, like the species of *Atriplex*, belong to the same natural family of *Chenopodeæ*, and which from their saline nature have received their respective names. Many of these are well known for yielding soda by incineration. In conformity with this, Mr. Good thinks that 'the real plant is a species of *Salsola*, or "salt-wort;" and that the term ἅλιμα, employed in the Greek versions, gives additional countenance to this conjecture.' Some of these are shrubby, but most of them are herbaceous, and extremely common in all the dry, desert, and saline soils which extend from the south of Europe to the north of India. Most of them are saline and bitter, but some are milder in taste and mucilaginous, and are therefore employed as articles of diet, as spinach is in Europe. *Salsola indica*, for instance, which is common on the coasts of the Peninsula of India, Dr. Roxburgh states, saved the lives of many thousands of the poor natives of India during the famine of 1791-2-3; for while the plant lasted, most of the poorer classes who lived near the sea had little else to eat; and indeed its green leaves ordinarily form an essential article of the food of those natives who inhabit the maritime districts.—J. F. R.

MAMMON (Μαμωνᾶς), a Chaldee word (מָמוֹנָא), signifying 'wealth' or 'riches,' and bearing that sense in Luke xvi. 9, 11; but also used by our Saviour (Matt. vi. 24; Luke xvi. 13) as a personification of the god of riches: 'Ye cannot serve God and Mammon.' Gill, on Matt. vi. 24, brings a very apt quotation from the Talmud Hieros. (*Yoma*, fol. 38), in confirmation of the character which Christ in these passages gives of the Jews in his day: 'We know that they believed in the law, and took care of the commandments, and of the tithes, and that their whole conversation was good—only that they אוהבין את הממון, *loved the Mammon*, and hated one another without cause.'

MAMRE (מַמְרֵא; Sept. Μαμβρῆ), the name of an Amoritish chief who, with his brothers Aner and Eshcol, was in alliance with Abraham (Gen. xiv. 13, 24). Hence, in the Authorized Version, 'the oaks of Mamre,' 'plain of Mamre' (Gen. xiii. 18; xviii. 1), or simply 'Mamre' (xxiii. 17, 19; xxxv. 27), a grove in the neighbourhood of Hebron.

1. MAN. Four Hebrew words are thus translated in the English Version (אָדָם, אִישׁ, אֱנוֹשׁ, גֶּבֶר). They are used with as much precision as the terms of like import in Greek and Roman writers. Nor is the subject merely critical; it will be found connected with accurate interpretation. (*a.*) אדם is 1. the proper name of the first man, though Gesenius thinks that when so applied it has the force rather of an appellative, and that, accordingly, in a translation, it would be better to render it *the man*. It seems, however, to be used by St. Luke as a proper name in the genealogy (iii. 38); by St. Paul (Rom. v. 14; 1 Tim. ii. 13, 14); and by Jude (14). St. Paul's use of it in 1 Cor. xv. 45 is remarkably clear: *ὁ πρῶτος ἄνθρωπος* Ἀδάμ, 'the first man, Adam.' It is so employed throughout the Apocrypha without exception (2 Esdras iii. 5, 10, 21, 26; iv. 30; vi. 54; vii. 11, 46, 48; Tobit viii. 6; Ecclus. xxxiii. 10; xl. 1; xlix. 16); and by Josephus (*ut infra*). Gesenius argues that, as applied to the first man, it has the article almost without exception. It is doubtless often thus used as an appellative, but the exceptions are decisive: Gen. iii. 17, לאדם, 'to Adam he said,' and see Sept., Deut. xxxii. 8, בני אדם, 'the descendants of Adam;' 'if I covered my transgressions as Adam' (Job xxxi. 33); 'and unto Adam he said,' &c. (Job xxviii. 28), which, when examined by the context, seems to refer to a primeval revelation not recorded in Genesis (see also Hos. vi. 7, Heb. or margin). Gesenius further argues that the woman, אשה, has an appropriate name, חוה, but that the man has none. But the name Eve was given to her by Adam, and, as it would seem, under a change of circumstances; and though the *divine* origin of the word Adam, as a proper name of the first man, is not recorded in the history of the creation, as is that of the day, night, heaven, earth, seas, &c. (Gen. i. 5, 8, 10), yet its divine origin as an appellative is recorded (comp. Heb., Gen. i. 26; v. 1); from which state it soon became a proper name, Dr. Lee thinks from its frequent occurrence, but we would suggest, from its peculiar appropriateness to 'the man,' who is the more immediate *image* and glory of God' (1 Cor. xi. 7). Other derivations of the word have been offered, as אדם, 'to be red' or 'red-haired;' and hence some of the Rabbins have inferred that the first man was so. This derivation is as old as Josephus, who says that 'the first man was called (*ἐκλήθη*) Adam, because he was formed *ἀπὸ τῆς πυῤῥας γῆς*, 'from the red earth,' and adds, *τοιαῦτη γὰρ ἐστὶν ἡ παρθένος γῆ καὶ ἀληθινή*, 'for the true virgin earth is of this colour' (*Antiq.* i. 1, § 2). But is this true? and when man is turned again to his earth, is *that* red? The truer origin of the word in Gen. i. 26, v. 1, has already been pointed out, viz. דם, *likeness*, because man was made בדמות, *in the likeness of God*. 2. It is the generic name of the human race as originally created, and afterwards, like the English word man, person, whether man or woman, equivalent to the Latin *homo*, and Gr. *ἄνθρωπος* (Gen. i. 26, 27; v. 2; viii. 21; Deut. viii. 3; Matt. v. 13, 16; 1 Cor. vii. 26), and even without regard to age (John xvi. 21). It is applied to women only, ונפש אדם מן הנשים, 'the *human* persons of women' (Num. xxxi. 35), Sept. *ψυχαὶ ἀνθρώπων ἀπὸ τῶν γυναικῶν*. Thus *ἡ ἄνθρωπος* means a

woman (Herod. i. 60), and especially among the orators (comp. 1 Macc. ii. 38). 3. It denotes man in opposition to woman (Gen. iii. 12; Matt. xix. 10), though, more properly, the husband in opposition to the wife (comp. 1 Cor. vii. 1). 4. It is used, though very rarely, for those who maintain the dignity of human nature, a *man*, as we say, meaning one that deserves the name, like the Latin *vir*, and Greek *ἀνήρ*: 'One man in a thousand have I found, but a woman,' &c. (Eccles. vii. 28). Perhaps the word here glances at the original uprightness of man. 5. It is frequently used to denote the more degenerate and wicked portion of mankind: an instance of which occurs very early, 'The sons, or worshippers, of God married the daughters of men, or the irreligious' (Gen. vi. 2). We request a careful examination of the following passages by their respective contexts, Ps. xi. 4; xii. 1, 2, 8; xiv. 2, &c. The latter passage is often adduced to prove the *total* depravity of the *whole human race*, whereas it applies only to the more abandoned Jews, or possibly to the more wicked Gentile adversaries of Israel. It is a description of 'the fool,' or wicked man (ver. 1), and of persons of the same class (ver. 1, 2), 'the workers of iniquity, who eat up God's people like bread, and called not upon the name of the Lord' (ver. 4). For the true view of St. Paul's quotations from this Psalm (Rom. iii. 10), see M'Knight, *in loc.*: and observe the use of the word 'man' in Luke v. 20; Matt. x. 17. It is applied to the Gentiles (Matt. xxvii. 22; comp. Mark x. 33, and Mark ix. 31; Luke xviii. 32; see Mounteney, *ad Demosth. Phil.* i. 221). 6. The word is used to denote other men, in opposition to those already named, as, 'both upon Israel and other men' (Jer. xxxii. 20), *i. e.* the Egyptians. 'Like other men (Ps. lxxiii. 5), *i. e.* common men, in opposition to better men (Ps. lxxxii. 7); men of inferior rank, as opposed to אִישׁ, men of higher rank (see Heb., Is. ii. 9; v. 15; Ps. xlix. 3; lxii. 10; Prov. viii. 4). The phrase 'son of man,' in the Old Testament, denotes man as frail and unworthy (Num. xxiii. 19; Job. xxv. 6; Ezek. ii. 1, 3); as applied to the prophet, so often, it has the force of 'oh mortal!' (*b.*) אִישׁ is a man in the distinguished sense, like the Latin *vir*, and Greek *ἀνήρ*. It is used in all the several senses of the Latin *vir*, and denotes a man as distinguished from a woman (1 Sam. xvii. 33; Matt. xiv. 21); as a husband (Gen. iii. 16; Hos. ii. 16); and in reference to excellent mental qualities. A beautiful instance of the latter class occurs in Jer. v. 1: 'Run ye to and fro through the streets of Jerusalem, and see now, and know, and seek in the broad places thereof, if ye can find *a man* [אִישׁ], if there be any that executeth judgment, that seeketh the truth; and I will pardon it.' This reminds the reader of the philosopher who went through the streets of Athens with a lighted lamp in his hand, and being asked what he sought, said, 'I am seeking to find a man' (see Herodot. ii. 120; Hom. *Il.* v. 529). It is also used to designate the superior classes (Prov. viii. 4; Ps. cxli. 4, &c.), a courtier (Jer. xxxviii. 7), the male of animals (Gen. vii. 2). Sometimes it means men in general (Exod. xvi. 29; Mark vi. 44).

(*c.*) אֱנוֹשׁ, mortals, *βροτοί*, as transient, perishable, liable to sickness, &c.: 'Let no man [margin, 'mortal man'] prevail against thee' (2 Chron. xiv. 11). 'Write with the pen of the common man' בחרט אנוש (Isa. viii. 1), *i. e.* in a common, legible character (Job xv. 14; Ps. viii. 5; ix. 19, 20; Isa. li. 7; Ps. ciii. 15). It is applied to women (Josh. viii. 25). (*d.*) גֶּבֶר, *vir*, man, in regard to strength, &c. All etymologists concur in deriving the English word 'man' from the superior powers and faculties with which man is endowed above all earthly creatures; so the Latin *vir*, from *vis, vires;* and such is the idea conveyed by the present Hebrew word. It is applied to man as distinguished from woman: 'A man shall not put on a woman's garment' (Deut. xxii. 5), like *ἄνθρωπος* in Matt. viii. 9; John i. 6; to men as distinguished from children (Exod. xii. 37); to a male child, in opposition to a female (Job iii. 3; Sept. *ἄρσεν*). It is much used in poetry: 'Happy is the man' (Ps. xxxiv. 9; xl. 5; lii. 9; xciv. 12). Sometimes it denotes the species at large (Job iv. 17; xiv. 10, 14). For a complete exemplification of these words, see the lexicons of Gesenius and Schleusner, &c. Some peculiar uses of the word in the New Testament remain to be noticed. 'The Son of Man,' applied to Our Lord only by himself and St. Stephen (Acts vii. 56), is the Messiah in human form. Schleusner thinks that the word in this expression always means woman, and denotes that he was the promised Messiah, born of a virgin, who had taken upon him our nature to fulfil the great decree of God, that mankind should be saved by one in their own form. 'Ο *παλαιός*, 'the old man,' and *ὁ καινός*, 'the new man'—the former denoting unsanctified disposition of heart, the latter the new disposition created and cherished by the gospel; *ὁ ἔσω ἄνθρωπος*, 'the inner man;' *ὁ κρυπτὸς τῆς καρδίας ἄνθρωπος*, 'the hidden man of the heart,' as opposed to the *ὁ ἔξω ἄνθρωπος*, 'the external visible man.' 'A man of God,' first applied to Moses (Deut. xxxiii. 1), and always afterwards to a person acting under a divine commission (1 Kings xiii. 1; 1 Tim. vi. 11; *et alibi*). *ὁ ἄνθρωπος τῆς ἁμαρτίας*, that impious man, the *ὁ ἄνομος*, 'the lawless one' (2 Thess. ii. 3), Sept. for אִישׁ אוֹן (Isa. lv. 7); angels are styled men (Acts i. 10).—J. F. D.

2. MAN (מָן; Sept. *μαννά*), or MANNA. The name given to the miraculous food upon which the Israelites were fed for forty years, during their wanderings in the desert. The same name has in later ages been applied to some natural productions, chiefly found in warm dry countries, but which have little or no resemblance to the original manna. This is first mentioned in Exod. xvi. It is there described as being first produced after the eighth encampment in the desert of Sin, as white like hoar frost (or of the colour of *bdellium*, Num. xi. 7), round, and of the bigness of coriander seed (*gad*). It fell with the dew every morning, and when the dew was exhaled by the heat of the sun, the manna appeared alone, lying upon the ground or the rocks round the encampment of the Israelites. 'When the children of Israel saw it, they said one to another, *What is it?* for they knew not what it was' (Exod. xvi. 15). In the authorized, and some other versions, this passage is inaccurately translated—which indeed is apparent from the two parts of the sentence contradicting each other. In the Septuagint the substance is almost always called *manna* instead of *man*. Josephus (*Antiq.* iii. 1. § 10), as quoted by Dr. Harris, says: 'The Hebrews call this food *manna*, for the particle

man in our language is the asking of a question, *What is this?* (*man-hu*). Moses answered this question by telling them, 'This is the bread which the Lord hath given you to eat.' We are further informed that the manna fell every day, except on the Sabbath. Every sixth day, that is on Friday, there fell a double quantity of it. Every man was directed to gather an omer (about three English quarts) for each member of his family; and the whole seems afterwards to have been measured out at the rate of an omer to each person: 'He who gathered much had nothing over, and he who gathered little had no lack.' That which remained ungathered dissolved in the heat of the sun, and was lost. The quantity collected was intended for the food of the current day only; for if any were kept till next morning, it corrupted and bred worms. Yet it was directed that a double quantity should be gathered on the sixth day for consumption on the Sabbath. And it was found that the manna kept for the Sabbath remained sweet and wholesome, notwithstanding that it corrupted at other times, if kept for more than one day. In the same manner as they would have treated grain, they reduced it to meal, kneaded it into dough, and baked it into cakes, and the taste of it was like that of wafers made with honey, or of fresh oil. In Num. xi. 6-9, where the description of the manna is repeated, an omer of it is directed to be preserved as a memorial to future generations, 'that they may see the bread wherewith I have fed you in the wilderness;' and in Joshua v. 12 we learn that after the Israelites had encamped at Gilgal, and 'did eat of the old corn of the land, the manna ceased on the morrow after, neither had the children of Israel manna any more.'

397. [1. Alhagi maurorum. 2. Tamarix gallica.]

This miracle is referred to in Deut. viii. 3; Neh. ix. 20; Ps. lxxviii. 24; John vi. 31, 49, 58; Heb. ix. 4. Though the manna of Scripture was so evidently miraculous, both in the mode and in the quantities in which it was produced, and though its properties were so different from any thing with which we are acquainted, yet, because its taste is in Exodus said to be like that of wafers made with honey, many writers have thought that they recognised the manna of Scripture in a sweetish exudation which is found on several plants in Arabia and Persia. The name *man*, or *manna*, is applied to this substance by the Arab writers, and was probably so applied even before their time. But the term is now almost entirely appropriated to the sweetish exudation of the ashes of Sicily and Italy (*Ornus Europæa* and *Fraxinus rotundifolia*). These, however, have no relation to the supposed manna of Scripture. Of this one kind is known to the Arabs by the name of *guzunjbeen*, being the produce of a plant called *guz*, and which is ascertained to be a species of tamarisk. The same species seems also to be called *toorfa*, and is common along different parts of the coast of Arabia. It is also found in the neighbourhood of Mount Sinai. Burckhardt, while in the valley Wady el-Sheik, to the north of Mount Serbal, says: 'In many parts it was thickly overgrown with the tamarisk or *toorfa*; it is the only valley in the Peninsula where this tree grows at present in any quantity, though some small bushes are here and there met with in other parts. It is from the *tarfa* that the manna is obtained; and it is very strange that the fact should have remained unknown in Europe till M. Seetzen mentioned it in a brief notice of his 'Tour to Sinai,' published in the *Mines de l'Orient*. The substance is called by the Arabs *mann*. In the month of June it drops from the thorns of the tamarisk upon the fallen twigs, leaves and thorns, which always cover the ground beneath the tree in the natural state. The Arabs use it as they do honey, to pour over their unleavened bread, or to dip their bread into; its taste is agreeable, somewhat aromatic, and as sweet as honey. If eaten in any quantity it is said to be highly purgative.' He further adds, 'that the tamarisk is one of the most common trees in Nubia and throughout the whole of Arabia; on the Euphrates, on the Astaboras, in all the valleys of the Hedjaz and Bedja it grows in great quantities, yet nowhere but in the region of Mount Sinai did he hear of its producing manna. Ehrenberg has examined and described this species of tamarisk, which he calls *T. mannifera*, but which is considered to be only a variety of *T. gallica*. The manna he considers to be produced by the puncture of an insect which he calls *Coccus manniparus*. Others have been of the same opinion. When Lieut. Wellsted visited this place in the month of September, he found the extremities of the twigs and branches retaining the peculiar sweetness and flavour which characterize the manna. The Bedouins collect it early in the morning, and, after straining it through a cloth, place it either in skins or gourds; a considerable quantity is consumed by themselves; a portion is sent to Cairo; and some is also disposed of to the monks at Mount Sinai. The latter retail it to the Russian pilgrims.' 'The Bedouins assured me that the whole quantity collected throughout the Peninsula, in the most fruitful season, did not exceed 150 wogas (about 700 pounds); and that it was usually disposed of at the rate of 60 dollars the woga' (*Travels in Arabia*, vol. i. p. 511).

Another kind of manna, which has been supposed to be that of Scripture, is yielded by a thorny plant very common from the north of India to Syria, and which, by the Arabs, is called Al-haj; whence botanists have constructed the name Alhagi. The two species have

been called *Alhagi maurorum* and *A. desertorum*. Both species are also, by the Arabs, called *ooshter-khar*, or 'camel's-thorn;' and in Mesopotamia *agool*, according to some authorities, while by others this is thought to be the name of another plant. The *Alhagi maurorum* is remarkable for the exudation of a sweetish juice, which concretes into small granular masses, and which is usually distinguished by the name of Persian manna. The late Professor Don was so confident that this was the same substance as the manna of Scripture, that he proposed calling the plant itself *Manna hebraica*. The climates of Persia and Bokhara seem also well suited to the secretion of this manna, which in the latter country is employed as a substitute for sugar, and is imported into India for medicinal use through Caubul and Khorassan. In Arabian and Persian works on Materia Medica it is called *Turungbeen*. These two, from the localities in which they are produced, have alone been thought to be the manna of Scripture. But, besides these, there are several other kinds of manna. Burckhardt, during his journey through El-Ghor, in the valley of the Jordan, heard of the Beirnk honey. This is described as a substance obtained from the leaves and branches of a tree called *Gharb* or *Garrab*, of the size of an olive-tree, and with leaves like those of the poplar. When fresh this greyish coloured exudation is sweet in taste, but in a few days it becomes sour. The Arabs eat it like honey. One kind, called *Sheer-khisht*, is said to be produced in the country of the Uzbecs. A Caubul merchant informed the author of this article, that it was produced by a tree called *Gundeleh*, which grows in Candahar, and is about twelve feet high, with jointed stems. A fifth kind is produced on *Calotropis procera*, or the plant called *Ashur*. The sweet exudation is by Arab authors ranked with sugars, and called *Shukur-al-ashur*. It is described under this name by Avicenna, and in the Latin translation it is called *Zuccarum-al-husar*. A sixth kind, called *Bed-khisht*, is described in Persian works on Materia Medica, as being produced on a species of willow in Persian Khorassan. Another kind would appear to be produced on a species of oak, for Niebuhr says, 'At Merdin, in Mesopotamia, it appears like a kind of pollen, on the leaves of the tree called *Ballot* and *Afs* (or, according to the Aleppo pronunciation, *As*), which I take to be of the oak family. All are agreed, that between Merdin and Diarbekir manna is obtained, and principally from those trees which yield gall-nuts.' Besides these, there is a sweetish exudation found on the larch, which is called *Manna brigantiaca*, as there is also one kind found on the cedar of Lebanon. Indeed a sweetish secretion is found on the leaves of many other plants, produced sometimes by the plant itself, at others by the punctures of insects. It has been supposed, also, that these sweetish exudations being evaporated during the heat of the day in still weather, may afterwards become deposited, with the dew, on the ground, and on the leaves of plants; and thus explain some of the phenomena which have been observed by travellers and others. But none of these mannas explain, nor can it be expected that they should explain, the miracle of Scripture, by which abundance is stated to have been produced for millions, where hundreds cannot now be subsisted.—J. F. R.

MAN OF SIN. [Antichrist.]

MANAEN (Μαναήν), a Christian teacher at Antioch, who had been foster-brother of Herod Antipas (Acts xiii. 1). He is supposed to have been one of the seventy disciples, but this is uncertain, as no particulars of his life are known.

MANASSEH, TRIBE OF. When the tribe of Manasseh quitted Egypt, it numbered 32,200 adult males (Num. i. 34, 35), being 8300 less than the tribe of Ephraim, the younger son of Joseph. This was the lowest number of adult males in any tribe at that period; but if we add the two together, the tribe of Joseph, composed of these two tribes, reached to 72,700, which was more than any other tribe contained, except Judah. During the sojourn in the wilderness, the tribe of Manasseh rose to 52,700 (Num. xxvi. 34), being an increase of 20,500. This gave it rank in point of population as the sixth of the tribes, Judah, Issachar, Zebulon, Dan, and Asher only being more numerous. In the same period Ephraim had declined to nearly the same position which Manasseh had previously occupied, its numbers being reduced to 32,500. Yet the prophecy of Jacob was fulfilled, and, when settled in Canaan, Ephraim became superior in wealth, power and population, not only to Manasseh, but to all the tribes except Judah. One circumstance tending to weaken Manasseh may have been the division which took place in it on entering Palestine. The pastoral half of the tribe was allowed to establish itself with Reuben and Gad, on the east of the Jordan, where it occupied the northernmost portion, consisting of Argob and Bashan, from the Jabbok to Mount Hermon (Num. xxxii. 39; xxxiv. 14; Deut. iii. 3; Josh. xii. 6; xiii. 7; 1 Chron. vi. 23), while the other half was provided for with the rest of the tribes in Canaan proper, west of the Jordan, where it had a fine tract of country extending from that river to the Mediterranean, with the kindred tribe of Ephraim on the south, and Issachar on the north (Josh. xvi. 9; xvii. 7-11). The half-tribe west of the river was not, however, for some time able to expel the former inhabitants of the territory, so as to obtain the exclusive possession of it (Josh. xvii. 12; Judg. i. 27). The tribe of Manasseh makes no figure in the history of the Hebrews.

1. MANASSEH (מְנַשֶּׁה, *who makes forget*, see Gen. xli. 51; Sept. Μανασσῆς), the elder of the two sons of Joseph, born in Egypt (Gen. xli. 51; xlvi. 20), whom Jacob adopted as his own (xlviii. 1)—by which act each became the head of a tribe in Israel. The act of adoption was however accompanied by a clear intimation from Jacob, that the descendants of Manasseh, although the elder, would be far less numerous and powerful than those of the younger Ephraim. The result corresponded remarkably with this intimation. [Ephraim.]

2. MANASSEH, fourteenth king of Judah, son and successor of Hezekiah, who began to reign in B.C. 699, at the early age of twelve years, and reigned fifty-five years. It appears that the secret enemies of the vigorous reforms of Hezekiah re-appeared, and managed to gain much influence at court during the youth of Manasseh; and he was prevailed upon to re-establish all the idolatries and abominations which it had taken his excellent father so much pains to subvert. This

bent having been unhappily given to the mind of one old enough to listen to evil counsels, but too young to see their danger, the king followed it with all the reckless ardour of youth, and without any of the prudent reservations which older sovereigns, more discreet in evincing the same inclinations, had maintained. Idolatry in its worst forms, and all the abominations connected with its observances, were practised without stint and without shame, not only in the face of the temple, but in its very courts, where altars to the heavenly bodies were set up, and rites of idolatrous worship performed. Under this altered state of things, the Judahites, with the sanction of the king's example, rushed into all the more odious observances of Syrian idolatry, with all the ardour which usually attends the outbreak of a restrained propensity, till they became far 'worse than the heathen, whom the Lord destroyed before the children of Israel.' In vain did the prophets raise their voice against these iniquities, and threaten Manasseh and his kingdom with awful tokens of Divine indignation. Instead of profiting by these warnings, the king vented his rage against those by whom they were uttered, and in this, and other ways, filled Jerusalem with innocent blood beyond any king who reigned before him (1 Kings xxi. 1-16; 2 Chron. xxxiii. 1-10).

At length the wrath of God burst over the guilty king and nation. At this time there was constant war between Assyria and Egypt, and it would seem that Manasseh adhered to the policy of his father in making common cause with the latter power. This, or some other cause not stated by the sacred historian, brought into Judæa an Assyrian army, under the generals of Esar-haddon, which carried all before it. The miserable king attempted flight, but was discovered in a thorn-brake in which he had hidden himself, was laden with chains, and sent away as a captive to Babylon, which was then subject to the Assyrians, where he was cast into prison (B.C. 677). Here, at last, Manasseh had ample opportunity and leisure for cool reflection; and the hard lessons of adversity were not lost upon him. He saw and deplored the evils of his reign, he became as a new man, he humbly besought pardon from God, and implored that he might be enabled to evince the sincerity of his contrition, by being restored to a position for undoing all that it had been the business of his life to effect. His prayer was heard. His captivity is supposed to have lasted a year, and he was then restored to his kingdom under certain obligations of tribute and allegiance to the king of Assyria, which, although not expressed in the account of this transaction, are alluded to in the history of his successors (2 Chron. xxxiii. 11-13).

On his return to Jerusalem, Manasseh exerted himself to the utmost in correcting the errors of his early reign, and in establishing the worship of Jehovah in its former purity and splendour. The good conduct of his latter reign was rewarded with such prosperity as enabled him to do much for the improvement and strengthening of his capital and kingdom. He thoroughly repaired the old walls of Jerusalem, and added a new wall on the side towards Gihon; he surrounded and fortified by a separate wall the hill or ridge, on the east of Zion, which bore the name of עֹפֶל, Ophel, and he strengthened, garrisoned, and provisioned 'the fenced cities of Judah' (2 Chron. xxxiii. 13-17). He died in peace (B.C. 664), at the age of sixty-eight, after having reigned longer than any other king of Judah, and was buried in a sepulchre which he had prepared for himself in his own garden (xxxiii. 20).

MANASSES, PRAYER OF [Apocrypha]. This pseudepigraphal work has come down to us in the MSS. of the Latin Vulgate, and is found in the early printed editions of that version. It is erroneously stated in the preface to the Antwerp edition, that this prayer is found only in the Latin language, and that it does not exist either in the Greek or Hebrew; and the same is repeated by Du Pin (*Prolegomena;* and *Canon of Scripture*, i. 1). It had, however, already appeared in Greek and Latin in Robert Stephen's folio edition of the Latin Vulgate, Paris, 1540, immediately after the second book of Chronicles (p. 159), and in the edition of the same printed in 1546, while in his quarto edition of 1545 and those which followed, it appears in Latin only. Robert Stephen prefaces the first Greek impression of this prayer by observing: 'Græcam hanc Manassæ regis Juda orationem, *nunquam antehac excusam*, peperit tibi, candide lector, bibliotheca Victoriana, quæ quam dives sit veterum exemplarium omnis generis, nemo non novit. Quid multa? Secundat Deus res eorum, qui omnibus literarum meliorum studiosis talem bibliothecam quotidie curant et instruunt magis ac magis.' It was next published by Dauderstadt in 1628, and was afterwards found in the *Codex Alexandrinus*, among the hymns which follow the book of Psalms, and was inserted by Walton in his *Polyglott*, with the various readings of this MS. It also appears among the hymns in the Ethiopic Psalter, as published by Ludolf in 1701. When the Apocryphal writings were separated from the other books at the Reformation, the Prayer of Manasses was placed between Bel and the Dragon and Maccabees.

Du Pin (*l. c.*) asserts that the Latin fathers have often cited this prayer; but the earliest reference to it which we know of is in the *Apostolical Constitutions* (§ 12), attributed to Clemens Romanus, but which are generally believed to be a work of the fourth century. In this work (ii. 22) the prayer is cited as if it were an integral portion of the book of Chronicles, together with some tradionary accounts of the nature of his imprisonment in shackles of iron, and of his miraculous release: which are also alluded to in the Targum on Chronicles. It was held to be genuine by the author of the *Sermon on the Pharisee and Publican*, in the works of Chrysostom (i. 6); by Anthony the Monk (ii. 94); Theodore Studita (*Serm. Catechet.* 93); Theophanes Ceramæus (*Homil.* ii. and lvi.); Freculfus, and George Syncellus, and George the Sinner, in their *Chronicles;* also by Suidas (*Lexicon*, *s. v.* Μανασσῆς), who cites the commencement, Κύριε παντοκράτωρ, κ. τ. λ., and by Anastasius Sinaita (*in Psalm.* vi.). By several of these writers it is called *a hymn*, or *hymn of prayer* (προσευχὴν τῆς ᾠδῆς), which was sung in the churches—a statement corroborated by its position in the *Codex Alexandrinus*. The modern Greeks still place it in their Psalter along with the other hymns (Leo Allatius, *De lib. Ecclesiast. Græcorum*, p. 62). It was printed in Greek in the *Apostolical Constitutions*

in 1563, and in the *Apostolical Fathers* of Cotelerius in 1672. The learned Fabricius reprinted it at Leipsic in 1691, together with the books of Wisdom, Sirach, Judith, and Tobit. He also published metrical versions of it in Greek and Latin, one of which had previously appeared in 1598; and there had been a Latin metrical version published by Claudius Espencæus at Paris, in 1566. It appeared in the Greek *Apocrypha*, Frankfort, 1694, and homiletic expositions of it were given to the public by John Forster, George Albert, and others. (See Fabricii *Biblioth. Græc.* lib. iii. cap. 29, p. 740, or Harles's edit. cap. xiv. vol. 3, p. 732).

It is entitled 'The Prayer of Manasses, king of Judah, when he was holden captive in Babylon,' and had doubtless its origin from 2 Chron. xxxiii. 12, 13: 'And when he was in Babylon in affliction, he besought the Lord his God . . . and prayed unto him;' and verse 18, 'Now the rest of the acts of Manasseh, and his prayer unto God . . . behold, they are written in the book of the kings of Israel;' and verse 19, 'His prayer also, and how God was entreated of him . . . . . behold, they are written among the sayings of the seers.'

This prayer, however, not being found in the Hebrew, and not being cited by the more eminent fathers, nor contained in any of the catalogues of ancient councils, has not been received in the church as genuine or canonical. It is classed in the Sixth Article of the Church of England, among the 'other books read by the church for example of life and instruction of manners;' but the church of Rome classes it with 3rd and 4th Esdras [Esdras], removing it to the end of the Bible, and rejecting it from the deutero-canonical, as well as from the proto-canonical books. Dens (*Theologia*, vol. ii. p. 94, Quæst. vi., N. 61) states that the church places these books, together with 3rd and 4th Maccabees, among the Apocrypha, as she did not find a sufficiently certain tradition respecting them. He classifies the Apocrypha as consisting of books *positively Apocryphal*, or condemned, and *negatively Apocryphal*, that is, neither approved nor rejected. 'The latter may become canonical when the church's doubts are removed, as was the case of the deutero-canonical books' [Deutero-canonical]. 'A *positively* Apocryphal book can never become canonical, although a canonical book may become apocryphal.'

The prayer of Manasses abounds in pious sentiments. Mr. Horne (*Introd.* vol. ii.) describes it as not unworthy of the occasion on which it is pretended to have been composed. Du Pin (*ut supra*) observes that though not very eloquent, it is full of good thoughts. Bishop Cosin (*Scholastic Hist. of the Canon*) cites a passage from it, 'Repentance is not for the just, but for sinners,' as bearing a resemblance to Matt. ix. 13.

MANDRAKE. [Dudaim.]

MANEH. [Weights & Measures.]

MANNA. [Man, 2.]

MANOAH, father of Samson [Samson].

MANSLAYER. [Blood-Revenge.]

MANUSCRIPTS, BIBLICAL. These are either Hebrew or Greek: we shall treat of them separately. 1. Jewish MSS. are divided into (*a.*) *Synagogue rolls* or *sacred copies*; and (*b.*) *Private* or *common copies*.

(*a.*) The synagogue rolls contain the Pentateuch, the appointed sections of the prophets, or the book of Esther, which last is used only at the Feast of Purim. The three are never put together; but are written on separate rolls. They are in the Chaldee or square Hebrew character, without vowels and accents, accompanied with the *puncta extraordinaria*, and having the unusual forms of certain consonants. The parchment is prepared in a particular manner by the hands of Jews only, and made from the hides of *clean* animals, which, when duly wrought, are joined together by thongs made out of the same material. They are then divided into columns, the breadth of which must not exceed half their length. These columns, whose number is prescribed, must be of equal length and breadth among themselves, and contain a certain number of lines, each line having no more than three words. The Talmud contains strict rules concerning the material, the colour, the ink, letters, divisions, writing-instrument, &c., which are closely followed, especially in the Pentateuch. These rules are extracted from the Talmud, and translated in Adler's *Judæorum Codicis Sacri rite scribendi leges ad recte æstimandos Codices Manuscriptos antiquos perveteres. Ex libello Talmudico in Latinum conversas et adnotationibus necessariis explicatas, eruditis examinandas tradit*, &c., Hamburgh, 1779, 8vo. The minuteness of such regulations renders it a most irksome task for the *sopher* or scribe to write out a synagogue roll. The revision of the *Torah*, as the synagogue roll is often called, must be undertaken within thirty days after its transcription, else it is unfit for use. *Three* mistakes on one side or skin are allowable; but should there be *four*, or should there happen to be an error in the *open* and *close* sections of the law; in the position of the songs in Exodus ch. v., and Deuteronomy ch. xxxii., which are the only portions of the Pentateuch written in poetical lines, then the whole copy is worthless. The great beauty of penmanship exhibited in these synagogue copies has been always admired. They are taken from authentic exemplars, without the slightest deviation or correction. They seldom fall into the hands of Christians, since, as soon as they cease to be employed in the synagogue, they are either buried or carefully laid aside, lest they should be profaned by coming into the possession of Gentiles.

(*b.*) Private MSS. are written partly in the *square* or *Chaldee* character, partly in the *Rabbinical*. They are held in far less esteem than the synagogue rolls, and are wont to be denominated *profane* (*pesulim*). Their form is entirely arbitrary. They are in folio, quarto, octavo, and duodecimo. Of those written in the *square character*, the greater number are on parchment, some on paper. The ink of the letters is always black, but the vowel points are usually written with ink of a different colour from that of the consonants. Initial words and letters are frequently decorated with gold and silver colours. The prose parts are arranged in columns, the *poetic* in parallel members. Some copies are without columns. The columns are not always occupied with the Hebrew text alone; for a version is frequently added, which is either written in the text after the manner of verses, or in a column by itself, or in the margin in a smaller character. The number of lines is

not prescribed by the Talmud. The upper and lower margin are filled with the Great Masora, and sometimes with a Rabbinical commentary; as also with prayers, psalms, and the like. The external margin is for corrections, scholia, variations, notices of the *haphtaroth* (sections from the prophets), *parashoth* (sections from the law), the commentaries of the Rabbins, &c. &c. The inner margin, or that between the columns, is occupied with the little Masora. The single books of the Old Testament are separated from one another by spaces, except the books of Samuel, Kings, Chronicles, Ezra, and Nehemiah, which are written continuously. The sections of the law and prophets are generally marked. In the MSS. of different countries the books are differently arranged. These copies generally pass through various hands before they are finished. The consonants proceed from the *sopher* or scribe. When the same person writes both consonants and vowels, as is frequently the case, he never makes them at the same time; the former are finished before he begins to append the latter. The *K'ris* in the margin uniformly proceed from the vowel-writer. It is probable that these copies were in no instance made by Christians.

Although the square character be employed in all the MSS. of which we have spoken, yet it has varieties. The Jews themselves distinguish in the synagogue rolls, 1. the *Tam* letter, with sharp corners and perpendicular coronulæ, used among the German and Polish Jews; 2. the *Velshe* letter, more modern than the *Tam*, and rounder, with coronulæ, particularly found in the sacred copies of the Spanish and Oriental Jews.

The age of Hebrew MSS. is not easily determined. It is true that they often contain subscriptions giving an account of the time when they were written, and the name of the scribe, or also of the possessor. But these accounts are often ambiguous, and occasionally incorrect. Where they are altogether wanting, it is still more difficult to discover the age. In the latter case, the character of the writing, the colour of the ink, the quality and yellowness of the parchment, the absence of the Masora, of the vowel-points, of the unusual letters, &c. have been chiefly rested upon. Still, however, such particulars are uncertain marks of age.

The oldest Hebrew MS. at present known belongs to A.D. 1106 (No. 154 of Kennicott). It is true that some others are *supposed* to be older, but simply by conjecture. As far as certainty is concerned, this is certainly the oldest. Loehnis (*Grundzüge der Biblischen Hermeneutik und Kritik*, Giessen, 1839) affirms that some reach as far back as the eighth century, an assertion grounded merely on the conjecture of De Rossi and Kennicott. So much uncertainty attaches to the internal marks adopted by these two Hebraists, that the ages to which they assign several Hebrew MSS. are quite gratuitous. No Hebrew MS. *possessing an indubitably accurate* register of its antiquity, goes farther back than the twelfth century (see the *third* section of Tychsen's *Tentamen de variis Codicum Hebraicorum Vet. Test. MSS. generibus, &c.*, Rostock, 1772, 8vo., in which the learned writer examines the marks of antiquity assumed by Simon, Jablonski, Wolf, Houbigant, Kennicott, and Lilienthal, and shows that the *Masora alone* is a certain index for determining the age and goodness of Hebrew MSS.; the same writer's *Beurtheilung der Jahrzahlen in den Hebræisch-Biblischen Handschriften*, Rostock, 1786, 8vo., in which the mode of determining the age of MSS. adopted by Kennicott, Bruns, and De Rossi, is rejected; and Schnurrer's *Dissertatio Inauguralis de Codicum Hebræorum Vet. Test. ætate difficulter determinandâ*, Tübingen, 1772, 4to., and reprinted in his *Dissertationes Philologico-Criticæ*, Gotha and Amsterdam, 1790, 8vo).

Private MSS. written in the *Rabbinical character* are much more recent than the preceding; none of them being older than 500 years. They are on cotton or linen paper, in a *cursive* character, without vowel-points or the Masora, and with many abbreviations.

The MSS. found among the Chinese Jews are partly synagogue rolls, partly private copies, whose text does not differ from the Masoretic. The Pentateuch of the Malabar Jews brought from India to England by the late Dr. Buchanan, and described by Mr. Yeates, resembles on the whole the usual synagogue rolls of the Jews, except that it is written on red skins. Its text is the Masoretic, with a few unimportant deviations.

Eight exemplars are celebrated among the Jews for their correctness and value. They are now lost, but extracts from them are still preserved. From Jewish writings, and from the margin of some MSS., where a reference is made to them, we learn that they were highly prized for their singular accuracy. They formed the basis of subsequent copies. They are—1. The codex of Hillel; 2. The Babylonian codex; 3. The codex of Israel; 4. An Egyptian codex; 5. Codex Sinai; 6. The Pentateuch of Jericho; 7. Codex Sanbuki; 8. The book Taggin. For a more copious account of Hebrew MSS. we refer to Eichhorn's *Einleitung* (Introduction), vol. ii.; Kennicott's *Dissertatio generalis;* Walton's *Prolegomena to the Polyglott*, which have been separately edited by Dathe and Wrangham; Tychsen's *Tentamen;* De Rossi's *Variæ Lectiones Vet. Test.* &c.; and his *Scholia critica in V. T. libros*, &c.; De Wette, *Lehrbuch der Historisch-Kritischen Einleitung;* and Davidson's *Lectures on Biblical Criticism*, in which last the best books are pointed out.

II. We have now to refer to the MSS. of the Greek Testament. Those that have descended to our time are either on vellum or paper. The oldest material was the Egyptian papyrus; but even so early as the fourth century, the New Testament was written on the skins of animals. This writing material continued in use till the eleventh century, when paper began to be employed. Till the tenth century, MSS. were usually written in *capital* or *uncial* letters; then the cursive character came into use. The most ancient copies have no divisions of words, being written in a continued series of lines. Accents, spirits, and iota subscript, are also wanting.

The whole New Testament is contained in very few MSS. Transcribers generally divided it into three parts; the first containing the four Gospels; the second, the Acts of the Apostles and the Epistles; the third, the Apocalypse of St. John. The greatest number of MSS. are those which have the four Gospels, because they were

most frequently read in the churches. Those containing the Acts and epistles are also numerous. Such as have the book of Revelation alone are extremely few, because it was seldom read in public.

Greek codices are not often complete in all their parts. They have many chasms. Again, some contain merely detached portions of the New Testament, or sections appointed to be read on certain days in the churches. Hence such codices are called *ἀναγνώσεις* or *ἀναγνώσματα* in Greek; and in Latin *lectionaria*. Those containing lessons from the *Gospels* are called *evangelistaria;* while such as were taken from the *Acts and epistles* were denominated *πραξαπόστολοι*.

Several MSS. are accompanied with a Latin translation *interlined*, or in a *parallel column*. Such have been called *bilingues*, or *Græco-Latini*.

We shall now advert to the uncial MSS. of the Greek Testament, and to those usually quoted in the examination of the controverted passage 1 John v. 7. The former are marked with the letters of the alphabet A, B, C, &c.

A. *Codex Alexandrinus*, presented by Cyril Lucar, patriarch of Alexandria, and afterwards of Constantinople, to Charles I., now in the British Museum. It contains the whole Bible, the Septuagint version of the Old Testament in three folios, and the New Testament in one. It has various chasms. A fac-simile of the New Testament portion was published by Dr. Woide, in a folio volume, London, 1786. Mr. Baber of the British Museum executed the Old Testament in the same manner, in four folio volumes, London, 1819. This MS. was probably written at Alexandria, and belongs to the fifth century.

B. *Codex Vaticanus*, 1209, in the Vatican Library at Rome, containing the Old and New Testaments. It is defective in several places; and portions have been supplied by a modern hand. Hug has proved that it belongs to the middle of the fourth century. In regard to the internal value of its readings, it is probably superior to the Codex Alexandrinus.

C. *Codex regius*, or *Ephraemi*. This is a *rescript* or *palimpsest* MS., *i. e.* the ancient writing has been erased to make room for some other. The works of Ephrem the Syrian were over the original. In endeavouring to ascertain the character of what was first written on the parchment, and washing off the latter letters, it was found that the MS. contained originally the Old and New Testaments in Greek. In many places it is so faded as to be illegible. There are numerous chasms in it. Several forms of words seem to indicate that it was written in Egypt: it probably belongs to the sixth century, and is now in the Royal Library at Paris, where it is marked 9.

D. *Codex Cantabrigiensis*, or *Bezæ*.—This MS. was presented, in 1581, to the University of Cambridge, by Theodore Beza. It is a Greek-Latin MS. of the four Gospels, and the Acts of the Apostles, with a single fragment of the Catholic epistles. Its age is probably the *seventh* century, though many have assigned it to the fifth. Kipling, Hug, and Scholz think that it was written in Egypt; but Scholz has given some reasons for assigning it to the south of France, which are not without weight. Credner assents to the latter opinion, as far as the MS. is concerned; while he thinks that the text is of Jewish-Christian origin, and attributes it to Palestine. Great diversity of opinion has prevailed respecting the quality of its readings. Bishop Middleton, at the end of his work on the Greek article, depreciated it. Matthæi had done so before. Both have unduly lessened its value. Dr. Kipling published a fac-simile of it at Cambridge, 1793, 2 vols. folio.

D. *Claromontanus*, or *Regius*, 107, a Greek-Latin copy of Paul's epistles, marked with the same letter of the alphabet as the preceding, but containing a different part of the New Testament. It is at present in the Royal Library at Paris: it probably belongs to the eighth century.

E. *Codex Basileensis*.—This MS. has many chasms, and several parts of it have been written by a more recent hand than the rest. It contains the Gospels, and belongs to the ninth century.

E. *Laudianus*, having once belonged to Archbishop Laud, and now in the Bodleian Library. It contains the Acts of the Apostles, with a Latin version, and wants from xxvi. 29 to xxviii. 26. This MS. belongs to the *seventh* or *eighth* century, and was published by *Thomas Hearne* at Oxford in 1715, octavo.

E. *Sangermanensis*.—This is a Greek-Latin MS. of Paul's epistles, but a copy of the *Claromontanus*, with various corrections. It belongs to the eleventh century.

F. *Codex Borecli*, containing the four Gospels. It has been collated no farther than Luke x.

F. *Coislinianus*, a MS. containing part of the Old Testament and Acts ix. 24, 25. It belongs to the seventh century.

F. *Augiensis*.—This is a Greek-Latin MS. of Paul's epistles, now in the library of Trinity College, Cambridge. It belongs to the tenth century.

G. *Harleianus*, in the British Museum. This is a MS. of the four Gospels, but with many chasms. It belongs to the eleventh century.

G. *Angelicus*.—A MS. containing the Acts of the Apostles, with the Pauline and Catholic epistles, belonging to the Angelican Library at Rome. It is as old as the ninth century. In the Pauline epistles it is marked I.

G. *Boernerianus*, a Greek MS. of Paul's Epistles, with an interlinear Latin version, now in the Electoral Library at Dresden. It wants the Epistle to the Hebrews, and probably belongs to the ninth century. The characters show an approach to the *cursive*.

H. *Wolfii* B, a MS. of the four Gospels, with many chasms. It belongs to the eleventh century.

H. *Mutinensis*.—This MS. contains the Acts of the Apostles written in the *ninth* century; but chapters i. 1—v. 28, were added in the fifteenth century, and xxvii. 1 to the end, in the eleventh century. With the Catholic epistles, it contains the Pauline, written in cursive letters (179), and belongs to the twelfth century.

H. *Coislinianus*.—This MS. contains fragments of the Pauline epistles, which have been printed by Montfaucon in the *Bibliotheca Coisliniana*. According to Hug it belongs to the sixth century.

J. *Cottonianus*.—This codex contains fragments of Matthew and John's Gospels. It belongs to the seventh or eighth century.

K. *Codex Cyprius*, formerly *Colbertinus*, 5149,

now *Regius*, 63, a MS. containing the Gospels. It belongs to the eighth or ninth century, probably the latter, and has been fully collated and described by Scholz at the end of his *Curæ Criticæ*, 4to., Heidelberg, 1820. See, however, Schulz in the prolegomena to Griesbach, vol. i.

L. *Regius*, 62.—This MS. contains the four Gospels, with several mutilations. It is of Egyptian origin, as Griesbach has proved; and belongs to the ninth century.

M. *Regius*, 48, containing the Gospels, and belonging to the tenth century.

N. *Vindobonensis Cæsareus*.—This fragmentary MS. contains only Luke xxiv. 13-21 and 39-49. It belongs to the seventh century.

O. *Montefalconii*, a MS. containing Luke xviii.

P. *Guelpherbytanus*, a codex *rescriptus*, containing fragments of the four Gospels, and belonging to the sixth century.

Q. *Guelpherbytanus*, also a rescript MS., containing fragments of the Gospels of Luke and John, and belonging to the sixth century. These two MSS. were published and described by Knittel in 1763.

R. *Tubingensis*.—This fragment, containing John i. 38-50, has been published by Reuss. It belongs to the seventh century.

S. *Vaticanus*, 354.—This MS. contains the Gospels, and belongs to the tenth century.

T. The *Borgian* fragment, part of a Coptic-Greek MS. brought from Egypt. It contains John vi. 28-67; vii. 6—viii. 31. It was printed by George in 1789, and belongs to the fourth or more probably the fifth century.

U. A MS. of the Gospels in St. Mark's Library, Venice. It belongs to the tenth century.

V. *Mosquensis*, a MS. of the four Gospels, belonging to the library of the Holy Synod at Moscow. It wants some parts of Matthew, and from John vii. 39 is written in cursive characters of the thirteenth century; the first part belongs to the ninth century.

W. *Regius*, a fragment containing Luke ix. 36-47; x. 12-22; and belonging to the eighth century.

X. *Landshutensis*.—This MS. contains the four Gospels, but with numerous chasms and some supplements. It belongs most probably to the tenth century.

Y. *Barberinus*, a fragment in the library of Cardinal Barberini at Rome, containing John xvi. 4—xix. 28. It belongs to the *ninth* century.

Z. *Dublinensis*, a rescript, exhibiting the Gospel of Matthew, but in a very imperfect state. It was published in fac-simile by Dr. Barrett (Dublin, 1801, 4to.), and belongs to the sixth century.

Γ. *Vaticanus*.—This fragment contains Matthew xix. 6-13; xx. 6-22; xx. 29—xxi. 19. It belongs to the seventh century.

Δ. *Sangallensis*.—This is a Greek-Latin MS. of the Gospels, made by the monks in the monastery of St. Gallen. It was published by Rettigius at Turin, in 1836, and belongs to the ninth century.

Such are the *uncial* MSS. hitherto collated. Those written in the *cursive* character are described in the large critical editions of Wetstein, Griesbach, and Scholz; and in the *Introduction* of Michaelis, up to the period when it was published. The other Introductions contain descriptions of several, but not all the MSS.

Three cursive MSS. deserve mention, from their connection with the much-disputed passage, 1 John v. 7, which they are usually quoted as containing. As they are written in *cursive* letters, they are not older than the tenth century.

1. *The Codex Montfortianus*, or *Dublinensis*, belonging to the library of Trinity College, Dublin. It was quoted by Erasmus, under the title of *Codex Britannicus*. It is written on paper in 12mo. size, and could not have been made earlier than the fifteenth century. It follows the *Vulgate* very closely, not only in the insertion of the much-disputed verse, but in other passages of a remarkable character.

2. *The Codex Ravianus*, or *Berolinensis*.—This MS. is generally supposed to be a forgery, copied in the greater part of it from the Greek text of the *Complutensian Polyglott*, and the third edition of Stephens. It has even their *typographical* errors. It was written in the sixteenth century, and has no *critical value* (see Pappelbaum's *Untersuchung der Ravischen Griechischen Handschrift des Neuen Testaments*, Berlin, 1785, 8vo.; and his subsequent treatise, entitled, *Codicis Manuscripti N. T. Græci Raviani in Biblioth. Reg. Berol. publica asservati examen, quo ostenditur, alteram ejus partem majorem ex editione Complutensi, alteram minorem ex editione Rob. Stephani tertia esse descriptam*, Berlin, 1796, 8vo).

3. *Codex Ottobonianus* (298), preserved in the Vatican. This MS. contains the Acts and epistles, with a Latin version. Scholz ascribes it to the fifteenth century. It has no critical value, because it has been altered in many cases to correspond with the *Vulgate*. In it the disputed text is found in a different form from the common reading. Instead of *in heaven*, it has *from heaven;* and instead of *on earth*, it has *from the earth*.

MSS. are generally divided by the modern critics of Germany into—1. Such as were written before the practice of *stichometry*, a mode of dividing the text which shall be explained afterwards. 2. The *stichometrical*. 3. Those written after *stichometry* had ceased. So Hug and De Wette in their Introductions to the New Testament. According to this classification A, B, and C belong to the first class; D, D, &c., to the second; and by far the greatest number to the third. We have alluded to them under the two great heads of *uncial* and *cursive*.

In examining MSS. and comparing their characteristic readings, it is not easy in every instance to arrive at the true original form of a passage. Many circumstances are to be taken into account—many cautions must be observed. They are more useful in detecting interpolated passages than in restoring the correct reading.

The reading of an older MS. is preferable *ceteris paribus*.

In determining the age of a MS. internal marks have been chiefly followed, such as the form of the letters, the divisions, abbreviations, the nature of the lines, the presence or absence of the accents, &c. These particulars, however, are not safe criteria.

Age alone is not sufficient to ensure the value of the text of a MS. The copyist may have been

guilty of negligence or inattention. In proportion to his accuracy or carelessness will the authority of the codex be greater or less.

Again, a document certainly copied from one which is very ancient, will have greater authority than an earlier taken from another of no great antiquity. Thus a MS. of the *eighth* century may have been directly copied from one of the *fifth*, and consequently the former will be entitled to greater estimation than one belonging to the seventh century transcribed from one of the sixth.

In determining the value of a codex, it is usual to refer to the country where it was written. Griesbach and others prefer the *African;* Scholz, the *Constantinopolitan*. With respect to Hebrew MSS., it is admitted by all that the Spanish are the best. The Italian, again, are superior to the German. The reading contained in the greater number of MSS. is preferable to that of a less number. *Mere majority*, however, is not a safe criterion. A majority arising from *independent sources*, or, in other words, of those belonging to *different recensions*, can alone be relied on as decisive. But here critics are not agreed as to the number of *recensions* belonging to Greek MSS. Some have proposed four, some three, others two. Besides, the same MS. may belong to a different recension in different parts of itself. In others, the characteristic readings of two or three recensions are mingled together, rendering it difficult to determine which recension or family preponderates.

Hebrew MSS. belong to one and the same recension. It is true that some have distinguished them into *Masoretic* and *Ante-masoretic;* but the existence of the latter is a mere fiction. One great family alone, viz. the *Masoretic*, can be distinctly traced.—S. D.

MAON (מָעוֹן; Sept. Μαών), a town in the tribe of Judah (Josh. xv. 55), which gave name to a wilderness where David hid himself from Saul, and around which the churlish Nabal had great possessions (1 Sam. xxiii. 24, 25; xxv. 2). Jerome places it to the east of Daroma (*Onomast.* s. v. Maon). The name does not occur in modern times, and Dr. Robinson regards it as one of the sites first identified by himself. Irby and Mangles were in the neighbourhood in 1818, but did not detect this and other ancient names. Robinson finds it in the present Maîn, which is about seven miles south by east from Hebron. Here there is a conical hill about 200 feet high, on the top of which are some ruins of no great extent, consisting of foundations of hewn stone, a square enclosure, the remains probably of a tower or castle, and several cisterns. The view from the summit is extensive. This is Maîn. The traveller found here a band of peasants keeping their flocks, and dwelling in caves amid the ruins (*Bibl. Researches*, ii. 190-196).

MARAH (מָרָה, *bitterness;* Sept. Μαρά). The Israelites, in departing from Egypt, made some stay on the shores of the Red Sea, at the place where it had been crossed by them. From this spot they proceeded southward for three days without finding any water, and then came to a well, the waters of which were so bitter, that, thirsty as they were, they could not drink them. The well was called *Marah* from the quality of its waters. This name, in the form of Amarah, is now borne by the barren bed of a winter torrent, a little beyond which is still found a well called Howara, the bitter waters of which answer to this description. Camels will drink it; but the thirsty Arabs never partake of it themselves; and it is said to be the only water on the shore of the Red Sea which they cannot drink. The water of this well, when first taken into the mouth, seems insipid rather than bitter, but when held in the mouth a few seconds it becomes exceedingly nauseous. The well rises within an elevated mound surrounded by sand-hills, and two small date-trees grow near it.

The Hebrews, unaccustomed as yet to the hardships of the desert, and having been in the habit of drinking their full of the best water in the world, were much distressed by its scarcity in the region wherein they now wandered; and in their disappointment of the relief expected from this well, they murmured greatly against Moses for having brought them into such a dry wilderness, and asked him, 'What shall we drink?' On this Moses cried to Jehovah, who indicated to him 'a certain tree,' on throwing the branches of which into the well, its waters became sweet and fit for use. The view which has been taken of this transaction by the present writer in another work (*Pictorial Hist. of Palestine*, pp. 209, 210), is here introduced, as it has been judged satisfactory, and as no new information on the subject has since been obtained.

'The question connected with this operation is—whether the effect proceeded from the inherent virtue of the tree in sweetening bad water; or that it had no such virtue, and that the effect was purely miraculous. In support of the former alternative, it may be asked why the tree should have been pointed out and used at all, unless it had a curative virtue? And to this the answer may be found in the numerous instances in which God manifests a purpose of working even his miracles in accordance with the general laws by which he governs the world, and for that purpose disguising the naked exhibition of supernatural power, by the interposition of an *apparent* cause; while yet the true character of the event is left indisputable, by the utter inadequacy of the apparent cause to produce, by itself, the resulting effect. This tends to show that the tree, or portion of it, need not be supposed, from the mere fact of its being employed, to have had an inherent curative virtue. It had not necessarily any such virtue; and that it positively had not such virtue seems to follow, or, at least, to be rendered more than probable by the consideration —that, in the scanty and little diversified vegetation of this district, any such very desirable virtues in a tree, or part of a tree, could scarcely have been undiscovered before the time of the history, and if they had been discovered, could not but have been known to Moses; and the divine indication of the tree would not have been needful. And, again, if the corrective qualities were inherent, but were at this time first made known, it is incredible that so valuable a discovery would ever have been forgotten; and yet it is manifest that in after-times the Hebrews had not the knowledge of any tree which could render bad water drinkable; and the inhabitants of the desert have not only not preserved the

knowledge of a fact which would have been so important to them, but have not discovered it in the thirty-five centuries which have since passed. This is shown by the inquiries of travellers, some of whom were actuated by the wish of finding a plant which might supersede the miracle. Burckhardt confesses that, after numerous inquiries, he could never learn that the Arabs were acquainted with any plant or tree possessing such qualities; but he regrets that he omitted to make this inquiry at Marah in particular. Lord Lindsay, remembering this regret, did make particular inquiries at that place. "I asked whether they had any means of sweetening bad water, and he mentioned the *mann*, a gum that exudes from the tamarisk-tree, and the juice of the *homr* berry. The *homr* plant, and *tarfah*, or tamarisk-tree, grow in great abundance in Wady Gharandel. The former bears small, red, juicy berries, which they squeeze into water: the *mann* has a strong aromatic taste, like turpentine. One of our guides had a piece of it, which I tasted; they keep it in casks, melt it when required, and spread it on their bread like honey. Some have taken it for the miraculous *manna*—too absurd an opinion to be confuted. Are we to understand that the effect produced on the bitter waters of Marah, by casting in the tree, shown to Moses by the Almighty (or 'something of a tree,' as the Arabic version runs), was also miraculous? If not, it has been suggested that the *mann* or the *homr* juice may have been the specific employed. The *homr* is, however, a mere shrub, and had the whole valley for miles round been full of *tarfah* trees, or *homr* bushes, there would scarcely have been enough to sweeten water sufficient for such a host as that of Israel. Moreover, the Israelites were here within a month after the institution of the Passover, at the vernal equinox, whereas the *mann* harvest does not take place till June. This alone, I think, must decide the question in favour of the miracle." This traveller goes on to tell us that the Hebrew name of the tree in question was *alvah*, whence he is led to conclude, from the analogy of the names, that it might be identified with the species of acacia to which the Arabians give the name of *elluf*. But all that is said on this point goes for nothing, as it happens that the tree is *not* called in Hebrew *alvah*, nor is any name given to it, but is indicated simply as עֵץ *etz*, a tree. His concluding observation is more correct: "Whatever the tree was, it can have had no more inherent virtue in sweetening the bitter well of Marah, than the salt had, which produced the same effect, when thrown by Elisha into the well of Jericho" (Lindsay, i. 263-5).

'This leaves little to be said. As Lord Lindsay proposed his question to an Arab, who could not apprehend his precise object, through an interpreter, who probably apprehended it as little, there can be no doubt that the answer applies to the supposition that he wanted to know how a cup of bad water might have its unpalateableness disguised, so as to be made drinkable; and it is much the same, *in effect*, as might be given in this country to a similar question, "Put a little sugar, or a little lemon-juice into it." Probably the Bedouins use *both* of the articles mentioned—being a sweet and an acid—in making a kind of sherbet. It will not do to think of the Hebrew as squeezing the juice of little red berries, or as mixing up a vegetable gum in the well of Marah, *even if* a sufficient quantity of either could have been procured to sweeten water enough for the thousands of Israel. This, therefore, being the only case in which the Arabs of Sinai have been brought to mention the only articles known to them as used for the indicated purpose, does the more abundantly prove that they know no tree answering to the description which, without the miracle, it would be necessary to require. In this, as in many other dealings with the Scripture miracles, it is easier to understand and believe the miracle itself than the best explanations which have been given.

'The Jewish writers, generally, are so far from looking for any inherent virtues in the "tree," that they, contrariwise, affirm that its natural quality was rather to make that bitter which was sweet, than to sweeten that which was bitter. The Targums call it the bitter tree *Ardiphne*, which most of the Hebrew interpreters take to signify the same to which botanists give the name of *Rhodo-daphne*, the rose-laurel.'

MARANATHA. [Anathema.]

MARCHESHVAN (מַרְחֶשְׁוָן; Josephus, *Antiq.* i. 3. 3, Μαρσουάνης; the Macedonian Δῖος) is the name of that month which was the eighth of the sacred, and the second of the civil, year of the Jews; which began with the new moon of our November. There was a fast on the 6th, in memory of Zedekiah's being blinded, after he had witnessed the slaughter of his sons (2 Kings xxv. 7).

This month is always spoken of in the Old Testament by its numerical designation; except once, when it is called Bul (בּוּל, 1 Kings vi. 38; Sept. Βαάλ). According to Kimchi, Bul is a shortened form of the Hebrew יְבוּל, 'rain,' from יָבַל. The signification of *rain-month* is exactly suitable to November in the climate of Palestine. Others derive it from בָּלַל. Benfey, availing himself of the fact that the Palmyrene inscriptions express the name of the god Baal, according to their dialect, by בול (as עגלבול, Ἀγλιβόλος), has ventured to suggest that, as the months are often called after the deities, Bul may have received its name from that form of Baal (*Monatsnamen*, p. 182). The rendering of the Sept. might have been appealed to as some sanction of this view. He supposes that Marcheshvân is a compound name, of which the syllable *mar* is taken from the Zend *Ameretât*, or its later Persian form *Mordâd;* and that *cheshvân* is the Persian *chezân*, 'autumn:' both of which are names belonging to the same month (*l. c.* p. 136. sq.).—J. N.

MARESHAH (מָרֵשָׁה; Sept. Μαρισά), a town in the tribe of Judah (Josh. xv. 14), re-built and fortified by Rehoboam (2 Chron. xi. 8). The Ethiopians under Zerah were defeated by Asa in the valley near Mareshah (2 Chron. xiv. 9-13). It was laid desolate by Judas Maccabæus, on his march from Hebron to Ashdod (1 Macc. v. 65-68; Joseph. *Antiq.* xii. 8. 6). Josephus mentions it among the towns possessed by Alexander Jannæus, which had been in the hands of the Syrians (*Antiq.* xiii. 15. 4); but by Pompey it was restored to the former inhabitants, and attached to the province of Syria (*Ib.* xiv. 4. 4).

Maresa was among the towns rebuilt by Gabinius (*Ib.* xiv. 5. 3), but was again destroyed by the Parthians in their irruption against Herod (*Ib.* xiv. 5. 3). A place so often mentioned in history must have been of considerable importance; but it does not appear that it was ever again rebuilt. The site, however, is set down by Eusebius and Jerome (*Onomast.* s. v. Morasthi), as within two miles of Eleutheropolis, but the direction is not stated. Dr. Robinson (*Bibl. Researches*, ii. 422) found, at a mile and a half *south* of the site of Eleutheropolis, a remarkable *tel*, or artificial hill, with foundations of some buildings. As there are no other ruins in the vicinity, and as the site is admirably suited for a fortress, this, he supposes, may have been Mareshah.

MARK. PERSON OF MARK.—According to ecclesiastical testimonies the evangelist Mark is the same person who in the Acts is called by the Jewish name John, whose Roman surname was Marcus (Acts xii. 12, 25). This person is sometimes called simply John (Acts xiii. 5, 13); and sometimes Mark (Acts xv. 39).

Mary, Mark's mother, had a house at Jerusalem, in which the Apostles were wont to assemble (Acts xii. 12). In the Epistle to the Colossians (iv. 10, 11) Mark is mentioned among the assistants of Paul, and as being one of the converts from Judaism. From this passage we learn also that Mark was a cousin of Barnabas, which circumstance confirms the opinion that he was of Jewish descent. It was probably Barnabas who first introduced him to Paul. He accompanied Paul and Barnabas on their travels as an assistant (Acts xii. 25; xiii. 5). When they had arrived in Pamphylia, Mark left them and returned to Jerusalem, from which city they had set out (Acts xiii. 13). On this account Paul refused to take Mark with him on his second apostolical journey, 'and so Barnabas took Mark, and sailed unto Cyprus' (Acts xv. 37-39). It seems, however, that Mark, at a later period, became reconciled to Paul, since, according to Coloss. iv. 10, and Philem. 24, he was with the apostle during his first captivity at Rome; and according to 2 Tim. iv. 11, he was also with him during his second captivity. The passage in Colossians proves also that he was about to undertake for Paul a journey to Colosse.

There is a unanimous ecclesiastical tradition that Mark was the companion and ἑρμηνευτής of Peter. This tradition is the more credible, as the New Testament does not contain any passage that could have led to its invention. Since, according to Acts xii. 12, Peter was in the habit of visiting as a friend at the house of Mark's mother, he may perhaps be considered as the spiritual father of Mark. From the works of Papias (Euseb. *Hist. Eccles.* iii. 39) it appears that Mark could not have been a direct disciple of Christ. Hence it seems to follow that the statement of Origen, that Mark was one of the seventy disciples of Christ, is incorrect (see Originis *Opera*, edit. De la Rue, tom. i. p. 807). If the expression in 1 Pet. v. 13, ἡ συνεκλεκτή, means the congregation of Peter, the word υἱός would signify a spiritual son, in which case we could refer this term only to the evangelist Mark mentioned in the Acts. This, however, is doubtful, because we should in that case rather expect the word τέκνον. We learn from Luke iv. 38, and 1 Cor. ix. 15, that Peter was married, and from Eusebius (*Hist. Eccles.* iii. 30), that he had children. Hence we may well refer the word συνεκλεκτή to the wife of the Apostle, and understand υἱός to mean his real son. It is by no means unlikely that after Paul had quitted the scene, Mark should have united himself to Peter, with whom he had been on friendly terms at an early period of his life. In case that Paul is not considered the author of the Epistle to the Hebrews, we may say that Timothy also attached himself to another teacher after the death of that apostle (see the *Commentaries* on Heb. xiii. 23). The testimony in favour of the connection between Mark and Peter is so old and respectable, that it cannot be called in question. It first occurs at the commencement of the second century, and proceeds from the presbyter John (Euseb. *Hist. Eccles.* iii. 39); it afterwards appears in Irenæus (*Adv. Hær.* iii. 1. 1, and x. 6); in Tertullian (*Contra Mart.* iv. 5); in Clemens Alexandrinus, Jerome, and others. The question arises, what is the true meaning of the expression ἑρμηνευτὴς Πέτρου, which is employed even by the presbyter John. It was formerly supposed that Mark was thereby described as being the interpreter of Peter, who was said to be unacquainted with Greek. This opinion was entertained by Eichhorn, Bertholdt, and Kuinoel. But Fritsche, in his *Commentarius in Marcum xxvi.*, has appealed to the testimonies of ancient writers in order to prove that Mark was called ἑρμηνευτής, because he wrote down what Peter taught by word of mouth. According to our opinion, Mark was called ἑρμηνευτής because he was the assistant of Peter, and either orally or in writing communicated and developed what Peter taught. The sense in which the ancients employed the word *interpres* may be clearly understood from the passage in Jerome (*Epistola cxx. ad Hedibiam*, cap. xi.). It is there stated that although Paul had the gift of various languages, as may be seen from 1 Cor. xiv. 18, he was still not able 'divinorum sensuum majestatem digno Græci eloquii explicare sermone;' that is, 'to express the majesty of divine truth in a sufficiently oratorical Greek style' (comp. *Epistola ad Alyasiam*, quæst. x.). Jerome adds, 'Habebat ergo Titum interpretem; sicut et beatus Petrus Marcum, cujus Evangelium Petro narrante, et illo scribente, compositum est. Denique et duæ epistolæ quæ feruntur Petri, stilo inter se et charactere discrepant, structuraque verborum. Ex quo intelligimus pro necessitate rerum, diversis eum usum interpretibus.'—'Therefore he had Titus for a secretary, as the blessed Peter had Mark, whose Gospel was composed by him after the dictation of Peter. The two Epistles of Peter which are in circulation differ from each other in character and style. Hence we perceive that he was compelled by circumstances to employ different secretaries.'

It is quite evident that in this passage *interpres* cannot mean an 'interpreter' or 'translator,' but rather the person who develops and puts into style the discourses of another. From the following passage we learn that this does not merely refer to written composition:—μετὰ τὴν τούτων (Peter and Paul) ἔξοδον Μάρκος ὁ μαθητὴς καὶ ἑρμηνευτὴς Πέτρου, καὶ αὐτὸς τὰ ὑπὸ Πέτρου κεκηρυγμένα ἐγγράφως ἡμῖν παραδέδωκε (Eusebius, *Hist. Eccles.* v. 8).—'After the departure of Peter and

Paul, Mark, the disciple and secretary (*interpres*) of Peter, transmitted to us in writing what Peter had preached.' It is evident that Mark is here called ἑρμηνευτής without reference to his authorship.

Eusebius represents (*Hist. Eccles.* ii. 15) from the later life of Mark, that he was with Peter at Rome. Epiphanius and others inform us that he introduced the Gospel into Egypt, founded the church at Alexandria, and that he died in the eighth year of Nero's reign.

The Gospel of Mark.—The same ancient authors who call Mark a μαθητής (disciple) and ἑρμηνευτής (secretary) of Peter, state also that he wrote his Gospel according to the discourses of that Apostle. The most ancient statement of this fact is that of the presbyter John and of Papias, which we quote verbatim from Eusebius (*Hist. Eccles.* iii. 39) as follows: Μάρκος μὲν ἑρμηνευτὴς Πέτρου γενόμενος, ὅσα ἐμνημόνευσεν, ἀκριβῶς ἔγραψεν, οὐ μέν τοι τάξει τὰ ὑπὸ τοῦ Χριστοῦ ἢ λεχθέντα ἢ πραχθέντα· οὔτε γὰρ ἤκουσε τοῦ κυρίου, οὔτε παρηκολούθησεν αὐτῷ· ὕστερον δὲ, ὡς ἔφην, Πέτρῳ, ὃς πρὸς τὰς χρείας ἐποιεῖτο τὰς διδασκαλίας, ἀλλ' οὐχ ὥσπερ σύνταξιν τῶν κυριακῶν ποιούμενος λογίων. Ὥστε οὐδὲν ἥμαρτε Μάρκος οὕτως ἔνια γράψας ὡς ἀπεμνημονεύσεν. Ἑνὸς γὰρ ἐποιήσατο πρόνοιαν, τοῦ μηδὲν ὧν ἤκουσε παραλιπεῖν, ἢ ψεύσασθαί τι ἐν αὐτοῖς.—' Mark having become secretary to Peter, whatever he put into style he wrote with accuracy, but did not observe the chronological order of the discourses and actions of Christ, because he was neither a hearer nor a follower of the Lord; but at a later period, as I have said, wrote for Peter to meet the requisites of instruction, but by no means with the view to furnish a connected digest of the discourses of our Lord. Consequently Mark was not in fault when he wrote down circumstances as he recollected them; for he had only the intention to omit nothing of what he had heard, and not to misrepresent anything.' Critics usually ascribe all these words to the presbyter. Schmidt especially observes, in his *Einleitung ins Neue Testament Nachträge* (p. 270), that he himself had erroneously quoted this testimony as the words of Papias; but it seems to us that the words ὡς ἔφην do not allow us to consider all this passage as belonging to the presbyter. Papias had not before his eyes a book of the presbyter, and he seems to have alluded to that passage of his own work to which Eusebius refers in his second book (ch. xv.), in which work Papias had given some account respecting the life of this evangelist. According to this view it seems that, with the words οὔτε γὰρ ἤκουσε, there begins an explanation of the words of the presbyter.

It has been observed in the article Gospel that this passage has been made use of in order to disprove the existence of an orally fixed evangelium-tradition, since it is here stated that Peter preached as circumstances required. To this we replied that Papias considers the Gospel of Mark to be the reflex of the discourses of Peter, in which character they are described by the presbyter; and since the Gospel of Mark really contains a sketch of the life of Jesus, the account of the presbyter does not imply that the discourses of Peter could not likewise have contained a sketch of his life. The presbyter only says that Peter did not furnish a complete life of Jesus, embracing a history of his infancy, youth, &c.; and that, therefore, the account of Peter was in some respects incomplete, since he, as Papias states, omitted various circumstances. Schleiermacher, and after him Strauss, have turned this into an argument against the Gospel of Mark. They assert that this Gospel is a συντάξις, which, if not chronological, is at least a concatenation according to the subjects. Now the presbyter states that Mark wrote οὐ τάξει, *without order*. By this expression they consider all such arrangement excluded; consequently they infer that the presbyter John, the old disciple of the Lord, spoke of another Mark. We learn, however, from what Papias adds, how Papias himself understood the words of the presbyter; and we perceive that he explains οὐ τάξει by ἔνια γραψας, *writing isolated facts*. Hence it appears that the words οὐ τάξει signify only incompleteness, but do not preclude all and every sort of arrangement.

It would be arbitrary, indeed, to suppose that another Mark had an existence in the earliest times of Christianity, without having any historical testimony for such a supposition. There is no indication that there was any other Mark in the early times of Christianity besides the Mark mentioned in the Acts, who is also reported to have been the author of that Gospel which bears his name.

We have mentioned in the article Luke that, according to Irenæus, the Gospels of Mark and Luke were written later than that of Matthew; and according to a tradition preserved by Clemens Alexandrinus, the Gospels of Matthew and Luke preceded that of Mark. The chronological order of the Gospels is, according to Origen, the same in which they follow each other in the codices. Irenæus (*Adversus Hæreses*, iii. 1) states that Mark wrote after the death of Peter and Paul; but, according to Clemens Alexandrinus (*Hypotypos.* vi.) and Eusebius (*Hist. Eccles.* vi. 14), he wrote at Rome while Peter was yet living. These various data leave us in uncertainty.

If the opinions concerning the relation of Mark to Matthew and Luke, which have been current since the days of Griesbach, were correct, we might be able to form a true idea concerning the chronological succession in which the first three Gospels were written. Griesbach, Saunier, Strauss, and many others, state it as an unquestionable fact, that the Gospel of Mark was merely an abridgment of the Gospels of Matthew and Luke. De Wette, even in the latest edition of his *Einleitung*, 1842, calls this opinion *erwiesen*, 'demonstrated' (see pp. 130 and 157). The value of such demonstrations may be learned from what appears to De Wette the most certain proof of the alleged fact, viz. that the statements of Mark concerning the *temptation* of Christ are merely an abridgment of other sources. But we do not perceive why it should be impossible to furnish a condensed statement from oral communications.

Weisse, Wolke, and Bauer, on the other hand, have, in recent times, asserted that the Gospel of Mark was the most ancient of all the Gospels, that Luke amplified the Gospel of Mark, and that Matthew made additions to both. Weisse and Wolke employ some very artificial expe-

dients in order to explain how it happened that, if Luke and Matthew transcribed Mark, there should have arisen a considerable difference both in words and contents. Wolke especially accuses Luke and Matthew of intentional misrepresentations. The author of *Kritik der Evangelischen Geschichte der Synoptiker*, Leipzig, 1841, goes still further.

The following examples will explain the foregoing observation. If Mark, in ch. i. 21-28, abridged Luke, ch. iv. 31-37, what could have induced him, although usually retaining the same sentences, nevertheless, for καθῆλθεν to substitute εἰσπορεύονται; for ῥίψαν, σπαράξαν; for ἐγένετο θάμβος, ἐθαμβήθησαν; and for ἦχος, ἀκοή, &c.? But if Mark's Gospel was earlier than that of Luke, what could have induced the latter to change these words in copying the Gospel of the former? According to Wolke, in his book entitled *Der Urevangelist*, 1838, p. 584, sq., Luke has, in an arbitrary manner, changed a collection of proverbial sayings into the Sermon on the Mount, and inserted Mark iii. 16; while Matthew again has amplified the Sermon on the Mount of Luke (p. 685, sq.)!

Wolke has left his readers in doubt how much these evangelists took from historical documents; but Bauer has distinctly asserted that Mark produced the contents of his book from his imagination, and that his fictitious narrative was extended and spun out by the other evangelists. Such assertions are so utterly groundless that they do not require to be formally refuted.

In the article GOSPELS we have stated our opinion concerning the relative position in which the evangelists stand to each other. We do not see any reason to contradict the unanimous tradition of antiquity concerning the dependence of Mark upon Peter. We deem it possible, and even probable, that Luke read Mark, and that he also alludes to him by reckoning him among the πόλλοι, the *many*, who had written gospel history before him. This supposition, however, is by no means necessary or certain; and it is still possible that Mark wrote after Luke. Some of the ancient testimonies which we have quoted, namely, those of Irenæus, Clemens Alexandrinus, Jerome, and others, state that Mark's Gospel was written at Rome. In favour of this opinion there have been urged some so-called Latinisms; for instance, in ch. xv. 15, τῷ ὄχλῳ τὸ ἱκανὸν ποιῆσαι, and ch. v. 23, ἐσχάτως ἔχει. These expressions are, however, rather Græcisms than Latinisms. Others appeal to words which have a Latin origin, such as σπεκουλάτωρ, κεντυρίων, ξέστης, φραγελλόω; but these are military terms which the Greeks adopted from the Romans. The words ξέστης and φραγελλόω occur in other Greek authors. The use of the word κεντυρίων is rather surprising, since in the other New Testament writers we find ἑκατόνταρχος and ἑκατοντάρχης. In our opinion these Latinisms cannot prove much respecting the locality in which Mark's Gospel was written; but it is certain that it was written for Gentile Christians. This appears from the explanation of Jewish customs (ch. vii. 2, 11; xii. 18; xiii. 3; xiv. 12; xv. 6, 42). The same view is confirmed by the scarcity of quotations from the Old Testament, perhaps also by the absence of the genealogy of Christ, and by the omission of the Sermon on the Mount, which explains the relation of Christ to the Old Testament dispensation, and which was, therefore, of the greatest importance to Matthew.

The characteristic peculiarity of Mark as an author is particularly manifest in two points: 1. He reports rather the works than the discourses of our Saviour; 2. He gives details more minutely and graphically than Matthew and Luke; for instance, he describes the cures effected by Jesus more exactly (iv. 31, 41; vi. 5, 13; vii. 33; viii. 23). He is also more particular in stating definite numbers (v. 13, 42; vi. 7, 14, 30), and furnishes more exact dates and times (i. 32, 35; ii. 1, 26; iv. 26, 35; vi. 2; xi. 11, 19, 20, &c.).

It may be that these characteristics of Mark originated from his connection with Peter. With more certainty we may ascribe to Mark himself certain peculiarities of diction and phraseology; for instance, the frequent use of the word εὐθέως, and his predilection for diminutives (v. 23, 39, 40, 41, 42; vi. 22, 28; vii. 25, 28).

Most of the materials of Mark's narrative occur also in Matthew and Luke. He has, however, sections exclusively belonging to himself, viz. iii. 21, 31, sq.; vi. 17, sq.; xi. 11; xii. 28, sq. These peculiar statements of Mark have an entirely historical character: consequently we deem it unjustifiable in Strauss and De Wette to endeavour to depreciate them by calling them arbitrary additions.

We mention the conclusion of Mark's Gospel separately, since its genuineness may be called in question.

Among the *Codices Majusculi* the Codex B. omits ch. xvi. 9-20 altogether, and several of the *Codices Minusculi* mark this section with asterisks as doubtful. Several ancient Fathers and authors of *Scholia* state that it was wanting in some manuscripts. We cannot, however, suppose that it was arbitrarily added by a copyist, since at present all codices, except B., and all ancient versions contain it, and the Fathers in general quote it. We may also say that Mark could not have concluded his Gospel with ver. 8, unless he had been accidentally prevented from finishing it. Hence Michaelis and Hug have inferred that the addition was made by the evangelist at a later period, in a similar manner as John made an addition in ch. xxi. of his Gospel. Perhaps also an intimate friend, or an amanuensis, supplied the defect. If either of these two hypotheses is well founded, it may be understood why several codices were formerly without this conclusion, and why, nevertheless, it was found in most of them.

Among the various commentaries on the Gospel of Mark, which have been published in modern times, the following deserves to be specially mentioned: *Evangelium Marci versionem, et cum Commentariis perpetuis edidit*, C. F. A. Fritzsche, Lipsiæ, 1830. This author does not enter much into the explanation of Biblical thoughts and truths, but he has furnished very valuable contributions for the critical study of the language.—

A. T.

MARRIAGE.—THE LEVIRATE LAW.—The divine origin of marriage, and the primitive state of the institution, are clearly recorded in the instance of the first human pair (Gen. ii. 18-25), whence it appears that woman was made after man to be 'a helper suited to him.' The narrative is calculated to convey exalted ideas of the mutu-

tution. It is introduced by a declaration of the Lord God, that 'it is not good that the man should be alone' (ver. 18); of the truth of which Adam had become convinced by experience. In order still further to enliven his sense of his deficiency, the various species of creatures are made to pass in review before him, 'to see what he would call them;' on which occasion he could behold each species accompanied by its appropriate helper, and upon concluding his task would become still more affectingly aware, that amid all animated nature 'there was not found an help meet for himself.' It was at this juncture, when his heart was thus thoroughly prepared to appreciate the intended blessing, that a divine slumber (Sept. ἔκστασις), or trance, fell upon him—a state in which, as in after ages, the exercise of the external senses being suspended, the mental powers are peculiarly prepared to receive revelations from God (Gen. xv. 12; Acts x. 10; xxvii. 17; 2 Cor. xii. 2). His exclamation when Eve was brought to him shows that he had been fully conscious of the circumstances of her creation, and had been instructed by them as to the nature of the relation which would thenceforth subsist between them. 'The man said, *this time*, it is bone of my bone, and flesh of my flesh; *this* shall be called woman, for out of man was this taken' (New Translation by the Rev. D. A. De Sola, &c. Lond. p. 8). The remaining words, 'for this cause shall a man leave his father and mother, and shall cleave unto his wife, and they (two) shall be one flesh,' which might otherwise seem a proleptical announcement by the historian of the social obligations of marriage, are by our Lord ascribed to the Divine agent concerned in the transaction, either uttered by him personally, or by the mouth of Adam while in a state of inspiration. 'Have ye not read that he that made them at the beginning, made them male and female, *and said*, for this cause,' &c. (Matt. xix. 4, 5). It is a highly important circumstance in this transaction, that God created only *one* female for *one* man, and united them—a circumstance which is the very basis of our Lord's reasoning in the passage against divorce and re-marriage; but which basis is lost, and his reasoning consequently rendered inconclusive, by the inattention of our translators to the absence of the article, 'he made them ἄρσεν καὶ θῆλυ,' *a* male and *a* female, 'and said, they shall become one flesh; so that they are no more two, but one flesh. What, therefore, God hath joined together, let no man put asunder.' 'The weight of our Lord's argument,' says Campbell, 'lay in this circumstance, that God at first created no more than a single pair, one of each sex, whom he united in the bond of marriage, and, in so doing, exhibited a standard of that union to all generations.' 'The word δύο,' he observes, 'has indeed no word answering to it in the present Masoretic editions of the Hebrew Bible, but it is found in the Samaritan, Septuagint, Vulgate, Syriac, and Arabic versions of the Old Testament, and in all the quotations of the passage in the New Testament (Matt. xix. 5; Mark x. 8; 1 Cor. vi. 16; Ephes. v. 31), and it may be reasonably concluded that the ancient reading in the Old Testament was the same with that in the New' (*The Four Gospels*, &c., vol. ii. p. 427, Lond. 1787). The apostacy introduced a new feature into the institution, namely, the subjection of the wife's will to that of her husband (Gen. iii. 16; comp. Num. xxx. 6-16). The primitive model was adhered to even by Cain, who seems to have had but one wife (Gen. iv. 17). Polygamy, one of the earliest developments of human degeneracy, was introduced by Lamech, who 'took unto him two wives' (Gen. iv. 19; circa 3871 B.C.). The intermarriage of 'the Sons of God,' *i. e.* the worshippers of the true God, with 'the daughters of men,' *i. e.* the irreligious (B.C. 2468), is the next incident in the history of marriage. They indulged in unrestrained polygamy, 'they took them wives of all that they chose.' From this event may be dated that headlong degeneracy of mankind at this period, which ultimately brought on them extirpation by a deluge (Gen. vi. 3-7). At the time of that catastrophe Noah had but one wife (Gen. vii. 7), and so each of his sons (ver. 13). The remaining part of the investigation will be pursued according to Townsend's chronological arrangement, as affording a means of tracing the development of the subject in succeeding times, though differences of opinion may be entertained respecting the true chronological order of some of the books or passages. According to that arrangement, Job next appears (B.C. 2130) as the husband of one wife (Job ii. 9; xix. 17). Reference is made to the adulterer, who is represented as in terror and accursed (xxiv. 15-18). The wicked man is represented as leaving 'widows' behind him; whence his polygamy may be inferred (xxvii. 15). Job expresses his abhorrence of fornication (xxxi. 1), and of adultery (ver. 9), which appears in his time to have been punished by the judges (ver. 11). Following the same arrangement, we find Abraham and Nahor introduced as having each one wife (Gen. xi. 29). From the narrative of Abraham's first equivocation concerning Sarah, it may be gathered that marriage was held sacred in Egypt. Abraham fears that the Egyptians would sooner rid themselves of him by murder than infringe by adultery the relation of his wife to an obscure stranger. The reproof of Pharaoh, 'Why didst thou say, She is my sister? so I might have taken her to me to wife: now therefore behold thy *wife*, take her, and go thy way' (Gen. xii. 11-19), affords a most honourable testimony to the views of marriage entertained by Pharaoh at that period, and most likely by his court and nation. It seems that Sarah was Abraham's half-sister. Such marriages were permitted till the giving of the law (Lev. xviii. 9). Thus Amram, the father of Moses and Aaron, married his father's sister (Exod vi. 20), a union forbidden in Lev. xviii. 12.

The first mention of concubinage, or the condition of a legal though subordinate wife, occurs in the case of Hagar, Sarah's Egyptian handmaid, whom Sarah, still childless, after a residence of ten years in Canaan, prevailed on Abraham, apparently against his will, to receive into that relation (Gen. xvi. 1), which was however considered inviolable (Gen. xlix. 4; Lev. xviii. 8; 2 Sam. iii. 8, 16, 21, 22; 1 Chron. v. 1). The vehement desire for offspring, common to women in the East, as appears from the histories of Rebecca (Gen. xxv. 21), of Rachel (xxx. 1), of Leah (ver. 5), and of Hannah (1 Sam. i. 6, 7), seems to have been Sarah's motive for adopting a procedure practised in such cases in that region in all ages.

The miseries naturally consequent upon it are amply portrayed in the history of the Patriarchs (Gen. xvi. 4-10; xxx. 1, 3, 15).

Lot does not appear to have exceeded one wife (Gen. xix. 15). The second equivocation of the same kind by Abraham respecting Sarah elicits equally honourable sentiments concerning marriage, on the part of Abimelech, king of Gerar (Gen. xx. 5, 6, 9, 10, &c.), who, it appears, had but one proper wife (ver. 17; see also ch. xxvi. 7-11). Perhaps Abraham relied on the ancient custom, which will shortly be adverted to, of the consent of the 'brother' being requisite to the sister's marriage, and thus hoped to secure his wife's safety and his own. In ancient times the parents chose wives for their children (Gen. xxi. 21; xxxviii. 5; Deut. xxii. 16); or the man who wished a particular female asked his father to obtain her from *her* father, as in the case of Shechem (B.C. 1732; Gen. xxxiv. 4-6; comp. Judges xiv. 2, 3). The consent of her brothers seems to have been necessary (ver. 5, 8, 11, 13, 14; comp. Gen. xxiv. 50; 2 Sam. xiii. 20-29). A dowry was given by the suitor to the father and brethren of the female (ver. 11, 12; comp. 1 Sam. xviii. 25; Hos. iii. 2). This, in a common case, amounted to from 30 to 50 shekels, according to the law of Moses (comp. Exod. xxii. 16; Deut. xxii. 29). Pausanias considers it so remarkable for a man to part with his daughter without receiving a marriage-portion with her, that he takes pains, in a case he mentions, to explain the reason (*Lacon.* iii. 12. 2). In later times we meet with an exception (Tobit viii. 23). It is most likely that from some time before the last-named period the Abrahamidæ restricted their marriages to circumcised persons (Gen. xxviii. 8; comp. Judg. iii. 6; 1 Kings xi. 8, 11, 16; Joseph. *Antiq.* xi. 8. 2; xii. 4. 6; xviii. 9. 5). The marriage of Isaac developes additional particulars; for beside Abraham's unwillingness that his son should marry a Canaanitess (Gen. xxiv. 3; comp. xxvi. 34; xxvii. 46; Exod. xxxiv. 16; Josh. xxiii. 12; Ezra ix. 2; x. 3, 10, 11), costly jewels are given to the bride at the betrothal (ver. 22), and 'precious things to her mother and brother' (ver. 53); a customary period between espousals and nuptials is referred to (ver. 55); and the blessing of an abundant offspring invoked upon the bride by her relatives (ver. 60)—which most likely was the only marriage ceremony then and for ages afterwards (comp. Ruth iv. 11-13; Ps. xlv. 16, 17); but in Tobit vii. 3, the father places his daughter's right hand in the hand of Tobias before he invokes this blessing. It is remarkable that no representation has been found of a marriage ceremony among the tombs of Egypt (Wilkinson's *Ancient Egypt.* vol. ii., Lond. 1837). The Rabbins say that among the Jews it consisted of a kiss (Cant. i. 2). It is probable that the marriage covenant was committed to writing (Prov. ii. 17; Mal. ii. 14; Tobit vii. 13, 14); perhaps, also, confirmed with an oath (Ezra xvi. 8). It seems to have been the custom with the patriarchs and ancient Jews to bury their wives in their own graves, but not their concubines (Gen. xlix. 31). In Gen. xxv. 1, Abraham, after the death of Sarah, marries a second wife. Esau's polygamy is mentioned Gen. xxviii. 9; xxxvi. 2-13 (B.C. 1760). Jacob serves seven years to obtain Rachel in marriage (Gen. xxix. 18-20); and has a marriage feast, to which the men of the place are invited (ver. 22; comp. Cant. v. 1; viii. 33). Samson's marriage feast lasts a week (Judg. xiv. 10-12; B.C. 1136; comp. John ii. 1, &c.); in later times it lasted longer (Tobit viii. 19). The persons invited to Samson's marriage are young men (Judg. xiv. 10); called 'sons of the bridal-chamber,' Matt. ix. 15. Females were invited to marriages (Ps. xlv. 14), and attended the bride and bridegroom to their abode (1 Macc. ix. 37); and in the time of Christ, if it was evening, with lamps and flambeaux (Matt. xxv. 1-10). In later ages the guests were summoned when the banquet was ready (Matt. xxii. 3), and furnished with a marriage garment (ver. 11). The father of the bride conducted her at night to her husband (Gen. xxix. 23; Tobit viii. 1). The bride and bridegroom were richly ornamented (Isa. lxi. 10). In Mesopotamia, and the East generally, it was the custom to marry the eldest sister first (Gen. xxix. 26). By the deception practised upon Jacob in that country, he marries two wives, and, apparently, without any one objecting (ver. 31). Laban obtains a promise from Jacob not to marry any more wives than Rachel and Leah (Gen. xxxi. 50). The wives and concubines of Jacob and their children travel together (Gen. xxxii. 22, 23); but a distinction is made between them in the hour of danger (Gen. xxxiii. 1, 2; comp. Gen. xxv. 6). Following the arrangement we have adopted, we now meet with the first reference to *the Levirate Law.* Judah, Jacob's son by Leah, had married a Canaanitish woman (Gen. xxxviii. 2). His first-born son was Er (ver. 3). Judah took a wife for him (ver. 6). Er soon after died (ver. 7), and Judah said to Onan, 'Go in unto thy brother's wife, Tamar, and marry her, and raise up seed to thy brother.' 'Onan knew that the offspring would not be his.' All these circumstances bespeak a pre-established and well known law, and he evaded the purpose of it, and thereby, it is said, incurred the wrath of God (ver. 10). It seems, from the same account, to have been well understood, that upon his death the duty devolved upon the next surviving brother. Judah interfered to prevent him from fulfilling it, and this two-fold denial suggested to Tamar the stratagem related of her in Gen. xxxviii. 13-26. No change is recorded in this law till just before the entrance of Israel into Canaan (B.C. 1451), at which time Moses modified it by new regulations to this effect:—'If brethren dwell together (*i. e.* in the same locality), and one of them die, and leave no child, the wife of the dead must not marry out of the family, but her husband's brother or his next kinsman must take her to wife, and perform the duty of a husband's brother, and the first-born of this union shall succeed in the name of his deceased father, that his name may be extant in Israel;' not literally bear his name, for Ruth allowed her son by Boaz to be called Obed, and not Mahlon, the name of her first husband (Ruth iv. 17, yet see Josephus, *Antiq.*, iv. 8, 23). In case the man declined the office, the woman was to bring him before the elders, loose his shoe from off his foot, and spit in, or, as some render it, before his face, by way of contempt (Deut. xxv. 9, 10: Josephus understands *in* the face, *Antiq.* v. 9. 4), and shall say, 'So shall it be done unto the man that will not build up his brother's house; and his name shall be called in Israel, the house of

him that hath his shoe loosed,' *quasi* Baresole! It does not appear that the original law was binding on the brother, if already married; and we may well believe that Moses, who wished to mitigate it, allowed of that exception. The instance of Ruth (B.C. 1245), who married Boaz, her husband's relation, exhibits the practice of the law under the Judges. Boaz was neither the father of, nor the nearest relation to, Elimelech, father-in-law to Ruth, the wife of Mahlon, and yet he married her after the refusal of him who was the nearest relation (Ruth ii. 20; iii., iv.). These facts serve to exonerate the stratagem of Tamar, Judah's daughter, already alluded to (Gen. xxxviii. 13-26), which was dictated by a wish to fulfil the Levirate Law as near as possible. Accordingly, when Judah discovered it he justified her conduct, saying: 'She hath been more righteous than I,' *i. e.* has more adhered to the law, 'because I gave her not to Shelah my son' (ver. 26; comp. ver. 11). Hence, then, the children of Judah, by Tamar, inherited as his sons legally as well as naturally, and are reckoned to him in the genealogy in 1 Chron. ii. 4: 'And Tamar, his daughter-in-law, bare him Pharez and Zerah' (comp. Num. xxvi. 20). The legitimacy of her offspring is an important question; for the pedigree of David, Solomon, and all the kings of Judah, and even of Christ himself, is derived from Pharez, the son of Judah, by Tamar (comp. Ruth iv. 18-22, and Matt. i. 3-16). It must, nevertheless, be confessed that the Levirate Law was attended with many inconveniences, not the least of which was the inducement which it afforded to females to intrigue and indelicacy, as in the cases of Tamar and Ruth. A subtle objection to the doctrine of the resurrection, proposed to our Lord by the Sadducees, was grounded upon a real or supposed case of compliance with it running through a family of seven brethren (Matt. xxii. 23, &c.). The marriage of Herod with Herodias, his brother Philip's wife (Mark vi. 17, 18), did not come under the Levirate Law; for Josephus states that Herodias had a daughter by her husband, and that the marriage with Herod was contracted in the lifetime of her husband (*Antiq.* xviii. 5. 4). Resemblances to this law have been traced in India (*Asiatic Researches*, iii. 35); among the Athenians (Terence, *Phorm.*, act i. sc. ii. 75, 6); among the ancient Germans (Tacitus, *Germ.* 8); and among the modern Egyptians (Niebuhr, *Description de l'Arabie*, p. 61; Volney, *Voyage en Syrie*, tom. ii. p. 74).

To return from this digression. It should seem, from the instance of Potiphar's wife, that monogamy was practised in Egypt (Gen. xxxix. 7). Pharaoh gave to Joseph one wife (Gen. xli. 45). The Israelites, while in Egypt, seem to have restricted themselves to one. One case is recorded of an Israelite who had married an Egyptian woman (Lev. xxiv. 10). The giving of the law (B.C. 1491) acquaints us with many regulations concerning marriage, which were different from the practices of the Jews while in Egypt, and from those of the Canaanites, to whose land they were approaching (Lev. xviii. 3). There we find laws for regulating the marriages of bondmen (Exod. xxi. 3, 4), and of a bondmaid (ver. 7-12). The prohibition against marriages with the Canaanites is established by a positive law (Exod. xxiv. 16). Marriage is prohibited with any one near of kin, 'of the remainder of his flesh' (Lev. xviii. 6-19). A priest is prohibited from marrying one that had been a harlot, or divorced (Lev. xxi. 7). The high-priest was also excluded from marrying a widow, and restricted to one wife (ver. 13, 14). Daughters who, through want of brothers, were heiresses to an estate, were required to marry into their own tribe, and, if possible, a kinsman, to prevent the estate passing into another family (Num. xxvii. 1-11; xxxvi. 1-12). The husband had power to annul his wife's vow, if he heard it, and interfered at the time (Num. xxx. 6-16). If a man had betrothed a wife, he was exempt from the wars, &c. (Deut. xx. 7; xxiv. 5). It was allowed to marry a beautiful captive in war, whose husband probably had been killed (Deut. xxi. 10-14, &c.). Abundance of offspring was one of the blessings promised to obedience, during the miraculous providence which superintended the Theocracy (Lev. xxvi. 9; Deut. vii. 13, 14; xxviii. 11; Ps. cxxvii. 3; cxxviii. 3); and disappointment in marriage was one of the curses (Deut. xxviii. 18, 30: comp. Ps. xlvii. 9; Jer. viii. 10). A daughter of a distinguished person was offered in marriage as a reward for perilous services (Josh. xv. 16, 17; 1 Sam. xvii. 25). Concubinage appears in Israel (B.C. 1413, Judg. xix. 1-4). The violation of a concubine is avenged (Judg. xx. 5-10). Polygamy (Judg. viii. 30). The state of marriage among the Philistines may be inferred, in the time of Samson, from the sudden divorce from him of his wife by her father, and her being given to his friend (Judg. xiv. 20), and from the father offering him a younger sister instead (Judg. xv. 2). David's numerous wives (2 Sam. iii. 3-5). In Ps. xlv., which is referred to this period by the best harmonists, there is a description of a royal marriage upon a most magnificent scale. The marriage of Solomon to Pharaoh's daughter is recorded in 1 Kings iii. 1; to which the Song of Solomon probably relates, and from which it appears that his mother 'crowned him with a crown on the day of his espousals' (ver. 3, 11; and see Sept. and Vulg. of Is. lxi. 10). It would appear that in his time females were married young (Prov. ii. 17; comp. Joel i. 8); also males (Prov. v. 18). An admirable description of a good wife is given in Prov. xxxi. 10-31. The excessive multiplication of wives and concubines was the cause and effect of Solomon's apostacy in his old age (1 Kings xi. 1-8). He confesses his error in Ecclesiastes, where he eulogizes monogamy (viii. 9; vii. 29). Rehoboam took a plurality of wives (2 Chron. xi. 18-21); and so Abijah (2 Chron. xiii. 21), and Ahab (1 Kings xx. 3), and Belshazzar, king of Babylon (Dan. v. 2). It would seem that the outward manners of the Jews, about the time of our Lord's advent, had become improved, since there is no case recorded in the New Testament of polygamy or concubinage among them. Our Lord excludes all causes of divorce, except whoredom (*παρεκτὸς λόγου πορνείας*, Matt. v. 32), and ascribes the origin of the Mosaic law to the hardness of their hearts. The same doctrine concerning divorce had been taught by the prophets (Jer. iii. 1; Micah ii. 9; Mal. ii. 14-16). The apostles inculcate it likewise (Rom. vii. 3; 1 Cor. vii. 4, 10, 11, 39); yet St. Paul considers obstinate desertion by an unbelieving party as a

release (1 Cor vii. 15). Our Lord does not reprehend celibacy for the sake of religion, 'those who make themselves eunuchs for the kingdom of heaven's sake' (Matt. xix. 12; comp. 1 Cor. vii. 32, 36). Second marriages not condemned in case of death (Rom. vii. 12). Mixed marriages disapproved (1 Cor. vii. 39; 2 Cor. vi. 14). Early marriage not recommended (1 Cor. vii. 36). Marriage affords the means of copious illustrations to the writers of Scripture. The prophets employ it to represent the relation of the Jewish church to Jehovah, and the apostles that of the Christian church to Christ. The applications they make of the idea constitute some of the boldest and most touching figures in the Scripture. The striking similarity between modern and ancient Oriental customs, in regard to marriage, may be seen in the travels of Arvieux, Russell, Bruce, Buckingham, &c.; and see Selden, *Uxor Ebraicu, seu de Nuptiis et Divor.*, Londini, 1646; Selden, *De Successionibus*, c. 14; *De Nuptiis Boazi et Ruthæ*, Lond., 1631; Perizonius, *Dissert. de Constitut. Div. super ducenda defuncti patris uxore.* Lugd. Batav. 1740.—J. F. D.

MARS' HILL. [Areopagus.]

MARTHA (Μάρθα), sister of Lazarus and Mary, who resided in the same house with them at Bethany [Lazarus]. From the house at Bethany being called 'her house,' in Luke x. 38, and from the leading part which Martha is always seen to take in domestic matters, it has seemed to some that she was a widow, to whom the house at Bethany belonged, and with whom her brother and sister lodged; but this is uncertain, and the common opinion, that the sisters managed the household of their brother, is more probable. Luke probably calls it her house because he had no occasion to mention, and does not mention, Lazarus; and when we speak of a house which is occupied by different persons, we avoid circumlocution by calling it the house of the individual who happens to be the subject of our discourse. Jesus was intimate with this family, and their house was often his home when at Jerusalem, being accustomed to retire thither in the evening, after having spent the day in the city. The point which the Evangelists bring out most distinctly with respect to Martha, lies in the contrariety of disposition between her and her sister Mary. The first notice of Christ's visiting this family occurs in Luke x. 38-42. He was received with great attention by the sisters; and Martha soon hastened to provide suitable entertainment for the Lord and his followers, while Mary remained in his presence, sitting at his feet, and drinking in the sacred words that fell from his lips. The active, bustling solicitude of Martha, anxious that the best things in the house should be made subservient to the Master's use and solace, and the quiet earnestness of Mary, more desirous to profit by the golden opportunity of hearing his instructions, than to minister to his personal wants, strongly mark the points of contrast in the characters of the two sisters. 'There was,' says Bishop Hall, 'more solicitude in Martha's active part, more piety in Mary's sedentary attendance: I know not in whether more zeal. Good Martha was desirous to express her joy and thankfulness for the presence of so blessed a guest, by the actions of her careful and plenteous entertainment. I know not how to censure the holy woman for her excess of care to welcome our Saviour. Sure, she herself thought she did well; and out of that confidence feared not to complain to Christ of her sister.' This she did in the words, 'Lord, carest thou not that my sister leaveth me to serve alone?' Out of respect to Jesus, she presumed not to call her sister privately away without his leave. Her words, however, seem to convey a gentle reproach to Christ for not having sufficient regard to her exertions; and in this she was wrong, as well as in measuring her sister's conduct by her own. Apprehending her own act to be good, she supposed her sister's wrong, because it was not the same; 'whereas goodness,' as the bishop remarks, 'hath much latitude. Ill is opposed to good, not good to good. Mary might hear, Martha might serve, and both do well.' Martha no doubt expected that Jesus would commend her active zeal, and send away Mary with a slight reproof. Great, therefore, was her surprise to hear him say, 'Martha, Martha, thou art careful and troubled about many things: but *one* thing is needful: and Mary hath chosen that good part, which shall not be taken away from her.' This has been variously explained; but the obvious reference is to the value of the soul as compared with that of the body, and to the eternal welfare of the one as compared with the temporary interests of the other.

The part taken by the sisters in the transactions connected with the death and resurrection of Lazarus, is entirely and beautifully in accordance with their previous history. Martha is still more engrossed with outward things, while Mary surrenders herself more to her feelings, and to inward meditation. When they heard that Jesus was approaching, Martha hastened beyond the village to meet him, 'but Mary sat still in in the house' (John xi. 20, 22). When she saw Jesus actually appear, whose presence had been so anxiously desired, she exhibits a strong degree of faith, and hesitates not to express a confident hope that he, to whom all things were possible, would even yet afford relief. But, as is usual with persons of her lively character, when Christ answered, with what seemed to her the vague intimation, 'Thy brother shall rise again,' she was instantly cast down from her height of confidence, the reply being less direct than she expected: she referred this saying to the general resurrection at the last day, and thereon relapsed into despondency and grief. This feeling Jesus reproved, by directing her attention, before all other things, to that inward, eternal, and divine life, which consists in union with him, and which is raised far above the power even of the grave. This he did in the magnificent words, 'I am the resurrection, and the life: he that believeth in me, though he were dead, yet shall he live: and whosoever liveth and believeth in me shall never die. Believest thou this?' Sorrow and shame permitted the troubled Martha, in whose heart the feeling of an unconditional and entire surrender to his will was re-awakened, to make only the general confession that he was actually the promised Messiah; in which confession she, however, comprised an acknowledgment of his power and greatness. It is clear, however, that she found nothing in this discourse with Christ, to encourage her first expectation of relief. With the usual

rapid change in persons of lively susceptibilities, she had now as completely abandoned all hope of rescue for her brother, as she had before been sanguine of his restoration to life. Thus, when Jesus directed the stone to be rolled away from the sepulchre, she gathered from this no ground of hope; but rather objected to its being done, because the body, which had been four days in the tomb, must already have become disagreeable. The reproof of Christ, 'Said I not unto thee, that, if thou wouldest believe, thou shouldest see the glory of God?' suggests that more discourse had passed between them than the evangelist has recorded, seeing that no such assurance is contained in the previous narrative (John xi. 39, 40).

Nothing more is recorded of Martha, save that some time after, at a supper given to Christ and his disciples at Bethany, she, as usual, busied herself in the external service. Lazarus, so marvellously restored from the grave, sat with her guests at table. 'Martha served,' and Mary occupied her favourite station at the feet of Jesus, which she bathed with her tears, and anointed with costly ointment (John xii. 1, 2). [Lazarus; Mary.]

There are few characters in the New Testament, and certainly no female character, so strongly brought out in its natural points as that of Martha; and it is interesting to observe that Luke and John, although relating different transactions in which she was concerned, perfectly agree in the traits of character which they assign to her. Tholuck has skilfully followed out its development in his *Commentary* on the eleventh chapter of St. John. See also Niemeyer, *Charakt.* i. 66; and Hall's *Contemplations*, vol. iii., b. 4, *Contemp.*, 17, 23, 24.
